NC STATE UNIVERSITY

2022-2023 GRADUATE CATALOG

Table of Contents

North Carolina State University

Welcome to North Carolina State University!

About the Catalog

This catalog showcases all of the programs and plans offered at our university, from undergraduate baccalaureate degrees, to the Doctor of Veterinary Medicine.

The Undergraduate Catalog (http://catalog.ncsu.edu/undergraduate/) houses important information on academic policies for student success, undergraduate admission and readmission information, and different ways you can be involved on during your undergraduate career at NC State.

The Graduate Catalog (p. 66) hosts a wealth of information on paths to your degree, career and research opportunities, and the NC State Graduate School Handbook.

Learn about all of the student activities (p. 45) available to the Wolfpack, exceptional services (p. 51) offered to all students, and other important resources (p. 36) that we're proud to provide.

Check out the Course Descriptions (p. 969) to see every course option being offered for the 2020-2021 academic year, and view the new dynamic Course Search (http://catalog.ncsu.edu/course-search/) to search courses by subject or keyword.

We're happy you're here, and we can't wait to show you all that NC State University has to offer. What are you waiting for?

About Us

North Carolina State University (https://www.ncsu.edu/) (NC State) began as a land-grant institution grounded in agriculture and engineering. Today, we're building a leading public research university that excels across disciplines.

NC State is a powerhouse in science, technology, engineering and math. We lead in agriculture, education, textiles, business and natural resources. We're at the forefront of teaching and research in design, the humanities and the social sciences. And we're home to one of the planet's best colleges of veterinary medicine.

Our more than 36,000 undergraduate and graduate students learn by doing. They pursue research and start new companies. They forge connections with top employers and serve local and global communities. And they enjoy an outstanding return on investment.

Introduction

Founded March 7, 1887 by the North Carolina General Assembly under the provisions of the national Land-Grant Act, North Carolina State University is now one of the nation's preeminent research institutions and the university of choice for accomplished, high-performing students from around the world.

NC State's extensive public and private partnerships create a unique culture of collaboration to address the grand challenges facing society. The university's solution-driven research, technology and scholarship lead to new ideas, products and services. It's no wonder NC State is know for its forward-looking philosophy: Think and Do.

With more than 35,000 students and 8,000 faculty and staff, NC State is a comprehensive university known for its leadership in interdisciplinary innovation. As a leader in experiential education, NC State provides remarkable opportunities for students to put learning into practice and to develop career-ready skills.

The university is consistently ranked as a top-tier university by *U.S. News & World Repor*t and is regularly named by Kiplinger's as a top-10 best value in public higher education, a ranking that combines academic quality and affordability. Because of this value, NC State students graduate with lower-than-average debt, according to *U.S. News*.

Beginning their freshman year, NC State students are able to explore their major right away — by conducting research alongside faculty or starting a challenging co-op or internship. NC State has a large and diverse student population with the feel of a tight-knit community.

NC State is located in the Research Triangle region, home to many of the country’s leading Fortune 500 technology, research and pharmaceutical companies. NC State’s Centennial Campus is home to more than 150 corporate and government research partners, incubator companies and NC State research units.

Mission, Vision and Values

Mission

As a research-extensive land-grant university, North Carolina State University is dedicated to excellent teaching, the creation and application of knowledge, and engagement with public and private partners. By uniting our strength in science and technology with a commitment to excellence in a comprehensive range of disciplines, NC State promotes an integrated approach to problem solving that transforms lives and provides leadership for social, economic, and technological development across North Carolina and around the world.

Vision

NC State University will emerge as a preeminent technological research university recognized around the globe for its innovative education and research addressing the grand challenges of society.

Values

Consonant with our history, mission, and vision, North Carolina State University affirms these core values:

- Integrity—in the pursuit, creation, application, and dissemination of knowledge
- Freedom—of thought and expression
- Respect—for cultural and intellectual diversity
- Responsibility—for individual actions and service to society
- Stewardship—in sustaining economic and natural resources
- Excellence—in all endeavors

History

Founded March 7, 1887 by the North Carolina General Assembly, the school--then known as the North Carolina College of Agriculture and Mechanic Arts--embodied ideals that were rapidly transforming the field of higher education. Chief among them was the belief that colleges should not be reserved for a select few and that the children of farmers, mechanics and other workers should have access to the opportunities and benefits of higher education.

NC State was established under the provisions of the Morrill Act of 1862, which allowed the U.S. government to donate federally owned land to the states for the purpose of establishing colleges that would teach “agriculture and the mechanic arts.” The brand-new school held its first classes in the fall of 1889 with 72 students, six faculty members and one building. In the early 1900s, a new federal program sparked an era of outreach work at the college. The 1914 passage of the Smith-Lever Act created an educational partnership between land-grant colleges and the U.S. Department of Agriculture. Under this new cooperative extension program, the colleges would send staff to meet with farmers around the state and provide practical agricultural instruction. This led North Carolina to establish the Cooperative Agricultural Extension Service (now the North Carolina Cooperative Extension Service (http://www.ces.ncsu.edu/)) at NC State.

By the 1920s, North Carolina State College (as the school was then known) was beginning to grow beyond its original agricultural and mechanical focus, adding schools of engineering, textiles, education and business, as well as a graduate school. The Depression posed economic challenges for higher education throughout the nation, and State College was no exception. As the crisis slowly eased, the college renewed its growth, adding students and developing new programs until the onset of World War II. State College contributed to the war effort by hosting a number of military detachments and training exercises and by refitting the work of several departments and programs to military and defense purposes.

The campus experienced unparalleled growth during the postwar years as the G.I. Bill brought thousands of former servicemen to campus. In the following decades, the college continued to expand its curricula, creating schools of design, forestry, physical and mathematical sciences,

and humanities and social sciences. During these years of growth, the name was changed again, this time to North Carolina State University at Raleigh—the university's current official name.

The university celebrated its 100th anniversary in 1987, which also saw the creation of Centennial Campus (http://centennial.ncsu.edu/), bringing together academic, corporate, government and nonprofit leaders to partner in teaching, research and economic development.

NC State has developed into a vital educational and economic resource, with more than 34,000 students and 8,000 faculty and staff. A wealth of university outreach and extension programs continue to provide services and education to all sectors of the state's economy and its citizens. Consistently ranked a best value (http://www.kiplinger.com/tools/colleges/school.php?id=7794) among the nation's public universities, NC State — the state's largest university — is an active, vital part of North Carolina life. Today, more than 128 years after its founding, NC State continues to follow its original mission: opening the doors of higher education to the citizens of North Carolina and providing teaching, research and extension that strengthen the state and its economy.

Campus

NC State University is located west of downtown Raleigh on 2,099 acres. The campus acreage includes Centennial Campus on 1,105 acres and Centennial Biomedical Campus on 215 acres. West Campus includes the College of Veterinary Medicine and the stadium/arena complex. Nearby are research farms, biology and ecology sites, horticulture and floriculture nurseries and research forests that cover an additional 3,000 acres. Elsewhere across the state are research farms and 4-H camps.

Research Triangle Park

NC State is one of three nationally renowned research universities in the Triangle area, along with Duke University in Durham and the University of North Carolina at Chapel Hill. Within the 30 mile triangle formed by the three universities is Research Triangle Park, a 7,000-acre research park founded in 1959 by leaders in academia, business and government. Today, Research Triangle Park is home to some of the most innovative technology and research-based companies in the world.

Faculty

The university has 9,553 employees, including 2,360 faculty. Among the many honors and recognitions received by members of the faculty are 9 memberships in the National Academy of Sciences, 18 memberships in the National Academy of Engineering, one membership in the Institute of Medicine, and 778 members of NC State's Academy of Outstanding Teachers.

Students

In the 2021 Fall Semester, the university's head count enrollment totaled 37,555. Included in this number were 25,8189 students in undergraduate degree programs, 9,394 in graduate degree programs, 397 First Professional and 2,069 non- degree-seeking students. The total enrollments by college were:

- Agriculture and Life Sciences - 3,937
- Design - 924
- Education - 1,957
- Engineering - 10,269
- Natural Resources - 2,104
- Humanities and Social Sciences - 4,693
- Management - 4,556
- Sciences - 4,113
- Textiles - 1,001
- Veterinary Medicine - 488
- University College - 1,218
- Other- 1,710

The student population included 2,401 Black or African American students, 2,417 Hispanic students, 2,996 Asian, American Indian and Pacific Islander students, and 1,405 students identifying as two or more races. The fall 2021 class also included 18,552 female students. Students at the university come from 53 U.S. states and territories (including District of Columbia) and 116 foreign countries. The international enrollment is a distinctive feature of the institution as 3,913 international students give the campus a cosmopolitan atmosphere.

Outreach and Extension

As North Carolina's flagship research intensive, community engaged land-grant university, NC State has a unique mission to serve the citizens of this state through technical assistance, professional development, lifelong education, technology transfer, and other means of applying knowledge to real world issues and problems. Faculty, students, and staff from all ten academic colleges and other units engage in collaborative research, learning, and service partnerships with business, industry, government, and communities, in the Triangle region and across the state. Extension and engagement imperatives include economic development, environmental stewardship, K-12 education, leadership development, and entrepreneur support. NC State's Office of Extension, Engagement, and Economic Development reaches over one million citizens annually through Cooperative Extension, Industrial Extension, McKimmon Center for Extension and Continuing Education, NC State's Economic Development Partnership, the General Hugh Shelton Leadership Center, and the North Carolina Small Business and Technology Development Center.

Administration

NC State is one of 16 constituent institutions of the multi-campus University of North Carolina system (http://www.northcarolina.edu/). The UNC Board of Governors is the policy-making body legally charged with "the general determination, control, supervision, management, and governance of all affairs, of the constituent institutions."

North Carolina State University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (https://www.sacscoc.org/) to award associate, baccalaureate, master's, and doctoral degrees. Questions about the accreditation of North Carolina State University may be directed in writing to:

Southern Association of Colleges and Schools Commission on Colleges
1866 Southern Lane
Decatur, Georgia, 30033-4097

Or by calling (404) 679-4500, or by using the information available on SACSCOC's website (https://www.sacscoc.org/).

Normal inquiries about NC State, such as admission requirements, financial aid, educational programs, etc., should be addressed directly to the university and not the Commission's office.

Note: Dates in this publication are those that have been approved by appropriate agencies of the university at the time of publication. Changes may be announced in official university publications subsequent to this publication and maintained on the S (http://www.ncsu.edu/registrar/calendars/)tudent Services Center website (https://go.ncsu.edu/academiccalendar/).

Admission and Enrollment

View the following links for helpful information about the various paths to admission to NC State, enrollment options and procedures, financial aid eligibility, and university tuition and fees.

Admission

What best describes the type of student you are? Are you looking to attend NC State for one of our outstanding undergraduate baccalaureate degree programs? Are you thinking about pursing your doctoral degree here? Or, do you want to explore some of our course offerings as a Non-Degree Studies student? Check out the links below to view admissions requirements and procedures based on your academic history, needs and goals.

Undergraduate Admission

NC State is a member of the Common Application (http://www.commonapp.org/) and the Coalition for Access, Affordability, and Success (http://www.coalitionforcollegeaccess.org/). Students may choose to apply through either application system. Undergraduate Admissions implements a notification date system for both domestic freshman and transfer applicants. International applicants are notified of their admission decision on a rolling basis once their application is complete. Freshmen are strongly encouraged to apply during the fall of their senior year in high school by the early action deadline.

Application Dates and Deadlines (https://admissions.ncsu.edu/apply/dates-and-deadlines/)

Freshman and transfer applicants for the College of Design and Fashion and Textile Design program must submit a complete application including a portfolio and additional essay by November 1 and list it as their first choice major.

All applications for the spring semester should be submitted prior to October 1. A few programs do not accept applications for spring entry including applied mathematics and mathematics, College of Design studio-based majors, College of Engineering, Exploratory Studies, fashion and textile design, physics and statistics.

Students are notified of their decision on their wolfPAW account (https://wolfpaw.ncsu.edu/Default.asp) and admitted students (https://admissions.ncsu.edu/enroll/) must confirm their enrollment by May 1, or within ten days of if they are accepted after May 1.

The Undergraduate Admissions website (http://admissions.ncsu.edu/) provides more information on the application review process and procedure.

Raleigh, NC 2707
Phone: 919-515-2434
Email: undergrad-admissions@ncsu.edu

Jon Westover, Associate Vice Provost and Director of Undergraduate Admissions

Admission to the university is highly competitive. Applicants are asked to indicate their first and second choices for a curriculum, including undeclared majors within a college, or, if undecided, to indicate their choice of participating in University College Exploratory Studies. Applicants not admitted in their first curriculum choice will be reviewed for admission in their second curriculum choice. The admissions decision is based on a holistic review of a complete application. Of primary importance is the high school record, including the level and difficulty of the courses taken, the overall grade point average, rank in class, and scores on the SAT or the ACT. Extracurricular involvement, leadership, and many other factors are also considered.

Admissions Requirements

The Board of Governors of the University of North Carolina System has determined that the Minimum Course Requirements (MCR) for all constituent institutions, including NC State, shall include a high school diploma or its equivalent and the following course units taken in high school:

1. Six course units in language, including
   - Four units in English
   - Two units in a language other than English
2. Four course units of mathematics in any of the following combinations:
   - Algebra I and II, Geometry, and one unit beyond Algebra II
   - Algebra I and II, and two units beyond Algebra II or
   - Integrated Math I, II, III and one unit beyond Integrated Math III
3. Three course units in science, including
   - At least one unit in a life or biological science, and
   - At least one unit in physical science, and
   - At least one laboratory course
4. Two course units in social studies, including
   - One unit in U.S. history
   - One other unit in social studies

Competitive applicants will typically exceed these minimum courses. It is recommended that every student take a foreign language course and a mathematics course in their senior year.

NC State does not conduct individual interviews with applicants, however, students are always welcome to walk-in and meet with an admissions officer at NC State's Joyner Visitor Center. Information sessions and

student led campus tours are also available Monday through Friday at the Joyner Visitor Center (http://admissions.ncsu.edu/visit/schedule-your-visit/).

How to Apply

1. Review our deadlines: The application opens in August
2. Complete the application through the Common App or the Coalition App; we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
3. Pay the $85 application fee, or provide an official fee waiver.
4. Self-report your test scores. Visit our website (https://admissions.ncsu.edu/apply/freshmen/application-process/) for more information and for our school codes.
5. Submit your official academic transcript.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

Admissions Dates and Deadlines

Decisions are released on the corresponding notification date as long as the application is complete by the deadline.

Fall Entry Early Action:

- Deadline: November 1
- Notification Date: January 30

Fall Entry Regular Decision:

- Deadline: January 15
- Notification Date: March 30

Spring Entry Regular Decision:

- Deadline: October 1
- Notification Date: December 1

Some programs do not accept applications for spring entry. Visit our website for details.

Studio-Based Majors

The following programs are considered studio-based majors and are fall entry only:

- Architecture
- Art & Design
- Fashion & Textile Design
- Graphic Design
- Industrial Design

Application Deadline: November 1

Portfolio and Optional Essay Due: November 1

Agricultural Institute

NC State's 2-year Agricultural Institute (AGI) (http://catalog.ncsu.edu/undergraduate/agriculture-life-sciences/agricultural-institute/) accepts freshman and transfer applicants.

Fall Entry:

- Deadline: June 1
- Decision Date: Rolling

Spring Entry:

- Deadline: November 1
- Decision Date: Rolling

Credit Opportunities

Students can jump-start their college careers by acquiring pre-enrollment credits by one or more of the following means:

1. by passing a proficiency examination administered by a teaching department at NC State;
2. by meeting a specific minimum score on certain Advance Placement Program (AP), International Baccalaureate (IB) examinations, and/or A and AS Level Equivalencies; and/or
3. by attaining a minimum score on certain College Level Examination Program (CLEP) subject tests.

Learn about the recognized test curriculum, accepted test scores and credit awarded at admissions.ncsu.edu/apply/credit-opportunities (http://admissions.ncsu.edu/apply/credit-opportunities/).

Out-of-State Students

Undergraduate applicants from outside North Carolina are reviewed using the same criteria as applicants from North Carolina. NC State is limited to enrolling not more than 18 percent of total new undergraduate students from outside the state as set forth by the University of North Carolina System.

The path to NC State is not always direct. About 20 percent of our students start their college career at another college or university. All transfer applicants should have at least 30 transferable college credit hours completed, including specific coursework and a competitive GPA based on the major you are applying for. Meeting these recommendations does not guarantee admission but sets you up to be considered a competitive applicant in the review process. View our recommendations for competitive applicants (https://admissions.ncsu.edu/apply/transfers/application-review/#recommendations-for-competitive-applicants).

What We Look For

Here are some of the items we're looking at when evaluating your transfer application to NC State:

1. Your college coursework and GPA
2. Your high school coursework and test scores if you have less than 30 transferable college semester credit hours completed
3. Your interest in the program you're applying for
4. Your accomplishments/involvement outside of the classroom
5. Your background and opportunities
6. Your individual story

Visit our Transfer Admissions website (https://admissions.ncsu.edu/apply/transfers/application-review/) for more information and recommendations for competitive transfer applicants.tudents are always welcome to walk-in and meet with an admissions officer at NC State's Joyner Visitor Center. Information sessions and student led campus tours are also

available Monday through Friday at the Joyner Visitor Center (http://admissions.ncsu.edu/visit/schedule-your-visit/).

How to Apply

1. Review our deadlines: The application opens in August. Be sure to pay attention to additional requirements and timelines for Studio-Based Majors and the Agricultural Institute.
2. Plan your path, and review our recommendations for competitive applicants.
3. Complete the application through the Common App (http://www.commonapp.org/) or the Coalition App (http://www.coalitionforcollegeaccess.org/); we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
4. Pay the application fee or provide an official fee waiver.
5. Submit your official academic transcript(s) from each institution you have attended.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

Admissions Dates and Deadlines

Decisions are released on the corresponding notification date as long as the application is complete by the deadline.

Phone: 919-513-1200

At NC State we value diversity and welcome international students. Located in Raleigh, North Carolina, we are proud to be home to the most diverse student body in North Carolina hosting students from 117 different countries.

The Office of International Services (https://internationalservices.ncsu.edu/future-students/) is the main resource for international students regarding immigration regulations, university policies, employment and travel. They provide assistance to you and your family as you prepare to arrive on campus and to smooth the transition to studying in the U.S.

What We Look For

Here are some of the items we're looking at when evaluating your transfer application to NC State:

1. Your Academic Achievement
2. Your financial ability: If you require an F-1 or J-1 student visa to study in the U.S., you must prove your ability to cover the estimated school expenses by completing the Certificate of Financial Responsibility (https://admissions.ncsu.edu/wp-content/uploads/sites/8/2017/07/2018-CFR.pdf).
3. Your level of English language skills
4. Your interest in the program you are applying for
5. Your accomplishments/involvement outside the classroom
6. Your background and opportunities
7. Your individual story

Visit our International Admissions website (https://admissions.ncsu.edu/apply/international/) for more information on application considerations, including interactive interviews (for Chinese applicants) and SAT or ACT composite scores (for Freshman applicants only).

How to Apply

Visit our website to view the following information in the following languages: Spanish (https://admissions.ncsu.edu/wp-content/uploads/sites/8/2019/10/Spanish-Translation-2019-2020.pdf), Korean (https://admissions.ncsu.edu/wp-content/uploads/sites/8/2019/10/

Korean-Translation-2019-2020.pdf), Mandarin (https://admissions.ncsu.edu/wp-content/uploads/sites/8/2019/10/Mandarin-Translation-2019-2020.pdf), Portuguese (https://admissions.ncsu.edu/wp-content/uploads/sites/8/2019/10/Portuguese-Translation-2019-2020.pdf) and Arabic (https://admissions.ncsu.edu/wp-content/uploads/sites/8/2019/10/Arabic-Translation-2019-2020.pdf).

1. Review our deadlines: The application opens in August. Be sure to pay attention to additional requirements and timelines for Studio-Based Majors and the Agricultural Institute.
2. Complete the application through the Common App (http://www.commonapp.org/) or the Coalition App (http://www.coalitionforcollegeaccess.org/); we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
3. Pay the application fee ($100 for international applicants).
4. Submit your academic credentials. Visit our website for details.
5. Show proof of English proficiency (https://admissions.ncsu.edu/apply/international/international-application-review/), if you are not from a country where English is the official or commonly spoken language.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

Admissions Dates and Deadlines

Decisions are released on the corresponding notification date as long as the application is complete by the deadline.

Fall Entry Early Action:

- Deadline: November 1
- Notification Date: January 30

Fall Entry Regular Decision:

- Deadline: January 15
- Notification Date: March 30

International applicants must apply by the deadline and will have their admissions decisions released on a rolling basis once your application is complete.

Spring Entry Regular Decision:

- Deadline: October 1
- Notification Date: December 1

Some programs do not accept applications for spring entry. Visit our website for details.

Studio-Based Majors

The following programs are considered studio-based majors and are fall entry only:

- Architecture
- Art & Design
- Fashion & Textile Design
- Graphic Design
- Industrial Design

Application Deadline: November 1

Portfolio and Optional Essay Due: November 1

Agricultural Institute

NC State's 2-year Agricultural Institute (AGI) (http://catalog.ncsu.edu/undergraduate/agriculture-life-sciences/agricultural-institute/) accepts freshman and transfer applicants.

Fall Entry:

- Deadline: June 1
- Decision Date: Rolling

Spring Entry:

- Deadline: November 1
- Decision Date: Rolling

Use of Agents or Educational Agencies

NC State does not partner with incentive-based agents or educational agencies to represent the University or to administer any part of the application process.

We recognize that in many countries agents or consultants are retained by students and their families to assist in applying to universities in the United States. It is not necessary to engage an agent in order to have a strong chance of admission to NC State. Admission decisions are not based on the recommendations of agents.

NC State expects an application to be the work of the applicant and that all information on the application is complete, accurate and truthful. We may reject application materials, cancel an admissions offer or dismiss a student from attendance, if it is determined that application materials have been falsified.

It is critical that applicants use their own email address, phone number, and mailing address on their application to ensure that all communication from NC State is delivered in an accurate and timely manner. Missing any important communication from NC State may delay applicants' application process and admission decisions.

Financial and Immigration Information

All international applicants seeking an F-1 or J-1 student visa must submit a Certificate of Financial Responsibility (CFR) as part of the admission process. The purpose of this form is to certify financial solvency for the student throughout his/her program of study - this is a federal requirement that must be met before the Office of Undergraduate Admissions can issue any visa certificates.

In addition, applicants deemed admissible who are already in the U.S. must also fill out a Visa Clearance Form (VCF). This includes international applicants who are in a nonimmigrant visa category other than F-1 or J-1 (ex: H-4, L-2, DACA, E-2, Pending Permanent resident etc.). These applicants are not required to complete a CFR, unless they plan to change to F-1 or J-1 student status (if eligible).

CFR and VCF forms are reviewed by the Office of Undergraduate Admissions upon receipt. If the information provided by the applicant is incomplete or not acceptable (e.g. sponsor and bank official signatures, bank statements, etc.), the applicant will be notified that his/her documents were not approved and why. Notification is done via e-mail. The applicant will then have an opportunity to correct the problem(s) and

resubmit the form(s). Applicants can check the status of their applications through their WolfPAW account.

Once the applicant is considered admitted (fully or conditionally) to the University, the Office of Undergraduate Admissions mails out the appropriate Certificate of Eligibility (Form I-20 for an F-1 visa or Form DS-2019 for a J-1 visa) along with the full admission letter and other important pre-arrival information. Newly fully admitted international students will also receive information and guidance from the Office of International Services (OIS) via email prior to their arrival to NC State. Conditionally admitted international students will received information from the Intensive English Program (IEP) prior to their arrival as well.

New F-1 and J-1 international students must check-in with the Office of International Services upon arrival to campus and attend the New International Student Orientation, which is scheduled a few days before the semester begins.

New international students who are accepted to NC State have the opportunity to participate in a Summer Start program during the month of July before fall classes begin. More information can be found here. https://newstudents.dasa.ncsu.edu/summerstart/

Graduate Admission

For a list of graduate degrees, details on the programs, and admissions information, please consult the Graduate Programs website (https://grad.ncsu.edu/programs/).

The Graduate School is committed to provide a transformative experience for graduate students and postdoctoral researchers at NC State by preparing these talented individuals to become true leaders ready to tackle the major challenges facing our state, nation, and world. NC State is recognized as a national leader in the STEM disciplines, and the University supports advanced study and innovative research in numerous fields, including agriculture, life sciences, design, education, engineering, natural resources, humanities and social sciences, management, textiles, and veterinary medicine, along with many exciting interdisciplinary programs.

NC State currently offers over 160 master's programs and more than 60 doctoral programs in both traditional and emerging disciplines, including biomedical engineering, biotechnology, genomics, geographical information systems, nanotechnology, and natural resources. The University also offers a broad range of certificate programs that afford graduate students and postdoctoral scholars with opportunities to collect certification for key skills and knowledge. Moreover, several Professional Science Master's programs are offered that tailor educational outcomes to employer needs.

The Graduate School also proudly offers numerous professional development experiences throughout the year. These opportunities are meant to endow graduate students and postdoctoral scholars with a competitive edge that enhances their ability to land jobs and to experience long-term career success. Graduate School professional development programming incorporates training that pertains to four core competency areas: professional and personal development, leadership and management, academic development, and communication. Signature programs include the Notes From the Field seminar series, the Transition to Industry Immersion Program, the Dissertation and Thesis Institute, the Teaching and Communication Certificate program, the Preparing Future Faculty program, the STEM Faculty Launch program, the Team Case Studies course, and the Job Search Strategies course.

The criteria used for admissions decisions vary according to programs and schools/colleges, reflect an evaluation of the applicant's potential for graduate work, and consider the ability of a program to accommodate additional students. Commonly, departmental admissions committees consider requests for admission and forward their recommendations to the Graduate School. However, Graduate School regulations govern the criteria for the classification of graduate student status.

Applications and all supporting documents must be received on or before the priority deadlines OR the Program Deadlines (https://grad.ncsu.edu/programs/), whichever is earlier. Please be aware of specific program deadlines (https://grad.ncsu.edu/programs/), as many are earlier than the Graduate School priority deadlines. All application fees are totally non-refundable. *Note that applications must be submitted to the Graduate School by midnight Eastern Standard Time on the deadline.*

The Graduate School (https://grad.ncsu.edu/)
1020 Main Campus Drive, Box 7102
Raleigh, NC 27695

For a list of graduate degrees, details on the programs, and admissions information, please consult the Graduate Programs website (https://grad.ncsu.edu/programs/).

Application Checklist

Applications and all supporting documents must be received on or before the priority deadlines OR the Program Deadlines (https://grad.ncsu.edu/programs/), whichever is earlier. Please be aware that many program deadlines are **earlier** than the Graduate School priority deadlines.

- Unofficial transcripts from all colleges and universities previously attended
  - If you are currently enrolled in an institution taking courses, you will need to provide a list of courses in progress
  - All foreign transcripts must be translated to English through a certified Credential Evaluation Service
  - Official transcripts and statements of degree will be required if you are recommended for admission
- 3 Recommendations from people who know your academic record and potential for graduate study
  - All recommendation letters are submitted online through a link that will be sent to each recommender's email once their information is listed on the recommendation list
- Standardized Test Scores
  - Depending on the prospective program's admission requirements, this may include: GRE, GMAT, and/or MAT scores
- Statement of Purpose & CV/Resume
- Supplemental Documentation
  - Depending on the prospective program's admission requirements, this may include: research papers, additional essay questions, or writing/media samples
- Application Fee

- Domestic Application: $75.00
- Graduate Certificate Application: $25.00
- Payments are made online as the last step of the Admissions application through any major credit card issuer
- **All application fee submissions are totally non-refundable**

Non-Degree Studies

NC State's **Non-Degree Studies (NDS)** program provides opportunities for students who are not full-time degree-seeking students to enroll at NC State for a variety of reasons.

NDS students are able to enroll in courses in a breadth of disciplines, for a myriad of reasons. From professionals looking to develop and advance further in their careers, to high school students seeking college credit, NDS offers tangible benefits for students at any stage in your academic career.

Eligibility

Students that were previously admitted to and enrolled in a degree-seeking program at NC State and wish to readmit into that program are not eligible for NDS. Please visit the Readmission (https://go.ncsu.edu/readmission/) into degree-seeking programs website for more information.

More details about NDS eligibility is available on the NDS website (https://nds.registrar.ncsu.edu/apply/eligibility/).

NDS Classifications

Undergraduate Studies

- Students who have not yet obtained a baccalaureate degree
- Students enrolled in an undergraduate certificate program

Post-Baccalaureate Studies

- Students who have obtained a baccalaureate degree

Academic Enrichment Opportunities

- Rising high school juniors and seniors with a cumulative weighted GPA of 3.5 or higher

North Carolina Senior Auditors ("65+")

- North Carolina residents aged 65-years and older

How to Apply to the NDS Program

Students interested in the NDS program will apply online through our ApplyNDS portal. Depending on what type of student you are, whether you have previously been a student at NC State, and your residency (in-state, out-of-state, or international), there may be different components to the application. Details are available on the NDS website (https://nds.registrar.ncsu.edu/). It is important that applicants follow each step of the application carefully, as your application may not be considered if we are missing any important information or documentation.

Application Dates and Deadlines

NDS application deadlines are available on the NDS website (https://nds.registrar.ncsu.edu/apply/dates-and-deadlines-2/). Applicants are notified of their decision on a rolling basis.

Readmission

Sometimes students may take some time away from NC State, and that's okay. Any Undergraduate or Agricultural Institute student who has not enrolled in a Fall or Spring semester may apply for **readmission** to continue their degree program if they wish to continue.

Eligibility

Students are eligible to apply for readmission if you fall into one of the following categories:

- Former Undergraduate and Agricultural Institute students eligible to return to NC State University
- Suspended Undergraduate Students (additional action required)
- Former Undergraduates who obtained a degree and wishes to seek an additional undergraduate degree

Students who desire a **change of curriculum** can apply through the Change of Degree Application (CODA) (https://studentservices.ncsu.edu/your-degree/coda/) upon readmission, except for Leadership in the Public Sector. The Leadership in the Public Sector (LPS) major, housed within the College of Humanities and Social Sciences, is an online degree completion program for students who have been away from NC State University for more than three years. It is not available for transfer via CODA. If you are interested in this program, please review the LPS Program website (https://spia.ncsu.edu/lps/) and contact the program advisor or director before readmitting into your previous major.

Students who have completed their undergraduate degrees and wish to return to pursue an additional degree must complete the application for readmission and complete the Readmission to Additional Degree form (http://studentservices.ncsu.edu/wp-content/uploads/2018/12/Readmit-Second-Degree-072617-2-1.pdf).

Suspended Students

Students on Academic Suspension may appeal to the Admissions Committee for readmission. Students will be directed to the appeal upon completing the readmission application above. Appeals will not be reviewed unless all documents are included.

Academically Suspended students who have had a break in enrollment for at least 3 years may appeal for Contractual Readmission. Students who are contractually readmitted will be placed on Academic Warning and must maintain a 2.0 GPA on all coursework attempted after readmission. Failure to do so will result in permanent dismissal from the university.

Students are encouraged to begin the Contractual Readmission process early. Colleges may have additional requirements or deadlines; students should consult with their college and/or academic advisor before starting the contractual readmission application. Visit our website (https://studentservices.ncsu.edu/your-degree/readmission/) for more information and to download the Contractual Readmission Application Form.

How to Apply

Application dates and deadlines are updated on our website throughout the year.

All students applying for readmission to NC State must pay a non-refundable, $60 Readmission Application Fee.

The Readmission application is available online at our ApplyReadmit portal (https://go.ncsu.edu/apply_readmission/). Decisions are released on a rolling basis.

Residency Determination

All students applying for undergraduate readmission and requesting in-state tuition are required to complete the North Carolina Residency Determination Service (RDS) (https://ncresidency.cfnc.org/residencyInfo/) prior to completing the Readmission application. You will need your Residency Certification Number (RCN) in order to complete your Readmission application.

readmission@ncsu.edu

Enrollment (Registration)

Enrollment Process

Enrollment is conducted using MyPack Portal, NC State's online student services application. The Student Services Center website (https://studentservices.ncsu.edu/) houses tutorials and guides for completing enrollment as easily and efficiently as possible. A schedule of courses for each semester is also available online prior to the beginning of the enrollment period.

Enrollment consists of three steps:

1. Students meet with advisors to determine course requirements and to have their Advising Hold released;
2. Students enroll in courses in MyPack Portal; and
3. Students pay tuition, fees, and all other debts to the university by the established deadlines.

Students can find more information about how to search for classes, how to enroll, how to drop and edit their class schedules, and how to utilize degree planning tools on the Student Services Center website (https://studentservices.ncsu.edu/your-classes/).

Enrollment Calendar and Timeline

Students are assigned a date and time during which they can begin enrolling for the upcoming term. These assignments are determined by a number of factors, including the student's academic career (i.e. undergraduate, graduate, etc.), classification by credit hours (i.e. junior, senior), and any university groups the student may be a part of.

Enrollment typically begins in October for Spring and Summer semesters, and in March for Fall semesters. The enrollment calendars are published shortly before then.

New freshmen entering in the Fall enroll during summer orientation after meeting with advisors and becoming acquainted with the MyPack Portal.

The enrollment calendar is available online on the Student Services Center website (https://studentservices.ncsu.edu/calendars/enrollment/).

Schedule Revision (drops and adds)

Note: NC State University policies, rules and regulations are updated and reviewed as the need arises. For the most current information regarding this section, please visit the Policies,

Rules, and Regulations website (http://policies.ncsu.edu/regulation/reg-02-20-02/).

Courses may be added during the first week of a regular semester without permission of the instructor and during the second week with the permission of the instructor.

Courses may be dropped without regard to course load prior to the Census Date of a regular semester. After the Census Date and prior to the Drop/Revision deadline, full-time undergraduate students who wish to drop courses at any level and whose academic load would thereby fall below the twelve hour minimum course load may do so only for documented medical reasons or other verified, unforeseen grounds of personal or family hardship.

Exceptions to the drop policies require the recommendation of a student's advisor, the departmental coordinator of advising or the departmental head, and approval by the student's dean.

The full academic calendar is available on the Student Services Center website (https://go.ncsu.edu/academiccalendar/).

Students who wish to drop all courses must withdraw from the university for the remainder of the semester or summer session in which they are enrolled. All withdrawals for a current or upcoming term are initiated through the self-service Term Withdrawal page in the MyPack Portal. Withdrawals after the drop/revision deadline are approved by the university only under extenuating circumstances. Documentation is required to support these requests. More information about how to initiate a Term Withdrawal is available online (https://studentservices.ncsu.edu/your-classes/withdrawal/).

Veterans Education Benefits

NC State University is approved to administer veterans benefits to eligible students. The Veterans Education Benefits office is located in Witherspoon Student Center, suite 100. Students who are eligible to receive veterans benefits should contact the NC State Certifying Official at veterans-ed@ncsu.edu. For more information see the NC State Veterans Education website (https://veterans.ncsu.edu/benefits/).

Military Priority Registration

NC State strives to ensure the academic success of our military-affiliated students by offering priority registration to student service members, veterans and those using GI Bill® benefits. For more information regarding priority registration for military-affiliated students, please contact the university's Veterans Education Benefits office at veterans-ed@ncsu.edu.

Exchange Programs

Several enrollment programs exist for the purpose of fostering cooperative educational activities. Under these programs students have the opportunity to register for courses at other institutions and to participate in cooperative library arrangements and joint student activities.

Inter-Institutional Program

The Inter-Institutional Registration Program is a voluntary organization comprised of NC State, Duke, North Carolina Central University, University of North Carolina at Chapel Hill, University of North Carolina at Charlotte, and University of North Carolina at Greensboro for the purpose of developing and conducting cooperative educational activities. The program provides the opportunity for students to enroll at another institution for a course accepted for their program of study and not offered on their home campus. Distance education courses are not eligible to be used for Inter-Institutional registration. Other activities include a cooperative library arrangement, joint student activities, and faculty cooperation and interchange. Interested students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the Inter-Institutional website (https://studentservices.ncsu.edu/your-classes/exchange-programs/inter-institutional-program/).

Cooperating Raleigh Colleges

The Cooperating Raleigh Colleges Program (CRC) is a voluntary organization comprised of NC State, Meredith College, St. Augustine's College, Shaw University, Wake Technical Community College, and William Peace University for the purpose of developing and conducting cooperative educational activities within the Raleigh area. The course taken at the visited school must be a course that is accepted for their program of study and not offered through NC State. Interested students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the Cooperating Raleigh Colleges website (https://studentservices.ncsu.edu/your-classes/exchange-programs/cooperating-raleigh-colleges/).

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at http://www.benefits.va.gov/gibill *(*http://www.benefits.va.gov/gibill/*).*

Financial Aid

Website: studentservices.ncsu.edu (https://studentservices.ncsu.edu)

Our mission is to make an NC State education affordable and accessible. We provide scholarships, grants, loans, and work funding to support students and their families. Our staff is here to help as you navigate the process of applying for financial aid.

To be considered for financial assistance, a student must complete the Free Application for Federal Student Aid (FAFSA). This form, submitted online at www.studentaid.gov (http://www.fafsa.gov), evaluates the family's ability to pay for educational expenses. Students who submit a FAFSA to the federal processor by March 1 are given first priority for need-based scholarship and grant consideration.

By completing the FAFSA, students are considered for all forms of federal financial aid, as well as most types of state and institutional aid. Some academic scholarships may require separate applications. Determination of the applicant's need is based on estimated educational costs as established by the Office of Scholarships and Financial Aid and a consideration of the family's financial strength, as determined by the analysis of the FAFSA.

Aid is available on a non-discriminatory basis to all qualifying students based on the applicant's financial need. Financial aid offers combine aid from all sources including the federal, state and institutional funds, and private entities. Financial aid offers can include gift aid (scholarships and grants), student loans, and/or employment through the Federal Work-Study program.

Students must reapply for aid each year. Renewal is based on continued financial need as well as satisfactory academic progress as defined by the Policy (https://studentservices.ncsu.edu/your-degree/academic-progress/) on Satisfactory Academic Progress for Financial Aid Eligibility.

Please visit the Student Services Center website (http://studentservices.ncsu.edu/your-money/) for more detailed information regarding types of aid and how to apply.

Scholarships

NC State offers a variety of scholarships (https://studentservices.ncsu.edu/your-money/financial-aid/types/scholarships/) for both incoming first-year students and those who are continuing at NC State. Most scholarships require academic competitiveness or the demonstration of a specific talent or characteristic. Some scholarships require that students also demonstrate financial need. Once admitted to NC State, students can apply for scholarship consideration by using PACK ASSIST (https://ncsu.academicworks.com/), NC State University's scholarship application portal. To maximize scholarship consideration, students should apply for admission by the Early Action deadline and complete the FAFSA by March 1.

In addition to these university-wide scholarships, many colleges and departments offer scholarships to students enrolled in their academic programs. These scholarships, funded by alumni, friends of the university, foundations, and industry, are available to both incoming freshmen and continuing students. Consult the college or department websites for important deadlines and apply online with PACK ASSIST (https://ncsu.academicworks.com/). (https://go.ncsu.edu/packassist/)

NC State encourages students to search for private scholarships. Many organizations offer scholarships based on place of residence, background, professional affiliations and/or field of study. Students should use the many free online scholarship search websites to search and apply for outside scholarships.

University Academic Scholarships

Park Scholarships

The Park Scholarships program, established in 1996, brings exceptional students to NC State University based on outstanding accomplishments and potential in scholarship, leadership, service, and character. The program develops and supports Park Scholars in these areas, preparing them for lifelong contributions to the university, state, nation, and world.

Approximately 40 scholarships will be awarded this year to outstanding entering freshmen for undergraduate study in any discipline at NC State. As one of the most prestigious and comprehensive undergraduate scholarships in the nation, the Park Scholarship covers the cost of attendance for four years and includes educational trips, retreats, and seminars; enrichment grants to fund study abroad, research projects, service activities, and conferences; individualized faculty mentoring; and more.

The Park Scholarships are named for the late Roy H. Park '31, an NC State alumnus who created the charitable Park Foundation, dedicated to education, media, and the environment. The Park Foundation initially funded the Park Scholars through annual grants; then, in September 2013, the Park Foundation committed $50 million to begin an endowment for Park Scholarships. With others' support, this endowment will sustain the Park Scholarships program in perpetuity.

To date, 20 classes of Park Scholars have graduated and built a vibrant alumni network. For more information, visit the Park Scholarships website (http://park.ncsu.edu/).

Goodnight Scholars Program

The Goodnight Scholars Program, funded by a gift from Dr. Jim and Ann Goodnight, began in 2008 with 25 scholars. Since that time, it has grown into a comprehensive student development program designed to develop scholars into leaders within the STEM and/or education fields. The Program celebrated its tenth graduating class in May 2021, adding to its network of alumni stretching from coast to coast in the United States and throughout the world: all of whom are using their STEM talent to address critical societal, economical, and educational issues. Currently, the Program has more than 200 active students, and expanded to include transfer students beginning in Fall 2017.

The scholarship is targeted at low and middle-income families from North Carolina and is limited to students studying in the STEM disciplines or affiliated education majors. The current annual value of the scholarship is $20,500 and is renewable for up to four years for first-year students, and two years for transfer students. In addition to the scholarship, Goodnight Scholars have access to an assortment of developmental programming focused on their professional and personal growth, as well as enrichment grant funding to support their unique endeavors.

Dr. Jim Goodnight is founder and CEO of the SAS Institute, the world's leading business intelligence software vendor. Ann Goodnight, director of community relations at SAS, serves on the University of North Carolina Board of Governors and is a former member of the NC State Board of Trustees. Both are NC State graduates. Their frequent interactions with Goodnight Scholars provide unique and invaluable exposure to visionary leaders. Please visit the Goodnight Scholars website (https://goodnight.ncsu.edu/) for more information about the program and its exceptional scholars.

The Caldwell Fellows

The Caldwell Fellows is an intensive and comprehensive leadership development program that over 50 years at NC State has produced 1300+ outstanding alumni shaped by the Robert Greenleaf model of Servant Leadership. Supported through endowments held by the NC State Alumni Association, over 100 alumni 'invest' in individual Fellows, providing funds for their development through experiential learning. Students selected as Fellows are expected to engage deeply in the program's rich offerings, which include community based service-learning, wilderness adventure, international engagement, and capstone training at the Center for Creative Leadership. Students receive three years of stipend (divided 70-30 between tuition and funds available for experiential learning), all contingent upon a students' maintenance of the program ideals and a 3.25 cumulative GPA.

The application period for selection begins in January of each year, after a student's initial semester(s) at NC State is complete. The program actively seeks applicants from all colleges at NC State. The rigorous selection process is based on an application portfolio which includes

essays, a short video, letters of recommendation, and the first semester transcript at NC State (minimum 3.25 GPA); high school transcripts and standardized test scores are not reviewed. The application is available on the Caldwell Fellows website (http://ncsu.edu/caldwellfellows/). Application reviews by campus faculty and program alumni determine the finalists who are invited to interviews in February. Only first year students are eligible to apply.

The Caldwell Fellows program was created to honor the legacy of John T. Caldwell and to carry out his spirit and ideals. As Chancellor of NC State for 16 years, he presided over the university as a servant leader: inspiring excellence, modeling moral behavior and marshaling the strengths of the entire campus to further the common good. Guided by a deep respect for the potential inside every individual, he held a vision of NC State as a place where young people could find and refine their unique capabilities and potential. The Caldwell endowment is the only university-wide merit-based scholarship funded by alumni and supporters of NC State.

The program also derives from the NC Fellows program, originally known as the Richardson Fellows program, established in 1968 by Smith Richardson of the Richardson Vicks Corporation. Concerned for the state's future leadership, Mr. Richardson established Fellows Programs on North Carolina campuses and charged them with developing leadership in their promising students. Caldwell Fellows maintain close ties with the internationally acclaimed Center for Creative Leadership, also created by the Smith Richardson Foundation.

Open minds and open hearts are core to the Caldwell Fellows community. Curiosity, creativity, respect for diversity, and commitment to service to the greater good are common qualities which are sought and developed in all Fellows.

International Programs and Activities

Study Abroad

Study abroad allows students to develop skills required to face the grand challenges of society - deepen intercultural sensitivity, think more critically and creatively, and broaden both personal and academic perspectives. Distinguish yourself from your peers by developing skills in independence, flexibility, and the ability to deal with ambiguity. Make the world your classroom at NC State.

Study Abroad Programs

NC State offers programs worldwide that meet academic, career, and personal interests. Study Abroad is for every major: fulfill major, minor, or general education program courses abroad. Plus, participation in NC State study abroad programs fulfill the Global Knowledge co-requisite degree requirement for NC State students. Students should work with their academic advisor to identify a time frame and outline a course plan for study abroad. For all majors, with academic planning, study abroad does not delay graduation at NC State. View program options by major. (http://go.ncsu.edu/studyabroadbymajor/)

Funding Study Abroad

Study Abroad is affordable at NC State. Semester exchange programs provide the most economical option for most students since standard tuition and fees keep the cost of a semester abroad comparable to a semester on campus at NC State. Students are eligible to receive financial aid (including loans, grants, and scholarships) for the cost of *any* study abroad program. Study abroad scholarships provide additional funding to about 1/3 of applicants receiving an award, plus many other financial resources are available in support of study abroad. View information about NC State Study Abroad Scholarships (https://studyabroad.ncsu.edu/funding/nc-state-scholarships/).

Applying for Study Abroad

With hundreds of opportunities to choose from—each differing in courses, duration, language, cost, location—early planning is key to a successful study abroad experience.
Well prepared students typically start planning a year in advance.

Kim Priebe, Director

Global Perspectives Certificate

The goal of the Global Perspectives Certificate is to:

- recognize students for their international studies and activities and
- encourage students to continue their global interests both overseas and within the United States.

All undergraduate degree-seeking students and all majors are welcome, including undergraduate international students. Upon completion, students will receive an official certificate and a notation on their transcript documenting their global experiences during their studies. Learn more about the GPC and get started today at gpc.dasa.ncsu.edu (http://gpc.dasa.ncsu.edu/).

North Carolina Japan Center

Jonathan Brewster, Director

The NC Japan Center was established in July 1980 to strengthen the state's academic, economic, scientific, and cultural ties with Japan. In its many aspects, the Center serves as a focal point for interaction between Japanese and North Carolinians. It is a statewide resource intended to assist all citizens, universities, companies, and public and private institutions in relations with the Japanese. The NC Japan Center works to inform people of the state about modern Japan and its people. It also provides information and resources for Japanese citizens living in North Carolina.

Consistent with NC State's "Think and Do" land-grant mission, the NC Japan Center works in partnership with the Economic Development Partnership of North Carolina to attract Japanese businesses to the state, as well as strengthens relationships between NC State and academic partners in Japan. An external Board of Advisors includes prominent citizens of North Carolina who have a strong interest in Japan and US-Japan relations. Its Academic Advisory Committee consists of faculty from colleges across the university who provide guidance and direction for academic exchange and development. The NC Japan Center cooperates closely with the NC State Japanese language program and

provides a full range of non-credit Japanese language courses to the public.

For more information, please contact Jonathan Brewster at 919.515.3450 or visit the North Carolina Japan Center's website (http://www.ncsu.edu/japan/).

International Students

The Office of International Services (OIS) is charged with meeting the immigration advising and cross-cultural programming needs for the university's more than 4000 international students and 700 J-1 Exchange Visitor scholars who come from more than 120 different countries. Services provided by OIS include advising students and scholars on immigration regulations and university policies; authorizing certain types of on or off-campus employment authorization for F-1 and J-1 visa holders; and providing cultural programs designed to enrich the cultural and academic experience of the campus community. OIS programs include: New International Student Orientation, Culture Corps, ISSERV service learning program, English Conversation Club, and many others. New international students are required to participate in New International Student Orientation. OIS also provides opportunities for U.S. students to get involved in the international community at NC State by inviting participation in various cross-cultural programs such as volunteering at the International Student Orientation and English Conversation Club.

International applicants must apply to the Admissions Office by the stated deadlines and must meet all the necessary requirements for admission. In addition, international applicants must meet certain language and financial criteria (see the TOEFL and Financial Information sections under Freshman Admission).

The North Carolina Global Training Initiative (GTI) sponsors several short-term certificate, internship, and research programs that international students may be interested in. These full-time non-degree study programs allow international students to study at NC State for one semester in order to learn about U.S. culture and education, improve their conversational English, take undergraduate courses in their field of study back home or in preparation for admission to a degree program here in the U.S., and experience life in the U.S. These programs have a later application deadline and are great for students to take before enrolling in an undergraduate or graduate degree program in the US or for siblings and friends of current degree-seeking students who want to study in the US together.

International students may be interested in joining the GTI's Cultural Exchange Network (CENet). CENet connects NC State's domestic and international students through joint participation in social, academic, and service learning events and workshops. Visit the CENet website (https://getinvolved.ncsu.edu/organization/cenet/) for more details about the program and how you can apply.

Anyone interested in the GTI's programs can visit us on our website (https://gti.ncsu.edu/) for more information.

Outline of minimum immigration requirements for F-1 and J-1 students:

- Keep passport and I-20 or DS-2019 current
- Maintain full-time enrollment every semester (12 hours/semester for undergraduates)
- Make good academic progress toward your degree
- Do not work or intern off campus without prior written approval from OIS
- Do not work on campus more than 20 hours in any one week during the semester
- Update any address change in MyPack Portal within ten days of moving
- Update OIS immediately of any changes in name, funding, or visa status
- Consult with an OIS advisor **before** changing curriculum/majors, withdrawing, dropping below full-time, transferring to another school/program, etc.
- Purchase and maintain the NC State University approved Health and Accident Insurance or other insurance plan that meets the published minimum coverage requirements.
- Keep your valid passport and recently signed visa certificate (I-20 or DS-2019) with you when you travel abroad. Consult with an OIS advisor about visa and travel questions

Further information about immigration requirements, employment and travel questions, cultural opportunities, and other critical information designed to assist international students are detailed on the OIS website. For individual advising, please call (919) 515-2961 to make an appointment with an advisor or stop by during our walk-in hours of 10:00am-11:45am and 1:00pm-2:45pm on Monday, Tuesday, Thursday and Friday (no walk-ins on Wednesdays).

The Intensive English Program (Conditional Admission and IEP-only)

The Intensive English Program (IEP) at North Carolina State University is a full-time, non-credit academic program offered to international, non-native English speakers. Its mission is to provide high-quality language instruction to those seeking academic preparation, professional development and/or personal enrichment. Programs of study are offered in the fall, spring, and summer semesters.

In the IEP, students take up to 25 hours per week of intensive language study in all core language skills. Students who enroll in the IEP will be tested for the appropriate level of English instruction when they arrive on campus.

Classes are located on NC State's main campus and nearby on Hillsborough Street. IEP students are also offered the opportunity to participate in numerous cultural enrichment activities designed to help them get to know the surrounding area and interact with other students. Academic coaching (tutoring) is offered to students free of charge.

Students join the IEP as conditionally admitted students or IEP-only students. While the course of instruction is identical for both, IEP-only students are not guaranteed admission to degree programs, but may apply directly to such programs while enrolled in the IEP.

Conditional Admission

For undergraduate applicants who meet the competitive academic requirements for admission, but who do not yet possess the minimum English proficiency requirements for full, direct admission, NC State offers conditional admission. For NC State conditionally admitted students, the IEP provides the opportunity to improve one's English language skills before moving into a degree program.

Successful completion of the IEP requires achieving at least a B or higher in each course, meeting strict attendance obligations, and passing all exit requirements.

Website: https://studyabroad.ncsu.edu/

Cultural Exchange Network (CENet)

The Cultural Exchange Network (CENet) at NC State is a student organization comprised of undergraduate and graduate students from all fields of study and from around the world. CENet fosters global learning and international friendship through social, academic and service activities.

CENet is facilitated by the Global Training Initiative (GTI) and details can be found on the website (go.ncsu.edu/CENet (http://go.ncsu.edu/CENet/)).

Supplemental Academic Programs

Cooperative Education Program

The Cooperative Education Program (co-op) is an opportunity for students to gain hands-on work experience while pursuing a degree. Through alternate semesters of full-time study and full-time work experience, students can:

- Strengthen their job prospects after graduation; companies usually prefer hiring students who have related work experience, especially within their organization
- Be well-paid
- Explore career fields and confirm their choice of major
- Work with state-of-the-art equipment in the industry
- Experience "corporate culture" by working with professionals and observing how they handle job situations in the given field

The co-op plan can be completed in five years, during which time the student receives 12 to 18 months of industrial experience.

To be eligible for a co-op, students must:

- Be full-time students (in any degree program)
- Have completed a minimum of 30 credit hours (or one semester for transfer students)
- Have been admitted into a degree program prior to reporting for a co-op job
- Have a cumulative GPA of at least 2.50 (3.00 for graduate students)

For more information, visit our website (https://careers.dasa.ncsu.edu/overview/).

The Peer Mentor Program

The Peer Mentor Program (PMP), offered through the Department of Multicultural Student Affairs, is a student advisory program aims to foster a network of support for culturally diverse first-year students ("mentees"). The peer mentoring relationship is designed to aid in the academic, emotional, and socio-cultural adjustment to college life of mentees. Peer Mentors serve as peer support personnel for mentees and share program goals and responsibilities aimed at ensuring the retention of student participants.

For more information, visit our website (https://oied.ncsu.edu/divweb/msa/peer-mentor-program/).

Supplemental Instruction

Supplemental Instruction (SI) is a voluntary academic support opportunity for students in selected sections of historically difficult, large lecture courses. SI supports students who want to improve their understanding of course material in a small group setting. Students are actively engaged with small group activities facilitated by the SI leader, a trained peer tutor. Several sessions are offered at various times each week. A schedule of current SI sessions can be found on the SI website (https://tutorial.dasa.ncsu.edu/si/si-schedule/).

Tuition and Fees (Undergraduate)

The University Cashier's Office (https://treasurer.ofb.ncsu.edu/cashier/) provides billing, financial aid disbursement and account management services to all students. All students paying tuition and fees are entitled to University services, facilities and programs, including the services, facilities, and programs offered by the Student Center, Health Services, Physical Education Department, and Athletics Department.

Visit the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/) for the most up-to-date information on campus finances and student tuition and fees.

A statement of tuition and fees is posted on each student's account that registered during a normal registration period. Students (and authorized parents) are notified via e-mail (eBILL) when a new statement has posted. Payment in full, an authorized payment plan, or approved financial aid information must be received by the due date appearing on the statement. The due date is approximately two weeks before classes begin. Students registering during a late registration period will be required to pay their tuition and fees at the time of registration and may be subject to a late registration fee. Fees are the same for both residents and nonresidents and are required of all students. Schedules may be canceled for failure to cover all charges by the due date.

Estimated Annual Undergraduate Expenses

Visit https://studentservices.ncsu.edu/your-money/financial-aid/estimated-cost-of-attendance/undergraduate-student/

1. **Note: Tuition and fees are fixed items of cost. The rates listed are for Undergraduate students in a degree program. Tuition and fee rates for Distance Education courses are billed based on the student's affiliation, see the** Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/distance-education/) **for full details.**
2. **Health Insurance is billed unless you waive out of the program each semester. For more information, visit the** Student Health website (https://healthypack.dasa.ncsu.edu/insurance-and-billing/ship/).
3. **Room rent is shown as an estimate of students living on or off campus.**
4. **Meals, books and supplies, other personal expense, and transportation are shown as estimates.**
5. **For estimated costs of other student classifications please go to the** Student Services Center website (https://studentservices.ncsu.edu/your-money/financial-aid/estimated-cost-of-attendance/).

Expenses Other than Tuition and General Fees

Application Fee: A nonrefundable fee $85 U.S. must accompany each application for admission ($100 for international students). Applicants may pay the fee online using their WolfPAW account.

Room Rent: New incoming students receive instructions on how to apply for housing with the letter of acceptance. Continuing students receive room reservation information each January at their residence hall rooms. The 2022-2023 residence hall room rent typically range from $3,400 to $3,800 per semester plus mandatory charges for ResNet ($140) and streaming/cable ($46). The Wolf Village and Wolf Ridge Apartments typically range from $4,000 to $4,500 per semester plus mandatory charges for ResNet ($140) and streaming/cable ($46) per person per semester.

Meals: During their first academic year, new freshmen living on campus are required to participate in one of the university's available meal plans. Meal plans are available to all registered students and costs for 2022-2023 range from $1,410 to $2,625 plus tax. Students may also pay for meals individually at the various dining facilities available both on and near campus.

Books and Supplies: Books and supplies are usually purchased during the first week of classes directly from the NCSU Bookstores. Costs can vary,

Personal Expenses: Personal expenses vary widely among students but the estimate of $814 is based on what students report that they spend on these items.

Cooperative Education Program Fee: Required of all participating co-op students for each semester in which they are enrolled in an off campus work assignment. This fee, set at $490 for the 2022 Fall Semester, the 2023 Spring Semester, or the combined 2023 Summer Sessions, is used for partial support of the Cooperative Education Program staff in job development and placement activities. Students paying this fee are entitled to all university services, facilities, and programs during the semester or combined summer sessions for which they are enrolled.

COE Program Enhancement Fee - Students enrolled in the College of Engineering will be charged a COE Program Enhancement Fee. This fee is used for program and infrastructure improvements in the College of Engineering to ensure our engineering students are provided career-ready skills that continue to advantage them in the marketplace. Each semester, undergraduates will be charged $62.50 per credit hour. Each semester graduate students will be charged $83.33 per credit hour. Engineering students who enroll in a co-op work session will not be billed for the computing fee unless they also enroll in an NC State course.

Professional Golf Management Fee: Students enrolled in the Professional Golf Management program (PGM) will be charged $350/semester. The fee pays for golf play and practice privileges at several area golf courses.

Required Fees

Required fees are levied for services, facilities, and programs available to all students whether or not the student takes advantage of them. Students are assessed fees based on the course load they are taking. An itemization of required fees and other detailed information concerning expenses or related data can be obtained on the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/fees-explanation/).

Refund Policy

Reduction in Hours: The last day to reduce hours and receive a refund or reduction in rates is the same as the last day to register or add hours, typically the 10th day of a fall or spring term and the 4th day of a summer session. Tuition and Fees are not prorated after this date for reduced course loads. Specific dates are posted on the Student Services Center website (https://studentservices.ncsu.edu/your-money/bill/refunds-and-reimbursements/refunds-for-reduction-in-hours/) and in MyPACK Portal.

Withdrawal: Dropping all courses for which you are registered constitutes a Withdrawal from the University. Refunds for official withdrawals from NC State University are prorated based upon the percentage of the enrollment period attended. No refunds are made for official withdrawals after 50 percent of the enrollment period has passed. The prorated withdrawal schedule for each semester is publicized on the Student Services Center website (https://studentservices.ncsu.edu/your-money/bill/refunds-and-reimbursements/refunds-for-withdrawal/). In some instances circumstances such as severe medical issues can justify an appeal of your refund percentage. You may submit an appeal to the Fee Appeals Committee when you believe special consideration is

merited. Applications for such appeals may be obtained from the Student Services Center website (https://studentservices.ncsu.edu/forms/cashier/refundapp.pdf).

Residency Determination Service (RDS)

The Residency Determination Service (RDS) was established in coordination with the University of North Carolina (UNC), the North Carolina Community College System (NCCCS), the North Carolina State Education Assistance Authority (NCSEAA), and the North Carolina Independent Colleges and Universities (NCICU) as the centralized service for determining residency for students. This service enables a student to use one residency determination for admissions applications to multiple North Carolina public colleges and universities and to demonstrate residency for state aid programs consideration at all (public and private) North Carolina colleges and universities. In compliance with state law, the UNC system requires Undergraduate, Agricultural Institute, and Non-Degree Studies students to request a residency classification through the RDS.

Learn more online (https://ncresidency.cfnc.org).

Residence Status for Tuition Purposes

According to the North Carolina General Assembly (North Carolina General Statutes Section (G.S.) 116-143.1(b) (http://www.ncga.state.nc.us/EnactedLegislation/Statutes/HTML/BySection/Chapter_116/GS_116-143.1.html)), a student qualifies as a resident for tuition purposes if he or she has:

- an established legal residency (domicile) in North Carolina
- maintained that legal residence for at least 12 continuous months prior to being considered for in-state residency

The North Carolina State Residence Classification Manual (http://www.northcarolina.edu/sites/default/files/documents/state_residence_classification_manual.pdf) offers complete information on residency statutes, as well as explanations as how the two qualifications above are evaluated.

Initial Classification: The student's initial residence classification occurs during the admission application process when the student is first admitted to a community college or UNC institution.

Reclassification: A student, accepted for admission, who is initially classified as a nonresident and believes he or she meets the requirements of G.S. 116-143.1, -143.3, or any other applicable laws and regulations may request a reclassification by completing the RDS process. The request for reclassification may be submitted either in direct response to the initial classification (if the student believes the initial classification is erroneous), or at a future time if the student has experienced a change in circumstances that he or she believes makes him or her eligible for in-state resident status. Students must submit requests for reclassification in accordance with approved procedures and application deadlines. The institution will not assume responsibility for initiating such an inquiry independently.

Residency Reclassification Application Deadlines. Except for deadlines set out in the General Statutes, institutions (undergraduate or graduate) may set their own deadlines so long as they are not inconsistent with the deadlines. The deadline to submit the reclassification application along with all supporting documentation cannot be later than the 10th business day of the term for which the student is seeking residency reclassification. All conditions necessary for achieving in-state status must still be satisfied prior to the beginning of the academic term for which the student is seeking reclassification. It is the student's responsibility to provide the documentation necessary to support his or her claims for in-state residency for tuition purposes by the applicable deadlines.

Residence. To qualify as a resident for tuition purposes, a person must become a legal resident and remain a legal resident for at least twelve consecutive months (365 days) immediately prior to classification. Thus, there is a distinction between legal residence and residence for tuition purposes. Furthermore, twelve months legal residence means more than simple abode in North Carolina. In particular, it means maintaining a domicile (permanent home of indefinite duration) as opposed to "maintaining a mere temporary residence or abode incident to enrollment in an institution of higher education." The burden of establishing facts which justify classification of a student as a resident entitled to in-state tuition rates is on the applicant for such classification, who must show his or her entitlement by the preponderance (the greater part) of the residentiary information.

Parents' Domicile. If an individual, irrespective of age, has living parent(s) or court appointed guardian of the person, the domicile of such parent(s) or guardian is, prima facie, the domicile of the individual; but this prima facie evidence of the individual's domicile may or may not be sustained by other information. Further, non-domiciliary status of parents is not deemed prima facie evidence of the applicant child's status if the applicant has lived (though not necessarily legally resided) in North Carolina for the five years preceding enrollment or registration.

Effect of Marriage. Marriage alone does not prevent a person from becoming or continuing to be a resident for tuition purposes, nor does marriage in any circumstance insure that a person will become or continue to be a resident for tuition purposes. Marriage and the legal residence of one's spouse are, however, relevant information in determining residentiary intent. Furthermore, if both a husband and his wife are legal residents of North Carolina and if one of them has been a legal resident longer than the other, then the longer duration may be claimed by either spouse in meeting the twelve month requirement for instate tuition status.

Military Personnel. Any active duty member of the armed services qualifying for admission to an institution of higher education but not qualifying as a resident for tuition purposes shall be charged the in-State tuition rate and applicable mandatory fees for enrollments while the member of the armed services is abiding in this State incident to active military duty in this State. In the event the active duty member of the armed services is reassigned outside of North Carolina or retires, the member shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the member is continuously enrolled in the degree or other program in which the member was enrolled at the time the member is reassigned. In the event the active duty member of the armed services receives an Honorable Discharge from military service, the member shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the member establishes residency in North Carolina within 30 days after the discharge and is continuously enrolled in the degree of other program in which the member was enrolled at the time the member is discharged.

Any dependent relative of a member of the armed services who is abiding in this State incident to active military duty, as defined by the Board of Governors of The University of North Carolina and by the State Board of Community Colleges while sharing the abode of that member shall be eligible to be charged the in-State tuition rate, if the dependent

relative qualifies for admission to an institution of higher education. The dependent relatives shall comply with the requirements of the Selective Service System, if applicable, in order to be accorded this benefit. In the event the member of the armed services is reassigned outside of North Carolina or retires, the dependent relative shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the dependent relative is continuously enrolled in the degree or other program in which the dependent relative was enrolled at the time the member is reassigned or retires. In the event the member of the armed services receives an Honorable Discharge from military service, the dependent relative shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the dependent relative establishes residency within North Carolina within 30 days after the discharge and is continuously enrolled in the degree or other program in which the dependent relative was enrolled at the time the member is discharged. A person charged less than out-of-state tuition rate solely by reason of this section shall not, during the period of receiving that benefit, qualify for or be the basis of conferring the benefit of G.S. 116-143.1.

Grace Period. If a person (1) has been a bona fide legal resident, (2) has consequently been classified a resident for tuition purposes, and (3) has subsequently lost North Carolina legal residence while enrolled at a public institution of higher education, that person may continue to enjoy the in-state tuition rate for a grace period of twelve months measured from the date on which North Carolina legal residence was lost. If the twelve months ends during an academic term for which the person is enrolled at a State institution of higher education, the grace period extends, in addition, to the end of that term. The fact of marriage to one who continues domicile outside North Carolina does not by itself cause loss of legal residence marking the beginning of the grace period.

Minors. Minors (persons under 18 years of age) usually have the domicile of their parents, but certain special cases are recognized by the residence classification statute in determining residence for tuition purposes.

a) If a minor's parents live apart, the minor's domicile is deemed to be North Carolina for the time period(s) that either parent, as a North Carolina legal resident, may claim and does claim the minor as a tax dependent, even if other law or judicial act assigns the minor's domicile outside North Carolina. A minor thus deemed to be a legal resident will not, upon achieving majority before enrolling at an institution of higher education, lose North Carolina legal residence if that person

1. Upon becoming an adult "acts, to the extent that the person's degree of actual emancipation permits, in a manner consistent with bona fide legal residence in North Carolina" and
2. Begins enrollment at an institution of higher education not later than the fall academic term following completion of education prerequisite to admission at such institution."

b) If a minor has lived for five or more consecutive years with relatives (other than parents) who are domiciled in North Carolina and if the relatives have functioned during this time as if they were personal guardians, the minor will be deemed a resident for tuition purposes for an enrolled term commencing immediately after at least five years in which these circumstances have existed. If under this consideration a minor is deemed to be a resident for tuition purposes immediately prior to his or her eighteenth birthday, that person on achieving majority will be deemed a legal resident of North Carolina of at least twelve months duration. This provision acts to confer in-state tuition status even in the face of other provisions of law to the contrary; however, a person deemed a resident of twelve months duration pursuant to this provision continues to be a legal resident of the State so long as he or she does not abandon North Carolina domicile.

Lost but Regained Domicile. If a student ceases enrollment at or graduates from an institution of higher education while classified as a resident for tuition purposes and then both abandons and re-acquires North Carolina domicile within a twelve month period, that person, if he or she continues to maintain the reacquired domicile into re-enrollment at an institution of higher education, may re-enroll at the instate tuition rate without having to meet the usual 12-month durational requirement. However, any one person may receive the benefit of this provision only once.

Change of Status. A student admitted to initial enrollment in an institution (or permitted to enroll following an absence from the institutional program which involved a formal withdrawal from enrollment) must be classified by the admitting institution either as a resident or as a nonresident for tuition purposes prior to actual enrollment. A residence status classification once assigned (and finalized pursuant to any appeal properly taken) may be changed thereafter (with corresponding change in billing rates) only at intervals corresponding with the established primary divisions of the academic year.

Transfer Students. When a student transfers from one North Carolina public institution of higher education to another, he or she is treated as a new student by the institution to which he or she is transferring and must be assigned an initial residence status classification for tuition purposes.

Non-U.S. Citizens. Persons who are not U.S. citizens but who have certain visa and immigration statuses that grant them the legal ability to establish and maintain a bona fide domicile in this country are subject to the same considerations as U.S. citizens in determining residence status for tuition purposes. If it is later discovered that the person's visa or immigration status was obtained fraudulently, the institution shall have the right to seek and collect payment of full, out-of-state tuition, along with fees and costs associated with such collection. Non-U.S. citizens present in the United States under certain visa statuses such as tourists, visitors on business, and temporary foreign/international students do not have the legal capacity to establish a bona fide domicile in this country (and thus, not in North Carolina). As examples, holders of non-immigrant visa statuses such as B, C, D, F, J, M, Q, S, and TN visas (and dependent visas for spouses and children such as a TD visa) cannot establish domicile with these documents, in and of themselves, unless there is a change in their visa status. An EAD, in and of itself, does not confer any immigrant or non-immigrant status and does not give the EAD holder the legal capacity to establish residency for tuition purposes in this state.

UNC System Employees. A person who is a full-time employee, in a permanent position, of The University of North Carolina, or is the spouse or dependent child of a full-time employee, in a permanent position, of The University of North Carolina, and who is a legal resident of North Carolina, qualifies as a resident for tuition purposes without having maintained that legal residence for at least 12 months immediately prior to his or her classification as a resident for tuition purposes.

The following categories of persons are eligible for tuition waivers:

Survivors of Deceased Law Enforcement/ Emergency Workers. Tuition waivers are available to the surviving spouse and children of a law enforcement officer (including sheriffs), firefighter, volunteer firefighter or rescue squad worker who was killed as a direct result of a traumatic injury sustained in the line of duty (including both active service and training for active duty). Additional eligibility requirements must be met.

Families of Disabled Law Enforcement/Emergency Workers .Tuition waivers are available to the spouses and children of law enforcement officers (including sheriffs), firefighters, volunteer firefighters, or rescue squad workers who are permanently and totally disabled as a direct result of a traumatic injury sustained in the line of duty (including both active service and training for active service). Additional eligibility requirements must be met.

Note: Decisions on residence for tuition purposes are based on NC G.S. 116-143.1 and 116-143.3 and on the State Residence Classification Manual which was prepared by the General Administration of the University of North Carolina system.

This information is subject to change.

Tuition and Fees (Graduate)

The University Cashier's Office (https://treasurer.ofb.ncsu.edu/cashier/) provides billing, financial aid disbursement and account management services to all students. All students paying tuition and fees are entitled to University services, facilities and programs, including the services, facilities, and programs offered by the Student Center, Health Services, Physical Education Department, and Athletics Department.

Visit the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/) for the most up-to-date information on campus finances and student tuition and fees.

Students should view the Graduate School website for important information on Residence for Tuition Purposes (https://grad.ncsu.edu/admissions/residency/) and the North Carolina Residency Determination Service (RDS) for graduate programs.

Campus Resources

NC State's vast university offices and divisions exist to serve our students, faculty, staff, visitors and guests. The units below showcase just a sampling of the important work being done on and off campus every day to ensure that our community has the resources they need to achieve and thrive at NC State.

Digital Education and Learning Technology Applications (DELTA)

DELTA supports NC State's online and distance education program activities and services. We provide application, enrollment and services for non-degree studies' students. We provide student communications, a virtual orientation, an online FAQ, campus proctoring services and remote testing arrangements. DELTA collaborates with other NC State units to provide library resources, student registration, campus authentication, financial aid and billing services for online and distance education students. For more information, visit the Online and Distance Education website (https://online-distance.ncsu.edu/).

DELTA manages the university's learning technology infrastructure, including various learning management tools. WolfWare contains access to Moodle and other enterprise-level technology tools, such as Zoom, a tool for synchronous online teaching and learning, and Panopto lecture-capture technology. DELTA supports technology-assisted courses, whether online or on-campus.

DELTA Testing Services manages on-campus test centers and works with remotely based proctors as well.

Donna Peterbridge
Interim Vice Provost for DELTA

Tim Petty
Associate Vice Provost, Online and Distance Education

Alexis Lockett
Program Manager, Online and Distance Education

Sharon Broere
Director, DELTA Testing Services

Office of Information Technology

NC State offers you a leading-edge academic computing environment to enrich your student life and learning. Here, you'll find that many colleges and administrative and academic units are involved in providing various IT resources, services and information.

The Office of Information Technology (OIT) provides centralized campus-wide computing and information and communication technology services in support of the university's academic and administrative goals. Some of OIT's major services are:

- Campus-wide data network infrastructure, including the multi-gigabit network backbone and wireless computing infrastructure
- MyPack Portal, the gateway to university online enterprise systems and services, such as Human Resources, Financials and the Student Information System
- ResNet, high-speed wired and wireless Internet access for students living in campus housing
- Hundreds of software packages for student use from computing labs, and many also available from the NC State Virtual Computing Lab (VCL) environment
- Google Workspace, which provides the university's official email and calendaring services and numerous collaborative tools powered by Google
- University's central Web servers
- File space
- Classroom technology support
- High Performance Computing (HPC) for researchers and students in computational science
- IT security for campus computing resources, including acceptable use, rules and regulations
- NC State Help Desk, which provides support to students and other users of campus resources
- Hardware and software support for student-owned computers through the OIT Walk-in Center

Unity ID and Password

As an NC State student, you will have a Unity ID and password, which are your credentials to access campus-wide computing services and facilities.

Information about your Unity ID and password and help are provided during student orientation sessions, from the NC State Help Desk, and online on the OIT (https://oit.ncsu.edu) website.

Unity Labs

As a student, you may use the Unity computer labs that are equipped with Windows, Linux and Macintosh workstations that provide direct access to information technologies. Colleges and academic departments support additional computing facilities, and overall, there are about 100 student-computing labs on campus, with about 2,500 workstations with high-speed network connections. NC State does not require you to own a computer, although specific colleges or programs may make this requirement. Information about computer recommendations, specifications and purchasing options are published online on the OIT (https://oit.ncsu.edu) website and updated annually.

Help

For additional information, see NC State's computing resources:

- OIT (https://oit.ncsu.edu) website
- OIT Walk-in Center, West Dunn Building (corner of Dan Allen and Thurman drives)
- NC State Help Desk, 515-HELP (4357) or help.ncsu.edu (https://help.ncsu.edu)

Marc Hoit, Vice Chancellor for Information Technology and Chief Information Officer

Office for Institutional Equity and Diversity

The Office for Institutional Equity and Diversity (OIED) is committed to fostering an inclusive, accessible and diverse intellectual and cultural campus experience related to the mission of NC State University.

Inclusive Excellence and Strategic Practice

IESP champions diversity and inclusion practices across various stakeholders of the university community through education, training, the development of relationships, enhanced understanding of diversity and equity issues, the utility of assessment and evaluation, facilitation of initiatives, cooperative accountability and collaboration.

Equal Opportunity and Equity

The Equal Opportunity and Equity unit of the Office for Institutional Equity and Diversity strives to make NC State University a discrimination-free, harassment-free environment for faculty, students and staff to work, live and learn. This unit is responsible for managing and monitoring the university's equal opportunity compliance activities, overseeing the university's equal opportunity policies, responding to complaints, conducting investigations, developing and delivering training and educational outreach to campus and consulting with supervisors, managers and unit equity officers regarding equal opportunity concerns and initiatives, including affirmative action and equitable hiring practices.

Bias Impact Response Team

The Bias Impact Response Team (BIRT) at NC State supports the campus community by providing a system through which a person can report incidents of bias on and around campus. BIRT seeks to effectively engage with impacted individuals and groups to achieve awareness, support, education and restoration. See the BIRT website at bias-incident.ncsu.edu (http://bias-incident.ncsu.edu/).

Campus Community Centers

NC State's Campus Community Centers report to the Office for Institutional Equity and Diversity (OIED). Collectively, the centers foster community; celebrate identity and culture; raise awareness; and support, empower and advocate for positive change for underrepresented and marginalized students, families and communities. They assist OIED in its goal of fostering an inclusive, accessible and diverse intellectual and cultural campus experience by creating spaces and activities that improve campus climate and enhance the overall educational experience for all students.

*See **Campus Community Centers** under Student Services for information on the African American Cultural Center, GLBT Center, Multicultural Student Affairs and the Women's Center, which report to the Office for Institutional Equity and Diversity.*

Sheri Schwab, J.D.
Vice Provost

Office of Professional Development

NC State University's **Office of Professional Development (OPD)** is a unit of the office of Continuing and Professional Education (https://mckimmoncenter.ncsu.edu/cpe/). Dedicated to the development and delivery of non-degree professional training courses, OPD provides you with a broad range of quality educational opportunities in a flexible, comfortable, and affordable learning environment.

The Office of Professional Development (OPD) develops, promotes, and coordinates noncredit seminars, certificate programs, and conferences to a broad market on a wide range of topics. Program areas include:

- test preparation;
- accounting and taxation;
- agriculture;
- communications;
- education;
- engineering;
- English as a second language;
- environmental;
- management;
- textiles;
- and general interest.

Events management services are available to help both campus and non campus groups more efficiently and productively administer educational seminars, workshops, and conferences.

Office of Research and Innovation

Mladen A. Vouk, *Vice Chancellor for Research and Innovation*
Wade Fulghum, *Assistant Vice Chancellor, Office of Research Commercialization*
Genevieve Garland, *Assistant Vice Chancellor for Research Operations and Communications*
Jonathan Horowitz, *Associate Vice Chancellor for Research Infrastructure and Development*
Rick Liston, *Assistant Vice Chancellor for Administration*
Lorena McLaren, *Executive Director, Corporate and Foundation Relations, University Development*
Sherrie Settle, *Associate Vice Chancellor for Sponsored Programs and Regulatory Compliance*
Alyson Wilson, *Associate Vice Chancellor for National Security and Special Research Initiatives*

Office of the Vice Chancellor

Vice Chancellor

As Chief Research Officer (CRO), the Vice Chancellor oversees all research activities at NC State. Under his authority, units reporting to the Office of Research and Innovation centrally manage research administration, the university' s intellectual properties, and industry and government agency alliances on the university ' s award-winning research campus. Researchers at NC State are supported by $405++ million in sponsored programs from federal, local government, industry, and nonprofit organizations. NC State' s research portfolio exceeds 5,000 invention disclosures, 960+ US patents (OR rated #6 in patents issued), 800 active commercialization agreements, and 595+ products to market. Centennial Campus hosts more than 70 corporate, government and nonprofit partners working with the university's 75+ centers and institutes, laboratories and research departments

Research Operations

The Research Operations Unit provides strategic leadership and support to the Office of Research and Innovation. The office consists of three units: Strategic Initiatives, Education and Training, and Marketing and Outreach.

Integrated Support Services Center (ISSC)

The ISSC was created to provide streamlined, professional services to faculty and administrators, eliminating costly duplication, creating efficiency and improving timeliness.

Research Development

Research Development Office (RDO)

The RDO facilitates collaboration between faculty and interdisciplinary research experts, providing strategic and responsive support that enhances the university's most valued research initiatives. By searching a centralized, easy-to-access portal, researchers quickly find internal and external funding opportunities. Once identified, potential funding translates to successful grants with the help of Research Development's tools and training resources that support researchers as they plan, write, and submit competitive proposals.

Centers + Institutes

NC State's Centers and Institutes reflect the university's commitment to interdisciplinary scholarly pursuit, including research, instruction and public service. These cutting-edge organizations are frontrunners in their field, blazing the trails for other researchers to follow. Research and innovation on topics ranging from climate change to textiles add value to the everyday lives of our state's citizens, maintaining public trust and admiration and standing at the forefront in global excellence for research and discovery. Here, the leadership of these organizations can access the materials, procedures and policies necessary to manage their efforts responsibly, equitably and with the highest integrity.

Proposal Development Unit (PDU)

The PDU supports faculty teams in the development of large-scale, interdisciplinary research proposals. These services include team facilitation, budget development, writing and editing, and administrative assistance, thereby enabling investigators to concentrate on the research-related aspects of their proposals. PDU support is available to NC State faculty planning proposals with estimated total budgets of at least $1M.

Research Administration and Compliance

Sponsored Programs & Regulatory Compliance Services (SPARCS)

SPARCS facilitates the submission of proposals, negotiation of agreements, the administration of internally and externally funded projects, and the administration of subagreements that provide funding to NC State. This includes all aspects of externally sponsored research and scholarship, from pre-award management to non-fiscal post--award management.

Office of Research Commercialization

Office of Research Commercialization (ORC)

NC State University is a research powerhouse and a powerful economic engine for North Carolina. ORC plays a crucial role in this by protecting and promoting University research discoveries and intellectual property, working with and guiding industry partners, and promoting the acceleration of startups. ORC provides innovators with a wide range of programs and services to protect, market, and license intellectual property developed at NC State. Collaboration with NC State innovators and industry partners has led to the creation of more than 125+ startups and 575+ commercialized products that benefit society on a local, national and global scale. Among surveyed universities without medical schools, NC State consistently ranks among the top 10 for key technology transfer metrics.

University Advancement

The mission of University Advancement at NC State is to coordinate internal and external communication to enhance the image of the university, to provide meaningful programs and services to alumni and friends, to seek service-support participation and ambassadorship from constituents, to build and sustain a strong volunteer leadership network, to raise money from private sources, to manage the collection of private gifts for the university, to manage effective alumni and development databases and gift systems, and to coordinate with the General Administration in areas of government and legislative priorities in Raleigh and Washington. The office oversees University Development, the Alumni Association, University Communications and Marketing, and Advancement Services. Visit the University Advancement website (https://leadership.ncsu.edu/advancement/) for more information.

Advancement Services

Advancement Services supports the operations of Alumni Relations, University Development and University Communications. The department oversees the alumni and donor database and works to process gifts and conduct research about potential contribution opportunities. Other initiatives include management of the university's online giving website; support of the Alumni Association alumni web portal; delivery of education and training in national best practices related to fundraising activities, ethics and accountability; and management of an international listserv dedicated to the advancement services profession.

Alumni Association

The NC State Alumni Association engages alumni through programs and services that foster pride and enhance lifelong connections to NC

State. The association encourages alumni to be Red and White for Life — with connections to the university and fellow alumni no matter where they live by linking alumni to the university through membership, a growing network of alumni around the world, programming for special-interest groups and students, events and an array of communication tools, including the award-winning *NC State* magazine. The Alumni Association offers membership options and benefits for alumni who join, and supports a growing **Student Alumni Association (SAA)**, with events and programming that builds connections and enhances their student experience. The association also sustains the prestigious Caldwell Fellows scholarship program, funded by alumni endowments and contributions, and designed to foster academic excellence, leadership, personal growth and service-learning. The association upholds campus traditions such as the official class ring, Red and White Week, Ram Roast, the Tradition Keepers Medals, Wolfpack freshmen welcome events, and Founders' Day, as well as the Legacy Luncheon for incoming freshmen whose parents and/or grandparents attended NC State. In addition, the association is responsible for the Evening of Stars Gala to celebrate NC State's distinguished alumni, and the Faculty Awards to recognize the achievements of the university's outstanding undergraduate and graduate faculty. The association offers services such as the Wolf Treks alumni travel program and Career Services. Students and alumni can visit the Alumni Association in the Dorothy and Roy Park Alumni Center on Centennial Campus, or contact the Alumni Association at (919) 515-3375 or (800) 627-2586. For a complete overview of programs, services and events, visit the Alumni Association's website (http://www.alumni.ncsu.edu).

University Development

University Development works with the colleges and programs at NC State to secure private financial support for priority projects and programs. This support may come from individuals (alumni, parents, students, faculty, staff, and friends), corporations, philanthropic foundations, or other organizations. The mission of University Development is to strengthen relationships with alumni and friends and reconnect them with campus colleagues in their colleges and areas of interest; reach out to alumni and friends living outside North Carolina to carry the messages of NC State's progress, success, and vision for the future; and to serve as liaisons to universitywide programs to support their fundraising and outreach efforts.

University Development provides services to the colleges and programs in capital campaigns, gift planning, corporate and foundation relations, and annual giving. University Development also facilitates external and internal communication among fundraisers, and coordinates approaches to prospective donors.

University Communications and Marketing

University Communications and Marketing builds positive relationships between NC State and its many constituents through strategic internal and external communications that convey the university's brand identity. The division is comprised of University Communications, Marketing Communications, University Special Events, and Development Communications and Stewardship, and focuses on:

- Increasing awareness of the university's distinctive benefits.
- Ensuring consistency in universitywide messaging and visual identity by facilitating integration and coordination of public relations and communications efforts throughout the university.
- Monitoring and responding to public issues and perceptions.
- Providing marketing, communication and web strategy counsel and services to campus clients.
- Providing guidance and resource assistance for university events.

Leadership

Brian C. Sischo, **Vice Chancellor for University Advancement**

Brad Bohlander, **Associate Vice Chancellor for University Communications and Marketing and Chief Communications and Marketing Officer**
Jim Broschart, **Associate Vice Chancellor for University Development**
Derek Bryan, **Assistant Vice Chancellor of Finance and Administration**
Jeff Baynham, **Associate Vice Chancellor for Advancement Services**
Maggie Musick, **Executive Assistant to the Vice Chancellor**
Reid Ricciardi, **Executive Director of Talent Management**
Benny Suggs, **Associate Vice Chancellor for Alumni Relations and Executive Director of the Alumni Association**
Alan Taylor, **Assistant Vice Chancellor for Principal Gifts**
Christina Walker, **Chief of Staff and Executive Director of University Advancement**

NC State Policies

North Carolina State University is committed to academic integrity, and all students are required to adhere to the NC State Code of Student Conduct (https://policies.ncsu.edu/policy/pol-11-35-01/). Individual policies on conduct, including those listed below, are posted on University Policies, Regulations, and Rules (https://policies.ncsu.edu/) (PRRs).

University Patent Procedures (https://policies.ncsu.edu/policy/pol-10-00-01/)
Grievance Procedures for Graduate Students (https://policies.ncsu.edu/regulation/reg-11-40-02/)
Code of Student Conduct (https://policies.ncsu.edu/policy/pol-11-35-01/)
Academic Integrity (https://policies.ncsu.edu/policy/pol-11-35-01/)
Policy on Illegal Drugs (https://policies.ncsu.edu/policy/pol-04-20-05/)
Sexual Harassment Policy (https://policies.ncsu.edu/regulation/reg-04-25-02/)
Racial Harassment Policy (https://policies.ncsu.edu/regulation/reg-04-25-02/)
University Copyright Procedures (https://policies.ncsu.edu/regulation/reg-01-25-03/)

Equal Opportunity and Non-Discrimination

It is the policy of the State of North Carolina to provide equality of opportunity in education and employment for all students and employees. Accordingly, the university does not practice or condone unlawful discrimination in any form against students, employees or applicants on the basis of race, color, religion, creed, sex, national origin, age, disability or veteran status. Nor does the university allow discrimination on the basis of sexual orientation with respect to internal university matters that do not contravene federal or state law and that do not interfere with the University's relationships with outside organizations, including the federal government, the military, ROTC, and private employers. [NOTE: The NC State University equal opportunity and nondiscrimination policy includes transsexual individuals within the policy's prohibitions against discrimination on the basis of sex. This includes actual or perceived gender identity and gender expression. See Price Waterhouse v. Hopkins, 490 U.S. 228 (1989); Smith v. City of Salem, 378 F.3d 566 (6th Circ. 2004).] Retaliation against any person complaining of discrimination is in violation of federal and state law and North Carolina State University policy, and will not be tolerated.

Unlawful Harassment

Harassment based upon race, color, religion, creed, sex, national origin, veteran status, age, or disability is a form of discrimination in violation of federal and state law and North Carolina State University policy and will not be tolerated. It is the internal policy of North Carolina State University to prohibit harassment on the basis of sexual orientation. Retaliation against any person complaining of harassment is in violation of federal and state law and North Carolina State University policy, and will not be tolerated. North Carolina State University will respond promptly to all complaints of harassment and retaliation. Violation of this policy can result in serious disciplinary action up to and including expulsion for students or discharge for employees.

Every individual is encouraged, and should feel free, to seek assistance, information and guidance from his/her supervisor, the Office for Equal Opportunity, the Office of Student Conduct or the Employees Relations section of Human Resources. For additional information, contact: Office for Equal Opportunity, 1 Holladay Hall, Box 7530, North Carolina State University, Raleigh, NC 27695-7530, Phone: (919) 513-1234 or 515-3148.

Disability Resource Office

Individuals desiring reasonable accommodations for their documented disabilities should contact the Disability Resource Office (https://dro.dasa.ncsu.edu/) (DRO), 2751 Cates Avenue, Holmes Hall, (919) 515-7653 (Voice), (919) 515-8830 (TTY). Services and accommodations are provided based on an individual's documented needs and are determined in consultation with the individual and a DRO representative. For students, such requests should be made far in advance of registration deadlines to ensure timely services and accommodations. DRO will maintain appropriate confidentiality of records and communication regarding disability.

Associations and Accreditation

Associations

The university is a member of the Association of Public and Land-grant Universities, the American Council on Education, the Association of Governing Boards of Universities and Colleges, the Association of American Colleges and Universities, the Education Advisory Board, the Engagement Scholarship Consortium, the National Association of College and University Business Officers, the Oak Ridge Associated Universities, the Southern Association of Colleges and Schools Commission on Colleges, Campus Compact, the University Professional and Continuing Education Association, and the Cooperating Raleigh Colleges.

Accreditation

NC State is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate, baccalaureate, masters, and doctorate degrees. Questions about the accreditation of NC State may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 3003-4097, by calling 404.679.4500 or by using information available on SACSCOC's website (https://www.sacscoc.org/).

In addition, many of the university's professional programs and departments are accredited by national professional associations, including:

Equal Opportunity and Non-Discrimination Policy

It is the policy of the State of North Carolina to provide equality of opportunity in education and employment for all students and employees. Educational and employment decisions should be based on factors that are germane to academic abilities or job performance. North

Carolina State University (“NC State”) strives to build and maintain an environment that supports and rewards individuals on the basis of relevant factors such as ability, merit and performance. Accordingly, NC State engages in equal opportunity and affirmative action efforts and prohibits discrimination, harassment and retaliation, as defined by NC State's Equal Opportunity and Non-Discrimination Policy (POL 04.25.05) (https://policies.ncsu.edu/policy/pol-04-25-05/).[1]

NC State will promptly, thoroughly and impartially respond to all complaints of Discrimination, Harassment and Retaliation.

Any individual with a complaint of Discrimination, Harassment or Retaliation should follow NC State's Discrimination, Harassment and Retaliation Complaint Procedure (REG 04.25.02) (https://policies.ncsu.edu/regulation/reg-04-25-02/) and can file a complaint at http://diversity.ncsu.edu/report-a-concern/.

Fax: 919.513.1428
TTY: 919.515.9617
Website (https://diversity.ncsu.edu/)

[1] This policy is established in accordance with 41 CFR Part 60 and is implemented in accordance with applicable laws and their amendments, including but not limited to, Title VI and Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Executive Order 11246, the Age Discrimination in Employment Act of 1975, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, the Vietnam Era Veterans' Readjustment Assistance Act of 1974, the Civil Rights Restoration Act of 1988, North Carolina General Statutes Chapters 116 and 126.

Student Activities

At NC State, we are dedicated to providing students with not only a world-class education, but a well-rounded and enriching collegiate experience. Students have the opportunity to take in thrilling arts performances, connect with like-minded peers by joining or beginning any of 700+ student organizations through Student Involvement, or cheer on the Wolfpack with pride as our 23 varsity sports teams take on the competition.

Take a look through the resources below to see just some of the ways that students can get involved and stay active both on and off campus with the Wolfpack community.

The Arts at NC State

NC State University offers a broad range of opportunities for students to experience and participate in the arts – through crafts, dance, exhibitions, music and theatre – open to all students regardless of academic major. Whether through academic courses, co-curricular participation in dance, music and theatre, experiencing performances by professional artists, engaging with powerful exhibitions of visual art, or the thrill of developing crafts skills, the arts offer all NC State students an avenue to develop creative think and do skills. All arts units are housed within University College in the Division of Academic and Student Affairs. For additional information, please visit the arts website (arts.ncsu.edu).

The Crafts Center

Explore your creative side and Make It Here! The NC State Crafts Center is an excellent resource for all students. Whether you're interested in learning a skill or just want to "de-stress," the Center has a comprehensive range of offerings in clay, digital photography, wood, jewelry/metals, fibers, glass, lapidary, mixed media and more. The Crafts Center is a diverse and creative space where skill and self-expression are fostered through the making and sharing of art and craft. Join us for special student-only classes such as Friday CRAFTernoons, Stressbusters and more. It's also a great place to visit, study and surround yourself with creativity. Mentorship thrives at the Center. Professional staff and crafts instructors provide quality technical advice and materials support. With the intent of enhancing quality of life, the Crafts Center reaches out through academic collaboration, support for student life, and partnerships with other arts organizations. Participation in associated crafts guilds that routinely meet at the Crafts Center provides NC State students a creative platform within the university and beyond.

The addition of a digital fabrication makerspace, the C:LAB, has opened new doors for creative exploration and production. Classes in software, technology, laser engraving, and personal/professional development are available to all students to augment their academic engagement.

For answers to your questions about the Crafts Center, please call 919.515.2457 or visit the Crafts Center website (crafts.arts.ncsu.edu) for our upcoming programming, calendar information, map and directions.

Dance Program

The NC State Dance Program gives students the opportunity to study dance through direct experience in choreography and performance. The program's two student companies, the State Dance Company (DAN 295 Problems of Dance Performance) and the Panoramic Dance Project (DAN 210 Current Trends in Afrocentric and World Dance), are open by audition. A vast array of classes, offered through the Master Class Series, are open to all NC State students, faculty and staff. The program also offers other academic courses such as Dance Composition (DAN 272 Dance Composition - Solo Forms), Hip-hop Dance (DAN 260 Hip-hop Dance), and Hip-hop Dance II (Dan 261 Hip-hop Dance II).

The Dance Program provides a rich training ground for choreographers through the study of composition, independent study, and guided choreographic projects. As undergraduate and graduate students pursuing degrees in various fields, the dancers at NC State bring their diverse insights and experiences into the artistic process and contribute meaningfully to the art. The Dance Program's three annual concerts are described below:

- **The Dance Program Fall Concert:** The Fall Concert features the choreography of current students who create work through independent study, as well as guest artists and company directors. Both the State Dance Company and the Panoramic Dance Project are represented on the Fall Concert.
- **State Dance Company Concert:** The State Dance Company performs a distinguished collection of modern dance for their annual concert. The concert features premiere and repertory work created by the dance program directors and invited guest artists.
- **Panoramic Dance Project Concert:** For their annual spring concert, the Panoramic Dance Project presents a variety of dance styles in a world context with a focus on African, hip-hop and Latin dance. The concert features work by the director, guest artists and selected student choreographers.

For more information, please contact 919.515.7034 or visit the Dance Program website (https://dance.arts.ncsu.edu/).

Gregg Museum of Art & Design

The Gregg Museum seeks to inspire creativity, innovation and the expression of ideas. With frequently-changing exhibitions and exciting free programs like films, artist talks, workshops, or yoga nearly every week, there's always something new to see or do at the Gregg. As one of NC State's designated Student Centers, the museum and its surrounding gardens offer a great place to study, have a picnic, or hang out with friends in a stimulating environment. Wifi is available both outdoors and inside.

The Gregg collection includes more than 35,000 objects from every continent, such as ceramics, glass, textiles, furniture, photography, paintings and sculptures, folk and outsider art, works on paper, Native American art, industrial design, archaeological artifacts, and fashion and costume. If you're looking for inspiration or researching a topic involving objects, feel free to approach the museum staff for help. Each semester the Gregg also offers internships (for class credit) and paid student positions that provide experience in museum work.

To schedule tours or class visits, or to plan to use the permanent collection for research, please call 919.515.3503 or visit **Gregg.arts.ncsu.edu (https://gregg.arts.ncsu.edu/)**.

The Gregg is located at 1903 Hillsborough Street, just across Pullen Road from the university's Memorial Belltower, at the northern tip of Pullen Park. Opening hours are 10 a.m. to 5 p.m. Tuesday through Saturday. On certain Thursday nights there are free programs (films, artist talks, performances, etc.) and the museum will stay open additional hours. Check the website (gregg.arts.ncsu.edu) for listings and announcements. The galleries are closed Sundays and Mondays. Admission is free.

Department of Music

The Department of Music provides educational and performance opportunities for student and community participants through a variety of musical experiences and academic courses. Both a 15-hour minor in Arts Entrepreneurship and a 20-hour music minor is offered for qualified undergraduate students who wish to engage in more extensive study of music and the arts. Three tracks are offered: Performance, Composition, and General Studies.

For full descriptions of the academic courses, consult the Department of Music (http://catalog.ncsu.edu/undergraduate/university-college/music/) page in the NC State University Course Catalog, contact 919.515.2981 or visit the Department of Music's website. (https://music.arts.ncsu.edu/)

A wide variety of performing ensembles provide opportunities for students to develop both artistically and intellectually through applied music study. Through performance, the ensembles play an important role in campus life, presenting public concerts and performing at official functions (both on and off campus) and athletic events. Curricular performing ensembles receive one academic credit that may be used to satisfy free elective requirements in any academic major. Membership in most ensembles requires an audition with the instructor. See the Department of Music's website (https://music.arts.ncsu.edu/) for audition information.

- **Choral Ensembles.** The Choral program offers students from all academic areas an opportunity to participate in the exploration and performance of the highest quality choral repertoire from all eras. The ensembles include State Chorale, Tenor-Bass Choir (Singing Statesmen), Soprano-Alto Choir (Vox Accalia), and the African American Choral Ensemble. Performance highlights have included concerts every semester, tours and occasional collaborations with other ensembles.
- **Orchestras.** The Raleigh Civic Symphony and Chamber Orchestra combine student and community musicians with professional leaders to present concerts of innovative programming on campus and in other Triangle area venues. Area professionals serve as concertmaster, principal cellist, and guest coaches, to provide high-level instruction and leadership to community and student players. Both orchestras require an audition.
- **Athletic Bands**. The Marching Band (Power Sound of the South) is active during football season, and the Varsity (Pep) Band is active during basketball season. Students must audition for a band and will be placed according to their ability and interest.
- **Concert Bands.** Two concert bands, the Symphonic Band and the Wind Ensemble, are offered each semester. Students must audition for the Wind Ensemble and will be placed according to their ability and interest.
- **Jazz Ensembles.** The jazz program includes Jazz Ensemble I, Jazz Ensemble II and a variety of Jazz Combos. The jazz groups perform both on and off campus during the fall and spring semesters. Students must audition for a jazz ensemble or combo and will be placed according to their ability and interest.
- **Piano.** Beginning piano classes are offered to students from all academic areas for credit. No previous experience is required. Applied lessons are offered to advanced piano students who have passed an audition and are admitted to the music minor program in piano performance with limited additional openings for non-minors.
- **Voice.** A Vocal Techniques class is offered to beginning voice students for credit with instructor approval. Previous voice study is not required. Applied voice lessons are offered to advanced voice students who have passed an audition and are admitted to the music minor program in vocal performance with limited additional openings for non-minors.
- **Pipes & Drums**. Students may learn to play the bagpipes, an instrument known to many of North Carolina's earliest settlers. Pipes, drums, and other equipment are furnished. Beginning pipe and drum lessons are available to students without previous experience.

NC State LIVE

NC State LIVE is your opportunity to experience boundary-breaking professional dance, theatre, music and multidisciplinary performances. NC State LIVE brings artists from across the world to campus to address the issues of our time with unflinching creativity and humanity. Discounted tickets are available to NC State students, faculty and staff. The NC State community also has the opportunity to engage with world-class artists through free workshops, master classes, artist talks and outdoor concerts. NC State LIVE hires student employees to help with marketing, event management, and artist services. For more information, follow @NCStateLIVE or visit live.arts.ncsu.edu.

University Theatre

University Theatre is NC State's open-access student theatre program, welcoming participation by all students regardless of major. We create an inclusive, student-centered community, grounded in the experience of making and sharing theatre. Through our large productions within our Producing Series, our professional summer TheatreFEST series, and various workshops and master classes throughout the year, students can enjoy theatrical works, learn practical skills, and become compassionate critical thinkers.

University Theatre offers many ways to participate with no prior experience necessary. Opportunities exist in:

- Performance
- Technical theatre
- Scenic, costume, lighting, sound, projection
- Stage management
- Arts administration
- Events
- Front of house operations
- Directing
- Design

Academic classes are offered in conjunction with our theatre minor and numerous workshops throughout the year. Employment opportunities for live events are also offered.

University Theatre is also home to the Psi Kappa cast, a chapter of Alpha Psi Omega national theatre honor society.

Contact: 919.515.3927 or visit the University Theatre website (https://theatre.arts.ncsu.edu/).

Ticket Central

Ticket Central serves as the centralized box office for the performing arts programs at NC State, ticketing events in a variety of performance venues including Stewart Theatre, Titmus Theatre, Kennedy-McIlwee Studio Theatre, and the ballrooms of Talley Student Union. In addition to serving the NC State arts units, Ticket Central provides ticketing services on a fee basis for campus and community organizations. The box office is located in the main lobby of Thompson Hall. Hours vary by semester and during university holidays. Tickets are always available online at tickets.arts.ncsu.edu. Tickets may also be purchased in person, or by phone at 919.515.1100.

Campus Facilities

NC State's campus facilities are home to many of our student activities and events. From screening films in the historic Witherspoon Student Center, joining Student Government meetings in Talley Student Union, participating in intramural sports at the Carmichael Complex, or watching one of University Theatre's plays in Frank Thompson Hall, students and visitors can have a variety of experiences all right here on campus. Here are just a few of the spots that serve our student activities and services.

The Campus Cinema

The Campus Cinema, located in Witherspoon Student Center, presents films ranging from independent works to the latest Hollywood blockbusters in digital format with Dolby® Digital Surround Sound. The Cinema is a fully functional movie theatre with 460 seats and a concession stand offering freshly popped popcorn, one free popcorn per person. Movie screenings are free to NC State and the general public unless otherwise specified. Check out the cinema website at: https://uab.ncsu.edu/films-schedule/ (http://uab.ncsu.edu/films-schedule/). If you desire any assistive devices, services, or other accommodations to participate in these activities, please contact the UAB Films Advisor at 919-515-5168.

Carmichael Complex

Carmichael Complex consists of Carmichael Gym, Carmichael Recreation Center, Willis R. Casey Aquatic Center, Miller Fields, 12 tennis courts, and 8 basketball courts, which offer a wide variety of indoor and outdoor fitness choices for students. Students may use the pools, indoor track, courts, cardio equipment, the outdoor fields, and tennis courts unless otherwise reserved for classes, events or maintenance. The Carmichael Complex is home to University Recreation and the Department of Health & Exercise Studies. For more information, please visit the Carmichael Complex website (http://recreation.ncsu.edu/facilities/carmichael/) or call (919) 515-PLAY (7529).

Gregg Museum of Art & Design

Gregg Museum of Art & Design is NC State's collecting museum, with more than 35,000 examples of contemporary and historic ceramics, textiles, glass, furniture, photography, paintings, sculptures, folk and outsider art, archaeological artifacts, works on paper, and fashion garments preserved in its permanent collection. Frequently-changing exhibitions and interesting programs make every visit special.

Located in the original 1928 Chancellor's Residence at 1903 Hillsborough Street (just across from NC State's famous Memorial Belltower), the Gregg includes period rooms, formal gardens, and a contemporary 15,000 sq. ft. galleries wing. All are used as exhibition and programming spaces, and are free and open to students and public alike.

To schedule tours or class visits, or to make arrangements to use the permanent collection, call 919-515-3503 or visit Gregg.arts.ncsu.edu (https://gregg.arts.ncsu.edu/). Wi-Fi is available both outside and indoors. Hours are 10 a.m. – 5 p.m. Tuesday through Saturday. The galleries are closed Sundays and Mondays. Admission is free.

Price Music Center (PMC)

Price Music Center (PMC) is the location for the Department of Music and its programs. Until 1965, the first Pullen Hall had been the original music building, which, along with many band instruments, pianos, and a music library, was destroyed by a student arsonist. Built in 1971, Price Music Center is named to honor Percy Walter (Daddy) Price, the father of today's musical organizations on campus and the University's first music director in 1923.

Practice studios are available to NC State students on a first-come, first-served basis. Each practice room has an upright piano and music stand. For questions about practice space in Price, call 919.515.2981. For more information, see Department of Music (https://music.arts.ncsu.edu/).

Price Music Center is located at 2620 Cates Avenue, next to the Talley Student Union. The main office is located on the second floor, room 203. Additional facilities and offices are located in the south wing of Broughton Hall.

Talley Student Union (TSU)

Talley Student Union (TSU) is the hub of student life on campus and is the place to study, shop, dine and engage with your peers. Talley Student Union is anchored with nine food venues, Wolfpack Outfitters, the Woodward Student Involvement Center and Stewart Theatre. If students are looking to connect with the arts, enhance their leadership skills, or connect with peers, Talley Student Union is the place to start. Students can even be part of the amazing student employment team that operates the facility.

Program offices and service areas that can be found in the Talley Student Union include:

- Arts NC State;
- Center for Student Leadership,
- Dance Program;
- Ethics & Public Service;
- Fraternity and Sorority Life; GLBT Center;
- Multicultural Student Affairs; Student Involvement;
- NC State LIVE;
- NC State Student Centers Administration;
- Student Centers Board of Directors;
- Union Activities Board;
- University Theatre Administration;
- Women's Center;
- RAVE! Events;

- Ticket Central;
- and University Graduate Student Association.

RAVE! Events

To reserve room in the Talley Student Union or to plan your event, please visit R (http://campusenterprises.ncsu.edu/talley-student-union/)AVE!'s website (https://campusenterprises.ncsu.edu/rave-events/) or contact RAVE! Events at 51-EVENT (513-8368).

Frank Thompson Hall

Frank Thompson Hall is the location for University Theatre and the Crafts Center. Built in 1925 as a gymnasium, Thompson Hall reopened in Fall 2009 after an extensive renovation that was an extraordinary partnership between NC State students, private citizens, businesses and the extended NC State community.

Thompson Hall houses University Theatre's full production activities, performances, and classes. Facilities include the Titmus Theatre, the Kennedy-McIlwee Studio Theatre, the costume shop, the scenic construction and paint shop, lighting and sound facilities, as well as rehearsal and classroom spaces. The renovation brought state-of-the-art technologies and improved accessibility to the building that now returns to its purpose as a hub of student activity. For more information, see University Theatre (https://theatre.arts.ncsu.edu/).

Located on the ground floor of Thompson Hall, the Crafts Center offers technology-rich studios and specializes in classes and workshops in clay, digital photography, wood, jewelry/metals, fibers, glass, lapidary, mixed media and more. For more than fifty years, the Crafts Center has provided a friendly learning environment for students and craftspeople of all levels. NC State's Crafts Center is one of the finest university crafts programs in the country. Classes and studio use are available to NC State students, alumni, employees, and the general public. For information, see Crafts Center (https://crafts.arts.ncsu.edu/).

Thompson Hall is located on Dunn Street and Jensen Drive.

Witherspoon Student Center (WSC)

Witherspoon Student Center (WSC) currently houses the African-American Cultural Center, Student Government and Student Media which includes the offices of five student-run media organizations:

- Agromeck (yearbook);
- The Nubian Message and Technician (newspapers);
- Windhover (literary magazine);
- and WKNC FM 88.1 (radio station).

Witherspoon includes two accessible balconies; one meeting room available by reservation through REM; the African-American Cultural Center's Sankofa Room, Gallery and Library; and Campus Cinema, used for films, lectures, classes and special events.

Intercollegiate Athletics

Go Pack!

NC State has a long and storied history in athletics, as well as a loud and passionate fanbase that supports the Wolfpack faithfully. The university's athletics programs (http://www.gopack.com/) enjoy a tradition of excellence as they compete in the prestigious Atlantic Coast Conference.

The athletics program is self-supporting and is operated primarily through gate receipts, radio and television revenues, NCAA distributions, student fees, and private donations. Funds for athletics grants-in-aid are provided through the North Carolina State Student Aid Association, also known as the Wolfpack Club.

Sports

The Department of Athletics conducts the university's intercollegiate athletics program, which includes 21 varsity sports. The athletics program is administered by the Director of Athletics, Boo Corrigan. The Council on Athletics is appointed by the Chancellor and serves in an advisory capacity to the Director of Athletics and the Chancellor.

Men's varsity sports include soccer, cross country, and football in the fall; basketball, swimming and diving, indoor track, and wrestling in the winter; and outdoor track, golf, tennis, and baseball in the spring. Varsity sports for women include soccer, cross country, and volleyball in the fall; basketball, indoor track, swimming and diving, and gymnastics in the winter; and outdoor track, golf, softball and tennis in the spring. The co-ed rifle team competes during the winter.

Athletics Facilities

The Wolfpack's football facility, Carter-Finley Stadium, boasts 57,600 permanent seats. The 106,000 square-foot Murphy Football Center, which is the operations hub for the football program, stands in the south end zone, while the Finley Fieldhouse houses visitor locker rooms and other operations spaces on the north end of the field. Soaring high above it all is Vaughan Towers, a 117,000 square-foot structure along the west grandstand that houses 955 club-level seats, 51 private luxury suites, a University suite for the Chancellor and a state-of-the-art press box.

The men's basketball squad competes in the PNC Arena, which boasts one of the top capacities in the Atlantic Coast Conference with seating for 19,500 fans. Since PNC Arena opened in 1999-2000, NC State has finished every year in the top-25 nationally in attendance.The women's basketball squad plays in the James T. Valvano Arena at William Neal Reynolds Coliseum – one of nine areas on campus designated as a "hallowed space." The arena has seating for 5,500 in the facility which recently underwent a $35 million renovation and now houses the Wolfpack Walk of Fame and History. It's also the home of gymnastics, wrestling and rifle, as well as NC State's ROTC programs.

Located in the heart of campus, the Dail Soccer Field is located inside Paul Derr Track under stadium lights. Adjacent to that complex is the Dail Softball Stadium. Situated across from historic Reynolds Coliseum, the picturesque campus setting serves as the background for one of the best softball facilities in the ACC.

With seating for 3,480, Doak Field at Dail Park has been the home of Wolfpack baseball for over 50 years. Across the street from "The Doak" is the J.W. Isenhour Tennis Center. The outdoor stadium has six lighted courts, chairback seating for up to 1,000 spectators, and an electronic scoreboard. The indoor courts, named in honor of former Wolfpack standout Andy Andrews, provides seating for up to 200 spectators.

The golf team trains at the beautiful Lonnie Poole Golf Course, an 18-hole, 7,350-yard, par 71 public course located on Centennial Campus. The $11.6 million Arnold Palmer Signature multipurpose golf course also houses a research center and The Carol Johnson Poole Clubhouse.

This facility also supports critical academic programs, including the Professional Golf Management (PGM) and turfgrass programs.

The Willis R. Casey Aquatic Center serves as the hub for the Pack's nationally-ranked swimming and diving teams. The site of many ACC Championship meets over the years, it features two pools and spectacular seating for approximately 1,000 fans.

The Wolfpack's athletics administrative offices and coaches' offices for soccer, track and cross country, and wrestling are located in the Weisiger Brown General Athletics Facility. The Case Athletics Center houses the Academic Support Program for Student-Athletes.

The fundraising offices of the Wolfpack Club and the athletic department's ticket offices are located in the Palisades Building near Carter-Finley Stadium: 5400 Trinity Rd. (Suite 500), Raleigh, NC 27607.

For ticket information call 919.865.1510 or 1.800.310.Pack. The main athletic department receptionist: 919.515.2101. Visit the official athletic department website (http://www.gopack.com/) for complete information.

Student Leadership and Engagement

Student Leadership and Engagement

The Wolfpack's starting place for students to get involved at NC State, **Student Leadership and Engagement** helps students find fun and meaningful ways to make NC State home through involvement on campus. The department supports the Wolfpack's diverse community of student organization members, leaders, and advisors through advising, education, and programming. Student Involvement also provides resources to students that make it easy to find any of over 700 student organizations to join or start an organization that doesn't exist.

Getting involved is an important way students can develop the sense of belonging necessary for academic success, personal and professional development. Being involved on campus is a great way to build a sense of belonging at NC State, increase cultural competencies and develop multiple perspectives, as well develop academically, personally, and professionally.

Student Leadership and Engagement Center

Student Government

Founded in 1921, Student Government is a student-run organization that serves as the official voice of the student body. The organization attempts to better the student experience at NC State by working alongside university administrators to address student concerns.

Student Government is organized into five primary areas: executive, legislative, judicial, the treasury, and the Board of Elections. Student organizations may seek funding from Student Government appropriations committee through a bi-annual process.

Timothy Reid, Student Body Vice President
Miles Calzini, Student Senate President
Harrison Andrews, Student Body Treasurer

The University Activities Board

The University Activities Board (UAB) was formed in 1951 to produce quality programming "for the students, by the students." The mission of UAB is to create innovative activities that stimulate, motivate, educate, and involve the student body. Annual programs include Wolfstock, Pan-Afrikan Week, and TUFFTalks.

Yazmin Sanchez, Vice President

Fraternity and Sorority Life

There are over 50 fraternities and sororities at NC State University, each founded to prepare students for society through a values-based fraternal experience. Affiliation with an organization is designed to empower students to pursue their potential, providing opportunities to belong, give, achieve, live and lead. How organizations enact those values through membership, programs, and activities are what makes each organization unique. Fraternities and sororities provide opportunities to get involved, helping students on a large campus build a support network of peers that share similar goals and interests. Organizations challenge members to take on new responsibilities, develop their leadership potential, be active within the campus and surrounding communities, and adopt a commitment to volunteerism and civic engagement. Fraternities and sororities also provide their members with a unique lifetime membership, connecting them with local graduate and alumni chapters and national alumni groups well after graduation.

Greek Village provides housing to 15 organizations and 526 residents, with six residences in University-owned facilities and nine in privately owned facilities. The Greek Village project is currently in Phase 3 of 5 for planned redevelopment, which is replacing aging infrastructure and aims to provide opportunities for alumni house corporations to design, build, and operate organization-owned housing on campus. A total of 21 building lots will be developed along with 275 additional beds for residents of townhomes and apartments.

Additionally, nine full-time House Directors and five Chapter Resident Directors live on-side to ensure facility safety as well as compliance with university standards.

For more information on membership, educational programming, or service opportunities, visit the Department of Fraternity and Sorority Life's website, the office in 5261 Talley Student Union, or call 919. 513.2910.

Website (https://fsl.dasa.ncsu.edu/)
Shelly Brown Dobek, Director of Fraternity and Sorority Life

Student Media

NC State students have the opportunity to produce and manage a variety of student-oriented media. By working with these media, students gain valuable co-curricular experience in sales, marketing, journalism,

broadcasting, production, design, multimedia communication, leadership and management. NC State offers six media outlets staffed by students and supported in part by self-generated non-fee revenue, as well as a student-staffed Business and Marketing office which coordinates advertising sales, sponsorships and full-service marketing opportunities for all six media. Many staff positions are paid. Visit the department website (https://studentmedia.dasa.ncsu.edu/).

Agromeck

Agromeck, the university's yearbook first published in 1903, provides a record in words and pictures of student and campus activities each year. Student staff members include photojournalists, writers, designers and editors, all with a common mission: documenting the history of the university from the student perspective. The *Agromeck* has received the nation's highest awards for general excellence and photography as well as national Pacemaker and Crown awards from the Associated College Press and the Columbia Scholastic Press Association, respectively.

Nubian Message

Nubian Message provides news and features about the Black community at NC State, as well as coverage of regional, state and national issues of interest to our students. To find out more about this bi-weekly publication, visit the *Nubian Message* online.

Roundabout

Roundabout is a glossy, full-color, general interest magazine printed four times a year. Each edition highlights topics relevant to students during that time of year, such as housing, wellness, and dining and culture.

Technician

Technician, the university's oldest student newspaper, is published each Thursday when school is in session during the fall and spring semesters, and online with breaking news and online-only content year-round. With a print circulation of 3,000 copies at nearly 90 newsstands on and near campus, *Technician* has earned numerous state and national awards for news, features, sports, opinion writing and photography, as well as general excellence. Online, you'll find continuous updates of news, features, sports, campus events, and other content of interest to students, including video, audio and photo slideshows.

Windhover

Windhover, the campus literary and visual arts magazine, is published each spring. As a showcase for NC State's creative writers, poets, artists, photographers and musicians. It has received numerous national awards, including the Pacemaker from the Associated Collegiate Press and Gold and Silver Crown awards from the Columbia Scholastic Press Association.

WKNC 88.1 FM HD-1/HD-2

NC State's student-run radio operates at 25,000 watts to reach a potential audience of more than 1.4 million. This distinction makes WKNC 88.1 FM HD-1/HD-2 one of the largest student-run college radio stations in the United States. It employs a full complement of student managers, music directors, DJs and multimedia content creators to provide radio programming 24/7/365, as well as various online content on its blog, YouTube channel and podcasts. WKNC also sponsors live music events both on campus and at music venues in the Triangle. Visit (and listen to) WKNC.org (http://www.wknc.org/) and on social media @WKNC881.

Student Media Business and Marketing Office

The Student Media Business and Marketing Office gives students interested in sales and marketing an opportunity to hone their skills while earning commission on every advertisement and sponsorship they sell. From print, to broadcast, to online sales, few (if any) organizations at NC State offer our students a better way to build their "real-world" business and marketing acumen as they work toward earning their degree from NC State. To find out more, visit the Business and Marketing Office online (https://studentmedia.dasa.ncsu.edu/advertising/).

The Student Media Board of Directors

The Student Media Board of Directors (https://studentmedia.dasa.ncsu.edu/board/) is a way for students to get involved in the management of a large business operation. The Board of Directors is the governing arm for all student media which use student fee monies to support their operations. Elections to the Board are held in the spring.

Student Services

NC State University knows that there's more to academic success than books and research papers. That's why we offer a full range of services to support students in all aspects of their academic careers. Our full-service Student Health Center helps keep students healthy, while our Career Development Center helps them plan for life after graduation. Take a look through all of our student services below to see how we are here to support your time at NC State.

Academic Advising Programs and Services

Academic Advising Programs and Services (AAS) provides quality and timely advising services to students and faculty to facilitate academic success, major selection, career development, and personal enrichment. Current or former NC State undergraduate degree students in transition are the priority population for AAPS. AAPS is a collaborative of cross-curricular professional advisors who partner to provide walk-in, face-to-face, and virtual advising to undergraduate students exploring majors; current information on General Education, declaring majors & minors, and academic policies; and advising support and development to faculty and staff across the campus.

Pre-Professional Programs

Pre-Law Advising

Law schools neither prescribe nor recommend a particular undergraduate curriculum for prospective candidates. A student may prepare for law school within any of the majors offered by the nine undergraduate colleges. Pre-Law Services at NC State are offered through the Career Development Center (http://careers.ncsu.edu/). Through Pre-Law Services, students receive guidance on preparing for law school, taking the LSAT, and applying to law school. Students have the opportunity to learn and network through experiential learning programs, internships, seminars and workshops, and the annual Law School Fair.

The Pre-Law Advisors also works with the Pre-Law Students' Association (PLSA), which is open to all interested students. During the year the PLSA provides programs that have included: NC State Law School Fair, local attorneys, panel of Law School students, Law School Directors of Admission, information on the admissions process. For more information, visit prelaw.dasa.ncsu.edu

Health Professions Advising

Many NC State undergraduate students are planning a career in the health professions and will apply to attend medical, dental, optometry or other health care graduate schools after graduation. **Health Professions Advising** at NC State University offers guidance, information, and support to students interested in attending health professional school. The Health Professions Advisor can assist you with:

- Prerequisite course selection
- Becoming a competitive candidate
- Selecting potential health professions schools
- Application materials & timelines

- Personal statement assistance
- Interview tips & preparation

Health professional schools do not require students to obtain a designated “Pre-Health” degree. Instead, they seek students who have demonstrated academic success and who also have excelled in other areas including clinical and service experience as well as social development. Like most schools, NC State does not offer a dedicated “Pre-Health” curriculum. Instead, we recommend that students interested in health professions select the academic major that is of greatest interest to them while ensuring that they select courses that provide a strong foundation in the natural sciences required by most professional programs for admission. These include biology, chemistry, physics, and calculus along with recommended courses like genetics and biochemistry. It is also recommended that students select courses that improve communication and writing skills as well as provide a strong foundation in the humanities, psychology and ethics.

For more information on Health Professions Advising, visit the Health Professions Advising website (https://prehealth.dasa.ncsu.edu/).

Veterinary Professions Advising Center (VetPAC)

The Veterinary Professions Advising Center (VetPAC) aims to provide NC State students and alumni the guidance, resources and experience necessary to become uniquely competitive veterinary school applicants. While there is no formal "pre-veterinary" program or degree at NC State, many students interested in pursuing veterinary school often declare majors in the following disciplines: Animal Science, Zoology, Biological Sciences, Biochemistry, Microbiology, and Poultry Science.

VetPAC is housed within the College of Agriculture and Life Sciences. For more information on pre-veterinary advising, visit the VetPAC website (https://cals.ncsu.edu/vetpac/).

Academic Success Center

The Academic Success Center provides free academic assistance to NC State undergraduate students enrolled for credit in many challenging 100- and 200- level math, physics, and chemistry classes as well as introductory accounting, biology, statistics, and economics classes. Several types of assistance are available that are designed to best meet the students’ needs, including 1:1 appointment tutoring, group tutoring, drop-in tutoring, and Supplemental Instruction (SI). In addition, writing consultations are available to both undergraduate and graduate students to provide assistance at any stage of the writing process in the English language. Academic peer mentoring is also available to students wishing to work on general academic skills such as note-taking, time management, and test preparation.

Students are eligible to become a tutor or mentor for the ASC if they have an established GPA of 3.25 or better and at least a B+ in the course(s) they wish to tutor. All new student employees are required to take USC 210 during the first semester of employment to learn techniques designed to help students become independent learners.

Academic Support Program for Student Athletes

The Academic Support Program for Student Athletes (ASPSA) is a comprehensive support program that strives to meet the academic, personal and professional development needs of all student-athletes, promoting excellence and effectiveness in undergraduate and graduate education as well as leadership and civic engagement.

ASPSA is committed to extending the educational experience of its constituency with particular emphasis on empowering student-athletes to become strong self advocates, providing specialized initiatives to facilitate a smooth transition from high school to college and from college to professional life while successfully integrating student-athletes into the campus community; enhancing academic skills for student-athletes at all skill levels and providing academic support personalized to the needs of each student-athlete.

ASPSA will maintain a strong sense of integrity and will continue to strive to be one of the benchmark programs for academic support for all collegiate academic support programs in the nation.
The mission of the Office of Academic Support Program for Student Athletes at NC State University is:

1. to support the recruitment, retention and graduation of NC State student-athletes;
2. to provide a comprehensive support system that affords NC State student-athletes equitable opportunity to pursue academic, personal, and professional development and
3. to strongly adhere to the principles of integrity, excellence, and lifelong learning.

Campus Community Centers

NC State's Campus Community Centers are proudly comprised of the African American Cultural Center, the GLBT Center, Multicultural Student Affairs, and the Women's Center.

African American Cultural Center

The mission of the **African American Cultural Center** is to promote awareness of and appreciation for African American and other African descent experiences through activities and events that enhance academic excellence and strengthen cultural competence for the campus and surrounding communities. Students, staff and visitors are welcome

to attend our programs and events and to visit the Art Gallery and Library in Witherspoon Student Center, the first building on NC State's campus named for an African American, Dr. Augustus M. Witherspoon.

To learn more about the African American Cultural Center, visit our website (https://diversity.ncsu.edu/aacc/). Our main office is located on the 3rd floor of Witherspoon Student Center.

African American Cultural Center
355 Witherspoon Student Center
aaculturalcenter@ncsu.edu

GLBT Center

The mission of the **NC State GLBT Center** is to engage, develop and empower members of the gay, lesbian, bisexual and transgender communities and their allies. To fulfill that mission, we help students connect to form social support networks; offer identity-based and health-related information and resources; consult with students individually and collectively on issues related to personal identity and academic success; refer students to a wide variety of resources on campus and in the local community; provide professional and leadership development opportunities; and host educational events and programs.

Our vision is of a campus where students, staff, faculty and alumni feel a shared responsibility to increase their individual understanding of and comfort with diversity, to enhance their ability to connect with members of their own communities, to build coalitions across identity groups and to work collaboratively to raise awareness, promote respect and create a culture where they can advocate for equity, inclusion and social justice on behalf of themselves and others.

For more information about our educational workshops, events, student organizations, resources or support services, visit our website (http://www.ncsu.edu/glbt/). We are located on the 5th floor of Talley Student Union.

GLBT Center
5230 Talley Student Union
glbtcenter@ncsu.edu

Multicultural Student Affairs

Multicultural Student Affairs researches, designs and implements programs that promote the academic success, retention and graduation of students, with an emphasis on students from historically underrepresented and marginalized ethnic populations. Our programs and services aim to expand students' horizons while honoring their respective cultural experiences.

Multicultural Student Affairs collaborates with many university organizations to conduct programs to enhance personal, professional and cultural development and student success. Programs and services have included orientation symposia, peer mentoring, heritage month programming, cultural celebrations, academic recognition programs, student leadership development, recruitment and advising.

We welcome any NC State student to our programs and services. Visit our website (https://diversity.ncsu.edu/msa/) for more information. We are located on the 4th floor of Talley Student Union.

Multicultural Student Affairs
4261 Talley Student Union
multicultural@ncsu.edu

Women's Center

The mission of the **Women's Center** is to build and create a community of authentic and engaged allies and leaders to pursue gender equity and social justice; enhancing the campus climate through education, advocacy, support and leadership development.

The Women's Center provides leadership opportunities through programming initiatives such as Feminist Fridays, the Women of Color Retreat, The Movement peer educators, alternative service break trips, and volunteer and internship opportunities. Staff in the Women's Center also serve as direct advocates for survivors of interpersonal violence.

The NC State Women's Center serves students of all gender identities, gender expressions, and sexual orientations. To learn more about the Women's Center visit our website (https://diversity.ncsu.edu/womens-center/). We are located on the 5th floor of Talley Student Union.

Students can speak with an advocate by stopping by the center:

*See also **Office for Institutional Equity and Diversity** under the University Administration section for other units within this office dedicated to diversity, equity and inclusion at NC State.*

Career Development Center

The **Career Development Center's** mission is to prepare and empower students to identify and pursue their career goals. From first year students to graduate students, services are designed to meet the needs of students across all stages of career development. Career coaches are available to meet with students one-on-one or in group settings. Students are provided access to career related assistance ranging from resume development and interview strategies to job search techniques and experiential learning opportunities.

The Career Development Center's online career tool, ePACK, allows students to search and apply for co-op's, internships, and full-time jobs, schedule an appointment with a career counselor, schedule on-campus interviews with employers, find career fairs, and search for career-related events and activities. A wealth of career information is available on the Career Development Center's website (http://careers.dasa.ncsu.edu/).

College Advising Corps (CAC)

The College Advising Corps is a nonprofit AmeriCorps program that assists low-income, first-generation college, and underrepresented students from rural North Carolina navigate the process of finding postsecondary programs that are the best academic, financial, and personal fit for them.

The College Advising Corps at NC State launched in 2014-2015 as the result of a generous gift from the John M. Belk Endowment. The program currently serves 21 high schools across 11 NC counties (Bladen, Duplin, Franklin, Granville, Martin, Moore, Pender, Perquimans, Pitt, Washington, Wayne).

AmeriCorps College Advisers support students through college exploration, admissions, and financial aid processes. Advising Corps Members meet with students, collaborate with high school teachers and staff, and plan events throughout the year to create and promote a college-going culture within the community.

Counseling Center

NC State and the **Counseling Center** work hard to create a campus culture that supports and connects us all. College is a time for tremendous intellectual, social and professional growth. But as we create leaders and innovators, we also want to cultivate emotional and psychological growth that will allow our students to be successful and flourishing.

The Counseling Center provides individual and group counseling for NC State students wishing for assistance with personal, academic or career concerns. Services are primarily short-term in nature and referrals are made as appropriate. Counseling staff includes psychologists, professional counselors, social workers, graduate interns and psychiatrists who are available to work with students with concerns such as anxiety, depression, relationship issues, substance abuse, test anxiety, time management, dissertation support, and choosing a career. All counseling is strictly confidential with exceptions noted on the Counseling Center website. In addition to counseling, workshops and support groups are offered throughout the year in a variety of areas such as time management, stress reduction, suicide prevention, and relationship skills.

The Counseling Center is located on the 2nd floor of the Student Health Center, 2815 Cates Avenue. Appointments may be scheduled by coming by the Counseling Center during walk in hours daily as posted on our website. Emergency after-hours assistance is available by calling the Counseling Center at 919.515.2423 and selecting the Counselor on Call. Additional information about services can be found on the Counseling Center's website (https://counseling.dasa.ncsu.edu/).

The Counseling Center is accredited by the International Association of Counseling Services (http://iacsinc.org/).

Disability Resource Office

The **Disability Resource Office (DRO)** facilitates accommodations and services for individuals with documented disabilities and serious medical conditions. Accommodations and services are rendered based on the individual's documented needs and are determined through an interactive process. DRO will maintain appropriate confidentiality of records and communication regarding disability. To receive accommodations and services, please contact the DRO as far in advance as possible.

In accordance with Section 504 of the Rehabilitation Act of 1973 ("Rehab Act"), the Americans with Disabilities Act of 1990 ("ADA"), The ADA Amendments Act of 2008 ("ADAAA"), and state law, NC State is committed to ensure that no qualified individual with a disability in the United States shall be excluded from, denied the benefits of, or be subjected to discrimination under any program or activity. The DRO

works diligently to ensure that individuals with disabilities are provided an inclusive experience and equal opportunity by determining eligibility for accommodations for students with disabilities and serving as a resource to faculty in helping them understand their obligation in providing equal access.

Visit The Disability Resource Office online (http://dso.dasa.ncsu.edu/) for more information about services, student and faculty rights, and other resources.

Military and Veteran Services

NC State University **Military and Veteran Services (MVS)** is the university's centralized resource to coordinate integrated support to military-affiliated students. Our primary objective is to ensure that our veterans and military-affiliated students feel a strong sense of belonging to NC State.

Mission

NC State University is committed to educating, supporting, and honoring student veterans and their families by helping them acquire the knowledge and skills necessary to achieve their personal and professional goals.

The MVS proudly serves all military-affiliated students, staff, faculty and retirees:

- Discharged and retired veterans
- Active duty military
- Members of the National Guard and Reserve Components
- Spouses and dependents of military and veterans
- Gold Star family members

The goal of the MVS is to ensure you are successful as you:

- Transition from the military to the campus;
- Persist to graduation; and
- Transition from NC State into your chosen career

For more information about our services and resources, visit our website (https://veterans.dasa.ncsu.edu/).

Nick Drake, Director

NC State Dining

NC State Dining's award-winning program offers food options that are convenient, fresh, wholesome and delicious. We have over 40 dining locations across campus, all of which accept some form of the meal plan. From traditional all-you-care-to-eat dining halls to a mix of restaurants, cafes and convenience stores, our program is designed to meet the unique needs and tastes of the campus community.

NC State Dining hosts a number of theme meals and monotony breakers during the year, including our famous All Carolinas Meal, which features items grown or produced in North Carolina. We also host a number of cultural meals, too. Check out the special events calendar (http://www.ncsudining.com/university-dining-events/) for more details.

Nutrition

We understand the diverse nutritional needs of our campus population, such as food allergies, intolerances, and special dietary preferences. Our website (https://dining.ncsu.edu/locations/) provides nutritional information for all of our restaurants and dining halls, and many locations have a nutrition kiosk where guests can check the daily menu for allergens and other key ingredients.

Our Well-Fed Wolfpack nutrition team and registered dietitian are nationally recognized for their efforts to make NC State one of the best campuses known for its nutrition and wellness programs (http://www.ncsudining.com/campus-dining/healthwellness/). Our dietitian is available for a free consultation to discuss your nutrition goals and special dietary needs. We place a special emphasis on fresh foods and wellness while providing nutrition resources, education, and awareness across campus.

These efforts have helped us earn national recognition, including the Top 26 Healthiest Colleges and Top 10 Gluten Free Accommodating Colleges in the nation.

Meal Plans

All first-year students living on campus are required to have a meal plan.

Our meal plans (https://dining.ncsu.edu/meal-plan-options/) are designed to cover the cost of meals and snacks in three different ways: Dining Hall Swipes, Meal Credits, and Dining Dollars.

- **Dining Hall Swipes:** Just one swipe at our dining hall locations and you can enjoy a full meal or a light snack, all with a single swipe.
- **Meal Credits:** Use Meal Credits to purchase a meal at one of our many restaurants or cafes. Meal Credits are also used to purchase a dining hall take-out meal. Meals Credits vary by location and only one Meal Credit can be used per meal period.
- **Dining Dollars:** Use Dining Dollars at convenience stores and vending machines, or to make small purchases at a restaurant or cafe in lieu of a Meal Credit.

Our **Flex Plans** (Flex 500 Plan and Flex 800 Plan) are primarily designed for students who desire to have the majority of their meals covered by a convenient, affordable campus dining plan. All three plans include all-day access to our dining halls, so students can come and go when they're hungry to our three all-you-care-to-eat dining halls and enjoy a full meal or light snack as often as they like throughout the semester. (The all-access pass requires 30 minutes pass between each Dining Hall Swipe.)

We also have **Block Plans** (Block 80 and Block 120) available. They can be used at any time in the dining halls and includes 500 or 600 Dining Dollars. Our **Commuter/Apartment Plan** is for students who commute or live in on-campus apartments. It includes 850 Dining Dollars that can be used at any dining location and comes with a 5% discount t the register on all purchases.

Picking a Plan

Detailed information and a full guide on selecting a plan is available on our website at dining.ncsu.edu. We recommend you review the plans, then consider your expected daily travel and eating patterns once you've received your residence hall assignment and course schedule. Once you've picked a plan, register online (https://dining.ncsu.edu/meal-plan-options/meal-plan-signup/) or complete the paper form you'll receive in your packet before you arrive on campus this fall. You can then try out your plan and make any changes via our website prior to September 12. Be sure to re-evaluate for the spring semester to ensure your plan is the right one for you and make any changes by January 25.

We're Here for You

We take pride in offering quality food and services designed specifically to meet the wants and needs of students. For more information, visit NC State Dining online (http://dining.ncsu.edu) or call 919.515.3090. Follow us on Facebook (https://www.facebook.com/ncstatediningpack/), Twitter (https://twitter.com/ncstatedining/) and Instagram (https://www.instagram.com/ncstatedining/) for information on special events, featured menu items, cooking demos, and more.

NC State Stores

Wolfpack Outfitters

Wolfpack Outfitters (the NC State Bookstore) has been the authority on textbooks, school supplies, computers and apparel since our founding in 1954. Wolfpack Outfitters ensures students have access to the best prices and service to secure course materials through price comparison tools and easy on-campus shopping. They also offer the most extensive collection of officially licensed merchandise available anywhere.

Shop online or find out more on our website (https://shop.ncsu.edu/).

Locations

Wolfpack Outfitters is the flagship location, located in Talley Student Union. The store carries fan gear, apparel, gifts, books, novelty items, school supplies, technology and more.

Wolfpack Outfitters also services students on Centennial Campus with a smaller satellite location that carries books, school supplies, apparel and snacks. It is located in Wolf Ridge Apartments next to On the Oval Culinary Creations.

Textbooks

Once a student has completed course registration, they can view their book list from their Class Schedule page in MyPack Portal. From there, students can view all required and recommended course materials, compare prices with the online shopping tool, and place an order.

Wolfpack Outfitters prides itself on the value it provides, and it is backed up with pricing transparency. NC State stores also offers a textbook buy-back program at the end of each semester, and students can visit our website to check their value before bringing them in.

Financial Aid and Scholarship Funds

Wolfpack Outfitters will defer payment of online and in-store textbook orders for students who receive financial aid or academic scholarship funds. These charges will be sent to the University Cashier's office for processing upon disbursement of funds. Only items fulfilled by NC State Bookstores are eligible for this payment method at checkout. Students who receive athletic scholarships or sponsorship (VA, VR, WIA, Services for the Blind) should make all purchases in the store.

Laptops

The Technology Department offers business class computers that meet the specifications for all areas of study at NC State. All computers sold at the NC State Stores meet or exceed the university-set recommendations, and are guaranteed to last through all four years of college.

By purchasing from Wolfpack Outfitters, students are guaranteed to receive the convenience of full warranty support on campus.

New Student Programs (NSP)

New Student Programs (NSP) addresses the holistic needs of each new NC State student to create a foundation of success.

Based on the core value that people matter, we achieve this through:

- Cultivating strategic partnerships across the University
- Promoting an environment of personal responsibility
- Fostering inclusivity through a shared campus identity
- Partnering with parents and families
- Preparing and empowering student leaders to serve the campus
- Striving to be innovative in meeting the needs of our community

New first-year, transfer, and international students can visit our website (https://newstudents.dasa.ncsu.edu/) to view new student checklists, learn about orientation, explore pre-semester programs, and view other

resources for how to connect with the Wolfpack before arriving on campus.

Michael Coombes, Director

Office of International Services

The Office of International Services (OIS) is charged with meeting the immigration advising and cross-cultural programming needs for the university's more than 4000 international students and 700 J-1 Exchange Visitor scholars who come from more than 120 different countries. Services provided by OIS include advising students and scholars on immigration regulations and university policies; authorizing certain types of on or off-campus employment authorization for F-1 and J-1 visa holders; and providing cultural programs designed to enrich the cultural and academic experience of the campus community. OIS programs include: New International Student Orientation, Culture Corps, ISSERV service learning program, English Conversation Club, and many others. New international students are required to participate in New International Student Orientation. OIS also provides opportunities for U.S. students to get involved in the international community at NC State by inviting participation in various cross-cultural programs such as volunteering at the International Student Orientation and English Conversation Club.

International applicants must apply to the Admissions Office by the stated deadlines and must meet all the necessary requirements for admission. In addition, international applicants must meet certain language and financial criteria (see the TOEFL and Financial Information sections under Freshman Admission).

The North Carolina Global Training Initiative (GTI) sponsors several short-term certificate, internship, and research programs that international students may be interested in. These full-time non-degree study programs allow international students to study at NC State for one semester in order to learn about U.S. culture and education, improve their conversational English, take undergraduate courses in their field of study back home or in preparation for admission to a degree program here in the U.S., and experience life in the U.S. These programs have a later application deadline and are great for students to take before enrolling in an undergraduate or graduate degree program in the US or for siblings and friends of current degree-seeking students who want to study in the US together.

International students may be interested in joining the GTI's Cultural Exchange Network (CENet). CENet connects NC State's domestic and international students through joint participation in social, academic, and service learning events and workshops. Visit the CENet website (https://getinvolved.ncsu.edu/organization/cenet/) for more details about the program and how you can apply.

Anyone interested in the GTI's programs can visit us on the website (https://gti.ncsu.edu/) for more information.

Outline of minimum immigration requirements for F-1 and J-1 students:

- Keep passport and I-20 or DS-2019 current
- Maintain full-time enrollment every semester (12 hours/semester for undergraduates)
- Make good academic progress toward your degree
- Do not work or intern off campus without prior written approval from OIS
- Do not work on campus more than 20 hours in any one week during the semester
- Update any address change in MyPack Portal within ten days of moving
- Update OIS immediately of any changes in name, funding, or visa status
- Consult with an OIS advisor **before** changing curriculum/majors, withdrawing, dropping below full-time, transferring to another school/program, etc.
- Purchase and maintain the NC State University approved Health and Accident Insurance or other insurance plan that meets the published minimum coverage requirements.
- Keep your valid passport and recently signed visa certificate (I-20 or DS-2019) with you when you travel abroad. Consult with an OIS advisor about visa and travel questions

Further information about immigration requirements, employment and travel questions, cultural opportunities, and other critical information designed to assist international students are detailed on the OIS website. For individual advising, please call (919) 515-2961 to make an appointment with an advisor or stop by during our walk-in hours of 10:00am-11:45am and 1:00pm-2:45pm on Monday, Tuesday, Thursday and Friday (no walk-ins on Wednesdays).

Prevention Services

NC State Prevention Services believes that information should be shared from an objective and factual perspective, without bias or an agenda to steer an individual in any one direction unless imminent harm would result. Prevention Services is a no-cost service to all students and offers consultation to parents of students, staff, and faculty. We are flexible in format and willing to work with you, your group(s), and/or your department in some of, but not limited to, the following ways:

- one-on-one conversations focused on resources
- formal/informal presentations and trainings
- formal/informal conversation facilitators
- staff/student group meeting guests
- Q & A resource
- student group leadership trainings/discussions
- event planning for risk management and problem prevention

CARES: Student Behavioral Case Management

The **CARES** case managers at NC State work collaboratively with campus resources to provide support for students who are in distress or crisis or who are identified as exhibiting concerning or worrisome behaviors. Effective case management ensures that the community at large remains supported and safe while the student involved gains the necessary resources to remain successful academically and personally at NC State. Services include:

- Providing comprehensive outreach and consultation services to the NC State community in order to proactively identify students with concerns
- Providing early intervention and behaviorally based assessments to determine appropriate resources and referrals to campus and community resource
- Working constructively with students to foster resilience and self-advocacy
- Monitoring student progress

Learn more about CARES: Student Behavioral Case Management on our website (https://prevention.dasa.ncsu.edu/nc-state-cares/about/).

Alcohol and Other Drug Prevention Education

Alcohol and Other Drug Prevention Education (AOD) strives to create and sustain a caring community that prepares students to succeed academically, professionally, and personally as well as to become informed, engaged, and productive citizens by reducing the potential unwanted results of substance misuse. Services include:

- Providing alcohol education programming to all first-year students prior to arriving at NC State
- Consulting with campus partners, students, alumni and faculty regarding AOD topics including risk management and prevention
- Providing training for the campus community on harm reduction strategies
- Administering BASICS (Brief Alcohol Screening and Intervention for College Students)

Learn more about Alcohol and Other Drug Prevention Education on our website (https://prevention.dasa.ncsu.edu/alcohol-prevention/about-aod/).

Suicide Prevention

Suicide Prevention efforts at NC State work to minimize identified risk factors and increase protective factors related to suicidality. This includes increasing social connectivity on campus through increasing awareness of campus resources and large-scale outreach efforts. In addition, we work to increase broad ownership across campus for suicide prevention by educating students, faculty, and staff regarding how to recognize when a person is exhibiting signs of suicidal ideation or intent and how to successfully intervene. We also work to decrease stigma around suicide and mental health help-seeking behavior through increasing awareness of the commonality of painful experiences, empowering Mental Health Ambassadors, and creating videos related to personal student stories. Suicide Prevention Services also offers support to those impacted by the loss of a community member to suicide.

Services include:

- Providing QPR (Question, Persuade, and Refer) Suicide Prevention Training
- Creating and collaborating large scale campus events focused on suicide prevention and mental health awareness
- Developing and providing programming for faculty and staff focused on early intervention
- Supporting the Division of Academic and Student Affairs' post-vention efforts following tragic events involving students, faculty or staff

Learn more about Suicide Prevention on our website (https://prevention.dasa.ncsu.edu/suicide-prevention/about-suicide-prevention/).

Student Health

At NC State we believe in enhancing both students individual health and the overall health of our campus community. With an understanding that Wellness is the interdependent and interactive combination of love for what is done each day, the quality of relationships, the security of finances, the vibrancy of physical health, and the pride taken in what is contributed to our communities. **Student Health Services** is at the cornerstone health and wellness on campus and offers non-urgent medical care and health prevention to students as an outpatient center. We are staffed by board certified physicians, nurse practitioners, physician assistants, registered nurses and other medical support professionals. Some of our services include primary care, gynecology services, physical therapy, nutrition counseling, pharmacy, and specialty services with local dentists, orthopedists, and gastroenterologists.

Student Health is accredited by the Accreditation Association for Ambulatory Health Care, Inc (http://www.aaahc.org/) (AAAHC) and Commission on Office Laboratory Accreditation (http://www.cola.org/) (COLA).

To learn more about the many services and benefits we offer students, visit our website (https://healthypack.dasa.ncsu.edu/).

Hours of Operation

Student Health Services on Main Campus operates on the following hours:

- Monday: 8 a.m. - 5 p.m.
- Tuesday: 9 a.m. - 5 p.m.
- Wednesday: 8 a.m. - 5 p.m.
- Thursday: 8 a.m. - 5 p.m.
- Friday: 8 a.m. - 5 p.m.
- Saturday: 9 a.m. - 12 p.m. (During fall and spring semesters, excluding breaks, for illness and injury)
- Sunday: Closed

Student Health Services on Centennial Campus is our newly opened location in Plaza Hall on Centennial Campus. For hours of operation, please check our website.

Physical Therapy on Main Campus allows appointments during the following hours during the fall and spring semesters:

- Monday: 8 a.m. - 5 p.m.
- Tuesday: 9 a.m. - 5 p.m.
- Wednesday: 8 a.m. - 5 p.m.
- Thursday: 8 a.m. - 5 p.m.
- Friday: 8 a.m. - 2 p.m.
- Saturday: Closed
- Sunday: Closed

A nurse advice line is available at all other times to assure students receive qualified nurse and medical advice. During adverse weather, students should check the Student Health Services website (https://healthypack.dasa.ncsu.edu/) for any variance in operating hours.

Summer session hours are Monday through Friday, 8 a.m. to 5 p.m. with **no weekend hours.** We accept patients for care up to 4:20 p.m to provide sufficient time for you to see your healthcare provider.

Patient appointments are typically 20 minutes.

How to Schedule an Appointment

Appointments can be scheduled online, via the HealthyPack Portal (https://sso.medicatconnect.com) or by calling Student Health Services at 919.515.2563.

Charges

All registered students pay a health fee which provides access to care and covers most, but not all, office visits for provider services. There are charges associated with x-rays, lab tests, allergy injections, travel vaccines, physical therapy, annual physicals, some office visits and specialty clinics. Students are responsible for the cost of prescriptions and over the counter medications /supplies available at the Student Health Pharmacy, as well as expenses incurred when referred to an off-campus laboratory, physician, hospital or pharmacy. Student Health Services will file most insurances on behalf of the student for services and prescriptions received at Student Health. Charges not covered by insurance may be transferred to the student's account with University Cashiers Office. *Check with us prior to your visit to determine if your insurance plan is considered in-network.*

Student Health partners with several specialty groups to offer on campus care. Specialists include Dermatology, Orthopedics and Gastroenterology. Insurance is filed by the specialty group and not Student Health. *Check with the specialty group prior to your visit to determine if your insurance plan is considered in-network.*

Student Health, in partnership with Campus Smiles Dental Services, provides comprehensive dental care to students. Campus Smiles accepts most dental plans and will file your insurance for you. Cash discount pricing is also available. To make an appointment, contact Student Health and ask for the dental clinic. Two locations are available for your convenience - Main Campus and Centennial Campus.

Staying Healthy and Well

As a part of our mission, Student Health not only provides high quality health care but also a comprehensive disease prevention and health education program to the NC State community. Our outreach health educator and Pack Peer Educators offer a variety of information, programs and services to students on issues facing today's young adults. Health topics include nutritional counseling, alcohol and drug education, healthy sexuality, women's health, men's health and much more.

Pack Peers is our student volunteer program that includes two tracks: Track I- Peer Education and Track II- Clinical Experience. Students interested in becoming engaged in our Pack Peer program should visit our website (https://healthypack.dasa.ncsu.edu/) for more information.

Required Medical Insurance

As mandated by the UNC System, NC State University **requires** all undergraduate students taking 6 or more credit hours to have and show evidence of a creditable health insurance policy. **Students failing to provide proof of coverage by the published deadline each semester will automatically be enrolled in and *billed for* the university-sponsored health insurance plan through Student Blue**. Note: This is a University requirement.

The University-sponsored health insurance plan (Student Blue) has a robust set of benefits at an affordable premium. Each year, complete information is available to students at the start of the fall and spring semesters. For more information regarding the health insurance requirement and/or the University-sponsored health insurance plan, go to our website (https://healthypack.dasa.ncsu.edu).

Confidentiality

All health and medical information is kept secure and confidential and is not divulged to anyone without the express **written consent** of the patient as required by Federal law.

Please Note: Parents must have the written consent of their student for the release of any protected health information (PHI). Guarantor of payment is not considered written consent for access to PHI.

Medical Insurance

NC State University requires all undergraduate degree-seeking students who are taking 6 or more credit hours to either purchase the University-sponsored health insurance plan (Student Blue) or provide evidence of an existing creditable health insurance policy. Students who are already covered by an insurance policy (i.e. through parent plans, family plans, employer-sponsored plans, or student health insurance) and wish to waive out of the university-sponsored plan must submit a waiver for each term.

Students enrolled in Distance Education courses only are not eligible for health insurance and therefore are not required to submit a waiver.

Students who do not waive out by the waiver deadline will automatically be enrolled in and billed each semester for the university-sponsored health insurance plan. This university-sponsored health insurance plan has a robust set of benefits at an affordable premium. More information regarding the health insurance requirement and/or the university-sponsored health insurance plan is available on the Student Health Services website (https://healthypack.dasa.ncsu.edu/).

Student Legal Services

University Student Legal Services (USLS) was created by Student Government to provide high quality legal services to currently enrolled NC State students. It is a 501(c)(3) nonprofit corporation funded by student fees, which provides affordability for the students. The purpose of the service is to provide legal education, advice, and representation within the scope of the prepaid student legal services plan that is registered with the North Carolina State Bar. The office promotes preventative law, enabling the students to make educated choices that will hopefully resolve their legal issues with as little disruption to their well-being and academic goals as possible. USLS provides advice, limited court representation, document creation and review as wells as educational seminars and materials on legal issues affecting students. The usual areas of law that most impact students are landlord tenant, consumer matters, employment questions, immigration, traffic and DMV issues, criminal issues as well as domestic matters.

Confidentiality

The staff are not employees of NC State or the State of North Carolina and as licensed attorneys are required to preserve the confidentiality of clients. All staff working with the office are bound by the Rules of Professional Conduct relating to nondisclosure of any information that has been discussed. The policy is firmly followed by the office to encourage clients to speak candidly about all information necessary for effective legal representation.

To learn more about Student Legal Services and the services that we can provide, visit our website (https://studentlegal.dasa.ncsu.edu/).

Student Services Center

The Student Services Center (SSC) is NC State's one-stop center for student registration, financial aid, and billing needs. The Center was formed in 2016 to merge the resources and services of the University Cashier's Office, Department of Registration and Records, and Office of Scholarships and Financial Aid in order to better serve the students of NC State. Students can visit the SSC in Harris Hall on Main Campus to order an official transcript, receive an enrollment verification, meet with a financial aid counselor, or discuss payment options with the university cashiers.

The Student Services Center website provides helpful information for students on how to search and register for classes, as well as everything they need to know about staying on track to graduate. Our experts are ready to help incoming, current and former members of the Wolfpack--and their families--accomplish any financial or academic task necessary.

Department of Registration and Records

The Department of Registration and Records is responsible for maintaining student records and enrollment systems, establishing the academic calendar, establishing and upholding policies on academic standards, and providing several other essential services to students and faculty on campus.

Charles Clift, University Registrar

Office of Scholarships and Financial Aid

The Office of Scholarships and Financial Aid is responsible for evaluating students' financial need and eligibility, awarding financial aid packages, disbursing federal and state financial aid awards, and upholding policies on academic standards for financial aid recipients.

Financial aid counselors and staff at NC State are trained and highly equipped to meet the needs of all students, even those with the most exceptional of circumstances. We are dedicated to working with students as closely as possible to ensure a seamless transition to NC State without financial worry.

Krista Ringler, Associate Vice Provost and Director

University Cashier's Office

The University Cashier's Office projects a positive image of the University by providing courteous and professional service. We treat each individual customer with dignity and respect. Financial services for the University are provided in an ethical and professional manner with a focus on fiscal integrity and accountability. The success of our students will always be our primary concern.

Maria Brown, Director

Learn more about the Student Services Center on our website (https://studentservices.ncsu.edu/).

*The Student Services Center is bound by the **Family Educational Rights and Privacy Act (FERPA)**, which gives students certain rights to privacy of their education records and rights of access to their education records. Employees and agents of the University are expected to comply fully with this law. Please review the NC State* REG 11.00.01 - Family Educational Rights and Privacy Act (FERPA) *(*https://policies.ncsu.edu/regulation/reg-11-00-01*) for detailed information about this federal law and what it means for our students, their families, and sharing of student information.*

The NC State Libraries

The NC State Libraries' website (http://www.lib.ncsu.edu) is a rich source of information and serves as a gateway to resources and services.

The D.H. Hill Jr. Library is open 24 hours/day in the fall and spring semesters. Branch libraries include: Harrye B. Lyons Design Library, Natural Resources Library, and William Rand Kenan, Jr. Library of Veterinary Medicine.

The Libraries' collections reflect the strengths of the university across disciplines. We provide demand-driven, network-based collections to the campus community in support of research and teaching. We are recognized as a national leader in building extensive research holdings in the areas of engineering, science, technology, and agriculture. The collection contains over 5.3 million volumes of books, bound journals, and government documents; over 128,000 print and electronic serial subscriptions; over 1.2 million e-books; 635 full-text databases in all disciplines and extensive digital collections; numerous video, audio, and multimedia titles; unique and rare materials in the Special Collections Research Center. The Libraries' participation in the Triangle Research Libraries Network (TRLN) provides convenient access to the collections of Duke University, UNC-Chapel Hill, and NC Central University.

Key spaces at the libraries include:

- Learning Commons, Faculty Research Commons, Graduate Student Commons
- Large-scale, immersive visualization spaces
- Digital media creation facilities
- Dataspace with advanced computing, software, training, and consultation (Hunt)
- A Game Lab for the scholarly study and enjoyment of games and for interactive workshops and demonstrations
- iPearl Immersion Theater for panoramic display of faculty and student work (Hunt)
- Makerspaces offering 3D printing and scanning and other specialized tools
- Special Collections Reading Room and Exhibit Gallery (Hill)

The James B. Hunt Jr. Library (https://www.lib.ncsu.edu/hunt-library/) on Centennial Campus is more than the 21st-century face of NC State. It's a place where ideas become reality and bold ambition forges beautiful solutions to global challenges.

The Libraries website (http://www.lib.ncsu.edu) provides information about and access to many services, including reference assistance, interlibrary loan, and electronic reserves. Library Course Tools (http://www.lib.ncsu.edu/course/) web pages are available for every course offered at NC State. These customized pages include e-reserves, article databases, librarian recommendations, citation tools, IM a Librarian for help, and more. The Libraries' Course Books on Reserves program makes over 4,500 required texts available on Course Reserves each year.

Greg Raschke, Senior Vice Provost and Director of Libraries

Transportation

Parking Permits

All students living on or off-campus may purchase a parking permit based on completed credit hours and permit availability. First-year resident parking permits are sold via a permit lottery, while all other parking permits are sold on a first come first serve basis. Demand for permits exceeds supply, so parking permits do sell out. Students must be registered for classes to purchase a parking permit. All parking permits can be purchased online. All student parking permits are virtual. See our website for more information, transportation.ncsu.edu.

Wolfline

Wolfline is NC State's own full-service transit system. Wolfline operates everyday class is in session, with limited service on weekends and breaks. Routes connect all three campuses, multiple park-and-ride lots, official NC State housing, and other destinations adjacent to campus. Buses are open to the general public and do not require any ID, pass, or fare. All buses are branded in NC State Wolfpack red, white, and black. Buses only stop at designated stop locations.

Please visit the Wolfline website (https://transportation.ncsu.edu/wolfline/) for the most up-to-date information about park-and-ride locations, bus routes, and schedules.

Alternative Transportation Options

NC State University Transportation offers the following alternative transportation options:

- **Bicycling:** Bicycling is an inexpensive, healthy, and environmentally-friendly way to travel to, from, and around campus. Bike racks are conveniently located throughout our three campuses, as well as on all Wolfline buses. Bicycle lockers (https://transportation.ncsu.edu/bike-locker-rental-form/) are available to rent and two bicycle fix-it stations are available on campus for basic bike repairs and adjustments. Students are strongly encouraged to register their bicycles (https://transportation.ncsu.edu/bicycling/) through the Transportation office. Campus Police also offer free engraving on bicycles.
- **Carpool**: NC State students who participate in the student carpool program (https://transportation.ncsu.edu/student-commuter-benefits/) can enjoy carpooling benefits and gain access to premium parking areas. The Transportation office requires at least two commuter students to form a carpool. All registered carpool participants must show proof of vehicle registration and a local address.
- **Local/Regional Transit**: GoRaleigh (https://goraleigh.org/), the City of Raleigh's public transit system, offers a city-wide bus service. Four GoRaleigh routes serve the NC State campus: Routes 4, 11, 11L, and 12. GoTriangle (https://gotriangle.org/) provides regional bus service to NC State from Raleigh, Cary, Apex, Durham, Chapel Hill, Wake Forest, Zebulon, Wendell, and many points in between, including the RDU airport. Currently, GoRaleigh and GoTriangle buses are not collecting fares through June 30, 2022, so the buses are free to ride without a pass.
- **Micro mobility**: NC State's scooter-share partnership provides scooters for use by students, employees, and visitors. Find details on our website (https://transportation.ncsu.edu/lime-scooter-share/).
- **Walking**: As an urban campus, NC State University is very walkable with short distances to off-campus locations such as shopping and restaurants, as well as between campus destinations. Many students and staff choose to walk to school or work, and/or combine walking with another alternative mode to get around campus. Visit the Transportation website (https://transportation.ncsu.edu/walking/) to download a Walk Times map.
- **Wolfpack Pick Up**: Wolfpack Pick Up is a service designed for students with injuries or living with disabilities. Wolfpack Pick Up services students on both Main Campus and Centennial campus. Rides are scheduled online (https://wolfpackpickup.dasa.ncsu.edu/). Questions about scheduling may be directed to wolfpackpickup@ncsu.edu.

TRIO Programs

TRIO Programs are Federal outreach and student services programs designed to serve and assist low-income individuals, first-generation college students, and individuals with disabilities to progress through the academic pipeline from middle school to post-baccalaureate degrees. Of these eight programs, NC State University hosts four programs, including the two premier TRIO pre-college programs, Educational Talent Search (1991) and Upward Bound (1978 and 2012). Collectively they have served thousands of students providing access to higher education. The Student Support Service program for undergraduate students launched in 2010. The Student Support Services STEM program launched in 2015. The Ronald E. McNair Postbaccalaureate Achievement Program launched in 2017.

Undergraduate Research (OUR)

The office of Undergraduate Research supports and promotes undergraduate opportunities in discovery, inquiry, and creativity-based scholarship through mentored research experiences with NC State faculty and other national and international scholars and professionals. Undergraduate Research is scholarly study in any discipline in which this scholarship culminates in advancements in science, technology, engineering, business, the arts, or humanities. Students from any discipline can engage in the excitement of scholarly research and present their work at multiple annual symposia. Research and travel awards supporting both student projects and the communication of results are available.

University Fellowships Office (UFO)

The **University Fellowships Office (UFO)**--formerly called the Fellowship Advising Office--helps NC State's undergraduate students, graduate students, and alums learn of and apply for nationally competitive and prestigious awards. These awards fund a wide range of opportunities, and many are connected to undergraduate and graduate degree programs or internships, overseas opportunities, and independent projects.

Some of our services include:

- Meeting with candidates to discuss their goals and interests and to help identify matching opportunities
- Reviewing and critiquing drafts of application essays and statements
- Providing institutional endorsements for applicants who receive the campus nomination (for the awards that require nominations/ endorsements)
- Submitting application materials at the national level on behalf of applicants
- Staging practice interviews for applicants selected at the national level for finalist interviews

University Housing

Living on Campus

Living on campus is an essential part of the Wolfpack experience: that's why students are required to live in University Housing their first year.

When you live on campus, you'll be at the heart of the Wolfpack nation, making it easy to be a part of all that NC State has to offer. Whether you're looking for the close-knit community of a village (https://villages.dasa.ncsu.edu/) or the diverse social opportunity of a traditional residence hall, we have the housing option (https://housing.dasa.ncsu.edu/find-a-community/) that's right for you. With a selection of 20 residence halls (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/) and four on-campus apartment communities (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/), you'll enjoy the once-in-a-lifetime opportunity to live in the heart of NC State.

Get Started with University Housing

Incoming First-Year Students

1. **Apply for housing:** You should complete your University Housing and Living and Learning Village application as soon as possible.

Students who have received acceptance for the Fall semester may access the housing application through the Campus Living section on MyPack Portal (https://mypack.ncsu.edu/). If you decide not to attend NC State, you can cancel your housing application without penalties. Space is assigned in the order in which applications are received. If you have a preferred building or roommate already in mind, an early application will help you get them.

2. **Choose a place to live:** You have a lot of options to choose from, ranging from residence halls to our Wolf Village Apartments. Find the ones that you like best (https://housing.dasa.ncsu.edu/find-a-community/).

Incoming Transfer Students

Due to the first-year live-on requirement that began in 2017, space is very limited for upper-class students. There are options available, however. NC State has two Living and Learning Villages that reserve space for transfer students.

1. Located in Wolf Village Apartments (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/wolf-village-apartments/) on the main campus, the Second-year Transitions And Transfer Experience (S.T.A.T.E.) Village (https://villages.dasa.ncsu.edu/village-options/state-village/) connects students to a variety of campus resources and programming meant to navigate their years following their freshman experience.
2. Located in Wolf Ridge Apartments (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/wolf-ridge-apartments/) on Centennial Campus, Albright Entrepreneurs Village (https://villages.dasa.ncsu.edu/village-options/albright-entrepreneurs-village/) residents live and work with entrepreneurial-minded peers of all disciplines to explore and develop their ideas in an environment that inspires creativity and innovation (https://villages.dasa.ncsu.edu/village-options/albright-entrepreneurs-village/village-benefits/).

Undergraduate students must be enrolled in at least 12 credit hours to be eligible to live on campus during the fall and spring terms. Students who must drop below these minimum requirements should contact University Housing to request an exception. Summer session housing (https://housing.dasa.ncsu.edu/current-residents/summer-housing/) is also available.

More Information

For more information about living on campus, visit:

University Housing
Monday - Friday | 8:00 a.m. to 5:00 p.m.
1112 Pullen Hall

housing@ncsu.edu
Website (https://housing.dasa.ncsu.edu/)

Living and Learning Villages

NC State's **Living and Learning Villages** are interested-based living communities that engage students both inside and outside the classroom. Villages provide an unparalleled living experience where you'll make life-long friends and immerse yourself in the NC State community. There is currently no additional cost to join a village.

Albright Entrepreneurs Village (https://villages.dasa.ncsu.edu/village-options/albright-entrepreneurs-village/): live in Wolf Ridge Apartments (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/wolf-ridge-apartments/)
The Albright Entrepreneurs Village provides sophomores, juniors, seniors and graduate students across all academic disciplines the opportunity to live, socialize and work with entrepreneurial-minded students. Residents can explore and develop their entrepreneurial interests in an environment that fosters creativity.

Arts Village (https://villages.dasa.ncsu.edu/village-options/arts-village/): live in Turlington Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/turlington-hall/)
Creative, vibrant and colorful only begin to describe the experiences you'll have as you explore theater, visual arts, crafts, music, dance and more.

Black Male Initiative (https://villages.dasa.ncsu.edu/village-options/black-male-initiative/): live in Avent Ferry Complex (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/avent-ferry-complex/)
BMI strives to establish a brotherhood and develop leaders among black male students. By promoting academic success, personal growth, professional development, and self-responsibility, the group breaks through negative stereotypes and combats challenges facing African-American males in today's society.

EcoVillage (https://villages.dasa.ncsu.edu/village-options/ecovillage/): live in Bragaw Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/bragaw-hall/)
EcoVillage is a first-year student program that welcomes students from all majors, creating both a multi-disciplinary and an interdisciplinary educational experience that prepares students for lifelong sustainable leadership, engagement, advocacy, and discovery.

Engineering Village (https://villages.dasa.ncsu.edu/village-options/engineering-village/): live in Sullivan Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/sullivan-hall/)
The Engineering Village is an extension to the College of Engineering's First-Year Engineering (https://www.engr.ncsu.edu/academics/undergrad/firstyear/) program introducing students to the field of engineering; encouraging thoughtful consideration to complex challenges facing our communities.

Exploratory Studies Village (https://villages.dasa.ncsu.edu/village-options/exploratory-studies-village/): live in Tucker (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/tucker-hall/), Owen, (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/owen-hall/) or Bowen Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/bowen-hall/)
The Exploratory Studies Village is for students entering the university who are knowingly undecided about a major. A year of guided inquiry and exploration coupled with one-on-one sessions with their academic advisor helps move students through the career planning and decision-making process.

Global Village (https://villages.dasa.ncsu.edu/village-options/global-village/): live in Alexander Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/alexander-hall/)
Global Village is a living and learning community for those interested in living and interacting with people from differing backgrounds, experiences, countries, and viewpoints.

Honors and Scholars Village (https://villages.dasa.ncsu.edu/village-options/honors-and-scholars-village/): live in Berry, Becton or Bagwell Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/berry-hall/)
Honors Village and Scholars Village merged in 2017 to become Honors and Scholars Village (https://villages.dasa.ncsu.edu/village-options/honors-and-scholars-village/). The most noticeable change being that Scholars Village residents will be relocating from Sullivan Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/sullivan-hall/) to east campus beginning Fall 2018. Students from both the University Honors Program (https://honors.dasa.ncsu.edu/) (UHP) and the University Scholars Program (https://scholars.dasa.ncsu.edu/) (USP) will now live together in the Honors Commons. The move will provide village residents with the opportunity to live and learn in a vibrant, socially and intellectually stimulating environment that fosters mindful interaction.

Impact Leadership Village (https://villages.dasa.ncsu.edu/village-options/impact-leadership-village/): live in Bowen Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/bowen-hall/)
ILV provides experiential learning for students who have a passion for leadership and service. Students are given the opportunity to engage in practical application of leadership to real-world issues and explore leadership development through one on one sessions with professionals. ILV enhances students' college experience and prepares leaders to make their personal IMPACT on the state, nation, and the world.

Native Space (https://villages.dasa.ncsu.edu/village-options/native-space/): live in Wood Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/wood-hall/)
Students living in the Native Space community will demonstrate growth and learning along three focal points of the living experience: culture, academics and community engagement. Residents will find a deeper awareness of Native American history and drive cultural awareness through participation in Native American Heritage Month and the annual NC State Pow Wow.

Students Advocating for Youth (https://villages.dasa.ncsu.edu/village-options/students-advocating-for-youth-village/): live in Syme Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/syme-hall/)
SAY Village is a community for first-year students in any academic discipline who have a passion for working with youth. Students develop one-on-one mentoring relationships with local elementary school students and learn what it means to be a youth advocate.

S.T.A.T.E. Village (https://villages.dasa.ncsu.edu/village-options/state-village/): live in Wolf Village Apartments (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/wolf-village-apartments/)
Provides second-year and transfer students with opportunities to make the most of their NC State experience by focusing on the six core pillars essential to student success: academic success, career development, community and global engagement, diversity, leadership, and life skills.

Wellness Village (https://villages.dasa.ncsu.edu/village-options/wellness-village/): live in Wood Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/wood-hall/)
Encourages and promotes the development and maintenance of a healthy body, mind, and spirit through a wide array of wellness programs and events. Students have the opportunity to experience personal growth while learning about the seven dimensions of wellness.

Women in Science and Engineering (https://villages.dasa.ncsu.edu/village-options/women-in-science-and-engineering-village/): live in Lee Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/lee-hall/)
WISE Village was created for female freshman and sophomore students majoring in science, technology, engineering, and mathematics. Membership in WISE provides a powerful networking opportunity with other goal-oriented women as you pursue your STEM major.

Women Of Welch Village (https://villages.dasa.ncsu.edu/village-options/women-of-welch-village/): live in Welch Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/welch-hall/)
WOW Village enhances women's leadership outside the classroom through empowerment, leadership development, self-awareness and diversity/social justice. WOW creates a holistic community that fosters individual women's growth and development while challenging residents to act as citizens of a global community.

Wellness and Recreation

About Wellness and Recreation

The Department of Wellness and Recreation is proud to be a leader of wellness at NC State. We value the impact of movement and inspire behaviors that improve health and well-being. Our programs, services and facilities enhance academic success by assisting students in developing skills and resilience needed for college and beyond.

Programs and Services

Take one of the more than 100 Group Fitness (https://wellrec.dasa.ncsu.edu/fitness/group-fitness-2/) classes offered each week, designed for every fitness level. Challenge yourself by taking cycling, TRX®, yoga, BODYPUMP™, Zumba® or various other class formats and experience firsthand how we make fitness fun. Students can take their structured workout to the next level with Small Group Training (https://wellrec.dasa.ncsu.edu/fitness/training-services/small-group-training/), where our coaches lead workshops on Olympic lifting, boxing and more.

Receive one-on-one attention from our nationally-certified personal trainers (https://wellrec.dasa.ncsu.edu/fitness/training-services/personal-training/). Learn how to exercise, improve performance and establish fitness goals. No matter what your fitness level, we have a trainer who wants to work with you.

Our ThriveWell (https://wellrec.dasa.ncsu.edu/wellness-2/) program offers wellness coaching and health education programs for individuals and groups. Wellness coaching takes a holistic approach and discovers how personal wellness impacts student success, strengths, values and goals. Establish a wellness plan and stay accountable with a certified health coach. Learn stress management techniques, strategies and lifestyle modification tips from our team of experts.

Intramural Sports (https://wellrec.dasa.ncsu.edu/sports/intramural-sports/) offers more than 40 different leagues and events throughout the year. Sports range from flag football, basketball, soccer and volleyball to exciting and unique events such as pool battleship, bubble soccer and cricket. Create a team, compete for a championship, join a recreational

league with friends or sign up for an individual/dual sport or special event to find a new favorite activity.

For students seeking a more competitive sports experience, check out one of the Club Sports (https://wellrec.dasa.ncsu.edu/sports/club-sports/) teams that include a wide variety of men's, women's and co-ed sports. These student-led organizations practice regularly and compete against other colleges and universities at local, state and national levels.

Outdoor Adventures (https://wellrec.dasa.ncsu.edu/outdoor-adventures/) offers students unique outdoor trips and educational clinics. Rent outdoor equipment from the Outdoor Adventures Equipment Rental Center or climb to new heights on the indoor climbing wall and bouldering cave. Students can challenge themselves individually or build a community with customized programs at our Challenge Course (https://wellrec.dasa.ncsu.edu/outdoor-adventures/challenge-course/) located in Schenck Memorial Forest.

Our Student Employment (https://wellrec.dasa.ncsu.edu/about-us-2/student-employment/) program supports more than 700 students employed annually through Wellness and Recreation. Students enhance their development by learning transferable skills that will prepare them for future careers.

Wellness and Recreation Center and Carmichael Gym

The Wellness and Recreation Center and Carmichael Gym (https://wellrec.dasa.ncsu.edu/facilities/rec-sports-master-plan/carmichael-addition/) is a 400,000-square-foot facility designed to help students achieve their personal wellness, recreation and fitness goals.

Features include:

- Strength and Conditioning Centers (50,000-square-foot)
- Six Fitness/Activity rooms
- Dedicated Mind-Body studio
- Teaching kitchen
- 11 Indoor Basketball/Multipurpose courts
- 25-yard pool and dive well
- 50-meter pool
- Indoor climbing wall and bouldering cave
- Indoor track
- 11 racquetball courts
- One squash court
- Personal training suite
- Men's and women's locker rooms
- Single occupant locker rooms
- Steam room
- Sauna
- Equipment Checkout
- Day-use lockers
- Social lounges

Wellness and Recreation manages numerous outdoor facilities that promote healthy, active living.

- Miller Outdoor Recreation Field
- Method Road Recreation Complex
- 12 outdoor tennis courts
- Four outdoor basketball courts
- FitGround outdoor functional training area
- Centennial Campus Recreation Fields
- Centennial Campus Disc Golf Course

Wolfpack One Card

The Wolfpack One Card is the official ID card for NC State students, faculty, staff and affiliates. The One Card allows NC State students to:

- Access meal plans
- Enter their residence hall or other buildings with restricted access
- Work out at the gym
- Check out books at the library
- Create and access their AllCampus account to make purchases at participating on-campus locations. All Campus funds are also used for Wolfprint (campus air printers). Wolfprint provides quick and easy printing at a variety of buildings across campus.

Incoming students receive their card during summer orientation. New graduate students will not receive ID cards during the New Graduate Student Orientation, and should visit the One Card office in Talley Student Union to obtain an ID card.

Students are encouraged to store their card in a safe and convenient location as they will use it often during the course of a day. Don't hole punch it or tumble it in a dryer to extend the life of the card. Replacement cards are $20.

To report a lost or stolen card, students should call or visit the Wolfpack One Card office or go online (http://onecard.ncsu.edu/). The office is located on the main level of Talley Student Union. Students can also stop by to ask questions about the many features of the ID card during regular business hours: Monday - Friday from 8 a.m. - 6 p.m.

For more information, call us at 919.515.3090 or visit the Wolfpack One Card website (https://onecard.ncsu.edu/).

Graduate

Graduate instruction was first offered at North Carolina State University in 1893, and the first doctoral degree was conferred in 1926. In the ensuing years, the Graduate School has grown steadily and now provides instruction and facilities for advanced study and research in the fields of agriculture and life sciences, design, education, engineering, natural resources, humanities and social sciences, management, physical and mathematical sciences, textiles and veterinary medicine.

The Graduate School is currently composed of more than 2,400 graduate faculty members. Educated at major universities throughout the world and established both in advanced teaching and research, these scholars guide the University's more than 7,000 master's and doctoral students from all areas of the U.S. and many other countries. The faculty and students have available exceptional facilities, including libraries, laboratories, modern equipment and special research areas.

Additionally, a cooperative agreement exists among the Graduate Schools of the University of North Carolina at Chapel Hill, the University of North Carolina at Greensboro, Duke University, and North Carolina State University which increases the educational and research possibilities associated with each institution.

The Graduate Catalog contains Graduate School requirements and pertinent information for individual graduate programs, a current list of graduate faculty, and a selection of other resources for new students. The Catalog is informational only and is subject to change. Official policies and procedures are in the Graduate Handbook (p. 924) and on the NC State Policies, Rules, and Regulations (https://policies.ncsu.edu/) web site.

Agricultural and Extension Education

Our graduate programs offer flexibility and enable graduates to pursue diverse career options. Prepare for a career teaching agricultural education to middle or high school students, or become an Extension agent helping farmers and families succeed in their communities. Pursue other rewarding positions such as agricultural museum curators, environmental educators, agricultural missionaries, agricultural public relations representatives, or congressional officers.

The following graduate programs in Agricultural and Extension Education are available:

- Graduate Certificate in Agricultural and Extension Education (requires 15 hours)
- Master of Science in Agricultural and Extension Education (requires 36 hours including a thesis)
- Master of Agricultural and Extension Education (requires 30 hours; can be taken as an on-campus degree or a 100% internet-based degree program)
- Sixth-Year Certificate in Agricultural Education
- Doctor of Education in Agricultural and Extension Education (requires 72 hours)

Admission Requirements

- A minimum undergraduate GPA of 3.0 for Masters and Certificate applicants; a minimum graduate GPA of 3.5 for Doctoral applicants
- Three letters of recommendation
- A statement of purpose: Prospective graduate students will draft a statement of purpose for graduate work. If the student intends to complete a thesis or dissertation, the statement should also indicate the nature of potential research work, including possible topics or questions, and minimally two professors from the Agricultural and Human Science department whose research areas potentially align with those possible research topics. Prospective students should plan to meet with faculty prior to submitting their applications to discuss

the research with those professors and include those ideas in the statement.

- Relevant experience – for doctoral applicants
  - 1 year required experience, 3 years recommended
    - Relevant experience in extension, teaching, industry, leadership, or other closely related field

Master's Degree Requirements

The Department offers an M.S. degree, which requires a thesis for which the student receives six hours of credit, and a Master of Agricultural and Extension Education (M.R.) as a non-thesis track. The M.S. degree requires a total of 36 credit hours, whereas the M.R. degree requires 30 credit hours. The student's advisory committee will meet with the student to determine the appropriate courses for their Plan of Work. M.S. students have the option of adding a minor which requires a minimum of 9 credit hours.

Graduate Certificate Requirements

The Department also offers a graduate certificate in agricultural and extension education. This certificate program involves completion of 15 credit hours divided into two focuses: Agricultural Education and Extension Education.

Sixth-Year Certificate

The Department offers an array of courses that are recognized by the NC Department of Public Instruction as comprising a Sixth-Year Certificate. Students are required to complete 24 hours of advanced graduate work past the Master's degree. Contact the Director of Graduate Programs for details.

Doctoral Degree Requirements

A Doctor of Education (Ed.D.) degree in Agricultural and Extension Education is offered. A minimum of 72 hours past the Bachelor's degree is required. More hours may be required based upon the past degrees and experiences of the candidate. The student's graduate committee will determine the specific courses needed. At least six hours of statistics is required. Twelve hours of credit is earned for writing the dissertation (AEE 895). The student's advisory committee will meet with the student to determine the appropriate courses for their Plan of Work.

Student Financial Support

A limited number of research and/or teaching assistantships are available on a competitive basis. Applications for open positions are due in January for the following academic year. Other financial aid is available from the Office of Financial Aid and on a competitive basis from the Graduate School.

Instructional Methodology		**3**	
AEE 523	Adult Education in Agriculture		
or AEE 535	Teaching Agriculture in Secondary Schools		
Elective Courses [1]		**9**	
Elective Courses are determined in conjunction with the academic committee to meet the 36 total hours			
Thesis Course		**6**	
AEE 695	Master's Thesis Research		
Total Hours		**36**	

[1] These can be in AEE or in disciplines such as Animal Science, Crop Science, Horticulture, Entomology, Forestry, and Youth Development and Family Life Education, among others. Although it is not required, students can also declare a minor. Students will need to take 9-12 hours in a specialty and work with a professor from that area.

Agricultural and Extension Education (Certificate)

The Department of Agricultural and Extension Education offers a Graduate Certificate in Agricultural and Extension Education. The program focuses on developing knowledge and skills needed to be effective teachers of agriculture in the public schools and community colleges or to work as an educator with the Cooperative Extension Service or in other non-formal educational settings such as public gardens, nature centers and in international development.

Admissions

Students apply online by visiting the Graduate School's website and completing an online application. Students currently in a graduate degree program should contact the program director for information regarding adding the certificate program to an existing degree program.

Requirements

The certificate program involves completion of 15 credit hours and the preparation of a professional portfolio. The career goals of the student will determine which sequence of courses to take.

Plan Requirements

The Graduate Certificate in Agricultural and Extension Education is divided into two focuses: Agricultural Education and Extension Education.

Certificates earned will be distributed as: "Graduate Certificate in Agricultural Education and Extension Education" without focus area specifications.

Code	Title	Hours	Counts towards
Select a Focus Area below, and select at least 5 courses within the corresponding list:		**15**	
Agricultural Education focus			
AEE 500	Agricultural Education, Schools and Society		
AEE 501	Foundations Of Agricultural and Extension Education		
AEE 503	Youth Program Management		
AEE 522	Occupational Experience in Agriculture		
AEE 524	Coordinating the High School Agricultural Education Program		
AEE 529	Curriculum Development in Agricultural and Extension Education		
AEE 535	Teaching Agriculture in Secondary Schools		
AEE 641	Practicum In Agricultural and Extension Education		
AEE 735	Effective Teaching in Agriculture and Life Sciences		
Extension Education focus			
AEE 501	Foundations Of Agricultural and Extension Education		
AEE 521	Program Planning in Agricultural and Extension Education		
AEE 523	Adult Education in Agriculture		
AEE 533	Leadership and Management of Volunteers in Agricultural and Extension Education		

AEE 560	Organizational Behavior and Administrative Leadership in Agricultural & Human Science	
AEE 577	Evaluation in Agricultural and Extension Education	
AEE 705	International Agricultural Development	
AEE 641	Practicum In Agricultural and Extension Education	
Total Hours		**15**

Animal Science

Animal science offers an opportunity for training in a diversity of basic sciences and the integration of such knowledge into the framework of a living system. Students can major in animal science or co-major in animal science and one of the following disciplines: biochemistry, genomics, genetics, microbiology, nutrition, physiology or statistics. Students can also concentrate in management and production areas.

Admission Requirements

Factors considered for admission include: grade point average, scores on the GRE, undergraduate courses, experiences, statement of interest, and letters of recommendation. In addition, a member of the Animal Science Graduate Faculty must be willing to serve as the applicant's advisor for the M.S. program.

Master of Science

A minimum of 30 credit hours, including 18 hours of graduate level course work in the degree program, is required. Students also complete and defend a thesis based on their research. The minor is optional. If a student selects a minor, the advisory committee must include a member from the minor field.

Master of Animal Science

The non-thesis Master of Animal Science (MR) degree (Option B) requires a minimum of 36 credit hours, 19 credits of core courses and 17 credits of elective courses. The MR degree program is also offered through distance education.

Student Financial Support

A limited number of research and teaching assistantships are available for students in the M.S. degree program through the department and are awarded on a competitive basis. Students are also supported by research grant funds awarded to faculty members. The total support package includes health insurance, tuition, and a stipend. Students applying for assistantships should apply by January 31 for fall admission.

Other Relevant Information

To provide an opportunity for students to develop their teaching skills, graduate students in a program that includes a thesis are required to assist in the departmental teaching program regardless of source of financial support. All graduate students in the Department of Animal Science who are mentored by departmental graduate faculty members are required to teach a minimum of one semester during their M.S. program.

Additional Requirements

- No more than two (2) credit hours of a seminar to be included in the 36 credit hour total
- A minimum of one full academic year or its equivalent in residence as a graduate student at the university
- The non-thesis Master of Animal Science degree requires a minimum of 36 credit hours, of which a minimum of 9 credits are in Animal Science courses at the 500 or above level
- Non-thesis programs may include no more than three (3) hours of independent student study credits of special topics project (ANS 610) in the minimum 36-credit program
- Research credit is not permitted in non-thesis programs, except upon approval by an associate dean of the Graduate School in cases where the student was initially enrolled in a thesis program but later transferred to a non-thesis program
- 400-level ANS courses are not permitted in a graduate plan of work
- No more than six (6) hours of 400-level courses from outside departments may be counted toward the 36-credit hour requirement
- Non-Thesis Masters Examination (ANS 690) credits may not be used to satisfy the 36-credit hour requirement
- Non-Thesis Masters Continuous Registration (ANS 688 and ANS 689) credits may NOT be sure to satisfy the 36-credit hour requirement
- No more than three (3) credit hours of Masters supervised teaching (ANS 685) may be included in the minimum 36-credit hour program
- A graduate mentor (advisor) is required
- Mentor certification of a graduate plan of work and program completion
- Meet with the graduate mentor at last once per semester
- Complete the annual graduate student progress report
- Committee not required, oral examination not required
- The director of graduate programs (https://cals.ncsu.edu/animal-science/people/joan/) and the Graduate School (https://grad.ncsu.edu/) must approve the graduate plan of work

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Animal Science (MS)

Master of Science Degree Requirements

Code	Title	Hours	Counts towards
Required Courses		**4**	
ANS 601	Animal Science Seminar		
ANS 610	Topical Problems in Animal Science (Safety and Ethics in Animal Science)		
ANS 685	Master's Supervised Teaching		
ANS 695	Master's Thesis Research		
or ANS 693	Master's Supervised Research		
Graduate Elective Courses		**18**	
Select any 500 - 700 level courses determined in conjunction with the advisory committee.			
Elective Courses [1]		**8**	
Select any "Elective Courses" determined in conjunction with the advisory committee.			
Total Hours		**30**	

[1] Students may choose 8 credits in combination of: ANS 693 Master's Supervised Research/ANS 695 Master's Thesis Research, Seminar, ANS 685 Master's Supervised Teaching, and other elective graded courses.

Additional Requirements & Restrictions

- A minimum of one (1) full academic year or its equivalent in residence as a graduate student at the university
- A minimum of 30 semester hours of graduate work in the degree program, unless the specific program requires more hours, including a minimum of 18 hours of 500-700 level coursework
- No more than six (6) hours of 400-level courses can be counted toward the minimum 30-hour requirement, and they may not come from the major field

- No more than three (3) credit hours of Masters Supervised Teaching (ANS 685) can be included in the minimum 30-credit program
- No more than six hours of Thesis Research (ANS 693 Master's Supervised Research/ANS 695 Master's Thesis Research) in the minimum 30-hour program
- No more than two (2) credit hours of seminar (S/U graded) may be included in the minimum 30-credit hour program
- Masters Thesis Preparation (ANS 699) credits may not be used to satisfy the 30-credit hour requirement
- A thesis
- A departmental defense seminar
- A comprehensive oral examination

Accelerated Bachelor's/Master's Degree Requirements

Animal Science (Minor)

Plan Requirements

Courses are determined in conjunction with an animal science faculty member on the graduate committee.

Code	Title	Hours	Counts towards
Required Courses		**10**	
Select minimum of nine credit hours of animal science courses at the 500-level or 700-level [1, 2]			
One (1) credit hour of animal science seminar			
Total Hours		**10**	

1. Students must maintain a minimum 3.0 GPA for 500-level and 700-level courses.
2. Students may take additional animal science courses at the 600-level or 800-level.

Animal Science and Poultry Science

A doctoral degree in Animal Science and Poultry Science with a concentration in either Animal Science or Poultry Science is offered. Specific course requirements are flexible and each student's program is developed in consultation with their Ph.D. advisory committee. The minor is optional but if a minor is included, external faculty representation is required on the advisory committee.

There are two curriculum codes for the Animal Science and Poultry Science doctoral degree program. If a student is interested in a program concentration in Animal Science, the appropriate curriculum code for the admissions application is ANA. If the student is interested in a program concentration in Poultry Science, the appropriate curriculum code for the admissions application is ANP. **If the appropriate curriculum code is not selected, it will delay the department's receipt of the applicant’s information from the Graduate School.**

Note: The Master's programs in Animal Science or Poultry Science are administered independently by each department.

Animal Science Concentration (ANA)

Admission Requirements

Factors considered for admission include: grade point average, scores on the GRE, undergraduate and graduate courses, experiences, statement of interest, and letters of recommendation. In addition, a member of the Department of Animal Science Graduate Faculty must be willing to serve as the applicant's advisor.

Student Financial Support

The Department of Animal Science offers a limited number of research and teaching assistantships that are awarded on a competitive basis. Students are also supported by research grant funds awarded to faculty members. The total support package includes health insurance, tuition, and a stipend. Students applying for these assistantships should apply by January 31 for fall admission.

Other Relevant Information

To provide an opportunity for students to develop their teaching skills, graduate students are required to assist in the departmental teaching program regardless of source of financial support. All graduate students in the Department of Animal Science who are mentored by departmental graduate faculty members are required to teach a minimum of one semester during their Ph.D. program.

Click on Graduate Courses - Animal Science (p. 97) for current course information.

Poultry Science Concentration (ANP)

Click on Graduate Courses - Poultry Science (p. 99) for current course information.

Animal Science & Poultry Science (PhD): Animal Science Concentration

Degree Requirements

Code	Title	Hours	Counts towards
Required Courses		**3**	
ANS 601	Animal Science Seminar		
ANS 810	Topical Problems in Animal Science		
ANS 885	Doctoral Supervised Teaching		
Graduate Electives / Research Credits / Teaching Credits		**69**	
"Graduate Electives / Research Credits / Teaching Credits" are determined in conjunction with the advisory committee to meet the 72 total hours			
Total Hours		**72**	

Additional Requirements and Restrictions

- At least two residence credit points secured in continuous semesters' residence as a graduate student at the university
- Doctoral degrees at NC State require a minimum of 72 graduate credit hours beyond the Bachelor's degree
- For a student who already holds a master's degree upon initial admission to the doctoral program of study, a maximum of 18 hours of relevant graduate credit from the master's degree may be applied toward this minimum upon the recommendation of the student's graduate advisory committee. Therefore, the minimum credit-hour requirement, in this case, is 54 credit hours
- If a student completes a master's degree at NC State and chooses to continue on for a doctoral degree thereby maintaining a continuous registration status, up to 36 credit hours taken while in masters status may be used to meet minimum requirements for the doctoral degree
- Students cannot take 400-level courses or lower as part of the credit-hour requirement for the doctoral program of study
- Students cannot transfer courses into a Ph.D. program (including those taken in PBS status)
- A successful preliminary comprehensive examination which includes both written and oral components
- A dissertation
- Departmental defense seminar
- A final comprehensive oral examination

Biochemistry

Biochemistry as a discipline serves a pivotal role in advancing research in the Life Sciences. Through a combination of coursework, seminars, and original research, you will complete a Graduate degree and acquire the skills needed to become an independent research scientist. Our major research training areas emphasize:

- Structural and Analytical Biochemistry
- Molecular and Systems Biology
- Metabolism and Disease

Degrees earned will be distributed as: "Master of Biochemistry", "Master of Science", and "Doctor of Philosophy" without focus area specifications.

Brief Overview of Programs

- The accelerated Bachelor's / Master's Degree (ABM) is a 5-year dual degree program intended for undergraduate majors who wish to continue beyond the B.S. degree and receive additional training at the graduate level. Interested students who meet the minimum University GPA requirement are typically accepted into the program at the end of their junior year of undergraduate study. The Master's degree obtained after 5 years may be a Master's of Biochemistry (non-thesis) or a Master's of Science (thesis research) depending upon the selection made by the student.
- The Master's of Biochemistry is a non-thesis alternative to the Master's of Science degree in Biochemistry for students wishing to emphasize course work rather than thesis research. The Master's of Biochemistry is a terminal graduate degree and is not appropriate for students intending to pursue a Ph.D. program.
- The Master's of Science is a research degree that prepares students in Biochemistry for Ph.D. studies or provides training for technical employment.
- The objective of the Ph.D. program is to prepare students for careers as researchers primarily in academic, industrial, or government research environments.

Admission Requirements

Students entering the graduate program in biochemistry should have a bachelor's degree in biochemistry, chemistry or a related physical or biological science, including undergraduate courses in organic chemistry, calculus, physics and physical chemistry, as well as biochemistry/ molecular biology. Applicants with a strong record of undergraduate research activity or with practical experience in a professional scientific setting are particularly encouraged to apply. Reporting of GRE scores is strongly encouraged.

ABM Specific Admission Requirements

- a minimum of seventy-five credit hours in their undergraduate programs, including credits earned from advanced placement, but prior to the completion of their bachelor's.
- a minimum overall undergraduate grade point average (GPA) of 3.500 at NC State at the time of admission into the ABM program.
- (This GPA must be maintained throughout their undergraduate program to remain in the ABM program.)
- receive a grade of B or better in the double counted graduate-level courses (500 or 700 level) while maintaining a 3.50 GPA.
- (Courses with a grade of B- or below cannot be double counted between the two degrees.)
- maintain a 3.50 or better Biochemistry Major GPA.
- be positioned to complete the BS degree requirements by the end of their fourth year, and formally apply for admission to the Graduate School.
- one letter of recommendation from the proposed faculty mentor, indicating the qualifications of the student and willingness to serve as the Master's advisor.

Degrees

- Biochemistry (MR) (p. 103)
- Biochemistry (MS) (p. 104)
- Biochemistry (PhD) (p. 106)
- Biochemistry (Minor) (p. 107)

Biochemistry (MS)

Master of Science Degree Requirements

Code	Title	Hours	Counts towards
Core Courses		**13**	
BCH 701	Macromolecular Structure		
BCH 703	Macromolecular Synthesis and Regulation		
BCH 705	Molecular Biology Of the Cell		

BCH 801	Seminar In Biochemistry [1]	
Elective Courses		**11**
See "Elective Courses" listed below [2, 3]		
Thesis		**6**
BCH 695	Master's Thesis Research [2]	
Total Hours		**30**

1. Every semester for 2 years, 4 credit hours total; 1/semester
2. Students may choose other courses approved in conjunction with the academic committee
3. Credit hours flexible to meet 30 total hours

Elective Courses

Code	Title	Hours	Counts towards
Select at least three courses below:		**9**	
BCH 552	Experimental Biochemistry	3	
BCH 553	Biochemistry of Gene Expression	3	
BCH 555	Proteins and Molecular Mechanisms	3	
BCH 560	Molecular Biology for Teachers	3	
BCH 571	Regulation of Metabolism	3	
BCH 590	Special Topics in Biochemistry	1-6	
BCH 701	Macromolecular Structure	3	
BCH 703	Macromolecular Synthesis and Regulation	3	
BCH 705	Molecular Biology Of the Cell	3	
BCH 710	Biological Scanning Electron Microscopy	2	
BCH 751	Biophysical Chemistry	3	
BCH 760	Protein Crystallography and Macromolecular Modeling	3	
BCH 761	Advanced Molecular Biology Of the Cell	3	
BCH 763	Biochemistry Of Hormone Action	3	
BCH 768	Nucleic Acids: Structure and Function	3	
BCH 770	Enzyme Kinetics and Mechanisms	3	

Additional Requirements

- Successful completion of the M.S. degree requires a minimum of 30 credit hours.
- At least 18 credit hours of letter-graded courses (“A,” “B,” “C”, etc.) must be included in the program.

Accelerated Bachelor's/Master's Degree Requirements

In addition to the standard University and Biochemistry requirements for a B.S. in Biochemistry, students must complete 30 credit hours at the graduate level for the Master’s degree component. This is accomplished as outlined below:

Code	Title	Hours	Counts towards
Undergraduate Core Courses		**6**	
BCH 552	Experimental Biochemistry		
BCH 553	Biochemistry of Gene Expression		
or BCH 555	Proteins and Molecular Mechanisms		
400-level Courses with a 500-level Counterpart [1, 2]		**6**	
See "400/500 Level Courses" listed below			
Graduate Core Courses [1, 2]		**12**	
BCH 701	Macromolecular Structure		
BCH 703	Macromolecular Synthesis and Regulation		
BCH 705	Molecular Biology Of the Cell		
Select one additional course:			
GN 701	Molecular Genetics		
BCH/GN 761	Advanced Molecular Biology Of the Cell		
MB 714	Microbial Metabolic Regulation		
MB 718	Introductory Virology		
PO 757	Comparative Immunology		
Research/Scholarship/Education Course		**6**	

BCH 685	Master's Supervised Teaching	
BCH 693	Master's Supervised Research	
BCH 695	Master's Thesis Research	
Total Hours		**30**

1 Indicates courses double counted for both Bachelor's and Master's degree

2 Students may choose other courses approved in conjunction with the academic committee

400/500-Level Courses

Code	Title	Hours	Counts towards
Select two courses listed below:		**6**	
CH 463/563	Molecular Origins of Life		
BIO 488/588	Neurobiology		
GN 441/541	Human and Biomedical Genetics

Biological and Agricultural Engineering

Admission Requirements

A baccalaureate in biological or agricultural engineering or other engineering discipline (GPA > 2.8) is the preferred prerequisite for admission. Those with a strong academic background in the physical or biological sciences may also be admitted with a requirement for undergraduate work in math, physics, chemistry and basic engineering courses. In the case of applicants with Master's degrees, a Master's GPA of at least 3.2 is required for admission to the PhD. Exceptions to the overall undergraduate GPA requirements may be made for cases where performance in the major or during the last two years was at or above the 3.00 level.

Applicants who do not have an engineering background, but have earned a degree in an appropriate science discipline may be admitted to the Systems Analysis Concentration in the MS or PhD program without completing the engineering prerequisites.

GRE scores are required for all applicants. A faculty review committee will admit the best-qualified applicants.

Degrees

- Biological and Agricultural Engineering (MR) (p. 109)
- Biological and Agricultural Engineering (MS) (p. 110)
- Biological and Agricultural Engineering (MS): Systems Analysis Concentration (p. 111)
- Biological and Agricultural Engineering (PhD) (p. 113)
- Biological and Agricultural Engineering (PhD): Systems Analysis Concentration (p. 114)

Biology

Areas of study include: cell biology, physiology, ecology, evolution, behavior, and fisheries, wildlife and conservation biology. Specializations within these areas include developmental biology, neurobiology, genomics, invertebrate biology, animal reproduction, biorhythms, behavioral ecology, community ecology, population ecology, conservation biology, fisheries ecology, wildlife field studies, aquaculture and others.

Degrees earned will be distributed as: "Master of Biology", "Master of Science", and "Doctor of Philosophy" without area of study, specialization, or track specifications.

Application Deadlines

To guarantee consideration for funding, applications should be complete by the following dates: for Fall Semester admission both U.S. and international applicants should have their application materials completed by January 15; for Spring Semester the deadline is October 15 for U.S. applicants and international applicants. Please note that it typically requires four to six weeks from the date of your request until transcripts and letters of recommendation reach us. Applications received after the dates listed above will still be considered until the Graduate School deadlines (June 25 and November 25 for U.S. applicants, March 1 and July 15 for international applicants); however, opportunities for funding may be limited (note that the Biology Graduate Program does not accept M.S. and Ph.D. students without support).

Admission Requirements

It is important that you identify a potential faculty adviser, as this will greatly increase your chance of admission to NCSU’s Biology Graduate Program. Although all applications are made available to faculty advisers for review, a graduate student will not be admitted to the Biology Program for graduate studies unless the prospective student has identified a faculty adviser. Once a faculty adviser has requested review of a prospective student, the application is then evaluated with regard to the applicant’s potential for success in graduate school. The admissions process involves consideration of the ability of our program to accommodate students.

Successful applicants usually have a Bachelor’s degree in Biological Sciences or a related field with at least an overall B average and a minimum number of courses in biology (and related fields) and supporting fields (6 in biology, 4 in chemistry, 2 in physics, and 2 in mathematics). In addition to the applicant's grades and coursework, we consider relevant experience (e.g., through internships, research experiences, volunteer or paid work, and publications), statement of interest, and letters of recommendation. GRE scores are not required. We expect applicants for the MS degree to have at least a 3.0 GPA, and applicants for the PhD degree to have at least a 3.2 GPA. Research experience is highly recommended.

Master's Degree Requirements

AEC 502 and PHI 816 (or equivalent) are required. No more than six hours of temporary courses (AEC 624, BIO 624, INB 624, BIO 824) or two hours of departmental seminar can be included in the 30-hour requirement for the M.S. Six hours of research credits (INB 695) resulting in a thesis are required. A minor (usually 9-10 hours) is optional. Other requirements may be imposed by the advisor.

Doctoral Degree Requirements

AEC 502 and PHI 816 (or equivalent) are required. A student's advisory committee recommends appropriate courses which will provide a strong foundation in the student's area of interest. A minimum of 10 hours of research (INB 895) leading to a dissertation is required. A minor (usually

9-10 hours) is optional. Other requirements may be imposed by the advisor.

Student Financial Support

Graduate teaching and research assistantships are available to well-qualified M.R., M.S. and Ph.D. students.

Other Relevant Information

Excellent research facilities, equipment and computers are available. Off-campus research is conducted at the Pamlico Aquaculture Field Laboratory, research and extension centers in Eastern and Western North Carolina, the Center for Marine Science and Technology in Morehead City, and at facilities of state and federal agencies and private organizations. Field work can be conducted at nearby natural areas and laboratory work at various state and federal laboratories associated with the department, nationally, and internationally.

Students may choose from the degree tracks below to complete coursework within a focus area.

Degrees earned will be distributed as: "Master of Science" without track specifications.

Code	Title	Hours	Counts towards
Core Courses		**3**	
AEC 502	Introduction to Biological Research		
PHI 816	Introduction to Research Ethics (or equivalent ethics course) [1]		
Additional Courses		**27**	
Additional Courses are determined in conjunction with the academic committee to meet the 30 total hours			
Total Hours		**30**	

[1] Students may take PHI 816 Introduction to Research Ethics or equivalent to meet this requirement.

Aquaculture and Aquatic Sciences Track

Code	Title	Hours	Counts towards
Quantitative Requirement		**3**	
Select one of the following courses:			
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
BIT 815	Advanced Special Topics [2]		

AEC 510	Machine Learning Approaches in Biological Sciences	
ST 505	Applied Nonparametric Statistics	
BMA 567	Modeling of Biological Systems	
Restricted Elective		**3**
Select one of the following courses:		
AEC/ENT 509	Ecology and Conservation of Freshwater Invertebrates	
AEC 515	Fish Physiology	
AEC 519	Freshwater Ecology	
AEC 624	Advanced Fisheries Science	
AEC 592	Special Topics in Applied Ecology (Management of Small Impoundments)	
AEC 592	Special Topics in Applied Ecology (Aquatic Plant Ecology)	
AEC 592	Special Topics in Applied Ecology (Advanced Biology of Fishes)	
AEC 624	Advanced Fisheries Science	
AEC 710	Sampling Animal Populations	
AEC 726	Quantitative Fisheries Management	
BMA 772	Biomathematics II	
FW 511	Human Dimensions of Wildlife and Fisheries	
MEA 549	Principles of Biological Oceanography	
NR 595	Special Topics in Natural Resources	
TOX 715	Environmental Toxicology	
ZO 524		
Total Hours		**6**

[2] BIT 815 or any Bioinformatics course determined in conjunction with the academic committee.

Molecular, Cellular and Developmental Biology Track

Code	Title	Hours	Counts towards
Quantitative Biology Requirement		**3**	
Select one of the following courses:			
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
BIT 815	Advanced Special Topics [2]		
AEC 510	Machine Learning Approaches in Biological Sciences		
Biotechnology Requirement		**4**	
Select one course from the following:			
BIO 592	Topical Problems (Capstone Course in Molecular, Cellular, and Developmental Biology)		
GN 701	Molecular Genetics		
GN 702	Cellular and Developmental Genetics		
GN 750	Developmental Genetics		
Restricted Electives		**3**	
Select one of the following courses determined in conjunction with the academic committee based on thesis research			
BIT 510	Core Technologies in Molecular and Cellular Biology		
BIT 595	Special Topics		
Total Hours		**10**	

[2] BIT 815 or any Bioinformatics course determined in conjunction with the academic committee.

Ecology and Evolution Track

Code	Title	Hours	Counts towards
Quantitative Requirement		**3**	
Select one of the following courses:			
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
AEC 510	Machine Learning Approaches in Biological Sciences		
ST 505	Applied Nonparametric Statistics		
BMA 567	Modeling of Biological Systems		
Ecology or Evolution Requirement		**3**	
Select one of the following courses from "Ecology" or "Evolution"			
Ecology			
AEC 503	Foundations of Ecology		
AEC 519	Freshwater Ecology		
AEC 718	Community Ecology		
AEC 761	Conservation and Climate Science		
BIO/BMA 560	Population Ecology		
MEA 752	Marine Plankton Ecology		
Evolution			
BIO 570	Evolutionary Ecology		
ENT 591	Special Topics In Entomology		
GN 703	Population and Quantitative Genetics		
GN 713	Quantitative Genetics and Breeding		
GN 740	Evolutionary Genetics		
GN 757	Quantitative Genetics Theory and Methods		
PB 503	Systematic Botany		
PB 545	Paleobotany		
Total Hours		**6**	

Code	Title	Hours	Counts towards
Quantitative Requirement		**3**	
Select one of the following courses:			
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
AEC 510	Machine Learning Approaches in Biological Sciences		
ST 505	Applied Nonparametric Statistics		
BMA 567	Modeling of Biological Systems		
Ecology Requirement		**3**	
AEC 503	Foundations of Ecology		
AEC 519	Freshwater Ecology		
AEC 718	Community Ecology		
AEC 761	Conservation and Climate Science		
BIO/BMA 560	Population Ecology		
MEA 752	Marine Plankton Ecology		
Evolution Requirement		**3**	
BIO 570	Evolutionary Ecology		
ENT 591	Special Topics In Entomology		
GN 703	Population and Quantitative Genetics		
GN 713	Quantitative Genetics and Breeding		
GN 740	Evolutionary Genetics		
GN 757	Quantitative Genetics Theory and Methods		
PB 503	Systematic Botany		
PB 545	Paleobotany		
Total Hours		**9**	

Code	Title	Hours	Counts towards
Restricted Electives		**4**	
BIO 520	Skeletal Biological Laboratory Methods in Human Identification & Cold Cases		
BIO 811	Forensic Sciences Seminar		
Quantitative Requirements		**9**	
ST 511	Statistical Methods For Researchers I		
ST 512	Statistical Methods For Researchers II		
ST 540	Applied Bayesian Analysis		
Total Hours		**13**	

Other Requirements

- Every student is required to complete training logs. Many of the modules can be completed while taking the BIO 520 course. Please contact the Forensic Sciences Concentration Chair for additional information.
- Students are also required to start the Training Case Record Form after their first year and/or after taking BIO 520, whichever comes first. Please contact the Forensic Sciences Concentration Chair for additional information.
- Forensic Anthropology Society of Europe Level II Certification is strongly recommended but not required- costs associated with this exam are the student's responsibility.

Integrative Biology Track

This concentration is open to MS and PhD students who do not fit academically within the other Biology concentrations, or who integrate across multiple concentrations. Coursework is determined in consultation with your PhD mentor and committee and is approved by the DGP.

Biology (PhD)

Degree Requirements

Students may choose from the degree tracks below to complete coursework within a focus area.

Degrees earned will be distributed as: "Doctor of Philosophy in Biology" without track specifications.

Code	Title	Hours	Counts towards
Core Courses		**3**	
AEC 502	Introduction to Biological Research		
PHI 816	Introduction to Research Ethics		
Additional Courses		**69**	
"Additional Courses" are determined in conjunction with the academic committee to meet the 72 total hours			
Total Hours		**72**	

Aquaculture and Aquatic Sciences Track

Code	Title	Hours	Counts towards
Quantitative Requirement		**3**	
Select one of the following courses:			
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
BIT 815	Advanced Special Topics [2]		
AEC 510	Machine Learning Approaches in Biological Sciences		
ST 505	Applied Nonparametric Statistics		
BMA 567	Modeling of Biological Systems		
Restricted Elective		**6**	
Select two of the following courses:			
AEC/ENT 509	Ecology and Conservation of Freshwater Invertebrates		
AEC 515	Fish Physiology		
AEC 519	Freshwater Ecology		
AEC 624	Advanced Fisheries Science		
AEC 592	Special Topics in Applied Ecology (Management of Small Impoundments)		
AEC 592	Special Topics in Applied Ecology (Aquatic Plant Ecology)		
AEC 592	Special Topics in Applied Ecology (Advanced Biology of Fishes)		
AEC 624	Advanced Fisheries Science		
AEC 710	Sampling Animal Populations		
AEC 726	Quantitative Fisheries Management		
BMA 772	Biomathematics II		
FW 511	Human Dimensions of Wildlife and Fisheries		
MEA 549	Principles of Biological Oceanography		
NR 595	Special Topics in Natural Resources		
TOX 715	Environmental Toxicology		
ZO 524			
Total Hours		**9**	

[2] BIT 815 or any Bioinformatics course determined in conjunction with the academic committee.

Molecular, Cellular and Developmental Biology Track

Code	Title	Hours	Counts towards
Quantitative Biology Requirement		**3**	
Select one of the following courses:			
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
BIT 815	Advanced Special Topics [2]		

AEC 510	Machine Learning Approaches in Biological Sciences	
Restricted Elective		**3**
Select one course from the following:		
BIO 592	Topical Problems (Capstone Course in Molecular, Cellular, and Developmental Biology)	
GN 701	Molecular Genetics	
GN 702	Cellular and Developmental Genetics	
GN 750	Developmental Genetics	
Biotechnology Requirement		**4**
Select one course below determined in conjunction with the academic committee based on thesis research		
BIT 510	Core Technologies in Molecular and Cellular Biology	
BIT 595	Special Topics	
Total Hours		**10**

[2] BIT 815 or any Bioinformatics course determined in conjunction with the academic committee.

Ecology and Evolution Track

Code	Title	Hours	Counts towards
Quantitative Requirement		**3**	
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
AEC 510	Machine Learning Approaches in Biological Sciences		
ST 505	Applied Nonparametric Statistics		
BMA 567	Modeling of Biological Systems		
Ecology Requirement		**3**	
AEC 503	Foundations of Ecology		
AEC 519	Freshwater Ecology		
AEC 718	Community Ecology		
AEC 761	Conservation and Climate Science		
BIO/BMA 560	Population Ecology		
MEA 752	Marine Plankton Ecology		
Evolution Requirement		**3**	
BIO 570	Evolutionary Ecology		
ENT 591	Special Topics In Entomology		
GN 703	Population and Quantitative Genetics		
GN 713	Quantitative Genetics and Breeding		
GN 740	Evolutionary Genetics		
GN 757	Quantitative Genetics Theory and Methods		
PB 503	Systematic Botany		
PB 545	Paleobotany		
Total Hours		**9**	

Forensic Sciences Track

Code	Title	Hours	Counts towards
Restricted Electives		**4**	
BIO 520	Skeletal Biological Laboratory Methods in Human Identification & Cold Cases		
BIO 811	Forensic Sciences Seminar		
Quantitative Requirements		**9**	
ST 511	Statistical Methods For Researchers I		
ST 512	Statistical Methods For Researchers II		
ST 540	Applied Bayesian Analysis		
Total Hours		**13**	

OTHER REQUIREMENTS

- Every student is required to complete training logs. Many of the modules can be completed while taking the BIO 520 course. Please contact the Forensic Sciences Concentration Chair for additional information.
- Students are also required to start the Training Case Record Form after their first year and/or after taking BIO 520, whichever comes first. Please contact the Forensic Sciences Concentration Chair for additional information.
- Forensic Anthropology Society of Europe Level II Certification is strongly recommended but not required- costs associated with this exam are the student's responsibility.

Physiology and Behavior Track

Code	Title	Hours	Counts towards
Quantitative Biology Requirement		**3**	
ST 511	Statistical Methods For Researchers I		
or ST 512	Statistical Methods For Researchers II		
BIT 815	Advanced Special Topics [1]		
AEC 510	Machine Learning Approaches in Biological Sciences		
ST 505	Applied Nonparametric Statistics		
BMA 567	Modeling of Biological Systems		
Restricted Electives		**6**	
Select two of the following courses:			
AEC/ENT 509	Ecology and Conservation of Freshwater Invertebrates		
AEC 515	Fish Physiology		
AEC 519	Freshwater Ecology		
AEC 624	Advanced Fisheries Science		
AEC 592	Special Topics in Applied Ecology (Management of Small Impoundments)

Crop Science

The Graduate Program in Crop Science revolves around our vision of being a world leader in Crop Science education and in the generation and application of knowledge required for economically and environmentally sustainable crop systems and products, as well as in developing land management strategies that protect the quality of North Carolina's soil, water and air resources.

Our mission within the Graduate program is to develop future leaders in Crop Science with a focus on improving crop plants and products, devising effective and sustainable crop production systems and effective and sustainable management techniques in both agricultural and urban settings; and dissemination of crop science knowledge for the benefit of users and producers of food, feed, turf, biofuels and fiber in North Carolina, the nation and the world.

The specific program areas in which Graduate education focuses are crop management and physiology, plant breeding and genetics, weed science, alternative crops and pesticide fate and impact on the environment.

Entrance requirements for the Graduate program in Crop Science follow the NC State Graduate School guidelines. A minimum of a 3.0 GPA at the Baccalaureate or master's level is required, although exceptions may be made for master's applicants with a very strong GPA in science classes and/or their final two years, or with substantial post-baccalaureate work experience. Students accepted will typically have a bachelor's or master's degree in crop science, or closely related fields, with strong preparation in the biological and physical sciences. The Graduate Record Examination is also required but there is no minimum score on any of the sections.

Financial assistance in the form of a Graduate Assistantship is available for most of the students accepted into the program. However, funding is limited and positions are highly competitive within a major professor's program area. It is recommended that applicants review the department's faculty listing and communicate directly with faculty members who have similar interest to theirs.

Degrees

- Crop Science (MR) (p. 130)
- Crop Science (MS) (p. 131)
- Crop Science (PhD) (p. 133)
- Crop Science (Minor) (p. 134)

Entomology

Course offerings or research facilities are available in the following areas: agricultural entomology, apiculture, aquatic entomology, behavior, biological control, chemical ecology, forest entomology, genetic pest management, host-plant resistance, insect ecology, insect transmission of plant pathogens, insect microbe interactions, medical and veterinary entomology, pest management, physiology, molecular biology, population genetics, insect symbiosis, urban ecology, urban entomology, systematics and toxicology.

Admission Requirements

Training in biology and appropriate courses in chemistry, biochemistry, mathematics and physics, is preferred. A "B" average (3.0 GPA) is required in biology courses and an overall 3.0 GPA during the last two years of the undergraduate program.

Master's Degree Requirements

A minimum of 30 credits are required for graduation 9 credits of letter grade entomology courses plus 2 credits of entomology student seminars are also required. The student’s advisory committee will meet with the student to identify an appropriate plan of course work.

Doctoral Degree Requirements

A minimum of 72 credits (18 may be transferred from a Master's degree) are required for graduation. For Ph.D. students 9 credits of letter grade entomology courses plus 3 credits of entomology student seminars are required. The student’s advisory committee will meet with the student to identify an appropriate plan of course work.

Student Financial Support

Graduate assistantships and other forms of aid are available to students as described in the Fellowships and Graduate Assistantships section of the Graduate Catalog.

Other Relevant Information

Full admission is permitted only after acceptable applicants have secured an advisor and appropriate financial support. All students are expected to begin their research as soon as possible.

Genetic Engineering & Society (Minor)

The interdisciplinary minor in Genetic Engineering and Society (GES) examines the technological, societal and ecological issues surrounding the development and potential use of genetically engineered organisms. Participants in the minor will learn the basic concepts and principles underlying genetic engineering and the methods used for evaluating the technology's social, cultural and environmental dimensions. The graduate minor is available to students pursuing either an MS or a Ph.D. degree.

Requirements

In order to complete the minor, coursework must be taken in relevant areas of natural sciences and the humanities and social sciences. 9 credit hours from a list of approved courses (see below) are required, 6 of which must be two of the core GES courses. The remaining 3 credit hours must be fulfilled by a course from the list of approved courses that are outside the students' home discipline. A grade of B or higher must be achieved in each course counted towards the minor. In addition, a student must have a GES faculty member on his or her committee, and this faculty member should be from a discipline other than the student's major, ensuring that there is representation from both humanities/social science and natural science.

The choice of courses must be consistent with the interdisciplinary outlook of this minor, namely that students will learn the basic concepts and principles underlying genetic engineering and the methods used for evaluating the technology's social, cultural and environmental dimensions. The minor representative will be responsible for ensuring that the courses taken are appropriate and balance the student's major. Students in the biological sciences will be encouraged to take hands-on courses, such as those offered by the BIT program.

Plan Requirements

Code	Title	Hours	Counts towards
Core Courses		**9**	
GES/COM/HI 508	Emerging Technologies and Society		

GES 591	Special Topics in Genetic Engineering and Society (Governance, Systems & Modeling)	
GES 591	Special Topics in Genetic Engineering and Society (Genetic Engineering for Sustainable Crop Development)	
Select one additional course below:		**3**
GES 506	Principles of Genetic Pest Management	
ANT 550	Culture, Ecology, and Sustainable Living	
BIT 410/510	Manipulation of Recombinant DNA	
COM 536	Seminar in Environmental Communication	
ECG 540	Economic Development	
ENG 515	Rhetoric Of Science and Technology	
FW 411/511	Human Dimensions of Wildlife and Fisheries	
GN 735	Functional Genomics	
HI 540	American Environmental History	
HI 581	History of the Life Sciences	
HI 585	History of American Technology	
NR 571	Current Issues in Natural Resource Policy	
REL 571	Darwinism and Christianity	
PA 598/798	Special Topics in Public Administration (Science and Technology Policy)	
PHI 475/575	Ethical Theory	
PSY 757	Innovation and Technology	
ST 590	Special Topics (Bioinformatics I/ II)	
Total Hours		**12**

Food Science

The department's professional activities include teaching, research, and extension functions. The program provides an educational, research, and informational center in food science for North Carolina and the nation. The department also houses two research centers, the Southeast Dairy Foods Research Center and the Center for Advanced Processing and Packaging Studies. Course offerings and research opportunities are available in the following areas: chemistry-biochemistry, engineering, microbiology, nutrition and processing technology. The strategic directions of the faculty and staff are in the areas of: food safety and foodborne disease prevention; food manufacturing and entrepreneurship; education innovation and effectiveness; and, foods for health and well-being.

Degrees earned will be distributed as: "Master of Food Science", "Master of Science", and "Doctor of Philosophy" without research area specifications.

Admissions Requirements

To be admitted, a student should be a graduate of an accredited program in food science or the equivalent. Graduates of other majors can be admitted but will have additional course requirements. The best qualified applicants will be accepted up to the number of spaces that are available for new students. We only recommend admission to the M.S. or Ph.D. degree if a member of our research faculty is willing to advise the student’s research. Applications from qualified candidates will be reviewed by faculty seeking research students; conversely applicants may contact faculty whose research specialty is of interest to inquire about available positions. Admission to the Master of Food Science will be based on the qualifications of the applicants.

Master's Degree Requirements

A Master's program must include courses from at least two of the following categories: chemistry-biochemistry, engineering, microbiology, nutrition and processing technology. The M. S. in Food Science requires 30 credit hours of course work and research. The Master of Food Science requires 36 credit hours of course work, including an independent project and professional skills.

Doctoral Degree Requirements

A doctoral program must include courses from at least three of the categories listed above (or equivalent courses at another university). Total course credits will vary depending on the needs of the student and the requirements of the Graduate School. All doctoral students are required to pass a departmentally administered written preliminary exam, designed to evaluate a Ph.D. student's general knowledge and comprehension of food science.

Student Financial Support

Graduate assistantships and other forms of student aid available to students in this program are described elsewhere in the Graduate Catalog. Admission does not guarantee availability of financial support.

Other Relevant Information

Students are encouraged to make personal contact with individual faculty whose research program is of interest to them.

Core Courses		**12**	
Select six hours of coursework listed under "Core Courses" approved in conjunction with the academic committee			
Select an additional six hours of coursework listed under either "Core Courses" or "Elective Courses" approved in conjunction with the academic committee			
Supervised Teaching Course		**1**	
FS 685	Master's Supervised Teaching		
Seminar Course		**1**	
FS 780	Seminar In Food Science		
Additional Courses		**10**	
"Additional Courses" will be determined in conjunction with the academic committee [1]			
Research Course		**6**	
FS 695	Master's Thesis Research [2]		
Total Hours		**30**	

1 "Additional Courses" may include FS courses, optional minor courses, and/or interdisciplinary courses.

2 Up to 6 credits of FS 695 Master's Thesis Research may be used toward the 30 total hours.

Core Courses

Code	Title	Hours	Counts towards
Select courses from at least two categories below:			
Chemistry-Biochemistry			
FS 567	Sensory Analysis of Foods	3	
Engineering			
FS 741	Thermal Processing of Foods	3	
Microbiology			
FS 540	Food Safety and Public Health	3	
FS 725	Fermentation Microbiology	3	
Nutrition			
FS 501	Advanced Nutrition and Metabolism	3	
FS 555	Exercise Nutrition	3	
NTR 701	Protein and Amino Acid Metabolism	3	
NTR 706	Vitamin Metabolism	3	
NTR 708	Energy Metabolism	3	
NTR 775	Mineral Metabolism	3	
Processing Technology			
FS 516	Quality Control in Food and Bioprocessing	3	
FS 522	Food Packaging	3	
FS 530	Post-Harvest Food Safety	3	
FS 535	Food Safety Management Systems	3	
FS 751	Food Ingredient Technology In Product Development	4	

Elective Courses

Code	Title	Hours	Counts towards
FS 520	Pre-Harvest Food Safety	3	
FS 526	Upstream Biomanufacturing Laboratory	2	
FS 550	Food Industry Study Tour	2	
FS 554	Lactation, Milk, and Nutrition	3	

FS 557	Nutraceuticals and Functional Foods	3
FS 562	Postharvest Physiology	3
FS 580	Professional Development and Ethics in Food Safety	1
Additional courses may be selected in conjunction with the academic committee

Horticultural Science

The Department offers graduate programs leading to the Master of Horticultural Science (non-thesis), Master of Science (thesis) and Doctor of Philosophy (thesis) degrees. Completion of the respective requirements normally takes 2 to 2 ½ years for the Masters and 3 to 3 ½ years for the Doctor of Philosophy. Studies may be oriented to floriculture, ornamental and landscape horticulture, pomology (fruit crops) or olericulture (vegetables). A variety of areas for study and research are available: plant physiology, breeding and genetics, herbicide physiology, nutrition, propagation, plant molecular biology and biotechnology, genomics, growth regulators, postharvest physiology, sustainable and organic agriculture, fruits, vegetables, floriculture, woody ornamentals, and landscape horticulture.

Facilities for graduate studies include 40,500 square feet of greenhouse space; the University Phytotron (available for controlled environmental studies on horticultural crops); 19 well-equipped laboratories; 14 controlled temperature storage rooms, an extensive collection of plant materials, both living and preserved; and a variety of climates and soils from coast to mountains in North Carolina on eighteen outlying research stations.

Admission to The Graduate School and the Department is competitive. Admission is usually limited to students with a grade point average of 3.00 or higher. Horticultural Science candidates should have completed course work in physics, mathematics (preferably calculus and statistics), chemistry, biochemistry, soils, plant pathology, genetics, plant physiology, entomology, genomics/bioformatics, botany/plant biology, cellular biology, molecular biology and several courses in horticulture. Landscape Horticulture candidates should have a complete landscape design background. An applicant deficient in course work may be admitted on a provisional basis until the deficiency is made up. Applicants must provide the basic Graduate Record Examination (GRE) scores, three letters of reference, an unofficial transcript for each previous degree, a personal statement and resume/CV. Applicants from other countries must also furnish evidence of proficiency in English (TOEFL, IELTS or Duolingo). TOELF or IELTS test date must be no older than two years (24 months) prior to the beginning of the requested entry term.

Financial assistance in the form of a Graduate Assistantship may be available for students accepted into the program. However, funding is limited and positions are highly competitive within a major professor's program area. You should contact the faculty within the department that are working in your area of interest to inquire about assistantship availability. Students must have a confirmed advisor for admission to the program.

Degrees

- Horticultural Science (MR) (p. 157)
- Horticultural Science (MS) (p. 158)
- Horticultural Science (PhD) (p. 159)
- Horticultural Science (Certificate) (p. 163)

Horticultural Science (Certificate)

The Graduate Certificate is a non-degree, designed to increase personal knowledge and skills for current or future employment in the horticulture industry. Earning the Graduate Certificate requires completing a minimum of 15 credit hours (usually equaling 5 courses) of coursework. Courses may be taken either on-line or face-to-face.

Participants must hold a bachelor's degree to enroll in this program. Graduate Certificate applicants should have majored in horticulture, crop science, plant science, or agricultural education with a concentration in plant science, or another closely related degree. Students may begin taking courses for the graduate certificate in Summer, Fall, or Spring. All graduate certificate course work must be completed within four years of enrollment.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
Select a minimum of three courses from the following:			
HS 502	Plant Disease: Methods & Diagnosis		
HS 516	Planting Design		
HS 520	Green Infrastructure		
HS 521	Temperate-Zone Tree Fruits: Physiology and Culture		
HS 523	Viticulture

Additional Courses [1]		**6**	

Additional Courses are determined in conjunction with the academic committee to meet the 15 total hours	
Total Hours	**15**

* Courses taught online

1 Students must take courses that meet the following requirements: must be at 500-level or higher, letter-graded, passed with a B or better

2 Students can select a maximum of 6 hours from the following subjects: ARE, AEE, BAE, CS, ENT, FS, PP, SCC; courses must be at 400-level or higher.

Microbial Biotechnology

The Master of Microbial Biotechnology Program (MMB) is recognized by the Council of Graduate Schools as a Professional Science Master's degree (PSM). The MMB degree combines training in Microbiology, Business and Biotechnology. This degree is specifically designed to prepare students for positions in the biotechnology, biopharmaceutical and agrobusiness industries. The program includes courses that involve semester-long interactions with local biotechnology companies as well as foundational courses in microbiology, business management and molecular biology.

Admission Requirements

Applications are invited from individuals holding B.S. or M.S. degrees in the physical and life sciences. Applications should be received before May 1 to be considered for Fall semester admission. The Graduate Record Exam (GRE) is required and should be taken sufficiently early so that scores can be submitted and evaluated along with the application. Other requirements include all relevant transcripts, three letters of recommendation and a personal statement that describes the applicant's career goals as well as why they are pursuing the MMB degree.

Master's Degree Requirements

The Master of Microbial Biotechnology (MMB) degree requires 40 credit hours, including four semesters involvement in an Industry Case Studies course, as well as a summer industry internship. This program also can be combined with a Master of Business Administration (MBA) offered through the College of Management.

Student Financial Support

A limited number of full-time participants in the Master of Microbial Biotechnology program may be eligible for Teaching Assistantships. The number of TA positions available varies every semester and there are no guaranteed positions. Students in the MMB program should assume that they will self-fund their education.

Microbial Biotechnology (MR)

Master of Microbial Biotechnology Degree Requirements

Code	Title	Hours	Counts towards
Microbiology / Science Core Courses		**6**	
Select two of the following courses:			
MB 555	Microbial Biotechnology		
MB 714	Microbial Metabolic Regulation (Recommended)		
MB 751	Immunology		
MB 758	Microbial Genetics & Genomics		
MB 590	Topical Problems (Environmental Microbiology and Biotechnology)		
PB 580	Introduction to Plant Biotechnology		
Science Elective		**3**	
Select a course from "Science Electives" listed below			
Internship Course		**3**	
MB 620	Special Problems		
Industrial Case Studies		**12**	
MB 585	Industry Case Studies in Microbial Biotechnology		
MB 590	Topical Problems		

Biotechnology (BIT) / Biomanufacturing (BEC) Core Courses		**4**
BEC 525 & BEC 545	Molecular Biology for Biomanufacturing and Cell Line Development for Biomanufacturing [1]	
or BIT 510	Core Technologies in Molecular and Cellular Biology	
BIT or BEC Electives		**4**
Select two courses from "Biotechnology (BIT) and Biomanufacturing (BEC) Electives" listed below		
Business Core Course		**3**
MBA 585	Current Topics in BioSciences Management	
MBA Electives		**6**
Select two courses from "Master of Business Administration (MBA) Electives" listed below		
Total Hours		**41**

[1] Incoming students may be able to opt out of this requirement if they can provide sufficient evidence that indicates basic experience and understanding of technologies including recombinant DNA procedures, gene expression, isolation and identification of nucleic acids and proteins. Evidence may include a letter from current or former supervisors and/or professors attesting that the applicant possesses at least basic understanding and experience. Applicants with doctoral training in a related area may opt out of BIT 510 OR BEC 540, with MMB approval.

MBA 590	Special Topics In Business Management	1-6	

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Microbiology

Microbiology is an integral part of the life science and biotechnology disciplines across the North Carolina State University campus. The Microbiology Graduate Program involves research and education in laboratories and departments that form inter-disciplinary teams to address critical, global challenges for science and society. The MGP (http://harvest.cals.ncsu.edu/microbiology/) offers courses of study and research leading to the Ph.D., M.S., Master of Microbiology (M.M.) and Master of Microbial Biotechnology (M.M.B.) degrees.

The research-based degrees (M.S and Ph.D.) offered by the program are designed to prepare students for careers in academic, industrial or research institute settings. Course offerings for Microbiology research students focus on microbial genetics and physiology, bioprocessing and fermentation, biotechnology, virology, immunology and host-pathogen interactions. Research throughout the program is diverse, emphasizing most areas where microbes, viruses and systems biology have relevance to basic science and biotechnology. Research opportunities for students involve many areas of specialization including biofuels, bioremediation, environmental microbiology, antibiotic resistance, extremophiles, bacterial pathogens, probiotics, developmental epigenetics, bacteriophages, inflammation modulation and viral pathogenesis; the list is long and broad. Financial support for study towards Ph.D. and M.S. degrees is limited, but can be available in the form of teaching/research assistantships and competitive fellowships.

The non-research-based Masters of Microbial Biotechnology (MMB) is a Professional Science Masters degree that combines concentrations in Microbiology, Business and Biotechnology. This degree is specifically designed to prepare students for positions in the biotechnology, biopharmaceutical and agrobusiness industries. The program includes courses that involve semester-long interactions with local biotechnology companies as well as foundational courses in microbiology, business management and molecular biology. The M.M. degree is a rigorous non-thesis degree that is designed for students who want a higher degree in microbiology but do not want to conduct research or are unable to commit to the time demands of a research degree. Many students in the M.M. program either work for local employers or are interested in subsequent applications to professional schools. Financial support is extremely limited for either M.M.B or M. M. students.

Admission Requirements

Applications are invited from individuals holding B.S. or M.S. degrees in the physical and life sciences. Applications should be received in the department before December 1st to be considered for Fall semester admission. Requirements include all relevant transcripts, three letters of recommendation and a personal statement that describes the applicant's academic and career goals as well as their area of interest.

Master's Degree Requirements

The Master of Science (M.S.) requires 30 credit hours, of which 18 must be graded, a written thesis and at least one semester of laboratory teaching experience. The Master of Microbial Biotechnology (M.M.B.; http://harvest.cals.ncsu.edu/master-of-microbial-biotechnology/mmb/) degree requires 40 credit hours and four semesters involvement in an Industry Case Studies course, as well as a summer industry internship. This program also can be combined with a Master of Business Administration (M.B.A.) offered through the College of Management. The Master of Microbiology (M.M.) requires 30 credit hours, of which 18 must be graded, but has no requirement for a written thesis or laboratory instruction).

Doctoral Degree Requirements

The Ph.D. program (http://harvest.cals.ncsu.edu/microbiology/) is designed for individuals desiring to pursue careers in research and/or teaching. Prospective Ph.D. and M.S. students should become aware of departmental research programs and faculty so that an area of specialization is indicated in the application materials (personal statement). A faculty dissertation advisor and laboratory research program are confirmed at admission or by the end of the first semester. In conjunction with the advisor, the student establishes a four-member faculty advisory committee to guide the research and academic program. At least one semester of teaching assistance / experience is required. A preliminary examination is held soon after completing the second year

of study, and the final examination includes a seminar presented by the candidate that is open to the university community.

Student Financial Support

All Ph.D. and M.S. applications to the Microbiology Graduate Program are considered for available assistantships. For highly qualified students, supplemental funds are frequently available. There is limited funding available for international students given the structure of the NC State University Graduate Student Support Plan.

Microbiology Courses

The field of Microbiology includes several specialized disciplines such as bacterial physiology, microbial genomics and metagenomics, microbiomes, environmental microbiology, immunology, host-pathogen interactions, molecular genetics and virology. At NC State, M.S. students can take courses that represent, and focus on, the various disciplines of

Microbiology. Example courses, fitting into two microbiology “tracks” or focus areas are:

Code	Title	Hours	Counts towards
Environmental / Industrial Track			
MB 520	Fundamentals of Microbial Cell Biotransformations	2	
MB 532	Soil Microbiology	4	
MB 555	Microbial Biotechnology	3	
MB 590	Topical Problems	1-3	
MB 505	Food Microbiology	3	
MB 714	Microbial Metabolic Regulation	3	
MB 725	Fermentation Microbiology	3	
MB 758	Microbial Genetics & Genomics	3	
Host-Pathogen Interactions Track			
MB 535	Bacterial Pathogenesis	3	
MB 718	Introductory Virology	3	
MB 751	Immunology	3	
BCH 553	Biochemistry of Gene Expression	3	
BCH 705	Molecular Biology Of the Cell	3	
BMA 771/772	Biomathematics I	3	
CBS 712	Reproductive Management and Disease in Domestic Animals	1	
ENT 582	Medical and Veterinary Entomology	3	
PP 707	Plant Microbe Interactions	3	
ST 511/512	Statistical Methods For Researchers I	3	

Elective Courses

Selection of elective courses is done by the student, in consultation with and approval by the advisory committee.

Code	Title	Hours	Counts towards
Below are examples of elective courses available:			
BAE 525	Industrial Microbiology and Bioprocessing	3	
BCH 553	Biochemistry of Gene Expression	3	
BCH 701	Macromolecular Structure	3	
BCH 703	Macromolecular Synthesis and Regulation	3	
BCH 705	Molecular Biology Of the Cell	3	
BIT 510	Core Technologies in Molecular and Cellular Biology	4	
BIT 595	Special Topics	1-6	
GN 701	Molecular Genetics	3	
GN 735	Functional Genomics	3	
GN 850	Professionalism and Ethics	1	
MB/PP 730	Fungal Genetics and Physiology	3	
MB 610	Special Topics Microbiology	1-6	
MB 620	Special Problems	1-6	
MB 601/801	Seminar	1	
MB 690/890	Master's Examination	1-9	
MB 695/895	Master's Thesis Research	1-9	
MB/IMM 783	Advanced Immunology	3	
MB 790	Topical Problems (Practical Digital Imaging)	1-3	

Additional Requirements

- 18 credits must be graded
- All graduate students must maintain a minimum cumulative grade point average of 3.0
- The program is completed upon submission of a thesis and completion of all credit requirements

Nutrition

The Interdepartmental Nutrition Program consists of faculty from multiple departments, including: Animal Science; Agricultural and Human Sciences; Food, Bioprocessing, and Nutrition Sciences; Horticultural Science; Molecular and Structural Biochemistry; and the Prestage Department of Poultry Science. Students reside and conduct research in one of these departments under the direction of an appropriate advisor. Research in the nutrition program may be conducted with a variety of species and at various levels, such as molecular, cell, whole animal, and human communities. Research programs are primarily in the area of nutritional biochemistry, experimental animal nutrition (e.g. horses, ruminants, swine, poultry, rodents, and other species), or community nutrition and public health. Graduates find employment in academia, government, industry, and non-profit organizations, or continue their education in medical and allied health fields.

Admission Requirement

To be considered for admission, a student should have a B.S. or M.S degree, preferably in a science-related area. Additionally, applicants must have course work in biology and organic chemistry to be considered for admission. Students for M.S. or Ph.D. should contact and be recommended by a prospective major faculty advisor in their area of interest prior to final admission. Applicants to the Master of Nutrition should indicate their preferences for: on-campus or Distance Education delivery; an emphasis in animal, poultry, or food science (human) nutrition; core science or Professional Science Masters (PSM); and within the PSM, Feed Science or Human Nutrition.

Master's Degree Requirements

A minimum of 30 course credit hours, including a thesis is required for M.S., 36 for Master of Nutrition. The Master of Nutrition has options for all course delivery by Distance Education, with emphases in Feed Science or Human Nutrition, and an option for course work that qualifies as a Professional Science Master's degree.

Doctoral Degree Requirements

A minimum of 72 credit hours, including a dissertation for Ph.D. Students must complete core courses, including: Energy Metabolism, Protein and Amino Acid Metabolism, Vitamin Metabolism, and Mineral Metabolism.

Student Financial Support

Assistantships and fellowships may be available for M.S. and Ph.D. students on a competitive basis from the departments in which the advisor resides. Admission does not guarantee availability of financial support.

Degrees

- Nutrition (MR) (p. 178)
- Nutrition (MS) (p. 181)
- Nutrition (PhD) (p. 183)
- Nutrition (Minor) (p. 186)

Nutrition (MR)

Master's Degree Requirements

Code	Title	Hours	Counts towards
Required Courses		**7**	
BCH 451	Principles of Biochemistry		
or NTR 501	Advanced Nutrition and Metabolism		
BCH 453/553	Biochemistry of Gene Expression		
or BCH 571	Regulation of Metabolism		
NTR 601	Master's Seminar		
Master's Core Courses		**8**	
Select a minimum of eight credits from "Core Courses" listed below			
Practicum Course		**4-6**	
Select one of the following courses:			
FM 594	Advanced Feed Mill Practicum		
NTR 624	Topical Problems In Nutrition		
NTR 693	Master's Supervised Research		
Elective Courses		**15-17**	
"Elective Courses" that will be applied to reach 36 credit hours will be determined in conjunction with the academic advisor			
Total Hours [1]		**36**	

[1] No more than 6 credit hours can be taken at the 400-level.

Core Courses

Code	Title	Hours	Counts towards
Select a minimum of three courses from the following:		**8**	
BCH 553	Biochemistry of Gene Expression	3	
BCH 571	Regulation of Metabolism	3	
NTR 500	Principles of Human Nutrition	3	
NTR 501	Advanced Nutrition and Metabolism	3	
NTR 510	Maternal and Infant Nutrition	3	
NTR 515	Comparative Nutrition	3	
NTR 521	Life Cycle Nutrition	3	
NTR 525	Feed Manufacturing Technology	3	
NTR 550	Applied Ruminant Nutrition	3	
NTR 554	Lactation, Milk, and Nutrition	3	
NTR 555	Exercise Nutrition	3	
NTR 557	Nutraceuticals and Functional Foods	3	
NTR 561	Equine Nutrition	3	
NTR 565	Advanced Canine and Feline Nutrition	3	
NTR 594	Special Topics in Nutrition	1-6	
NTR 701	Protein and Amino Acid Metabolism	3	
NTR 706	Vitamin Metabolism	3	
NTR 708	Energy Metabolism	3	
NTR 764	Advances in Gastrointestinal Pathophysiology	3	
NTR 775	Mineral Metabolism	3	

NTR 785	Digestion and Metabolism in Ruminants	3
NTR 790	Advanced Feed Formulation	3
NTR 794	Special Topics in Nutrition	1-6

Professional Science Master's Degree Requirements

Code	Title	Hours	Counts towards
Required Courses		**6**	
BCH 451	Principles of Biochemistry		
or NTR 501	Advanced Nutrition and Metabolism		
BCH 453/553	Biochemistry of Gene Expression		
or BCH 571	Regulation of Metabolism		
Core Courses		**8**	
Select a minimum of eight credits from "Core Courses" listed below

NTR 790	Advanced Feed Formulation	3	
NTR 794	Special Topics in Nutrition	1-6	

PSM Courses

Code	Title	Hours	Counts towards
Select at least three of the following courses: [1]		**9**	
FS 535	Food Safety Management Systems	3	
FS 553	Food Laws and Regulations	3	

COM 521	Communication and Globalization	3
COM 525	Group/Team Communication	3
COM 527	Seminar in Organizational Conflict Management	3
COM 530	Interpersonal Communication in Science and Technology Organizations	3
BUS 501	Strategic Management Foundations	3
BUS 590	Special Topics In Business Management	1-6
MBA 541	Supply Management	3
MBA 542	Supply Chain Logistics	3
MBA 543	Planning and Control Systems	3
MBA 576	Technology Entrepreneurship and Commercialization I	3
MBA 577	Technology Entrepreneurship and Commercializatior II	3

[1] The "PSM Courses" list is not an exclusive list.
Students can take any number of courses that relate to business, communication, or regulatory matters determined in conjunction with the academic committee.

Physiology

The Physiology Graduate Program is an interdisciplinary and interdepartmental program comprising faculty drawn from across the University. An advanced degree in Physiology is highly valued by the scientific community and can lead to careers in research and teaching in academia, industry and government laboratories, public policy and consulting. Research is carried out using a variety of model organisms, laboratory and companion and agriculturally important species.

Admission Requirements

Students entering the graduate program in Physiology should have a Bachelor's degree in a related biological or physical science. Undergraduate courses should include Physiology, Biochemistry, Organic Chemistry, Calculus, and Physics. Each application package will be screened by the Admissions Committee. Factors considered for admission include: grade point average (3.0 is required for regular admission), GRE scores, undergraduate courses, letters of recommendation, and the willingness of a member of the Graduate Physiology faculty to serve as the applicant's advisor.

Master's Degree Requirements

All Master's students are required to complete PHY 503, PHY 504, BCH 553, and a one-credit hour course in research ethics. Master of Science Degree: For a Master of Science degree a minimum of 30 semester hours of graduate work in the degree program is required including a minimum of 20 hours of course work at the 500-800 level. On average, the M.S. degree takes two to three years to complete. Master of Physiology Degree: The non-thesis Master's degree (Master of Physiology) requires a total of 36 credits. The median time to degree completion is 1.75 years or less.

Student Financial Support

Financial assistance for qualified students in the form of research assistantships, fellowships and traineeships is available through

participating departments only and not through the Physiology program for thesis-based students only.

Other Relevant Information

Graduate students enrolled as Physiology majors are housed in the department of their major professor and may participate in departmental activities.

Recommended Courses Normally Included in Programs of Study for the M.S Degree and the Non-Thesis MOP Program

Other recommended/supporting courses are available through many departments, e.g. Animal Science, Biochemistry, Biomathematics, Biotechnology, Cell Biology, Comparative Biomedical Sciences, Entomology, Genetics, Immunology, Microbiology, Nutrition, Pharmacology, Poultry Science, Psychology, Statistics, and Toxicology, and may be included for consideration in the plan of work.

Plant Biology

Course offerings in diverse areas of plant biology, ranging from the molecular to the ecosystem scale. Research opportunities and facilities are available in the following areas: cell biology, cellular imaging, cellulose biology, cellular signaling, developmental biology, plant hormones, epigenetics, systems biology, genetic engineering, transgene regulation and silencing, stress biology, plant gravitropism, phytochemistry, metabolic engineering, plant-microbe interactions, aquatic ecology, toxic dinoflagellates, endangered species, community ecology, physiological ecology, tropical ecology, evolutionary ecology, population ecology, paleobotany, plant systematics, evolution of flowering plants, and ethnobotany.

Admission Requirements

Students entering the graduate program in plant biology should have a bachelor's degree in plant biology or a related undergraduate program that includes biological, physical and mathematical science training including undergraduate courses in organic chemistry, calculus and genetics, as well as biology. All applications are screened by a departmental committee, and the best qualified applicants will be accepted until all available spaces are filled.

Master's and Doctoral Degree Requirements

The M.S. requires a total of 30 credit hours (20 of the 30 credit hours must be from 500-, 600-, 700/800-level courses; 18 credit hours must be letter graded); the Master of Plant Biology requires a total of 36 credit hours. The Ph.D. requires a total of 72 credit hours. Two core courses (Functional Plant Biology and either Plant Functional Ecology or Systematic Botany) are required. Other requirements include: a Plant Biology Colloquium, Plant Anatomy, an additional plant biology course, a graduate statistics course, a graduate ethics course, a thesis (for the M.S., but not the Master of Plant Biology) or dissertation (for the PhD), written and oral preliminary examinations (Ph.D.), oral thesis or dissertation defense, and a one (M.S.) or two semester (Ph.D.) teaching experience. Students must maintain a "B" average in all course work.

Other Relevant Information

Graduate research and teaching assistantships and tuition remission information are available from the department. New students supported by departmental research/teaching assistantships may elect to rotate through three laboratories during their first semester. At the end of the semester, they will choose a laboratory for their research activities consistent with their interests and available research projects. Cooperative research in more than one laboratory is encouraged. Graduate students are expected to attend and participate in the seminar program every semester they are in residence. The department participates in training grants in biotechnology.

PB 513	Plant Anatomy [1]		
PB 570	Plant Functional Ecology [1]		
or PB 503	Systematic Botany		
PB 824	Topical Problems (Plant Biology Colloquium)		
ST 511	Statistical Methods For Researchers I [1]		
PHI 816	Introduction to Research Ethics (or equivalent ethics course)		
Plant Biology Course		**3**	
Select one PB prefix course [2]		3	
PB 685	Master's Supervised Teaching		

PB 693	Master's Supervised Research	
Additional Courses		**14**
Additional Courses are determined in conjunction with the academic committee to meet the 36 total hours		
Total Hours		**36**

1 The course must be taken for a letter grade.

2 "Plant Biology Course" is determined in conjunction with the academic committee

Additional Requirements

M.R. degree students complete the required courses and other courses for 36 total credit hours (at the 500 level or above); 18 hours must be letter-grade. They must also complete a project (and register for 6 hours of PB 693 related to the project) and pass a comprehensive oral exam on general plant biology.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Plant Pathology

Plant pathology researches and extends knowledge to solve plant disease problems by focusing on plant-pathogen interactions at the genomic, cellular, organismal, and ecological levels. Approaches include disease management, epidemiology, molecular biology and host-parasite interactions. Focus areas are bacteriology, bioinfomatics, functional genomics, mycology, nematology, virology, soil-borne pathogens and mechanisms of pathogenesis, and host resistance.

Admission Requirements

The general application procedures of the Graduate School noted at the beginning of this section are followed. The Plant Pathology Graduate Program does NOT require the GRE. A detailed statement of applicant interests and goals in plant pathology is very helpful for the admissions committee.

Master's Degree Requirements

There is a core curriculum of a minimum of 12 credit hours that includes PP 501, PP 502, PP 506, PP 707, and PP 601. The core should be supplemented with a minimum of 18 credit hours in courses at the 500 or higher level, which support the focus of the study. Students serve as teaching assistants for one course.

Doctoral Degree Requirements

Students entering the Ph.D. degree program are expected to take the core curriculum outlined for the Master's degree or have had the equivalent at another institution. Additionally, Ph.D. students must include a departmental-approved ethics course, two credits PP 801, and at least two other 700-level Plant Pathology courses. Ph.D. students serve as teaching assistants for two courses.

Student Financial Support

A limited number of half-time assistantships are available on a competitive basis. Benefits include in-state tuition, out-of-state tuition and health insurance as covered under the Graduate School's Graduate Student Support Plan. Applicants are considered for assistantship support at time of application. Special supplements to assistantships are available on a competitive basis for outstanding students. Also, many faculty programs have research grant-funded or training grant-funded assistantships. Contact individual faculty regarding availability of research assistantships.

Other Relevant Information

Fully equipped and staffed laboratories for research are available in addition to greenhouse facilities and environmental growth chambers in the phytotron. Special facilities for experimental work on diseases under field conditions are available at 16 University and NC Department of Agriculture and Consumer Services-related locations throughout the state. Genomics facilities, microcomputers, library, mycological herbarium, digital imaging/graphics equipment programs, and an interdepartmental electron microscopy center are additional features available for the department.

Poultry Science

Course offerings and research programs are comprehensive in the areas of physiology, nutrition, microbiology, molecular biology, biotechnology, food science, immunology, genetics, pathology, and toxicology. The demand for skilled workers with advanced training in poultry science is far greater than the supply. Opportunities exist for graduates in research and teaching in universities, government, and private industry.

Admission Requirements

Factors considered for admission include grade point average, strength of prior academic program, experience, letters of recommendation, and special skills or interests. GRE scores are recommended, but not required.

Master's Degree Requirements

While there are no specific course requirements for the master's degree in Poultry Science, most programs complete 36 credit hours.

Doctoral Degree Requirements

See Animal Science and Poultry Science.

Student Financial Support

Both research and teaching assistantships are available on a competitive basis within the department. General requirements for these assistantships are as described in the Graduate Catalog. Other financial support may be available in the form of graduate stipend supplementation, research grant support, or out-of-state tuition waivers in accordance with the University's Graduate Student Support Plan.

Other Relevant Information

The Department of Poultry Science occupies modern facilities in Scott Hall, a three-story building on the main campus adjacent to the D.H. Hill Library. The department consists of about 20 faculty, approximately 40 support staff, 25 graduate students and postdoctoral associates, and 100 undergraduate students.

Degrees

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Feed Science (Certificate)

The Graduate Certificate Program in Feed Science is designed to prepare professionals or current degree program students to work in or alongside the animal food industry. The program will provide an advanced foundation in feed science technology, quality assurance and feed formulation, and feed industry leadership. The objectives of this program are for the student to acquire an understanding of the technical aspects of modern animal food manufacturing; food and ingredient quality assurance; animal food safety; feed industry regulations; facility operations, leadership, and safety; formulation; and generally how to apply technical skills to the challenges of the global animal food industry.

Admission Requirements

Applicants must have a BS/BA degree or equivalent four year degree in order to apply to the program. Individuals interested in this certificate program must contact the coordinator of the certificate program.

Program Requirements

A minimum of 12 credit hours from the prescribed list of courses and a grade of 'C-' or better in these courses is required to receive credit for the certificate. To receive a Graduate Certificate in Feed Science, a student must have a minimum 3.0 grade point average on all certificate course work. All course work must be registered through NC State University, transfer credit from other universities is not allowed. All work must be completed in four (4) calendar years, beginning from the time the application is approved by the Director of Graduate Programs.

Plan Requirements

Code	Title	Hours	Counts towards
Core Courses		**9**	
FM/ANS/NTR/PO 525	Feed Manufacturing Technology		
FM/PO 580	Feed and Ingrdient Quality Assurance		
PO/ANS/NTR 515	Comparative Nutrition		
Elective Courses			
Select a minimum of one of the following courses:		3	
FM 460/PO 590	Feed Mill Operations and Leadership		
FM 490	Feed Science Seminar		
FM 594	Advanced Feed Mill Practicum		
FM/NTR 790	Advanced Feed Formulation		
Total Hours		**12**	

Soil Science

Soil scientists study and manage land and water resources to protect the environment and enhance agricultural productivity. Graduate education opportunities in Soil Science at NC State prepare students for careers with public and private organizations in soil, agricultural, environmental, and natural resource sciences. Our graduates find employment opportunities with private sector firms, government organizations, academia, and entrepreneurship.

You will have the opportunity to study and do research with world-class faculty in outstanding laboratory and field facilities. Graduate students may specialize in the following sub-disciplines: soil physics; soil chemistry; soil microbiology and biochemistry; soil fertility and plant nutrition; soil genesis, morphology and classification; and soil, water and land management and conservation. Students can also incorporate other disciplines into their work, presenting outstanding opportunities to focus on issues of interest.

Graduate Degrees

The Department of Crop and Soil Sciences offers three graduate degrees in Soil Science. A short description of each follows.

The ***Master of Soil Science*** (the MR degree) is a non-thesis, course-based program that is available as both a campus-based and an online, distance education program (https://go.ncsu.edu/online-soil-science-masters/). This degree is considered a terminal degree and is well suited to professionals requiring further education in soils for their careers.

The ***Master of Science in Soil Science*** (MS) is a research degree that requires the successful completion of coursework, a research problem, and the submission of a written thesis that documents the research.

The ***Doctor of Philosophy*** (Ph.D.) degree symbolizes the ability of the student to undertake original research with minimal supervision and demonstrates the student's ability to write a dissertation reporting the results of this research. Most students in the Soil Science Ph.D. complete an MS degree prior to enrolling in the Ph.D., although exceptions are sometimes made.

Admission Requirements

A minimum of a 3.0 GPA at the baccalaureate (BS) or master's (MS) level is required. However, exceptions may be made for master's applicants with a very strong GPA in science classes, an exceptional track record in their final two years, or substantial post-baccalaureate work experience. Students accepted will typically have a BS or MS degree in Soil Science, or closely related fields, with strong preparation in the biological and physical sciences. Research experience is helpful. The Graduate Record Exam (GRE) is not required for application or admission to Soil Science graduate programs. International students must demonstrate proficiency in English prior to admission. Admissions are competitive and subject to adequate funding for research assistantships. A committee of faculty members evaluates each application and admission is offered if funding is available to support a student. Master of Soil Science applicants are admitted without regard to funding; the department does not provide stipends for students in the MR program.

Degrees

- Soil Science (MR) (p. 213)
- Soil Science (MS) (p. 215)
- Soil Science (PhD) (p. 216)
- Soil Science (Minor) (p. 217)

Soil Science (MR)

Degree Requirements

Code	Title	Hours	Counts towards
Required Courses		**5-8**	
SSC 601	Seminar [1]		
SSC 620	Special Problems [2]		
Core Courses		**4-7**	
Select four of the following courses:			
SSC 511	Soil Physics		
SSC 521	Soil Chemistry		
SSC 532	Soil Microbiology		
SSC 541	Soil Fertility		
SSC 551	Soil Morphology, Genesis and Classification		
Undergraduate Courses		**6**	
400-Level undergraduate courses from outside soil science will be determined in conjunction with the academic committee			
Elective Courses		**18**	
"Elective Courses" will be determined in conjunction with the academic committee [4]			
Total Hours		**36**	

1. Students can take no more than two credits of SSC 601 Seminar total.
2. Students can take four to six credits of SSC 620 Special Problems.
3. Students may have courses waived upon proving competency in the following coursework
4. Students must take at least 18 hours of letter-graded course work – these must be NC State courses or inter-institutional courses (https://studentservices.ncsu.edu/your-classes/exchange-programs/inter-institutional-program/).

Additional Requirements

All Masters students must demonstrate competence in four of the five sub-disciplines listed below, and Doctoral students must demonstrate competency in all five.

- Soil Chemistry
- Soil Fertility and Plant Nutrition
- Soil Genesis and Classification
- Soil Microbiology and Biochemistry
- Soil Physics

The required competencies can be achieved by any combination of the following:

1. relevant course work from previous undergraduate and/or graduate degree programs;
2. prior professional experience in the major sub-discipline(s); and
3. graduate courses included in the student's Plan of Work (POW) for their current degree program.

Soil Science (PhD)

Degree Requirements

Code	Title	Hours	Counts towards
Required Courses		**3**	
SSC 801	Seminar [1]		
SSC 893	Doctoral Supervised Research [2]		
or SSC 895	Doctoral Dissertation Research		
Core Courses		**34**	
SSC 511	Soil Physics		
SSC 521	Soil Chemistry		
SSC 532	Soil Microbiology		
SSC 541	Soil Fertility		
SSC 551	Soil Morphology, Genesis and Classification		
Elective Courses		**tbd**	
"Elective Course" will be determined in conjunction with the academic committee			
Total Hours		**72**	

1. Students must take at least one credit of SSC 801 Seminar.
2. Students are required to take a minimum of two credits of SSC 893 Doctoral Supervised Research or SSC 895 Doctoral Dissertation Research.

Additional Requirements

All Doctoral students must demonstrate competence in the five soil science sub-disciplines listed below.

- Soil Chemistry
- Soil Fertility and Plant Nutrition
- Soil Genesis and Classification
- Soil Microbiology and Biochemistry
- Soil Physics

The required competencies can be achieved by any combination of the following:

1. relevant course work from previous undergraduate and/or graduate degree programs;
2. prior professional experience in the major sub-discipline(s); and
3. graduate courses included in the student's Plan of Work (POW) for their current degree program.

- Completion of at least 72 semester credit hours beyond the bachelor's degree
  - If the student has an MS degree from another institution, a maximum of 18 hours of relevant graduate credit from that degree may be applied toward this minimum, upon the recommendation of the student's Graduate Advisory Committee, and the minimum required will be 54 semester credit hours
  - If a student completes an MS degree at NC State and continues for a doctoral degree without a break in time, up to 36 relevant credit hours taken while in master's status may be used to meet minimum requirements for the doctoral degree. If there is a break in time between completing the master's (at NC State) and beginning the doctorate (at NC State), the allowance is limited to 18 hours. Either allowance may include those 400-level courses taken as an approved part of the MS degree.
- Completion of preliminary written and oral examinations must be completed within six calendar years from the date of admission
- Successful completion of an original research program
- Success completion of the final oral examination
- Completion of a non-credit exit seminar

Youth, Family, & Community Sciences

The Youth, Family & Community Sciences Program provides graduate study for current and emerging professionals in family life education, parent education, family life coaching, youth development, volunteer management, and community-based youth and family programs, or

related careers. The demand for professionals to teach, administer, and create support systems for children, youth and families is increasing through Cooperative Extension programs, government agencies and initiatives, community-based non-pro#ts, court systems, prisons, social service organizations, health care agencies/organizations, and schools.

The following distance-based graduate programs are available:

- Master of Science in Youth, Family, and Community Sciences (M.S. requires 36 total hours including a thesis)
- Master of Youth, Family, and Community Sciences (M.R. requires 30 hours and a culminating supervised professional experience)

Admission Requirements

Students apply through NC State via the normal Graduate School admissions procedures; applications are reviewed on Nov.1 and July 1. All application materials must be submitted electronically (online); mailed or faxed materials are not accepted. Only complete applications are reviewed. In addition to all Graduate School admission requirements, the Department requires three academic references, a personal statement of current/future career goals including how this program will help you reach your goals, and a 500-800 word academic writing sample that answers the following prompt: What is the role of family science in a diverse society? The Graduate School requires a 3.00 average (4.00 scale) in the undergraduate program. The most quali#ed applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum grade point average may be made for students with special backgrounds, abilities, circumstances, or interests.

Master’s Degree Requirements

The Master of Science in Youth, Family, and Community Sciences (M.S.) requires 36 hours culminating in a #nal oral examination and thesis approved by the student’s graduate committee. The Master of Youth, Family, and Community Sciences (M.R.) is a non-thesis degree that requires a total of 30 credit hours culminating in a capstone supervised professional experience. Both degree programs are built upon foundations of theory and application composed of four focus areas: (1) foundations of family life and youth development, (2) professional development and leadership, (3) research and methodological inquiry, and (4) content area concentration.

Student Financial Support

No #nancial aid/assistantships are available directly from the Department. Financial aid is available from the NC State Of#ce of Financial Aid and on a competitive basis from the NC State Graduate School. Students seeking #nancial aid should contact the NC State Financial Aid Of#ce directly.

Other Relevant Information

Distance course delivery methods include: totally asynchronous web-based classes, and synchronous Internet based classes. The M.R. and M.S. programs may be successfully completed totally via distance.

Degrees

Family Life Education and Coaching (Certificate)

The Graduate Certificate in Family Life Education and Coaching prepares students to work with parents, professionals, and families as both family life educators and family life coaches. Family Life Educators (FLE) are strengths-based professionals who provide preventative research-based education to families in organized efforts designed to impart information, skills, experiences, or resources to strengthen, improve, or enrich their family experience. Family Life Coaches (FLC) partner with clients in a thought-provoking and creative process that inspires families to maximize their potential, reach goals, and achieve healthy relationships. Required courses are designed to strengthen the student's understanding and application of the critical aspects of family life coaching and education, including a strengthened understanding of the fields of coaching psychology and family life education. The 12-credit graduate program can be completed entirely online.

Leadership and Volunteer Management (Certificate)

A Youth, Family, and Community Sciences Online Graduate Certificate in Leadership and Volunteer Management prepares students to work as leaders in community-based organizations. It prepares and strengthens future and current professionals to assume administrative positions and leadership roles within community-based youth or family development. Students gain a more comprehensive understanding of organizational leadership, as well as an applied understanding of effective management skills. The certificate is intended to enhance a student's work in organizational administration and/or volunteer management including volunteer recruitment, retention, risk management, and recognition.

Youth Development and Leadership (Certificate)

The Graduate Certificate in Youth Development and Leadership prepares future and strengthens current professionals working with community-based youth development programs. The required courses are designed to strengthen the student's understanding and application of critical aspects of community youth programs, including theories of youth development, social, emotional, cognitive, and physical development, resource development and management, volunteer development, advisory committees and boards, organizational structure, human resource management, and current/emerging issues impacting youth and families.

Graduate Certificates - College of Agriculture and Life Sciences

Certificates

- Agricultural and Extension Education (Certificate) (p. 80)
- Agriculture Data Science (Certificate) (p. 225)
- Family Life Education and Coaching (Certificate) (p. 222)
- Feed Science (Certificate) (p. 211)
- Horticultural Science (Certificate) (p. 163)
- Leadership and Volunteer Management (Certificate) (p. 222)
- Leadership in Agriculture Human Sciences (Certificate) (p. 230)
- Molecular Biotechnology (Certificate) (p. 230)
- Regulatory Science in Agriculture (Certificate) (p. 231)
- Watershed Assessment and Restoration (Certificate) (p. 232)
- Youth Development and Leadership (Certificate) (p. 223)

Agricultural and Extension Education (Certificate)

The Department of Agricultural and Extension Education offers a Graduate Certificate in Agricultural and Extension Education. The program focuses on developing knowledge and skills needed to be effective teachers of agriculture in the public schools and community colleges or to work as an educator with the Cooperative Extension Service or in other non-formal educational settings such as public gardens, nature centers and in international development.

Admissions

Students apply online by visiting the Graduate School's website and completing an online application. Students currently in a graduate degree program should contact the program director for information regarding adding the certificate program to an existing degree program.

Requirements

The certificate program involves completion of 15 credit hours and the preparation of a professional portfolio. The career goals of the student will determine which sequence of courses to take.

Plan Requirements

The Graduate Certificate in Agricultural and Extension Education is divided into two focuses: Agricultural Education and Extension Education.

Certificates earned will be distributed as: "Graduate Certificate in Agricultural Education and Extension Education" without focus area specifications.

Code	Title	Hours	Counts towards
Select a Focus Area below, and select at least 5 courses within the corresponding list:		**15**	
Agricultural Education focus			
AEE 500	Agricultural Education, Schools and Society		
AEE 501	Foundations Of Agricultural and Extension Education		
AEE 503	Youth Program Management		
AEE 522	Occupational Experience in Agriculture		
AEE 524	Coordinating the High School Agricultural Education Program		
AEE 529	Curriculum Development in Agricultural and Extension Education		
AEE 535	Teaching Agriculture in Secondary Schools		
AEE 641	Practicum In Agricultural and Extension Education		
AEE 735	Effective Teaching in Agriculture and Life Sciences		
Extension Education focus			
AEE 501	Foundations Of Agricultural and Extension Education		
AEE 521	Program Planning in Agricultural and Extension Education		
AEE 523	Adult Education in Agriculture		
AEE 533	Leadership and Management of Volunteers in Agricultural and Extension Education		
AEE 560	Organizational Behavior and Administrative Leadership in Agricultural & Human Science		
AEE 577	Evaluation in Agricultural and Extension Education		
AEE 705	International Agricultural Development		
AEE 641	Practicum In Agricultural and Extension Education		
Total Hours		**15**	

Agriculture Data Science (Certificate)

All areas of agriculture, food, and life science have seen an explosion in data collection, ranging from plant breeders collecting phenotypic information to drones imaging fields to companies accumulating sales information. Professionals in industry, governmental, non-governmental and academics need post-baccalaureate training on how to properly collect, manage and analyze the data and then make appropriate decisions using the data.

Students will be able to take their training in this certificate in many different directions depending on their educational and employment needs. In data mining and predictive modeling, our students look for useful patterns in large data sets that would allow them to understand the past and better predict the future. In artificial intelligence and the related processes of machine learning and deep learning, our students will go several steps further, creating machines and algorithms that not only analyze and understand data, but also take the next logical steps dictated by the data.

This program will combine SAS data management and analysis techniques with computer science and statistical training to allow students to apply the processes of data mining and artificial intelligence to critical agriculture, food and life science issues. This certificate is intended for those students who have completed a BS degree in agriculture, food or life science and need additional training to be able to manage and use data in their fields. This certificate is also intended for those students who have completed a BS degree in computer science, mathematics or statistics and need additional training in how to apply data science techniques to agriculture, food and life science data issues. Students currently enrolled in a graduate program will also be eligible to complete the certificate.

Plan Requirements

Certificates are distributed as "Graduate Certificate in Agriculture Data Science" without track specifications.

Code	Title	Hours	Counts towards
Required Courses		**6**	
ST 525	Statistics and Computing for Agricultural Data Science		
BAE 542	Advanced Analytics to Agriculture, Food and Life Sciences Data

YFCS 552	Program Development & Evaluation in Youth & Family Settings		
YFCS 553	Applied Concepts in Child and Youth Development		
YFCS 585	Professional Ethics and Family Policy		

Feed Science (Certificate)

The Graduate Certificate Program in Feed Science is designed to prepare professionals or current degree program students to work in or alongside the animal food industry. The program will provide an advanced foundation in feed science technology, quality assurance and feed formulation, and feed industry leadership. The objectives of this program are for the student to acquire an understanding of the technical aspects of modern animal food manufacturing; food and ingredient quality assurance; animal food safety; feed industry regulations; facility operations, leadership, and safety; formulation; and generally how to apply technical skills to the challenges of the global animal food industry.

Admission Requirements

Applicants must have a BS/BA degree or equivalent four year degree in order to apply to the program. Individuals interested in this certificate program must contact the coordinator of the certificate program.

Program Requirements

A minimum of 12 credit hours from the prescribed list of courses and a grade of 'C-' or better in these courses is required to receive credit for the certificate. To receive a Graduate Certificate in Feed Science, a student must have a minimum 3.0 grade point average on all certificate course work. All course work must be registered through NC State University, transfer credit from other universities is not allowed. All work must be completed in four (4) calendar years, beginning from the time the application is approved by the Director of Graduate Programs.

Plan Requirements

Code	Title	Hours	Counts towards
Core Courses		**9**	
FM/ANS/NTR/ PO 525	Feed Manufacturing Technology		
FM/PO 580	Feed and Ingrdient Quality Assurance		
PO/ANS/NTR 515	Comparative Nutrition		
Elective Courses			
Select a minimum of one of the following courses:		3	
FM 460/ PO 590	Feed Mill Operations and Leadership		
FM 490	Feed Science Seminar		
FM 594	Advanced Feed Mill Practicum		
FM/NTR 790	Advanced Feed Formulation		
Total Hours		**12**	

Horticultural Science (Certificate)

The Graduate Certificate is a non-degree, designed to increase personal knowledge and skills for current or future employment in the horticulture industry. Earning the Graduate Certificate requires completing a minimum of 15 credit hours (usually equaling 5 courses) of coursework. Courses may be taken either on-line or face-to-face.

Participants must hold a bachelor’s degree to enroll in this program. Graduate Certificate applicants should have majored in horticulture, crop science, plant science, or agricultural education with a concentration in plant science, or another closely related degree. Students may begin taking courses for the graduate certificate in Summer, Fall, or Spring. All graduate certificate course work must be completed within four years of enrollment.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
Select a minimum of three courses from the following:			
HS 502	Plant Disease: Methods & Diagnosis		
HS 516	Planting Design		
HS 520	Green Infrastructure		

HS 521	Temperate-Zone Tree Fruits: Physiology and Culture	
HS 523	Viticulture	
HS 532	Introduction to Permaculture *	
HS 533	Public Garden Administration	
HS/CS 541	Plant Breeding Methods *	
HS 550	Environmental Nursery Production *	
HS 551	Plant Nutrition *	
HS/FS 562	Postharvest Physiology *	
HS 576	Crop Physiology and Production in Controlled Environments	
HS 601	Professional Presentation Skills in Horticultural Science *	
HS 703	Breeding Asexually Propagated Crops	
HS 704	Plant Nomenclature	
HS 705	Physiology Of Flowering	
HS 707	Environmental Stress Physiology	
HS 717	Weed Management Systems	
HS 725	Pesticide Chemistry	
HS 727	Pesticide Behavior and Fate In the Environment	
HS 757	Quantitative Genetics Theory and Methods	
Additional Courses [1]		**6**
Additional Courses are determined in conjunction with the academic committee to meet the 15 total hours		
Total Hours		**15**

* Courses taught online

1 Students must take courses that meet the following requirements: must be at 500-level or higher, letter-graded, passed with a B or better

2 Students can select a maximum of 6 hours from the following subjects: ARE, AEE, BAE, CS, ENT, FS, PP, SCC; courses must be at 400-level or higher.

Leadership and Volunteer Management (Certificate)

A Youth, Family, and Community Sciences Online Graduate Certificate in Leadership and Volunteer Management prepares students to work as leaders in community-based organizations. It prepares and strengthens future and current professionals to assume administrative positions and leadership roles within community-based youth or family development. Students gain a more comprehensive understanding of organizational leadership, as well as an applied understanding of effective management skills. The certificate is intended to enhance a student's work in organizational administration and/or volunteer management including volunteer recruitment, retention, risk management, and recognition.

Plan Requirements

YFCS 585	Professional Ethics and Family Policy		

Leadership in Agriculture Human Sciences (Certificate)

As we look at the grand challenges our world faces, the need to train and prepare leaders in every sector of society is urgent. For those interested in developing and strengthening their leadership skills, the Agricultural and Human Sciences (AHS) Department in the College of Agriculture and Life Sciences offers the Graduate Certificate in Leadership in Agricultural & Human Sciences (GCLAHS). The GCLAHS will consist of five 3-credit courses that focus on theory, organizational leadership, community leadership, critical and creative thinking, and change management. This certificate is designed for the individual who is either currently in a leadership role or who aspires to serve in a leadership capacity in education, industry, non-profit or government. The curriculum allows for a strong base in theory and practice, under the direction of leadership scholars who will work with students to take the knowledge gained in the classroom and apply that knowledge to their respective contexts. In fact, this is the essential nature of leadership development, for students to be able to contextualize the work to their own specific context. Courses are offered online to accommodate the busy schedules of working professionals.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**15**	
AEHS 545	Family Communication and Coaching		
AEHS 550	Leadership Theory		
AEHS 555	Critical and Creative Thinking (pending ABGS approval Spring 2022)		
AEHS 560	Organizational Behavior and Administrative Leadership in Agricultural & Human Science		
AEHS 565	Community Leadership		
Total Hours		**15**	

Molecular Biotechnology (Certificate)

Training in molecular biotechnology is essential for a wide range of disciplines from microbiology, plant and animal sciences to chemical engineering. The Graduate Certificate Program in Molecular Biotechnology offers an opportunity for individuals educated in the life sciences and related disciplines to gain laboratory-based, hands-on molecular biology training.

Admission Requirements

1. Baccalaureate degree in a science or engineering discipline.
2. Minimum GPA of 2.75 in his/her/they undergraduate program, and a recommended minimum GPA of 3.0 in science courses.
3. All prerequisites (or their equivalent) to BIT 510 completed before beginning the certificate program. The minimum requirements for BIT 510 are: MB 351 or GN 311 (or equivalent) and two semesters of organic chemistry (equivalent to CH 221 and CH 223). Prerequisites for the coursework electives vary, and those

prerequisites may be taken after admission to the certificate program if necessary.

4. Note that currently the Certificate is only available to students enrolled in a Masters Degree program at NC State.

Certificate Degree Requirements

The Graduate Certificate Program in Molecular Biotechnology will require a minimum of 12 hours of required and elective courses. Coursework transferred from another institution is not applicable toward the certificate. Award of the certificate requires an overall GPA of 3.0 or better for certificate courses (required and elective) with a minimum grade of B- in any of the BIT courses and a minimum grace of C in coursework electives.

Other Relevant Information

NC State graduate students with career interests that involve molecular biotechnology, but are not eligible for the minor, are eligible to apply for the certificate.

Plan Requirements

Code	Title	Hours	Counts towards
Core Courses		**9**	
BIT 501	Ethical Issues in Biotechnology [1]		
BIT 510	Core Technologies in Molecular and Cellular Biology (+ Capstone Cloning Project) [2]		
Elective Courses		**3**	
See "Elective Courses" listed below [3]			
Total Hours		**12**	

1. Students may take another approved research ethics/bioethics course determined in conjunction with the academic committee
2. Upon passing BIT 510 Core Technologies in Molecular and Cellular Biology with an 80% or higher, students must complete a Capstone Cloning Project.
3. Students may choose another 500-level or higher elective course outside "Elective Courses" listed below determined in conjunction with the academic committee

Elective Courses

Code	Title	Hours	Counts towards
Select courses from the lists below:		**3**	
BIT Electives			
BIT 564	Protein Purification	2	
BIT 566	Animal Cell Culture Techniques	2	
BIT 577	Metagenomics	2	
BIT 579	High-Throughput Discovery	2	
BIT 595	Special Topics	1-6	
BIT 571	RNA Interference and Model Organisms	2	
BIT 572	Proteomics	3	
BIT 573	Protein Interactions	2	
BIT 580	Yeast Metabolic Engineering	2	
BIT 815	Advanced Special Topics	1-6	
Other Elective Courses			
MB 714	Microbial Metabolic Regulation	3	
MB 758	Microbial Genetics & Genomics	3	
BCH 553	Biochemistry of Gene Expression	3	
MB 725	Fermentation Microbiology	3	
GN 721	Genetic Data Analysis	3	
GN 701	Molecular Genetics	3	
GN 735	Functional Genomics	3	
CHE 551	Biochemical Engineering	3	

Regulatory Science in Agriculture (Certificate)

Regulatory Science is a field critical to the advancement of responsible technologies for agriculture from concept, through research and development, to commercialization, and throughout a technology's life. The Graduate Certificate in Regulatory Science in Agriculture is an interdisciplinary certificate bringing together science and policy. Students will learn the science, techniques and policies underpinning agriculture regulation as well as risk management, compliance, data assessment, and regulatory communications.

Plan Requirements

Code	Title	Hours	Counts towards
Core Courses		**6**	
CS 518	Introduction to Regulatory Science in Agriculture		
CS 528	Advanced Regulatory Science in Agriculture

BCH 552	Experimental Biochemistry		

BCH 553	Biochemistry of Gene Expression
BCH 555	Proteins and Molecular Mechanisms
BIO/BIT 572	Proteomics
CH 563	Molecular Origins of Life
CH 711	Advanced Analytical Chemistry I
CH 721	Advanced Organic Chemistry I
CH 723	Advanced Organic Chemistry II
CS 725	Pesticide Chemistry
CS 727	Pesticide Behavior and Fate In the Environment
COM 508	Emerging Technologies and Society
COM 538	Risk Communication
EA 501	Environmental Stressors
EA 502	Environmental Risk Assessment
EA 503	Environmental Exposure Assessment
EA 504	Environmental Monitoring and Analysis
EA 505	Environmental Assessment Law & Policy
PA 507	The Public Policy Process
PA 511	Public Policy Analysis
PA 550	Environmental Policy
PA 552	Science and Technology Policy
PA 763	Public Policy Process
PS 531	International Law
SSC 562	Environmental Applications Of Soil Science
SSC 720	Soil and Plant Analysis
TOX 501	Principles of Toxicology
TOX 620	Special Problems
TOX 710	Molecular and Biochemical Toxicology
Total Hours	**12**

[1] The six credits of electives must come from two distinct disciplines.

Watershed Assessment and Restoration (Certificate)

The Department of Biological and Agricultural Engineering offers a Graduate Certificate Program in Watershed Assessment and Restoration.

Objectives

- Provide a focus and formal program for students from many disciplines to pursue training in the technical and engineering aspects of designing and analyzing environmental systems with an emphasis on the watershed-scale.
- Provide students the opportunity to develop a solid foundation in engineering systems targeted at environmental issues, particularly related to non-point sources and their impact on water quality at the watershed-scale.
- Provide practicing engineers and other professionals a source of graduate level engineering education in the environmental field.

Admission Requirements

Applicants must have successfully completed an accredited undergraduate engineering program with a GPA of 3.0 (based on a 4.0 scale), or with an overall undergraduate GPA of at least 2.8 coupled with a 3.0 or higher in the undergraduate major, or be currently enrolled in a graduate engineering program. Applicants with a four-year undergraduate science degree who have successfully completed (with a C or better) calculus, differential equations, physics and chemistry will also be considered. A program that includes fluid mechanics or hydraulics is highly recommended. Environmental professionals who do not meet the above criteria may also qualify if appropriate experience can be demonstrated.

Program Requirements

A minimum of 12 hours of coursework selected from the list below. One course can be selected from outside of BAE (up to 2 credit hours), but at least 9 credit hours must be BAE courses.

Plan Requirements

Code	Title	Hours	Counts towards
Core Courses		**9**	
Select three of the following courses:			
BAE 535	Precision Agriculture Technology		

BAE 536	GIS Applications in Precision Agriculture	
BAE 572	Irrigation and Drainage	
BAE 573	Introduction to Hydrologic and Water Quality Modeling	
BAE 574	DRAINMOD: Theory and Application	
BAE 575	Design of Structural Stormwater Best Management Practices	
BAE 576	Watershed Monitoring and Assessment	
BAE 578	Agricultural Waste Management	
BAE 577	Wetlands Design and Restoration	
BAE 580	Introduction to Land and Water Engineering	
BAE 581	Open Channel Hydraulics for Natural Systems	
BAE 582	Risk and Failure Assessment of Stream Restoration Structures	
BAE 583	Stream Corridor 3 Es: Ecohydraulics, Engineering and Ethics	
BAE 584	Introduction to Fluvial Geomorphology	
BAE 771	Theory Of Drainage--Saturated Flow	
Elective Course		**3**
"Elective Course" will be determined in conjunction with the academic committee		
Total Hours		**12**

Youth Development and Leadership (Certificate)

The Graduate Certificate in Youth Development and Leadership prepares future and strengthens current professionals working with community-based youth development programs. The required courses are designed to strengthen the student's understanding and application of critical aspects of community youth programs, including theories of youth development, social, emotional, cognitive, and physical development, resource development and management, volunteer development, advisory committees and boards, organizational structure, human resource management, and current/emerging issues impacting youth and families.

Architecture

Master of Architecture

The School of Architecture offers two tracks to the Master of Architecture degree:

- Track 1 is for applicants with a four-year undergraduate pre-professional degree in architecture from a National Architecture Accrediting Board (NAAB) accredited program and may be completed in two years of full-time study;
- Track 3 normally requires three semesters of preparatory work before entering the final two-year program of graduate study. Some applicants with design-related academic or professional experience may be able to complete the preparatory work in less time.

A variety of courses are available within the School of Architecture in urban and community design, architectural history and theory, material fabrication, professional practice, building technology and environmental systems.

Master of Advanced Architectural Studies

The Masters of Advanced Architectural Studies is a two to three semester, innovative program for committed, self-directed students who have earned a professional degree in architecture, or a degree in a related discipline. Four focus areas – *City Design*, *Public Interest Design*, *Energy and Technology*, and *History and Theory* – provide opportunities for specialized study in leading edge areas of the built environment. They address the design of sustainable, regenerative, equitable and inclusive cities, suburbs, and buildings, and the means to interpret and assess built environments. All are designed as platforms to explore solutions to the crucial issues of the 21st century.

All degrees will be distributed as "Master of Advanced Architectural Studies" without focus area specifications.

Admission Requirements

In addition to documents required by the Graduate School, students apply to the Master of Architecture program by submitting the following documents by January 15:

1. Portfolio of work;
2. Completed School Personal Data Form;
3. TOEFL/ IELTS scores (foreign language students only).

Applicants will be considered on an individual basis. Exceptions to Graduate School policy may be made for students indicating other qualifications and professional experience.

Master's Degree Requirements

The school stipulates the minimum course credits based on educational and professional goals to individualize a plan of study.

Student Financial Support

The school awards scholarships, awards, and teaching assistantships competitively. It also supports national and statewide scholarships, fellowships, and awards. All support is merit based, not need based. No special application for such support is necessary at the time of admissions.

National Architectural Accrediting Board (NAAB)

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 8-year, 4-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The NC State University School of Architecture offers the following NAAB accredited degree programs:

- B.Arch (pre-professional degree + 30 graduate credits)
- M.Arch Track 1 (pre-professional degree + 48 graduate credits)
- M.Arch Track 3 (non-pre-professional degree + 96 credits)

Next Accreditation Visit for All Programs: 2026

Architecture (MR)

Track 1 Degree Requirements

Track 1 is for students with a four-year undergraduate preprofessional degree in architecture (BEDA degree or equivalent).

Code	Title	Hours	Counts towards
Required Courses		**24**	
ARC 500	Architectural Design: Professional Studio [1]		
ARC 503	Advanced Architectural Design (Series) [1,2]		
ARC 503	Advanced Architectural Design (Series)		
or ARC 598	Final Project Studio In Architecture		
Elective Courses		**24**	
ARC 561	The Practice of Architecture [3]		
Select additional "Architecture Electives" to meet the 24 credit hours; up to 6 hours of "College of Design Electives" may be included [4]			
Total Hours		**48**	

1. The studio assignment will be determined by the School of Architecture prior to the semester start. ARC 503 Advanced Architectural Design (Series) will be repeated at least three times to meet the 18 credit hour requirement.
2. If the faculty approves the student to undertake a Final Project, the student will substitute ARC 598 Final Project Studio In Architecture for the last semester ARC 503 Advanced Architectural Design (Series) requirement and must take ARC 697 Final Project Research in Architecture as 3 credits of the "Architecture Electives".
3. ARC 561 The Practice of Architecture must be taken and counts toward the ARC Elective credits. This course can be taken any semester that ARC Electives appear in the curriculum.
4. "College of Design Electives" included courses offered within the College of Design with AD, D, Des, GD, ID, LAR course prefixes 400-level and above.

Semester Sequence

First Year

Architecture (MR): History and Theory of Architecture Concentration

Concentration Requirements

Concentration students are required to complete a minimum of 12 hours of approved courses in the History and Theory of Architecture within the existing curricula of the Master of Architecture (Tracks 1, 2, and 3) degrees.

Code	Title	Hours	Counts towards
Primary Courses		**3**	
Select one or both of the following Primary Courses:			
ARC 540	Architectural Theory		
or ARC 545	Methods of Interpretation in Architectural History		
Secondary Courses		**9**	
ARC 530	Tectonics and Craft		
ARC 535	Experiments in Architecture Prototypes		

ARC 541	Architecture, Culture, and Meaning	
ARC 542	Sacred Architecture	
ARC 543	Analysis of Precedent	
ARC 544	American City Planning History	
ARC 572	Regional Infrastructures

City Design (Certificate)

The Graduate Certificate in City Design is a joint program between the School of Architecture and the Department of Landscape Architecture. The certificate program promotes design inquiry and application at the scale of the city for students and practitioners of architecture and landscape architecture. The program's objectives are to consider the human condition, particularly in making signification urban places; design integrated systems of movement with increased accessibility; promote a greater mix of uses and amenities within a well-scaled urban fabric; foster new opportunities for energy production at the local scale; define new means of 'greening' the city; and capture greater senses of identity, meaning, and quality within the city fabric.

Admissions Requirements

Applicants must complete an application form to be considered for the certificate program. To qualify for admission to the certificate program, students must be enrolled in a professional program in architecture or landscape architecture. At the time of application, students must have a 3.00 grade point average (GPA) in their professional degree program.

Degree Requirements

Students must complete 15 hours of coursework from the course menu, as specified in the certificate application, and have a minimum of 3.00 GPA on all certificate coursework. All grades on courses taken towards the certificate program in courses numbered 400 and above are included in the GPA. Courses at the 300 level and below are not eligible for certificate credit and subsequently do not affect the graduate GPA.

The minimum grade to receive certificate credit can be no lower than B-. Students who take letter-graded 400-, 500-, and 700-level courses do not have the option of taking the courses for 'credit only' if they intend for the course to be part of the graduate certificate. Transfer credit from other institutions is not allowed for the graduate certificate. All course work must be registered through NC State University.

All certificate requirements must be completed within four (4) calendar years, beginning with the date that the student commences courses applicable to the certificate, unless a more restrictive time limit has been established by the program or academic college/school.

Plan Requirements

Certificate students are expected to complete a total of 15 hours of coursework. There are three methods of fulfilling this requirement:

- one studio option;
- two studio option;
- no studio option.

Studios must be approved by the certificate coordinator in advance, as to whether they fulfill all, or a majority of the intentions of the certificate program.

Certificates earned will be distributed as: "Graduate Certificate in City Design" without studio option specifications.

Code	Title	Hours	Counts towards
Required Courses		**9**	
ARC 570	Anatomy of the City

or LAR 507	Advanced Topics Studio in Landscape Architecture and Environmental Planning		
Elective Courses		**6**	
Select at least two courses from the following:			

School of Architecture Courses		
ARC 544	American City Planning History	
ARC 571	Urban House	
ARC 572	Regional Infrastructures	
ARC 574	Place and Place Making	
ARC 575 Participatory Design in Architecture – course pending Admin Board Approval 2021		
ARC 576	Community Design	
ARC 577	Sustainable Communities	
ARC 589	Architectural Travel Study II [1]	
ARC 590	Special Topics in Architecture	
ARC 630	Independent Study [1]	
Department of Landscape Architecture Courses		
LAR 535	Environmental Social Equity and Design	
LAR 542	Human Use of the Urban Landscape	
LAR 545	City Planning and Design - Building Great Communities	
LAR 582	Special Topics In Landscape Architecture (Intro to Environment and Behavior for Designers)	
LAR 582	Special Topics In Landscape Architecture [1]	
LAR 630	Independent Study [1]	
Total Hours		**15**

[1] Requires approval of certificate coordinator

Energy and Technology in Architecture (Certificate)

The Graduate Certificate in Energy and Technology in Architecture provides students the opportunity to focus their elective studies through courses and design studio(s) that concentrate on building energy systems along with other building systems.

The program's objectives are to provide educational opportunities for architecture graduate students who wish to acquire knowledge and skills in the design and operation of building system at site and building levels, with an emphasis on energy and materials; to advocate for the importance of energy efficiency over the entire life cycle of a building; and to make our students more competitive in the fields of architectural practice, building engineering, and construction.

This certificate program also provides unique interdisciplinary academic and research opportunities among the College of Design, programs within the College of Engineering, NC Solar Center, and building design industries/organizations (i.e. architecture, engineering, general contracting, real estate companies, and public policy agencies).

Admissions

Applicants must complete an application form to be considered for the certificate program. To qualify for admission to the graduate certificate in Energy and Technology in Architecture, students must be enrolled in (or have completed) a professional program in architecture. At the time of application, students must have a 3.00 grade point average (GPA) in their professional degree program.

Requirements

Students must complete 15 hours of coursework from the course menu, as specified in the certificate application, and have a minimum of 3.00 GPA on all certificate coursework. All grades on courses taken towards the certificate program in courses numbered 400 and above are included in the GPA. Courses at the 300 level and below are not eligible for certificate credit and subsequently do not affect the graduate GPA.

The minimum grade to receive certificate credit can be no lower than B-. Students who take letter-graded 400-, 500-, and 700-level courses do not have the option of taking the courses for 'credit only' if they intend for the course to be part of the graduate certificate. Transfer credit from other institutions is not allowed for the graduate certificate. All course work must be registered through NC State University.

All certificate requirements must be completed within four (4) calendar years, beginning with the date that the student commences courses applicable to the certificate, unless a more restrictive time limit has been established by the program or academic college/school.

A student may obtain more than one certificate. Each certificate must have a least nine (9) credit hours that are unique to it.

Other Information

Students in this certificate program will become part of an academic and professional community that offers a broad range of extracurricular activities, including the NC Solar Center GreenBuild Lecture Series, visiting lecturers, and colloquia.

Note that academic success might have a strong bearing on admission to a degree program, but completion of the certificate program in no way guarantees entry into a graduate degree program. For more information regarding course requirements and the application process, please contact the certificate program coordinator.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
ARC 503	Advanced Architectural Design (Series)		
ARC 697	Final Project Research in Architecture [1]		
Elective Courses		**6**

Public Interest Design (Certificate)

Plan Requirements

The Graduate Certificate in Public Interest Design is divided into three options based on design and studio courses.

Certificates earned will be distributed as: "Graduate Certificate in Public Interest Design" without course option specifications.

Option One

Code	Title	Hours	Counts towards
Required Course		**3**	
ARC 563	Public Interest Design Seminar: Case Studies and Current Issues		
Design Studio Courses		**12**	
See "Design Studio Courses" listed below			
Total Hours		**15**	

Option Two

Code	Title	Hours	Counts towards
Required Course		**3**	
ARC 563	Public Interest Design Seminar: Case Studies and Current Issues		
Design Studio Course		**6**	

See "Design Studio Courses" listed below	
Seminar Courses	**6**
See "Seminar Courses" listed below	
Total Hours	**15**

Option 3

Code	Title	Hours	Counts towards
Required Course			
ARC 563	Public Interest Design Seminar: Case Studies and Current Issues	3	
Seminar Courses		**12**	
See "Seminar Courses" listed below			
Total Hours		**15**	

Design Studio Electives

Code	Title	Hours	Counts towards
LAR 500	Landscape Design Studio	6	
ARC 503	Advanced Architectural Design (Series) (Affordable Housing Studio)	6	
ARC 503/563	Advanced Architectural Design (Series) (PID Incubator Studio)	6	
ARC 503	Advanced Architectural Design (Series) (Coastal Dynamics Studio)	6	
ARC 503	Advanced Architectural Design (Series) (Design Build Summer Studio)	6	
LAR 582	Special Topics In Landscape Architecture (Coastal Dynamics Studio)	6	

Seminar Electives

Code	Title	Hours	Counts towards
LAR 582	Special Topics In Landscape Architecture (Introduction to Research Methods)	3	
LAR 582	Special Topics In Landscape Architecture (Human Centered Design)	3	
ID 582	Special Topics In Industrial Design (Human Centered Design)	3	
ARC 590	Special Topics in Architecture (DIY Cartography)	3	
or ADN 592	Graduate Art + Design Special Topics		
ARC 590	Special Topics in Architecture	3	
LAR 582	Special Topics In Landscape Architecture	3	
ADN 502	Graduate Art + Design Laboratory (Documentary Film)	3	

Public Administration Seminar Electives

Code	Title	Hours	Counts towards
PA 510	Public Administration Institutions and Values	3	
PA 512	The Budgetary Process	3	
PA 521	Government and Planning	3	
PA 535	Problem Solving for Public and Nonprofit Managers	3	
PA 536	Management of Nonprofit Organizations	3	
PA 546	Seminar in Program Evaluation	3	
PA 553	Disaster, Crisis and Emergency Management and Policy	3	
PA 598	Special Topics in Public Administration (Grant Writing and Management)	3	

Art and Design

The Art and Design program offers an educational structure that creates a new art and design professional: one for whom artistic and practical talents are developed as different expressions of individual potential. Our objectives are to graduate highly educated art and design professionals with integrated competencies in art, design, aesthetics, theory, hand and digital technologies, design process, and the combination of skills in the chosen concentration with other disciplines of human knowledge.

Admission Requirements

Students will be required to submit a portfolio of past work in electronic format; three letters of recommendation; a statement of personal goals; and transcripts of undergraduate work (minimum undergraduate GPA of 3.0). An interview will be required, but in cases of international applicants or those quite distant from NC State University, may be conducted by means of a long distance phone conversation or may be waived at the faculty's discretion.

Masters Degree Requirements

The program of study requires a minimum of 48 credit hours of graduate work depending on background preparation of the applicant. Separate tracks of 60 and 72 credit hours accommodate students changing design disciplines or with insufficient background in the chosen concentration.

Other Information

We will only admit students to the program in the fall semester each year. Deadline for application is January 5.

Design

At the College of Design, NC State University, the mission of the Doctoral Programs in Design (comprising both the Ph.D. and D.Des. programs) is to improve the human condition through design research and scholarship. This mission is built in equal parts on the recognition of a fertile common ground among the design disciplines and on the need for specificity and depth within them.

The Doctor of Philosophy (Ph.D.) in Design program values a broad range of research interests. The aim of the Ph.D. in Design is to prepare students holding previous degrees in design disciplines to conduct research in the areas of: design for health and well-being; design for learning; design for sustainability; design and technology; design and the urban context; design methods; and design history and criticism.

The Doctor of Design (D.Des.) program provides distance-education opportunities for established design professionals to conduct original investigations using design practices, cases, and methods. D.Des. students pursue practice-based design research in support of professions creating the artifacts, communications, environments, and organizing systems of the future.

Both programs provide a forum for connecting design research to the needs of society, by promoting the application of new knowledge in design and addressing design impacts on larger systems.

Admission Requirements

For admission to both the Ph.D. and D.Des. programs, submit official transcripts from each earned undergraduate and graduate degrees (required); three letters of reference; TOEFL scores (for international students); residency statement (US residents only); College of Design personal data form; statement of research intent; and portfolio. GRE scores are required for all Ph.D. applicants. If reasoning and writing ability is clearly demonstrated through previous graduate degrees, or professional or academic work products and impact, D.Des. applicants may ask for a waiver of GRE scores.

Doctoral Degree Requirements

Both programs of study require a minimum of 54 credit hours of graduate work beyond the Master's degree.

Graphic Design

Overview

The Masters of Graphic Design (MGD) program helps move the passionate student toward a deeper knowledge of graphic and experience design and purposeful, individually driven design practices. Inquiry into contemporary and emergent design issues prepares graduates of the program for leadership positions that both evolve the profession and advance the discipline. Successful completion of the MGD results in a terminal degree, equal to the MFA, and qualifies graduates to teach at the university level or to pursue a PhD in Design.

Faculty charge graduate students to closely examine the cultural and technological situatedness of graphic design and its products, and to seek understanding of the people who use and interact with the things that graphic designers make. Coursework acquaints students with relevant theories and design research methods that frame and ground the design of propositional visual communication systems.

Varied topics prompt students to explore contemporary design concerns: the cultural contexts of design, the influence and experiences of end users, the social and technological environments within which designed artifacts operate. Subtopics within these broad concerns allow faculty and students the opportunity to frame, research, and respond to current and future design challenges.

The MGD program is consistently recognized as one of the top NASAD accredited graduate graphic design programs in the country and one of the few with STEM Classification (CIP). The faculty is nationally and internationally recognized (see Faculty at a Glance). Alumni are designers in leading professional offices around the world, faculty members in colleges and universities throughout the US and Canada, and doctoral students in PhD programs worldwide.

Affordable NC State tuition usually makes the cost of attending NC State well below that of equivalent graduate institutions. For out-of-state students, North Carolina residency laws recognize graduate students as residents after their first year.

MGD II: Two-year Master of Graphic Design Program

The MGD II program targets applicants who have earned a BFA or equivalent in graphic design and are practiced in visual communication, user interaction design (UI), user experience design (UX) and/or related design fields.

Integrated graduate studios, seminars, and workshops expose students to histories, design-related theories, and research methods relevant to current and emerging practices. Students investigate questions individually and collaboratively around the design of communication and interaction in several ways: through making (visualizations, visual diagrams, and functioning prototypes, for instance); assigned and independent reading and research; discussion and critique; and writing. Students also enroll in at least one elective offered in the college, university, or our affiliate universities, Duke University and UNC, Chapel Hill.

Students create a body of work as they explore a research interest area within studio and seminar subtopics. The experience of creating this work, coupled with researching and writing, positions students to identify a design investigation in their final year, which culminates in the required Final Project. For this work, students comprehensively research an area of interest, design propositional artifacts (findings), document the research and findings in a written thesis, and present the project in a public forum.

MGD III: Three-year Master of Graphic Design Program

The MGD III program targets applicants who have some professional experience but who have not earned a first degree in graphic design or have earned a BA with a graphic design concentration. (Note that applicants aiming for a qualifying professional degree in graphic design should apply to the Bachelor of Graphic Design program.)

MGD III students enroll in two semesters of specialized and advanced undergraduate coursework prior to matriculating to the MGD II program. The curriculum includes two studio--based courses and at least two lecture/seminar courses. The 6 credit studios cover systems thinking in design for user experience, visual communication, and other professional graphic design topics while they prepare the student for graduate level inquiry. Additional three credit courses focus on subjects such as mobile interaction, typography, graphic design theory and history, coding and modeling for interface design.

Admissions Requirements

Applications for Priority Admission are due to the Graduate School by January 5. Applications are reviewed until all seats are filled. In addition to Graduate School requirements, the Department asks for department personal data forms, a written personal statement, and a website or accessible online PDF portfolio that demonstrates experience and skills in visual communication.

Degree Requirements

The MGD (II) degree requires successful completion of 48 total credits, however students typically take advantage of additional coursework during their time at NC State.

The core curriculum consists of a 9-credit studio and a 3-credit seminar -- either Design Methods, Design Frameworks, or Final Project Research -- in each of the first three semesters of study. Students are encouraged to augment their study during this time with 400 or 500 level design coursework that enhances skills and/or investigates topics of interest. For instance, the program offers seminars on Graphic Design Pedagogy, Design Discourse and Typography, and Special Topics in Social Innovation. Students are required to enroll in a 3-credit 400 or 500 level elective within another college at NC State or at nearby Duke University or UNC/Chapel Hill under NC State tuition. The fourth semester is devoted to the final project for 6 credits, under the supervision of three Graphic Design faculty members comprising each student's graduate committee.

Industrial Design

Industrial Design is the professional service of creating and developing concepts and specifications that optimize the value, function and appearance of products and product systems to the mutual benefit of both user and manufacturer. This service is often provided in the context of a cooperative working relationship with other members of a development group.

Typical groups include management, marketing, engineering and manufacturing specialists. Industrial designers place special emphasis on human characteristics, needs and interests. These require particular understanding of visual, tactile, safety and convenience criteria. Industrial designers combine these considerations with practical concern for technical processes and requirements for manufacture; marketing opportunities and economic constraints; and distribution, sales and servicing arrangements. Industrial designers are guided by the awareness of their obligations to protect and promote public safety and well-being; to respect the environment; and to observe ethical business practices. Augmenting transdisciplinary practices, emerging areas of industrial design include design research and experience design.

Graduates with a Master of Industrial Design have career opportunities in four general areas; corporate design offices in manufacturing companies, design consulting firms, governmental agencies and educational institutions.

Admissions Requirements

Students must make application to the Department of Graphic Design and Industrial Design by January 5. In addition to Graduate School requirements, the Department requires department personal data forms, a digital portfolio of design work, resume, and a statement of intent. The GRE is required for students whose first degree is not in Industrial Design.

Master's Requirements

The Master of Industrial Design degree requires a minimum of

- 48 credit hours for applications with a Bachelor's degree in Industrial Design (Track II), or
- 78 credit hours for applications with Bachelor's degrees in an area other than Industrial Design (Track III).

The program generally does not accept transfer credits in lieu of required coursework at NC State. Studio credits presented for elective transfer must be accompanied by a portfolio of work from the courses under consideration.

Student Financial Support

The Department has limited provisions for tuition remission and assistantships. Assistantships are awarded on the basis of student and departmental needs. Assistantship requests should be made to the Department of Graphic Design and Industrial Design and should be submitted with the application for admission (for incoming students) or by advertised deadline (for continuing students).

Landscape Architecture

Course offerings or research facilities are available in the following areas: site planning and design, landscape history, urban public spaces, community design, regional design, resource management, outdoor learning environments, international urban and rural landscapes, and specialized landscapes.

Admission Requirements

The best-qualified applicants are accepted up to the maximum number of spaces that are available for new students. Exceptions to the minimum 3.00 GPA may be made for students with special backgrounds, abilities and interests.

Master's Degree Requirements

- Accredited First Professional Degree in Landscape Architecture: Candidates follow an 82-hour sequence of courses over a six-semester period. Three semesters of the program of study are determined by the required curriculum. The last three semesters of study are outlined by the student's Chair of the Department, Director of Graduate Programs, and/or advisor. Research and case studies lead to the final project and design application. The investigative direction is set in collaboration with the chair of the faculty committee. A formal presentation of findings to the faculty, student body and local professionals is required. The summary research and project report must be submitted to the College of Design faculty to meet the graduation requirements.
- Advanced Studies in Landscape Architecture: Candidates with an accredited undergraduate Landscape Architecture degree follow a 48-hour sequence of courses. Twenty-seven hours of electives are chosen through advising with the Director of Graduate Programs, advisors and faculty committee. Comprehensive research work is required for a final project with a final report is required. A formal presentation of findings to the faculty, student body and local professionals is also required.

Other Relevant Information

Students have the option of including a graduate minor in their course of studies. Minors can be in any other graduate program offered at NC State, UNC-CH and Duke University. Some examples of graduate minors are: natural resources, parks, recreation and tourism management, architecture, education, planning, civil engineering, and art and design. The College of Design includes the Center for Universal

Design, the Office of Research, Extension & Engagement, and the Natural Learning Initiative.

Landscape Architecture (MR)

Degree Requirements

Degrees earned will be distributed as: "Master of Landscape Architecture" without track specifications.

Track 1

This curriculum is designed for graduate students with prior LAAB accredited degrees in landscape architecture.

Curriculum A

Code	Title	Hours	Counts towards
Studio Courses		**18**	
Select a minimum of three of the following:			
LAR 502	Site Design and Environmental Planning Studio		
LAR 503	Landscape Architecture Design Development & Construction Documentation Studio		
LAR 507	Advanced Topics Studio in Landscape Architecture and Environmental Planning		
LAR 697	Design Research Project Independent Study		
Seminar Courses		**30**	
Select a minimum of ten courses of the following:			
LAR 517	GIS Applications in Landscape Architecture and Environmental Planning		
LAR 520	Environment and Culture		
LAR 523	Landscape Architecture Plant Identification		
LAR 524	Planting Design Applications in Landscape Architecture		
LAR 527	Landform, Grading, and Environmental Site Systems		
LAR 528	Landscape Architecture Construction Materials and Methods		

LAR 582	Special Topics In Landscape Architecture (History of Landscape Architecture)
LAR 582	Special Topics In Landscape Architecture (Landscape Architecture Immersion)
LAR 534	Landscape Architecture Theory and Criticism
LAR 545	City Planning and Design - Building Great Communities
LAR 540	Research Methods in Landscape Architecture and Environmental Planning
LAR 550	Landscape Architecture Professional Practice
LAR 535	Environmental Social Equity and Design
LAR 543	Landscape Performance and Metrics
LAR 544	Contemporary Issues in Landscape Preservation
LAR 546	The Landscape Imperative
LAR 552	Survey of Natural Hazards and Disasters
LAR 554	Disaster Resilient Policy, Engineering and Design
LAR 582	Special Topics In Landscape Architecture (Sustainable Food Systems)
LAR 582	Special Topics In Landscape Architecture (Design Week)
LAR 582	Special Topics In Landscape Architecture (Advanced Digital Media)
LAR 582	Special Topics In Landscape Architecture (Sustainable Sites)
LAR 582	Special Topics In Landscape Architecture (Computational Design and Parametric Modeling)
LAR 582	Special Topics In Landscape Architecture (Introduction to Envt. and Behavior for Designers)
LAR 607	Natural Hazards, Disasters and Climate Change Adaptation Lecture Series

or ARC 590	Special Topics in Architecture		
LAR 582	Special Topics In Landscape Architecture		
LAR 630	Independent Study		
ARC 590	Special Topics in Architecture (Resilient Thinking)		
ARC 520	Sustainable Architecture		
ARC 548	Vernacular Architecture		
ARC 563	Public Interest Design Seminar: Case Studies and Current Issues		
ARC 544	American City Planning History		
ARC 590	Special Topics in Architecture		

2 Other LAR and/or ARC courses as identified – subject to approval of instructor and track coordinator.

3 Subject to topical area and approval by the Certificate Coordinator.

4 Non-ARC/LAR students are subject to approval of studio instructors and these student may seek to take ARC 503/LAR 507 as a 3-credit hour course (focused on specific class sub-tasks that do not require design studio training/education).

5 ARC students are subject to a lottery to get into studios.

Construction, Civil and Environmental Engineering Track

Code	Title	Hours	Counts towards
Select a minimum of two of the following courses in conjunction with the academic committee: [6]		**6**	
CE 746	Soil Dynamics and Earthquake Engineering		
CE 581	Fluid Mechanics in Natural Environments		
CE 596	Special Topics in Water Resource and Environmental Engineering (Coastal Hydrodynamics)		

CE 596	Special Topics in Water Resource and Environmental Engineering (Coastal Modeling)
CE 567	Risk and Financial Management in Construction
CE 578	Energy and Climate
CE 583	Engineering Aspects Of Coastal Processes
CE 725	Earthquake Structural Engineering
CE 786	Hydroclimatology
CE 790	Advanced Topics In Civil Engineering
MEA 517	Fundamentals of Climate Change Science
MEA 593	Special Topics in Atmospheric Science (Fundamentals of Climate Change Science)
MEA 593	Special Topics in Atmospheric Science (Climate Risk Analysis for Adaptation)
MEA 519	Barriers to Climate Change Literacy
COM 538	Risk Communication
COM 579	Climate Change Communication
COM 566	Seminar In Crisis Communication

[6] Other CE courses as identified – subject to approval of instructor and track coordinator.

Graduate Certificates - College of Design

Certificates

- City Design (Certificate) (p. 241)
- Disaster Resilient Policy, Engineering and Design (Certificate) (p. 263)
- Energy and Technology in Architecture (Certificate) (p. 242)
- Public Interest Design (Certificate) (p. 244)

City Design (Certificate)

The Graduate Certificate in City Design is a joint program between the School of Architecture and the Department of Landscape Architecture. The certificate program promotes design inquiry and application at the scale of the city for students and practitioners of architecture and landscape architecture. The program's objectives are to consider the human condition, particularly in making signification urban places; design integrated systems of movement with increased accessibility; promote a greater mix of uses and amenities within a well-scaled urban fabric; foster new opportunities for energy production at the local scale; define new means of 'greening' the city; and capture greater senses of identity, meaning, and quality within the city fabric.

Admissions Requirements

Applicants must complete an application form to be considered for the certificate program. To qualify for admission to the certificate program, students must be enrolled in a professional program in architecture or landscape architecture. At the time of application, students must have a 3.00 grade point average (GPA) in their professional degree program.

Degree Requirements

Students must complete 15 hours of coursework from the course menu, as specified in the certificate application, and have a minimum of 3.00 GPA on all certificate coursework. All grades on courses taken towards the certificate program in courses numbered 400 and above are included in the GPA. Courses at the 300 level and below are not eligible for certificate credit and subsequently do not affect the graduate GPA.

The minimum grade to receive certificate credit can be no lower than B-. Students who take letter-graded 400-, 500-, and 700-level courses do not have the option of taking the courses for 'credit only' if they intend for the course to be part of the graduate certificate. Transfer credit from other institutions is not allowed for the graduate certificate. All course work must be registered through NC State University.

All certificate requirements must be completed within four (4) calendar years, beginning with the date that the student commences courses applicable to the certificate, unless a more restrictive time limit has been established by the program or academic college/school.

Plan Requirements

Certificate students are expected to complete a total of 15 hours of coursework. There are three methods of fulfilling this requirement:

- one studio option;
- two studio option;
- no studio option.

Studios must be approved by the certificate coordinator in advance, as to whether they fulfill all, or a majority of the intentions of the certificate program.

Certificates earned will be distributed as: "Graduate Certificate in City Design" without studio option specifications.

Code	Title	Hours	Counts towards

Energy and Technology in Architecture (Certificate)

The Graduate Certificate in Energy and Technology in Architecture provides students the opportunity to focus their elective studies through courses and design studio(s) that concentrate on building energy systems along with other building systems.

The program's objectives are to provide educational opportunities for architecture graduate students who wish to acquire knowledge and skills in the design and operation of building system at site and building levels, with an emphasis on energy and materials; to advocate for the importance of energy efficiency over the entire life cycle of a building; and to make our students more competitive in the fields of architectural practice, building engineering, and construction.

This certificate program also provides unique interdisciplinary academic and research opportunities among the College of Design, programs within the College of Engineering, NC Solar Center, and building design industries/organizations (i.e. architecture, engineering, general contracting, real estate companies, and public policy agencies).

Admissions

Applicants must complete an application form to be considered for the certificate program. To qualify for admission to the graduate certificate in Energy and Technology in Architecture, students must be enrolled in (or have completed) a professional program in architecture. At the time of application, students must have a 3.00 grade point average (GPA) in their professional degree program.

Requirements

Students must complete 15 hours of coursework from the course menu, as specified in the certificate application, and have a minimum of 3.00 GPA on all certificate coursework. All grades on courses taken towards the certificate program in courses numbered 400 and above are included in the GPA. Courses at the 300 level and below are not eligible for certificate credit and subsequently do not affect the graduate GPA.

The minimum grade to receive certificate credit can be no lower than B-. Students who take letter-graded 400-, 500-, and 700-level courses do not have the option of taking the courses for 'credit only' if they intend for the course to be part of the graduate certificate. Transfer credit from other

institutions is not allowed for the graduate certificate. All course work must be registered through NC State University.

All certificate requirements must be completed within four (4) calendar years, beginning with the date that the student commences courses applicable to the certificate, unless a more restrictive time limit has been established by the program or academic college/school.

A student may obtain more than one certificate. Each certificate must have a least nine (9) credit hours that are unique to it.

Other Information

Students in this certificate program will become part of an academic and professional community that offers a broad range of extracurricular activities, including the NC Solar Center GreenBuild Lecture Series, visiting lecturers, and colloquia.

Note that academic success might have a strong bearing on admission to a degree program, but completion of the certificate program in no way guarantees entry into a graduate degree program. For more information regarding course requirements and the application process, please contact the certificate program coordinator.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
ARC 503	Advanced Architectural Design (Series)		
ARC 697	Final Project Research in Architecture [1]		
Elective Courses		**6**	
See "Elective Courses" listed below			
Total Hours		**15**	

[1] Students have the option to take a third elective course from "Elective Courses" listed below.

Elective Courses

Code	Title	Hours	Counts towards
Select at least two courses from the lists below:		**6**	
Approved Focus Studios Courses			
ARC 503	Advanced Architectural Design (Series) (Collaborative Design Studio: Architecture + Engineering)	6	
ARC 503	Advanced Architectural Design (Series) (Airport Design)	6	
ARC 503	Advanced Architectural Design (Series) (High-rise Building Design)	6	
ARC 503	Advanced Architectural Design (Series) (Production for Architecture)	6	
Approved Focus Elective Courses			
ARC 520	Sustainable Architecture	3	
ARC 521	Daylighting and Passive Energy Systems for Architecture	3	
ARC 522	Building Energy Efficiency & Renewable Energy	3	
ARC 523	Building Energy Modeling and Simulation	3	
ARC 524	Building Energy Optimization	3	
ARC 530	Tectonics and Craft	3	
ARC 534	Design of Architectural Details	3	
ARC 535	Experiments in Architecture Prototypes	3	
ARC 536	Materials for Design	3	
ARC 537	Digital Materials Translations	3	
ARC 538	Manufacturing Architecture	3	
Electives Available per Certificate Coordinator Approval			
CE 504	Airport Planning and Design	3	
HI 540	American Environmental History	3	
HI 585	History of American Technology	3	
ID 500	Advanced Industrial Design (Series)	6	
ID 511	Industrial Design Materials and Processes I	3	

ID 512	Industrial Design Materials and Processes II	3
ID 582	Special Topics In Industrial Design	1-6
MAE 589	Special Topics In Mechanical and Aerospace Engineering	1-6
MSE 556	Composite Materials	3
MSE 576	Technology Entrepreneurship and Commercialization I	3
MSE 577	Technology Entrepreneurship and Commercializatior II	3

ETA Certificate Course Structure

Certificate students are required to take at least one course in each of the above two categories to achieve the learning outcomes defined for the program.

Code	Title	Hours	Counts towards
Energy-Focused Courses			
ARC 503	Advanced Architectural Design (Series) (Collaborative Design Studio: Architecture + Engineering)	6	
ARC 503	Advanced Architectural Design (Series) (Airport Design)	6	
ARC 520	Sustainable Architecture	3	
ARC 521	Daylighting and Passive Energy Systems for Architecture	3	
ARC 522	Building Energy Efficiency & Renewable Energy	3	
ARC 523	Building Energy Modeling and Simulation	3	
ARC 524	Building Energy Optimization	3	
Material/Tectonic-Focused Courses			
ARC 503	Advanced Architectural Design (Series) (High-rise Building Design)	6

Public Interest Design (Certificate)

Plan Requirements

The Graduate Certificate in Public Interest Design is divided into three options based on design and studio courses.

Certificates earned will be distributed as: "Graduate Certificate in Public Interest Design" without course option specifications.

Option One

Code	Title	Hours	Counts towards
Required Course		**3**	
ARC 563	Public Interest Design Seminar: Case Studies and Current Issues		
Design Studio Courses		**12**	
See "Design Studio Courses" listed below			
Total Hours		**15**	

Option Two

Code	Title	Hours	Counts towards
Required Course		**3**	
ARC 563	Public Interest Design Seminar: Case Studies and Current Issues		
Design Studio Course		**6**	
See "Design Studio Courses" listed below			
Seminar Courses		**6**	
See "Seminar Courses" listed below			
Total Hours		**15**	

Option 3

Code	Title	Hours	Counts towards
Required Course			
ARC 563	Public Interest Design Seminar: Case Studies and Current Issues	3	
Seminar Courses		**12**	
See "Seminar Courses" listed below			
Total Hours		**15**	

Design Studio Electives

Code	Title	Hours	Counts towards
LAR 500	Landscape Design Studio	6	
ARC 503	Advanced Architectural Design (Series) (Affordable Housing Studio)	6	
ARC 503/563	Advanced Architectural Design (Series) (PID Incubator Studio)	6	
ARC 503	Advanced Architectural Design (Series) (Coastal Dynamics Studio)	6	
ARC 503	Advanced Architectural Design (Series) (Design Build Summer Studio)	6	
LAR 582	Special Topics In Landscape Architecture (Coastal Dynamics Studio)	6	

Seminar Electives

Code	Title	Hours	Counts towards
LAR 582	Special Topics In Landscape Architecture (Introduction to Research Methods)	3	
LAR 582	Special Topics In Landscape Architecture (Human Centered Design)	3	
ID 582	Special Topics In Industrial Design (Human Centered Design)	3	
ARC 590	Special Topics in Architecture (DIY Cartography)	3	
or ADN 592	Graduate Art + Design Special Topics		
ARC 590	Special Topics in Architecture	3	
LAR 582	Special Topics In Landscape Architecture	3	
ADN 502	Graduate Art + Design Laboratory (Documentary Film)	3	

Public Administration Seminar Electives

Code	Title	Hours	Counts towards
PA 510	Public Administration Institutions and Values	3	
PA 512	The Budgetary Process	3	

PA 521	Government and Planning	3
PA 535	Problem Solving for Public and Nonprofit Managers	3
PA 536	Management of Nonprofit Organizations	3
PA 546	Seminar in Program Evaluation	3
PA 553	Disaster, Crisis and Emergency Management and Policy	3
PA 598	Special Topics in Public Administration (Grant Writing and Management)	3

Certificates

- Counselor Education (Certificate) (p. 307)
- Learning Analytics (Certificate) (p. 343)
- Mathematics Teaching and Learning (Certificate) (p. 337)
- Special Education (Certificate): Multi-Tiered System of Supports (MTSS) (p. 340)
- Teaching, Training, and Educational Technology (Certificate) (p. 316)

Adult and Community College Education

The Adult and Community College Education program area is a unique program in its emphasis on serving the spectrum of both formal and informal adult learning organizations, and its inclusion of administrative, instructional and technology-related leadership within a practitioner preparation program. Based on a land-grant, Research Extensive University, the department reflects the tripartite commitment to quality instruction, research scholarship and service outreach. It is one-of-a-kind as its primary commitment is to part-time students who are full-time working professionals. Full-time students are eligible for consideration to receive full funding through scholarships, fellowships and research and teaching assistantships, which allow our students to work with top faculty on cutting-edge projects. To meet the needs of full- and part-time students, most courses are offered once a week during late afternoon or evening hours. Some courses are regularly available during summer sessions and weekends and through distance education technologies.

Admission Requirements

Applications for admission are submitted through the Graduate School, accepted year-round and are applicable for the first available term. We accept students from a wide range of disciplinary backgrounds. To qualify for admission, applicants must have a bachelor's degree from an accredited institution of higher education in any field. International applicants must also have a TOEFL score of 100 or higher. Admission decisions are based on several criteria, including undergraduate GPA, work history and interest in the field.

Student Financial Support

To be eligible for financial aid, students must be enrolled in Master's or Doctoral degree programs offered by the University. Unfortunately there is no financial aid available for Graduate Certificate students. Occasionally graduate assistantships are available for full time students in our degree programs. Please check with your advisor about assistantship opportunities. We recommend that you contact the Office of Scholarships and Financial Aid to find out what other options are available.

Community College Leadership (EdD)

Degree Requirements

All doctoral degrees in the College of Education require a minimum of 72 graduate credit hours beyond the bachelor's degree. Most doctoral programs in the College of Education require a minimum of 60 graduate credit hours beyond an approved master's degree.

Thematic Research Areas

Select from the following six areas in which to conduct research:

- Completion and Transfer
- Learning Outcomes
- Equity
- Labor Market Outcomes
- Technology
- Culture/Organizational Behavior

Degrees earned will be distributed as: "Doctor of Education" without area of study or research specifications.

Clinical Mental Health Counseling

All master's degree programs (on-campus and online formats) are accredited by the Council for Accreditation of Counseling and Related Educational Programs through March 31, 2024.

The doctoral program concentration in counseling and counselor education is accredited by the by the Council for Accreditation of Counseling and Related Educational Programs through March 31, 2024

Admission Requirements

Admissions Requirements for Master's Programs (on-campus and online programs):

- Completed online application, resume, personal statement/goals, and non-refundable application fee
- We are no longer requiring the GRE Scores/MAT Scores for our masters program
- 3 recommendations from people who know your academic record and potential for graduate study (letters should be uploaded online)
- Official transcripts of all post-secondary education
- Official** statement of English Proficiency (TOEFL) for international students

Applicants are expected to have an undergraduate GPA of 3.0 or higher.

Master's Degree Requirements

For master's degree concentrations, admission is limited in order to maintain faculty student interaction in didactic classes, for supervision in practica and for informal contact. Generally, class size averages between 20 and 25 in didactic, 4-5 in practica, and the advising ratio is approximately l to 10.

The Department of Counselor Education offers three programs of study leading to the Master of Education Degree:

- Clinical Mental Health Counseling (p. 280),
- College Counseling and Student Development (p. 281), and
- School Counseling (p. 331).

Degrees earned will be distributed as: "Master of Education" without program of study specifications. Programs of study will only be printed on transcripts.

These programs of study require a minimum of 60 credits. Students who complete the program will be eligible to sit for the National Counselor Examination (NCE).

Student Financial Support

At NC State, our goal is to assure that no student who can benefit from an NC State education be denied that opportunity due to finances. We are committed to allocating our financial aid resources to help the broadest range of students.

Graduate students may apply for Federal Subsidized and Unsubsidized Stafford Loans, and for Federal Work-Study employment. Qualified graduate students pursuing masters or doctoral degrees may also apply for fellowships, assistantships and other awards offered through individual colleges and the Graduate School.

Degrees

Curriculum and Instruction

The department of Teacher Education and Learning Sciences offers master's degrees in multiple areas of curriculum and instruction; Curriculum Development and Supervision, Educational Psychology, and New Literacies and Global Learning (with sub-concentrations in English education, general studies, middle grades, reading/ literacy education, and secondary social studies.

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved any the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Curriculum and Instruction: A 500-800 word statement describing professional goals is required, along with transcripts and reference letters. Some areas of study require that applicants be qualified to hold a baccalaureate-level teaching license or have teaching experience. The Graduate School requires a 3.0 in the undergraduate program. Students from diverse backgrounds are welcome to apply. Admission is competitive. The best qualified applicants will be accepted up to the limited number of spaces available for new students. TOEFL or IELTS scores for international applicants whose first language is not English. GRE scores not more than five years old are required for the Educational Psychology program area.

Master's Degree Requirements

Curriculum and Instruction: A minimum of 30 course credit hours. For the M.S. degree, a minimum of 36 hours is required. The M.S. degree requires a thesis and final oral examination approved by the graduate committee.

Student Financial Support

Teaching Assistantships are available on a limited basis.

Counselor Education (Certificate)

Our innovative online program prepares school teachers, administrators, staff, advisors, tutors in schools and universities, human service workers, and individuals interested in counseling work to advocate and support students, their families, clients and local communities. Our certificate program allows students to learn in a flexible environment, with flexible online classwork, without the hassle of traffic and on-campus parking. Students will meet online each week for a 90-minute interactive discussion with the professor, instructors and classmates, in order to stay connected and challenged. The certificate program alone does not prepare students to work as professional counselors. In order to work in professional counseling, additional classes, training and licensure will be required through a master's degree program.

Admission Requirements

Applicants should have a 3.0 GPA but may be admitted provisionally based on related graduate classes completed in the field of education, human services or training and development, and, ultimately, by earning at least a "B" (3.0) average in the first GCCE class.

- Completed online Graduate School application and admission fee
- Resume outlining education and work experience

Applications are considered to begin the GCCE program in ***Summer II (Application Deadline of May 16 by 5 pm) or Fall (Application deadline of August 15 by 5 pm)***. These two main points serve as a great way to begin the GCCE program with registration for either Orientation to Professional Counseling, Identity, and Ethics (Summer II) or Multicultural Lifespan Development (Fall). If there are available seats throughout the rest of the academic year, it might be possible for a few students to begin the GCCE program during Summer I or Spring semesters.

Email us at ncsu_gcce@ncsu.edu with any questions.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**13**	
ECD 510	Orientation to Professional Counseling, Identity, and Ethics		
ECD 575	Multicultural Lifespan Development

ECD 525	Multicultural Counseling		
Total Hours		**13**	

Educational Administration and Supervision

NC State's Ed.D. in Educational Administration & Supervision program is tied for #14 in U.S. News & World Report's rankings of 393 graduate programs in the U.S. and ranked #1 in North Carolina! The program is designed to prepare systems-level leaders to improve the quality of K-12 schools by preparing the next generation of superintendents dedicated to educational excellence and equity. Graduates are empowered with leadership strategies that improve student performance in environments that are dynamic, interactive, and culturally diverse.

Program Description

The Ed.D. in Educational Administration & Supervision leads to district/superintendent licensure and requires core courses in educational leadership, research methods (9 hours), an internship (6 hours), and a dissertation (12 hours). Students must be officially admitted to the Ed.D. program to enroll in doctoral classes. Please be aware that a Ph.D. in Educational Evaluation and Policy Analysis is also offered, but only the Ed.D. leads to superintendent licensure.

Course of Study

The program requires a minimum of 54 credit hours beyond the master's degree. Students complete 27 hours of core and elective courses, 9 credit hours of research methods, a two semester internship (6 hours), and 12 hours of dissertation research.

Admission Requirements

Applicants must hold a North Carolina Principal's license or be eligible to receive one; transcripts; three letters of reference (at least one must be from your current supervisor); resume (including teaching assignments, leadership experiences, and trainings); personal statement of interest and fit with career goals; and official score report from either the Miller Analogies Test (MAT) or the Graduate Record Exam (GRE). Test should have been taken within the last five years.

Degrees

- Educational Administration and Supervision (EdD) (p. 308)
- Educational Administration and Supervision (Minor) (p. 309)

Degree Requirements

Code	Title	Hours	Counts towards
Core Courses		**27**	
Select a minimum of nine of the following courses:			
ELP 720	Cases In Educational Administration		
ELP 724	Contemporary Educational Thought		
ELP 728	School Law For the Administrator		
ELP 729	Educational Finance		
ELP 735	Policy Research in Education		
ELP 751	Politics of P-12 Education		
ELP 753	Data Decision Making for School Administrators		
ELP 756	Organizational Leadership & Mangement for School Leaders		
ELP 780	Evaluation Theory and Practice In Education		
ELP 789	Personnel Recruitment, Selection, Development and Appraisal in Education		
ELP 795	Special Topics [1]		
ELP 820	Special Problems In Education [2]		
Research Methods and Data Analysis Courses		**9**	
Select a minimum of three courses of the following:			
ED 710	Applied Quantitative Methods in Education I		
ED 711	Applied Quantitative Methods in Education II		
ED 730	Introduction to Qualitative Research in Education		
ED 731	Advanced Qualitative Research and Data Analysis in Education		
Internship Courses		**6**	

ELP 851	Internship In Educational Leadership and Program Evaluation [3]	
Dissertation Preparation / Writing Courses		**12**
ELP 891	Problems Of Research Design In Education	
ELP 895	Doctoral Dissertation Research	
Total Hours		**54**

1 ELP 795 Special Topics may be repeated for credit.

2 ELP 820 Special Problems In Education may be repeated once for credit.

3 ELP 851 Internship In Educational Leadership and Program Evaluation must be repeated consecutively.

Educational Leadership, Policy and Human Development

The Adult, Workforce, and Continuing Professional Education specialization with the Ph.D. in Educational Leadership, Policy, and Human Development is unique in its emphasis on serving the spectrum of both formal and informal adult learning organizations, and its inclusion of administrative, instructional and technology-related leadership within a practitioner preparation program. Based on a land-grant, Research Extensive University, the department reflects the tripartite commitment to quality instruction, research scholarship and service outreach.

The Ph.D. in Educational Leadership, Policy, and Human Development with a specialization in Adult, Workforce, and Continuing Professional Education, is one-of-a-kind as its primary commitment is to part-time students who are full-time working professionals. Full-time students are eligible for consideration to receive full funding through scholarships, fellowships and research and teaching assistantships, which allow our students to work with top faculty on cutting-edge projects. To meet the needs of full- and part-time students, most courses are offered once a week during late afternoon or evening hours. Some courses are regularly available during summer sessions and weekends and through distance education technologies.

Admission Requirements

Applications for admission are submitted through the Graduate School. We accept students from a wide range of educational backgrounds. To qualify for admission, applicants must have a master’s degree from an accredited institution of higher education in any field. International applicants must also have a TOEFL score of 100 or higher. Admission decisions are based on several criteria, including undergraduate GPA, work history and interest in the field.

Student Financial Support

To be eligible for financial aid, students must be enrolled in Master's or Doctoral degree programs offered by the University. Unfortunately there is no financial aid available for Graduate Certificate students. Occasionally graduate assistantships are available for full time students in our degree programs. Please check with your advisor about assistantship opportunities.

Educational Leadership, Policy, and Human Development (PhD)

Degree Requirements

Degrees earned will be distributed as: "Doctor of Philosophy in Education Leadership, Policy and Human Development" without specialization specifications.

Code	Title	Hours	Counts towards
Scholar Leader Courses		**6**	
ED 795	Special Topics in Education Research (Scholar Leader: Diversity and Equity in Schools and Community)		
ED 795	Special Topics in Education Research (Scholar Leader: Systemic Change in Education and Society)		
Required College Research Methods *		**15**	
ED 710	Applied Quantitative Methods in Education I		
ED 730	Introduction to Qualitative Research in Education		
ED 711	Applied Quantitative Methods in Education II		
or ED 731	Advanced Qualitative Research and Data Analysis in Education		
or ED 750	Mixed Methods Research in Education		
Select two additional three credit hour advanced research courses in conjunction with the academic committee			

* ED 700 Introduction to Research Design in Education, or its equivalent is a pre-requisite course for any research course. A graduate student may take it as part of their Program Area of Study, with approval from their advisor.

In addition, students must select a specialization of the following:

Adult, Workforce, and Continuing Professional Education (AWCPE)

Code	Title	Hours	Counts towards
Scholar Leader Core Courses		**6**	
EAC 711	Reflective Practice and Research Inquiry		
EAC 803	Research Seminar in Adult and Higher Education		
AWCPE Area of Study Courses		**12**	
EAC 730	Foundations of Adult, Higher, and Human Res Education		
or EAC 710	Adult Education: History, Philosophy, Contemporary Nature		
EAC 759	Adult Learning Theory		
EAC 703	The Programming Process In Adult and Community College Education		
ELP 780	Evaluation Theory and Practice In Education		
Elective Courses		**12**	
"Elective Courses" will be determined in conjunction with the academic committee			
Dissertation Courses [1]		**9**	
EAC 895	Doctoral Dissertation Research		
or EAC 899	Doctoral Dissertation Preparation		
Total Hours		**72**	

[1] **For doctoral students either part-time or full-time who are working on their dissertation:** Writing the dissertation requires a major commitment of time and effort on both the part of the doctoral student and the faculty advisor. There should be consultation between the student and the dissertation chair about what is expected to be accomplished, and how much time is to be invested before the student registers. The College of Education strongly recommends that students who are registering for EAC 895 Doctoral Dissertation Research or EAC 899 Doctoral Dissertation Preparation register for at least 3 semester hours per semester, when appropriate.

Educational Evaluation and Policy Analysis (EEPA)

Code	Title	Hours	Counts towards
Scholar Leader Core Courses		**6**	
ELP 892	Research Projects In Educational Leadership and Program Evaluation		
Select an additional ELP approved course in conjunction with the academic committee			
EEPA Area of Study Courses		**18-30**	
"EEPA Area of Study Courses" are determined in conjunction with the academic committee; however, a sample selection of courses includ:			
ELP 728	School Law For the Administrator		
ELP 729	Educational Finance		
ELP 735	Policy Research in Education		
ELP 751	Politics of P-12 Education		
ELP 780	Evaluation Theory and Practice In Education		
ELP 795	Special Topics		
Dissertation Courses [1]		**9**	
ELP 891	Problems Of Research Design In Education		
ELP 895	Doctoral Dissertation Research		
ELP 899	Doctoral Dissertation Preparation		
Total Hours		**72**

Teaching, Training, and Educational Technology (Certificate)

Delivered 100% online, the Certificate consists of five 3-credit courses focused on teaching, training, and the use of technology in a variety of educational environments. Students can tailor the program to meet their needs and gain the knowledge and skills necessary to design and deliver course-related content through face-to-face, technology-enhanced, and e-learning environments. The program is designed for mid-career individuals who may be without academic preparation for their current positions, or for those choosing to increase their knowledge and skills in the field for future job opportunities.

Students may choose one of the following specialty areas:

- Training and Development,
- Instructional Design,
- E-Learning,
- Community College Teaching,
- and Community College Leadership.

In order to be awarded the Certificate, all required courses must be taken and one elective is allowed. Transfer credit from other institutions is not allowed.

Plan Requirements

Students can choose courses from the following specializations:

- Talent Development (p. 316)
- Instructional Design (p. 316)
- E-Learning / Educational Technology (p. 317)
- Community College Teaching (p. 317)
- Community College Leadership (p. 317)

Certificates earned will be distributed as: "Graduate Certificate in Teaching, Training, and Educational Technology" without focus area specifications.

Talent Development

Elementary Education

The Elementary Education program in the TELS department offers a Master of Education (M.Ed.) degree in Elementary Education with a

concentration in either mathematics or science education. The Master's program prepares teacher leaders who possess strong specialized content knowledge in mathematics or science and a deep understanding of how elementary students learn. The program, designed for those who already hold a current teaching license, is especially tailored to provide candidates with leadership and application skills to transfer their knowledge to their work with elementary school teachers and students.

The program is considered Distance Education (DE) and offered off campus at school sites in the region to take advantage of reduced DE tuition rates.

The coursework for the mathematics and science concentrations are approved by the North Carolina State Board of Education. Therefore, graduates of the M.Ed. program are eligible to receive the elementary mathematics or elementary science specialist add-on to their North Carolina K-6 teaching license from the Department of Public Instruction. The College of Education is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Elementary Education Master's program: Application requirements include a 500-800 word statement describing professional goals, transcripts and reference letters, and a teaching license. The Graduate School requires a 3.0 GPA in an undergraduate program. The best qualified applicants will be accepted up to the limited number of spaces available for new students.

For the M.S. degree, a minimum of 33 hours is required. The M.S. degree requires a thesis and final oral examination approved by the graduate committee. It is the responsibility of MS students to secure an advisor in advance to supervise their thesis research.

Higher Education Administration

NC State's Higher Education program provides exceptional opportunities for students interested in higher education administration to explore a core body of knowledge, gain real-world professional experience and pursue advanced study. Program content is informed by relevant theory, scholarly research and best practice in the fields of higher education and student affairs. In addition, the program links theoretical foundations of higher education leadership and administration to practical application of skills.

Students in the program, you will develop the professional expertise required for entry or advancement in colleges and universities, governmental agencies or public service organizations.

By participating in this master's program, students will benefit from several distinct program characteristics:

- Diverse students and faculty representing a variety of backgrounds, experiences and research interests
- A commitment to educational equity
- Access to multiple institutional types in the Triangle area that provide diverse contexts for learning and professional development

Admissions Requirements

- Personal statement of interest and desired career goals
- Professional resume or CV
- Transcripts from all institutions attended (except NC State)
- Three professional/academic recommendations
- TOEFL or IELTS scores for international students

Master of Education

At 39 credit hours, typically the Master of Education (M.Ed.) in Higher Education Administration degree takes 2–3 years to complete, depending on enrollment status.

Learning and Teaching in STEM

The Department of Science, Technology, Engineering and Mathematics (STEM) Education offers a Doctor of Philosophy (PhD) in Learning and Teaching in STEM with three areas of concentration: Science Education, Engineering and Technology Education, and Mathematics and Statistics Education.

We prepare educators and researchers for positions as teachers, leaders, and university faculty of the highest quality. We are particularly proud of our emphasis on the use of technology to enhance teaching. Students take courses in their educational specialty, in general professional education, and in academic discipline areas including: biological sciences, chemistry, computer science, earth science, engineering, graphic arts, interdisciplinary science, mathematics, physics, or statistics.

Doctoral students are knowledge-seekers and who are eager to pursue educational problems and develop critical thinking skills in a collaborative environment. The programs prepare individuals for positions in their fields of study related to:

- scholarly inquiry and discourse in their discipline,
- preparation of K-12 teachers,
- instruction and development issues in K-16, and
- leadership positions.

Admission Requirements

Applicants must submit a completed application specific to the program concentration. All programs require GRE scores, 3 letters of recommendation, official transcripts, and a 1-2 page statement describing interests, background, and professional goals.

Please see the Learning and Teaching in STEM, PhD website for additional details. The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific program area of study.

Doctoral Degree Requirements

The Ph.D. program in Learning and Teaching in STEM requires a previous master’s degree, a minimum of 54 semester hours of course work, and 9 semester hours of dissertation research beyond the Master's Degree requirements.

*Note: Some programs may allow exceptional applicants to earn a Master’s degree en route to a Ph.D., with up to 36 hours counting toward the Ph.D. with continuous enrollment.

Student Financial Support

A small number of teaching and research assistantships are available, and out-of-state tuition remission may be available for one year for

students on assistantships. Please discuss these opportunities directly with program area faculty.

Learning Design & Technology

The department of Teacher Education and Learning Sciences offers master's degrees in Learning Design and Technology. These master's programs prepare education professionals to lead digital learning programs, design digital learning environments, and inquire into digital learning solutions to continuously refine instruction and improve student learning.

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved by the Council for the Accreditation of Educator Preparation (CAEP). Graduates of this program holding a North Carolina teaching license are eligible to add the 079 computer

teacher endorsement and/or 077 technology specialist endorsement to their license.

Admission Requirements

Learning Design & Technology: A 500-800 word statement describing professional goals is required, along with transcripts and reference letters. The Graduate School requires a 3.0 in the undergraduate program. TOEFL or IELTS scores for international applicants whose first language is not English.

Master's Degree Requirements

Learning Design & Technology: A minimum of 30 course credit hours. For the M.S. degree, a minimum of 36 hours is required. The M.S. degree requires a thesis and final oral examination approved by the graduate committee.

Degrees

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Mathematics Education

Our mission is to prepare master's degree-seeking students for positions of instructional leadership in Mathematics Education as master teachers of mathematics in middle grades (6-9), high school (9-12) or post-secondary institutions such as community colleges.A master's program is offered that leads to initial teaching licensure. Master's programs are also offered leading to North Carolina M-licensure as a teacher of technology at grades 6-12. Programs are also available for those seeking advanced graduate-level certification as a teacher. Finally, students may choose a program to prepare for teaching careers in post-secondary education.

- Master of Education in STEM Education – Mathematics Concentration
- Master of Arts in Teaching – Mathematics Education

Admission Requirements

Applicants for M.S., degrees in mathematics education must submit a completed application specific to the program. Please see the Science, Technology, Engineering and Mathematics (STEM) Education website for details. The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific program.

Master's Degree Requirements

The Master of Science Degree requires a minimum of 36 semester hours of graduate work.

Student Financial Support

A small number of teaching and research assistantships are available, and out-of-state tuition remission may be available for one year for students on assistantships. Please discuss these opportunities directly with program area faculty.

School Administration

NCSU's Master of School Administration (MSA) program is the top-ranked school leadership program in North Carolina and one of only six programs nationally to have been designated as exemplary by the University Council for Educational Administration. The cohort-based program prepares graduates to assume building-level leadership positions in schools (public, private, and charter) as assistant principals and principals and leads to principal licensure.

Admission Requirements

Personal statement including career goals and aspirations; transcripts; teaching experience in K-12 schools (three years preferred); resume; three letters of recommendation (one recommendation is to be from current supervisor); minimum 3.0 undergraduate GPA (preferred); participate in Candidate Assessment Day.

All application materials must be submitted through the Graduate School's online application process only. No hard copies will be accepted. Because this program is cohort-based, no deferrals of admission are permitted.

School Counseling

All master's degree programs (on-campus and online formats) are accredited by the Council for Accreditation of Counseling and Related Educational Programs through March 31, 2024.

The doctoral program concentration in counseling and counselor education is accredited by the by the Council for Accreditation of Counseling and Related Educational Programs through March 31, 2024.

Admission Requirements

Admissions Requirements for Master's Programs (on-campus and online programs):

- Completed online application, resume, personal statement/goals, and non-refundable application fee
- We are no longer requiring the GRE Scores/MAT Scores for our masters program
- 3 recommendations from people who know your academic record and potential for graduate study (letters should be uploaded online)
- Official transcripts of all post-secondary education
- Official** statement of English Proficiency (TOEFL) for international students

Applicants are expected to have an undergraduate GPA of 3.0 or higher.

Master's Degree Requirements

For master's degree concentrations, admission is limited in order to maintain faculty student interaction in didactic classes, for supervision in practica and for informal contact. Generally, class size averages between 20 and 25 in didactic, 4-5 in practica, and the advising ratio is approximately l to 10.

The Master's of Education Degree (M.Ed.) is primarily a practitioner-oriented master's and is offered in the on-campus program or DE online program. The Department of Counselor Education offers three programs of study leading to the Master of Education Degree:

- Clinical Mental Health Counseling (p. 280),
- College Counseling and Student Development (p. 281), and
- School Counseling (p. 332).

Degrees earned will be distributed as: "Master of Education" without program of study specifications. Programs of study will only be printed on transcripts.

These programs of study require a minimum of 60 credits. Students who complete the program will be eligible to sit for the National Counselor Examination (NCE). Students in the School Counseling program are also eligible for licensure as school counselors in North Carolina (providing they pass the counseling PRAXIS examination).

Student Financial Support

At NC State, our goal is to assure that no student who can benefit from an NC State education be denied that opportunity due to finances. We are committed to allocating our financial aid resources to help the broadest range of students.

Graduate students may apply for Federal Subsidized and Unsubsidized Stafford Loans, and for Federal Work-Study employment. Qualified graduate students pursuing masters or doctoral degrees may also apply for fellowships, assistantships and other awards offered through individual colleges and the Graduate School.

Science Education

The Science Education Program offers a Master’s of STEM Education (MEd) Distance Education with a Concentration in Science Education. We prepare educators and researchers for positions as teachers, leaders, and science educators of the highest quality at the university, community college, middle and/or high school level, or informal science education centers. We are particularly proud of our emphasis on the use of technology to enhance teaching. Students take courses in their educational specialty in Science Education, and in academic discipline areas including: biological sciences, chemistry, earth science, environmental science, interdisciplinary science or physics.

Our STEM Ed Master's program (MEd) leads to North Carolina M-licensure as a teacher of science at grades 6-12 or advanced credentials for informal educators. Programs are also available for those seeking advanced graduate-level certification as a teacher. Finally, students may design a program to prepare for teaching careers in post-secondary education.

Some of our students elect to move directly from our master's into our doctoral program in Learning and Teaching in STEM – Science Education. These students are knowledge-seekers and are eager to pursue educational problems and develop critical thinking skills in a collaborative environment. The programs prepare individuals for positions in their fields of study related to:

1. scholarly inquiry and discourse in science education,
2. preparation of K-12 teachers and informal science educators,
3. instruction and development issues in K-16, and
4. leadership positions.

Admission Requirements

Applicants for the STEM MEd degree with a concentration in science education must submit a completed application specific to the program. No GRE is required. Please see the Science Education website for details. The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific program.

Student Financial Support

A small number of scholarships may be available through the College of Education or NC State University. For those who apply for financial aid, there may be some grants available through the university. Please discuss these opportunities directly with program area faculty.

Science, Technology, Engineering, and Mathematics Education

The STEM Education Program offers a Master's of Education (MEd) with concentration in Science Education, Engineering and Technology Education, and Mathematics and Statistics Education. We prepare educators and researchers for positions as teachers, leaders, and university faculty of the highest quality. We are particularly proud of our emphasis on the use of technology to enhance teaching. Students take courses in their educational specialty and in academic discipline areas.

Our Master's program (MEd) leads to North Carolina M-licensure as a teacher of science at grades 6-12 or advanced credentials for informal

educators. Programs are also available for those seeking advanced graduate-level certification as a teacher. Finally, students may design a program to prepare for teaching careers in post-secondary education.

Some of our students elect to move directly from our master's into our doctoral program in Learning and Teaching in STEM – Science Education, Engineering and Technology Education or Mathematics and Statistics Education. These students are knowledge-seekers and are eager to pursue educational problems and develop critical thinking skills in a collaborative environment. The programs prepare individuals for positions in their fields of study related to:

1. scholarly inquiry and discourse in science education,
2. preparation of K-12 teachers and informal science educators,
3. instruction and development issues in K-16, and
4. leadership positions.

Admission Requirements

Applicants for the M.Ed. degree must submit a completed application specific to the program concentration. No GRE is required. Please see the concentration degree requirements pages for more information:

- Science Education (p. 337)
- Engineering and Technology Education (p. 336)
- Mathematics and Statistics Education (p. 336)

The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific concentration.

Student Financial Support

A small number of scholarships may be available through the College of Education or NC State University. For those who apply for financial aid, there may be some grants available through the university. There are also federal loan forgiveness programs. Please discuss these opportunities directly with program area faculty.

Mathematics Teaching and Learning (Certificate)

The Graduate Certificate in Mathematics Teaching and Learning is an online program that focuses on developing knowledge and instructional approaches in teaching mathematics. The program will primarily serve practicing teachers in middle school through college settings, or those preparing for careers in such settings, who want to expand their expertise related to teaching and learning mathematics. Students will learn how to apply research-based understandings of students' thinking, pedagogical approaches, and broader educational issues (e.g., discourse and equity) to inform practices of teaching content such as geometry, algebra, and statistics.

Plan Requirements

EMS 510	Interactions In the Mathematics Classroom		
EMS 513	Teaching and Learning of Algebraic Thinking		
EMS 514	Teaching and Learning of Geometric Thinking		
EMS 519	Teaching and Learning of Statistical Thinking		
EMS 580	Teaching Mathematics with Technology		
Total Hours		**12**	

Special Education

The department of Teacher Education and Learning Sciences offers master's degrees in Special Education. The Special Education program at NC State prepares students for excellence in teaching, assessment, curriculum development, classroom and behavior management, teaching students with high incidence disabilities, evaluation and professional leadership, as well as other areas of service to students with disabilities and to schools and agencies. Our nationally recognized faculty provides excellent teaching, leadership opportunities, and high standards of performance.

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved any the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Special Education: A 500-800 word statement describing professional goals is required, along with transcripts and reference letters.
Some areas of study require that applicants be qualified to hold a baccalaureate-level teaching license or have teaching experience.
A match to resources and faculty areas of interest and expertise is necessary, since the program is competitive. The Graduate School requires a 3.0 in the undergraduate program.

Degrees

- Special Education (MEd) (p. 338)
- Special Education (MS) (p. 339)
- Special Education (Minor) (p. 339)

- Special Education (Certificate): Multi-Tiered Systems of Support (MTSS) (p. 340)

Special Education (Certificate): Multi-Tiered System of Supports (MTSS)

The Special Education MTSS Online Certificate is a series of four (4) online courses designed to prepare individuals with necessary knowledge and skills related to policies and practices to support the implementation of MTSS. Course content provides enrollees with evidence-based practices and knowledge of tiered intervention services in the context of preparing effective teachers, administrators, and allied professionals who work at the local education agency or state education agency levels. The program is a portal through which participants may ultimately pursue a Master of Education (M.Ed.) or Master of Arts in Teaching (MAT), and/or licensure in special education.

The four online courses in the GCSE:MTSS represent 12 credit hours of graduate-level coursework. No transfer credits from other institutions are allowed to substitute for any of the four courses in this program. All courses must be completed at NC State.

Teacher Education and Learning Sciences

The Ph.D. program in the Department of Teacher Education and Learning Sciences is primarily designed to prepare students for roles as researchers and educators in higher education and industry, or for instructional leadership at school district and state levels. Six program areas of study (focus) are offered by the department: Educational Equity;

Educational Psychology; Elementary Learning Sciences; Learning, Design, & Technology; Literacy & English Language Arts; and Social Studies Education.

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved by the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Teacher Education and Learning Sciences: A 500-800 word statement describing professional goals and research interests is required, along with transcripts and reference letters. Some areas of study require that applicants be qualified to hold a baccalaureate-level teaching license or have teaching experience. A match to resources and faculty areas of interest and expertise is necessary since the program is competitive. The Graduate School requires a 3.0 in the undergraduate program. GRE scores not more than five years old are required for the doctoral program.

Doctoral Degree Requirements

Teacher Education and Learning Sciences: A minimum of 72 course credit hours beyond a bachelor's degree is required. For students with a master's degree, at least 60 new hours must be taken after the student matriculates into the doctoral program. The 60-hour program includes 12 hours of scholar leader courses (college and departmental levels), 15 hours of research, 24 hours of program area specialty courses, and 9 hours of dissertation credit.

Student Financial Support

Teaching and Research Assistantships are available on a limited basis.

Teaching

The Master of Arts in Teaching (MAT) program is an accelerated program with a 100% online option that will prepare you to apply your experience to make a difference from your first day in the classroom, whether you're teaching in-person, remotely or both. The content areas being served by the MAT program are:

- Secondary Math, Science, Social Studies, and English;
- Middle Grades Math, Science, Social Studies, and Language Arts;
- English as a Second Language;
- Special Education;
- Technology Education and Elementary Education.

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved any the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Applicants must have:

1. a four-year degree from a college or university that holds regional accreditation, such as SACS;
2. 3.00 GPA or higher in prior work, as required by the Graduate School;
3. an undergraduate degree in the content area/discipline or 24 semester hours/credits in content relevant to the area in which you wish to teach (if you have fewer than 24 hours in a relevant content field, or if your course work does not prepare you adequately to teach the North Carolina curriculum, you may be assigned additional course work to overcome the deficiency).

Applications require original transcripts, 3 letters of recommendation (one of which should speak to teaching potential), a personal essay stating applicant’s background and goals, GRE scores are only required if undergraduate GPA is below 3.0 (and TOEFL if you have international citizenship), and a completed online application.

Master's Degree Requirements

A total of 30-33 credit hours must be earned for completion of the degree, depending on the particular licensure area. These hours include student teaching for non-lateral entry students.

Student Financial Support

Financial aid is available.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Technology Education

The Technology Education Program offers a Master's of Education – Distance Education concentration in Technology Education. We prepare educators and researchers for positions as teachers, leaders, and university faculty of the highest quality. We are particularly proud of our emphasis on the use of technology to enhance teaching. Students take courses in their educational specialty, in general professional education, and in academic discipline areas including: computer science, engineering, graphic arts, and statistics.

Our master's program can lead to initial teaching licensure. The program can be designed to lead to North Carolina M-licensure as a teacher of technology at grades 6-9 and/or 9-12. Programs are also available for those seeking advanced graduate-level certification as a teacher. Finally, students may choose a program to prepare for teaching careers in post-secondary education.

Some of our elect to move directly from our master's into our doctoral program in Learning and Teaching in STEM – Technology Education. These students are knowledge-seekers and are eager to pursue educational problems and develop critical thinking skills in a collaborative environment. The programs prepare individuals for positions in their fields of study related to:

- scholarly inquiry and discourse in their discipline,
- preparation of K-12 teachers,
- instruction and development issues in K-16, and
- leadership positions.

Admission Requirements

Applicants for the Master of Education – Distance Ed degree in Technology Education must submit a completed application to the Graduate School. The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific program.

Master's Degree Requirements

Master's Degree programs require a minimum of 30 semester hours of graduate work. Students who choose the M.S. degree may be able to substitute up to six semester hours of thesis research for part of the course load. The M.Ed. degree is online only.

Student Financial Support

A small number of teaching and research assistantships are available, and out-of-state tuition remission may be available for one year for students on assistantships. Please discuss these opportunities directly with program area faculty.

Degrees

Training & Development

The Master of Education (M.Ed.) degree in Training and Development, a fully online program, is based on a reflective practice approach offering practitioners opportunities to integrate their professional experiences with human resource development knowledge and practice skills. Completing this master's program will give you the professional knowledge and skill required for entry or advancement in instructional design, and instructional, administrative, or evaluation positions that involve performance-based training. Our courses are in alignment with the Association of Talent Development's Core Competency Model.

Our program emphasizes:

- Interaction
- Collaboration
- Team Learning
- Reflective Practice
- Adult Learning

Admission Requirements

Applicants for the M.Ed. degree in Training and Development must complete an application through the Graduate School, submit a personal statement, post-secondary transcripts, and three letters of recommendation. GRE scores are not required. Please see the Training and Development Program website for complete details.

Degrees

- Training & Development (MEd) (p. 369)

Graduate Certificates - College of Education

Certificates

- Counselor Education (Certificate) (p. 307)
- Learning Analytics (Certificate) (p. 343)
- Mathematics Teaching and Learning (Certificate) (p. 337)
- Special Education (Certificate): Multi-Tiered System of Supports (MTSS) (p. 340)
- Teaching, Training, and Educational Technology (Certificate) (p. 316)

Counselor Education (Certificate)

Our innovative online program prepares school teachers, administrators, staff, advisors, tutors in schools and universities, human service workers, and individuals interested in counseling work to advocate and support students, their families, clients and local communities. Our certificate program allows students to learn in a flexible environment, with flexible online classwork, without the hassle of traffic and on-campus parking. Students will meet online each week for a 90-minute interactive discussion with the professor, instructors and classmates, in order to stay connected and challenged. The certificate program alone does not prepare students to work as professional counselors. In order to work in professional counseling, additional classes, training and licensure will be required through a master's degree program.

Admission Requirements

Applicants should have a 3.0 GPA but may be admitted provisionally based on related graduate classes completed in the field of education, human services or training and development, and, ultimately, by earning at least a "B" (3.0) average in the first GCCE class.

- Completed online Graduate School application and admission fee
- Resume outlining education and work experience

Applications are considered to begin the GCCE program in ***Summer II (Application Deadline of May 16 by 5 pm) or Fall (Application deadline of August 15 by 5 pm)***. These two main points serve as a great way to begin the GCCE program with registration for either Orientation to Professional Counseling, Identity, and Ethics (Summer II) or Multicultural Lifespan Development (Fall). If there are available seats throughout the rest of the academic year, it might be possible for a few students to begin the GCCE program during Summer I or Spring semesters.

Email us at ncsu_gcce@ncsu.edu with any questions.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**13**	
ECD 510	Orientation to Professional Counseling, Identity, and Ethics		
ECD 575	Multicultural Lifespan Development		
ECD 530	Theories and Tech of Counseling		
ECD 525	Multicultural Counseling		
Total Hours		**13**	

Mathematics Teaching and Learning (Certificate)

The Graduate Certificate in Mathematics Teaching and Learning is an online program that focuses on developing knowledge and instructional approaches in teaching mathematics. The program will primarily serve practicing teachers in middle school through college settings, or those preparing for careers in such settings, who want to expand their expertise related to teaching and learning mathematics. Students will learn how to apply research-based understandings of students' thinking, pedagogical approaches, and broader educational issues (e.g., discourse and equity) to inform practices of teaching content such as geometry, algebra, and statistics.

Plan Requirements

Code	Title	Hours	Counts towards
Select four of the following:		12	
EMS 510	Interactions In the Mathematics Classroom		
EMS 513	Teaching and Learning of Algebraic Thinking		
EMS 514	Teaching and Learning of Geometric Thinking		
EMS 519	Teaching and Learning of Statistical Thinking		
EMS 580	Teaching Mathematics with Technology		
Total Hours		**12**	

Teaching, Training, and Educational Technology (Certificate)

Delivered 100% online, the Certificate consists of five 3-credit courses focused on teaching, training, and the use of technology in a variety of educational environments. Students can tailor the program to meet their needs and gain the knowledge and skills necessary to design and deliver course-related content through face-to-face, technology-enhanced, and e-learning environments. The program is designed for mid-career individuals who may be without academic preparation for their current positions, or for those choosing to increase their knowledge and skills in the field for future job opportunities.

Students may choose one of the following specialty areas:

- Training and Development,
- Instructional Design,
- E-Learning,
- Community College Teaching,
- and Community College Leadership.

In order to be awarded the Certificate, all required courses must be taken and one elective is allowed. Transfer credit from other institutions is not allowed.

Plan Requirements

Students can choose courses from the following specializations:

- Talent Development (p. 316)
- Instructional Design (p. 316)
- E-Learning / Educational Technology (p. 317)
- Community College Teaching (p. 317)
- Community College Leadership (p. 317)

Certificates earned will be distributed as: "Graduate Certificate in Teaching, Training, and Educational Technology" without focus area specifications.

Talent Development

Code	Title	Hours	Counts towards

- ASIC Design & Verification (Certificate) (p. 477)
- Computer Engineering (Certificate) (p. 435)
- Computer Science (Certificate) (p. 455)
- Cybersecurity (Certificate) (p. 227)
- Data Science Foundations (Certificate) (p. 457)
- Downstream Biomanufacturing (Certificate) (p. 386)
- Electrical Engineering (Certificate) (p. 479)
- Engineering Management Foundations (Certificate) (p. 501)
- Health Physics (Certificate) (p. 572)
- Materials Informatics (Certificate) (p. 540)
- Materials Science and Engineering (Certificate) (p. 540)
- Nano-Systems Engineering (Certificate) (p. 481)
- Nanobiotechnology (Certificate) (p. 392)
- Performance Based Earthquake Engineering (Certificate) (p. 425)
- Renewable Electric Energy Systems (Certificate) (p. 482)
- Upstream Biomanufacturing (Certificate) (p. 386)

Aerospace Engineering

Graduate students in the Aerospace Engineering program focus on aircraft and space systems design, analysis, and manufacturing. Students can select course offerings and research programs in aerodynamics and applied aerodynamics; aerospace propulsion; computational fluid dynamics; dynamics and design of spacecraft and space systems; flight dynamics and control; and multifunctional materials and smart structures. Sub-areas include acoustics, sprays, composite materials, reactive and multiphase flows, stability, and transition to turbulence.

Admission Requirements

An applicant to the master's program must be a graduate of an accredited undergraduate program with a B.S. degree in either mechanical or aerospace engineering. Graduates of other accredited programs in engineering, physical sciences and mathematics may be considered but may be required to make up undergraduate deficiencies without graduate credit. Provisional admissions, as well as exceptions, are sometimes granted under special circumstances. The most qualified applicants are accepted first. Applicants to the Ph.D. program must have met the M.S. admission requirements and additionally must satisfy the Ph.D. admissions requirements. Applicants to the online, distance education M.S. program in mechanical or aerospace engineering are not required to take the GRE exam.

Master's Degree Requirements

The thesis-option M.S. degree program in aerospace engineering requires 21 hours of course credit and nine hours of thesis research. The non-thesis M.S. degree requires 27 hours of course credit and a three credit-hour project and is offered on campus as well as off campus, through distance education.

Ph.D. Degree Requirements

A minimum of 72 hours of credit are required to obtain the Ph.D. degree. A direct path to the Ph.D. from the B.S. is also available with which the student is granted the M.S. degree “enroute” to the Ph.D. The enroute Ph.D. (direct to Ph.D. path) requires a minimum of 3.5 undergraduate GPA.

Student Financial Support

Financial aid is offered to all admitted Ph.D. students.

Degrees

- Aerospace Engineering (MS) (p. 376)
- Aerospace Engineering (PhD) (p. 377)
- Aerospace Engineering (Minor) (p. 378)

MAE 695	Master's Thesis Research		
Total Hours		**30**	

* "Required Courses" may include up to three non-MAE courses approved by the Director of Graduate Programs

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Biomanufacturing

The Golden LEAF Biomanufacturing Training and Education Center (BTEC) offers two graduate degrees: a thesis-based Master of Science (MS) in Biomanufacturing and a Master of Biomanufacturing (MR). Both are Professional Science Master's (PSM) degrees, which provide advanced education and training in a specific discipline while simultaneously developing business skills highly valued by employers.

Both degrees offer students the choice of upstream (fermentation) or downstream (purification) concentrations to accompany courses in global regulatory affairs, protein characterization techniques, case studies in cGMP manufacturing of influenza vaccine, case studies in monoclonal antibody production, advanced biomanufacturing and biocatalysis, and an industry internship. Both degrees also include professional skills training in effective oral, electronic, and written communications for both technical and business careers. All MBA courses are taught by faculty from the Jenkins Graduate School of Management, a part of NC State's Poole College of Management.

Admission Requirements

Admission to the BIOM program requires completion of an undergraduate degree in engineering, life science or physical sciences, letters of recommendation, and a statement of career goals. A minimum overall grade point average of 3.0 and GRE scores in the 80th percentile are also required. Applicants with previous industry experience or working professionals are strongly encouraged to apply.

Master’s Degree Requirements

Master of Biomanufacturing: BIOM students will complete a minimum of 36 total credit hours including a summer biomanufacturing industry internship, 3 credits of industry practicum case studies, 3 credits of global regulatory affairs and 9 credits of MBA courses in project management, biosciences management and business foundations.

Master of Science: The Master of Science degree requires a minimum of 36 credit hours. Similar to the MR, the BIOM Master of Science curriculum will combine interdisciplinary coursework with 6 MBA credits including a course in project management. In addition, the BIOM Master of Science program will provide more experience in bioprocess development research to familiarize students with the methods, ideals and goals of independent investigation, the concepts of quality by design (QbD), and methods used in industry for design of experiments (DoE) to define design space for industrial processes. As a consequence of the stronger focus on research, BIOM Master of Science students will complete 4 credit hours of industry-focused process research mentored by their BIOM graduate advisor. Each student will submit a written thesis, which will be presented to the student’s BIOM graduate advisory committee.

Student Financial Support

A limited number of full-time participants in the Master of Biomanufacturing program may be eligible for teaching assistantships or industry-sponsored graduate scholarships.

Other Relevant Information

BIOM accepts students in spring and fall semesters. A 10 credit hour graduate minor is also available for NCSU students currently enrolled in thesis-based graduate programs. Two unique 12 credit Graduate Certificates: Upstream Biomanufacturing and Downstream Biomanufacturing are also offered for students currently enrolled in other non-thesis graduate programs.

Degrees

- Biomanufacturing (MR) (p. 380)
- Biomanufacturing (MS) (p. 382)
- Biomanufacturing (Minor) (p. 385)
- Downstream Biomanufacturing (Certificate) (p. 386)
- Upstream Biomanufacturing (Certificate) (p. 386)

Biomanufacturing (MR)

Degree Requirements

Students may choose from the degree tracks below to complete coursework within a focus area.

Degrees earned will be distributed as: "Master of Biomanufacturing" without focus area track specifications.

Code	Title	Hours	Counts towards
Core Courses		**18**	
BEC 575	Global Regulatory Affairs for Medical Products		
BEC 577	Advanced Biomanufacturing and Biocatalysis		
BEC 590	Industry Practicum in Biomanufacturing (two semesters)		
BEC 601	Biomanufacturing Seminar (two semesters) *		
BEC 620	Leadership and Preparation for Industry Internship in Biomanufacturing		
ST 511	Statistical Methods For Researchers I		
BEC 515	Biopharmaceutica Product Characterization Techniques		
or BEC 588	Animal Cell Culture Engineering		
Focus Area Track		**6**	
Select courses from a category listed under "Focus Area Track Courses" below			
Professional Courses		**9**	
BUS 554	Project Management		
Select two of the following courses:			
MBA 585	Current Topics in BioSciences Management		
MBA 586	Legal, Regulatory and Ethical Issues in Life Science Industries		
MBA 590	Special Topics In Business Management		
BUS 501	Strategic Management Foundations		
COM 563	Public Relations Theory		
COM 598	Special Topics In Communication (Intro to Science Communication: Theory/Practice)		
Elective Courses		**3**	
Select three credit hours from "Elective Courses" listed below each focus area category			
Total Hours		**36**	

* BEC 601 is to be repeated twice to meet two total credit hours.

Focus Area Tracks

Upstream Track

Code	Title	Hours	Counts towards

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Downstream Biomanufacturing (Certificate)

Graduate students and working professionals can now earn a new credential to kick-start or advance their career in the biopharmaceutical industry. The Downstream Biomanufacturing graduate certificates offer NC State graduate students and working professionals the opportunity for hands-on learning in BTEC's industry-scale simulated cGMP facilities.

Each certificate requires 12 hours of graduate coursework, which can be transferred to the Master of Biomanufacturing program. The majority of BTEC's graduate courses are offered in the evening or online to better accommodate working professionals.

The certificate can be completed in two part-time semesters.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
BEC 532	Foundations of Downstream Processing and Formulation		
BEC 536	Introduction to Downstream Process Development		
BEC 585	cGMP Downstream Operations

Biomedical Engineering

The Joint Biomedical Engineering Graduate Program is administered by the combined biomedical engineering graduate faculty from both North Carolina State University and University of North Carolina at Chapel Hill. The joint program also has close working relations with the Research Triangle Institute and industry within the Research Triangle area. These associations enable students to obtain research training in a wide variety of fields and facilitate the selection and performance of dissertation research. The department, thus, provides students with excellent opportunities to realize the goal of enhancing medical care through the application of modern technology.

Biomedical engineering is a dynamic field stressing the application of engineering techniques and mathematical analysis to biomedical problems. Faculty research programs are key to the program, and they include five primary research directions: rehabilitation engineering, regenerative medicine, biomedical imaging, microsystems engineering, and pharmacoengineering. The department offers graduate education in biomedical engineering leading to the master of science and doctor of philosophy degrees.

Students enter this program with backgrounds in engineering, physical science, mathematics or biological science. Curricula are tailored to fit the needs and develop the potential of individual students. In addition, courses in statistics, mathematics, life sciences and engineering sciences provide a well-rounded background of knowledge and skills.

Admission Requirements

Students must satisfy all entrance requirements for The Graduate School of the University of North Carolina at Chapel Hill or the Graduate School at North Carolina State University, and must demonstrate interest and capability commensurate with the quality of the biomedical engineering program. Prospective students may apply to the graduate school at either UNC–Chapel Hill or NC State. All applicants are considered together as a group. Generally, applications should be submitted by December 11 for consideration for admission in the coming fall semester. Applicants are expected to present Graduate Record Examination (GRE) scores; verbal scores should be at or above the 50th percentile and quantitative scores should be at or above the 70th percentile to be competitive. Admitted students are expected to have an average grade of B (cumulative GPA 3.30) or better and are encouraged to have undergraduate research experience. The program requires that a one-to-three page personal statement about research interest and background be submitted.

Students should have a good working knowledge of mathematics at least through differential equations, plus two years of physical or engineering science and basic courses in biological science. Deficiencies in preparation can be made up in the first year of graduate training

Doctoral Degree Requirements

A minimum of 52 semester hours of graduate work is required (beyond the Bachelor's degree). Degree candidates in this program are expected to obtain experience working in a research laboratory during their residence and to demonstrate proficiency in research. The Ph.D. dissertation should be judged by the graduate committee to be of publishable quality. The student must meet the Graduate School's residency requirement at UNC-CH or NC State as appropriate. Further information on the BME Ph.D. program can be found on the department website.

Required and highly recommended courses

Students are required to take a BME Seminar each semester which is offered at both UNC-CH and NC State. Students must also complete six credits of graduate engineering topics, six credits of graduate life science topics, three credits of engineering mathematics, and three credits of statistics. Students may choose from a number of courses to meet these requirements. Such choices are made in consultation with the student's academic advisor and the Director of Graduate Programs/Studies.

Comprehensive and Qualifying Examinations

Doctoral students qualify for the Ph.D. degree by meeting grade requirements in their core courses, and then advance on to written and oral preliminary exams before admission to candidacy. Details can be found on the department website.

Degrees

- Biomedical Engineering (MS): Translation Innovation and Entrepreneurship Concentration (p. 388)
- Biomedical Engineering (PhD) (p. 390)
- Biomedical Engineering (Minor) (p. 391)
- Nanobiotechnology (Certificate) (p. 392)

Nanobiotechnology (Certificate)

With financial support from the North Carolina Biotechnology Center, UNC-Chapel Hill and NC State University offer graduate certificates in nanobiotechnology. Tremendous advances in development of nanoscale, nanostructured, and nano-enabled materials for biotechnology applications are currently taking place. In particular, the development of advanced materials (e.g., electronic materials, optical materials, biologically-derived materials, and nanoscale materials) will allow for the development of next generation systems for use in medicine, homeland defense, and agriculture. These systems will provide integration of multiple functions, miniaturization of devices, an increase in stability, and a decrease in cost. In order for universities, companies, and governmental agencies to pursue this highly specialized work, students must be trained at the graduate level to perform work at the interface of nanoscale science and biotechnology. The nanobiotechnology certificates are aligned with the need for highly trained professionals to nurture rapid growth of nanobiotechnology infrastructure in North Carolina. The keystone of the certificates at both universities is a core nanobiotechnology course (BME 540, 3 credit hours), in which lectures, open discussion, and student presentations will be used to introduce students to this area of study.

Plan Requirements

Code	Title	Hours	Counts towards
BME 540	Nanobiotechnology Processing, Characterization, and Applications	3	
Select nine hours of electives:		9	
BEC/CHE 562	Fundamentals of Bio-Nanotechnology (courses also offered at UNC-CH)		
CH 747	Nanobiotechnolog		
BIT 501	Ethical Issues in Biotechnology		
BME 566	Polymeric Biomaterials Engineering		
MSE 539	Advanced Materials		
Total Hours		**12**	

Chemical Engineering

Research activities in the department include: computational nanoscience and biology; biomolecular engineering and biotechnology; catalysis, combustion, kinetics and electrochemical engineering; biofuels and renewable energy technology; green chemistry and engineering; innovative textiles, polymers and colloids; nanoscience and nanoengineering; and thermodynamics and molecular simulation.

Admissions Requirements

Students admitted to the graduate program normally have a Bachelor's degree in chemical engineering or its equivalent. Students with undergraduate degrees in chemistry, physics or other engineering disciplines may be admitted but will be required to make up undergraduate course work deficiencies in chemical engineering without graduate credit. The most promising candidates will be accepted up to the number of spaces available.

Master of Science Degree Requirements

The M.S. degree requires a minimum of 30 credit hours. A set of four core courses is required. Two options are provided. In the thesis option, the thesis must be defended in a final public oral examination. In the non-thesis option, the student must satisfactorily complete a total of 10 graduate courses. A unique feature of the non-thesis option is the availability of a Distance Education Masters in which the students can complete all 30 credit hours remotely through online courses offered via streaming videos without being on campus.

Master of Chemical Engineering Degree Requirements

The M.Ch.E. degree requires a minimum of 30 credit hours. A set of four core courses is required. A three-credit project is also required.

Doctor of Philosophy Degree Requirements

Students normally take a set of five core courses, two advanced courses and at least 6 credits of dissertation research. A thesis is required; this must be defended in a final public oral examination. In addition, the candidate must: (1) submit and defend an original written proposition in any area of chemical engineering, and (2) submit and defend a proposal to perform his/her thesis research.

Degrees

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Civil Engineering

Graduate programs are offered in coastal and water resources engineering, computing and systems, construction engineering and management, environmental engineering, geotechnical and geoenvironmental engineering, mechanics and materials, structural engineering and mechanics, transportation engineering and materials.

Degrees earned will be distributed as: "Master of Civil Engineering", "Master of Science," and "Doctor of Civil Engineering" without specialization specifications.

Admission Requirements

Normal minimum GPA requirements include 3.0 overall and in the major. Students who do not meet these academic requirements may take graduate courses through the Non Degree Studies program to demonstrate academic ability, but consultation with the Director of Graduate Programs is strongly advised. Applicants without academic experience in civil engineering, construction engineering, or environmental engineering may be required to take undergraduate courses to remove deficiencies, but graduate credit is not given for these courses. The Graduate Record Examination is required for all international applicants and all applicants to the PhD, MSCE, or MSENE degree programs.

Master's Degree Requirements

Four Master's degrees, requiring a minimum of 30 or 31 credit hours, are available. At least two-thirds of a Master's program should be in a well-defined major area of concentration. The MCE is a non-thesis (Option B) degree with other requirements, such as independent projects or core courses, specified in some areas of specialization. A formal minor is not permitted. The MCE is available both on-campus and through distance education. The MSCE degree requires a thesis and a formal minor is optional. Requirements for the MENE and MSENE are the similar to those for the CE degrees.

Doctoral Degree Requirements

The Ph.D. typically requires one year of full-time course work beyond the master's degree and research culminating in a dissertation. The program must develop a well-defined major area of concentration and may include supporting courses outside the major or a formal minor in a related field. All specialty areas, including Environmental Engineering, are included in the one Ph.D. program.

Student Financial Support

Departmental teaching and research assistantships are available including coverage of tuition and health insurance. Fellowships -- full or supplemental to an assistantship -- are available for exceptional applicants. All financial aid recipients are selected on merit-based competition with other applicants. Applications requesting financial aid (both U.S. and international) should be submitted early: December 15 for Fall admission and by July 15 for Spring admission.

Degrees

- Civil Engineering (MR) (p. 403)
- Civil Engineering (MS) (p. 412)
- Civil Engineering (PhD) (p. 422)
- Civil Engineering (Minor) (p. 423)
- Performance Based Earthquake Engineering (Certificate) (p. 425)

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

CCEE Department ABM Admission

The CCEE department encourages excellent undergraduate students to obtain a master's degree in their chosen field of specialization within 2 to 3 semesters past BS graduation, through double counting up to 9 credit hours towards both bachelor's and master's degrees. This is referred to as the Accelerated Bachelor's/Master's (ABM) degree program. Following is the pathway for the ABM program.

Step 1 – Verify your eligibility for applying to the ABM program

- You must have completed at least 75 credit hours (this typically means junior standing)
  - If you are a transfer student, you must have completed at least two semesters at NCSU, earning a minimum of 24 credit hours
- You must not have already received a BS degree
- You must have an overall GPA # 3.5 and major GPA # 3.25

Step 2 – Apply for ABM by following the steps below

- Determine your area of interest from the list of graduate specialty areas on the next page.
- Talk to the ABM advisor in the specialty area (provided below), and agree on a tentative ABM Plan of Work (POW) that would suit your interests and satisfy the ABM requirements. A finalized ABM POW must be in place before completion of the BS degree.
- Submit an application at go.ncsu.edu/ccee-abm (https://applygrad.ncsu.edu/register/?id=4d63529c-6ad8-4680-9655-e4e49554ac56), which includes the tentative ABM POW.
  - The application will first be reviewed by the ABM advisor and a recommendation will be made to the department. The final determination will be made after a joint review by the directors of undergraduate and graduate programs, after which you will be notified.

Step 3 – While in the ABM program, maintain status by following the steps below:

- With the specialty area ABM advisor's help, prepare a tentative Graduate POW, that complements the Undergraduate POW.
  - Up to 9 credit hours can be double counted, they must be at the 500 level, and they must be selected from the approved list of courses in the specialty area (provided in the subsequent pages).
  - The (tentative) Graduate POW must be formally approved by the ABM advisor.
- It is your responsibility to ensure that both the Graduate POW and Undergraduate POW satisfy the respective master's and undergraduate degree requirements
- You must maintain an overall GPA # 3.5 and a major GPA # 3.25 until you enter the master's program.
- Only graduate courses with a grade # B can be double counted. Courses with a grade # B- cannot be counted towards the master's degree.
- Towards the end of your bachelor's program, you must formally apply to the master's program, per deadlines published by the graduate school. Note that the GRE may be waived for ABM students – consult with your ABM advisor. The application must include to include a

completed and signed ABM Plan of Work (https://grad.ncsu.edu/wp-content/uploads/2015/11/abm-plan-of-work.pdf).

- You must complete the master's degree within a time limit (12 months if MCE/MENE, 18 months if MSCE/MSENE), to take advantage of the double counting associated with the ABM. If you do not graduate within this time, you will be considered a regular master's student needing to take the full 30/31 graduate credits solely towards your master's degree.

Graduate Specialty Areas for ABM

Degrees earned will be distributed as: "Master of Civil Engineering" without specialization specifications.

- Computing and Systems
- Construction Engineering
- EWC – Air
- EWC – Environmental Process Engineering
- EWC – Water Resource and Coastal Engineering
- Geotechnical Engineering
- Structural Engineering and Mechanics
- Transportation Materials
- Transportation Systems

Allowable Courses by Specialty Area

Computing Systems

Code	Title	Hours	Counts towards
CE 536	Introduction to Numerical Methods for Civil Engineers		
CE 537	Computer Methods and Applications		
CE 538	Information Technology and Modeling		
CE 590	Special Topics In Civil Engineering (Civil Engineering Systems)		

Construction Engineering

Code	Title	Hours	Counts towards
CE 561	Construction Project Management		
CE 562	Lean Construction Concepts and Methods		
CE 564	Legal Aspects of Contracting		
CE 565	Construction Safety Management		
CE 567	Risk and Financial Management in Construction		
CE 592	Special Topics in Construction Engineering		

Other courses may selected and approved in conjunction with the academic committee, examples include but are not subject to:

CE 515	Advanced Strength of Materials		
CE 522	Theory and Design Of Prestressed Concrete		
CE 523	Theory and Behavior Of Steel Structures		
CE 524	Analysis and Design Of Masonry Structures		
CE 548	Engineering Properties Of Soils I		

EWC – Air

Code	Title	Hours	Counts towards
CE 576	Engineering Principles Of Air Pollution Control *		
CE 578	Energy and Climate *		
CE 579	Principles of Air Quality Engineering *		

EWC – Environmental Process eNGINEERING

Code	Title	Hours	Counts towards
CE 571	Physical Principles of Environmental Engineering		
CE 573	Biological Principles of Environmental Engineering		
CE 574	Chemical Principles of Environmental Engineering		

CE 577	Engineering Principles Of Solid Waste Management *		
CE 578	Energy and Climate *		
CE 596	Special Topics in Water Resource and Environmental Engineering (Global Sanitation) *		

EWC – Water Resources, Coastal

Code	Title	Hours	Counts towards
CE 581	Fluid Mechanics in Natural Environments		
CE 583	Engineering Aspects Of Coastal Processes		
CE 584	Hydraulics Of Ground Water		
CE 586	Engineering Hydrology		
CE 588	Water Resources Engineering *		
CE 596	Special Topics in Water Resource and Environmental Engineering (Coastal Hydrodynamics) *		
CE 596	Special Topics in Water Resource and Environmental Engineering (Coastal Modeling)		
CE 596	Special Topics in Water Resource and Environmental Engineering (Surface Water Quality Modeling)		

Geotechnical Engineering

Code	Title	Hours	Counts towards
CE 548	Engineering Properties Of Soils I		
CE 584	Hydraulics Of Ground Water		
CE 593	Special Topics in Geotechnical Engineering (Dynamics of Soils and Foundations)		
Other courses may selected and approved in conjunction with the academic committee, examples include but are not subject to:			
CE 515	Advanced Strength of Materials		
CE 526	Finite Element Method in Structural Engineering		
CE 577	Engineering Principles Of Solid Waste Management		

Structural Engineering and Mechanics

Code	Title	Hours	Counts towards
CE 515	Advanced Strength of Materials		
CE 522	Theory and Design Of Prestressed Concrete		
CE 523	Theory and Behavior Of Steel Structures		
CE 524	Analysis and Design Of Masonry Structures		
CE 525	Advanced Structural Analysis		
CE 526	Finite Element Method in Structural Engineering		
CE 527	Structural Dynamics		
CE 528	Structural Design in Wood		
CE 529	FRP Strengthening and Repair of Concrete Structures		

CE 530	Properties of Concrete and Advanced Cement-Based Composites		

Transportation Materials

Code	Title	Hours	Counts towards
CE 515	Advanced Strength of Materials		
CE 530	Properties of Concrete and Advanced Cement-Based Composites		
CE 548	Engineering Properties Of Soils I		
CE 595	Special Topics in Transportation Engineering (A - Asphalt and Bituminous Materials)		

Transportation Systems

Code	Title	Hours	Counts towards
CE 501	Transportation Systems Engineering *		
CE 502	Traffic Operations *		
CE 503	Highway Design *		
CE 504	Airport Planning and Design		
CE 505	Railroad System Planning, Design, and Operation		
CE 509	Highway Safety		

* This course is not a prerequisite but recommended to be completed prior to enrollment.

Master of Science Degree Requirements

Students may choose from the specializations below to complete coursework within a focus area.

Degrees earned will be distributed as: "Master of Science" without specialization specifications.

Computing & Systems Specialization

- Select at least five courses in the CE department

Code	Title	Hours	Counts towards
Core Courses			
Select a minimum of two courses of the following:		6	

CE 536	Introduction to Numerical Methods for Civil Engineers	
CE 537	Computer Methods and Applications	
CE 591	Special Topics in Civil Engineering Computing	
CE 737	Computer-Aided Engineering Systems	
CE 791	Advanced Topics in Civil Engineering Computing (High performance computer modeling)	
CE 791	Advanced Topics in Civil Engineering Computing (Evolutionary computation)	
CE 791	Advanced Topics in Civil Engineering Computing (Inverse modeling)	
CE 791	Advanced Topics in Civil Engineering Computing (Advanced methods for systems analysis)	
CE 7XX	Complex adaptive systems analysis	
Electives [1]		
CE 775	Modeling and Analysis Of Environmental Systems	3
CE 776	Advanced Water Management Systems	3
CE 796	Advanced Topics in Water Resource and Environmental Engineering (Stochastic Methods)	3
CE 724	Probabilistic Methods Of Structural Engineering	3
CE 721	Matrix and Finite Element Structural Analysis	3
Electives [2]		
ISE 501	Introduction to Operations Research	3
MA/ISE 505	Linear Programming	3
ISE 708	Integer Programming	3
ISE 709	Dynamic Programming	3
ISE 712	Bayesian Decision Analysis For Engineers and Managers	3
MA 501	Advanced Mathematics for Engineers and Scientists I	3
MA 502	Advanced Mathematics for Engineers and Scientists II	3
MA/CSC 580		3
MA/CSC 583	Introduction to Parallel Computing	3
MA 584	Numerical Solution of Partial Differential Equations--Finite Difference Methods	3
MA 587	Numerical Solution of Partial Differential Equations--Finite Element Method	3
MA/ST 706	Nonlinear Programming	3
CSC 501	Operating Systems Principles	3
CSC 548	Parallel Systems	3
Thesis Research		
CE 695	Master's Thesis Research	3-6
Total Hours		**66-69**

[1] Other relevant departmental courses

[2] Other recommended courses

Construction Engineering Specialization

Code	Title	Hours	Counts towards
Select a minimum of seven courses CON XXX		21	
Select one of the following:		3	
CON XXX			
CE 536	Introduction to Numerical Methods for Civil Engineers		
CE 537	Computer Methods and Applications		
CE 538	Information Technology and Modeling		
CE 592	Special Topics in Construction Engineering		
CE 522	Theory and Design Of Prestressed Concrete		
CE 523	Theory and Behavior Of Steel Structures		
CE 524	Analysis and Design Of Masonry Structures		
CE 528	Structural Design in Wood		
CE 548	Engineering Properties Of Soils I		
CE 549	Soil and Site Improvement		
CE 744	Foundation Engineering		
CE 503	Highway Design		
CE 504	Airport Planning and Design		
CE 755	Highway Pavement Design		
CE 590	Special Topics In Civil Engineering		
ISE 501	Introduction to Operations Research		
ISE 510	Applied Engineering Economy		
ISE 562	Simulation Modeling		
ST 515	Experimental Statistics for Engineers I		
ST 516	Experimental Statistics For Engineers II		
EGR 590	Special Topics in Engineering		
CE 675	Civil Engineering Projects (3 hours maximum)	3	
CE 695	Master's Thesis Research	6	
Total Hours		**33**	

Environmental, Water Resources, and Coastal Engineering Specialization

- 30 graduate-level credit hours

Code	Title	Hours	Counts towards
CE 607	Water Resource and Environmental Engineering Seminar	1	
CE 695	Master's Thesis Research	1-6	
Total Hours		**2-7**	

Geotechnical and Geoenvironmental Engineering Specialization

- 30 graduate-level credit hours

Code	Title	Hours	Counts towards
CE 695	Master's Thesis Research	6	
Total Hours		**6**	

Mechanics and Materials Specialization

- 30 graduate-level credit hours

Code	Title	Hours	Counts towards
CE 695	Master's Thesis Research	1-6	
Total Hours		**1-6**	

Structural Engineering and Mechanics Specialization

Code	Title	Hours	Counts towards
Core Courses			
CE 515	Advanced Strength of Materials	3	

CE 526	Finite Element Method in Structural Engineering	3
CE 527	Structural Dynamics	3
Select one of the following SEM Behavior and Design courses:		3
CE 522	Theory and Design Of Prestressed Concrete	
CE 523	Theory and Behavior Of Steel Structures	
CE 524	Analysis and Design Of Masonry Structures	
CE 528	Structural Design in Wood	
CE 529	FRP Strengthening and Repair of Concrete Structures	
CE 726	Advanced Theory Of Concrete Structures	
CE 794	Advanced Topics in Structures and Mechanics	
Select two of the following additional SEM courses:		6
CE 525	Advanced Structural Analysis	
CE 721	Matrix and Finite Element Structural Analysis	
CE 530	Properties of Concrete and Advanced Cement-Based Composites	
CE 714	Stress Waves	
CE 718	Constitutive Modeling of Engineering Materials	
CE 730	Mechanics and Failure of Quasi-Brittle Materials	
CE 723	Advanced Structural Dynamics	
CE 724	Probabilistic Methods Of Structural Engineering	
CE 725	Earthquake Structural Engineering	
CE 522	Theory and Design Of Prestressed Concrete	
CE 523	Theory and Behavior Of Steel Structures	
CE 524	Analysis and Design Of Masonry Structures	
CE 528	Structural Design in Wood	
CE 529	FRP Strengthening and Repair of Concrete Structures	
CE 726	Advanced Theory Of Concrete Structures	
CE 794	Advanced Topics in Structures and Mechanics	
Electives		
CE 695	Master's Thesis Research	1-6
Total Hours		**19-24**

Electives

Thesis Research			
Select up to six credit hours		1-6	

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

CCEE Department ABM Admission

The CCEE department encourages excellent undergraduate students to obtain a master's degree in their chosen field of specialization within 2 to 3 semesters past BS graduation, through double counting up to 9 credit hours towards both bachelor's and master's degrees. This is referred to as the Accelerated Bachelor's/Master's (ABM) degree program. Following is the pathway for the ABM program.

Step 1 – Verify your eligibility for applying to the ABM program

- You must have completed at least 75 credit hours (this typically means junior standing)
  - If you are a transfer student, you must have completed at least two semesters at NCSU, earning a minimum of 24 credit hours
- You must not have already received a BS degree
- You must have an overall GPA # 3.5 and major GPA # 3.25

Step 2 – Apply for ABM by following the steps below

- Determine your area of interest from the list of graduate specialty areas on the next page.

- Talk to the ABM advisor in the specialty area (provided below), and agree on a tentative ABM Plan of Work (POW) that would suit your interests and satisfy the ABM requirements. A finalized ABM POW must be in place before completion of the BS degree.
- Submit an application at go.ncsu.edu/ccee-abm (https://applygrad.ncsu.edu/register/?id=4d63529c-6ad8-4680-9655-e4e49554ac56), which includes the tentative ABM POW.
  - The application will first be reviewed by the ABM advisor and a recommendation will be made to the department. The final determination will be made after a joint review by the directors of undergraduate and graduate programs, after which you will be notified.

Step 3 – While in the ABM program, maintain status by following the steps below:

- With the specialty area ABM advisor's help, prepare a tentative Graduate POW, that complements the Undergraduate POW.
  - Up to 9 credit hours can be double counted, they must be at the 500 level, and they must be selected from the approved list of courses in the specialty area (provided in the subsequent pages).
  - The (tentative) Graduate POW must be formally approved by the ABM advisor.
- It is your responsibility to ensure that both the Graduate POW and Undergraduate POW satisfy the respective master's and undergraduate degree requirements
- You must maintain an overall GPA # 3.5 and a major GPA # 3.25 until you enter the master's program.
- Only graduate courses with a grade # B can be double counted. Courses with a grade # B- cannot be counted towards the master's degree.
- Towards the end of your bachelor's program, you must formally apply to the master's program, per deadlines published by the graduate school. Note that the GRE may be waived for ABM students – consult with your ABM advisor. The application must include to include a completed and signed ABM Plan of Work (https://grad.ncsu.edu/wp-content/uploads/2015/11/abm-plan-of-work.pdf).
- You must complete the master's degree within a time limit (12 months if MCE/MENE, 18 months if MSCE/MSENE), to take advantage of the double counting associated with the ABM. If you do not graduate within this time, you will be considered a regular master's student needing to take the full 30/31 graduate credits solely towards your master's degree.

Graduate Specialty Areas for ABM

Degrees earned will be distributed as: "Master of Civil Engineering" without specialization specifications.

- Computing and Systems
- Construction Engineering
- EWC – Air
- EWC – Environmental Process Engineering
- EWC – Water Resource and Coastal Engineering
- Geotechnical Engineering
- Structural Engineering and Mechanics
- Transportation Materials
- Transportation Systems

Allowable Courses by Specialty Area

COMPUTING SYSTEMS

Code	Title	Hours	Counts towards
CE 536	Introduction to Numerical Methods for Civil Engineers		
CE 537	Computer Methods and Applications		
CE 538	Information Technology and Modeling		
CE 590	Special Topics In Civil Engineering (Civil Engineering Systems)		

CONSTRUCTION ENGINEERING

Code	Title	Hours	Counts towards
CE 561	Construction Project Management		
CE 562	Lean Construction Concepts and Methods		
CE 564	Legal Aspects of Contracting		
CE 565	Construction Safety Management		
CE 567	Risk and Financial Management in Construction		
CE 592	Special Topics in Construction Engineering		
Other courses may selected and approved in conjunction with the academic committee, examples include but are not subject to:			
CE 515	Advanced Strength of Materials		
CE 522	Theory and Design Of Prestressed Concrete		
CE 523	Theory and Behavior Of Steel Structures		
CE 524	Analysis and Design Of Masonry Structures		

CE 548	Engineering Properties Of Soils I		

EWC – AIR

Performance Based Earthquake Engineering (Certificate)

Plan Requirements

Code	Title	Hours	Counts towards
Core Courses		**6**	
CE 527	Structural Dynamics		
CE 725	Earthquake Structural Engineering		
Elective Courses		**6**	
Select at least two of the following courses:			
CE 723	Advanced Structural Dynamics		
CE 727	Seismic Analysis, Assessment, and Design of Concrete Buildings		
CE 728	Performance Based Seismic Design of Bridges		
CE 593	Special Topics in Geotechnical Engineering (Dynamics of Soils and Foundations)		
CE 746	Soil Dynamics and Earthquake Engineering		
Total Hours		**12**	

Computer Engineering

The Master of Science in Computer Engineering may be earned with thesis option or through the non-thesis option. Either option may be used as preparation for further graduate study or employment in industrial research, development or design.

Also a strong Ph.D. program is available for those who wish to pursue a research and/or teaching career in Industry, Government or Academia.

Admissions Requirements

Admission to the M.S. program requires a B.S. in electrical engineering, computer engineering or computer science, and an overall undergraduate GPA of at least 3.0. For non-native English speakers, the minimum acceptable TOEFL score for admission to the M.S. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but may be waived upon request for graduates from US Universities (see below). Admission is further limited by available room in the elected program of study. Meeting the above minimum requirements alone does not guarantee admission.

Applicants to the Master's and PhD programs who do not have a Bachelor's degree in Electrical Engineering or Computer Engineering, but have a closely related degree from an accredited college or university, must have taken the following pre-requisite courses: courses equivalent to ECE 109, ECE 209, ECE 212, ECE 220, ECE 301, ECE 302, ECE 309 and CSC 226.

GRE scores within the last four years of the date of anticipated admission. Guideline for minimal GRE percentile scores are 70 percentile verbal, 90 percentile quantitative, and 50 percentile analytical or writing. GRE scores for students who are graduates from NC State may be waived. They also might be waived for graduates from US ABET accredited programs with good GPAs.

All international applicants from non English speaking countries must submit TOEFL scores. The TOEFL must have been taken within two years of the date of anticipated admission. On the TOEFL iBT, students must have a minimum of 18 on each section of the test with a minimum total of 90. Scores on previous versions of the TOEFL are considered with the same qualitative standard. On the IELTS, we require a minimum score of 6.5 in each section. This requirement also applies to US citizens

whose principal language of instruction has not been English (for example, most applicants from Puerto Rico and the Virgin Islands).

TOEFL - institution code 5496; department code 66
GRE - institution code 5496; department code 1203

Admission to the Ph.D. program requires a B.S. or M.S. in electrical engineering, computer engineering or computer science with an expectation of an overall GPA of at least 3.25. The minimum acceptable TOEFL score for admission to the Ph.D. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but might be waived for NC State graduates or graduates from other US ABET accredited schools with good GPAs. Admission is further limited by available room in the elected program of study, and meeting the minimum requirements as given above does not guarantee admission.

Master's Degree Requirements

Thirty-one (31) credit hours; a thesis is optional. Students must have at least 21 hours of ECE courses that cover at least three specialty areas and have at least three credit hours of advanced-level (700-level) ECE courses. Students electing the Option B non-thesis option must meet core course requirements; have ECE courses that cover at least three specialty areas' and have at least three credit hours of 700-level ECE courses.

The Master's degree is offered online through Engineering Online. Applications to these MS on-line programs are through the ECE Department and all students must comply with ECE program requirements.

Doctoral Degree Requirements

Approximately 54 credit hours are required beyond the M.S. degree or 72 credit hours beyond the B.S. degree. For those with an NC State MS degree in our department, no additional courses are required. For those with an NC State MS degree in another department, 6 credit hours are required in our department. For those with a non NC State MS degree, 12 credit hours of coursework are required. For those with only a Bachelors degree 30 credit hours of coursework are required. The remaining credit hours are research.

The department wishes to evaluate a Ph.D. student's research potential as quickly as possible. Consequently, all Ph.D. students are required to pass a qualifying review before the end of their third semester of study. This review is based on the student's academic performance to date and the results of a project with one of their committee members. Results are presented to the committee in both written and oral form. Based on this review, the committee will decide if the student may continue in the Ph.D. program.

Student Financial Support

The department offers financial support to qualified students in the form of teaching assistantships, research assistantships, and fellowships. These sources of support generally include coverage of tuition and fees.

Degrees

- Computer Engineering (MS) (p. 428)
- Computer Engineering (MS): Internship Concentration (p. 430)
- Computer Engineering (PhD) (p. 432)
- Computer Engineering (Minor) (p. 434)
- Computer Engineering (Certificate) (p. 435)

Computer Engineering (MS)

Master of Science Degree Requirements

Degrees earned will be distributed as: "Master of Science in Computer Engineering" without specialty or option specifications.

Code	Title	Hours	Counts towards
Required Courses		**1**	
ECE 600	ECE Graduate Orientation		
Core Courses [1]		**21**	
"Core Courses" are approved in conjunction with the academic committee			
Depth Courses	Select at least three credit hours of 700-level courses		
Major Courses	Select at least 15 credit hours of EE courses		
Breadth Course	Select at least three credit hours in different ECE specialites		
Additional Courses		**9**	
"Additional Courses" are approved in conjunction with the academic committee to meet 31 total hours			
Total Hours		**31**	

1 Students are only allowed three credit hours of ECE 633, ECE 634, ECE 650, ECE 695 (for Thesis students).

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Computer Engineering (MS): Internship Concentration

This concentration will require an Internship of at least four months duration (maximum of seven months) and the student to take 3 credit hours of ECE 650 and obtain a Satisfactory grade. An internship of at least four calendar months duration would require that it span at least one semester and possibly part of summer. The credits for ECE 650 would be taken during the semester that includes the internship. The student would be considered as being enrolled full time during that semester.

Degree Requirements

A student would not enroll in this concentration in their first semester. They would switch to it in a later semester if they secure a suitable internship. Per normal CPT rules, International students studying on an F-1 visa would have to be present on a US campus for two full semesters (a full academic year), and present at NC State for one semester, before using CPT privileges to take an internship. If a student switches to this concentration but does not start the internship, they will switch back to the original plan.

This will be a concentration only for on-campus students. Students enrolled in our distance education – Engineering Online (EOL) - option will not be eligible.

Code	Title	Hours	Counts towards
Required Courses		**1**	
ECE 600	ECE Graduate Orientation		
Core Courses [1]		**21**	
"Core Courses" are approved in conjunction with the academic committee

Concentration Requirement		**3**	
ECE 650	Internship [2]		
Additional Courses		**6**	
"Additional Courses" are approved in conjunction with the academic committee to meet 31 total hours			
Total Hours		**31**	

[1] Students are only allowed three credit hours of ECE 633, ECE 634, ECE 650, ECE 695 (for Thesis students).

[2] ECE 650 requires that a written report be submitted and accepted by an ECE faculty examiner as meeting the standards required by the course. The written report should cover both technical and non-technical aspects of what the student did and learned during the internship. The report should not disclose company proprietary information.

Computer Networking

The Master of Science in computer networking may be earned through the M.S. with thesis option or through the non-thesis option. Either option may be used as preparation for further graduate study or employment in industrial research, development or design environment, although students planning to continue on for a Ph.D. should discuss the option selected with their advisors.

The Master of Science in Computer Networking is also available as on online degree program. This degree has a non-thesis option, does not require on campus attendance, and may be used in preparation for further graduate student or employment in an industrial research, development or design environment. The program is available to USA residents and to United States military personnel serving overseas and it is offered online through Engineering Online.

Master's Degree Requirements

Computer networking core courses constitute 9 of the 30 minimum credit hours. Students take 12 additional credit hours of computer networking courses from one of four currently defined technical concentration areas: network design, network hardware, network software, or networking services. The remaining 9 credit hours may be taken from an approved management concentration sequence, as additional courses in the computer networking technical concentration areas, or as 6 hours of thesis and 3 credit hours from the list of approved computer networking courses. At least 6 of the 30 credits must come from the 700 level, and non-letter graded courses such as individual studies courses may account for a maximum of 3 credit hours.

Degrees

- Computer Networking (MS) (p. 439)
- Computer Networking (MS): Internship Concentration (p. 441)

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Computer Networking (MS): Internship Concentration

Degree Requirements

This concentration will require an Internship of at least four months duration (maximum of seven months) and the student to take 3 credit hours of ECE 650 and obtain a Satisfactory grade. An internship of at least four calendar months duration would require that it span at least one semester and possibly part of summer. The credits for ECE 650 would be taken during the semester that includes the internship. The student would be considered as being enrolled full time during that semester.

A student would not enroll in this concentration in their first semester. They would switch to it in a later semester if they secure a suitable internship. Per normal CPT rules, International students studying on an F-1 visa would have to be present on a US campus for two full semesters (a full academic year), and present at NC State for one semester, before using CPT privileges to take an internship. If a student switches to this concentration but does not start the internship, they will switch back to the original plan.

This will be a concentration only for on-campus students. Students enrolled in our distance education – Engineering Online (EOL) - option will not be eligible.

Code	Title	Hours	Counts towards

Computer Science

The flagship degree is the Ph.D. in Computer Science, which prepares students for leadership positions in academia, industry research labs, and government. Alternatively, the master's degree program offers the Master of Science (thesis) and the Master of Computer Science (non-thesis, available via either distance learning or on-campus enrollment). There is also a Master of Computer Networking degree provided jointly through the Computer Science and the Electrical and Computer Engineering departments (see Computer Networking). Our graduate students also benefit from access to specialized career services. This includes the Corporate & Career Services suite, with opportunities for on-campus interviews, small group career workshops, virtual practice interviews, and individual career advising.

Admissions Requirements

Minimum application requirements include an accredited Bachelor's degree with at least a B average and, for non-Computer Science majors, strong academic performance in computer science and mathematics. Applicants must also submit the GRE General Test scores and international applicants must provide TOEFL or IELTS scores, as proof of English proficiency. We also ask for a Statement of Purpose to be included with the application as well as three professional or academic recommendations.

Those interested in developing their computer science knowledge and skills, but not ready to commit to a degree program, might consider one of our graduate certificates. Refer to the Graduate Certificate Programs listed in the selection under Computer Science.

Student Financial Support

Financial aid is offered to all admitted PhD students. Masters students are not eligible for graduate assistantships until they have completed their first or second semester with a 3.0 or higher average. However, students in our masters program have the opportunity to secure rewarding summer and winter internships.

CSC 512	Compiler Construction	3	
CSC 517	Object-Oriented Design and Development	3	
CSC 520	Artificial Intelligence I	3	
CSC 522	Automated Learning and Data Analysis	3	
CSC 540	Database Management concepts and Systems	3	
CSC 547	Cloud Computing Technology	3	
CSC 554	Human-Computer Interaction	3	
CSC 750	Service-Oriented Computing	3	

Additional Requirements

1. At least 21 hours must be in graduate 500- and 700-level Computer Science courses (note: the Graduate School does not allow 500- and 700-level courses to be taken pass-fail).
2. "Restricted elective" courses may be any graduate letter-graded (500- or 700-level) course within the College of Engineering (including Computer Science), or within the College of Sciences. Exceptions that will *not* count towards graduation:
   - ST 511(if taken after Spring 2014)
   - special topics courses (including EGR 590) in departments other than Computer Science (if taken after Fall 2012).
3. All Computer Science credits must be at or above the 500 level.
4. To graduate, a student must have at least a 3.00 grade point average (GPA). In addition, for students beginning their degree on or after Fall 2013, the GPA in the group of courses used to satisfy the core course requirement must be at least 3.0 as well. For additional Graduate School requirements regarding degree completion see the Graduate School Handbook.
5. A maximum of four special topics courses (either CSC 591 or CSC 791) may be counted towards graduation (for students beginning Fall 2012 or later).
6. Registration by MCS students in Independent Study (CSC 630) requires approval by the faculty member who will supervise the work, followed by submission to the DGP of a one page written description of the topic and expected outputs, and approval of the DGP. A grade of "S" will require submission of a report describing the work done, and the results obtained. A maximum of three credits of CSC 630 may be counted towards graduation.
7. Minors are neither required nor permitted.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Computer Science (Certificate)

Those interested in developing their computer science knowledge and skills, but not ready to commit to a degree program, might consider the online/on-campus Computer Science Graduate Certificate. Students who complete the certificate will gain in-depth knowledge in Computer Science concepts, methods and tools. Applicants are expected to have an accredited Bachelor of Science degree in Computer Science or any sciences or engineering discipline. A minimum GPA of 3.0, on a 4-point scale, is also expected. The GRE is not required for admission.

Financial aid is not available through our program. Interested applicants will need to review other means of assistance, if needed.

Certificate in Computer Science

Code	Title	Hours	Counts towards

CSC 506	Architecture Of Parallel Computers		
CSC 512	Compiler Construction		
CSC 547	Cloud Computing Technology		
CSC 568	Enterprise Storage Architecture		
CSC 591	Special Topics In Computer Science (Topics Include: Data-Intensive Computing; Reliable Time Computer Systems)		
CSC 714	Real Time Computer Systems		
CSC 724	Advanced Distributed Systems		
CSC 766	Code Optimization for Scalar and Parallel Programs		
Total Hours		**12**	

Data Science Foundations (Certificate)

This online/on-campus program is well suited for working professionals who have some formal training in Computer Science and/or Statistics and wish to acquire a basic understanding of data science. Applicants are expected to have an accredited Bachelor of Science degree in either a sciences or engineering discipline, Computer Science or Statistics. A minimum GPA of 3.0, on a 4-point scale, is also expected. The GRE is not required for admission.

Financial aid is not available through our program. Interested applicants will need to review other means of assistance, if needed.

Certificate in Data Science Foundations

Code	Title	Hours	Counts towards
Required Courses		**6-9**	
Complete a minimum of two courses from "Core Courses" listed below			
Elective Courses		**3-6**	
Complete minimum of one course from "Elective Courses" listed below			
Total Hours		**12**	

Required Courses

Code	Title	Hours	Counts towards
Select minimum of two courses from the following: [1]		**6-9**	
CSC 505	Design and Analysis Of Algorithms		
CSC 541	Advanced Data Structures		
ST 517	Applied Statistical Methods I		
ST 563	Introduction to Statistical Learning		

Elective Courses

Code	Title	Hours	Counts towards
Select minimum of one course from the following		**3-6**	
CSC 522	Automated Learning and Data Analysis [2]		
CSC 540	Database Management concepts and Systems		
CSC 591	Special Topics In Computer Science (Topics include: Data Driven Business Intelligence; Graph Data Mining; Spatial and Temporal Data Mining)		
ST 540	Applied Bayesian Analysis		

1 Students must take at least one ST and one CSC course

2 Credit cannot be given for both CSC 522 Automated Learning and Data Analysis and ST 563 Introduction to Statistical Learning

Electric Power Systems Engineering

The Master of Science in Electric Power Systems Engineering (MS-EPSE) gives students a thorough understanding of the tools, methods, and practice of electric power engineering. It is both focused and practical in its orientation, with the goal of providing an education that is directly applicable to a career in industry.

The MS-EPSE degree is an accelerated program suitable for a new or recent graduate, as well as experienced professionals who want to receive the necessary retraining to change careers. The program is offered both in-class and as an online degree.

Admission Requirements

Students must have a bachelor's degree from an accredited college or university in electrical engineering with an overall GPA of at least 3.0. Students who do not have a bachelor's degree from an accredited college or university in electrical engineering must satisfy:

1. Completion of the following ECE courses (or electrical engineering courses equivalent to ECE 200, 211, 220, 301, and 303.
2. Applicants must have also completed the following courses or equivalent courses: three semesters of calculus, one semester of probability/statistics, two semesters of physics, and one semester of chemistry.

GRE scores within the last four years of the date of anticipated admission. Guideline for minimal GRE percentile scores are 70 percentile verbal, 90 percentile quantitative, and 50 percentile analytical or writing. GRE scores for students who are graduates from NC State may be waived.

Three strong recommendations from persons able to comment on the applicant's qualifications for graduate study.

All non-US citizen applicants (i.e., non-resident aliens and permanent residents) must demonstrate proficiency in English at a level necessary to be successful in a graduate program at NC State University. The TOEFL or IELTS test must have been taken within two years of the date of anticipated admission. On the TOEFL iBT, students must have a minimum score of 18 on the Listening, Reading and Writing sections, 19 on the Speaking section, and a minimum Total score of 90. On the IELTS, students must have a minimum score of 6.5 on the Listening, Reading and Writing sections, 7.0 on the Speaking section, and a minimum Overall Band Score of 6.5. Scores on previous versions of the TOEFL and IELTS are considered with the same qualitative standard. The TOEFL and IELTS tests will be waived if the applicant is a citizen of a country where English is an official language and the language of instruction in higher education or if the applicant has successfully completed at least one year of full-time study in a degree program at a four-year US college or university.

TOEFL - institution code 5496; department code 66.
GRE - institution code 5496; department code 1203.

Master’s Degree Requirements

The MS-EPSE program requires 30 credit hours of graduate coursework. Twenty-seven credits include four core electric power engineering courses; two interdisciplinary courses on power electronics, data communications, cyber security and environmental issues associated with electric power systems; professional skills training on project management, communication skills, and the business aspects of electric power utilities, and solid hands-on experience through laboratories and a capstone project. This program provides a one-to-one interaction with industry partners.

Student Financial Support: Student scholarships are available through an application process. Please contact the program manager for further information.

Other Relevant Information

To further promote integration of concepts and provide hands-on experience, the program includes an industry sponsored capstone project.

Degrees

- Electric Power Systems Engineering (MS) (p. 460)
- Electric Power Systems Engineering (MS): Internship Concentration (p. 461)
- Electric Power Systems Engineering (MS): Wide Bandgap Power Electronics Concentration (p. 462)

Electric Power Systems Engineering (MS): Internship Concentration

Degree Requirements

This concentration will require an Internship of at least four months duration (maximum of seven months) and the student to take 3 credit hours of ECE 650 and obtain a Satisfactory grade. An internship of at least four calendar months duration would require that it span at least one semester and possibly part of summer. The credits for ECE 650 would be taken during the semester that includes the internship. The student would be considered as being enrolled full time during that semester.

A student would not enroll in this concentration in their first semester. They would switch to it in a later semester if they secure a suitable internship. Per normal CPT rules, International students studying on an F-1 visa would have to be present on a US campus for two full semesters (a full academic year), and present at NC State for one semester, before using CPT privileges to take an internship. If a student switches to this concentration but does not start the internship, they will switch back to the original plan.

This will be a concentration only for on-campus students. Students enrolled in our distance education – Engineering Online (EOL) - option will not be eligible.

Code	Title	Hours	Counts towards
Core Courses		**18**	
ECE 550	Power System Operation and Control		
ECE 551	Smart Electric Power Distribution Systems		
ECE 552	Renewable Electric Energy Systems

Electrical Engineering

The Master of Science in Electrical Engineering may be earned with thesis option or non-thesis option. Either option may be used as preparation for further graduate study or employment in industrial research, development or design.

Also a strong Ph.D. program is available for those who wish to pursue a research and/or teaching career in Industry, Government or Academia.

Admissions Requirements

Admission to the M.S. program requires a B.S. in electrical engineering, computer engineering or computer science, and an overall undergraduate GPA of at least 3.0. For non-native English speakers, the minimum acceptable TOEFL score for admission to the M.S. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but may be waived upon request for graduates from US Universities (see below). Admission is further limited by available room in the elected program of study. Meeting the above minimum requirements alone does not guarantee admission.

Applicants to the Master's and PhD programs who do not have a Bachelor's degree in Electrical Engineering or Computer Engineering, but have a closely related degree from an accredited college or university, must have taken the following pre-requisite courses: Courses equivalent to ECE 109, ECE 209, ECE 212, ECE 220, ECE 301, ECE 302 and ECE 303.

GRE scores within the last four years of the date of anticipated admission. Guideline for minimal GRE percentile scores are 70 percentile verbal, 90 percentile quantitative, and 50 percentile analytical or writing. GRE scores for students who are graduates from NC State may be waived. They also might be waived for graduates from US ABET accredited programs with good GPAs.

All international applicants from non English speaking countries must submit TOEFL scores. The TOEFL must have been taken within two years of the date of anticipated admission. On the TOEFL iBT, students must have a minimum of 18 on each section of the test with a minimum total of 90. Scores on previous versions of the TOEFL are considered with the same qualitative standard. On the IELTS, we require a minimum score of 6.5 in each section. This requirement also applies to US citizens

whose principal language of instruction has not been English (for example, most applicants from Puerto Rico and the Virgin Islands).

TOEFL - institution code 5496; department code 66
GRE - institution code 5496; department code 1203

Admission to the Ph.D. program requires a B.S. or M.S. in electrical engineering, computer engineering or computer science with an expectation of an overall GPA of at least 3.25. The minimum acceptable TOEFL score for admission to the Ph.D. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but might be waived for NC State graduates or graduates from other US ABET accredited schools with good GPAs. Admission is further limited by available room in the elected program of study, and meeting the minimum requirements as given above does not guarantee admission.

Master's Degree Requirements

Thirty-one (31) credit hours; a thesis is optional. Students must have at least 21 hours of ECE courses that cover at least three specialty areas and have at least three credit hours of advanced-level (700-level) ECE courses. Students electing the Option B non-thesis option must meet core course requirements; have ECE courses that cover at least three specialty areas' and have at least three credit hours of 700-level ECE courses.

The Master's degree is offered online through Engineering OnLine. Applications to these MS on-line programs are through the ECE Department and all students must comply with ECE program requirements.

Doctoral Degree Requirements

Approximately 54 credit hours are required beyond the M.S. degree or 72 credit hours beyond the B.S. degree. For those with an NC State MS degree in our department, no additional courses are required. For those with an NC State MS degree in another department, 6 credit hours are required in our department. For those with a non NC State MS degree, 12 credit hours of coursework are required. For those with only a Bachelors degree 30 credit hours of coursework are required. The remaining credit hours are research.

The department wishes to evaluate a Ph.D. student's research potential as quickly as possible. Consequently, all Ph.D. students are required to pass a qualifying review before the end of their third semester of study. This review is based on the student's academic performance to date and the results of a project with one of their committee members. Results are presented to the committee in both written and oral form. Based on this review, the committee will decide if the student may continue in the Ph.D. program.

Student Financial Support

The department offers financial support to qualified students in the form of teaching assistantships, research assistantships, and fellowships. These sources of support generally include coverage of tuition and fees.

Degrees

- Electrical Engineering (MS) (p. 466)
- Electrical Engineering (MS): Internship Concentration (p. 468)
- Electrical Engineering (PhD) (p. 471)
- Electrical Engineering (Minor) (p. 473)
- 5G Technologies (Certificate) (p. 475)
- ASIC Design & Verification (Certificate) (p. 477)
- Electrical Engineering (Certificate) (p. 479)
- Nano-Systems Engineering (Certificate) (p. 481)
- Renewable Electric Energy Systems (Certificate) (p. 482)

Electrical Engineering (MS)

Master of Science Degree Requirements

Degrees earned will be distributed as: "Master of Science in Electrical Engineering" without specialty or option specifications.

Code	Title	Hours	Counts towards
Required Courses		**1**	
ECE 600	ECE Graduate Orientation		
Core Courses [1]		**21**	
"Core Courses" are approved in conjunction with the academic committee			
Depth Courses	Select at least three credit hours of 700-level courses		
Major Courses	Select at least 15 credit hours of EE courses		
Breadth Course	Select at least three credit hours in different ECE specialites		
Additional Courses		**9**	
"Additional Courses" are approved in conjunction with the academic committee to meet 31 total hours			
Total Hours		**31**	

1 Students are only allowed three credit hours of ECE 633, ECE 634, ECE 650, ECE 695 (for Thesis students).

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Electrical Engineering (MS): Internship Concentration

Degree Requirements

This concentration will require an Internship of at least four months duration (maximum of seven months) and the student to take 3 credit hours of ECE 650 and obtain a Satisfactory grade. An internship of at least four calendar months duration would require that it span at least one semester and possibly part of summer. The credits for ECE 650 would be taken during the semester that includes the internship. The student would be considered as being enrolled full time during that semester.

A student would not enroll in this concentration in their first semester. They would switch to it in a later semester if they secure a suitable internship. Per normal CPT rules, International students studying on an F-1 visa would have to be present on a US campus for two full semesters (a full academic year), and present at NC State for one semester, before using CPT privileges to take an internship. If a student switches to this concentration but does not start the internship, they will switch back to the original plan.

This will be a concentration only for on-campus students. Students enrolled in our distance education – Engineering Online (EOL) - option will not be eligible.

Code	Title	Hours	Counts towards
Required Courses		**1**	
ECE 600	ECE Graduate Orientation		
Core Courses [1]		**21**	
"Core Courses" are approved in conjunction with the academic committee			
Depth Courses	Select at least three credit hours of 700-level courses		
Major Courses	Select at least 15 credit hours of EE courses		

Breadth Course	Select at least three credit hours in different ECE specialites	
Concentration Requirement		**3**
ECE 650	Internship	
Additional Courses		**6**
"Additional Courses" are approved in conjunction with the academic committee to meet 31 total hours		
Total Hours		**31**

1 Students are only allowed three credit hours of ECE 633, ECE 634, ECE 650, ECE 695 (for Thesis students).

2 ECE 650 requires that a written report be submitted and accepted by an ECE faculty examiner as meeting the standards required by the course. The written report should cover both technical and non-technical aspects of what the student did and learned during the internship. The report should not disclose company proprietary information.

Nano-Systems Engineering (Certificate)

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses			
ECE/CHE 568	Conventional and Emerging Nanomanufacturin Techniques and Their Applications in Nanosystems	3	
MBA 576	Technology Entrepreneurship and Commercialization I	3	
Micro-Machined Sensors and Actuators			
Select six credit hours of the following Core Electives:		6	
BME 590	Special Topics in Biomedical Engineering (Nanobiotechnolo		
BME 590	Special Topics in Biomedical Engineering (Biosensors)		
CHE 596	Special Topics in Chemical Engineering (Nano-scale films and surfaces)		
CHE 596	Special Topics in Chemical Engineering (Colloid Science and Nano-Scale Engineering)		
ECE 538	Integrated Circuits Technology and Fabrication		
ECE 739	Integrated Circuits Technology and Fabrication Laboratory		

ECE 792	Special Topics In Electrical Engineering (Self-Powered Nano-Systems)	
ECE 592	Special Topics In Electrical Engineering (Micro-Machined Sensors and Actuators)	
ISE 718	Micro/ Nano-Scale Fabrication and Manufacturing	
MAE 536	Micro/Nano Electromechanical Systems	
MAE 589	Special Topics In Mechanical and Aerospace Engineering (Micro-transducers)	
MSE 760	Materials Science in Processing of Semiconductor Devices	
MSE 771	Materials Science of Nanoelectronics	
MSE 791	(Introduction to Nano-Materials)	
Select three hours of the following Technical Electives:		3
BME 525	Bioelectricity	
BME 566	Polymeric Biomaterials Engineering	
ECE 557	Principles Of MOS Transistors	
ECE 724	Electronic Properties Of Solid-State Devices	
ECE 723	Optical Properties Of Semiconductors	
ECE 530	Physical Electronics	
ECE 592	Special Topics In Electrical Engineering (Bioelectricity and Neural Interfaces)	
ECE 592	Special Topics In Electrical Engineering (Organic Electronics and LCDs)	
ISE 714	Product Manufacturing Engineering for the Medical Device Industry	
Total Hours		**15**

Renewable Electric Energy Systems (Certificate)

The Graduate Certificate in Renewable Electric Energy Systems provides graduate students with the opportunity to develop expertise in renewable electric energy systems and advanced electric power grid technology in addition to their major area of graduate study.

Admissions

Applicants with appropriate background must meet one of the three following requirements:

- be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
- be a degree student in good standing in an NC State University graduate program; or
- have a Master's degree in a related field of study.

A student may obtain more than one graduate certificate in a different field. Each certificate must have at least nine (9) credit hours that are unique to it.

Requirements

The Graduate Certificate in Renewable Electric Energy Systems requires a minimum of 12 hours, including one 3-hour core course and 9 credit hours of electives to be selected from a list that contains relevant courses for the certificate. Students must maintain a minimum overall GPA of B (3.0).

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses			
ECE 552	Renewable Electric Energy Systems	3	
Select three of the following Advanced Courses:		9	
ECE 550	Power System Operation and Control		
ECE 581	Electric Power System Protection		

ECE 534	Power Electronics	
ECE 551	Smart Electric Power Distribution Systems	
ECE 535	Design of Electromechanical Systems	
ECE 585	The Business of the Electric Utility Industry	
ECE 589	Solid State Solar and Thermal Energy Harvesting	
ECE 736	Power System Stability and Control	
Total Hours		**12**

Engineering

The Master of Engineering (MR) distance education degree program is designed for students with an undergraduate degree in engineering or a closely related field who wish to pursue a graduate degree in engineering. The program was created to address the needs of students whose schedule or location does not allow on-campus study, working professionals who wish to obtain an advanced degree or those who wish to change fields within engineering. It is a 30-credit-hour degree program which does not require a thesis, final oral exam or on-campus residency. Students design the plan of study which best meets their career or educational goals, taking courses from at least two engineering disciplines to create a general degree program.

Convenience and flexibility are the key advantages of this interdisciplinary degree program that can be earned totally at a distance with no GRE, thesis, or final oral exam requirements. The Master of Engineering degree allows students to choose from different subplans from the many disciplines of engineering within the College of Engineering or to design their own degree plans that best meet their career or employment goals. Students must identify an area of concentration from which they will complete 3 to 6 classes. **All concentration area classes MUST be taken from the College of Engineering at NC State University.** The concentration will appear on the student's transcript if 5 or 6 courses are taken in that specialty area. **No double concentration is allowed** (5 in one area plus 5 in another area). **No more than 6** classes will be allowed in a single area.

The program does not offer financial assistance. The Office of Scholarships and Financial Aid (OSFA) assists students in applying for and securing financial assistance for educational expenses. OSFA can help with all questions about financial aid, and guide students to available scholarships, grants, and loans.

Degrees

- Engineering (MR) (p. 484)
- Engineering (MR): Aerospace Engineering Concentration (p. 484)
- Engineering (MR): Chemical Engineering Concentration (p. 485)
- Engineering (MR): Computer Engineering Concentration (p. 486)
- Engineering (MR): Computer Science Concentration (p. 487)
- Engineering (MR): Engineering Management Concentration (p. 488)
- Engineering (MR): Industrial Engineering Concentration (p. 489)
- Engineering (MR): Materials Science and Engineering Concentration (p. 489)
- Engineering (MR): Mechanical Engineering Concentration (p. 490)
- Engineering (MR): Nuclear Engineering Concentration (p. 491)

Engineering Management

The Master of Engineering Management (p. 492) degree deepens your critical analytical, science and engineering talents — Think. It also broadens your crucial management skills — Lead. NC State's Master of Engineering Management degree provides you the skills necessary to manage and succeed in today's complex technical environments.

The Master of Engineering Management degree consists of 10 courses (30 credit hours). Five (5) courses are located in the core curriculum, with the remaining five (5) courses in the student's chosen concentration. Concentrations are as follows:

- Analytics (p. 493)
- Entrepreneurship (p. 494)
- Facilities Engineering (p. 495)
- General (p. 497)
- Health and Human Systems (p. 498)
- Professional Practice (p. 499)
- Supply Chain Engineering & Management (p. 500)

All concentrations include a masters project / practicum course.

Degrees

- Engineering Management (MR) (p. 492)
- Engineering Management (MR): Analytics Concentration (p. 493)
- Engineering Management (MR): Entrepreneurship Concentration (p. 494)
- Engineering Management (MR): Facilities Engineering Concentration (p. 495)
- Engineering Management (MR): General Concentration (p. 497)
- Engineering Management (MR): Health and Human Systems Concentration (p. 498)
- Engineering Management (MR): Professional Practice Concentration (p. 499)
- Engineering Management (MR): Supply Chain Engineering & Management Concentration (p. 500)
- Engineering Management Foundations (Certificate) (p. 501)

Engineering Management Foundations (Certificate)

This certificate is for engineering, STEM, or technical students seeking or experiencing transitions into increasing levels of responsibility and/or management roles. The program provides students the principles and foundational concepts for the planning and operational management of industrial, engineering, and technical organizational pursuits. Students may qualify to have their credits transferred into the Master of Engineering Management (MEM) (p. 492) degree program.

The Engineering Management Foundations Certificate consists of four (4) graduate courses and is offered on campus or 100% online.

Plan Requirements

Code	Title	Hours	Counts towards
Leadership & Communication Course		**3**	
Select one of the following courses:			
EGR 501	Engineering Leadership and Strategic Change		
COM 530	Interpersonal Communication in Science and Technology Organizations

Environmental Engineering

Graduate programs are offered in coastal and water resources engineering, computing and systems, construction engineering and management, environmental engineering, geotechnical and geoenvironmental engineering, mechanics and materials, structural engineering and mechanics, transportation engineering and materials.

Admission Requirements

Normal minimum GPA requirements include 3.0 overall and in the major. Students who do not meet these academic requirements may take graduate courses through the Non Degree Studies program to demonstrate academic ability, but consultation with the Director of Graduate Programs is strongly advised. Applicants without academic experience in civil engineering, construction engineering, or environmental engineering may be required to take undergraduate courses to remove deficiencies, but graduate credit is not given for these courses. The Graduate Record Examination is required for all international applicants and all applicants to the MSCE or MSENE degree programs.

Master's Degree Requirements

Four Master's degrees, requiring a minimum of 30 or 31 credit hours, are available. At least two-thirds of a Master's program should be in a well-defined major area of concentration. The MCE is a non-thesis (Option B) degree with other requirements, such as independent projects or core courses, specified in some areas of specialization. A formal minor is not permitted. The MCE is available both on-campus and through distance education. The MSCE degree requires a thesis and a formal minor is optional. Requirements for the MENE and MSENE are the similar to those for the CE degrees.

Doctoral Degree Requirements

The Ph.D. typically requires one year of full-time course work beyond the master's degree and research culminating in a dissertation. The program must develop a well-defined major area of concentration and may include supporting courses outside the major or a formal minor in a related field. All specialty areas, including Environmental Engineering, are included in the one Ph.D. program.

Student Financial Support

Departmental teaching and research assistantships are available including coverage of tuition and health insurance. Fellowships -- full or supplemental to an assistantship -- are available for exceptional applicants. All financial aid recipients are selected on merit-based competition with other applicants. Applications requesting financial aid (both U.S. and international) should be submitted early: December 15 for Fall admission and by July 15 for Spring admission.

Degrees

- Environmental Engineering (MR) (p. 503)
- Environmental Engineering (MS) (p. 513)

Environmental Engineering (MR)

Master of Environmental Engineering Degree Requirements

Students may choose from the degree tracks below to complete coursework within a focus area:

- Air Pollution Engineering Specialization (p. 503)
- Engineering: Coastal Engineering Specialization (p. 504)
- Energy Systems Analysis Specialization (p. 505)
- Environmental Process Engineering Specialization (p. 506)
- Environmental, Water Resources, and Coastal Engineering Specialization (p. 506)
- Modeling and Systems Analysis Specialization (p. 507)
- Water Resources Engineering Specialization (p. 508)

Degrees earned will be distributed as: "Master of Environmental Engineering" without specialization specifications.

Air Pollution Engineering Specialization

Code	Title	Hours	Counts towards
Core Courses			
CE 576	Engineering Principles Of Air Pollution Control	3	
CE 579	Principles of Air Quality Engineering	3	
CE 772	Environmental Exposure and Risk Analysis	3	
CE 779	Advanced Air Quality	3	
Core Electives			
Technical Electives

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

CCEE Department ABM Admission

The CCEE department encourages excellent undergraduate students to obtain a master's degree in their chosen field of specialization within 2 to 3 semesters past BS graduation, through double counting up to 9 credit hours towards both bachelor's and master's degrees. This is referred to as the Accelerated Bachelor's/Master's (ABM) degree program. Following is the pathway for the ABM program.

Step 1 – Verify your eligibility for applying to the ABM program

- You must have completed at least 75 credit hours (this typically means junior standing)
  - If you are a transfer student, you must have completed at least two semesters at NCSU, earning a minimum of 24 credit hours
- You must not have already received a BS degree
- You must have an overall GPA # 3.5 and major GPA # 3.25

Step 2 – Apply for ABM by following the steps below

- Determine your area of interest from the list of graduate specialty areas on the next page.
- Talk to the ABM advisor in the specialty area (provided below), and agree on a tentative ABM Plan of Work (POW) that would suit your

interests and satisfy the ABM requirements. A finalized ABM POW must be in place before completion of the BS degree.

- Submit an application at go.ncsu.edu/ccee-abm (https://applygrad.ncsu.edu/register/?id=4d63529c-6ad8-4680-9655-e4e49554ac56), which includes the tentative ABM POW.
  - The application will first be reviewed by the ABM advisor and a recommendation will be made to the department. The final determination will be made after a joint review by the directors of undergraduate and graduate programs, after which you will be notified.

Step 3 – While in the ABM program, maintain status by following the steps below:

- With the specialty area ABM advisor's help, prepare a tentative Graduate POW, that complements the Undergraduate POW.
  - Up to 9 credit hours can be double counted, they must be at the 500 level, and they must be selected from the approved list of courses in the specialty area (provided in the subsequent pages).
  - The (tentative) Graduate POW must be formally approved by the ABM advisor.
- It is your responsibility to ensure that both the Graduate POW and Undergraduate POW satisfy the respective master's and undergraduate degree requirements
- You must maintain an overall GPA # 3.5 and a major GPA # 3.25 until you enter the master's program.
- Only graduate courses with a grade # B can be double counted. Courses with a grade # B- cannot be counted towards the master's degree.
- Towards the end of your bachelor's program, you must formally apply to the master's program, per deadlines published by the graduate school. Note that the GRE may be waived for ABM students – consult with your ABM advisor. The application must include to include a completed and signed ABM Plan of Work (https://grad.ncsu.edu/wp-content/uploads/2015/11/abm-plan-of-work.pdf).
- You must complete the master's degree within a time limit (12 months if MCE/MENE, 18 months if MSCE/MSENE), to take advantage of the double counting associated with the ABM. If you do not graduate within this time, you will be considered a regular master's student needing to take the full 30/31 graduate credits solely towards your master's degree.

Graduate Specialty Areas for ABM

Degrees earned will be distributed as: "Master of Civil Engineering" without specialization specifications.

- Computing and Systems
- Construction Engineering
- EWC – Air
- EWC – Environmental Process Engineering
- EWC – Water Resource and Coastal Engineering
- Geotechnical Engineering
- Structural Engineering and Mechanics
- Transportation Materials
- Transportation Systems

Allowable Courses by Specialty Area

COMPUTING SYSTEMS

Code	Title	Hours	Counts towards
CE 536	Introduction to Numerical Methods for Civil Engineers		
CE 537	Computer Methods and Applications		
CE 538	Information Technology and Modeling		
CE 590	Special Topics In Civil Engineering (Civil Engineering Systems)		

CONSTRUCTION ENGINEERING

Code	Title	Hours	Counts towards
CE 561	Construction Project Management		
CE 562	Lean Construction Concepts and Methods		
CE 564	Legal Aspects of Contracting		
CE 565	Construction Safety Management		
CE 567	Risk and Financial Management in Construction		
CE 592	Special Topics in Construction Engineering		
Other courses may selected and approved in conjunction with the academic committee, examples include but are not subject to:			
CE 515	Advanced Strength of Materials		
CE 522	Theory and Design Of Prestressed Concrete		
CE 523	Theory and Behavior Of Steel Structures		
CE 524	Analysis and Design Of Masonry Structures		

CE 548	Engineering Properties Of Soils I		

EWC – AIR

Code	Title	Hours	Counts towards
CE 576	Engineering Principles Of Air Pollution Control *		
CE 578	Energy and Climate *		
CE 579	Principles of Air Quality Engineering *		

EWC – ENVIRONMENTAL PROCESS ENGINEERING

Code	Title	Hours	Counts towards
CE 571	Physical Principles of Environmental Engineering		
CE 573	Biological Principles of Environmental Engineering		
CE 574	Chemical Principles of Environmental Engineering		
CE 577	Engineering Principles Of Solid Waste Management *		
CE 578	Energy and Climate *		
CE 596	Special Topics in Water Resource and Environmental Engineering (Global Sanitation) *		

EWC – WATER RESOURCES, COASTAL

Code	Title	Hours	Counts towards
CE 581	Fluid Mechanics in Natural Environments		
CE 583	Engineering Aspects Of Coastal Processes		
CE 584	Hydraulics Of Ground Water		
CE 586	Engineering Hydrology		
CE 588	Water Resources Engineering *		
CE 596	Special Topics in Water Resource and Environmental Engineering (Coastal Hydrodynamics) *		
CE 596	Special Topics in Water Resource and Environmental Engineering (Coastal Modeling)		
CE 596	Special Topics in Water Resource and Environmental Engineering (Surface Water Quality Modeling)		

GEOTECHNICAL ENGINEERING

Code	Title	Hours	Counts towards
CE 548	Engineering Properties Of Soils I		
CE 584	Hydraulics Of Ground Water		
CE 593	Special Topics in Geotechnical Engineering (Dynamics of Soils and Foundations)		
Other courses may selected and approved in conjunction with the academic committee, examples include but are not subject to:			
CE 515	Advanced Strength of Materials		
CE 526	Finite Element Method in Structural Engineering		
CE 577	Engineering Principles Of Solid Waste Management		

STRUCTURAL ENGINEERING AND MECHANICS

Code	Title	Hours	Counts towards
CE 515	Advanced Strength of Materials		

CE 522	Theory and Design Of Prestressed Concrete
CE 523	Theory and Behavior Of Steel Structures
CE 524	Analysis and Design Of Masonry Structures
CE 525	Advanced Structural Analysis
CE 526	Finite Element Method in Structural Engineering
CE 527	Structural Dynamics
CE 528	Structural Design in Wood
CE 529	FRP Strengthening and Repair of Concrete Structures
CE 530	Properties of Concrete and Advanced Cement-Based Composites

TRANSPORTATION MATERIALS

Code	Title	Hours	Counts towards
CE 515	Advanced Strength of Materials		
CE 530	Properties of Concrete and Advanced Cement-Based Composites		
CE 548	Engineering Properties Of Soils I		
CE 595	Special Topics in Transportation Engineering (A - Asphalt and Bituminous Materials)		

TRANSPORTATION SYSTEMS

Code	Title	Hours	Counts towards
CE 501	Transportation Systems Engineering *		
CE 502	Traffic Operations *		
CE 503	Highway Design *		
CE 504	Airport Planning and Design		
CE 505	Railroad System Planning, Design, and Operation		
CE 509	Highway Safety		

* This course is not a prerequisite but recommended to be completed prior to enrollment.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

CCEE Department ABM Admission

The CCEE department encourages excellent undergraduate students to obtain a master's degree in their chosen field of specialization within 2 to 3 semesters past BS graduation, through double counting up to 9 credit hours towards both bachelor's and master's degrees. This is referred to as the Accelerated Bachelor's/Master's (ABM) degree program. Following is the pathway for the ABM program.

Step 1 – Verify your eligibility for applying to the ABM program

- You must have completed at least 75 credit hours (this typically means junior standing)
  - If you are a transfer student, you must have completed at least two semesters at NCSU, earning a minimum of 24 credit hours
- You must not have already received a BS degree
- You must have an overall GPA # 3.5 and major GPA # 3.25

Step 2 – Apply for ABM by following the steps below

- Determine your area of interest from the list of graduate specialty areas on the next page.
- Talk to the ABM advisor in the specialty area (provided below), and agree on a tentative ABM Plan of Work (POW) that would suit your interests and satisfy the ABM requirements. A finalized ABM POW must be in place before completion of the BS degree.
- Submit an application at go.ncsu.edu/ccee-abm (https://applygrad.ncsu.edu/register/?id=4d63529c-6ad8-4680-9655-e4e49554ac56), which includes the tentative ABM POW.
  - The application will first be reviewed by the ABM advisor and a recommendation will be made to the department. The final

determination will be made after a joint review by the directors of undergraduate and graduate programs, after which you will be notified.

Step 3 – While in the ABM program, maintain status by following the steps below:

- With the specialty area ABM advisor's help, prepare a tentative Graduate POW, that complements the Undergraduate POW.
  - Up to 9 credit hours can be double counted, they must be at the 500 level, and they must be selected from the approved list of courses in the specialty area (provided in the subsequent pages).
  - The (tentative) Graduate POW must be formally approved by the ABM advisor.
- It is your responsibility to ensure that both the Graduate POW and Undergraduate POW satisfy the respective master's and undergraduate degree requirements
- You must maintain an overall GPA # 3.5 and a major GPA # 3.25 until you enter the master's program.
- Only graduate courses with a grade # B can be double counted. Courses with a grade # B- cannot be counted towards the master's degree.
- Towards the end of your bachelor's program, you must formally apply to the master's program, per deadlines published by the graduate school. Note that the GRE may be waived for ABM students – consult with your ABM advisor. The application must include to include a completed and signed ABM Plan of Work (https://grad.ncsu.edu/wp-content/uploads/2015/11/abm-plan-of-work.pdf).
- You must complete the master's degree within a time limit (12 months if MCE/MENE, 18 months if MSCE/MSENE), to take advantage of the double counting associated with the ABM. If you do not graduate within this time, you will be considered a regular master's student needing to take the full 30/31 graduate credits solely towards your master's degree.

Graduate Specialty Areas for ABM

Degrees earned will be distributed as: "Master of Civil Engineering" without specialization specifications.

Industrial Engineering

The graduate faculty of the Edward P. Fitts Department of Industrial and Systems Engineering supports academic and research interests in four areas:

1. manufacturing systems (manufacturing processes, medical device manufacturing systems, CAM, CIM, robotics, automation, rapid prototyping and concurrent engineering);
2. production systems (logistics systems, supply chain management, scheduling, inventory control, materials handling, facility design, furniture manufacturing and management, quality control, and engineering economics);
3. systems analysis and optimization (health systems, stochastic processes, simulation, mathematical programming, and soft computing); and
4. ergonomics (human performance, occupational safety, and biomechanics). The department faculty actively supports independent graduate degree programs in operations research, integrated manufacturing systems engineering, textile technology and management, and financial mathematics.

Admission Requirements

Applications are accepted from undergraduate majors in engineering and in the behavioral, physical and mathematical sciences who meet prerequisites in calculus and linear algebra, computer science, and statistics.

Master's Degree Requirements

The M.S. degree requires 30 credit hours and involves depth of study in a specified area of concentration, nine hours in a minor, and six hours of research credit. The Master of Industrial Engineering (M.IE.) degree may be obtained by course work only; project work is optional. A minimum of 33 credit hours is required for the M.IE.

Doctoral Degree Requirements

This degree requires 72 credit hours of course and research work beyond the Bachelor's degree. Undergraduate students with superior credentials may apply directly to the doctoral program and bypass the master's degree. For students who have completed the Master's degree, typically 30 to 36 hours of additional course work are required. A departmental written qualifying examination is required.

Student Financial Support

Research and teaching assistantships are available on a competitive basis to early applicants. Fellowships that supplement assistantship stipends are available to U.S. applicants with superior credentials. Award priority is given to Ph.D. and then to M.S. applicants.

Degrees

- Industrial Engineering (MR) (p. 519)
- Industrial Engineering (MS) (p. 521)
- Industrial Engineering (PhD) (p. 523)
- Industrial Engineering (Minor) (p. 525)

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count

up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Integrated Manufacturing Systems Engineering

The Integrated Manufacturing Systems Engineering (IMSE) Institute was established in 1984. IMSE provides multidisciplinary graduate-level education and practical training opportunities in the theory and practice of integrated manufacturing systems engineering at the masters level. IMSE focuses on providing a manufacturing presence and a program environment in the College of Engineering where faculty, graduate students and industry can engage cooperatively in multidisciplinary graduate education, basic and applied research, and technology transfer in areas of common interest related to modern manufacturing systems technology. The objective of the IMSE program is to offer students with traditional discipline backgrounds in engineering and the physical sciences an opportunity to broaden their understanding of the multidisciplinary area of manufacturing systems. Core areas of concentration are offered in manufacturing systems, logistics, mechatronics, and advanced manufacturing.

Admission Requirements

Admission to the IMSE master's program requires a B.S. degree from an accredited institution in engineering, physics, mathematics, or computer science. Check with the Institute if your degree is in a field other than these listed.

Master's Degree Requirements

The IMSE program requires a minimum of 27 hours of graduate course work and six hours of research project. The graduate course work includes five required core courses that provide a multidisciplinary overview of subject materials basic to manufacturing systems, logistics, mechatronics, and advanced manufacturing. Specialization is provided in the student's elective courses. The six hours of research project is performed either individually or in teams in areas that compliment and reinforce the graduate course work.

The IMSE degree is now available through Engineering Online as a distance program. Application to the IMSE Distance Education program is the same as the on-campus program.

Student Financial Support

Assistantships and internships are available to qualified students. The full financial support package covers tuition and health insurance. Internships are also undertaken directly with host companies.

Internship

The IMSE internship program was established to provide a cooperative industrial and academic experience for some IMSE students and our industrial sponsors. Several Internship awards are made available every year for special training in IMSE host companies. Students who are selected to participate in the internship program may receive financial support for up to four semesters and one summer. Typically, the student attends classes for two semesters (fall and spring), works at the sponsor company for the following summer and fall semester, and completes the IMSE course requirements the following spring semester. The student uses the experience at the sponsor company as the basis for their IMSE research project.

Other Relevant Information

IMSE Students are supported by companies across the country during their internships. Both full-time and part-time internship support is provided depending on availability. These companies have included: ABB, ABCO Automation, Applied Materials, AT&T, Bayer, BSH, Bosch, Biogen, Castle Hill Technologies, Caterpillar, Closure Medical, Corning Cable Systems, CSX, Cummins, Disney, Dupont, Daimler Trucks, Elkay, Ford, GE, GKN, GSK, IBM, Ingersoll Rand, Intel, John Deere, Mack Trucks, Mayne Pharma, Michelin, Morganite, MTS Systems,

Nekton Technologies, Rubbermaid, RxMedic, Samsung Semiconductor, Schwanns, Snap-On, Tesla, UPS, Volvo Trucks, and ZF Corporation and many others.

Materials Science & Engineering

Materials enable all of the engineering and high-technology fields that are an integral part of our society. Graduate programs in this department focus on understanding the structure, structure modification and properties of materials and the development of new or improved materials and advanced processing methods that are critical links between the design and the realization of new systems for manufacturing, nanotechnology, energy, and biomaterials.

The M.S. and Ph.D. programs are research-based degree programs focusing on faculty-mentored, state-of-the-art materials research that leads to a thesis or dissertation.

The Master of Materials Science and Engineering is a non-thesis degree program designed for students from a variety of technical backgrounds interested in furthering their understanding of materials processing, characterization and properties. This program is appropriate for distance-education Masters students.

The Master of Nanoengineering is a multidisciplinary non-thesis degree program designed so students can declare a concentration in one of the following three areas:

1. Materials Science in Nanoengineering;
2. Nanoelectronics and Nanophotonics; or
3. Biomedical Sciences in Nanoengineering.

This program is appropriate for distance-education Masters students.

Admission Requirements

In addition to the general admission requirements as set by the Graduate School, the department requires submission of GRE scores. Non-native English speakers also require a minimum TOEFL score as established by the Graduate School.

Master's Degrees Requirements

The Master of Science degree (M.S.) requires 30 credit hours of coursework/research and a research thesis. The Master of Materials Science and Engineering degree (M.M.S.E.) requires 30 credit hours of coursework only. The Master of Nanoengineering (M.NAE.) requires 30 credit hours of coursework only.

Doctoral Degree Requirements

The doctoral degree (Ph.D.) requires 72 credit hours of coursework/research, a qualifying exam, and a research dissertation.

Student Financial Support

Students in the M.S. and Ph.D. graduate programs normally receive financial support in the form of research or teaching assistantships or fellowships.

Other Relevant Information

The department reflects the interdisciplinary nature of the field of Materials Science and Engineering. A substantial number of current graduate students majored in fields other than but related to materials, and the department has associated graduate faculty from other departments supervising thesis and dissertation research.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Accelerated Bachelor's/Master's Degree Requirements

Undergraduate Requirements

The following undergraduate programs meet the undergraduate requirements for the Accelerated Bachelor's / Master's (ABM):

- Materials Science Engineering (http://catalog.ncsu.edu/undergraduate/engineering/materials-science-engineering/materials-science-engineering-bs/#planrequirementstext) (BS) (http://catalog.ncsu.edu/undergraduate/engineering/materials-science-engineering/materials-science-engineering-bs/#planrequirementstext)
- Materials Science Engineering (BS): Biomaterials Concentration (http://catalog.ncsu.edu/undergraduate/engineering/materials-science-engineering/materials-science-engineering-bs-biomaterials-concentration/)
- Materials Science Engineering (BS): Nanomaterials Concentration (http://catalog.ncsu.edu/undergraduate/engineering/materials-science-engineering/materials-science-engineering-bs-nanomaterials-concentration/)

Double-Counted Courses

After taking 12 credit hours of double-counted courses in the BS degree, only 18 hours remain for completion of either master's degree in the fifth year.

Code	Title	Hours	Counts towards
The following courses may be double-counted between the Bachelor's and Master's degrees:			
MSE/NE 409/ MSE 509/NE 509	Nuclear Materials	3	
MSE 440/540	Processing of Metallic Materials	3	
MSE 445/545	Ceramic Processing	3	
MSE 455/555	Polymer Technology and Engineering	3	
MSE 456/556	Composite Materials	3	
MSE 460/560	Microelectronic Materials	3	
MSE 465/565	Introduction to Nanomaterials	3	
MSE 480/580	Materials Forensics and Degradation	3

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Materials Informatics (Certificate)

Plan Requirements

Code	Title	Hours	Counts towards
Required Course		**3**	
MSE 723	Materials Informatics		
Materials Science Course		**3**	
Select one of the following courses:			
MSE 710	Elements Of Crystallography and Diffraction		
MSE 721	Nanoscale Simulations and Modeling		
MSE 725	Quantitative Materials Characterization Techniques		
Statistics/Mathematics Course		**3**	
ST 517	Applied Statistical Methods I		
ST 533	Applied Spatial Statistics		
MA 540	Uncertainty Quantification for Physical and Biological Models		
Additional Course		**3**	
Additional Course is determined in conjunction with the academic committee [1]			
Total Hours		**12**	

[1] The fourth course will be taken from outside of the student's degree department. For example, an MSE student's fourth course must be from the ST or MA list (above), whereas a ST or MA student's fourth course must be from the MSE list (above).

Materials Science and Engineering (Certificate)

The Graduate Certificate Program (GCP) in Materials Science and Engineering (MSE) is designed for working professionals who do not have formal training in MSE, but wish to acquire a basic understanding of materials science to improve their on-the-job experience and knowledge. Most people will enroll in this program as distance education students through the Engineering Online (EOL) office at NC State University. Students can customize their particular certificate programs to focus on specific areas of materials science that interest them.

Program of Study

The MSE GCP requires a total of 12 credit hours, including MSE 500 (3 credit hours) and three MSE elective courses (9 credit hours) selected by the student. MSE 500 is a fast-paced overview of the field of materials science and engineering and is designed for students who do not have a

formal background in MSE, such as those with BS degrees in chemistry, physics and other fields of engineering. MSE 500 also provides the foundation for more specialized MSE graduate courses.

Each course is 3 credit hours and most courses are offered at least once per year through the EOL office. By judicious selection of elective courses, students can customize their GCP to focus on areas of interest to them.

Admissions Requirements

To be admitted to the MSE Graduate Certificate Program, a student must have a BS degree in the sciences or engineering from a regionally accredited four-year college or university, and have an overall (or major) GPA of at least 3.0 on a 4-point scale.

All new students must complete the NCSU Graduate School application for admission to the MSE GCP. The GRE exam is NOT required for admission to the GCP. Application deadlines are March 1 for summer and fall admission, and October 1 for spring admission. Students can begin study in the fall, spring or summer semester immediately following their acceptance into the program.

Academic success in the MSE GCP might have a strong bearing on admission to a graduate degree program. However, completion of a graduate certificate program IN NO WAY guarantees entry into a graduate degree program, which must be done through a separate application process.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
MSE 500	Modern Concepts in Materials Science		
Select a minimum of three courses from "MSE Courses" listed below			
Total Hours		**12**	

MSE Courses

Code	Title	Hours	Counts towards
Select a minimum of three of the following courses:		**9**	
MSE/NE 509	Nuclear Materials		
MSE 540	Processing of Metallic Materials		
MSE 545	Ceramic Processing		
MSE 555	Polymer Technology and Engineering		
MSE 556	Composite Materials		
MSE 560	Microelectronic Materials Science and Technology		
MSE 561	Organic Chemistry Of Polymers		
MSE 565	Introduction to Nanomaterials		
MSE 566	Mechanical Properties of Nanostructured Materials		
MSE 576	Technology Entrepreneurship and Commercialization I		
MSE 577	Technology Entrepreneurship and Commercializatior II		
MSE 580	Materials Forensics and Degradation		
MSE 589	Solid State Solar and Thermal Energy Harvesting		
MSE 702	Defects In Solids		
MSE 703	Interaction of Electrons with Materials		
MSE 704	Interaction of Photons with Materials		
MSE 705	Mechanical Behavior Of Engineering Materials		
MSE 706	Phase Transformations and Kinetics		
MSE 708	Thermodynamics Of Materials		
MSE 709	Metastable Materials: Processing, Structure, and Properties		
MSE 710	Elements Of Crystallography and Diffraction

Mechanical Engineering

The Mechanical Engineering graduate program prepares students in all aspects of mechanical and thermal systems design and manufacturing. Course offerings and research programs for mechanical engineering students are available in applied mechanics; biomechanics; combustion; design and manufacturing: dynamic systems and control; energy conversion and systems; experimental mechanics; fluid dynamics; heat transfer; mechanics of materials; micro, nano and MEMS; and vibration and acoustics. Sub-areas include adaptive and auto adaptive structures, controls and system identification, CFD, energy conversion and renewable energy, materials processing and tribology, mechatronics, precision engineering, and reactive and multiphase flows.

Admission Requirements

An applicant to the master's program must be a graduate of an accredited undergraduate program with a B.S. degree in either mechanical or aerospace engineering. Graduates of other accredited programs in engineering, physical sciences and mathematics may be considered but may be required to make up undergraduate deficiencies without graduate credit. The most qualified applicants are accepted first. Applicants to the Ph.D. program must have met the M.S. admission requirements and additionally must satisfy the Ph.D. admissions requirements. Applicants to the online, distance education M.S. program in mechanical or aerospace engineering are not required to take the GRE exam.

Master's Degree Requirements

The thesis-option M.S. degree program in mechanical engineering requires 21 hours of course credit and nine hours of thesis research. The non-thesis M.S. degree requires 27 hours of course credit and a three credit-hour project and is offered on campus as well as off campus, through distance education.

Ph.D. Degree Requirements

A minimum of 72 hours of credit are required to obtain the Ph.D. degree. A direct path to the Ph.D. from the B.S. is also available with which the student is granted the M.S. degree “enroute” to the Ph.D. The enroute Ph.D. (direct to Ph.D. path) requires a minimum of 3.5 undergraduate GPA.

Student Financial Support

Financial aid is offered to all admitted Ph.D. students.

Mechanical Engineering (MS)

Degree Requirements

Non-Thesis Option

Code	Title	Hours	Counts towards
Required Courses		**27**	
Select a minimum of nine 500-level to 700-level courses approved in conjunction with the academic committee *			
Project Course		**3**	
MAE 586	Project Work In Mechanical and Aerospace Engineering		
Total Hours		**30**	

Thesis Option

Code	Title	Hours	Counts towards
Required Courses		**21**	
Select a minimum of seven 500-level to 700-level courses approved in conjunction with the academic committee *			
Research Course		**9**	
MAE 695	Master's Thesis Research		
Total Hours		**30**	

* "Required Courses" may include up to three non-MAE courses approved by the Director of Graduate Programs.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Nanoengineering

The Master of Nanoengineering (MNAE) is an on campus and distance education program and is designed for students with an undergraduate degree in a science or engineering discipline who wish to pursue a graduate degree in nanoengineering. The field of nanoengineering is expected to revolutionize technology and improve quality of life, particularly as related to energy, environment, and health. Students will achieve an understanding of the fundamental advantages in nanoscale materials, devices and systems. It is a 30 credit hour degree program that does not require a thesis, final oral exam or on-campus residency. GRE scores are recommended but not required. NC State has an existing strength in nanostructured materials and devices.

Students can declare a concentration in one of the following three areas:

1. Materials Science in Nanoengineering;
2. Nanoelectronics and Nanophotonics; or
3. Biomedical Sciences in Nanoengineering.

This program is appropriate for distance-education Masters students.

Admission Requirements

In addition to the general admission requirements as set by the Graduate School, the MNAE program requires a BS degree in science or engineering with a minimum GPA or 3.0. Non-native English speakers also require a minimum TOEFL or IELTS scores as established by the Graduate School.

Degree Requirements

The Master of Nanoengineering (MNAE) requires 30 credit hours of coursework only. The 30 credit hours must consist of 12 credit hours of core courses, 12 credit hours in the areas of concentration and 6 credit hours of technical electives.

Other Relevant Information

The Master of Nanoengineering program is an interdisciplinary one that is comprised of courses taught by faculty from six different departments within the College of Engineering.

Degrees

- Nanoengineering (MR) (p. 550)
- Nanoengineering (MR): Biomedical Sciences in Nanoengineering Concentration (p. 551)
- Nanoengineering (MR): Materials Science in Nanoengineering Concentration (p. 552)
- Nanoengineering (MR): Nanoelectronics and Nanophotonics Concentration (p. 553)

Career Opportunities

Nanotechnological advancements have impacted every technological sector and ultimately may change aspects of our daily lives.
The development of these new technologies requires innovative nanoengineers who are invested in the fields of electronics, materials, chemical technology, biotechnology and biomedical engineering.
Graduates of the Master of Nanoengineering program are equipped with a solid foundation in nanoscience and nanotechnology necessary for the development of new products and procedures.

Potential careers associated with nanoengineering are as follows.

- Research and development engineer/scientist
- Biomedical engineer
- Materials engineer/scientist
- Bioinformatics

- Chemist
- Process engineer
- Materials analyst
- Professor
- Medical doctor
- PhD student

Nanotechnological advancements have impacted every technological sector and ultimately may change aspects of our daily lives.
The development of these new technologies requires innovative nanoengineers who are invested in the fields of electronics, materials, chemical technology, biotechnology and biomedical engineering.
Graduates of the Master of Nanoengineering program are equipped with a solid foundation in nanoscience and nanotechnology necessary for the development of new products and procedures.

Potential careers associated with nanoengineering are as follows.

- Research and development engineer/scientist
- Biomedical engineer
- Materials engineer/scientist
- Bioinformatics
- Chemist
- Process engineer
- Materials analyst
- Professor
- Medical doctor
- PhD student

Nanoengineering (MR): Nanoelectronics and Nanophotonics Concentration

Degree Requirements

Code	Title	Hours	Counts towards
Core Courses		**12**	
Select four of the following courses:			
MSE 500	Modern Concepts in Materials Science		
MSE 565	Introduction to Nanomaterials		
MSE 791			
ECE/CHE 568	Conventional and Emerging Nanomanufacturin Techniques and Their Applications in Nanosystems		
ISE 718	Micro/ Nano-Scale Fabrication and Manufacturing		
MAE 536	Micro/Nano Electromechanical Systems		
Concentration Requirement Courses		**12**	
Select a minimum of four of the following courses:			
ECE 530	Physical Electronics		
ECE/BME 518	Wearable Biosensors and Microsystems		
ECE/MSE 589	Solid State Solar and Thermal Energy Harvesting		
ECE 723	Optical Properties Of Semiconductors		
CHE 560	Chemical Processing of Electronic Materials		
MSE 760	Materials Science in Processing of Semiconductor Devices		
MSE 771	Materials Science of Nanoelectronics		
Technical Electives		**6**	
"Technical Electives" are approved in conjunction with the academic committee *			
Total Hours		**30**	

* "Technical Electives" may be ones in the MNAE program not used to satisfy other degree requirements or other technical courses approved by the Director of Graduate Program, Nanoengineering.

Career Opportunities

Nanotechnological advancements have impacted every technological sector and ultimately may change aspects of our daily lives.
The development of these new technologies requires innovative nanoengineers who are invested in the fields of electronics, materials, chemical technology, biotechnology and biomedical engineering.
Graduates of the Master of Nanoengineering program are equipped with a solid foundation in nanoscience and nanotechnology necessary for the development of new products and procedures.

Potential careers associated with nanoengineering are as follows.

- Research and development engineer/scientist
- Biomedical engineer
- Materials engineer/scientist
- Bioinformatics
- Chemist
- Process engineer
- Materials analyst
- Professor
- Medical doctor
- PhD student

Nuclear Engineering

The discipline of nuclear engineering is concerned with the development of nuclear processes for energy production and with the applications of radiation for the benefit of society. Representative topics of investigation include analytical, computational and experimental research in the neutronics, materials, thermal-hydraulics and control aspects of fission reactors; radiation detection and measurement of basic physics parameters; nuclear safety and security; applications of radioisotopes and radiation in industry, medicine and science; and plasma science, plasma engineering and design aspects of fusion reactors.

Admission Requirements

Bachelor's degree graduates in any of the fields of engineering or physical sciences may be qualified for successful advanced study in nuclear engineering. Prior experience or course work in nuclear physics, partial differential equations and basic reactor analysis is helpful but may be gained during the first year of graduate study. GRE scores (general test) are needed for on-campus graduate study.

Master's Degree Requirements

A total of 30 credit hours (at least nine semester hours of interdisciplinary breadth and 21 Nuclear Engineering) is required for both the M.S. and MNE degrees. An engineering project is required for the MNE degree and a formal thesis is required for the M.S. degree.

Doctoral Degree Requirements

A total of 72 credit hours which includes a minor (at least 12 hours) is required. Students must pass a departmental qualifying exam in three core areas of nuclear engineering, and they can (if they so choose and if their advisor approves) prepare for the exam by enrolling during their first year in three corresponding graduate courses comprising radiation fundamentals, reactor engineering, and radiation detection. Students who already earned a masters degree may count some of their credits towards the required PhD hours; consult <grad manual posted online> for details.

Student Financial Support

Teaching assistantships, research assistantships, and fellowships are available for qualified applicants. Opportunities are also available for graduate traineeships with utility companies, reactor and fuel vendors, and national laboratories providing a valuable combination of financial support and learning in the classroom, the research laboratory and on the job.

Other Relevant Information

The department has many excellent facilities including the one-megawatt PULSTAR fission reactor (soon to be uprated to 2MW), ultra cold neutron source, intense low-energy positron source, neutron scattering facility, neutron radiography unit, neutron activation analysis laboratory, nuclear materials laboratory, plasma laboratories, instrumentation and controls equipment, radiation analyzers and tomography systems, Generic PWR simulator and access to extensive computer facilities ranging from workstations to a supercomputer.

Degrees

- Nuclear Engineering (MR) (p. 555)
- Nuclear Engineering (MS) (p. 556)
- Nuclear Engineering (PhD) (p. 558)
- Nuclear Engineering (Minor) (p. 559)

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master’s (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor’s and Master’s degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master’s degree in the same field within 12 months of completing the Bachelor’s degree, or obtain a thesis-

based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Computer Science (Certificate)

Those interested in developing their computer science knowledge and skills, but not ready to commit to a degree program, might consider the online/on-campus Computer Science Graduate Certificate. Students who complete the certificate will gain in-depth knowledge in Computer Science concepts, methods and tools. Applicants are expected to have an accredited Bachelor of Science degree in Computer Science or any sciences or engineering discipline. A minimum GPA of 3.0, on a 4-point scale, is also expected. The GRE is not required for admission.

Financial aid is not available through our program. Interested applicants will need to review other means of assistance, if needed.

Certificate in Computer Science

Code	Title	Hours	Counts towards
Required Courses		**12**	
Select a minimum of four CSC courses at the 500- or 700-level – see optional tracks listed below

Systems Track

Code	Title	Hours	Counts towards
Core Courses			
Complete at least one		3-6	
CSC 501	Operating Systems Principles		
CSC 548	Parallel Systems		
Elective Courses			
Complete at least two		6-9	
CSC 506	Architecture Of Parallel Computers		
CSC 512	Compiler Construction		
CSC 547	Cloud Computing Technology		
CSC 568	Enterprise Storage Architecture		
CSC 591	Special Topics In Computer Science (Topics Include: Data-Intensive Computing; Reliable Time Computer Systems)		
CSC 714	Real Time Computer Systems		
CSC 724	Advanced Distributed Systems		
CSC 766	Code Optimization for Scalar and Parallel Programs		
Total Hours		**12**	

Data Science Foundations (Certificate)

This online/on-campus program is well suited for working professionals who have some formal training in Computer Science and/or Statistics and wish to acquire a basic understanding of data science. Applicants are expected to have an accredited Bachelor of Science degree in either a sciences or engineering discipline, Computer Science or Statistics. A minimum GPA of 3.0, on a 4-point scale, is also expected. The GRE is not required for admission.

Financial aid is not available through our program. Interested applicants will need to review other means of assistance, if needed.

Certificate in Data Science Foundations

Code	Title	Hours	Counts towards
Required Courses		**6-9**	
Complete a minimum of two courses from "Core Courses" listed below			
Elective Courses		**3-6**	
Complete minimum of one course from "Elective Courses" listed below			
Total Hours		**12**	

Required Courses

Code	Title	Hours	Counts towards
Select minimum of two courses from the following: [1]		**6-9**	
CSC 505	Design and Analysis Of Algorithms		
CSC 541	Advanced Data Structures		
ST 517	Applied Statistical Methods I		
ST 563	Introduction to Statistical Learning		

Elective Courses

Code	Title	Hours	Counts towards
Select minimum of one course from the following		**3-6**	
CSC 522	Automated Learning and Data Analysis [2]		
CSC 540	Database Management concepts and Systems		
CSC 591	Special Topics In Computer Science (Topics include: Data Driven Business Intelligence; Graph Data Mining; Spatial and Temporal Data Mining)		
ST 540	Applied Bayesian Analysis		

1 Students must take at least one ST and one CSC course

2 Credit cannot be given for both CSC 522 Automated Learning and Data Analysis and ST 563 Introduction to Statistical Learning

Downstream Biomanufacturing (Certificate)

Graduate students and working professionals can now earn a new credential to kick-start or advance their career in the biopharmaceutical industry. The Downstream Biomanufacturing graduate certificates offer NC State graduate students and working professionals the opportunity for hands-on learning in BTEC's industry-scale simulated cGMP facilities.

Each certificate requires 12 hours of graduate coursework, which can be transferred to the Master of Biomanufacturing program. The majority of BTEC's graduate courses are offered in the evening or online to better accommodate working professionals.

The certificate can be completed in two part-time semesters.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
BEC 532	Foundations of Downstream Processing and Formulation		
BEC 536	Introduction to Downstream Process Development		
BEC 585	cGMP Downstream Operations		
BEC 575	Global Regulatory Affairs for Medical Products		
Elective Course		**3**	
Select a minimum of three credits of the following:			
BEC 515	Biopharmaceutica Product Characterization Techniques		
BEC 577	Advanced Biomanufacturing and Biocatalysis		
BEC 590	Industry Practicum in Biomanufacturing		
BUS 554	Project Management		
Total Hours		**12**	

Electrical Engineering (Certificate)

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
Select a minimum of four ECE courses at the 500- or 700-level			
Total Hours		**12**	

* Courses must be Electrical Engineering or cross-listed as either. Excludes Special Topics Courses: ECE 592, ECE 791, and ECE 792.

Health Physics (Certificate)

The Graduate Certificate in Health Physics (GCHP) is intended to support industry, government, military and the national laboratories with expertise in radiation safety for workers who have not had formal education in the same. Many engineers and specialists work in the nuclear field who might be mechanical, electrical or civil engineers, etc. and may seek to supplement this education with radiation safety science and technology. Even graduate nuclear engineering students often have interest in health physics and obtaining this credential will enable them to demonstrate to future employers a meaningful commitment and basic competence in the same. It is further intended that this curriculum will assist students seeking to eventually become certified as health physicists through the American Board of Health Physics. This certificate is intended to help prepare students for the Board exam, and to qualify them to obtain professional experience that is also required for certification.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**6**	
NE 504	Radiation Safety and Shielding		
NE 590	Health Physics and Radiological Emergency Response		
Additional Courses		**6**	
Select two courses from the following:			
NE 520	Radiation and Reactor Fundamentals		
NE 521	Principles of Radiation Measurement		
NE 531	Nuclear Waste Management		
NE 777	Radiological Assessment		
Total Hours		**12**	

Materials Science and Engineering (Certificate)

The Graduate Certificate Program (GCP) in Materials Science and Engineering (MSE) is designed for working professionals who do not have formal training in MSE, but wish to acquire a basic understanding of materials science to improve their on-the-job experience and knowledge. Most people will enroll in this program as distance education students through the Engineering Online (EOL) office at NC State University. Students can customize their particular certificate programs to focus on specific areas of materials science that interest them.

Program of Study

The MSE GCP requires a total of 12 credit hours, including MSE 500 (3 credit hours) and three MSE elective courses (9 credit hours) selected by the student. MSE 500 is a fast-paced overview of the field of materials science and engineering and is designed for students who do not have a formal background in MSE, such as those with BS degrees in chemistry, physics and other fields of engineering. MSE 500 also provides the foundation for more specialized MSE graduate courses.

Each course is 3 credit hours and most courses are offered at least once per year through the EOL office. By judicious selection of elective courses, students can customize their GCP to focus on areas of interest to them.

Admissions Requirements

To be admitted to the MSE Graduate Certificate Program, a student must have a BS degree in the sciences or engineering from a regionally accredited four-year college or university, and have an overall (or major) GPA of at least 3.0 on a 4-point scale.

All new students must complete the NCSU Graduate School application for admission to the MSE GCP. The GRE exam is NOT required for admission to the GCP. Application deadlines are March 1 for summer and fall admission, and October 1 for spring admission. Students can begin study in the fall, spring or summer semester immediately following their acceptance into the program.

Academic success in the MSE GCP might have a strong bearing on admission to a graduate degree program. However, completion of a graduate certificate program IN NO WAY guarantees entry into a graduate degree program, which must be done through a separate application process.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
MSE 500	Modern Concepts in Materials Science		
Select a minimum of three courses from "MSE Courses" listed below			
Total Hours		**12**	

MSE Courses

Code	Title	Hours	Counts towards
Select a minimum of three of the following courses:		**9**	
MSE/NE 509	Nuclear Materials		
MSE 540	Processing of Metallic Materials		
MSE 545	Ceramic Processing		
MSE 555	Polymer Technology and Engineering		
MSE 556	Composite Materials		
MSE 560	Microelectronic Materials Science and Technology		
MSE 561	Organic Chemistry Of Polymers		
MSE 565	Introduction to Nanomaterials		
MSE 566	Mechanical Properties of Nanostructured Materials		
MSE 576	Technology Entrepreneurship and Commercialization I		
MSE 577	Technology Entrepreneurship and Commercializatior II		
MSE 580	Materials Forensics and Degradation		
MSE 589	Solid State Solar and Thermal Energy Harvesting		
MSE 702	Defects In Solids		
MSE 703	Interaction of Electrons with Materials		
MSE 704	Interaction of Photons with Materials		
MSE 705	Mechanical Behavior Of Engineering Materials		
MSE 706	Phase Transformations and Kinetics		
MSE 708	Thermodynamics Of Materials		
MSE 709	Metastable Materials: Processing, Structure, and Properties		
MSE 710	Elements Of Crystallography and Diffraction		
MSE 712	Scanning Electron Microscopy		
MSE 715	Fundamentals Of Transmission Electron Microscopy		
MSE 718	Advanced Transmission Electron Microscopy		
MSE 721	Nanoscale Simulations and Modeling		
MSE 723	Materials Informatics		
MSE 731	Materials Processing by Deformation		
MSE 741	Principles of Corrosion		
MSE 751	Thin Film and Coating Science and Technology I		
MSE 752	Thin Film and Coating Science and Technology II		
MSE/NE 757	Radiation Effects on Materials		
MSE 760	Materials Science in Processing of Semiconductor Devices		

MSE 761	Polymer Blends and Alloys	
MSE 763	Characterization Of Structure Of Fiber Forming Polymers	
MSE 770	Defects, Diffusion and Ion Implantation In Semiconductors	
MSE 771	Materials Science of Nanoelectronics	
MSE 775	Structure of Semicrystalline Polymers	
MSE 791	Advanced Topics in Materials Science and Engineering	
MSE 795	Advanced Materials Experiments	
Total Hours		**9**

ECE 538	Integrated Circuits Technology and Fabrication		
ECE 739	Integrated Circuits Technology and Fabrication Laboratory		
ECE 792	Special Topics In Electrical Engineering (Self-Powered Nano-Systems)		

ECE 592	Special Topics In Electrical Engineering (Micro-Machined Sensors and Actuators)	
ISE 718	Micro/ Nano-Scale Fabrication and Manufacturing	
MAE 536	Micro/Nano Electromechanical Systems	
MAE 589	Special Topics In Mechanical and Aerospace Engineering (Micro-transducers)	
MSE 760	Materials Science in Processing of Semiconductor Devices	
MSE 771	Materials Science of Nanoelectronics	
MSE 791	(Introduction to Nano-Materials)	
Select three hours of the following Technical Electives:		3
BME 525	Bioelectricity	
BME 566	Polymeric Biomaterials Engineering	
ECE 557	Principles Of MOS Transistors	
ECE 724	Electronic Properties Of Solid-State Devices	
ECE 723	Optical Properties Of Semiconductors	
ECE 530	Physical Electronics	
ECE 592	Special Topics In Electrical Engineering (Bioelectricity and Neural Interfaces)	
ECE 592	Special Topics In Electrical Engineering (Organic Electronics and LCDs)	
ISE 714	Product Manufacturing Engineering for the Medical Device Industry	
Total Hours		**15**

Nanobiotechnology (Certificate)

With financial support from the North Carolina Biotechnology Center, UNC-Chapel Hill and NC State University offer graduate certificates in nanobiotechnology. Tremendous advances in development of nanoscale, nanostructured, and nano-enabled materials for biotechnology applications are currently taking place. In particular, the development of advanced materials (e.g., electronic materials, optical materials, biologically-derived materials, and nanoscale materials) will allow for the development of next generation systems for use in medicine, homeland defense, and agriculture. These systems will provide integration of multiple functions, miniaturization of devices, an increase in stability, and a decrease in cost. In order for universities, companies, and governmental agencies to pursue this highly specialized work, students must be trained at the graduate level to perform work at the interface of nanoscale science and biotechnology. The nanobiotechnology certificates are aligned with the need for highly trained professionals to nurture rapid growth of nanobiotechnology infrastructure in North Carolina. The keystone of the certificates at both universities is a core nanobiotechnology course (BME 540, 3 credit hours), in which lectures, open discussion, and student presentations will be used to introduce students to this area of study.

Plan Requirements

Code	Title	Hours	Counts towards
BME 540	Nanobiotechnology Processing, Characterization, and Applications	3	
Select nine hours of electives:		9	
BEC/CHE 562	Fundamentals of Bio-Nanotechnology (courses also offered at UNC-CH)		
CH 747	Nanobiotechnolog		
BIT 501	Ethical Issues in Biotechnology		
BME 566	Polymeric Biomaterials Engineering		
MSE 539	Advanced Materials		
Total Hours		**12**	

Renewable Electric Energy Systems (Certificate)

The Graduate Certificate in Renewable Electric Energy Systems provides graduate students with the opportunity to develop expertise in renewable

electric energy systems and advanced electric power grid technology in addition to their major area of graduate study.

Admissions

Applicants with appropriate background must meet one of the three following requirements:

- be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
- be a degree student in good standing in an NC State University graduate program; or
- have a Master's degree in a related field of study.

A student may obtain more than one graduate certificate in a different field. Each certificate must have at least nine (9) credit hours that are unique to it.

Requirements

The Graduate Certificate in Renewable Electric Energy Systems requires a minimum of 12 hours, including one 3-hour core course and 9 credit hours of electives to be selected from a list that contains relevant courses for the certificate. Students must maintain a minimum overall GPA of B (3.0).

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses			
ECE 552	Renewable Electric Energy Systems	3	
Select three of the following Advanced Courses:		9	
ECE 550	Power System Operation and Control		
ECE 581	Electric Power System Protection		
ECE 534	Power Electronics		
ECE 551	Smart Electric Power Distribution Systems		
ECE 535	Design of Electromechanical Systems		
ECE 585	The Business of the Electric Utility Industry		
ECE 589	Solid State Solar and Thermal Energy Harvesting		
ECE 736	Power System Stability and Control		
Total Hours		**12**	

Upstream Biomanufacturing (Certificate)

Graduate students and working professionals can now earn a new credential to kick-start or advance their career in the biopharmaceutical industry. The Upstream Biomanufacturing graduate certificates offer NC State graduate students and working professionals the opportunity for hands-on learning in BTEC's industry-scale simulated cGMP facilities.

Each certificate requires 12 hours of graduate coursework, which can be transferred to the Master of Biomanufacturing program. The majority of BTEC's graduate courses are offered in the evening or online to better accommodate working professionals.

The certificate can be completed in two part-time semesters.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
CHE 563	Fermentation of Recombinant Microorganisms		
BBS 526	Upstream Biomanufacturing Laboratory		
BEC 580	cGMP Fermentation Operations		
BEC 577	Advanced Biomanufacturing and Biocatalysis		
Elective Course		**3**	
Select a minimum of three credits of the following:			
BEC 588	Animal Cell Culture Engineering		
BEC 575	Global Regulatory Affairs for Medical Products		
BEC 525	Molecular Biology for Biomanufacturing		
BEC 545	Cell Line Development for Biomanufacturing		
BIT 510	Core Technologies in Molecular and Cellular Biology		

BIT 566	Animal Cell Culture Techniques	
Total Hours		**12**

Anthropology

We offer a 30-hour, two-year long graduate program culminating in the Master of Arts degree with specializations in cultural anthropology, biological anthropology, and archaeology. Our faculty conduct research across the globe and prepare our students to enter top-ranked doctoral programs and to find satisfying careers in non-academic and applied settings. Students have the option to complete a master’s thesis, which we recommend for those considering going on to a PhD program, or a capstone project for those considering non-academic careers.

Financial Support

A limited number of Graduate Student Assistantships are available on a competitive basis.

Admissions Requirements

In addition to general Graduate School requirements, applicants are required to provide a completed application, including transcripts, three letters of recommendation, a personal statement, and a writing sample. CV or resume is optional but encouraged. GRE scores are not required. The deadline for completed applications is January 10. The curriculum is set for fall admission only.

Master's Degree Requirements

The M.A. degree requires a total of 30 credit hours. All students take an introduction to anthropological research course in their first semester (ANT 501) and select a specialty area, such as archaeology, bioarchaeology, or cultural anthropology. Students who write a master's thesis will take six hours of thesis research credit (ANT 695). Students completing a capstone project (also known as a non-thesis, or Option B) take one independent study (ANT 598) and one additional course in place of the six hours of ANT 695 credit.

Degrees

Communications

The Master of Science program in communication is designed to provide graduate-level expertise for solving problems in modern organizations and social systems from a communication perspective. The curriculum addresses issues concerned with interpersonal, relational and technologically mediated communication systems essential to modern, networked organizations and societies. Its graduates will acquire advanced-level expertise in communication theory, research, and applications that will improve processes and enhance outcomes within and across diverse social systems. The degree prepares students for higher-level positions in communication professions and for advanced degree programs (e.g., Ph.D. programs).

Admission Requirements

Applicants should have a minimum 3.0 GPA in the undergraduate major and a minimum of 3.0 over the last 60 hours of undergraduate work.

Master's Degree Requirements

The degree requires 36 credit hours with a minimum of 27 credit hours taken in communication. Students will be required to complete 9 hours of core requirements, and 27 hours of electives, 9 of which can be taken outside of the department with the approval of the graduate advisor. Students can also take up to 6 internship or independent study credit hours. Students on the thesis track can take up to 6 thesis credit hours.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Communication, Rhetoric, and Digital Media

The Ph.D. Program in Communication, Rhetoric, and Digital Media prepares doctoral students to analyze the social, cultural, rhetorical, philosophical, and political dimensions of information technologies, new communication media, and digital texts, and to actively engage digital media through research, criticism, production, and practice.

Students work with program faculty from the departments of Communication and English and with affiliated faculty from departments across the university and the broader UNC system to study oral, written, visual, computational, and multimodal forms of communication and rhetoric; to examine the transformation of communication in the context of converging digital media and communication networks; and to address the theoretical and practical challenges of innovative, interdisciplinary research.

Students can create programs of study in areas such as Social Media, Interpersonal Communication, Environmental Communication, Critical Making, Emerging Digital Genres, Multimedia Research in Digital Media, Composition Studies, Digital Humanities, Rhetoric Theory, Digital Rhetoric, Visual Rhetoric, Digital Media Production, Science and Technology Studies, Risk Communication, Organizational Communication, Mobile Communication, Technology and Pedagogy, Game Studies, Online Information Design, Public Relations, Technical and Professional Communication, Digital Literacies, Transcultural Communication, Visual Communication, and Cultural Studies.

Faculty guide students in their work by using a broad range of social scientific and humanistic methods in which they specialize. The program offers comprehensive mentoring for professional development, diverse opportunities for teaching experience, and research assistantships associated with grant-funded faculty projects. CRDM faculty and students collaborate with colleagues in science and technology fields across the university and the Research Triangle.

Our graduates have been very successful finding employment in a variety of positions in academia (both at research-intensive universities and at teaching-oriented liberal arts colleges), government and corporate organizations, where there is a growing demand for the interdisciplinary skill sets developed in CRDM.

Admission Requirements

Master’s degree in Communication, English, Rhetoric, or other relevant field with GPA of 3.0 or better. Master’s level work should include one quantitative or qualitative methods course, as well as three courses in an approved disciplinary area. These hours do not count toward the doctoral degree. Disciplinary areas include: composition studies, including writing across the curriculum, interpersonal/group communication, media studies, organizational communication or public relations, rhetorical studies, and technical communication.

Applicants who are otherwise well qualified may make up these courses after admission. Three reference letters, a statement of goals and interests, a resume of work experience, and a writing sample are also required for application to the program. GRE is not required. The application deadline is January 15th.

Ph.D. Degree Requirements

A minimum of 56 hours beyond the Master's degree are required to complete the Ph.D. program: 15 credit hours of core courses, 3 hours of research methods, 6 hours of professional preparation, 12 hours in an elective focus area, and 20 hours of research and dissertation.

Student Financial Support

The CRDM program offers a limited number of Teaching Assistantships, with a stipend, health insurance, and tuition (excluding fees). Teaching Assistants will be assigned according to their interests and qualifications, as well as departmental needs, to either the Communication or the

English Department with the possibility of teaching in both departments during their course of study. Those who do not have sufficient qualifications to teach in the first semester will participate in a training program. Some Research Assistantships may also be available.

Creative Writing

The Department of English offers a two-year studio/academic program in fiction or poetry leading to the Master of Fine Arts degree. The program provides an opportunity for students of superior and demonstrated ability in imaginative writing to develop their skills and critical judgment through the practice of writing and the study of literature. The aim of the program is to prepare talented students for careers in writing. Degree candidates are expected to produce a book-length work of literary value and publishable quality.

Admission Requirements

Overall GPA of 3.0 or higher; applicants should submit GRE scores (general aptitude and analytical writing); one official transcript of all undergraduate and graduate work; two letters of recommendation; and two writing samples, one creative, one critical. Creative sample: for fiction, two short stories, or for a novel, three chapters (or one chapter and a short story) totaling 25-40 pages; for poetry, 12 complete poems. Critical sample: no more than 15 pages of writing demonstrating your ability to succeed in graduate-level literature classes, a required part of the MFA curriculum.

Requirements for the MFA in Creative Writing

Candidates for the MFA degree must complete a total of 36 credits. Eighteen of these are taken in the area of writing specialization. These include workshop courses (12 credits) and thesis (6 credits). The remaining credits are taken in literature (6 credits) and elective areas (12 credits, including 6 credit hours of teaching preparation for those on a composition teaching assistantship). In their final semester, students must pass a comprehensive written examination on writing craft, based on a book list selected jointly by the student and the faculty. The final thesis must be a book-length manuscript in the student's field of interest. In fiction, an approximate 200 pages are expected; in poetry, 60 pages. See program website for specific requirements by concentration.

Student Financial Support

All students admitted to the MFA program are eligible for teaching assistantships. TAs in the MFA train to teach undergraduate composition courses, and a few selected creative writing classes.

Other Relevant Information

Application deadline is February 1. Students are admitted for the fall semester only.

The English department has a long tradition of academic and literary excellence, including its heritage of writers from Guy Owen to Lee Smith. The strength of NCSU in the sciences offers students the opportunity to do creative work that engages with issues of technology and its effect on individuals and institutions that are not typically addressed in fine arts programs.

Through the NC State Literary Readings Series, the department sponsors readings and visits by distinguished poets, fiction and non-fiction writers.

English

The M.A. is a 33-hour program offered in four concentrations: literature, rhetoric and composition, linguistics and film studies. Regardless of which path you choose, you'll select from a broad array of courses that will help you meet your personal and professional goals.

Admissions Requirements

Students must submit a personal statement, writing sample, and three letters of recommendations. The application deadline is June 15 for fall semester admission and November 1 for spring. The application deadline to be considered for a teaching assistantship is February 1. Students are admitted for either the fall or spring semesters.

Requirements for MA in English

We offer four areas of concentration that represent distinct dimensions of our discipline. Focus Tracks are as follows:

- Film Studies (p. 590)
- Linguistics (p. 591)
- Literature (p. 591)
- Rhetoric and Composition (p. 593)

Degrees earned will be distributed as: "Master of Arts in English" without focus area track specifications.

While all options share an emphasis on research and critical thinking, each provides diverse pathways for exploring culture and language. You'll hone your expertise through each concentration's core and elective curriculum. At the end of the 33-hour program, you'll fine-tune and showcase your knowledge through a capstone project.

Student Financial Support

Teaching assistantships are available for a limited number of promising students. Assistantships are awarded upon admission and are only available for full-time students who begin their graduate work in the fall semester. These students will work with an experienced faculty member during their first year in the program before teaching classes during their second year. Most TAs will teach composition in the First-Year Writing Program while a few others may teach linguistics or film studies.

English (MA)

Degree Requirements

Students may choose from the degree tracks below to complete coursework within a focus area.

Focus Tracks are as follows:

- Film Studies (p. 590)
- Linguistics (p. 591)
- Literature (p. 591)
- Rhetoric and Composition (p. 593)

Degrees earned will be distributed as: "Master of Arts in English" without focus area track specifications.

Film Studies Track

Code	Title	Hours	Counts towards
Research Courses		**6**	
ENG 587	Interdisciplinary Studies in English [1]		
ENG 676	Master's Project in English		
Core Courses		**15**	
Select nine hours of 500-level film coursework approved in conjunction with the academic committee [2]			
Select an additional six hours of elective courses approved in conjunction with the academic committee [3]			
Department Electives		**6**	
Select six hours of coursework in Literature, Rhetoric and Composition, or Linguistics approved in conjunction with the academic committee			
Open Electives		**6**	

Select six hours of open electives in any area, including film or another area of complementary study, approved in conjunction with the academic committee [4]	
Total Hours	**33**

1 An alternative course may be selected approved in conjunction with the academic committee

2 Excluding ENG 592 Special Topics in Film Styles and Genres

3 The electives may include an additional 500-level film studies course, ENG 592 Styles and Genres (this is a dual level/upper level undergraduate course for which ENG 592 students will do graduate-level work), or ENG 636 Directed Readings (S/U graded courses).

4 Courses may also include various sections of ENG 585 Studies In Film, ENG 592 Special Topics in Film Styles and Genres, or ENG 636 Directed Readings.

Linguistics Track

Code	Title	Hours	Counts towards
Distribution Requirement Courses		**6**	
Select six credit hours of coursework in Literature, Film, or Rhetoric and Composition approved in conjunction with the academic committee			
Linguistics Track Courses		**24**	
Linguistics Courses			
Select a minimum of five Linguistics courses approved in conjunction with the academic committee			
Elective Courses			
Select a minimum of three courses from English or complementary fields of study approved in conjunction with the academic committee			
Research Course		**3**	
ENG 676	Master's Project in English		
Total Hours		**33**	

Literature Track

Code	Title	Hours	Counts towards
Research Component Courses		**6**	
ENG 669	Literature, Methods, and the Profession [5]		
ENG 676	Master's Project in English [6]		
Distribution Requirement Courses		**12**	
Select one course from each of the following four areas listed under "Distribution Requirement Courses" listed below			
Literature Elective Courses		**9**	
Select three literature courses approved in conjunction with the academic committee [7]			
Open Elective Courses		**6**	
Select two elective courses in English or complementary fields of study approved in conjunction with the academic committee [8]			
Global Perspective Requirement (Co-Requisite)			
See "Global Perspective Requirement" for details below			
Total Hours		**33**	

5 ENG 669 is required in the first semester

6 ENG 676 is required in the final semester

7 Students may elect to explore broadly or to focus their coursework in an area of special interest.

8 Electives may be chosen from English or from complementary fields of study. TAs may count ENG 624 as an elective.

Distribution Requirement Courses

Select one course from each of the following areas listed below:

British Literature before 1600

Code	Title	Hours	Counts towards
ENG 509	Old English Literature		
ENG 510	Middle English Literature		
ENG 529	16th-Century Non-Dramatic English Literature		
ENG 551	Chaucer		
ENG 558	Studies In Shakespeare		
ENG 561	Milton		
ENG 578	English Drama To 1642		
ENG 582	Studies in Literature (when topic applies)		

British Literature after 1600

Code	Title	Hours	Counts towards
ENG 550	British Romantic Period		
ENG 560	British Victorian Period		
ENG 562	18TH-Century English Literature		

ENG 563	18TH-Century English Novel
ENG 564	Victorian Novel
ENG 570	20TH-Century British Prose
ENG 571	20TH-Century British Poetry
ENG 572	Modern British Drama
ENG 579	Restoration and 18th-Century Drama
ENG 582	Studies in Literature

American Literature

Code	Title	Hours	Counts towards
ENG 531	American Colonial Literature		
ENG 548	African-American Literature		
ENG 555	American Romantic Period		
ENG 565	American Realism and Naturalism		
ENG 573	Modern American Drama		
ENG 575	Southern Writers		
ENG 576	20TH-Century American Poetry		
ENG 577	20th-Century American Prose		
ENG 580	Literary Postmodernism		
ENG 582	Studies in Literature		

Rhetoric, Linguistics, Composition, Film Studies, Criticism or Theory

Code	Title	Hours	Counts towards
ENG 505	Writing Program Administration: Theory, Practice, and Research		
ENG 511	Theory and Research In Composition		
ENG 513	Empirical Research In Composition		
ENG 514	History Of Rhetoric		
ENG 515	Rhetoric Of Science and Technology		
ENG 516	Rhetorical Criticism: Theory and Practice		
ENG 523	Language Variation Research Seminar		
ENG 524	Introduction to Linguistics		
ENG 525	Variety In Language		
ENG 528	Sociophonetics		
ENG 532	Narrative Analysis		
ENG 533	Bilingualism and Language Contact		
ENG 534	Quantitative Analysis in Sociolinguistics		
ENG 536	Research Methods in Phonology		
ENG 539	Seminar In World Literature		
ENG 540	History Of Literary Criticism		
ENG 541	Literary and Cultural Theory		
ENG 549	Modern African Literature		
ENG 554	Contemporary Rhetorical Theory		
ENG 580	Literary Postmodernism		
ENG 581	Visual Rhetoric: Theory and Criticism		
ENG 582	Studies in Literature		
ENG 583	Studies In Rhetoric and Writing		
ENG 584	Studies In Linguistics		
ENG 586	Studies In Theory		

Global Perspective Requirement

The Global Perspectives requirement is intended to provide students with a greater understanding of language structure and a globalizing perspective on texts and culture. Student may fulfill this requirement in one of two ways:

1. Demonstrate language proficiency (by meeting one of the following options):
   a. Taking a reading exam administered by the Department of Foreign Languages and Literatures. The Foreign Language Department offers optional preparatory courses for students

planning to take the reading exam: FLS 401 Spanish Graduate Reading, FLF 401 French Graduate Reading, FLG 401 German Graduate Reading.

b. Enrolling in and passing with a C- or better a 300-400 level course taught in the language (not translation).*

c. Having an undergraduate major or minor in a foreign language within the past five years.*

d. Speaking a language other than English as your first language.*

2. Take a World Literature course or an approved alternative. This course will typically count toward the degree as a literature or unrestricted elective, but there may be some instances in which the course can fulfill a core requirement.

If you're considering doctoral work in literary study, we encourage you to consult with your advisor. In some cases, certifying language proficiency via reading exam may help satisfy a doctoral language requirement later on.

* *To document language proficiency via option B, C or D, contact the Graduate Services Coordinator.*

Select two courses from "Rhetoric Courses" or "Research Component Courses" listed below [9]			
Linguistics Course			
Select a Linguistics course approved in conjunction with the academic committee [10]			
Research Component Course		**6**	
Select one additional course from "Research Component Courses" listed below			
ENG 676	Master's Project in English [11]		
Department Electives		**6**	
Select six credit hours of coursework in Literature, Rhetoric and Composition, or Linguistics approved in conjunction with the academic committee			
Open Elective Courses		**6**	
Select two elective courses approved in conjunction with the academic committee [12]			
Total Hours		**33**	

[9] May include special topics courses in areas such as computers and composition, emerging genres, writing across the curriculum, and writing program administration (usually offered as ENG 583 Studies In Rhetoric and Writing.

[10] ENG 525 Variety In Language is recommended if you are planning a teaching career. Note: If you choose a linguistics course to fulfill your research methods requirement (e.g., ENG 527 Discourse Analysis), you may take an additional rhetoric or composition elective in this slot instead.

[11] The capstone project should be on a topic that draws from scholarship in the area of rhetoric and composition or that is of clear relevance in the field. It should be conceived to address a specific audience and designed for a specific situation; thus, it could be composed as an article targeting a specific journal or conference; a curriculum plan or teaching materials for a particular instructional agenda; an online resource fulfilling a well defined need; etc. The master's project should be developed in consultation with faculty in rhetoric and composition and must be approved by the advisor for the concentration.

[12] "Open Elective Courses" may be from rhetoric and composition, linguistics, literature, digital humanities or other areas within the English Department, or, when appropriate to meet particular goals, from the Department of Communication, Foreign Languages, History, Psychology, the College of Education, or other fields.

Rhetoric Courses

These courses address major issues and concepts in rhetoric ranging from Greek antiquity to contemporary poststructuralism, and applications from public speeches to popular culture to teaching to technical communication.

Code	Title	Hours	Counts towards
Select one of the following courses:			
ENG/COM 514	History Of Rhetoric		
ENG 515	Rhetoric Of Science and Technology		
ENG/COM 516	Rhetorical Criticism: Theory and Practice		
ENG/COM 554	Contemporary Rhetorical Theory		

Research Component Courses

Before embarking on your capstone research, select one research methods course congruent with your disciplinary interests.

Code	Title	Hours	Counts towards
Select one of the following courses to fulfill the "Research Component Course" requirement:			

ENG 506	Verbal Data Analysis
ENG 513	Empirical Research In Composition
ENG/COM 516	Rhetorical Criticism: Theory and Practice
ENG 527	Discourse Analysis
ENG 532	Narrative Analysis
ENG/COM 581	Visual Rhetoric: Theory and Criticism
ENG 583	Studies In Rhetoric and Writing [13]
ENG 585	Studies In Film [14]
ENG 587	Interdisciplinary Studies in English [15]

[13] ENG 583 Studies In Rhetoric and Writing when topic is methodological

[14] ENG 585 Studies In Film when focused on pertinent methodologies

[15] ENG 587 Interdisciplinary Studies in English when focused on pertinent methodologies

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

English (MA): Literature Concentration

Degree Requirements

Code	Title	Hours	Counts towards
Research Component Courses		**6**	
ENG 669	Literature, Methods, and the Profession [1]		
ENG 676	Master's Project in English [2]		
Distribution Requirement Courses		**12**	
Select one course from each of the following four areas listed under "Distribution Requirement Courses" listed below			
Literature Elective Courses		**9**	
Select three literature courses approved in conjunction with the academic committee [3]			
Open Elective Courses		**6**	
Select two elective courses in English or complementary fields of study approved in conjunction with the academic committee [4]			
Global Perspective Requirement (Co-Requisite)			
See "Global Perspective Requirement" for details below			
Total Hours		**33**	

1. ENG 669 is required in the first semester
2. ENG 676 is required in the final semester
3. Students may elect to explore broadly or to focus their coursework in an area of special interest.
4. Electives may be chosen from English or from complementary fields of study. TAs may count ENG 624 as an elective.

Distribution Requirement Courses

Select one course from each of the following areas listed below:

British Literature before 1600

Code	Title	Hours	Counts towards
ENG 509	Old English Literature	3	
ENG 510	Middle English Literature	3	
ENG 529	16th-Century Non-Dramatic English Literature	3	
ENG 551	Chaucer	3	
ENG 558	Studies In Shakespeare	3	
ENG 561	Milton	3	
ENG 578	English Drama To 1642	3	
ENG 582	Studies in Literature (when topic applies)	3	

British Literature after 1600

Code	Title	Hours	Counts towards
ENG 550	British Romantic Period	3	
ENG 560	British Victorian Period	3	
ENG 562	18TH-Century English Literature	3	
ENG 563	18TH-Century English Novel	3	
ENG 564	Victorian Novel	3	
ENG 570	20TH-Century British Prose	3	
ENG 571	20TH-Century British Poetry	3	
ENG 572	Modern British Drama	3	

ENG 579	Restoration and 18th-Century Drama	3
ENG 582	Studies in Literature	3

American Literature

Code	Title	Hours	Counts towards
ENG 531	American Colonial Literature	3	
ENG 548	African-American Literature	3	
ENG 555	American Romantic Period	3	
ENG 565	American Realism and Naturalism	3	
ENG 573	Modern American Drama	3	
ENG 575	Southern Writers	3	
ENG 576	20TH-Century American Poetry	3	
ENG 577	20th-Century American Prose	3	
ENG 580	Literary Postmodernism	3	
ENG 582	Studies in Literature	3	

Rhetoric, Linguistics, Composition, Film Studies, Criticism or Theory

Code	Title	Hours	Counts towards
ENG 505	Writing Program Administration: Theory, Practice, and Research	3	
ENG 511	Theory and Research In Composition	3	
ENG 513	Empirical Research In Composition	3	
ENG 514	History Of Rhetoric	3	
ENG 515	Rhetoric Of Science and Technology	3	
ENG 516	Rhetorical Criticism: Theory and Practice	3	
ENG 523	Language Variation Research Seminar	3	
ENG 524	Introduction to Linguistics	3	
ENG 525	Variety In Language	3	
ENG 528	Sociophonetics	3	
ENG 532	Narrative Analysis	3	
ENG 533	Bilingualism and Language Contact	3	
ENG 534	Quantitative Analysis in Sociolinguistics	3	
ENG 536	Research Methods in Phonology	3	
ENG 539	Seminar In World Literature	3	
ENG 540	History Of Literary Criticism	3	
ENG 541	Literary and Cultural Theory	3	
ENG 549	Modern African Literature	3	
ENG 554	Contemporary Rhetorical Theory	3	
ENG 580	Literary Postmodernism	3	
ENG 581	Visual Rhetoric: Theory and Criticism	3	
ENG 582	Studies in Literature	3	
ENG 583	Studies In Rhetoric and Writing	3	
ENG 584	Studies In Linguistics	3	
ENG 586	Studies In Theory	3	

Global Perspective Requirement

The Global Perspectives requirement is intended to provide students with a greater understanding of language structure and a globalizing perspective on texts and culture. Student may fulfill this requirement in one of two ways:

1. Demonstrate language proficiency (by meeting one of the following options):
   a. Taking a reading exam administered by the Department of Foreign Languages and Literatures. The Foreign Language Department offers optional preparatory courses for students planning to take the reading exam: FLS 401 Spanish Graduate Reading, FLF 401 French Graduate Reading, FLG 401 German Graduate Reading.
   b. Enrolling in and passing with a C- or better a 300-400 level course taught in the language (not translation).*
   c. Having an undergraduate major or minor in a foreign language within the past five years.*
   d. Speaking a language other than English as your first language.*

2. Take a World Literature course or an approved alternative. This course will typically count toward the degree as a literature or unrestricted elective, but there may be some instances in which the course can fulfill a core requirement.

If you're considering doctoral work in literary study, we encourage you to consult with your advisor. In some cases, certifying language proficiency via reading exam may help satisfy a doctoral language requirement later on.

* *To document language proficiency via option B, C or D, contact the Graduate Services Coordinator.*

Digital Humanities (Certificate)

The Certificate in Digital Humanities is a designed for students from any discipline to construct a curriculum in digital humanities training and project work. The certificate is currently coordinated in the English department with participation across CHASS and other colleges.

The Graduate Certificate consists of a student-proposed curriculum of four 3-credit courses which must collectively satisfy the program's three requirements: contexts, training, and applications. In consultation with the coordinator, students can propose their own tracks through the certificate drawing from a broad array of approved courses at NC State as well as at UNC and Duke, as part of the Triangle Digital Humanities Network. Rather than insisting on a prescriptive definition and preset curriculum for "digital humanities," this certificate program encourages students to adapt course offerings in digital humanities or digital media to their own evolving research and professional interests in any variety of fields.

To qualify for admission to the Graduate Certificate in Digital Humanities, students must be enrolled in, or have completed, a Master's or PhD program at an accredited university. Applicants can be either non-degree or degree students. Degree students must have at the time of application a 3.00 grade point average in their graduate degree program. Non-degree students must have a final grade point average that is at least 3.00. Current degree students in English or CRDM may include no more than six (6) credits from the Certificate program in their degree program. Current degree students in History can apply up to nine (9) towards a

doctorate. Students seeking the certificate from other programs must consult with those graduate coordinators to confirm allowed credits toward degree. The certificate will accept up to three hours of transfer credit from courses included in the curriculum. All GCP requirements must be completed within three (3) calendar years beginning on the date the student commences applicable courses.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
Select 12 credit hours of electives: [1]			
ENG 506	Verbal Data Analysis [1]		
ENG 519	Online Information Design and Evaluation

Total Hours		**12**	

1. Additional courses available at UNC Chapel Hill
2. Prerequisites in the College of Design: ADN 419 Creative Technology Studio I requires D105 and ADN 219 Digital Imaging I
3. Prerequisites in the College of Design: ADN 561 Graduate Studio II: Exploring the HyperReal: Materiality, Reality and Speculation requires ADN 460 Creative Technology Studio II and ADN 419 Creative Technology Studio I.
4. Prerequisite: ECI 511 Introduction to Learning Design and Technology, ECI 514 Developing and Delivering Online Instruction

Foreign Language and Literature

The Master's degree in Foreign Languages and Literature offers concentrations in both French Language and Literature and Spanish Language and Literature.

Admission Requirements

- A baccalaureate degree from an accredited college or university
- Undergraduate GPA of 3.0 or above
- Narrative statement of professional and personal objectives (in English, 300 words).
- Language proficiency as determined by a writing sample and a speaking sample in the target language (French or Spanish)
- Some applicants may be given provisional admittance. Students admitted provisionally must complete at least 9 hours of 500-level courses in the target language, earning grades of B or higher in order to receive full graduate standing.

Degree Requirements

The program requires at least 30 hours of course work and a culminating project. Each student's program is tailored to enhance his or her career objectives. Students who plan to pursue a Ph.D. or teach in a community college or university receive the requisite training and assistance.
K-12 teachers who already have "Initial" or "A" licensure may earn "M" licensure by taking 30 hours in specified disciplines and completing an Action Research Project as their culminating project. K-12 teachers who already hold "A" licensure can add-on English as a Second Language (ESL) licensure by taking 36 hours in specified disciplines.

Student Financial Support

Graduate assistantships are available to students in both the French and Spanish concentrations and are awarded by open competition and based on the strength of the admissions application.

Other Relevant Information

Students are admitted for the fall semester only. February 1 is the application deadline for students interested in receiving full consideration for a teaching assistantship. (Interest is indicated on the Graduate School Admissions application.) February 15 is the deadline for international students and May 1 for domestic students.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

History

Admission Requirements

Admission to the M.A. in History and Public History programs require: a bachelor's degree from an accredited college or university; transcripts; personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of approximately ten pages. Admission to the Ph.D. in Public History requires a bachelor's degree from an accredited college or university; transcripts; personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of approximately ten pages.

Master's Degree Requirements

Master of Arts Degree in History: This program requires a total of 30 credit hours, including 6 hours in core courses, 12 credit hours in a major field, 6 credit hours in a minor field, and 6 credit hours in thesis work. Each student's program is tailored to enhance his or her career objectives. Social studies teachers, for example, may earn advanced competency on completion of the M.A. in history with additional course work in education. Similarly, students who plan to pursue a Ph.D. degree receive the requisite training and assistance. Master of Arts Degree in Public History: This program requires 36 credit hours of course work. Students may take a non-thesis or thesis option. Half the hours fall in historical studies, the rest in applied history classes, including innovative courses in museum studies and heritage studies. Students perform internships in their own special areas of interest.

Doctoral Degree Requirements

The Ph.D. program in Public History requires 72 credit hours. Students complete 21 credit hours in a public history field, including an internship; 21 credit hours in a history field; 6 credit hours in an outside field; and 24 credit hours of dissertation work.

Student Financial Support

Graduate teaching assistantships are available to students in all programs and are awarded by open competition.

Other Relevant Information

The application deadline for fall semester is January 15; students are admitted for the fall semester only.

International Studies

The Master of International Studies (MIS) is a 36 credit, non-thesis professional degree program that prepares students for careers in government service, non-profit administration, international business, and international student services and study abroad. Located in the School of Public and International Affairs, the MIS degree draws upon faculty and courses from colleges and departments across the university. Approximately half of the course work for the degree is devoted to developing international knowledge and competencies. The remaining coursework is comprised of regional, topical, professional or technical specializations designed by students in consultation with their faculty advisors. The program has an excellent internship program that contributes to job placement upon graduation.

Admission Requirements

Applicants must provide GRE scores and a current resume in addition to other application materials required by the Graduate School.

Degree Requirements

The requirements for the MIS degree are as follows:

1. 36 credit hours of course work;
2. Core Curriculum (15 hours). One course from each of the following five groups:
   Group A - International Relations
   Group B - Comparative Politics/Societies
   Group C - International Law and Organization
   Group D - International Economy/Development
   Group E - Research Methods
3. Individualized specialization (12-15 hours). The specialization may be in a geographical region (e.g., Europe, Latin America), an international topic (e.g., security, global governance, sustainable development), a professional field (e.g., public administration, non-profit management), or a technical specialty (e.g., Geographic Information System-GIS);
4. Capstone seminar (3 hours) and oral presentation of work to faculty and peers;
5. International experience or study abroad; and
6. Competency in a foreign language as determined by the Department of Foreign Languages and Literatures (FLL).

Liberal Studies

The Master of Arts in Liberal Studies (MALS) program is an interdisciplinary graduate program administered by the College of Humanities and Social Sciences. This is a broad, interdisciplinary program of part-time or full-time graduate study that integrates and expands the student's knowledge and awareness and that is geared to the student's personal interests. Each student, in consultation with an academic advisor, designs an individual program of study around an interdisciplinary theme or topic that is of intrinsic interest to the student or that relates to the student's professional or vocational interests. Students take graduate courses across a range of NC State departments as well as MALS seminars designed specifically for the program.

Admissions Requirements

Students entering the Master's program in liberal studies must have an undergraduate degree. In addition to the material required by the Graduate School, students applying are asked to submit a four to five page statement describing their objectives in doing a degree in liberal studies and a resume. GRE scores are not required. All applicants are interviewed.

Master's Degree Requirements

Thirty hours of course work made up of:

1. three MALS seminars or two MALS seminars and a research methods course,
2. 18 hours representing the student's interdisciplinary theme or concentration, and
3. a three-hour culminating project.

Examples of concentrations that are well supported by graduate courses in the NC State curriculum are: science, technology and society, the American experience and leadership.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Psychology

The Department of Psychology offers five concentrations leading to the Ph.D.:

- Applied Social and Community Psychology,
- Human Factors and Applied Cognition,
- Industrial-Organizational Psychology,
- Lifespan Developmental Psychology, and
- School Psychology.

An additional master's degree program is available for School Psychology.

Admission Requirements

With the exception of the School Psychology master's degree program, admitted students enter doctoral training programs. Applicants must be graduates of accredited institutions. Although a degree in psychology is not required, applicants must demonstrate that their academic backgrounds have prepared them for doctoral training in their specialty area. A strong academic record, GRE Test Scores are optional for Lifespan Developmental Psychology and Industrial-Organizational Psychology (GRE Scores are not accepted for Applied Social and Community Psychology, Human Factors and Applied Cognition and School Psychology), and three satisfactory letters of recommendation are required for admission. Research experience is important. Match of applicants' research interests with current faculty research is an important consideration.

Master's Degree Requirements

The department offers the master's degree in school psychology; students in the other concentrations are admitted only to the doctoral program. Students completing the school psychology master's program are eligible for licensure as public school psychologists in North Carolina. The program requires a total of 60 credit hours, including two years of course work, a summer practicum program, and a full-time internship in the third year.

For students entering doctoral programs, the master's degree is awarded only in special circumstances, typically when a student in good standing chooses not to continue in the doctoral program.

Doctoral Degree Requirements

The graduate program for each doctoral student is determined in conjunction with the student's graduate advisory committee and tailored to the needs, interests, and accomplishments of the individual. Requirements vary across concentrations, but all doctoral plans of work include at least 72 credit hours.

Student Financial Support

Many graduate students receive financial support in the form of teaching or research assistantships. All admitted applicants are considered for assistantships.

Degrees

- Psychology (MS): School Psychology Concentration (p. 623)
- Psychology (PhD) (p. 625)
- Psychology (PhD): Applied Social and Community Psychology Concentration (p. 627)
- Psychology (PhD): Human Factors and Applied Cognition Concentration (p. 629)

Public Administration

Public Administration students at NC State are prepared for a career in public service. They will develop the leadership tools and knowledge they need to serve, manage and lead public or nonprofit organizations or to conduct cutting-edge academic research.

Admission Requirements

The deadline to apply to the MPA program is May 15 (March 1 for International applicants) for Fall admission and November 1 (March 1 for International applicants) for Spring admission. The deadline to apply to the Ph.D. program is March 15 (March 1 for International applicants) for Fall admission. Completed applications received by February 1 will receive consideration for all available university and department scholarships and assistantships.

Master's Degree Requirements

The MPA degree requires the completion of 42 graduate credit hours:

- 24 credit hours of core coursework
- 18 credit hours of elective coursework
- Students lacking the equivalent of one year of full-time public service experience must complete a 3 credit hour internship as part of their elective coursework.

Prerequisites for the program are an undergraduate course in microeconomics and an intermediate statistics (equivalent to ST 311) course. Students who do not have one or both of these prerequisite courses must successfully complete equivalent coursework prior to graduation. The MPA is an Option B Master's degree with a one-person committee and no final oral examination. Details on the degree requirements can be found on the Master of Public Administration (p. 638) page.

The mission of the MPA program is to develop principled and skilled public service professionals who fulfill leadership roles within governmental and nonprofit organizations. We focus on practical and problem-solving skills and emphasize public service values -- including efficiency, effectiveness, equity and accountability.

To accomplish this mission, the MPA program offers elective coursework in public management, nonprofit management, urban management, financial management, organizational leadership, public policy and justice administration.

Doctoral Degree Requirements

The Ph.D. degree requires the completion of 72 graduate credit hours:

- 60 credit hours of coursework (18 hours of relevant graduate credit from a prior Master’s degree may be used; total degree hours must include at least 36 hours at the doctoral level)
- 12 credit hours of dissertation research

Details on the degree requirements can be found on the Ph.D. in Public Administration (p. 639) page.

Each student will select or develop one or two fields of specialization.

Student Financial Support

A limited number of fellowships and graduate assistantships are offered by the Department of Public Administration. Contact the Department for more information. Other forms of student aid are described in the financial aid section of the Graduate Catalog.

Other Relevant Information

The Department of Public Administration also offers Graduate Certificates in Public Policy and Nonprofit Management, either of which can be taken alone or in conjunction with a graduate degree.

Degrees

- Public Administration (MR) (p. 638)
- Public Administration (PhD) (p. 639)
- Public Administration (Minor) (p. 640)
- Nonprofit Management (Certificate) (p. 640)
- Policy Analysis (Certificate) (p. 641)

Nonprofit Management (Certificate)

A Graduate Certificate in Nonprofit Management is available to students, including NC State degree students, who have a Bachelor's degree from an accredited university. The Certificate requires 15 credit hours of course work and substantive nonprofit experience. The courses are designed to provide the basic management knowledge and skills needed in nonprofit organizations.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
PA 531	Human Resource Management in Public and Nonprofit Organizations		
PA 536	Management of Nonprofit Organizations		
PA 538	Nonprofit Budgeting and Financial Management		
PA 539	Fund Development		
Select up to two of the following:		6	
PA 514	Management Systems		
PA 516	Effective Communications for Public Administrators		
PA 525	Organizational Development and Change Management		
PA 532	Contract Negotiation and Mediation in the Public and Nonprofit Sectors		
PA 540	Grant Writing for Public Administrators		
PA 546	Seminar in Program Evaluation		
COM 546	Nonprofit Marketing and Public Relations		
Total Hours		**18**	

Substantive Experience Requirement

The Substantive Experience Requirement can be met by:

- Prior (or continuing) Experience:
  - Full-time employment with a nonprofit (at least one year by completion of certificate program)
  - Serving on a nonprofit board or chairing a nonprofit's standing committee (at least one year by completion of certificate program)
- In-program Work:
  - Internship or independent study with a nonprofit (at least 1 credit hour)
  - Completing a course with a field component (e.g., PA 546 or PA 525)

Public History

Admission Requirements

Admission to the M.A. in History and Public History programs require: a bachelor’s degree from an accredited college or university; transcripts; personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of approximately ten pages. Admission to the Ph.D. in Public History requires a bachelor’s degree from an accredited college or university; transcripts; personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of approximately ten pages.

Master's Degree Requirements

Master of Arts Degree in History: This program requires a total of 30 credit hours, including 6 hours in core courses, 12 credit hours in a major field, 6 credit hours in a minor field, and 6 credit hours in thesis work. Each student's program is tailored to enhance his or her career

objectives. Social studies teachers, for example, may earn advanced competency on completion of the M.A. in history with additional course work in education. Similarly, students who plan to pursue a Ph.D. degree receive the requisite training and assistance. Master of Arts Degree in Public History: This program requires 36 credit hours of course work. Students may take a non-thesis or thesis option. Half the hours fall in historical studies, the rest in applied history classes, including innovative courses in museum studies and heritage studies. Students perform internships in their own special areas of interest.

Doctoral Degree Requirements

The Ph.D. program in Public History requires 72 credit hours. Students complete 21 credit hours in a public history field, including an internship; 21 credit hours in a history field; 6 credit hours in an outside field; and 24 credit hours of dissertation work.

Student Financial Support

Graduate teaching assistantships are available to students in all programs and are awarded by open competition.

Other Relevant Information

The application deadline for fall semester is January 15; students are admitted for the fall semester only.

Social Work

The mission of the MSW program is to prepare students for practice that is sensitive to the social, economic, cultural, demographic and political contexts that shape our state and beyond. Within a framework emphasizing professional ethics, social justice, diversity, strengths and community engagement, the Department seeks to equip students for leadership roles and effective practice.

Admission Requirements

(scroll down to see additional requirements for Advanced Standing applicants)

- Bachelor's degree (any major) from an accredited liberal arts college or university.
- GPA of 3.0 or higher for the last 60 hours of academic work. Students with a GPA less than 3.0 but greater than 2.5 for the last 60 hours of academic course work must have official Graduate Record Exam (GRE) or Miller Analogies Test (MAT) scores forwarded to the Graduate School.
- Liberal arts coursework in the social sciences, humanities, biology, and statistics.
  - Four courses in the social sciences (e.g. anthropology, economics, ethnic studies, political science, psychology, social work, sociology), with a grade of C or better.
  - Three courses in the humanities (e.g. comparative religions, history, linguistics, literature, modern or classic languages, philosophy and ethics, visual and performing arts), with a grade of C or better.
  - A biology and a statistics course, with a grade of C or better.
- A variety of life and work experience in human services, paid or volunteer. Note: In accordance with the CSWE standards, students cannot receive academic credit based on life and work experience.

Additional Requirements for Advanced Standing

In addition to the above admissions requirements, the following applies to Advanced Standing applicants:

- Applicants with a BSW degree from an accredited program and a GPA of at least 3.5 (on a 4.0 scale) for the last 60 credit hours of academic work are eligible to apply for Advanced Standing status. Students with a GPA less than 3.5 but greater than 2.5 for the last 60 hours of academic course work must have official Graduate Record Exam (GRE) or Miller Analogies Test (MAT) scores forwarded to the Graduate School.

- BSW students who graduate prior to the first semester of Advanced Standing coursework will be considered for admission.
- Applicants must have grades of "B" or better in all social work courses.
- One of three references must be from Field/Task Supervisor or Field Director/Liaison.

Master's Degree Requirements

The MSW Program provides two options: The Traditional 60-credit program, and the 39-credit Advanced Standing Program, which is designed for BSW graduates only.

We do not offer a part-time curriculum at this time.

Other Relevant Information

The MSW program is accredited by The Council on Social Work Education (CSWE).

Sociology

For students who wish to become critical analysts of social problems, NC State's graduate program in sociology offers excellent training for academic, research and applied careers.

The 72-credit hour doctoral program is an intellectually stimulating and academically rigorous, yet supportive, environment.

Doctoral students have the opportunity to:

- Pursue a wide range of research topics and interests.
- Receive top-notch methodological training.
- Gain valuable teaching skills and experience.
- Collaborate on scholarly and applied research with our outstanding faculty and fellow graduate students.

Admitted Ph.D. students also benefit from a competitive award package that includes a 9-month stipend, health insurance, tuition remission, office space, and a travel funding allotment. Program alumni go on to succeed in academic and applied careers.

Technical Communication

The Master of Science in technical communication is designed to prepare professional communicators for advanced positions in industry and research organizations; with appropriate electives, students can prepare for careers in web design and development, software documentation, environmental communication, medical writing, industrial training in writing and editing, publications management and related areas.

Admission Requirements

Applicants should submit a personal statement, a resume, a writing sample, and three letters of recommendation. The application deadline is June 15. Those who wish to be considered for teaching assistantships should complete the application by February 1. Students are admitted for either the fall or spring semesters.

Requirements for MS in Technical Communication

The program requires 33 semester hours: 15 hours in the fields of technical writing, publication management, rhetoric and a projects course; the remaining hours are taken in applications, theory and methods and cross-disciplinary courses. Students must also satisfy a requirement for one semester of professional work experience.

Student Financial Support

Teaching assistantships are available for a limited number of promising students. These students work with an experienced teacher in their first year to assist in 300-level professional writing courses. They devote half time in subsequent semesters to teaching technical communication.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

TEXT

Graduate Certificates - College of Humanities and Social Sciences

Certificates

- Digital Humanities (Certificate) (p. 604)
- Nonprofit Management (Certificate) (p. 640)
- Nuclear Nonproliferation Science and Policy (Certificate) (p. 660)
- Policy Analysis (Certificate) (p. 641)
- Professional Communication and Managerial Skills (Certificate) (p. 661)
- Public Policy (Certificate) (p. 662)

Digital Humanities (Certificate)

The Certificate in Digital Humanities is a designed for students from any discipline to construct a curriculum in digital humanities training and project work. The certificate is currently coordinated in the English department with participation across CHASS and other colleges.

The Graduate Certificate consists of a student-proposed curriculum of four 3-credit courses which must collectively satisfy the program's three requirements: contexts, training, and applications. In consultation with the coordinator, students can propose their own tracks through the certificate drawing from a broad array of approved courses at NC State as well as at UNC and Duke, as part of the Triangle Digital Humanities Network. Rather than insisting on a prescriptive definition and preset curriculum for "digital humanities," this certificate program encourages students to adapt course offerings in digital humanities or digital media to their own evolving research and professional interests in any variety of fields.

To qualify for admission to the Graduate Certificate in Digital Humanities, students must be enrolled in, or have completed, a Master's or PhD program at an accredited university. Applicants can be either non-degree or degree students. Degree students must have at the time of application a 3.00 grade point average in their graduate degree program. Non-degree students must have a final grade point average that is at least 3.00. Current degree students in English or CRDM may include no more than six (6) credits from the Certificate program in their degree program. Current degree students in History can apply up to nine (9) towards a doctorate. Students seeking the certificate from other programs must consult with those graduate coordinators to confirm allowed credits toward degree. The certificate will accept up to three hours of transfer credit from courses included in the curriculum. All GCP requirements must be completed within three (3) calendar years beginning on the date the student commences applicable courses.

Plan Requirements

1 Additional courses available at UNC Chapel Hill

2 Prerequisites in the College of Design: ADN 419 Creative Technology Studio I requires D105 and ADN 219 Digital Imaging I

3 Prerequisites in the College of Design: ADN 561 Graduate Studio II: Exploring the HyperReal: Materiality, Reality and Speculation requires ADN 460 Creative Technology Studio II and ADN 419 Creative Technology Studio I.

4 Prerequisite: ECI 511 Introduction to Learning Design and Technology, ECI 514 Developing and Delivering Online Instruction

Nonprofit Management (Certificate)

A Graduate Certificate in Nonprofit Management is available to students, including NC State degree students, who have a Bachelor's degree from an accredited university. The Certificate requires 15 credit hours of course work and substantive nonprofit experience. The courses are designed to provide the basic management knowledge and skills needed in nonprofit organizations.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
PA 531	Human Resource Management in Public and Nonprofit Organizations		
PA 536	Management of Nonprofit Organizations		
PA 538	Nonprofit Budgeting and Financial Management		
PA 539	Fund Development		

Select up to two of the following:		6
PA 514	Management Systems	
PA 516	Effective Communications for Public Administrators	
PA 525	Organizational Development and Change Management	
PA 532	Contract Negotiation and Mediation in the Public and Nonprofit Sectors	
PA 540	Grant Writing for Public Administrators	
PA 546	Seminar in Program Evaluation	
COM 546	Nonprofit Marketing and Public Relations	
Total Hours		**18**

Substantive Experience Requirement

The Substantive Experience Requirement can be met by:

- Prior (or continuing) Experience:
  - Full-time employment with a nonprofit (at least one year by completion of certificate program)
  - Serving on a nonprofit board or chairing a nonprofit's standing committee (at least one year by completion of certificate program)
- In-program Work:
  - Internship or independent study with a nonprofit (at least 1 credit hour)
  - Completing a course with a field component (e.g., PA 546 or PA 525)

Nuclear Nonproliferation Science and Policy (Certificate)

The objective of the program is to educate students about nuclear nonproliferation, safeguards, and security from both the global and the technical perspectives. Students will be exposed to state-of-the-art techniques and will develop an understanding of the technical and policy challenges to maintain and support a robust nuclear nonproliferation regime. This process will be supported by assignments designed to reinforce understanding of the individual subject areas covered, class projects which cover key areas such as proliferation case studies and physical security simulations, as well as interactions with subject matter experts in nuclear nonproliferation technology and policy.

Plan Requirements

Professional Communication and Managerial Skills (Certificate)

This online certificate program is designed to provide graduate students and professionals with a common platform of courses that will enhance their communication skills and professional development. In particular, professional science master's program students in the program will gain the management and communication training that will allow them to transfer success in the laboratory to success in the marketplace.

Admission Requirements

Students not attending NC State must apply through the regular application process. Proof of completion of a bachelor's degree is necessary. A minimum undergraduate GPA of 3.0 is required for admission to the certificate program. However, GRE scores are not required.

Students currently in a degree program at NC State may add the certificate program to their degree program by completing the application for currently enrolled graduate students.

Other Relevant Information

The interdisciplinary certificate requires a total of 12 credit hours, with 6 hours taken in the Poole College of Management and 6 hours taken in the College of Humanities and Social Sciences. Two required classes are BUS 590 (Management Foundations) and BUS 554 (Strategic Project Management). Two of the three following classes should also be taken: COM 521 (Communication and Globalization), COM 527 (Seminar in Organizational Conflict Management), or COM 530 (Interpersonal Communication in Science/Technology Organizations). To earn the certificate students must achieve a minimum 3.0 GPA in the program.

- Geospatial Analytics (PhD) (p. 679)
- Parks, Recreation and Tourism Management (PhD) (p. 693)

Minors

- Forestry (Minor) (p. 676)
- Human Dimensions of Natural Resources (Minor) (p. 694)

Certificates

- Environmental Assessment (Certificate) (p. 696)
- Geographic Information Systems (Certificate) (p. 683)
- Renewable Energy Assessment and Development (Certificate) (p. 698)
- Sport and Entertainment Venue Management (Certificate) (p. 696)

Environmental Assessment

The Master of Environmental Assessment (EA) is an interdisciplinary program focused on understanding the adverse impacts that pollutants and naturally occurring substances pose on human health and the environment. Through the program, students combine multiple fields of study to tackle complex environmental problems. **The EA program can be completed entirely online.** This allows professionals the flexibility to complete their degree while still working.

Admission Requirements

Admissions to the Master of Environmental Assessment program requires an undergraduate GPA of 3.0 or better in a natural resources, environmental science and management, engineering, or related field, a professional resume, a personal statement describing the applicants professional ambitions and how the EA program will assist in accomplishing those goals. Students with less than a 3.0 undergraduate GPA may be considered for provisional admission to the EA program or referred to the EA certificate program to enhance their skills before reapplying. Graduate Record Exam (GRE) results are NOT required for admittance to the program.

Master's Degree Requirements

The EA program requires students to complete 30 credit hours of graduate coursework, including a 6 credit hour Project Course. Eighteen hours will be in required courses with the six hours selected from the list of elective courses or equivalent.

Students in the Master of Environmental Assessment program are generally self-supported, however students may also apply for financial aid.
Self-supported students may take up to 9 credit hours of course work per semester. However, students who are employed full time may find it advantageous to enroll in one or two courses per semester.

Other Relevant Information

The EA program also offers a Graduate Certificate in Environmental Assessment (12 credit hours). Certificate students may transfer up to 12

credits into the EA degree. Students enrolled in other NC State graduate programs may enroll in the Certificate program.

Forest Biomaterials

Course offerings and research facilities are available in the following areas: wood chemistry, biopolymer chemistry, bio-materials, bio-energy, pulping chemistry, process analysis, polymer chemistry, paper physics, paper recycling, wood physics (especially wood liquid relations), wood anatomy, wood biology, wood mechanics and engineering, wood machining, manufacturing processes, wood-based industry economics and marketing, and forest-based life cycle analysis.

Admission Requirements

Requirements listed here are in addition to graduate school requirements stated elsewhere. To be admitted, a student should have earned a B.S. degree with a major in wood and paper science or another suitable science or engineering degree. Students with a 3.0 GPA and with appropriate course backgrounds will be considered for admission. The GRE test scores are required except for the Master of Forest Biomaterials offered through Distance Education.

Master of Science Degree Requirements

The M.S. degree requires a minimum of 30 credit hours. In addition, there are WPS core course requirements, which vary depending on the field of study. Six hours of research (FB 695) must be taken. Two hours of Seminar (FB 601) must be passed. A qualifying exam must be passed.

Master of Forest Biomaterials Degree Requirements

The Master of Forest Biomaterials is a non-thesis, professional degree for students not interested in a thesis-based research program. The Master of Forest Biomaterials degree is offered both on campus and through Distance Education. For the on-campus program a minimum of 36 course credits is required. The regulations regarding credits are the same as for the M.S. degree except that no credit for FB 695 is required or given and up to six credits of 400-level courses in the major field may be included. A technical report, which demonstrates the student's ability to gather, analyze and report information is required.

In addition to Graduate School requirements, the Distance Education program requires that the student be employed professionally in a wood or paper science or allied field, have one year of professional experience, and take required WPS core courses, which vary depending on the field of study. A minimum of 30 course credits is required of students who have relevant professional experience, including one hour of Seminar (FB 601) and five hours of an independent project (FB 625). For distance students without relevant professional experience, 36 hours is required.

Doctoral Degree Requirements

In addition to Graduate School requirements, Ph.D. candidates must present two departmental seminars (FB 801) before their final oral examination. Candidates must also write and defend a research proposal on their intended research (first proposition) and a research proposal on an area outside of their dissertation/thesis research (termed a second proposition) and pass qualifying exams.

Student Financial Support

A number of research assistantships and fellowships are available.

Other Relevant Information

Graduate students should select a committee chair and other advisory committee members and submit a plan of graduate work by the end of their first semester of residence. They are also required to take the qualifying examination as part of a Research Methods course. These examinations are to ensure that the student has the basic abilities to think independently as a scientist within the context of the forest biomaterials literature. The department believes M.S. and Ph.D. students should select a research topic and begin their dissertation or thesis research as early as possible.

As the field of forest biomaterials is a derived science, students are urged to develop a strong secondary area of excellence in one or more of the supporting disciplines such as organic chemistry, polymer chemistry, chemical engineering, mathematics, statistics, biology, engineering mechanics, mechanical engineering, physics, and economics or business administration.

Forestry and Environmental Resources

The department offers training in all of the major sub-disciplines of forest, natural resources, and environmental-related science and management. Considerable flexibility is allowed in developing graduate programs tailored to the student's objectives.

Admission Requirements

All parts of the application are considered in making decisions. Admission is competitive and depends on the willingness of at least one member of the faculty to serve as major professor. An undergraduate degree in forestry is not required. The GRE is no longer required for admission.

Master's Degree Requirements

The Master of Forestry is now accredited by the Society of American Foresters. It requires 40 credits, with a 1 credit project. The Master of Science course work requirements range from 30 to 36 credits. Students without an appropriate background will require additional preparatory work. For the M.S. degree, a minor is required.

Doctoral Degree Requirements

As a rule, students must complete a master's degree before entering the Ph.D. program. However, exceptionally well-prepared students may petition to have their degree objective changed to Ph.D. before completing the master's degree. In addition to the dissertation, Ph.D. programs require 36 to 54 credits of course work beyond the master's degree. A minor is required.

Student Financial Support

Stipend levels allow students to graduate without incurring significant debt. Those who begin without an assistantship are considered for funding as projects become available. Additional funding is available through a limited number of teaching assistantships.

Other Relevant Information

MS and PhD graduate students must meet the following requirements:

1. take a one-credit research methodology course, FOR 603 or FOR 803, early in his/her program;
2. take a seminar course (typically FOR 601/FOR 801), and
3. begin the final oral exam with a seminar to the department based on work accomplished during the graduate program.

Geospatial Analytics

The Center for Geospatial Analytics innovative Ph.D. program brings together departments from across NC State University to train a new generation of interdisciplinary data scientists skilled in developing novel understanding of spatial phenomena and in applying new knowledge to grand challenges.

This one-of-a-kind degree focuses on integrative thinking and experiential learning:

- Multidisciplinary advising unites expertise from across complementary academic departments
- Cross-cutting curriculum spans core classes in solution-driven analytics and discipline-specific electives
- Geospatial externship enriches practical understanding through a one-week internship with an external partner

If your research goals intersect geospatial problem-solving from any number of fields, you will find your fit here. Our Faculty Fellows advise students interested in a range of disciplines—from design, to social and behavioral sciences, natural resources and the environment, computer science, engineering and more—and approach their work in a range of geospatial research areas. Students with strong backgrounds in quantitative methods in geography, data science, remote sensing and earth sciences are strongly encouraged to apply.

Degrees

Geospatial Information Science & Technology

The Master of Geospatial Information Science and Technology (MGIST) equips students with the necessary knowledge and tools to become high-end geospatial professionals using a unique curriculum that leverages NC State's strengths in computational and data sciences, information technology, and interdisciplinary training in combination with professional skills development in areas of project management, technical writing, and communications. The MGIST was designed to be completed entirely online, allowing flexibility for both students just entering the work force and working professionals.

Through a combination of geospatial theory, hands-on applications, and client-based service-learning experiences, students graduate from the program with a solid foundation to provide a wide range of geospatial expertise for local, state, national, and international organizations.

Admissions Requirements

Admission to the program requires an undergraduate GPA of 3.0 or better, a professional resume, a personal statement describing the applicant's professional ambitions and experience, and 3 letters of reference. Students with less than a 3.0 undergraduate GPA may be considered for provisional admission into the MGIST or referred to the GIS Certificate program to enhance skills and prepare for reapplication to the MGIST.

Master's Degree Requirements

The MGIST degree requires 33 course credit hours including a 3-credit-hour Capstone course and development of a professional portfolio highlighting geospatial analytic skills and competencies. A cumulative GPA of 3.0 or better is required in order to graduate. Specific course requirements are listed on the MGIST web site.

Student Financial Support

Students in this program are eligible for financial aid and may compete for program assistantships and internships.

Other Relevant Information

The GIS program also offers a Graduate Certificate in GIS (https://online-distance.ncsu.edu/program/graduate-certificate-in-geographic-information-science/) (12 credit hours). Certificate students may transfer up to 12 credits of B or better grades upon application and acceptance into the MGIST program.

Geographic Information Systems (Certificate)

Building on NC State's strengths in technology, computational methods, and geographic information systems (GIS), this program provides professional, graduate-level academic preparation in the advanced application of GIS technologies to a wide spectrum of disciplines, including economics, public health, emergency planning and response, land use planning, environmental resources, etc. The certificate, which is also available to current NC State students enrolled in non-GIS graduate programs, forms the basis for the Master of Geospatial Information Science and Technology (https://online-distance.ncsu.edu/program/master-of-geospatial-information-science-and-technology/).

Admissions Requirements

Admission to the certificate program requires a baccalaureate degree from an accredited college or university with at least a 3.0 GPA. Students with less than a 3.0 undergraduate GPA may still be considered for admission based on the remaining criteria or may be recommended to take one of our graduate courses as a non-degree student first. These determinations will be made on a case-by-case basis. All applicants must submit:

- Transcript showing Bachelor's degree conferred
- A clear and concise personal statement/statement of interest
- A resume/CV

Current NC State students in other degree programs may also be eligible to earn the certificate. These students should contact the Center for Geospatial Analytics for more information on how to apply.

Other relevant information

Up to 12 credit hours of B or better grades from the Certificate can transfer into the MGIST (https://online-distance.ncsu.edu/program/master-of-geospatial-information-science-and-technology/) program if/when a student applies and is accepted into that program.

Natural Resources

The natural resources program is an interdepartmental program designed to prepare students for positions in both private and public natural resource organizations. A selection of technical options couple core courses in natural resources issues and management with a series of related courses in a variety of related technical disciplines. The purpose of the natural resources core curriculum is to educate professionals at a Master's level who are well-versed in policy and regulation and who have skills in quantitative assessments. Currently approved technical options include: assessment and analysis, ecological restoration, economics and management, policy and administration, international resources, hydrology, and geographic information systems in the Department of Forestry and Environmental Resources; outdoor recreation management in the Department of Parks, Recreation and Tourism Management; and landscape architecture in the Department of Landscape Architecture.

Each option is available as either the M.S. in NR or as the non-thesis Master of NR.

Admissions Requirements

Students should have an undergraduate degree in natural resources or a related field. Experience in natural resources management and administration will be considered in lieu of an appropriate undergraduate degree. Admission is contingent upon meeting departmental requirements and acceptance by an advisor.

Master's Requirements

The M.S. degree requires a research thesis based on completion of a research project. The Master of NR degree requires a practical project which develops and demonstrates problem-solving skills. Students enrolled in the Department of Forestry and Environmental Resources must take FOR 603 in the first or second semester. The minimum number of credit hours varies by technical option, but is generally 36 credit hours including research or project credits and core courses.

Degrees

- Natural Resources (MR) (p. 686)
- Natural Resources (MS) (p. 687)

Natural Resources (MR)

Degree Requirements

Students may choose from the degree options below to complete coursework within a focus area.

Degrees earned will be distributed as: "Master of Natural Resources" without option specifications.

Traditional Option

Code	Title	Hours	Counts towards
Required Courses		**10**	
NR 500	Natural Resource Management		
NR 571	Current Issues in Natural Resource Policy		
NR 601	Graduate Seminar [1]		
Select a graduate-level Statistics courses in conjunction with the academic committee			
Additional Courses		**26**	
"Additional Courses" are approved in conjunction with the academic committee to meet 36 total hours			
Total Hours		**36**	

[1] Equivalent seminar course may be accepted determined in conjunction with the academic committee.

Technical Options

Assessment and Analysis

This option allows students to develop a project incorporating field course components with decision making tools and the opportunity to develop depth in a specific subject matter focus. Focused on planning and conservation processes and efforts, the option aims to hone the abilities of people who will function as part of NEPA process teams, NGOs aiming to preserve and protect land and its biodiversity, or professionals performing Phase I, protected species investigations, and related assessment roles.

Ecological Restoration

This option prepares students to assist in the recovery of ecosystems that have been degraded, damaged, or destroyed. This requires extensive knowledge of the abiotic environments that sustain the biota of ecosystems, community structure, sustainable cultural practices, and performance monitoring, among other skills. Emphasis is on the actual craft of restoring natural ecosystems, and the social and philosophical elements that mandate restoration.

Economics and Management

Economics and Management option graduate students study the trade-offs associated with how society interacts with natural resources in order to assess and improve natural resource policy and management. Students focus on trade-offs at many different spatial and temporal scales. Examples include non-market valuation of ecosystem services, optimal management of forest stands with changing climate, carbon and market consequences of using biomass energy, sustainable development and long-term projections of ecological and economic sustainability.

GIS

This option provides students with a thorough background in the spatial sciences including spatial modeling, remote sensing, geographic information systems, and spatial databases. Students completing this option will be prepared for positions in a variety of federal agencies such as the USDA Forest Service, EPA, NOAA, or Corps of Engineers; with state agencies; with regional or local planning organizations; and with private consulting firms.

Hydrology

This option promotes understanding the hydrologic processes of watersheds and wetlands and prepares students for conducting hydrologic studies and directing watershed management programs. Courses also focus on water resources policy and regulation. Students are prepared for positions with private consulting firms as well as with many other public and private organizations that deal with the hydrologic impacts of land use and climate change.

International Resources

This option is designed to enhance students' understanding of international forestry and natural resource management and to prepare them for careers abroad or with internationally oriented institutions and companies in the US. Courses in this option are taught in several different departments and provide a broad background with rigorous technical emphases.

Landscape Architecture

This option is a non-thesis professional degree program. Students who complete all courses required for the technical option will receive a Master of Landscape Architecture and the Natural Resources Landscape Architecture with the Technical Option, curriculum code (NRD). No previous LAR degree is required. Students who are interested in becoming physical planners in municipalities, federal government, park and recreation planning as well as housing development and transportation planning will require a first professional degree in landscape architecture and are primary candidates for this second degree in the natural resources.

Outdoor Recreation

This technical option develops the knowledge and skills needed for planning and managing natural resource-based outdoor recreation opportunities and resources. Students are prepared for positions with federal, state, regional, county and municipal parks, recreation and land management agencies as well as with private firms and non-profit organizations.

Policy and Administration

This option develops knowledge and skills about policy processes and sciences, public and private organizations, natural resource law and policy, public governance and involvement, and their applications to natural resource management and conservation.

Natural Resources (MS)

Degree Requirements

Students may choose from the degree options below to complete coursework within a focus area.

Degrees earned will be distributed as: "Master of Science in Natural Resources" without option specifications.

Core Requirements

Code	Title	Hours	Counts towards
Required Courses		**10**	
NR 500	Natural Resource Management		
NR 571	Current Issues in Natural Resource Policy		
NR 601	Graduate Seminar [1]		
Select a graduate-level Statistics courses in conjunction with the academic committee			
Additional Courses		**20**	
"Additional Courses" are approved in conjunction with the academic committee to meet 30 total hours (may select a Technical Option listed below)			

NR 695	Master's Thesis Research	
Total Hours		**30**

[1] Equivalent seminar course may be accepted determined in conjunction with the academic committee.

Technical Options

Assessment and Analysis

This option allows students to develop a project incorporating field course components with decision making tools and the opportunity to develop depth in a specific subject matter focus. Focused on planning and conservation processes and efforts, the option aims to hone the abilities of people who will function as part of NEPA process teams, NGOs aiming to preserve and protect land and its biodiversity, or professionals performing Phase I, protected species investigations, and related assessment roles.

Parks, Recreation, and Tourism Management

The Doctoral degree allows students to match their particular research interests and career aspirations with departmental research activities and faculty expertise. The primary areas of interest for students include health and well-being, human dimensions of the natural and built environment, sustainable and equitable tourism, and geospatial methods and modelling with a substantive area of study in another discipline.

The Master's degree provides students the opportunity to develop and enhance their critical understanding of both the conceptual foundations of parks, recreation and tourism management and the procedures of systematic inquiry and critical problem solving as applied to planning and management issues. The department offers educational opportunities and resources for the preparation of professionals concerned with planning, organizing, managing and directing parks, recreation, sport, and tourism programs, areas, and facilities. Two Master's Degree options are available, MS in Parks, Recreation and Tourism Management (thesis), and Online Professional Master of Parks, Recreation, Tourism and Sport Management (MPRTSM) (non-thesis). As part of the Natural Resources Masters Program (p. 684), the Department administers two degree options under the Outdoor Recreation Technical Option. In addition, the Graduate Certificate in Sport and and Entertainment Venue Management (p. 696) (SEVM) and the Human Dimensions of Natural Resources Graduate Minor (p. 694) are offered by the Department.

The general emphasis areas at the Master's level include: parks and recreation management, tourism development and management, geographic information systems, recreational sport management, and natural resource recreation management.

The online MPRTSM degree provides students with a solid professional and business education designed to advance their career development in parks, recreation, tourism, and sport industries. The online degree program operates on a cohort model and admits students in fall and spring semester.

Doctoral Degree Requirements

Although each doctoral course of study will be unique to the individual student, the usual course of study will include a minimum of 54 hours beyond the Master's. These credit hours are distributed among the core courses, statistics and research methods, a minor or substantive area consisting of 15 hours of course work approved by the student's faculty advisor, and the dissertation. Students are expected to have completed a Master's degree, preferably one with a thesis. Students without research experience will have to demonstrate an ability to produce scholarly work in PRTM.

Master's Degree Requirements

Each Master’s Degree has (Master of Parks, Recreation, and Tourism Management (p. 690) & Master of Science (p. 691)). The minimum credit hours range from 30 for MS in PRTM Degree, to 34 for MNR-Outdoor Recreation Technical Option Degree. Doctoral and M.S.

application deadline is February 15 for both U.S. and international students. Online Degree-MPRTSM application deadline is May 15.

Student Financial Support

Graduate assistantships are available to students in PhD and MS degree program on a competitive basis.

Degrees

- Parks, Recreation, Tourism and Sports Management (MR) (p. 690)
- Parks, Recreation and Tourism Management (MS) (p. 691)
- Parks, Recreation and Tourism Management (PhD) (p. 693)
- Human Dimensions of Natural Resources (Minor) (p. 694)
- Sport and Entertainment Venue Management (Certificate) (p. 696)

Sport and Entertainment Venue Management (Certificate)

Whether you are interested in managing stadiums, amphitheaters, performing arts centers or sport arenas, this immersive facilities management program is right for you.

This one-year online graduate certificate program was designed in collaboration with industry experts to either advance your career or facilitate entry into this exciting field.

The 12-credit-hour graduate certificate program can be completed entirely online. Students are admitted as a cohort and complete all required courses as a group. Using an 8-week accelerated course format, students take one course at a time and finish the program in two semesters.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses			
PRT 503	Advanced Fiscal Management for Parks, Recreation, Tourism and Sport Organizations	3	
PRT 507	Strategic Marketing Management in Parks, Recreation, Tourism and Sport Organizations	3	
PRT 511	Sport and Entertainment Venue Management - Facilities	3	
PRT 512	Sport and Entertainment Venue Management - Operations and Services	3	
Total Hours		**12**	

Graduate Certificates - College of Natural Resources

Certificates

- Environmental Assessment (Certificate) (p. 696)
- Geographic Information Systems (Certificate) (p. 683)
- Renewable Energy Assessment and Development (Certificate) (p. 698)
- Sport and Entertainment Venue Management (Certificate) (p. 696)

Environmental Assessment (Certificate)

The graduate certificate program in Environmental Assessment provides students and professionals the opportunity to develop recognized academic credentials and advanced expertise in Environmental Assessment. The certificate program provides excellent opportunities for practicing environmental professionals to stay abreast of new technologies and current government regulations.

The curriculum consists of 12 credit hours selected from the required course listing for the MEA degree. Students may transfer up to 12 credit hours from the Certificate into the Masters of Environmental Assessment (MEA). Students may earn the Certificate as a stand-alone credential or as part of a graduate degree and may apply for entry into the MEA degree while in the Certificate program.

Admission Requirements

Admission to the certificate program requires proof of completion of a bachelor’s degree in an environmental, science, natural resources or related degree. Experience in the environmental field may be substituted for students with a bachelor's degree in an unrelated field. All applicants should have a minimum 3.0 grade point average. Interested individuals should be prepared to submit a personal statement, a resume identifying educational preparation and work experiences, and official transcripts of all undergraduate and graduate coursework.

With proper notification, students are not required to be enrolled continuously. The certificate must be completed within four (4) calendar years from the date the student starts the first course. Awarding of the certificate requires a minimum GPA of 3.0 or better in all of the required courses.

Certificate Requirements

Award of a certificate requires a GPA of 3.0 or better for the certificate courses (required and elective) and a grade of B- or better in all of the certificate courses.

Other Relevant Information

The Certificate is entirely online.

Plan Requirements

Code	Title	Hours	Counts towards
Core Course			
EA 505	Environmental Assessment Law & Policy	3	
or PA 536	Management of Nonprofit Organizations		
Select three of the following:		**9**	
EA 501	Environmental Stressors		
EA 502	Environmental Risk Assessment		
EA 503	Environmental Exposure Assessment		
EA 504	Environmental Monitoring and Analysis		
GIS 510	Fundamentals of Geospatial Information Science and Technology		
Total Hours		**12**	

Geographic Information Systems (Certificate)

Building on NC State's strengths in technology, computational methods, and geographic information systems (GIS), this program provides professional, graduate-level academic preparation in the advanced application of GIS technologies to a wide spectrum of disciplines, including economics, public health, emergency planning and response, land use planning, environmental resources, etc. The certificate, which is also available to current NC State students enrolled in non-GIS graduate programs, forms the basis for the Master of Geospatial Information Science and Technology (https://online-distance.ncsu.edu/program/master-of-geospatial-information-science-and-technology/).

Admissions Requirements

Admission to the certificate program requires a baccalaureate degree from an accredited college or university with at least a 3.0 GPA. Students with less than a 3.0 undergraduate GPA may still be considered for admission based on the remaining criteria or may be recommended to take one of our graduate courses as a non-degree student first. These determinations will be made on a case-by-case basis. All applicants must submit:

- Transcript showing Bachelor's degree conferred
- A clear and concise personal statement/statement of interest
- A resume/CV

Current NC State students in other degree programs may also be eligible to earn the certificate. These students should contact the Center for Geospatial Analytics for more information on how to apply.

Other relevant information

Up to 12 credit hours of B or better grades from the Certificate can transfer into the MGIST (https://online-distance.ncsu.edu/program/master-of-geospatial-information-science-and-technology/) program if/when a student applies and is accepted into that program.

Plan Requirements

Code	Title	Hours	Counts towards

Renewable Energy Assessment and Development (Certificate)

The Graduate Certificate in Renewable Energy Assessment and Development at NC State University provides students with graduate level academic credentials in renewable energy assessment and development. The program is designed for students who wish to enhance their knowledge of renewable energy assessment practices and obtain a background for certification. The Certificate can be completed entirely online. The certificate is available to current NC State students enrolled in graduate degrees. The entire program requires 12 credits hours. Students in the Renewable Energy Assessment and Development Certificate program may wish to continue on to a Graduate degree. Students may transfer up to 6 credit hours from the Renewable Energy Assessment and Development Certificate into the Master of

Environmental Assessment upon application and acceptance into the program.

Plan Requirements

Applied Mathematics

The Department of Mathematics offers programs leading to the degrees of Master of Science and Doctor of Philosophy in Mathematics and in Applied Mathematics. Students may opt for the Concentration in Computational Mathematics, which is attached to the program in applied mathematics. The Concentration in Interdisciplinary Mathematics (MAI) is available to Ph.D. students in either Mathematics or Applied Mathematics. It is not available to Masters Students. Joint research endeavors with industrial and governmental partners are facilitated and encouraged. The Department of Mathematics also offers a Certificate.

Admissions Requirements

Applicants for admission should have an undergraduate or Master's degree in mathematics or applied mathematics. This should include courses in advanced calculus, analysis, modern algebra and linear algebra. Applicants with degrees in other subjects may be admitted but may be required to take certain undergraduate courses in mathematics without receiving graduate credit. GRE general scores are required. The GRE Subject Test in Mathematics is not required but a good score can be a positive factor in admission.

Master of Science Requirements

The M.S. degree requires a minimum of 30 credit hours with courses chosen to satisfy certain requirements to cover material from three different areas in the department, and some level of depth of material.

Ph.D. Requirements

The Ph.D. requires a minimum of 72 credit hours. A student will typically take 50-60 semester hours of course credits for the Ph.D. The written preliminary examination consists of examinations in three areas of mathematics chosen by the student from 12 possibilities. The research dissertation should represent a substantial contribution to an area of mathematics or its applications.

Student Financial Support

Teaching assistantships and some research assistantships are available. Teaching assistants benefit from a structured program of training in university-level teaching.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Biomathematics

Biomathematics is an interdisciplinary graduate program offering courses and research opportunities in basic and applied mathematical biology. Degree programs are flexible to accommodate students with backgrounds in the biological, mathematical or physical sciences. The program also offers Ph.D. and master's-level minors.

Admission Requirements

Applicants should have either a Bachelor's degree in biology with evidence of aptitude and interest in mathematics, or a bachelor's in a mathematical science with evidence of aptitude and interest in biology. Advanced (multivariate) calculus, linear algebra and general biology are prerequisites for all BMA courses, and deficiencies in these should be remedied during the first year of graduate study. The application must include a narrative statement (1-2 pages) of the applicant's goals and reasons for interest in the BMA program.

Master's Degree Requirements

The M.S. and M.BMA. degrees require BMA 771-BMA 772 and one other BMA course; two upper-level biology courses; and three courses from the mathematical sciences or statistical sciences. The M.S. degree requires a thesis, and the M.BMA. requires two additional courses and a written project.

Doctoral Degree Requirements

Course requirements consist of a "core" and a "concentration" in some area of biology or mathematical sciences. Core requirements are: BMA 771-BMA 772, BMA 773 and BMA 774; three upper-level biology courses from at least two areas (e.g., physiology and evolution); and additional courses from the mathematical or statistical sciences. Concentration consists of either a Ph.D. co-major in a biological or mathematical science or a coherent series of five graduate courses approved by the student's committee, which must include a two-semester sequence and at least one 700-level course.

Financial Assistance

TAs (generally in the Departments of Mathematics or Statistics). RAs and internships are available. Awards are based on GRE scores, transcripts, letters of recommendation, and the personal statement. RAs usually are held by continuing students. To receive full consideration for financial aid, the completed application must be received by January 15.

Other Relevant Information

All students are required to participate in the BMA Graduate Seminar. Course requirements can be met by examination or by demonstrating that an equivalent course was completed at another university.

Degrees

Biomathematics (PhD)

Degree Requirements

Students may choose from the degree tracks below to complete coursework within a focus area.

Degrees earned will be distributed as: "Doctor of Philosophy in Biomathematics" without track specifications.

Code	Title	Hours	Counts towards
Required Courses		**15**	
BMA 771	Biomathematics I		
BMA 772	Biomathematics II		
BMA 773	Stochastic Modeling		
BMA 774	Partial Differential Equation Modeling in Biology		
BMA 801	Seminar [1]		
Biological Sciences Courses		**9**	
"Biological Science Courses" will be approved in conjunction with the academic committee [2]			
Statistics Courses		**3-6**	
Required "Statistics Courses" will be approved in conjunction with the academic committee – see "Statistic Course Options" listed below			
Mathematical Science Courses		**9**	
"Mathematical Science Courses" will be approved in conjunction with the academic committee			
Focus Area Track		**15**	
See "Focus Area Tracks" [3]			
Total Hours		**51-54**	

1 BMA 801 Seminar needs to be repeated three times to meet the three credit hour requirement.

2 Must represent at least two different perspectives.

3 Must include at least one 700 level course.

Statistic Course Options

Option 1

Code	Title	Hours	Counts towards
ST 511	Statistical Methods For Researchers I	3	
ST 512	Statistical Methods For Researchers II	3	
Total Hours		**6**	

Option 2

Code	Title	Hours	Counts towards
Option Two			
ST 512	Statistical Methods For Researchers II (R)	3	
Total Hours		**3**	

Focus Track Areas

Biological Sciences

Code	Title	Hours	Counts towards
Select five courses, minimum of one form each of the following:		**15**	
Cellular and Molecular Biology			
Genetics and Development			
Biophysical and Biomedical Sciences and Physiology			
Ecology and Evolution			
Total Hours		**15**	

Mathematical Methods

Code	Title	Hours	Counts towards
Select five courses in the following or co-major:		**15**	
Mathematics			
Statistics			
Operations Research			
Computer Studies			
Total Hours		**15**

Chemistry

The Department of Chemistry offers programs of study leading to the Doctor of Philosophy and Master of Science degrees. These degrees are based on coursework and original research. Many research projects merge disciplines such as chemical/synthetic biology, biophysics/physics, computational science, informatics, photonics/photophysics and materials science with chemistry. General courses as well as advanced and special topics courses are offered.

Admission Requirements

Applicants should have an undergraduate degree in chemistry or in a closely related field with a strong chemistry background. A GPA of at least 3.0 in the sciences is needed for consideration. GRE General Test scores are not required. Admission decisions are made as completed applications are received. For most favorable consideration for the Fall term, all application materials should be received by January 15 (both domestic and international students).

Master's Degree Requirements

The Master of Science (M.S.) degree in chemistry is a research degree that requires six graduate courses, a minimum of 30 credit hours, and research leading to a thesis.

Doctoral Degree Requirements

In the doctoral program, emphasis is placed on original research and a comprehensive knowledge of one's chosen field.

Student Financial Support

Incoming graduate students are supported by departmental teaching assistantships. Outstanding applicants are eligible for supplemental fellowships during their first year of study. Research assistantships are normally available to second-, third-, and fourth-year students. The department also has fellowships for students interested in the area of electronic materials, biotechnology and pharmaceutical and synthetic organic chemistry, as well as travel funds to attend and deliver an oral presentation professional meeting(s).

Other Relevant Information

The Chemistry Department forms part of the College of Sciences. More than one dozen new faculty members have been added in the last ten

years, thereby greatly enhancing opportunities for graduate research especially in cutting edge interdisciplinary programs.

Marine, Earth and Atmospheric Sciences

Graduate programs are offered in Atmospheric Science, Earth Science, and Marine Science. Within marine sciences the subdisciplines include: biological, chemical, geological and physical oceanography.

Admission Requirements

A Bachelor's degree with research experience or a Master's degree is required for entry into the Ph.D. program. A Bachelor's degree in a science, mathematics or engineering is required for entry into the M.S. program in Atmospheric science, Earth Science, and Biological, Chemical, Geological or Physical Oceanography. Undergraduate field camp is required of all students in the M.S. program in earth science; this requirement may be fulfilled before or after admission. An M.S. degree with a non-thesis option for students is available and admission to this option must be requested at the time of application.

Master's Degree Requirements

The M.S. degree requires a minimum of 30 credit hours. Specific course requirements are determined by the advisory committee of each student. However, MEA 601 Seminar is required of all thesis M.S. students no later than the third semester in residence. Marine science students are required to take core courses in two of the three subdisciplines other than their own.

Doctoral Degree Requirements

Specific courses are determined by the student's advisory committee. Registration in seminar, MEA 801, is required of all Ph.D. students no later than the fourth semester in residence. Marine science students are required to take core courses in all three subdisciplines other than their own; this requirement may be fulfilled at the M.S. level.

Student Financial Support

Research and teaching assistantships are available.

Other Relevant Information

Students are assigned initial advisors upon admission. It is the student's responsibility to secure the consent of a faculty member to serve as the permanent advisor who will chair or co-chair the advisory committee.

Degrees

Climate Adaptation (Certificate)

The Graduate Certificate in Climate Adaptation program at NC State University provides accredited, academic training in the emerging field of climate adaptation. The online, twelve credit program is designed to provide mid-career professionals and entry-level students with technological skills and specialization in climate adaptation. The certificate is a fully accredited credential and a potential path toward the Climate Adaptation degree program. Coursework includes Fundamentals of Climate Change Science, Climate Risk Analysis, Climate Communication and Introduction to Geographic Information Systems.

Admission Requirements

Applicants must meet one of the 3 following requirements:

- Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study.
- Have a Master's degree.
- Be a degree student in good standing in a NC State University graduate program.

We recommend that students in a NC State University graduate program may apply after completing two of the courses required for the graduate certificate program with at least B grades. The graduate certificate program Director will manage the admissions process in consultation with the MEAS Director of Graduate Programs.

Provisional Admission

Applicants who do not meet the graduate certificate program requirements for full admission may be admitted provisionally based on the quality of their letters of recommendation and other criteria at the discretion of the Certificate Program Director and MEAS Director of Graduate Programs. Students who are admitted provisionally must maintain a 3.0 GPA in order to obtain full admission into the certificate program.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses			
MEA 517	Fundamentals of Climate Change Science	3	
MEA 518	Adaptation to Climate Change	3	
MEA 519	Barriers to Climate Change Literacy	3	
GIS 510	Fundamentals of Geospatial Information Science and Technology	3	
Total Hours		**12**	

Mathematics

The Department of Mathematics offers programs leading to the degrees of Master of Science and Doctor of Philosophy in Mathematics and in Applied Mathematics. Students may opt for the Concentration in Computational Mathematics, which is attached to the program in applied mathematics. The Concentration in Interdisciplinary Mathematics (MAI) is available to Ph.D. students in either Mathematics or Applied Mathematics. It is not available to Masters Students. Joint research endeavors with industrial and governmental partners are facilitated and encouraged. The Department of Mathematics also offers a Certificate.

Admissions Requirements

Applicants for admission should have an undergraduate or Master's degree in mathematics or applied mathematics. This should include courses in advanced calculus, analysis, modern algebra and linear algebra. Applicants with degrees in other subjects may be admitted but may be required to take certain undergraduate courses in mathematics without receiving graduate credit. GRE general scores are required. The GRE Subject Test in Mathematics is not required but a good score can be a positive factor in admission.

Master of Science Requirements

The M.S. degree requires a minimum of 30 credit hours with courses chosen to satisfy certain requirements to cover material from three different areas in the department, and some level of depth of material.

Ph.D. Requirements

The Ph.D. requires a minimum of 72 credit hours. A student will typically take 50-60 semester hours of course credits for the Ph.D. The written

preliminary examination consists of examinations in three areas of mathematics chosen by the student from 12 possibilities. The research dissertation should represent a substantial contribution to an area of mathematics or its applications.

Student Financial Support

Teaching assistantships and some research assistantships are available. Teaching assistants benefit from a structured program of training in university-level teaching.

Degrees

- Mathematics (MS) (p. 741)
- Mathematics (PhD) (p. 744)
- Mathematics (PhD): Interdisciplinary Mathematics Concentration (p. 746)
- Mathematics (Minor) (p. 748)
- Mathematics (Certificate) (p. 752)

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Mathematics (Certificate)

The Graduate Certificate in Mathematics is a one-year program that focuses on two groups of students. It is designed for students who have some mathematical training but do not have a full bachelor's degree in mathematics. It also targets students who have a bachelor's degree in mathematics but do not feel they are ready for graduate school.

The goal of the certificate is to prepare and motive students through courses and careful mentoring. The program will deepen and broaden students' understanding of mathematics, the mathematics profession, and the mathematical community. Students will learn how the mathematics discipline can solve significant problems for government, industry, other scientists, and ultimately, society at large.

Admissions

Application to the program requires an online application form, three (3) letters of recommendation (two need to be academic), transcripts of all academic work after high school, and a written statement. GREs are highly desirable but not required for admission. Admission will be on a competitive basis.

Requirements

Students take a combination of graduate and undergraduate mathematics courses that are tailored to the individual student. The certificate requires 12 hours of mathematics courses, taken for a grade, and to be taken at NC State. There is no specific list of courses for the certificate.

Of the 12 hours, three (3) hours may be at the 400 level with prior approval of the Director of Graduate Programs. The other nine (9) hours will be at the 500 level or above. Students must take at least two (2) courses per semester to remain in good standing. A grade of C- is required for a course to count toward the certificate. A 3.00 GPA is required to earn the certificate.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses *		**12**	
	One course may me taken at the 400-level with DGP approval		
	A minimum of three courses must be taken at the 500- or 700-level		
Total Hours		**12**	

* Students must maintain an average 3.0 GPA in all MA courses.

Physics

Research opportunities in theoretical/computational physics are available in astrophysics, biophysics, chaos, condensed matter, nanoscience/nanomaterials, nuclear and particle physics, quantum computing, and relativity. Research opportunities in experimental physics are available in astronomy, atomic and molecular physics, biophysics, emergent phenomena, materials physics, nanoscale science, nonlinear systems, nuclear and particle physics, optics, soft-condensed-matter physics and technology, and surface physics.

Degrees earned will be distributed as: "Master of Science" and "Doctor of Physics" without specialization specifications.

Admission Requirements

Bachelor's degree in physics or equivalent and related. General GRE and the GRE Physics subject test are accepted, but not required.

Master's Degree Requirements

A minimum of 30 credit hours beyond the Bachelor's degree with mastery of aspects of the physics curriculum. There are 2 options:

- Option A: Earning 24 credit hours of courses, 6 of research, writing a dissertation, and passing an oral exam;
- Option B: Earning 30 credit hours of courses and passing the physics qualifying exam.

Doctoral Degree Requirements

A minimum of 72 credit hours beyond the Bachelor's degree (54 with an incoming Master's); demonstrating mastery of the core physics curriculum as evidenced by passing the qualifying exam; demonstrating mastery of research in a subspecialty of physics by passing appropriate

elective courses, planning a research topic, passing an oral preliminary exam, writing a dissertation, and passing a final oral defense.

Student Financial Support

Graduate teaching assistantships are available for new and continuing students. Research assistantships are available to continuing students and occasionally to new students. More than 95% of students are supported by assistantships.

Degrees

- Physics (MS) (p. 754)
- Physics (PhD) (p. 755)
- Physics (Minor) (p. 757)

Physics (MS)

Master of Science Degree Requirements

Thesis (Option A) Requirements

Code	Title	Hours	Counts towards
Letter-Graded Courses		**24**	
Select six PY 500-level / 700-level courses approved in conjunction with the academic committee [1]			
Research Course		**6**	
PY 695	Master's Thesis Research (Optional)		
Total Hours		**30**	

Non-Thesis (Option B) Requirements

Code	Title	Hours	Counts towards
Letter-Graded Courses		**18**	
Select six PY 500-level / 700-level courses approved in conjunction with the academic committee [1,2]			
Department Qualifying Exam		**12**	
Students must pass a Department Qualifying Exam from the following courses:			
PY 721	Statistical Physics I		
PY 782	Quantum Mechanics II		
PY 783	Advanced Classical Mechanics I		
PY 785	Advanced Electricity and Magnetism I		
Total Hours		**30**	

1 Excludes: PY 501 Quantum Physics I, PY 511 Mechanics I, and PY 514 Electromagnetism I.

2 Students may opt to select a minor, by which three graded courses from other departments will be accepted as determined in conjunction with the academic committee.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Statistics

Admission Requirements

For the in-person Master program, knowledge of multivariable calculus (comparable to MA 242 at NCSU) and matrix algebra (comparable to MA 305/MA 405 at NCSU) are the minimal requirements for entry. For the PhD program, students are expected to have a good foundation in the material covered in the core courses (ST 701, ST 702, ST 703, ST 704 and ST 705), even if their master's degree was received at another institution. Some students with previous master's degrees find it useful to take these courses at NCSU. However, this tends to lengthen the time to degree. Students are also expected to have had a course comparable to MA 425 Mathematical Analysis I at NCSU.

Students may apply to either the Master or PhD program directly from a Bachelor's degree. GRE General and Subject Tests scores are NOT required for admission to the Statistics Graduate Programs including both master and PhD programs. Due to the differences in student backgrounds, there is a separate admissions process for the online and in-person programs. A completed application consists of:

1. An online application form;
2. A transcript from each postsecondary institution;
3. Three letters of recommendation;
4. English proficiency scores (TOEFL or IELTS);
5. A written personal statement, which should not exceed two pages and should describe the applicant's academic and career goals as well as special interests in the area of statistics;
6. A resume or curriculum vita;
7. An application fee.

Students wishing to pursue the Ph.D. degree: Apply directly to the Ph.D. program. The master's program is not an intermediate step in that path. Ph.D. applicants are admitted only in the fall semester. Complete applications received by **December 15** will receive highest priority for admission and financial aid. Applications received later than February 15 will rarely be considered.

Students wishing to obtain only a master's degree (not as a route to the Ph.D.):

1. Applicants to the in-person master's degree may choose to start in the summer (late May) or in the fall (August). The summer session courses are offered online, so students would not be required to attend classes on campus until fall. The summer enrollment is only for students who are already in the United States. Fall enrollment is often the best choice for international students.
2. Applicants for the online master's degree are accepted throughout the year and can start any semester.

Priority is given to applications received by **January 15.** The final deadline is **March 25.** No offers of financial support are provided to master's students.

Master's Degree Requirements

All Master of Statistics degrees require a minimum of 30 semester hours. This includes 21 hours of common coursework: ST 517 Applied Statistical Methods I & ST 518 Applied Statistical Methods II, ST 501 Fundamentals of Statistical Inference I & ST 502 Fundamentals of Statistical Inference II, ST 503 Fundamentals of Linear Models and Regression, ST 542 Statistical Practice, and ST 555 Statistical Programming I. Each specific concentration will have additional requirements and/or electives to reach the minimum credit hours. These requirements are listed on each concentration page, listed below:

- Biostatistics (p. 761)
- Distance Education Track (p. 762) (Online)
- Environmental Statistics (p. 764)
- Financial (p. 765)
- Statistical Genetics (p. 766)

Doctoral Degree Requirements

Students that join our doctoral program with a Master of Statistics from another university are required to have a minimum of 54 credit hours in their doctoral Plan of Work (POW). Students who receive their master's degree from NC State must have a minimum of 72 credit hours on the master's and Ph.D. POWs combined. The POW may include research credit hours (ST 895); however, students are required to take 24 hours of coursework consisting of core courses, a consulting course, and electives as detailed on the degree requirements page (p. 769).

Student Financial Support

Departmental assistantships and fellowships are awarded to students in the Ph.D. program each year on a competitive basis.

Other Relevant Information

With a large graduate faculty representing virtually all major statistical specializations, the department is recognized as a world leader in graduate education and research in statistics. The Department provides a dynamic environment for teaching, core research and collaborative research across disciplines, with formal program concentrations in biostatistics, bioinformatics, environmental, financial and mathematical statistics.

Statistics Elective Courses		**3**	
Select three credit hours of the following:			
ST 533/733	Applied Spatial Statistics		
ST 711	Design Of Experiments		
ST 534	Applied Time Series		
ST 537	Applied Multivariate and Longitudinal Data Analysis		
ST 744	Categorical Data Analysis		
ST 745	Analysis of Survival Data		
Supporting Elective Courses		**6**	
"Supporting Elective Courses" are approved in conjunction with the academic committee *			
Total Hours		**30**	

* Elective courses can fall within the following subjects: Environmental Policy, Economics, Epidemiology, Toxicology/Risk Assessment, Mathematics, MEAS, GIS, Botany & Ecology, Biomathematics, and Zoology.

Statistics (MS)

Degree Requirements

Students who are admitted into the Master of Statistics program and choose to complete a thesis will be moved into the Master of Science in Statistics. The degree requirements completed for the Master of Statistics will be applied toward the Master of Science.

Code	Title	Hours	Counts towards
Core Courses		**21**	
ST 501	Fundamentals of Statistical Inference I		
ST 502	Fundamentals of Statistical Inference II		
ST 503	Fundamentals of Linear Models and Regression		
ST 542	Statistical Practice		
ST 555	Statistical Programming I		
ST 517 & ST 518	Applied Statistical Methods I and Applied Statistical Methods II		
Elective Courses		**3-6**	
Select 3-6 credit hours of any ST course or ST cross-listed course at either the 500-level or 700-level *			
Thesis		**3-6**	
ST 695	Master's Thesis Research		
Total Hours		**30**	

* "Elective Courses" exclude "Core Courses", ST 507, ST 508, ST 511, ST 512, ST 513, ST 514, ST 515, and ST 516.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Statistics (PhD)

Degree Requirements

Code	Title	Hours	Counts towards
Required Course Work		**12**	
ST 779	Advanced Probability for Statistical Inference		
ST 793	Advanced Statistical Inference		
ST 758	Computation for Statistical Research		
ST 841	Statistical Consulting [1]		
Ethics Sequence			
ST 810 & PHI 816	Advanced Topics in Statistics and Introduction to Research Ethics (Ethics in Statistics)		
Core Elective Courses		**9**	
Select nine credit hours of the following:			
ST 732	Longitudinal Data Analysis		
ST 733	Spatial Statistics		
ST 740	Bayesian Inference and Analysis		
ST 746	Introduction To Stochastic Processes		
ST 790	Advanced Special Topics		
Supporting Elective Courses		**3**	
Select a minimum of three credit hours of coursework approved in conjunction with the academic committee [2]			

Additional Courses	**48**
"Additional Courses" are approved in conjunction with the academic committee to meet 72 total hours [3]	
Total Hours	**72**

1. Unless student has taken ST 542 Statistical Practice
2. A 500-level or 700-level course in either statistics or another department with material relevant to the student's plan of work. Examples include ST 520, ST 733, ST 744 and ST 745.
3. Additional courses may include ST 895 and courses taken from a Master of Statistics or Master of Science in Statistics degree at NCSU.

Applied Statistics and Data Management (Certificate)

In the Graduate Certificate in Applied Statistics and Data Management, students will learn statistical methods and how to apply them in real world settings and about statistical programming techniques that are required for managing data in a typical workplace environment.

Admissions

The application process is very simple, there are no official prerequisites except for an undergraduate degree. Applicants should demonstrate an appropriate level of mathematical maturity to allow them to succeed in the certificate program. Examples of this would include successful completion of undergraduate coursework or professional work in a quantitative field. Note that the GRE is not required to apply and we only accept students living in North America.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
ST 555	Statistical Programming I		
ST 556	Statistical Programming II		
or ST 558	Data Science for Statisticians		
ST 511	Statistical Methods For Researchers I *		
or ST 513	Statistics for Management and Social Sciences I		
ST 512	Statistical Methods For Researchers II *		
or ST 514	Statistics For Management and Social Sciences II		
Total Hours		**12**	

* The course sequence ST 511 and ST 512 is similar to that of ST 513 and ST 514. The main difference is that ST 511 and ST 512 focus more heavily on analysis of designed experiments, where ST 513 and ST 514 focus more heavily on the analysis of observational data.

- The certificate will be earned by successful completion of four courses listed above with an average GPA of at least 3.0.

Statistics Education (Certificate)

In the Graduate Certificate in Statistics Education, students will learn statistical concepts, methods, and pedagogical techniques for teaching

these statistical topics at the college (or high school) level. The emphasis of the program is on the effective use of modern technology for teaching statistics. The courses required for this graduate certificate are listed below.

- Statistical Methods I: ST 511 (or ST 513)
- Statistical Methods II: ST 512 (or ST 514)
- Teaching and Learning of Statistical Thinking: ST 519
- Teaching Statistics with Technology: ST 557

Admissions

The application process is very simple, there are no official prerequisites except for an undergraduate degree. Applicants should demonstrate an appropriate level of mathematical maturity to allow them to succeed in the certificate program. Examples of this would include successful completion of undergraduate coursework or professional work in a quantitative field. Note that the GRE is not required to apply and we only accept students living in North America.

Requirements

The certificate will be earned by successful completion of four courses listed above with an average GPA of at least 3.0.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
ST 511	Statistical Methods For Researchers I		
ST 512	Statistical Methods For Researchers II		
ST 519	Teaching and Learning of Statistical Thinking		
ST 557	Using Technology to Teach Statistics		
Total Hours		**12**	

Toxicology

The Toxicology Program provides course work and research training to prepare prospective toxicologists and environmental health scientists for careers in academia, government, and industry. Research in the program spans an array of topics ranging from the molecular to population level consequences of toxicant exposure. Areas of research excellence within the program include elucidating relationships among cell signaling processes and stressor-induced disease and toxicity, establishing mechanisms of system-specific toxicity, using physiological and genomic approaches to understand differences in species and individual susceptibility to environmental contaminants, and unraveling gene-environment interactions. Some specific research areas include: apoptosis, endocrine disruption, trace metal bioaccumulation and detoxification, oxidative stress/gene regulation/cell toxicity, asthma and lung fibrosis, cancer and mutagenesis, ecotoxicology, developmental abnormalities, chemical exposure assessment and environmental epidemiology. Some examples of the types of environmental agents that are being investigated include chemical carcinogens, trace metals, pesticides, particulates metals, endocrine disruptors, nanoparticles and UVB radiation.

Admission Requirements

Prospective students should have a strong background in the biological and physical sciences with a minimum undergraduate grade point average of 3.0 (on a 4.0 scale) and a minimum Quantitative GRE score in the 70th percentile. GRE subject tests are not required. International students whose primary language is not English must submit TOEFL scores. A written statement should describe the applicants academic and career goals as well as their area of interest. All applications are reviewed by an admissions committee. Students are encouraged to submit applications no later than December 15 for Fall admission.

Master of Science Degree Requirements

The M.S. is a research-oriented degree requiring a minimum of 30 credit hours and a written thesis. At least 20 credit hours must be graduate-level courses and a core curriculum is required.

Master of Toxicology Degree Requirements

The MTOX degree is a non-research degree designed for those interested in pursuing non-research careers in toxicology and environmental health science, and/or working professionals seeking to further their education and advance their careers. To accommodate working professionals the MTOX degree can be pursued on a part-time basis. A minimum of 30 credit hours is required, with at least 14 credit hours in toxicology courses.

Doctoral Degree Requirements

The Ph.D. program is designed to train students to become independent scholars capable of conducting unsupervised and original research. Students enroll in a core curriculum similar to that of the M.S. degree and additional courses as determined by his/her advisory committee. Normally a total of 72 credit hours is required, with the majority of these credits being dissertation research. Students must pass both a written and oral preliminary exam prior to advancing to Ph.D. candidacy. A doctoral dissertation presenting the students original research is written and defended in a final oral examination.

Student Financial Support

Financial assistance is available for qualified applicants through traineeships, fellowships, teaching assistantships and research assistantships.

Other Relevant Information

Students pursuing either the M.S. or Ph.D. degree may elect to specialize in General Toxicology, Environmental Toxicology, or Molecular and Cellular Toxicology. More details can be obtained on the Environmental and Molecular Toxicology web site.

Degrees

- Toxicology (MR) (p. 774)
- Toxicology (MS) (p. 775)

- Toxicology (PhD) (p. 776)
- Toxicology (Minor) (p. 778)

Graduate Certificates - College of Sciences

Certificates

- Applied Statistics and Data Management (Certificate) (p. 772)
- Biology for Educators (Certificate) (p. 779)
- Climate Adaptation (Certificate) (p. 739)
- Mathematics (Certificate) (p. 752)
- Statistics Education (Certificate) (p. 772)

Applied Statistics and Data Management (Certificate)

In the Graduate Certificate in Applied Statistics and Data Management, students will learn statistical methods and how to apply them in real world settings and about statistical programming techniques that are required for managing data in a typical workplace environment.

Admissions

The application process is very simple, there are no official prerequisites except for an undergraduate degree. Applicants should demonstrate an appropriate level of mathematical maturity to allow them to succeed in the certificate program. Examples of this would include successful completion of undergraduate coursework or professional work in a quantitative field. Note that the GRE is not required to apply and we only accept students living in North America.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
ST 555	Statistical Programming I		
ST 556	Statistical Programming II		
or ST 558	Data Science for Statisticians		
ST 511	Statistical Methods For Researchers I *		
or ST 513	Statistics for Management and Social Sciences I		
ST 512	Statistical Methods For Researchers II *		
or ST 514	Statistics For Management and Social Sciences II		
Total Hours		**12**	

* The course sequence ST 511 and ST 512 is similar to that of ST 513 and ST 514. The main difference is that ST 511 and ST 512 focus more heavily on analysis of designed experiments, where ST 513 and ST 514 focus more heavily on the analysis of observational data.

- The certificate will be earned by successful completion of four courses listed above with an average GPA of at least 3.0.

Biology for Educators (Certificate)

The Graduate Certificate in Biology for Educators will provide additional training in biological sciences to K-12 teachers and other educators. The certificate will provide recognition to those individuals who complete 12 credit hours of coursework in graduate level biology, with the option to complete up to 18 credit hours for those interested in teaching AP courses or teaching at the community college level (dependent on individual community college credential requirements). All students will choose between four and six courses (3 credits each) in topic areas that align with their own goals, including a capstone course in the science of learning. Course topics will include animal behavior, communicable and non-communicable diseases, toxicology, evolution, genetics and microbiology. Faculty are continuing to develop new courses to increase options.

Applicants must meet at least one of these three requirements:

- have earned a bachelor's degree from an accredited college or university with minimum 3.0 GPA in the last 60 credit hours of undergraduate study
- be a graduate student in good standing in an education-related masters or doctoral program
- have earned a master's degree from an accredited college or university

In addition, applicants will be required to submit a one-page statement describing how this program will benefit their personal or professional development and career goals.

Financial aid support is not typically offered to students seeking certificates. However, we encourage prospective students to pursue the possibility of tuition reimbursement programs through their employer. Additionally, courses taken during the fall and spring terms can be paid for using the NC State payment plan.

Plan Requirements

- Option One: Select 12 credits
- Option Two: Select 18 credits, gives Educators enough graduate-level courses to teach Advanced Placement (AP) classes at the high school level or to teach in community college

Code	Title	Hours	Counts towards
BIO 405	Functional Histology	3	
BIO 424	Endocrinology	3	
MB 411	Medical Microbiology	3	
MB 441	Immunology	3	
MB 451	Microbial Diversity	3	
TOX 401	Principles of Toxicology	4	
TOX 415	Environmental Toxicology and Chemistry	4	

BSC 514	Studying Animal Behavior (Special Topics: Introduction to Animal Behavior)	3
BSC 546	Humans and Disease: Communicable Diseases	3
BIO 592	Topical Problems (Special Topics: Cancer Biology, Progression and Therapeutics)	3
BIO 592	Topical Problems (Special Topics: Model Organisms in Cellular and Molecular Biology)	1-3
BSC 516	Toxics, Human Health, and the Environment	3
BIO 592	Topical Problems (Genetics: Fundamental Concepts and Societal Issues)	3
BIO 592	Topical Problems (Primate Behavior)	3

Climate Adaptation (Certificate)

The Graduate Certificate in Climate Adaptation program at NC State University provides accredited, academic training in the emerging field of climate adaptation. The online, twelve credit program is designed to provide mid-career professionals and entry-level students with technological skills and specialization in climate adaptation. The certificate is a fully accredited credential and a potential path toward the Climate Adaptation degree program. Coursework includes Fundamentals of Climate Change Science, Climate Risk Analysis, Climate Communication and Introduction to Geographic Information Systems.

Admission Requirements

Applicants must meet one of the 3 following requirements:

- Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study.
- Have a Master's degree.
- Be a degree student in good standing in a NC State University graduate program.

We recommend that students in a NC State University graduate program may apply after completing two of the courses required for the graduate certificate program with at least B grades. The graduate certificate program Director will manage the admissions process in consultation with the MEAS Director of Graduate Programs.

Provisional Admission

Applicants who do not meet the graduate certificate program requirements for full admission may be admitted provisionally based on the quality of their letters of recommendation and other criteria at the discretion of the Certificate Program Director and MEAS Director of Graduate Programs. Students who are admitted provisionally must maintain a 3.0 GPA in order to obtain full admission into the certificate program.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses			
MEA 517	Fundamentals of Climate Change Science	3	
MEA 518	Adaptation to Climate Change	3	
MEA 519	Barriers to Climate Change Literacy	3	
GIS 510	Fundamentals of Geospatial Information Science and Technology	3	
Total Hours		**12**	

Mathematics (Certificate)

The Graduate Certificate in Mathematics is a one-year program that focuses on two groups of students. It is designed for students who have some mathematical training but do not have a full bachelor's degree in mathematics. It also targets students who have a bachelor's degree in mathematics but do not feel they are ready for graduate school.

The goal of the certificate is to prepare and motive students through courses and careful mentoring. The program will deepen and broaden students' understanding of mathematics, the mathematics profession, and the mathematical community. Students will learn how the mathematics discipline can solve significant problems for government, industry, other scientists, and ultimately, society at large.

Admissions

Application to the program requires an online application form, three (3) letters of recommendation (two need to be academic), transcripts of all academic work after high school, and a written statement. GREs are highly desirable but not required for admission. Admission will be on a competitive basis.

Requirements

Students take a combination of graduate and undergraduate mathematics courses that are tailored to the individual student. The certificate requires 12 hours of mathematics courses, taken for a grade, and to be taken at NC State. There is no specific list of courses for the certificate.

Of the 12 hours, three (3) hours may be at the 400 level with prior approval of the Director of Graduate Programs. The other nine (9) hours will be at the 500 level or above. Students must take at least two (2) courses per semester to remain in good standing. A grade of C- is required for a course to count toward the certificate. A 3.00 GPA is required to earn the certificate.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses *		**12**	
	One course may me taken at the 400-level with DGP approval		
	A minimum of three courses must be taken at the 500- or 700-level		
Total Hours		**12**	

* Students must maintain an average 3.0 GPA in all MA courses.

Statistics Education (Certificate)

In the Graduate Certificate in Statistics Education, students will learn statistical concepts, methods, and pedagogical techniques for teaching these statistical topics at the college (or high school) level. The emphasis of the program is on the effective use of modern technology for teaching statistics. The courses required for this graduate certificate are listed below.

- Statistical Methods I: ST 511 (or ST 513)
- Statistical Methods II: ST 512 (or ST 514)
- Teaching and Learning of Statistical Thinking: ST 519
- Teaching Statistics with Technology: ST 557

Admissions

The application process is very simple, there are no official prerequisites except for an undergraduate degree. Applicants should demonstrate an appropriate level of mathematical maturity to allow them to succeed in the certificate program. Examples of this would include successful completion of undergraduate coursework or professional work in a quantitative field. Note that the GRE is not required to apply and we only accept students living in North America.

Requirements

The certificate will be earned by successful completion of four courses listed above with an average GPA of at least 3.0.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**12**	
ST 511	Statistical Methods For Researchers I		
ST 512	Statistical Methods For Researchers II		
ST 519	Teaching and Learning of Statistical Thinking		
ST 557	Using Technology to Teach Statistics		
Total Hours		**12**	

College of Veterinary Medicine

Programs

- Comparative Biomedical Sciences (p. 781)
- Nutrition (p. 176)
- Physiology (p. 188)

Degree Programs

MR

- Nutrition (MR) (p. 178)
- Physiology (MR) (p. 190)

MS

- Comparative Biomedical Sciences (MR): Food Animals Concentration (PSM) (p. 786)
- Comparative Biomedical Sciences (MS) (p. 784)
- Nutrition (MS) (p. 181)
- Physiology (MS) (p. 191)

PhD

- Comparative Biomedical Sciences (PhD): Cell Biology Concentration (p. 791)
- Comparative Biomedical Sciences (PhD): Immunology Concentration (p. 793)
- Comparative Biomedical Sciences (PhD): Infectious Diseases Concentration (p. 796)
- Comparative Biomedical Sciences (PhD): Neurosciences Concentration (p. 798)
- Comparative Biomedical Sciences (PhD): Pathology Concentration (p. 800)
- Comparative Biomedical Sciences (PhD): Pharmacology Concentration (p. 803)
- Comparative Biomedical Sciences (PhD): Population and Global Health (p. 805)
- Nutrition (PhD) (p. 183)

Minors

- Comparative Biomedical Science (Minor) (p. 808)
- Nutrition (Minor) (p. 186)
- Physiology (Minor) (p. 192)

Comparative Biomedical Sciences

Course offerings and research topics currently include, but are not limited to: cell biology, genomics, infectious diseases, developmental

biology, immunology, cardiology, pharmacokinetics, oncology, toxicology, gastroenterology, neuroscience, reproductive physiology, biotechnology, microbiology, aquatic/ wildlife biology, biomedical engineering, endocrinology, molecular biology, pulmonary biology, epidemiology, population medicine, health systems monitoring, transplantation and radiology.

Admission Requirements

All applications are reviewed by the Graduate Studies Committee of the CBS Program, composed of faculty members representing each area of the graduate program and a graduate student representative. Scores from the GRE are not required for admission. Candidates who do not have a DVM degree must have a baccalaureate degree or advanced degree from a college or university recognized as standard by a regional or general accrediting agency. Students with a 3.0 (on a 4.0 scale) undergraduate or DVM curriculum with appropriate course background will be considered for admission.

Doctoral Degree Requirements

Credit hour requirements for the Ph.D. degree are determined by the graduate student's committee with approval of the Director of Graduate Programs and the Graduate School.

Student Financial Support

Research assistantships and fellowships are awarded to qualified candidates on the competitive basis by the College. These are for 12-month periods, and stipends are competitive with those of other programs. These positions are funded by the grants of individual faculty members and the state appropriations to the College and departments.

Other Relevant Information

The program is organized as seven areas of concentration which include: cell biology, immunology, neuroscience, infectious diseases, pathology, pharmacology, and population and global health. These provide extensive interdisciplinary training and maintain a highly effective liaison with graduate programs in other colleges of the university, as well as those of nearby Duke University and the University of North Carolina at Chapel Hill.

Comparative Biomedical Sciences (PhD): Immunology Concentration

Degree Requirements

Code	Title	Hours	Counts towards
Core Courses			
CBS 565	Fundamentals of Biomedical Sciences	3	
ST 511	Statistical Methods For Researchers I	3	
or ST 517	Applied Statistical Methods I		
CBS 662	Professional Conduct in Biomedical Research	1	
CBS 800	CBS Seminar	1	
CBS 800	CBS Seminar	1	
CBS 800	CBS Seminar	1	
Total Hours		**10**	

Concentration Requirements

Code	Title	Hours	Counts towards
MB/IMM 751	Immunology	3	
Select one of the following:		3	
CBS 783	Advanced Immunology		
PO/IMM 757	Comparative Immunology		
Select one of the following:		3	
BCH 553	Biochemistry of Gene Expression		
BCH 555	Proteins and Molecular Mechanisms		
BCH 705	Molecular Biology Of the Cell		
BIT 510	Core Technologies in Molecular and Cellular Biology		
CBS 770	Cell Biology		
CBS 816	Advanced Topics In Immunology [1]	8	
Total Hours		**17**	

[1] Other concentration seminars can be substituted

Comparative Biomedical Sciences (PhD): Population and Global Health

Degree Requirements

Code	Title	Hours	Counts towards
Core Courses			
CBS 565	Fundamentals of Biomedical Sciences	3	
ST 511	Statistical Methods For Researchers I	3	
or ST 517	Applied Statistical Methods I		
CBS 662	Professional Conduct in Biomedical Research	1	
CBS 800	CBS Seminar	1	
CBS 800	CBS Seminar	1	
CBS 800	CBS Seminar	1	
Total Hours		**10**	

Concentration Requirements

Code	Title	Hours	Counts towards
Core Courses		**10**	
See "Core Courses" listed above			
Concentration Courses		**12**	
CBS 650	Population Medicine Forum (Seminar in Pop Med & Vet Public Health) [1]		
or CBS 595	Special Topics		
CBS 650	Population Medicine Forum (Seminar in Pop Med & Vet Public Health)		
CBS 650	Population Medicine Forum (Seminar in Pop Med & Vet Public Health)		
CBS 775	Designing population-based research		
Elective Courses		**6**	
See "Elective Courses" listed below			
Total Hours		**28**	

[1] Other concentration seminars can be substituted

Elective Courses

Code	Title	Hours	Counts towards
Select at least three of the following courses:			
CBS 580	Epidemiology I	3	
CBS 586	One Health: From Philosophy to Practice	2	
CBS 649	Issues in Preventive Medicine and Public Health	1	
CBS 713	Zoonoses and Public Health	3	
CBS 754	Epidemiology II	3	

CBS 776	Infectious Disease Dynamics	
BMA 560	Population Ecology	3
BMA 567	Modeling of Biological Systems	4
GN 703	Population and Quantitative Genetics	3
SOC 755	Global Institutions and Markets	3
SOC 762	Sociology of Food Systems	3
SOC 761	Contemporary Debates in Food & Environment	3
PA 511	Public Policy Analysis	3
PA 715	Quantitative Policy Analysis	3
BIT 477	Metagenomics	2
BIT 815	Advanced Special Topics	1-6
ST 505	Applied Nonparametric Statistics	3
ST 506	Sampling Animal Populations	3
ST 512	Statistical Methods For Researchers II	3
ST 520	Statistical Principles of Clinical Trials	3
ST 531	Experimental Design	3
ST 533	Applied Spatial Statistics	3
ST 535	Statistical Methods for Quality and Productivity Improvement	3
ST 537	Applied Multivariate and Longitudinal Data Analysis	3
ST 540	Applied Bayesian Analysis	3
ST 544	Applied Categorical Data Analysis	3
ST 590	Special Topics (Intro to Bioinformatics)	1-6
ST 590	Special Topics (Bioinformatics II)	1-6
ST 745	Analysis of Survival Data	3

- Analytics (MS) (p. 811)

Analytics

The Master of Science in Analytics (MSA) is uniquely designed to equip students for the task of deriving and effectively communicating actionable insights from a vast quantity and variety of data. It is an intensive 10-month degree with a strong practical orientation focused on the tools and methods used by data scientists. It is a fully integrated course of study taught exclusively to MSA students and designed to produce well-rounded professionals. Student teams tackle genuine problems with data provided by industry and government sponsors.

Admission Requirements

Admission to the MSA program is highly competitive. The best-qualified applicants will be accepted up to the limited number of seats available for students each year. The Admissions Committee evaluates candidates on criteria such as:

- overall academic record and grade point average;
- academic performance in analytical/quantitative subjects;

- relevant employment experience and potential to succeed in the profession; and
- leadership potential, integrity, and other personal character traits.

The Institute welcomes applications from highly motivated individuals of exceptional talent regardless of undergraduate major. Applicants without prior coursework in statistics and/or experience with computer programming would need to complete a set of prerequisite courses before qualifying as a candidate for admission.

Master's Degree Requirements

Students complete 30 credit hours of defined coursework in a period of ten months beginning in Summer Session II and ending the following Spring semester. The integrated curriculum is designed to provide a focused education in the software tools, methods and applications of data analytics.

Other Relevant Information

Students must begin the degree program in the first semester (Summer Session II) and complete all 30 credit hours of the curriculum. The program is designed for full-time students only. Applications for admission are reviewed between September and April.

2022-2023 Program Schedule

Summer II 2022: AA 500 and AA 501

- Start date: June 23, 2022
- Census date: June 29, 2022
- Withdrawal date: June 27, 2022 (no refund on or after July 14, 2022)
- End date: July 29, 2022
- Last day of finals: July 29, 2022
- Communications Training (required): August 1 - August 12, 2022

Fall 2021: AA 502 and AA 504

- Start date: August 17, 2022
- Census date: September 2, 2022
- Withdrawal date: August 17 (no refund after October 11, 2022)
- End date: December 2, 2022
- Last day of finals: December 2, 2022
- Practicum project work, midpoint presentations, career and professional development activities (required): December 5 - December 16, 2022

Spring 2022: AA 503 and AA 505

- Start date: January 9, 2023
- Census date: January 23, 2023
- Withdrawal date: January 9, 2023 (no refund on or after March 1, 2023)
- End date: April 28, 2023
- Last day of finals: April 28, 2023
- Spring Commencement: May 6, 2023

- Tax Analytics and Technology (Certificate) (p. 815)
- Technology Entrepreneurship and Commercialization (Certificate) (p. 826)

Accounting

The Jenkins Master of Accounting (MAC) program provides exceptional education and real-world experience that equip students to take their careers to the next level. Whether pursued on campus and in-person or taken entirely online, the program’s curriculum is designed to provide students with a broad understanding of accounting and business practices, as well as a rigorous technical accounting education. Students have the choice of two tracks (public accounting or business and industry) to meets the needs of their career goals in the accounting profession. They can choose to complement these core courses with specializations in Enterprise Risk Management, Information Technology, or Tax Strategy.

The curriculum is focused on both preparing you for the CPA exam and developing real-world skills, and learning doesn’t stop in the classroom. MAC students can study abroad, lead financial literacy courses on campus or in the community, work with real companies in practicum exercises and take advantage of innovative learning opportunities.

Admission Requirements

Admission to the MAC program is competitive. The best-qualified applicants will be accepted up to the number of spaces available for new students. The Admissions Committee evaluates candidates on three criteria:

- undergraduate academic record and grade point average;
- GMAT score*;
- "Engagement & Leadership" -- relevant activities and/or work experience, student athletics, volunteer work/community involvement, study abroad, in-person MAC interview, overall presence, leadership experience and integrity.

[*The Admissions Committee requires all applicants who score below 530 on their first attempt to retake the GMAT exam prior to the application deadline.]

Individuals with a Bachelor's degree in any major may apply to the program; however, any applicant without a Bachelor's degree in Accounting must complete a series of undergraduate Accounting prerequisites before qualifying as a MAC degree candidate. These prerequisites are available to take online. More complete information can be found on the MAC website (https://poole.ncsu.edu/mac/admissions/).

Fellowships (On-campus)

As a part of the admissions process, applicants may be considered for Jenkins Graduate School's merit-based MAC fellowships. Students may qualify for a firm-sponsored or an academic fellowship. A fellowship may provide financial support for educational expenses and also may include an offer of employment upon graduation (firm-sponsored option). All required application materials must be submitted by the February 1st application deadline to be considered for a fellowship.

Scholarships

MAC scholarships are merit-based and are made possible through a partnership between sponsoring CPA firms, the NC State Graduate School, alumni and the Poole College of Management’s Department of Accounting. All students who submit an application no later than February 1st are considered for a scholarship award. Recipients of MAC scholarships are selected based on their scholarship, leadership, service, experience, presence and integrity. Scholarships range from $2,000 to $19,000.

Master's Degree Requirements

Students that choose the Public Accounting Track (p. 813), complete an 11-course sequence that includes eight graduate-level Accounting courses and three elective courses (31 total credit hours). The Business and Industry Track (p. 814) includes six graduate-level accounting courses and four electives (30 total credit hours). The curriculum is designed to provide a broad-based professional education. Students have the opportunity to focus their education by choosing one of our three optional specializations: enterprise risk management, information technology or tax strategy. These specializations provide an additional depth of knowledge that can give students a leg up as they enter their chosen profession.

Other Relevant Information

On-Campus MAC

We accept applications starting in the fall but encourage interested applicants to apply early to be eligible for our many scholarship and fellowship opportunities.

- **December 1**: Early admission deadline
- **February 1**: Deadline for MAC scholarship and fellowship consideration
- **March 1**: Final admission deadline

Online MAC

- **October 1**: Limited number of spots available for those interested in a January program start
- **December 1**: Early admission deadline
- **February 1**: Second admission deadline
- **March 1**: Final admission deadline

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Tax Analytics and Technology (Certificate)

The Graduate Certificate in Tax Analytics and Technology is currently a two to three year online program that targets for enrollment MAC and MBA graduate students at NC State, graduate students at other universities and working professionals in the Research Triangle, national and global community. They will learn knowledge and skills to extract, manipulate, analyze, and summarize tax data to solve tax problems, identify opportunities for tax savings, and to effectively communicate actionable tax and business strategies to organizations.

Admissions Requirements

Graduate students at NC State must be in good standing. Students not enrolled at NC State must have completed a baccalaureate degree and have either taken some introductory/intermediate accounting and tax courses or have work experience in these areas. All students must submit an application to the certificate program which will be reviewed and evaluated by the coordinator. A minimum GPA of 3.0 (in undergraduate and/or prior graduate work) is required for admission to the program.

Program Requirements

The certificate program requires students to complete twelve (12) one-credit hour online courses with an overall 3.0 GPA in all courses. No transfer credits will be accepted in the program and it must be completed within four years.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
Select nine hours of coursework from the following:			
ACC 560	Tools for Tax Analytics		

ACC 561	Database Management in Tax	
ACC 562	Forecasting Effective Tax Rates and Scenario Analysis - Introduction	
ACC 563	Forecasting Effective Tax Rates and Scenario Analysis - Advanced Application	
ACC 564	Project Management and Process Documentation in Tax	
ACC 565	Visual Analytics in Tax	
ACC 566	Database Management Applications in Tax	
ACC 569	Advanced Visual Analytics in Tax	
ACC 570	Data Security and Warehousing in Tax

Total Hours		**12**

Business Administration

The Master of Business Administration (MBA) program develops business leaders for tomorrow's global markets and technologies. The Jenkins MBA program provides students with the requisite foundation in general business management, while also allowing time to focus on an area of particular interest. In pairing academic excellence with real-world experience, Jenkins MBA students are ready to meet global challenges head-on with practical, technology-driven solutions. Students may choose to pursue an MBA through the Full-time program on NC State's main campus; the Professional Evening program with locations on NC State's main campus as well as a RTP location; or the Online program.

Admission Requirements

In addition to the basic Graduate School admission requirements, full-time MBA applicants must submit recent GMAT/GRE scores, unless approved for a test waiver. Admission decisions for both full-time and working professional applicants are based on academic performance and potential, GMAT or GRE scores (when applicable), essays, recommendations, relevant work experience and an interview. Students must have previous coursework in statistics before entering the program.

Master of Business Administration

The MBA program requires every student to complete the core curriculum that includes coursework in accounting, economics, finance, marketing, operations / supply chain, organizational behavior, statistics and strategy, as well as communications, ethics and critical thinking and writing. Full-time students must complete a minimum of 54 credit hours; Professional Evening and Online students must complete a minimum of 40 credit hours.

Additional Requirements

Full-time

In addition to the core curriculum, students must complete a minimum of 12 elective hours within a concentration; an advanced analytics course; and a practicum. Students then have the opportunity to choose from a variety of elective courses to meet the 54 credit hour minimum.

Professional Evening and Online

In addition to the core curriculum, students must complete an advanced analytics course and a practicum. Students then have the opportunity to choose from a variety of elective courses to meet the 40 credit hour minimum.

Business Analytics (Certificate)

The Graduate Certificate in Business Analytics helps to develop management professionals who are skilled in big data analysis and decision-making. It provides management professionals with advanced skills and techniques to address both specific and industry-wide business problems.

Plan Requirements

Pre-Requisites

Students should have taken MBA 506 Data Driven Managerial Decisions 1(1 hr) and MBA 507 Data Driven Managerial Decisions 2 (1 hr) in order to successfully complete this certificate.

Code	Title	Hours	Counts towards
Required Courses		**6**	
MBA 551	Predictive Analytics for Business and Big Data		
MBA 552	Data Engineering, Management and Warehousing		
Required Practicum Course		**3**	
Students need to take either OPTION A or one of the courses from OPTION B that are picked in conjunction with the academic advisor.			
Option A			
MBA 559	Business Analytics Practicum		
Option B			
Select one of the courses listed below in conjunction with the academic advisor			
MBA 519	Enterprise Risk Management Practicum		
MBA 524	Equity Valuation		
MBA 549	Supply Chain Management Practicum		
MBA 589	Jenkins Consulting Practicum		
Elective Courses		**3**	
Select one of the following courses:			
ECG 561	Applied Econometrics I		
ECG 562	Applied Econometrics II		
MBA 545	Decision Making under Uncertainty		
MBA 548	Analytical Supply Chain Management		
MBA 565	Marketing Analytics		
MBA 566	Digital Marketing		
MBA 590	Special Topics In Business Management (Innovation and the IoT Marketplace)		
Total Hours		**12**	

[1] Students can select one of the following practicum course options, provided the project they complete in the course has an analytic focus. Students will need approval from the certificate director before enrolling in one of these courses for analytic certificate credit.

Finance (Certificate)

Through theory and applied learning, students come to understand the relationship between capital providers (investing households), capital markets (stocks and bonds), and capital users (firms). Students use real-world tools, such as stock price databases and spreadsheet analysis, to apply theory to practice. This flexible option is ideal for professionals who want to gain a foundational understanding of financial management.

Admissions requirements

Graduate certificate programs are open to NC State MBA students and Master of Management of Marketing Analytics students or to others who are not currently enrolled at NC State with a bachelor's degree from an accredited college or university. The TEC certificate is available for all applicants, including other graduate students at NC State University.

- Four year bachelor's degree (or US degree equivalent) from a regionally accredited college or university.
- Maintained a minimum GPA of 3.0 across all certificate-counting classes in undergraduate and graduate work (some exceptions are available for those with graduate studies).
- Two years of full-time, post-baccalaureate professional employment is required for applicants to certificate programs.
- Standardized test scores (GMAT, GRE) are not required to apply to a graduate management certificate program.

International applicants who are not in a graduate program at NC State must take the TOEFL or IELTS unless they qualify for a waiver.

Program Requirements

The certificate program requires students to complete twelve (12) credit hours with an overall 3.0 GPA in all certificate courses. Credit toward the certificate in a particular course will be given only if a grade of B- or better is earned in that course. All courses in the program must be taken for a letter grade. No transfer credits will be accepted in the program and it must be completed within three years.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**3**	
MBA 501	Financial Accounting for Decision Makers		
MBA 520	Financial Management of Corporations		
Elective Courses		**9**	
Select nine credit hours of coursework from the following:			
MBA 521	Advanced Corporate Finance		
MBA 522	Financial Modeling		
MBA 523	Investment Theory and Practice		
MBA 524	Equity Valuation		
MBA 525	Taxes and Business Strategy		
MBA 526	International Finance		
MBA 590	Special Topics In Business Management (Private Equity Venturing)		
Total Hours		**12**	

Marketing (Certificate)

The Marketing Certificate is an innovative option for professionals who want to become skilled in a field that significantly impacts every other industry. Students focus on seeking, identifying and creating business opportunities, developing products/services, and building/maintaining customer relationships while discovering the skills and tools needed to succeed in today's marketing climate.

Admission requirements

For admission requirements, please visit the admissions website (https://mba.ncsu.edu/academics/certificate-programs/admissions-2/). Please note that current graduate students at NC State may not dual enroll into this certificate.

Program Requirements

The certificate program requires students to complete twelve (12) credit hours with an overall 3.0 GPA in all certificate courses. Credit toward the certificate in a particular course will be given only if a grade of B- or better is earned in that course. All courses in the program must be taken for a letter grade. No transfer credits will be accepted in the program and it must be completed within three years.

Plan Requirements

Marketing Elective		**1**	
Select a marketing elective approved in conjunction with the academic committee			
Research Elective		**3**	
Select one of the following:			
MBA 562	Research Methods In Marketing		
MBA 565	Marketing Analytics		
MBA 566	Digital Marketing		
Additional Elective		**3**	
Select one of the following:			
MBA 562	Research Methods In Marketing [1]		
MBA 563	Product and Brand Management		
MBA 564	Business Relationship Management		
MBA 565	Marketing Analytics		
MBA 566	Digital Marketing		
Total Hours		**12**	

[1] If not taken as the research-oriented course

Operations and Supply Chain Management (Certificate)

The Operations and Supply Chain Management Certification program provides students with in-depth knowledge of the entire supply chain process, from raw materials to finished products. With an emphasis on information and supply flow, students develop the skills needed to write comprehensive management reports, manage teams of workers, and make persuasive management presentations.

Admission requirements

- Four year bachelor's degree (or US degree equivalent) from a regionally accredited college or university.
- Maintained a minimum GPA of 3.0 across all certificate-counting classes in undergraduate and graduate work (some exceptions are available for those with graduate studies).
- Two years of full-time, post-baccalaureate professional employment is required for applicants to certificate programs.
- Standardized test scores (GMAT, GRE) are not required to apply to a graduate management certificate program.

International applicants who are not in a graduate program at NC State must take the TOEFL or IELTS unless they qualify for a waiver.

Please note that current graduate students at NC State may not dual enroll into this certificate.

Program Requirements

Select two of the following:			
MBA 555	Product Design and Development		
MBA 572	Venture Opportunity Analytics		
MBA 578	Venture Launch		
MBA 579	Entrepreneurship Clinic Practicum		
Total Hours		**12**	

Economics

The graduate program in economics is a joint program of the Department of Agricultural and Resource Economics in the College of Agriculture and Life Sciences and the Department of Economics in the Poole College of Management. Emphasis is placed on economic theory and quantitative economic analysis and their application to economic problems. Master's students can choose between the terminal master's track and the PhD-prep track. In both tracks, they may further tailor their experience by choosing to concentrate in one or multiple of the four fields: financial economics; international economics; natural resource and environmental economics and applied econometrics. Students can also choose between engaging in a research project culminating in a thesis (the Master of Science in economics degree) and simply pursuing a coursework only option (the Master of Economics degree). The major fields of specialization for doctoral students are: agricultural economics, development and labor economics, econometrics, environmental/resource economics, international economics, macro-monetary economics and microeconomic theory and industrial organization.

Admission Requirements

Minimum background for admission for Master's study includes principles of economics, calculus I and calculus II, and one semester of statistics at the 300-level (econometrics courses included). For doctoral study, prerequisites are intermediate microeconomics, intermediate macroeconomics, calculus I-III, linear algebra, and a course in mathematical statistics. GRE scores are required for doctoral applicants only.

Master's Degree Requirements

Both the Master of Science in economics and the Master of Economics degrees require core courses in microeconomics, macroeconomics and econometrics. Each degree also carries additional elective requirements. The M.S. degree requires a thesis. Both degrees offer two tracks: a terminal master's track and a PhD-prep track. Both Master's degrees require a total of 30 credit hours. Accelerated Bachelor's/Master's degree programs are available for non-thesis options.

Doctoral Degree Requirements

The Ph.D. program requires a minimum of 72 hours and at least six semesters of work beyond the Bachelor's degree. Students must pass written comprehensive examinations in microeconomics and macroeconomics. Course requirements include two semesters of econometrics and six field courses.

Student Financial Support

Fellowships, research and teaching assistantships are available and are awarded competitively on a merit basis. These fellowships and assistantships go to Ph.D. students only; there is no financial support for Master's students. Prospective doctoral students who wish to be considered for fellowships and assistantships should apply for fall admission by January 1.

Other Relevant Information

Graduate students on financial support are provided office space or study carrels. Other students may be assigned study carrels if available. All students have access to the economics graduate student computer lab.

Degrees

- Economics (MR) (p. 828)
- Economics (MS) (p. 830)
- Economics (PhD) (p. 833)
- Economics (Minor) (p. 834)

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Management

The Poole College of Management offers a Master's degree in Management (MM) that comprises programs that help students build core business skills. The curriculum is designed to give students with a range of backgrounds a strong exposure to core business management skills in a variety of industries. The programs help students develop critical skills in specialized areas, such as marketing analytics. It is designed specifically for students who are looking to create a personal competitive advantage.

Admission Requirements

Applicants are required to complete the standard NC State Graduate School application process. Admission decisions are based on past academic performance and potential, essays, recommendations, relevant work experience and an interview. Applicants are not required to submit GMAT or GRE scores but may choose to do so. International applicants must complete the TOEFL or IELTS. Students can choose to apply for admission in either the Fall or the Spring semester.

Master of Management Degree Requirements

The Master of Management degree requires a total of 30 credit hours, and students must complete all degree requirements within six years.

Marketing Analytics Concentration

The Master of Management (MM), Marketing Analytics concentration is currently offered online as a part-time program and is geared towards students of all backgrounds. Our innovative curriculum focuses on business analytics, marketing and business skills and practical experience – all in a hands-on learning environment. Students will benefit from our faculty's real-world experience, world-class research and industry partnerships to build successful careers in data analytics.

Risk and Analytics Concentration

The Master of Management (MM), Risk and Analytics concentration will be entirely online, and can be completed within 18 - 30 months, part-time. This concentration is targeted to professionals seeking to acquire expected core competencies in risk management and analytical decision-making to be positioned for leadership positions across multiple functions of an organization. The growth in data analytics across all businesses and industries is creating greater demands for individuals with analytic and risk management skills.

Other Relevant Information

While the Master of Management is a fully online program, certain courses may also be offered as in-person classes for students who wish to take evening or daytime classes. Students can apply to start in either the Fall or the Spring semester.

Credits in the MM program can be used toward the MBA. The Working Professional MBA is a 40 hour degree program; 12 MM hours may be counted toward the MBA, subject to approval by an academic advisor. Applicants must understand that completion of the MM program does not guarantee admission to the MBA.

Poole College of Management's Master of Management with a concentration in Marketing Analytics program is geared towards students of all backgrounds, including recent graduates and working professionals. The program will train students in state of the art data analytic techniques that focus not just on data handling but also on leveraging meaningful data insights that help increase ROI and drive growth. Graduates of the program will make an immediate impact in the workforce with cutting-edge marketing techniques that allow them to handle large amounts of data, use appropriate analytics software and modeling techniques, and implement powerful marketing strategies.

Marketing Analytics graduates can fill a multitude of jobs – data scientists, marketing analysts, market research analysts, predictive analytics analysts, business data analysts, digital marketing specialists, social media analysts and more.

Individuals will be better positioned for leadership positions across **multiple functions of an organization**, given risk management is becoming an expected core competency.

Professionals with a risk and analytics mindset position themselves strategically for opportunities in a number of fields including: business planning and strategic analysis, innovation and development, logistics and supply chain, compliance oversight, financial analysis and forecasting, enterprise-wide risk management, internal audit, business continuity planning, sustainability and a variety of risk advisory services.

Graduate Certificates - Poole College of Management

Certificates

- Business Analytics (Certificate) (p. 822)
- Business Leadership (Certificate) (p. 823)

- Finance (Certificate) (p. 824)
- Marketing (Certificate) (p. 824)
- Operations and Supply Chain Management (Certificate) (p. 825)
- Tax Analytics and Technology (Certificate) (p. 815)
- Technology Entrepreneurship and Commercialization (Certificate) (p. 826)

Finance (Certificate)

Through theory and applied learning, students come to understand the relationship between capital providers (investing households), capital markets (stocks and bonds), and capital users (firms). Students use real-world tools, such as stock price databases and spreadsheet analysis, to apply theory to practice. This flexible option is ideal for professionals who want to gain a foundational understanding of financial management.

Admissions requirements

Graduate certificate programs are open to NC State MBA students and Master of Management of Marketing Analytics students or to others who are not currently enrolled at NC State with a bachelor's degree from an accredited college or university. The TEC certificate is available for all applicants, including other graduate students at NC State University.

- Four year bachelor's degree (or US degree equivalent) from a regionally accredited college or university.
- Maintained a minimum GPA of 3.0 across all certificate-counting classes in undergraduate and graduate work (some exceptions are available for those with graduate studies).
- Two years of full-time, post-baccalaureate professional employment is required for applicants to certificate programs.
- Standardized test scores (GMAT, GRE) are not required to apply to a graduate management certificate program.

International applicants who are not in a graduate program at NC State must take the TOEFL or IELTS unless they qualify for a waiver.

Program Requirements

The certificate program requires students to complete twelve (12) credit hours with an overall 3.0 GPA in all certificate courses. Credit toward the certificate in a particular course will be given only if a grade of B- or better is earned in that course. All courses in the program must be taken for a letter grade. No transfer credits will be accepted in the program and it must be completed within three years.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**3**	
MBA 501	Financial Accounting for Decision Makers		
MBA 520	Financial Management of Corporations		
Elective Courses		**9**	
Select nine credit hours of coursework from the following:			
MBA 521	Advanced Corporate Finance		
MBA 522	Financial Modeling		
MBA 523	Investment Theory and Practice		
MBA 524	Equity Valuation		
MBA 525	Taxes and Business Strategy		
MBA 526	International Finance		
MBA 590	Special Topics In Business Management (Private Equity Venturing)		
Total Hours		**12**	

Marketing (Certificate)

The Marketing Certificate is an innovative option for professionals who want to become skilled in a field that significantly impacts every other industry. Students focus on seeking, identifying and creating business opportunities, developing products/services, and building/maintaining customer relationships while discovering the skills and tools needed to succeed in today's marketing climate.

Admission requirements

For admission requirements, please visit the admissions website (https://mba.ncsu.edu/academics/certificate-programs/admissions-2/). Please note that current graduate students at NC State may not dual enroll into this certificate.

Program Requirements

The certificate program requires students to complete twelve (12) credit hours with an overall 3.0 GPA in all certificate courses. Credit toward the certificate in a particular course will be given only if a grade of B- or better is earned in that course. All courses in the program must be taken for a letter grade. No transfer credits will be accepted in the program and it must be completed within three years.

Plan Requirements

[1] If not taken as the research-oriented course

Operations and Supply Chain Management (Certificate)

The Operations and Supply Chain Management Certification program provides students with in-depth knowledge of the entire supply chain process, from raw materials to finished products. With an emphasis on information and supply flow, students develop the skills needed to write comprehensive management reports, manage teams of workers, and make persuasive management presentations.

Admission requirements

- Four year bachelor's degree (or US degree equivalent) from a regionally accredited college or university.
- Maintained a minimum GPA of 3.0 across all certificate-counting classes in undergraduate and graduate work (some exceptions are available for those with graduate studies).
- Two years of full-time, post-baccalaureate professional employment is required for applicants to certificate programs.
- Standardized test scores (GMAT, GRE) are not required to apply to a graduate management certificate program.

International applicants who are not in a graduate program at NC State must take the TOEFL or IELTS unless they qualify for a waiver.

Please note that current graduate students at NC State may not dual enroll into this certificate.

Program Requirements

The certificate program requires students to complete twelve (12) credit hours with an overall 3.0 GPA in all certificate courses. Credit toward the certificate in a particular course will be given only if a grade of B- or better is earned in that course. All courses in the program must be taken for a letter grade. No transfer credits will be accepted in the program and it must be completed within three years.

MBA 590	Special Topics In Business Management (Strategic Supply Chain Management)	
MBA 590	Special Topics In Business Management (Managing Operations)	
Total Hours		**12**

Tax Analytics and Technology (Certificate)

The Graduate Certificate in Tax Analytics and Technology is currently a two to three year online program that targets for enrollment MAC and MBA graduate students at NC State, graduate students at other universities and working professionals in the Research Triangle, national and global community. They will learn knowledge and skills to extract, manipulate, analyze, and summarize tax data to solve tax problems, identify opportunities for tax savings, and to effectively communicate actionable tax and business strategies to organizations.

Admissions Requirements

Graduate students at NC State must be in good standing. Students not enrolled at NC State must have completed a baccalaureate degree and have either taken some introductory/intermediate accounting and tax courses or have work experience in these areas. All students must submit an application to the certificate program which will be reviewed and evaluated by the coordinator. A minimum GPA of 3.0 (in undergraduate and/or prior graduate work) is required for admission to the program.

Program Requirements

The certificate program requires students to complete twelve (12) one-credit hour online courses with an overall 3.0 GPA in all courses. No transfer credits will be accepted in the program and it must be completed within four years.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**9**	
Select nine hours of coursework from the following:			
ACC 560	Tools for Tax Analytics		
ACC 561	Database Management in Tax		
ACC 562	Forecasting Effective Tax Rates and Scenario Analysis - Introduction		
ACC 563	Forecasting Effective Tax Rates and Scenario Analysis - Advanced Application		
ACC 564	Project Management and Process Documentation in Tax		
ACC 565	Visual Analytics in Tax		
ACC 566	Database Management Applications in Tax		
ACC 569	Advanced Visual Analytics in Tax		
ACC 570	Data Security and Warehousing in Tax		
Elective Courses		**3**	
Select three hours of coursework from the following:			
BUS 590	Special Topics In Business Management (Forecasting and Scenario Planning Using Monte Carlo)		
BUS 590	Special Topics In Business Management (Creating Management Dashboards Using Tableau)		
MBA 506	Data-Driven Managerial Decisions 1		
MBA 507	Data-Driven Managerial Decisions 2		
MBA 511	Data Security and Privacy		
MBA 545	Decision Making under Uncertainty		
MBA 551	Predictive Analytics for Business and Big Data		
Total Hours		**12**	

Technology Entrepreneurship and Commercialization (Certificate)

The Technology Entrepreneurship and Commercialization certificate program provides students with a proven approach to evaluating technologies and bringing technology innovations to market. Students who complete the TEC certificate are equipped to evaluate technologies, create and develop product ideas, and construct business proposals.

Program Requirements

The certificate program requires students to complete twelve (12) credit hours with an overall 3.0 GPA in all certificate courses. Credit toward the certificate in a particular course will be given only if a grade of B- or better is earned in that course. All courses in the program must be taken for a letter grade. No transfer credits will be accepted in the program and it must be completed within three years.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses		**6**	
MBA/MSE 576	Technology Entrepreneurship and Commercialization I		
MBA/MSE 577	Technology Entrepreneurship and Commercialization II		
Elective Courses		**6**	
Select two of the following:			
MBA 555	Product Design and Development		
MBA 572	Venture Opportunity Analytics		
MBA 578	Venture Launch		
MBA 579	Entrepreneurship Clinic Practicum		
Total Hours		**12**

Doctor of Philosophy (PhD)

- Fiber and Polymer Science (PhD) (p. 844)
- Textile Technology Management (PhD) (p. 860)

Minors

- Textile and Apparel Management (Minor) (p. 868)
- Textile Chemistry (Minor) (p. 852)
- Textile Engineering (Minor) (p. 857)

Certificates

- Consumer Textile Product Design and Development (Certificate) (p. 869)
- Nonwoven Science and Technology (Certificate) (p. 871)
- Textile Brand Management and Marketing (Certificate) (p. 869)
- Textile Supply Chain Management (Certificate) (p. 858)

Fiber & Polymer Science

This multidisciplinary program brings together the disciplines of mathematics, chemistry, physics, and engineering for the development of the independent scholars versed in the fields of polymer, fiber, and textile science. The program is coordinated by the Wilson College of Textiles and leads to the degree of Doctor of Philosophy.

The polymer, fiber, and textile sciences are concerned with polymeric materials and fibers produced from them; textile assemblies in one, two, and three-dimensional forms; and the chemistry of dyeing, finishing, and other wet processes. This broad field of study permits a wide range of useful concentrations. The candidate is expected to concentrate in one area and to acquire a reasonable perspective in other relevant areas. Generally, a student specializes in the areas of (1) polymer chemistry and synthesis, (2) fiber and polymer physics and physical chemistry, (3) the production, processing and properties of fibrous materials, or (4) chemistry of dyes, finishes, and their processes. The student's research is usually based within one of these areas or another suitable one.

Admission Requirements

Students with a Master of Science (M.S.) degree in a related field may apply to the Fiber and Polymer Science program. Typically the minimum acceptable overall grade point average (GPA) is a 3.0 out of 4.0, based on most current U.S. universities. Students without a master's degree may also apply if met the following conditions:

1. the undergraduate degree from a well-known and robust research active program with a cumulative GPA of 3.5 or above;
2. strong recommendation letters from faculty adviser(s) indicating research experience or suggesting research potential; and
3. strong publication record/experience or extensive industry experience in related industry/profession.

Applicants should plan to take the GRE or GMAT examination, which is required for all applicants. The GRE/GMAT scores should be sent to NC State University electronically and be available online.

For International students, TOEFL or IELTS is required for the application. Students must rank in a competitive percentile in order to be considered for acceptance into NC State University.

- TOEFL: A total score of 80+ on IBT. Minimum scores of 18 points for each section: or
- IELTS: An overall band score of 6.5+. Minimum scores of 6.5 points for each section

Scholarships and Assistantships

Competitive scholarships and assistantships from the program as well we as the University are available to incoming new students. All incoming students will be considered for the funding opportunities. No separate application for assistantships/scholarships is needed.

Fiber and Polymer Science (PhD)

Degree Requirements

The Ph.D. degree in Fiber and Polymer Science symbolizes the ability of the recipient to undertake original and scholarly work at the highest levels without supervision. The degree is, therefore, not granted simply upon the completion of a stated amount of course work but rather upon demonstration by the student of a comprehensive knowledge base and high attainment in scholarship. The student demonstrates this ability by passing a series of courses, creating a written critical literature review and original research proposal, defending an oral preliminary examination, writing a dissertation reporting the results of an original investigation, and making a final oral defense of the research before the student's advisory committee and other interested members of the University community.

Code	Title	Hours	Counts towards
Required Courses		**14**	
FPS 801	Seminar [1]		
FPS 770	Advances in Polymer Science [2]		

TMS 762	Physical Properties Of Fiber Forming Polymers, Fibers and Fibrous Structures [2]	
Select two additional Courses from the following: [2]		
Polymer Science		
TC 771	Polymer Microstructures, Conformations and Properties	
Fiber Science		
TC 704	Fiber Formation--Theory and Practice	
TMS 761	Mechanical and Rheological Properties Of Fibrous Material	
TMS 763	Characterization Of Structure Of Fiber Forming Polymers	
Coloration and Wet Processing		
TC 706 & TC 707	Color Science and Color Laboratory	
TC/FPS 710	Science of Dye Chemistry, Dyeing, Printing and Finishing	
TC 720	Chemistry Of Dyes and Color	
Formation and Properties of Textile Products		
FPS 750	Advances in Fabric Formation, Structure, and Properties	
Additional Courses		**58**
"Elective Courses" that will be applied to reach 72 credit hours will be determined in conjunction with the academic committee		
Total Hours		**72**

1 All students must take two (2) semesters of FPS 801 Seminar.

2 Every student must obtain a grade of B or better in each of the four qualifying courses chosen.

Additional Requirements

- A minimum of 72 credit hours is required of students entering the program with a B.S. degree, or a minimum of 54 credit hours beyond the M.S. degree is required. (Students, who enter the Ph.D. program directly upon completion of an M.S. at NC State, may be allowed credit for up to 30 hours of their M.S. and thus would require 42 additional credit hours to complete the Ph.D.)
- Most of these credit hours are expected to be research credits (FPS 893 Doctoral Supervised Research or FPS 895 Doctoral Dissertation Research).
- Following successful course completion, the student needs to pass the defense of a research proposal to obtain the candidacy for the Ph.D degree.
- The final examination is an oral exam where the student presents and defends her/his research procedures, results and conclusions. The presentation will be made to an examining committee consisting of the student's advisory committee and is open to interested faculty, staff and students. After the presentation the student will be orally examined by the examining committee. The final oral examination can be scheduled once all coursework requirements have been fulfilled and the committee is satisfied that the dissertation is complete, but not earlier than one semester after admission to candidacy.
- The anticipated time for completion of the Ph.D. program is four years for a student entering from a B.S. degree and three years for entry from an M.S. degree. The minimum time required (in exceptional cases) is two years beyond entry if the student obtained an M.S. degree from NC State.

Textile Chemistry

Degree Requirements Master of Science in Textile Chemistry (MS/TC)

The Masters of Science in Textile Chemistry (MS TC) has two options, a thesis option (Option A) and a non-thesis option (Option B).

M.S. TC Option A (Thesis Degree) Program Requirements

MS TC Option A (Thesis) requires a minimum of 32 credit hours, with a minimum of 24 credit hours (8 courses) meeting the following requirements:

- At least 12 credit hours of courses with substantial ***chemistry*** content, mostly CH or TC, or from the approved TC offerings table. Substitutions must be approved by the Director of Graduate Programs;
- A minimum of 15 credit hours of courses that are offered by the TECS Department, which may have the following prefixes: TC (PCC), TE, TMS, NW, TT, FPS, and TTM. *Note: not all courses with these prefixes are offered by the TECS Department*;
- Two semesters of TC601 (Graduate Seminar) are required;
- For the thesis a minimum of six hours of thesis related research is required (TC 695, TC693 or TC630).

Master's Thesis. The Master's thesis should be a research exercise that necessitates expertise at the M.S. level and is concentrated in the textile chemistry area on a well-defined topic that has a restricted scope.

M.S. TC Option B (Non-Thesis Degree) Program Requirements

MS TC Option B (Non-Thesis) requires a minimum of 32 credit hours, with a minimum of 24 credit hours (8 courses) meeting the following requirements:

- At least 12 credit hours of courses with substantial ***chemistry*** content, mostly CH or TC, or from the approved TC offerings table. Substitutions must be approved by the Director of Graduate Programs;
- A minimum of 15 credit hours of courses that are offered by the TECS Department, which may have the following prefixes: TC (PCC), TE, TMS, NW, TT, FPS, and TTM. *Note: not all courses with these prefixes are offered by the TECS Department*;
- Two semesters of TC601 (Graduate Seminar) are required;
- At least six credit hours of project-related work in textile chemistry at the 600 level or above, such as TC 630 (Independent Study) or an internship, which will be advised by and evaluated by at least one Graduate Faculty Member in Textile Chemistry.

Degrees

- Textile Chemistry (MS) (p. 848)
- Textile Chemistry (Minor) (p. 852)

Textile Chemistry (MS)

Master of Science Degree Requirements

Students are required to take a total of 8 courses (24 credits of graded coursework), meeting criteria #1 and #2 below, courses may count toward both criteria (e.g. all TE and some TC courses). Additional courses must be of the graduate level (500-level or above) and be relevant to the field of study.

Code	Title	Hours	Counts towards
TECS Core Courses		**15**	
Criteria #1 [1]			
See "Criteria #1" listed below			
Engineering Content Courses		**12**	
Criteria #2			
See "Criteria #2" listed below			
TECS Seminar		**2**	
TC 601	Seminar		
TC 601	Seminar		
Research / Independent Studies		**6-9**	
Select either "Option A" or "Option B"			
Option A [2]			
TC 630	Independent Study		
TC 693	Master's Supervised Research		
TC 695	Master's Thesis Research		
TC 696	Summer Thesis Research		
Option B [3]			
TC 630	Independent Study		
TC 630	Independent Study		
Total Hours		**32-36**	

[1] The TC and some TE/FPS courses may also count towards criteria #2 as listed there

[2] At least 6 credits of research or independent study courses, the first 6 credits are always recommended to be TC 630

[3] 6 credits of independent study

Criteria #1

Code	Title	Hours	Counts towards
Select a minimum of five courses from the TECS faculty-taught courses listed below		15	
Total Hours		**15**	

TC PREFIX

Code	Title	Hours	Counts towards
500-Level Courses			
TC 530	The Chemistry Of Textile Auxiliaries		
TC 561	Organic Chemistry Of Polymers		
TC 565	Polymer Applications and Technology		
TC 589	Special Studies In Textile Engineering and Science		
700-Level Courses			
TC 704	Fiber Formation--Theory and Practice		
TC 705	Theory Of Dyeing		
TC 706	Color Science		
TC 707	Color Laboratory		
TC 710	Science of Dye Chemistry, Dyeing, Printing and Finishing	3	
TC 720	Chemistry Of Dyes and Color		
TC 771	Polymer Microstructures, Conformations and Properties

FB 723	Forest Biomaterials Chemistry		
MSE 565	Introduction to Nanomaterials		
MSE/CHE 761	Polymer Blends and Alloys		
MSE 775	Structure of Semicrystalline Polymers		
CHE/BEC 562	Fundamentals of Bio-Nanotechnology		

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate

School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Textile Engineering

Degree Requirements Master of Science in Textile Chemistry (MS/TE)

The Masters of Science in Textile Engineering (MS TE) has two options, a thesis option (Option A) and a non-thesis option (Option B).

M.S. TE Option A (Thesis Degree) Program Requirements

MS TE Option A (Thesis) requires a minimum of 32 credit hours, with a minimum of 24 credit hours (8 courses) meeting the following requirements:

- At least 12 credit hours of courses with substantial ***engineering*** content, including courses with TE and TMS prefixes. Substitutions must be approved by the Director of Graduate Programs;
- A minimum of 15 credit hours of courses that are offered by the TECS Department, which may have the following prefixes: TC (PCC), TE, TMS, NW, TT, FPS, and TTM. *Note: not all courses with these prefixes are offered by the TECS Department*;
- Two semesters of TE601 (Graduate Seminar) are required;
- For the thesis a minimum of six hours of thesis related research is required (TE 695, TE693 or TE630).

Master's Thesis. The Master's thesis should be a research exercise that necessitates expertise at the M.S. level and is concentrated in the textile engineering area on a well-defined topic that has a restricted scope.

M.S. TE Option B (Non-Thesis Degree) Program Requirements

MS TE Option B (Non-Thesis) requires a minimum of 32 credit hours, with a minimum of 24 credit hours (8 courses) meeting the following requirements:

- At least 12 credit hours of courses with substantial ***engineering*** content, including courses with TE and TMS prefixes. Substitutions must be approved by the Director of Graduate Programs;
- A minimum of 15 credit hours of courses that are offered by the TECS Department, which may have the following prefixes: TC (PCC), TE, TMS, NW, TT, FPS, and TTM. *Note: not all courses with these prefixes are offered by the TECS Department*;
- Two semesters of TE601 (Graduate Seminar) are required;
- At least six credit hours of project-related work in textile engineering at the 600 level or above, such as TE 630 (Independent Study) or an internship, which will be advised by and evaluated by at least one Graduate Faculty Member in Textile Engineering.

Degrees

- Textile Engineering (MS) (p. 854)
- Textile Engineering (Minor) (p. 857)
- Textile Supply Chain Management (Certificate) (p. 858)

Textile Supply Chain Management (Certificate)

The Graduate Certificate Program in Textile Supply Chain Management provides NC State graduate students the opportunity to develop recognized academic credentials in this concentration in addition to their major area of graduate study. The Certificate also provides non-degree graduate-level students the opportunity to develop recognized advanced expertise in Textile Supply Chain Management.

Admission

Applicants must meet one of the 3 following requirements:

- Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
- Be a degree student in good standing in a NC State University graduate program; and
- Have a Master's degree.

Provisional Admission

Applicants who do not meet the GPA requirements may be admitted provisionally based on past work experiences as a professional in textiles or a textile related field. Supporting documentation of professional experience in textiles should be submitted for provisional admission. Students who are admitted provisionally must earn at least a "B" average in the first three courses of the certificate program in order obtain full admission into the certificate program.

Plan Requirements

Code	Title	Hours	Counts towards
Required Courses			
TTM 501	Textile Enterprise Integration	3	
TTM 761	Supply Chain Management and Information Technology	3	
TE 533	Lean Six Sigma Quality [1]	3	
or TE 540	Textile Information Systems Design		
Select two of the following advanced courses:		6	
TTM 530	Textile Quality and Process Control		
TTM 583	Strategic Planning for Textile Firms		
TTM 588	Global Perspectives in Textiles Supply Chain Management (USA)		
Total Hours		**15**	

[1] either or both - spare will be used as an "advanced course"

Textile Technology Management

The Ph.D. in Textile Technology Management program is designed to educate students for research and management careers in textile technology management in the fiber, textile, apparel, retail and related industries complex, as well as for positions in government and academe.

Numerous competitive challenges are facing the global textile complex. There is a need for industry and government leaders who can provide knowledge of products, processes and business strategies to effectively position companies to compete in this global marketplace. The Ph.D. in Textile Technology Management program is designed to educate students for research and management careers in textile technology management in the fiber, textile, apparel, retail and related industries complex, as well as for positions in government and academe.

The graduates of this program are expected to play several roles in industry, government, and other institutions, including:

1. Carrying out research on issues that relate to the technologies of design, characterization, and manufacture of fibers and fibrous products, management of production and sourcing activities, marketing and distribution of products, international trade, and information requirements. The plethora of raw materials and product specific technologies extant in the industry coupled with the rapid rate at which these technologies are changing challenge students in the program to be innovative in approaches to product development, processes, and strategic business practices. Graduates assume positions in the industry with prime responsibilities for developing policy alternatives for strategic and long range planning.
2. Contributing to the teaching and research in institutions concerned with fiber, textile, apparel, and retail programs.
3. Developing policies at the highest level where broad technical and managerial expertise is required to ensure proper decision-making.

The educational objectives of the TTM Ph.D. program are two-fold:

1. To prepare managers for the research and technological enterprises within the fiber, textile, apparel, retail and related industries. To

achieve this objective, the programs of study will be designed for each student to acquire and integrate knowledge of the materials and technologies used in the industrial complex by applying those quantitative, qualitative, and analytical techniques of management that would be most useful for their career goals.

2. To prepare graduates to be faculty members in the numerous international colleges and universities.

Admission Requirements

Students with a Master of Science (M.S.) degree in a related field may apply to the Textile Technology Management program. Typically the minimum acceptable overall grade point average (GPA) is a 3.0 out of 4.0, based on most current U.S. universities. Students without a master's degree may also apply if met the following conditions:

1. the undergraduate degree from a well-known and robust research active program with a cumulative GPA of 3.5 or above;
2. strong recommendation letters from faculty adviser(s) indicating research experience or suggesting research potential; and
3. strong publication record/experience or extensive industry experience in related industry/profession.

Applicants should plan to take the GRE or GMAT examination, which is required for all applicants. The GRE/GMAT scores should be sent to NC State University electronically and be available online.

For International students, TOEFL or IELTS is required for the application. Students must rank in a competitive percentile in order to be considered for acceptance into NC State University and our department.

- TOEFL: A total score of 80+ on IBT. Minimum scores of 18 points for each section: or
- IELTS: An overall band score of 6.5+. Minimum scores of 6.5 points for each section

Scholarships and Assistantships

Competitive scholarships and assistantships from the program as well we as the University are available to incoming new students. All incoming students will be considered for the funding opportunities. No separate application for assistantships/scholarships is needed.

Textile Technology Management (PhD)

Degree Requirements

Code	Title	Hours	Counts towards
Qualifying Courses		**12**	
TTM 710	Textile Technology Management		
TTM 785	Doctoral Research Methods		
TTM 750	Advances in Fabric Formation, Structure, and Properties		
TTM 731	Decision Models and Applications in Textile and Apparel Management		
Seminar Courses		**2**	
TTM 801	Seminar [1]		
Additional Courses [2]		**6**	
	"Additional Courses" are approved in conjunction with the academic committee		
Elective Courses		**52**	

"Elective Courses" that will be applied to reach 72 credit hours will be determined in conjunction with the academic committee	
Total Hours	**72**

1 All students must complete two (2) semesters of TTM 801 Seminar (which may be waived for students who have taken TC 601 Seminar, TE 601 Seminar, or TT 601 Seminar during their master's program at NC State).

2 Additionally, all students need to take a minimum of two (2) additional courses, which should be selected with input from the advisory committee and can be part of an "official minor", which will require approval from the Minor Director of Graduate Programs, or can be courses chosen to provide a better foundation for the research work.

Additional Requirements

- A minimum of 72 credit hours is required of students entering the program with a B.S. degree, or a minimum of 54 credit hours beyond the M.S. degree is required. (Students, who enter the Ph.D. program directly upon completion of an M.S. at NC State, may be allowed credit for up to 30 hours of their M.S. and thus would require 42 additional credit hours to complete the Ph.D.) Most of these credit hours are expected to be research credits (TTM 893 Doctoral Supervised Research or TTM 895 Doctoral Dissertation Research).
- Following successful course completion, the student needs to pass the defense of a research proposal to obtain the candidacy for the Ph.D degree.
- The final examination is an oral exam where the student presents and defends her/his research procedures, results and conclusions. The presentation will be made to an examining committee consisting of the student's advisory committee and is open to interested faculty, staff and students. After the presentation the student will be orally examined by the examining committee. The final oral examination can be scheduled once all coursework requirements have been fulfilled and the committee is satisfied that the dissertation is complete, but not earlier than one semester after admission to candidacy.
- The anticipated time for completion of the Ph.D. program is four years for a student entering from a B.S. degree and three years for entry from an M.S. degree. The minimum time required (in exceptional cases) is two years beyond entry if the student obtained an M.S. degree from NC State.

Textiles

NC State's College of Textiles, and the Department of Textile and Apparel, Technology and Management (TATM), prepares future leaders for the textile, apparel, home/furniture, fashion and retail industries. Based in Raleigh, North Carolina, undergraduate and graduate programs (Fashion and Textile Management; Fashion and Textile Design) incorporate global marketplace dynamics with a strategic management focus. Our graduates incorporate "art/design" + "science/technology" + "management" concepts in creative problem-solving. Our program is equipped with access to and experiences utilizing the latest industry technologies. The majority of the students have an enriching and intensive study abroad experience. Our program faculty works closely with industry partners, including the Department's 24-member Industry Advisory Board, to develop academic and experiential "real world" learning experiences. Student internships combined with a global alumni network provide an additional "value-added" experience, with our students prepared to make an immediate impact in diverse companies throughout the global supply chain. Career paths of our graduates are in the areas of: brand marketing, merchandising, retail, sourcing, private brand development, market analyst, design, product development, supply chain, and public relations and communications.

Degrees are distributed as "Master of Textiles" and "Master of Science" without pathway specifications.

Master of Science in Textiles Degree

The objective of the Master of Science (MS) in Textiles is to prepare students for careers that require independent research skills, including designing, planning, and carrying out research projects. Students can choose to focus their studies in one of the following areas of specializations: Textile and Fashion Design, Retail and Brand Management, Textile Technology, and Textile Management. The MS degree requires a minimum of 36 hours of study including a thesis and typically takes 2 years to complete. Students interested in continuing with a Ph.D. in Textile Technology and Management (TTM) or Fiber and Polymer Science (FPS) are encouraged to pursue the MS degree.

Master of Textiles Degree

The Non-Thesis Master of Textiles (MT) program offers preparation and career advancement for students with interests in the design, management, and technological perspectives of the textile industry. The program is available on campus and online via Distance Education (DE) with flexibility to accommodate a breadth of student needs. The MT degree requires a minimum of 30 credit hours and can be completed in only two semesters (1 year) of full-time on campus study or up to a maximum of six (6) years for part time on-campus or DE students.

Accelerated Bachelor's and Master's Degrees

The Accelerated Bachelor's and Master's (ABM) degrees in the Department of Textile and Apparel, Technology and Management (TATM) are designed to provide exceptional undergraduate students in the Fashion and Textile Management (FTM) and Fashion and Textile Design (FTD) programs with the opportunity to complete a BS degree (in FTM or FTD) and a TATM Master's degree in 5 to 5 1/2 years. Students in the ABM program can choose to pursue a non-thesis track in which they can potentially complete a Master of Textiles (MT) degree within 12 months after obtaining a Bachelor's (BS) degree in FTM or FTD. Alternatively, students can choose the thesis track in which they can potentially complete a Master of Science in Textiles (MS) degree within the18 months following obtaining a BS degree in FTM or FTD.

Admission Requirements

Students with a Bachelor of Science or a Bachelor of Arts degree may apply to either of the degree programs. Students apply with degrees in textiles, engineering, management, or design. The minimum acceptable overall Grade Point Average (GPA) is a 3.0 out of 4.0, based on most current U.S. universities. Students should have 20 credit hours in mathematics and natural sciences in their undergraduate degree. Degrees must be obtained from a four-year, accredited university. Graduate transfer credits can only be from other U.S. universities, and must be approved by the student's graduate committee. Certificates and diplomas are not recognized as undergraduate degrees.

Student Financial Support

Competitive financial aid in the form of assistantships may be available for full-time Master of Science students.

Other Relevant Information

The Department of Textile and Apparel, Technology and Management houses a Digital Design lab which specializes in 3D Body Scanning, Direct Digital Printing, Whole Body Knitted Garments, and Computer Aided Apparel and Fabric Design. Additionally, the department includes the Fashion Studio, The Textile Management Sciences Lab, Textile Design Studio, Braiding Lab, Three-Dimensional Weaving Lab, and an Advanced Testing Lab that will allow students to experience hands-on advanced textile technology and management.

Degrees

- Textiles (MR) (p. 864)
- Textiles (MS) (p. 866)
- Textile and Apparel Management (Minor) (p. 868)
- Consumer Textile Product Design and Development (Certificate) (p. 869)
- Textile Brand Management and Marketing (Certificate) (p. 869)

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Consumer Textile Product Design and Development (Certificate)

The Graduate Certificate in Consumer Textile Product Design and Development (GCCTPDD), offered by the Department of Textile and Apparel, Technology and Management, will provide NC State graduate students the opportunity to develop recognized academic credentials in Consumer Textile Product Design and Development in addition to their major area of graduate study. Also it will offer non-degree graduate-level students the opportunity to develop recognized advanced expertise in Consumer Textile Product Design and Development.

Applications

New applicants to the university must submit a Program Application, a resume identifying educational preparation and work experiences, and official transcripts of all undergraduate and graduate course work. You must apply online through the Graduate School application portal. Prior to completing the first course after being accepted into the program, students prepare and submit two copies of a contract using the Certificate Contract Application. The contract includes a statement of career goals, a rationale for completing the certificate program, and a timeline for certificate completion. Students can always elect to review their application with the Certificate Coordinator prior to contract preparation.

Academic Requirements

Applicants must meet one of the three following requirements:

- Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
- Be a degree student in good standing in an NC State University graduate program;
- Have a Master's degree.

Plan Requirements

Code	Title	Hours	Counts towards
TTM 580	**Consumer Perspectives in Fashion**	**3**	
TTM 585	**Market Research In Textiles**	**3**	
Select three of the following:		**9**	
TTM 515	Graduate Apparel Product Design		
TTM 517	Advanced Computer-Aided-Design for Fashion		
TT 570	Textile Digital Design and Technology		
TT 571	Professional Practices in Textile Design and Technology		
TTM 510	Apparel Technology Management		
TTM 632	Special Studies in Textile Product Development		
Total Hours		**15**	

Textile Brand Management and Marketing (Certificate)

The Graduate Certificate Program in Textile Brand Management and Marketing provides graduate students with the opportunity to develop academic credentials in branding fundamentals and theories for a globalized industry and market research while complementing this knowledge with topics of strategic management, product development, supply chain management and technology management. The program also provides non-degree graduate-level students with the opportunity to

develop recognized advanced expertise in Textile Brand Management and Marketing.

Admission

Applications must meet one of the following three requirements:

- Be a graduate of an accredited four-year college or university and have a grade point average of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
- Be a degree student in good standing in an NC State University graduate program; or
- Have a Master's degree.

Applicants who do not meet the GPA requirements may be admitted professionally based on past work experience as a professional in textiles or a textile related field. Supporting documentation of professional experience in textile should be submitted for provisional admission. Students who are admitted provisionally must earn at least a "B" average in the first three courses of the certificate program in order to obtain full admission into the certificate program.

Requirements

A minimum of 15 credit hours is required to complete the certificate program and student must have a minimum 3.0 grade point average on all certificate course work. Transfer credit from other universities is not allowed. All work must be completed in four (4) calendar years, beginning from the time the student begins course work for the Certificate

Nonwoven Science and Technology (Certificate)

The Nonwovens Institute offers a University Graduate Certificate in Nonwovens Science and Engineering through the Wilson College of Textiles. The program is available to students currently enrolled in a graduate degree program at NC State as well as non-degree seeking graduate level students. Any student seeking a certificate in Nonwovens Science and Engineering must be a graduate of an accredited four-year college or university. The goal of this certificate is to provide recognized academic credentials in Nonwoven Science and Engineering.

Eligibility

Applicants must apply through the Graduate School for the Graduate Certificate in Nonwoven Science and Engineering. Applicants submit a resume identifying educational preparation and work experiences and official transcripts of all undergraduate and graduate coursework.

Applicants must meet one of the three following requirements:

1. Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study
2. Be a degree student in good standing in an NC State University graduate program
3. Have a master's degree

The certificate must be completed within four (4) calendar years from the date the student starts the first course. Awarding of the certificate requires a minimum GPA of 3.0 or better in all of the required courses.

- Water Resources (Minor) (p. 922)
- Women's, Gender, and Sexuality Studies (Minor) (p. 923)

Bioinformatics

NC State offers two closely linked interdepartmental graduate programs in Genomic Sciences. All students pursuing degrees in either Bioinformatics and Functional Genomics will take a shared core set of courses that promote breadth of knowledge and encourage interdisciplinary collaboration.

Functional Genomics students focus on laboratory research requiring the collection and interpretation of massive data sets that enhance our knowledge of organismal biology, gene expression, protein and nucleic acid structure and function, and genetic and environmental interactions. Bioinformatics students develop skills to manage and analyze these large and complex “omics” data sets. These two groups of students will be prepared to work seamlessly as parts of teams addressing fundamentally important problems in areas including the biomedical sciences, plant and animal breeding, evolutionary biology, ecology, and toxicology.

Unique and exceptional resources include the Bioinformatics Research Center and the Genome Research Laboratory.

Admission Requirements

Students applying to either the Master’s or PhD program in Bioinformatics are evaluated on their background in three key areas: mathematics and statistics; genetics and biological sciences; and computer science. Students should have completed at least two semesters of calculus, and additional courses in mathematics and statistics are preferred. Evidence of basic computer programming skills is required. A course in genetics is strongly encouraged. Previous research experience is a significant advantage.

Master's Degree Requirements

Students take a 15-credit core curriculum shared by all students in the Bioinformatics and Functional Genomics degree programs, followed by additional bioinformatics and elective courses. The Master's of Bioinformatics requires a minimum of 33 credit hours. No thesis is required.

Doctoral Degree Requirements

Students take a 15-credit core curriculum shared by all students in the Bioinformatics and Functional Genomics degree programs, followed by additional bioinformatics and elective courses. The Ph.D. in Bioinformatics requires a total of 72 credits, and all students participate in a journal club, monthly seminar series and research ethics training. All PhD students assemble advisory committees including faculty from both Bioinformatics and Functional Genomics to promote effective interdisciplinary research and collaboration, and many students have co-advisors representing different fields.

Student Financial Support

Fellowships are available through the program, and students may also be supported by research and training grants awarded to our faculty members.

Financial Mathematics

The Departments of Mathematics, Agricultural and Resource Economics, Economics, Industrial and Systems Engineering, Statistics and Business management offer a program leading to the degree of Master of Financial Mathematics. Students choose core courses and electives to suit their individual needs and interests.

Admissions Requirements

Applicants for admission should have an undergraduate degree that would preferably include courses in advanced calculus, linear algebra, probability and statistics**.**

Master of Financial Mathematics Requirements

In addition to course requirements (six core courses and five electives), the Master of Financial Mathematics degree requires completion of a 1-credit internship or research project.

Student Financial Support

Some funding is available through a limited number of fellowships. Consideration for the support is automatic. There are no teaching assistantships or research assistantships for this Professional Science Masters.

Accelerated Bachelor's/Master's Degree Requirements

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the Bachelor's and Master's degrees at an accelerated pace. These undergraduate students may double count up to 12 credits and obtain a non-thesis Master's degree in the same field within 12 months of completing the Bachelor's degree, or obtain a thesis-based Master's degree in the same field within 18 months of completing the Bachelor's degree.

This degree program also provides an opportunity for the Directors of Graduate Programs (DGPs) at NC State to recruit rising juniors in their major to their graduate programs. However, permission to pursue an ABM degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Fisheries, Wildlife, and Conservation Biology

The degrees are offered through the Fisheries, Wildlife, and Conservation Biology program, an intercollegiate program administered by the Colleges of Natural Resources, Agriculture and Life Sciences, and Veterinary Medicine. Students are affiliated with the department of their major professor. The degrees emphasize habitat assessment, population biology, human dimensions, environmental policy, animal health, and sustainable management of fish and wildlife species.

Admissions Requirements

Application for admission is made directly to the Fisheries, Wildlife, and Conservation Biology program. Minimum requirements include an undergraduate grade point average of 3.0 in an appropriate biological discipline. Completion of the Graduate Record Examination (GRE) is optional, depending on the requirements of individual faculty. Admission is competitive and is contingent on the willingness of a member of the faculty to serve as the major professor. Exceptions to minimum requirements may be made for students with special backgrounds.

Master's Degree Requirements

The M.S. degree program requires a minimum of 30 credit hours, including 1-2 hours of seminar and no more than six hours of research. A research-based thesis is required, as is a minor (usually 9-10 hours). The Master of Fisheries, Wildlife, and Conservation Biology degree requires a minimum of 36 credits (including 4-6 hours of special problems and 1-2 hours of seminars), a professional paper, a committee and final exam. For either degree, further requirements may be imposed by the advisory committee and/or department.

Doctoral Degree Requirements

The Ph.D. program requires 36 to 54 credits of course work beyond the Master's degree, including two seminars and an ethics course, and a dissertation. Exceptionally well-prepared students may petition to have their degree objective changed to Ph.D. before completing the Master's degree.

Student Financial Support

Graduate research and teaching assistantships are offered for qualified students through participating departments. Commitments for assistantships are normally made at the time of admission to graduate study.

Other Relevant Information

Research near campus is facilitated by excellent field, laboratory and computer resources. Off-campus research is conducted at the Pamlico Aquaculture Field Laboratory, research and extension centers in eastern and western NC, The Center for Marine Sciences and Technology in Morehead City, Bull Neck Swamp, Hill Forest, and at facilities of state and federal agencies and private organizations.

Functional Genomics

NC State offers two closely linked interdepartmental graduate programs in Genomic Sciences. All students pursuing degrees in either Bioinformatics and Functional Genomics will take a shared core set of courses that promote breadth of knowledge and encourage interdisciplinary collaboration.

Functional Genomics students focus on laboratory research requiring the collection and interpretation of massive data sets that enhance our knowledge of organismal biology, gene expression, protein and nucleic

acid structure and function, and genetic and environmental interactions. Bioinformatics students develop skills to manage and analyze these large and complex “omics” data sets. These two groups of students will be prepared to work seamlessly as parts of teams addressing fundamentally important problems in areas including the biomedical sciences, plant and animal breeding, evolutionary biology, ecology, and toxicology.

Unique and exceptional resources include the Bioinformatics Research Center and the Genome Research Laboratory.

Admission Requirements

Students applying to either the Master’s or PhD program in Functional Genomics should have an undergraduate major in the biological or physical sciences, including courses in genetics, biochemistry, and calculus. Previous research experience is a significant advantage.

Master's Degree Requirements

Students take a 15-credit core curriculum shared by all students in the Bioinformatics and Functional Genomics degree programs, followed by additional genomics and elective courses. The non-thesis Master of Functional Genomics requires a minimum of 30 credit hours, while the Master of Science in Functional Genomics requires 36 credit hours and a thesis.

Doctoral Degree Requirements

Students take a 15-credit core curriculum shared by all students in the Bioinformatics and Functional Genomics degree programs, followed by additional genomics and elective courses. The Ph.D. in Functional Genomics requires a total of 72 credits, and all students participate in a journal club, monthly seminar series and research ethics training. All PhD students assemble advisory committees including faculty from both Bioinformatics and Functional Genomics to promote effective interdisciplinary research and collaboration, and many students have co-advisors representing different fields.

Student Financial Support

Fellowships are available through the program, and students may also be supported by research and training grants awarded to our faculty members.

Degrees

- Functional Genomics (MR) (p. 888)
- Functional Genomics (MS) (p. 890)
- Functional Genomics (PhD) (p. 892)
- Functional Genomics (Minor) (p. 894)

Functional Genomics (MR)

Degree Requirements

Code	Title	Hours	Counts towards
Genomic Sciences Core Courses		**12**	
ST 590	Special Topics (Intro Bioinformatics)		

GN 735	Functional Genomics	
GN 701	Molecular Genetics	
or BCH 703	Macromolecular Synthesis and Regulation	
PP 810/610	Special Topics (Genomics Journal Club)	
GN 850	Professionalism and Ethics	
Functional Genomics Core Courses		**18**
ST 511	Statistical Methods For Researchers I	
GN 702	Cellular and Developmental Genetics	
or BCH 705	Molecular Biology Of the Cell	
GN 703	Population and Quantitative Genetics	
or BCH 701	Macromolecular Structure	
Students will select an additional nine credit hours of Functional Genomics Category I Electives in conjunction with the academic committee [1]		
Total Hours		**30**

[1] Functional Genomic Category I Electives cannot be chosen from ST 590, CSC 530, ST 512, ST 501, or ST 502. However, these courses can be taken as additional electives beyond the minimum 30 credit requirement.
