UNIVERSITY ADMINISTRATION

- Ana Mari Cauce, President
 - Mark Richards, Provost and Executive Vice President for Academic Affairs
 - Paul G. Ramsey, Executive Vice President for Medical Affairs
 - Lisa Brandenburg, Vice President for Medical Affairs
 - Jacqueline Cabe, Vice President for Medical Affairs
 - Timothy H. Dellit, Vice President for Medical Affairs
 - Ruth Mahan, Vice President for Medical Affairs
 - Don Theophilus, Vice President for Medical Affairs
 - Paul Rucker, Vice President of Alumni and Stakeholder Engagement
 - Mary Gresch, Interim Senior Vice President of Advancement
 - Dan Peterson, Vice President of Development
 - Randy Hodgins, Vice President of External Affairs
 - Lou Cariello, Vice President of Facilities
 - Brian McCartan, Vice President of Finance
 - Mindy Kornberg, Vice President of Human Resources
 - Aaron Powell, Vice President of Information Technology
 - Rickey Hall, Vice President of Minority Affairs and Diversity
 - Denzil Suite, Vice President of Student Affairs
 - Philip J. Reid, Vice Provost of Academic and Student Affairs
 - Cheryl A. Cameron, Vice Provost of Academic Personnel
 - Rovy Branon, Vice Provost of Continuum College
 - Lizabeth "Betsy" A. Wilson, Vice Provost of Digital Initiatives
 - Jeffrey Riedinger, Vice Provost of Global Affairs
 - François Baneyx, Vice Provost of Innovation
 - Sarah Norris Hall, Vice Provost of Planning and Budgeting
 - Mary E. Lidstrom, Vice Provost of Research
 - Ed Taylor, Vice Provost and Dean of Undergraduate Academic Affairs
 - Helen Garret, University Registrar
-

BOARD OF REGENTS

- William S. Ayer
- Joel Benoliel
- Joanne R. Harrell
- Jeremy Jaech
- Libby G. MacPhee
- Kristina Pogolian
- Constance W. Rice
- Rogelio Riojas
- Blaine Tamaki
- David Zeeck

ABOUT THE UNIVERSITY OF WASHINGTON

Founded in 1861, the University of Washington is one of the oldest state-assisted institutions of higher education on the Pacific coast. From its original site on a 10-acre tract of wooded wilderness that is now located in downtown Seattle, the campus has grown to comprise 703 acres of trees, landscape, and buildings. Located between the shores of Lake Washington and Lake Union, it is in a residential section of the city that long has been considered one of the most attractive in the nation. Two additional campuses, one south of Seattle in Tacoma, and one north in Bothell, were opened in 1990. Enrollment at the University in autumn quarter 2019 was more than 59,000, across all three campuses, of which 42,500 were undergraduates and the balance were in professional and graduate programs. Nearly 75% of the undergraduates enter as freshmen from Washington high schools or as transfer students from Washington community colleges or other colleges and universities in the state. In 2019, the teaching faculty of the University numbered more than 5,000 members.

ROLE AND MISSION OF THE UNIVERSITY

Founded 4 November 1861, the University of Washington is one of the oldest state-supported institutions of higher education on the Pacific coast. The University is comprised of three campuses: the Seattle campus is made up of seventeen schools and colleges whose faculty offer educational opportunities to students ranging from first-year undergraduates through doctoral-level candidates; the Bothell and Tacoma campuses, each developing a distinctive identity and undergoing rapid growth, offer diverse programs to upper-division undergraduates and to graduate students.

The primary mission of the University of Washington is the preservation, advancement, and dissemination of knowledge. The University preserves knowledge through its libraries and collections, its courses, and the scholarship of its faculty. It advances new knowledge through many forms of research, inquiry and discussion; and disseminates it through the classroom and the laboratory, scholarly exchanges, creative practice, international education, and public service. As one of the nation's outstanding teaching and research institutions, the University is committed to maintaining an environment for objectivity and imaginative inquiry and for the original scholarship and research that ensure the production of new knowledge in the free exchange of facts, theories, and ideas.

To promote their capacity to make humane and informed decisions, the University fosters an environment in which its students can develop mature and independent judgment and an appreciation of the range and diversity of human achievement. The University cultivates in its students both critical thinking and the effective articulation of that thinking.

As an integral part of a large and diverse community, the University seeks broad representation of and encourages sustained participation in that community by its students, its faculty, and its staff. It serves both non-traditional and traditional students. Through its three-campus system and through educational outreach, evening degree, and distance learning, it extends educational opportunities to many who would not otherwise have access to them.

The academic core of the University of Washington is its College of Arts and Sciences; the teaching and research of the University's many professional schools provide essential complements to these programs in the arts, humanities, social sciences, and natural and mathematical sciences. Programs in law, medicine, forest resources, oceanography and fisheries, library science, and aeronautics are offered exclusively (in accord with state law) by the University of Washington. In addition, the University of Washington has assumed primary responsibility for the health science fields of dentistry and public health, and offers education and training in medicine for a multi-state region of the Pacific Northwest and Alaska. The schools and colleges of architecture and urban planning, business administration, education, engineering, nursing, pharmacy, public affairs, and social work have a long tradition of educating students for service to the region and the nation. These schools and colleges make indispensable contributions to the state and, with the rest of the University, share a long tradition of educating undergraduate and graduate students toward achieving an excellence that well serves the state, the region, and the nation.

BR, February 1981; revised February 1998; December 2001

NON-DISCRIMINATION POLICY

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran. This policy applies to all programs and facilities including, but not limited to, admissions, educational programs, employment, and patient and hospital services. Any discriminatory action can be a cause for disciplinary action. Discrimination is prohibited by Presidential Executive Order 11246 as amended; Washington State Gubernatorial Executive Orders 89-01 and 93-07; Titles VI and VII of the Civil Rights Act of 1964; Washington State Law Against Discrimination RCW 49.60; Title IX of the Education Amendments of 1972; State of Washington Gender Equity in Higher Education Act of 1989; Sections 503 and 504 of the Rehabilitation Act of 1973; Americans with Disabilities Act of 1990; Age Discrimination in Employment Act of 1967 as amended; Age Discrimination Act of 1975; Vietnam Era Veterans' Readjustment Act of 1972 as amended; other federal and state statutes, regulations; and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is provided by the Equal Opportunity Office, Box 354560, 4045 Brooklyn Avenue Northeast, Seattle, WA 98195, 206-543-1830, eoaa@uw.edu.

Additional information concerning the equal opportunity and affirmative action policies and procedures, including complaint procedures, is in the UW Handbook, Vol. IV, part 1, chapter 2.

Information on reasonable accommodation for students with disabilities is available from the following offices: for classroom and academic-related accommodation, contact Disabled Resources for Students, 206-543-8924/V, 206-543-8925/TTY, uwdss@uw.edu; for other non-academic related information and accommodation, contact the Disability Services Office, 206-543-6450/V, 206-543-6452/TTY, dso@uw.edu.

ACCREDITATION

The University of Washington is accredited by the Northwest Association of Schools and Colleges and is a member of the Association of American Universities. Individual schools and colleges are members of the various accrediting association in their respective fields. Currently enrolled or prospective students should contact the Office of the University Registrar to review accreditation documents for the University and the respective departments to review programmatic accreditation documents.

The University of Washington General Catalog is produced by the Office of the University Registrar at the University of Washington:
genecat@u.washington.edu.

KEY TO SYMBOLS AND ABBREVIATIONS

COURSE DESCRIPTIONS

Each course listing includes prefix, course number, title and credits. Each listing also may include general education designator(s), names of instructor(s), description of the course, prerequisite(s), and quarter(s) offered.

Specific information on courses offered in a particular quarter appears in the [quarterly Time Schedule](#).

COURSE NUMBERS

- **100–299** Lower-division courses primarily for freshmen and sophomores.
- **300–499** Upper-division courses primarily for juniors, seniors, and postbaccalaureate (fifth-year) students. Graduate students may enroll in 300- and 400-level courses. When acceptable to the major department and the Graduate School, approved 400-level courses may be applied as graduate credit in the major field and approved 300-level courses may be applied in the supporting field(s).
- **500+** Restricted to graduate students. (Courses numbered in the 500 and 600 series with a P before the course title denote professional courses for students in the schools of Dentistry and Medicine, and such courses may not be applied as graduate credit in the Graduate School.) Undergraduate, postbaccalaureate, and nonmatriculated students who wish to register for 500-level courses must obtain permission from the instructor of the class, departmental Chair, or other designated person.

Graduate School-Restricted Courses

Graduate courses numbered 600, 601, 700, 750, or 800 are restricted to students in the Graduate School. They appear by number and title only where applicable under the departmental course listings in this catalog. Descriptions for these courses are listed below.

- **(PREFIX) 600 Independent Study or Research (*)** Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee or graduate program advisor.
- **(PREFIX) 600 Internship (3–9, max. 9)** Internship required of students in a graduate degree program. Prerequisite: permission of Supervisory Committee chair or graduate program advisor.
- **(PREFIX) 700 Master's Theses (*)** Research for the master's thesis, including research preparatory or related thereto. Limited to premaster graduate students (i.e., those who have not yet completed the master's degree in their major field at the University of Washington). Prerequisite: permission of Supervisory Committee or graduate program advisor.
- **(PREFIX) 750 Internship (*)** Internship required of all graduate students in the Doctor of Arts degree program.
- **(PREFIX) 800 Doctoral Dissertation (*)** Research for the doctoral dissertation and research preparatory or related thereto. Limited to graduate students who have completed the master's degree or the equivalent, or Candidate-level graduate students. Premaster students initiating doctoral dissertation research should register for 600. Prerequisite: permission of Supervisory Committee or graduate program advisor.

CREDIT DESIGNATION

- **ART 100 (5)** 5 credits are received for the quarter.
- **ART 100 (5-)** Course may take longer than one quarter to complete or is the first course in a hyphenated sequence. Credit is earned, but may not be applied toward graduation until the entire sequence is completed. If not part of a hyphenated sequence, repeated registration may be necessary. An N grade is received until the final grade is submitted.
- **ART 100 (2, max. 8)** 2 credits per quarter; course may be repeated up to four times to earn a maximum of 8 credits.
- **ART 100 (1–5)** Up to 5 credits may be taken in a given quarter. Specific number is determined in consultation with instructor of adviser. When a maximum is not stated, course is not repeatable.
- **ART 100 (1–5, max. 15)** Up to 5 credits may be taken in a given quarter. Course may be repeated to a maximum of 15 credits.
- **ART 100 (*, max. 10)** Credit to be arranged per quarter; course may be repeated to a maximum of 10 credits.
- **ART 100 (3/5)** 3 or 5 credits are earned in a given quarter. Specific amount is determined by school or college offering the course. The Time Schedule may indicate 3 credits, 5 credits, or 3 or 5 credits. Credits may vary by section.
- **ART 100 (3/5, max. 15)** 3 or 5 credits are earned in a given quarter. Course may be repeated to earn a maximum of 15 credits.
- **ART 700 (*)** Credit is to be arranged with school or college offering the course. No maximum stated. Only 600-, 700-, and 800-level courses do not require a maximum.

UNDERGRADUATE GENERAL EDUCATION REQUIREMENT DESIGNATORS

- **VLPA** Visual, Literary, and Performing Arts (Areas of Knowledge requirement)
- **I&S** Individuals & Societies (Areas of Knowledge requirement)
- **NW** The Natural World (Areas of Knowledge requirement)
- **QSR** Quantitative, Symbolic, or Formal Reasoning
- **DIV** Diversity
- **C** English Composition

Courses marked C may be used for the English Composition requirement or the additional-writing (W-course) requirement, but not both; none may count for the Area of Knowledge requirements. Courses marked QSR may be used for both the QSR requirement and an Area of Knowledge requirement, if one is listed. Courses marked with more than one Areas of Knowledge designator (VLPA, I&S, and/or NW) may be used for any one of the areas indicated, but not for more than one.

BACKGROUND REQUIRED

Prerequisites Courses to be completed or conditions to be met before a student is eligible to enroll in a specific course.

QUARTERS OFFERED

A, W, Sp, S indicates the quarter(s) the course is offered.

Example

ART 100 AWSp ART 100 offered Autumn, Winter, and Spring Quarters.

UNIVERSITY OF WASHINGTON 2020–2022 GENERAL CATALOG

ACADEMIC CALENDAR

2020-2021

Autumn Quarter 2020

Classes begin	September 30
Last day of instruction	December 11
Final examinations	December 12-18

Winter Quarter 2021

Classes begin	January 4
Last day of instruction	March 12
Final examinations	March 13-19

Spring Quarter 2021

Classes begin	March 29
Last day of instruction	June 4
Final examinations	June 5-11
Commencement	June 11-13

Summer Quarter 2021

Full-term and term a classes begin	June 21
Term a classes end	July 21
Term b classes begin	July 22
Full-term and term b classes end	August 20

2021-2022

Autumn Quarter 2021

Classes begin	September 29
Last day of instruction	December 10
Final examinations	December 11-17

Winter Quarter 2022

Classes begin	January 3
Last day of instruction	March 11
Final examinations	March 12-18

Spring Quarter 2022

Classes begin	March 28
Last day of instruction	June 3
Final examinations	June 4-10
Commencement	June 10-12

Summer Quarter 2022

Full-term and term a classes begin	June 20
Term a classes end	July 20
Term b classes begin	July 21
Full-term and term b classes end	August 19

Dates in this calendar are subject to change without notice. A detailed calendar with the latest information on registration can be found online at www.washington.edu/students/.

For directory assistance, call the University switchboard, (206) 543-2100.

Address correspondence to:

University of Washington
(Name of office and box number)
Seattle, Washington 98195

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student's dean or with the Vice President for Student Affairs in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

UNDERGRADUATE ADMISSION

admit.washington.edu

FRESHMAN APPLICANTS

Definition of Freshman Status

Apply as a freshman if *any* of the following statements describe you.

- You plan to enter the UW right after graduating from high school.
- You are in Washington State's Running Start Program and you plan to enter the UW right after graduating (regardless of how many college credits you have earned or will earn).
- You have never attended college since leaving high school (regardless of your age or whether you ever graduated).

Admission Policy

Selecting the Freshman Class

The University of Washington seeks students who can benefit from its wealth of academic and cultural opportunities and contribute to its amazing energy and rich diversity of experience. Choosing students from a very able group of applicants requires a selection process that looks beyond grades and standardized tests. While these factors are important, they tell only part of an applicant's story. The University uses an individualized application review more typically found at smaller, private universities and colleges. In addition to grade-point average (GPA) and test scores, the University takes into account many aspects of an applicant's achievements and personal history.

Academic Preparation and Performance

While the UW looks at many factors in reviewing applications for admission, academic preparation and performance are still primary. Indicators of preparation and performance include:

- An overall strong level of academic achievement as demonstrated by GPA, rigor of curriculum, standardized test scores, and academic distinctions
- Taking advantage of college-preparatory courses during high school, such as Advanced Placement (AP), International Baccalaureate (IB), Running Start, or college in the high school; or core subjects beyond the minimum required for college entrance
- Taking full academic advantage of the senior year
- Demonstrating a positive grade trend
- Demonstrating habits associated with independent intellectual growth such as self-guided reading, engagement with other cultures, or research activities
- Demonstrating exceptional artistic talent and achievement

Personal Achievements and Characteristics

In addition to academic preparation and performance, personal achievements and characteristics can also indicate promise to benefit from and contribute to the University of Washington. These include:

- Demonstrating a commitment to community service and leadership
- Exercising significant responsibility in a family, community, employment, or through activities
- Attaining a college-preparatory education in the face of significant personal adversity, economic disadvantage, or disability
- Demonstrating cultural awareness or unique perspectives or experiences
- Demonstrating notable tenacity, insight, originality, or creativity

The entire application, including the Writing Section and Activities Log, is important in the individualized application review. Because the University receives about 23,000 freshman applications every year, this process takes time to complete. The University takes great care in assessing applications and does not rush the selection of future students. While this process

requires patience on the part of many applicants, the benefit is that each applicant is reviewed as an individual. Applications for 2011 may be submitted between October 1 and December 15, 2010. An admission decision will be mailed to all freshman applicants between March 15 and 31, 2011.

College Academic Distribution Requirements (CADR)

To be eligible for full admission consideration, applicants must present the following:

- Completion of a college-preparatory course of study to include the following high school credits*:
 - a. 4 high school credits of English
 - b. 2 high school credits of a single world language
 - c. 3 high school credits of mathematics: algebra, geometry, and preferably trigonometry (a fourth high school credit of mathematical analysis or calculus is recommended for students preparing for majors in the sciences or engineering)
 - d. 3 high school credits of social science
 - e. 2 high school credits of science including one laboratory science course in biology chemistry or physics
 - f. 1 senior-year math-based quantitative course
 - g. 0.5 high school credits of the fine, visual, or performing arts
 - h. 0.5 high school credits of electives taken from the above areas

* One high school credit represents a standard full year of high school coursework

Because these are admission requirements, all CADR must be satisfactorily completed before the first quarter of enrollment at the UW. Almost all applicants will have satisfied these requirements through high school coursework, which is generally defined as that completed in grades 9–12. There are, however, several ways to satisfy CADR at the college level. In general, five quarter credits (or three semester credits) at the college level equals one credit of high-school study. If you completed a portion of these requirements in high school, you can supplement high school courses with college course work. For example:

High School:	3 credits of English
Community college:	5-credit English composition or literature course is equivalent to one high-school year
Total:	4 credit high school requirement satisfied

Grading Restrictions

In general, you must attain at minimum a passing grade (including 'D') to satisfy a CADR. Also acceptable is a grade of 'Pass' in a course taken on a 'Pass/Not Pass' basis. However, if you are completing CADR through college course work you are strongly encouraged to choose a letter or numerical grade, because you may later want to apply CADR courses towards requirements for your major or University or college graduation requirements, for which grading restrictions pertain. Applicants using a college course to satisfy the mathematics CADR: specific restrictions on grading apply. See the Mathematics section.

English Composition/Literature

1. IF TAKEN IN HIGH SCHOOL

Four high school credits of study are required, at least three of which must be in college-preparatory composition or literature.

- One of the four credits may be satisfied by courses in drama as literature, public speaking, debate, journalistic writing, business English, or English as a Second Language (ESL).
 - Courses that are generally not acceptable include those identified as remedial or applied (e.g., acting, basic English skills, developmental reading, library, newspaper staff, remedial English, review English, vocabulary, yearbook/annual).
2. IF SATISFIED BY COLLEGE COURSE WORK
- College course work must be at the 100 level or higher. For the composition/literature component, generally any course with an English or Writing prefix is acceptable.
- One of the four credits may be satisfied by a college course in speech, drama as literature, journalistic writing, business English, ESL, or engineering/technical writing.
 - Courses such as developmental or speed reading, vocabulary, or remedial English are not acceptable.
 - English courses are considered equivalent to ESL unless taken in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.
3. APPLICANTS WHOSE FIRST LANGUAGE IS NOT ENGLISH
- Although the four-credit English high school course requirement cannot be waived, there are some alternatives for meeting the English subject requirement for U.S. citizens, permanent residents or refugees
- whose first language is not English or,
 - who attended school in a non-English speaking country. English-speaking countries are defined as Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

ALTERNATIVE ONE (Applicants with Test Scores)

To fulfill the English core subject requirement under this alternative, both A and B must be satisfied.

A: Test Score Requirement

Submit one of the following official test scores by the application closing date:

- SAT Critical Reading 430
- ACT English 17
- Other tests (e.g., Test of English as a Foreign Language [TOEFL] or IELTS) cannot be used to meet this requirement.

B: Coursework Requirement

A total of four years of study are required.

- Composition or literature courses in the student's first language may satisfy up to three years of the requirement.
- English composition or literature courses taken in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S. may satisfy up to four years of the requirement.
- These courses may satisfy no more than one year of the requirement:
 - English, if taken outside of Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.
 - ESL taken in the U.S.
 - Courses in drama as literature, public speaking, debate, journalistic writing, or business English that were completed in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

ALTERNATIVE TWO (Applicants with 60 or more college quarter credits)

All three of the following conditions (A, B, and C) must be satisfied:

- A. A minimum of 60 transferable quarter credits from a regionally accredited college or university in the U.S. or from an accredited college or university in Australia, Canada, Ireland, New Zealand, or the United Kingdom must be completed at the time of application. Transcripts showing 60 completed credits must be submitted by the application closing date.
- B. A minimum of two college-level English composition courses, for a minimum of six credits, taken at a regionally accredited college or university in the U.S., or from an accredited college or university in Australia, Canada, Ireland, New Zealand, or the United Kingdom. All

college-level English composition and literature courses must be completed with a minimum cumulative grade-point average (GPA) of 3.00 (B) and must be recorded on a transcript at the time of application.

- C. Additional English Course Work Requirements: The remaining two units of the requirement may be satisfied by any combination of course work from among the following options:
 1. Up to two units may be satisfied by high school English composition or literature courses from high schools where the primary language of instruction is English.
 2. Up to two units may be satisfied by composition or literature courses in the student's first language (when the first language is not English) for coursework completed in educational systems other than the U.S., Australia, Canada, Ireland, New Zealand, or the United Kingdom.
 3. Only one unit (year) of the requirement may be satisfied by one of the following:
 - English courses taken in countries where English is NOT recognized as the primary language of instruction.
 - ESL courses taken in the U.S.
 - Courses in drama as literature, public speaking, debate, journalistic writing, or business English that were completed in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.
 4. Up to two units may be satisfied by additional college-level English composition or English literature courses from a regionally accredited college or university in the U.S., or from an accredited college or university in Australia, Canada, Ireland, New Zealand, or the United Kingdom.

Mathematics

1. IF COMPLETED IN HIGH SCHOOL

Three high school credits are required, at least at the level of algebra, geometry, and second-year algebra.

- An algebra course completed in the last year of junior high school may partially satisfy the requirement if the second-year algebra is completed in secondary school.
- Arithmetic, pre-algebra, business math, and statistics will not count toward the requirement.

2. IF SATISFIED BY COLLEGE COURSE WORK

If your high school preparation in mathematics was insufficient, you must complete one of the courses listed below:

- A course in intermediate algebra — At UW Extension, as well as at many community colleges in Washington, MATH 098 is the necessary course. The course must be completed with a grade of 'C' (2.0) or better, even though it does not transfer to the UW as college credit and the grade earned in the course is not used in computing the transfer GPA.
- MATH 104 (Trigonometry) or its equivalent — The course must be completed with a grade of 'C' (2.0) or better.
- MATH 107 (Mathematics: A Practical Art) or its equivalent — The course must be completed with a grade of 'C' (2.0) or better.
- Mathematics courses with intermediate algebra as a prerequisite (except statistics courses) — This includes any higher-level math courses such as elementary functions, calculus, and beyond.

Social Science

1. IF COMPLETED IN HIGH SCHOOL

Three high school credits are required in history or in any of the social sciences, e.g., anthropology, contemporary world problems, economics, geography, government, political science, psychology, sociology. Credit for religion courses, consumer economics, student government, or community service will not count towards the requirement.

2. IF SATISFIED BY COLLEGE COURSE WORK

Courses in the social sciences-e.g., anthropology, economics, ethnic studies, history, philosophy, political science, psychology, sociology-will count toward the requirement.

World Languages

1. IF COMPLETED IN HIGH SCHOOL

Two high school credits are required. The two credits must be completed in the same language. Note: The world language requirement will be considered satisfied for applicants who complete their education through the 7th grade in school(s)

- where English was not the language of instruction and
- in countries other than Australia, Canada, Ireland, New Zealand, the United Kingdom, and the U.S.

International applicants who entered the U.S. education system prior to the 8th grade must satisfy the foreign language requirement. Any natural language that has been formally studied may be used to satisfy this requirement, including American Sign Language (ASL, the language of the deaf community), and languages no longer spoken, such as Latin and ancient Greek. However, neither computer 'languages' nor forms of deaf signing aside from ASL are acceptable. A world language course taken in the eighth grade may satisfy one credit of the requirement if the second-year course is completed in high school.

2. IF SATISFIED BY COLLEGE COURSE WORK

For purposes of admission, each 5-quarter-credit course of language in college is considered equivalent to one high school credit. Applicants who have never studied a world language will need to complete ten quarter credits of a single world language. However, an applicant who studied French for one credit in high school needs to complete only the second quarter (e.g., FREN 102) or the second semester of a first-year language sequence. Of course, you may prefer to begin with 101 to refresh your memory.

Lab Science

1. IF COMPLETED IN HIGH SCHOOL

A minimum of two credits of laboratory science are required. At least one of the two credits must be in biology, chemistry, or physics. Students typically take this full year course in two successive high school semesters. Additionally, at least one of the two years of laboratory science must be an algebra-based science course. The principles of technology courses taught in Washington State high schools may apply toward the laboratory science requirement. Additionally, courses identified by the school district as a laboratory science courses—e.g., astronomy, environmental science, geological science, genetics, marine science—may also apply toward the additional credit of laboratory science requirement.

2. IF SATISFIED BY COLLEGE COURSE WORK

College science courses with a lab will count toward the laboratory science portion of the requirement. Any course in astronomy, atmospheric science, biological structure, biology, botany, chemistry, environmental science (but not environmental studies), genetics, geology, oceanography, physical anthropology, physical geography, physics, or zoology will count toward the second-year requirement, as will introductory courses in biological or physical science.

Fine, Visual, or Performing Arts

1. IF COMPLETED IN HIGH SCHOOL

One-half credit is required in the fine, visual, or performing arts, to be chosen from art appreciation, band, ceramics, choir, dance, dramatic performance and production, drawing, fiber arts, graphic arts, metal design, music appreciation, music theory, orchestra, painting, photography, print making, or sculpture. Courses that do NOT satisfy this requirement include architecture, color guard, creative writing, drafting, drill team, fashion design, foreign languages, interior design, sewing, speech, web design or graphics, woodworking, and yearbook.

2. IF SATISFIED BY COLLEGE COURSE WORK

Two quarter credits (or 2 semester credits) chosen from any of the following subjects will satisfy the requirement:

- Art, art history, cinema/filmmaking, dance, music, or photography;
- Any course in drama except drama as literature courses.
- Courses in architecture are generally not accepted, except for those in architectural history.

Academic Electives

1. IF COMPLETED IN HIGH SCHOOL

Academic electives are courses in any of the six core subject areas — English, Mathematics, Social Science, World Languages, Lab Science, and the Arts — beyond the minimum number of credits specified. An additional half-credit is required.

2. IF SATISFIED BY COLLEGE COURSE WORK

Three quarter credits (2 semester credits), chosen from any of the six subject areas, satisfy this requirement.

High School Students Enrolled in Dual-Credit Programs

The Running Start Program allows academically qualified 11th- and 12th-graders the opportunity to enroll in certain Washington colleges for college credit. College in the High School, which may go under names such as dual enrollment or dual credit, allows high school students to take college courses while enrolled at their local high school and receive college credit.

ADMISSION

Dual-enrollment applicants are evaluated for admission on the same basis as other freshman applicants: academic preparation and performance; and personal achievement and characteristics. See Requirements/Freshman/Review.

- You must satisfy the College Academic Distribution Requirements (CADR).
- You must submit scores from SAT Reasoning Test or ACT with Writing. Dual-enrollment applicants are evaluated for admission on the basis of both quantitative (including high school and college grades and admission test scores) and qualitative factors.

APPLICATION PROCEDURES

- If you are applying for summer or autumn quarter after you graduate from high school, use the freshman application and apply by the freshman application deadline, December 15, regardless of the number of college credits you have taken or will have taken. All materials to complete the application file must be submitted or postmarked by the deadline.
- The Honors Program priority date for scholarship consideration is November 15.
- If you are starting college after you leave high school, apply as a transfer student.

Recommendations for Academic Planning

We encourage dual-enrollment applicants—particularly those with a significant number of college credits—to begin their academic planning as early as possible to ensure that they make the most of their college credit. The Transfer Admission & Planning booklet will be helpful in this regard, especially the academic planning section.

- Keep in mind that you have established a college record. Grades you earn now could affect admission to the University and to your intended major.
- If you anticipate entering the UW with 90 or more transferable credits, please know that you will be expected to declare a major at the end of your first quarter at the UW or request an extension from your adviser.
- Two online tools will help you look ahead toward UW requirements—for your intended major and for graduation—while still completing course work at the college you are now attending:
 - For transferable courses at Washington State community colleges and transfer credit policies, get to know the Equivalency Guide.
 - Consult the Academic Planning Worksheets, to help you prepare for your intended major and UW graduation requirements.

Transfer Credit Policy

In general, it is UW policy to accept college credits earned at institutions fully accredited by their regional accrediting association for colleges and universities, provide that such credits have been earned through university-level courses appropriate to the student's degree program at the UW. Exceptions are noted under Notable Restrictions on Transfer Credit and Courses Receiving No Credit in the Transfer Credit section of the catalog.

Scholarships

You may be considered for freshman scholarships as long as you do not enroll in another degree-seeking program after leaving high school and before enrolling at the UW. December 1 is the application deadline for freshman admission.

Homeschooled Applicants

Homeschooled students bring unique qualities to our campus, and we welcome their interest in the University of Washington. The Office of Admissions provides these guidelines to help homeschooled applicants become eligible for admission consideration.

College Academic Distribution Requirements (CADR)

All freshman and transfer applicants are required to meet minimum academic distribution requirements as set by the Washington State Higher Education Coordinating (HEC) Board and the faculty of the University of Washington. These requirements are explained in detail elsewhere.

Test Score Requirements

- CADR subjects completed at a high school or regionally accredited college do not require test score validation.
- CADR subjects completed through homeschooled coursework require validating test scores. The UW does not have an established list of predetermined minimum scores but reviews each homeschooled applicant in light of their unique educational history. All applicants are assessed holistically in the context of the UW's comprehensive review process.

CADR	Examination Options Scores from ACT with Writing or SAT Reasoning Test are required of all freshman applicants and may also serve as a validation option for some CADR subjects.
English	SAT Reasoning Test or ACT with Writing
Mathematics	SAT Reasoning Test or ACT with Writing
Lab Science: Validation is required for at least one of the following: Biology, Chemistry or Physics.	ACT with Writing or SAT Subject Test or Advanced Placement (AP)
World Languages	UW proficiency examination results for subject area (Comparable proficiency exam from another regionally accredited college or university may be an option; contact UW Admissions Office in advance.) SAT Subject Test or Advanced Placement (AP)
Social Science	No additional test required.
Fine Visual & Performing Arts	No additional test required.

Required Documents

Transcripts

An official homeschool transcript is required for all homeschooled coursework. It should include a summary of subjects completed for each year (grades 9-12) of homeschool study. For each subject, the following must be included:

- Course title,
- Course level (for example, 1st-year Spanish, Algebra II, etc.),
- Duration of study (beginning and ending dates),
- Short description of course content, and
- Grade for performance (or comparable qualitative assessment).

To be considered official, the homeschool transcript must be signed by the teacher of record; this may be a parent. Official transcripts are also required for any coursework completed at other high schools or regionally accredited

colleges. All official transcripts, including college transcripts, must be submitted by the appropriate application deadline.

Test Scores

Everything you need to know about how to submit scores from SAT Reasoning and ACT with Writing is at admit.washington.edu/Apply/Freshmen/TestScores.

Applicants with College Coursework: Freshman vs. Transfer Application

Freshman

If you are applying for admission for the summer or autumn quarter immediately following your high school graduation, apply using the freshman application, regardless of the number of college credits you have taken, are taking, or will have taken.

Transfer

If you will have completed college coursework and will be applying for a quarter beyond the autumn immediately following high school graduation, use the transfer application.

College Credit

In general, the UW awards credit for academic, college-level course work completed through regionally accredited colleges. See the section on Transfer Credit Policies below.

English Language Proficiency Requirement

Enrollment Requirement

All new freshman and transfer students must satisfy an English language proficiency requirement upon enrolling at the Seattle campus of the University of Washington. Applicants should review the English language proficiency requirement section of the catalog so they will know what to expect when they enroll at the UW.

Admission Requirement

- U.S. Applicants: Proof of English language proficiency is not an admission requirement
- International Applicants: Minimum test scores are required to be considered for admission. Applicants should read more about the admission process in the International Applicants section of the catalog.

Freshman Application Checklist

A complete application file for freshman admission must include:

- Application
- \$90 nonrefundable application fee OR approved fee waiver
- **Test Scores:** The UW no longer requires SAT or ACT scores. Students who have taken the exams are welcome to send their scores, however, there is absolutely no advantage or disadvantage in doing so.
- **Transcripts:** Do not send unless you receive a request from the Office of Admissions. The application requires that you self-report your academic course work.
- **Letters of Recommendation:** Do not send.
- **The Writing Section:** a required and important part of your application for admission: admit.washington.edu/Apply/Freshmen/WritingSection.

Application Deadlines

All required materials, including official exam and test score results, must be received by the application deadline.

Quarter of Application	Deadline
Winter	Sept. 1
Spring	Not Open for General Admission
Summer	Dec. 1
Autumn	Dec. 1

TRANSFER APPLICANTS

Definition of Transfer Status

Apply as a transfer student if all of the following statements describe you.

- You wish to enroll at the University of Washington to earn your first bachelor's degree.
- You are no longer in high school (regardless of how old you are or whether you graduated).
- You have completed, plan to complete, or will have completed any coursework at a regionally accredited college or university before you enroll at the University of Washington.

Admission Policy

Selecting the Transfer Class

The University seeks students who will enhance the intellectual and cultural vitality of the university community. Choosing students from an able group of applicants requires a selection process that looks beyond grades.

Minimum Requirements

Transfer applicants must meet the following minimum standards to be assured their application will receive a comprehensive review:

- Completion of the College Academic Distribution Requirements (see Freshman Admission section for complete details)
- Transfer GPA of 2.50 or better
- Submission of scores on the SAT or ACT unless the applicant has earned at least 40 reasonably distributed transferable quarter-credits after high school graduation

Comprehensive Review

The Comprehensive Review is a holistic assessment of an applicant's academic performance and personal qualities and achievements. The comprehensive review includes the following assessment areas:

- Level of academic achievement including cumulative transfer GPA based on all transferable college-level courses attempted; rigor of curriculum; and consistency in course completion
- Well-defined academic goals
- Preparation for intended major
- Plan for timely completion of a bachelor's degree
- Completion of foreign language through the 103-level, or equivalent, when applying to Arts and Sciences or Social Work
- Evidence of a need to enroll at the UW and the availability of the applicant's intended academic program at other Washington public educational institutions
- Academic or artistic awards and achievements, community service, work experience, or research that demonstrates success or potential contributions to the University and community
- Improved grades after an extended absence from college or evidence of a new maturity in approaching college work
- Cultural awareness
- Perseverance in attaining higher education in spite of personal adversity, disability, or economic disadvantage
- Admission test scores, if provided

Enrollment Goals and Priorities

The University is committed to the following transfer goals and priorities to benefit students from Washington's community and technical colleges.

- Among community college transfer students, the highest admission priority will be given to those with academic associate degrees and those with 90 transferable credits taken in preparation for a professional academic major. Applicants with fewer than 90 credits may also be admitted when early transfer is advisable, but the number of such transfers remains small.
- The University accepts applicants who have completed fewer than 40 quarter credits (slightly less than one year of college) at the time of application. However, admission for these applicants is competitive and, due to enrollment pressures, priority is low.

English Language Proficiency Requirement

Enrollment Requirement

All new freshman and transfer students must satisfy an English language proficiency requirement upon enrolling at the Seattle campus of the University of Washington. Applicants should review the English language proficiency requirement section of the catalog so they will know what to expect when they enroll at the UW.

Admission Requirement

- U.S. Applicants:** Proof of English language proficiency is not an admission requirement
- International Applicants:** Minimum test scores are required to be considered for admission. Applicants should read more about the admission process in the International Applicants section of the catalog.

Transfer Application Checklist

A complete application file for transfer admission must include:

- Application
- \$90 nonrefundable application fee OR approved fee waiver
- Academic Planning Worksheet for intended major
- Personal Statement
- Official high school transcript (if homeschooled, see Homeschool section)
- Official college or university transcript(s)
- Test Scores:** The UW no longer requires SAT or ACT scores (read the [June 11, 2020 announcement](#) for more information). Students who have taken the exams are welcome to send their scores, however, there is absolutely no advantage or disadvantage in doing so.

Application Deadlines

Quarter of Application	Deadline
Winter	Sept. 1
Spring	Not Open for General Admission
Summer	Feb. 15
Autumn	Feb. 15

* ATTN: Engineering Applicants and Computer Science Applicants Only. You may submit the paper application to the UW Admissions Office for spring quarter admission only if you are also applying for spring quarter direct entry to the programs listed below. To apply to the university, direct entry applicants to these programs should print the PDF version of the university application and submit the paper application and required documents prior to December 15. Direct entry applicants must also submit a departmental application to the program; check department websites for instructions.

The following departments admit new transfer students for spring quarter only:

- Bioengineering
- Chemical Engineering

The following departments admit new transfer students for spring and autumn quarters:

- Bioresource Science and Engineering
- Computer Science
- Computer Engineering
- Electrical Engineering
- Materials Science & Engineering
- Human Centered Design and Engineering
- Industrial and Systems Engineering

INTERNATIONAL APPLICANTS

An international student is anyone who needs an F-1 student visa or has any other type of temporary, non-immigrant visa. You are not considered an international student if you have US citizenship, US permanent residency, political asylum, refugee status, or an A, E, I, G, K, or V visa. The University of Washington accepts international student applications for either summer or autumn quarters. Admission to the University of Washington is competitive for international degree-seeking students. In recent years, the UW has offered admission to about 40% of international student applicants.

Admission Policy and Requirements

For admission consideration, the following requirements must be completed by the December 15 application deadline for freshman or the February 15 deadline for transfer and postbaccalaureates:

1. Complete the Application for International Undergraduates
2. Submit official English proficiency exam scores that meet the minimum admission requirement
3. Completion of the College Academic Distribution Requirements before enrolling at the University. The minimum requirements are as follows:
 - Composition/Literature 4 years
 - Mathematics 3 years
 - Social Science 3 years
 - World Languages 2 years
 - Lab Science 2 years
 - Fine, Visual, or Performing Arts 0.5 year

For additional details, go to admit.washington.edu/Admission/International/CADR

4. Submit official transcripts for all schools attended for grades 9–11 (or grades 10–12 if you have already graduated high school) and for all colleges and/or universities attended.

English Proficiency for Admission

All international students are required to submit English proficiency scores that meet the University's minimum requirement for admission consideration. Applicants must request official scores be sent directly to the UW from the testing agency for either the TOEFL or IELTS. Previous ESL or English composition courses, even when taken in the United States, will not satisfy the admission requirement. Students currently enrolled in US or Canadian schools are also required to submit official exam scores. Applicants who have not met the minimum English proficiency requirement by the application deadline or have not taken one of the English proficiency exams will not be considered for admission.

Exception. Non-U.S. citizens whose primary and secondary education took place in Australia, Canada, Great Britain, Ireland, New Zealand, or the US are exempt from this requirement. Students who were born in one of these countries but educated elsewhere are still required to satisfy the English proficiency requirement. SAT or ACT Scores.

Although the SAT and ACT are not required for international student applicants, the University may consider the English proficiency requirement satisfied if you have achieved academic success in English writing or literature courses *and* have a minimum SAT critical reading score of 550 or an ACT English/Writing score of 22. Official SAT or ACT scores must be sent directly from the testing organization.

English Language Proficiency Requirement for UW Enrollment

All new freshmen and transfer students must satisfy an English language proficiency requirement upon enrolling at the University. This requirement is separate from the admission requirement for international students. English composition, literature, or ESL courses taken at the secondary or college level will not satisfy the English language proficiency requirement for UW enrollment.

Applicants who are offered admission to the UW and have qualifying exam scores or meet one of the other alternatives will have satisfied this requirement. New students entering the UW without a qualifying test score, will be required to take an English language proficiency screening test before registering for classes. Students who do not achieve the minimum score on the screening test will be directed to participate in a mandatory advising program and/ or to complete courses through the Academic English Program (AEP). At least one AEP course will be required each quarter until all mandatory AEP classes are completed.

An extra fee is charged for each AEP course in addition to regular tuition.

Test Score Requirements

Test Title	Minimum Requirement for Admission to UW Seattle	Score Needed for English Language Proficiency Exemption upon UW Enrollment
TOEFL Internet-based	76	92
TOEFL Paper-based	540	580
IELTS	6.0	7.0

The most competitive applicants will demonstrate a higher level of English proficiency and have test scores that exempt them from enrolling in UW's Academic English Program (AEP).

Selecting International Students for Admission

All international students for a given year are reviewed to determine which applicants meet minimum requirements and have the strongest overall academic background. In selecting students for admission, the University considers the overall academic record, the rigor of a student's curriculum, the education system where the student has studied, test scores, personal achievements, educational goals, academic preparation, special talents, and a student's personal background as seen through the personal statement. Admission will be offered to as many highly qualified students as space allows and to those applicants who will most benefit from and contribute to the University's educational resources.

International Application Checklist

A complete application file for transfer admission must include:

- Application
- \$90USD nonrefundable application fee
- Official scores from English proficiency exam
- Academic Credentials (transcripts)
- Official secondary school transcripts
- Official transcripts from each college, university, or other post-secondary institution attended

Application Deadlines

Quarter of Application	Deadline
Summer	Freshmen: Dec. 1 Transfers & Postbaccalaureates: Feb. 15
Autumn	Freshmen: Dec. 1 Transfers & Postbaccalaureates: Feb. 15

POSTBACCALAUREATE APPLICANTS

Admission Policy

Postbaccalaureate is a highly competitive status, reserved for students who are working toward a second bachelor's degree or preparing for entrance to graduate or professional school. Only a small number of applicants are admitted every quarter as postbaccalaureates because the University's primary commitment is to undergraduates who are completing the first bachelor's degree. The primary factors in the admission decision are the Statement of Purpose, the applicant's academic record from the first bachelor's degree, and any relevant postbaccalaureate course work.

Postbaccalaureate Application Checklist

A complete application file consists of:

- Application, available online
- \$90 nonrefundable application fee via Visa, MasterCard or electronic check
- Statement of Purpose
- One official transcript from each college or university attended

Statement of Purpose

A Statement of Purpose, required of all postbaccalaureate applicants, is a critical part of your application for admission and is a required part of your admission file. Statements of Purpose and all other documents submitted are reviewed by the Postbaccalaureate Review Committee (PRC). Applicants will be notified in writing of the final decision after evaluation of transcripts and the Statement of Purpose.

The Statement of Purpose will be evaluated as part of the admission decision. Content as well as form (spelling, grammar, punctuation) will be considered. Applicants are expected to answer the following questions in their statements:

- Why are you pursuing further studies? How did you reach the decision to go into your particular field? What are your long term academic and professional goals? Be as specific as possible.
- If you are preparing to enter a second undergraduate, graduate, or professional program (such as medical, dental, or law school), what courses do you intend to take? If, on the other hand, you are ready to begin work in your major immediately, you do not need to list all of the courses comprising the major.
- For how many academic quarters do you plan to enroll? Why is it necessary for you to enroll at the UW? Do other four-year universities or community colleges offer what you need at this time? Can you meet your goal as a non-matriculated student, attending classes through UW Educational Outreach? (If you are planning to take specific courses in preparation for a graduate or professional program, be aware that access to courses in a particular quarter is not guaranteed.)
- If you are seeking admission to an undergraduate program with selective admission criteria: are you assured departmental admission? Your statement will be strengthened by a letter of support from the department. We recommend that applicants preparing for graduate school meet with an adviser in the department for an assessment of their chances for future admission. It is your responsibility to contact directly the program(s) you are interested in well before applying for admission to the University. Please be aware that postbaccalaureate applicants who are not accepted to their major of choice will not be admitted to the University.
- If you feel your undergraduate GPA is low: why might it be an unreliable indicator of your academic potential? Those students with postbaccalaureate course work on record, be it from a community college, four-year school, or graduate program, may use this opportunity to point out subsequent high performance if it is relevant to their academic plans at the UW.

Application Deadlines

Quarter of Application	Deadline
Winter	Sept. 1
Spring	Not Open for General Admission
Summer	Feb. 15
Autumn	Feb. 15

TRANSFER CREDIT POLICY

General Policy

To students pursuing a first bachelor's degree, the Office of Admissions awards transfer credit according to the guidelines discussed here. Admissions reserves the right to accept or reject credits earned at other institutions of higher education. In general, it is University policy to accept credits earned at institutions fully accredited by their regional accrediting association for colleges and universities, provided that such credits have been earned through university-level courses appropriate to the student's degree program at the University of Washington (UW). Exceptions are noted below.

State Policy on Inter-college Transfer and Articulation

The UW subscribes to the statewide Policy on Inter-College Transfer and Articulation Among Washington Public Colleges and Universities, endorsed by the public colleges and universities of Washington as well as by the State Board for Community and Technical College Education, and adopted by the Higher Education Coordinating Board. The policy deals with the rights and responsibilities of students, and the review and appeal process in transfer-credit disputes.

Class Standing

A student's class standing is determined by the total number of transfer credits awarded by the UW, not by the number of years of college study or by the completion of an associate degree.

Standing	Credit total
Freshman	0–44 credits
Sophomore	45–89 credits
Junior	90–134 credits
Senior	135+ credits

Satisfying UW graduation requirements depends not only on the number of credits completed—a minimum of 180 for most programs—but also on completing all College and major requirements.

Quarter vs. Semester Credits

Colleges and universities that operate on a semester system award semester credit. The UW awards quarter credit. To convert quarter credits to semester credits, multiply by two-thirds. To convert semester to quarter credits, multiply by 1.5. For example, a student who has earned 30 credits at an institution on a semester calendar would earn 45 quarter credits at the UW.

Applying Transfer Credit to Degree Requirements

Before a student first registers for classes at the University of Washington, s/he should meet with an academic adviser to plan a program of study. The adviser determines how the transfer credits shown on the transfer-credit evaluation may be used to meet UW degree requirements. For example, suppose that Admissions awards a student 120 transfer credits, but only 100 of those credits can be applied toward graduation requirements for that student's degree program. If selective credits are needed, credits that do not apply toward specific requirements may still be applied toward the minimum number of total credits required for graduation.

Alternative Credit Options

The UW does not award credit for work or life experience; however, two avenues exist for obtaining credit. Both situations require a formal approval process and a fee of \$25 per course.

- Once enrolled at the UW, students may explore the possibility of obtaining departmental approval for transfer of credit earned through coursework taken at a non-regionally accredited institution.
- Students may arrange to challenge specific UW courses via credit by examination if the same knowledge has been gained through independent study outside a formal educational setting. For course work taken at an unaccredited institution, contact Admissions. For credit by examination for independent study completed outside a formal educational setting, contact the Graduation and Academic Records Office, ugradoff@uw.edu.

Transfer Credit Limit

The University allows a maximum of 90 credits of lower-division transfer course work to be applied toward a UW degree. Of the 180 credits required for graduation from the University (some majors require more than 180), a maximum of 90 lower-division transfer credits are allowed. Upon enrolling at the UW, students with a lower-division credit total that exceeds 90 will see a difference between the “total credits earned” and the “total credits allowed” on their UW record under the Summary of Transfer Credit following the course by course “Detail of Transfer Credit.”

Additionally, a maximum of 135 total transfer credits are allowed toward the 180-credit total. Therefore, a student transferring 135 or more credits must complete a minimum of 45 more credits in residence at the UW.

Despite these restrictions, all transferable credit are listed under the Detail of Transfer Credit and, with an adviser’s approval, may be used to satisfy individual requirements for graduation. It may be helpful to think of transfer credits as a “bank account” of credits from which applicable credits may be drawn. All transferable credits remain in the bank, but no more than 90 lower-division credits and no more than 135 total transfer credits may be “withdrawn” in order to be applied toward the 180 (or more) credits required for a degree.

Extension Credit from Other Schools

Extension credit, including correspondence courses, earned at other schools may not exceed 45 credits. Military credit is included in this 45-credit limit.

Foreign Language Courses

Students who complete two or more years of a foreign language in high school and then go on to complete an entry-level language course in the same language (e.g., FRENCH 101) before transferring to the UW are eligible to receive transfer credit. However, students who complete an entry-level course after their transfer to the UW will not receive college credit.

Military Credit

Credits earned for courses completed through in Armed Forces Training Schools (AFTS) and through USAFI and DANTES may not exceed 30 credits. Official transcripts (or DD-214 or DD-295 forms) will be evaluated after a student enrolls at the UW. No credit is awarded for Military Occupational Specialty (MOS) programs.

Native Language

First-year (elementary) or second-year (intermediate) foreign-language credit is not granted either by examination or by course completion in a student’s native language. “Native language” is defined as the language spoken in the student’s home during the first six years of his or her life and in which he or she received instruction through the seventh grade.

Out-of-Sequence Courses

Credit is not awarded for prerequisite courses in mathematics or foreign languages completed after a more advanced course has been completed. For example, students will not be awarded credit for Spanish 102 if taken after Spanish 103.

Overlapping Content

If a department considers two of its courses to have overlapping content, credit will be awarded for only one. For example, credit is granted for either PHYS 114 or PHYS 121.

Physical Education

No more than three quarter credits will be allowed for physical-education activity courses.

Restricted Transfer Credit

Transfer credit will not generally be awarded for vocational or technical courses. However, a maximum of 15 quarter credits will be awarded in transfer for college-level vocational-technical courses when they have been allowed as electives within the 90 credits comprising an academic associate degree from a Washington community college. Courses in this category are those that ordinarily provide specialized training for an occupation (e.g., allied health, bookkeeping, electronics, or physical therapy assistant). When allowed, these credits will apply only toward the elective credit component of a baccalaureate degree at the UW. Such courses are not included in the transfer GPA.

Senior Residency Requirement

To be recommended for a first bachelor’s degree, a student must complete 45 of the last 60 credits as a matriculated student at the UW campus where the degree is to be awarded.

Appeal Procedure

If not all courses transfer as the student had anticipated, and it is not evident to the academic adviser is unable to answer questions about an individual student’s transfer credit award, the student should first consult with an admissions specialist in the Office of Admissions. If appropriate, further appeal can be directed to the UW Transfer Officer in the Admissions Office.

The Direct Transfer Agreement (DTA)

The public community colleges and baccalaureate colleges and universities in Washington have adopted an inter-institutional transfer agreement. The agreement applies to the applicability of transfer credit from community colleges to baccalaureate institutions; the DTA is not an admission agreement. The DTA Associate Degree Guidelines developed by the Intercollege Relations Commission (ICRC) outline an acceptable transfer curriculum, which serves as the foundation of the DTA associate degrees offered at each community college. In general, transfer students who have been awarded a qualifying DTA associate will be eligible to transfer to a baccalaureate institution with junior standing and will have completed lower division general education requirements.

The University of Washington subscribes to the Direct Transfer Agreement as follows:

- Students will be assigned junior standing upon admission.
- The UW transfers credit on a course-by-course basis. However, approved DTA degree-holders may use transfer courses toward the UW Areas of Knowledge requirements comparable to those the community college used toward DTA associate degree distribution requirements—even if those courses would not otherwise be allowed toward specific Areas of Knowledge requirements at the UW—if doing so is to the student’s advantage.
- The UW’s College of Arts and Sciences agrees that transfer students from Washington community colleges who complete approved associate degree programs will be considered to have satisfied the College’s general education and proficiency requirements with the following provisos:
 1. Students who have completed the minimum of 45 credits of distribution (15-15-15) as part of their DTA degree will be required to take an additional 5 credits in each area plus an additional 15 credits drawn from their choice of one or more of the three areas in order to satisfy the Arts and Sciences Areas of Knowledge requirement.
 2. Up to 15 credits in the student’s major may be applied towards the 75-credit Areas of Knowledge requirement.
 3. Students who complete first-year language courses as a part of the transfer degree distribution requirement, and later use that

foreign language to satisfy the Arts and Science language proficiency requirement (see item 4), may NOT use those foreign language credits towards the Arts and Science Areas of Knowledge requirement.

4. Students will be required to complete foreign language study through the 103-level or to demonstrate language proficiency at the 103-level through an examination.
5. Ten credits in courses emphasizing writing (W-courses or English composition) are required in addition to the 5-credit English composition requirement. W courses must have attributes as defined by Arts and Sciences. If not completed as part of the transfer degree, this requirement must be completed at the University.

Note: Additional courses taken at the UW to fulfill general education or proficiency requirements may be upper division courses; students will not be required to complete additional lower division courses at the UW.

ADVANCED PLACEMENT PROGRAM (COLLEGE BOARD)

AP Credit Policies

Although AP scores range from 1 to 5, all UW departments that award credit require a minimum score of 3 or 4. In some cases, students must consult a UW departmental adviser for evaluation after entering the University.

NOTE: AP test results may be submitted only for courses taken in high school and for tests taken during or within 6 months of leaving high school. AP test results may not be used to waive admission requirements.

AP Subject	Score	Credit/Placement Awarded and Additional Information
Art: History of Art	4,5	ART H 100 (5 or 10 cr., respectively). Art history elective credit. See Art adviser for placement. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.
Art: Studio Art	-	Placement only. See Art adviser.
Biology	4,5	BIOL 161–162 (10 cr.) First two quarters of general biology. Counts toward Natural World general education requirement
Calculus AB	5	MATH 124,125 (10 cr.) First two quarters of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Calculus AB	3,4	MATH 124 (5 cr.) First quarter of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Calculus AB	2	Placement only into MATH 124. Placement into first quarter of calculus.

Calculus BC	4,5	MATH 124,125 (10 cr.) First two quarters of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies
-------------	-----	--

		Quantitative and Symbolic Reasoning graduation requirement.
Calculus BC	3	MATH 124 (5 cr.) First quarter of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Calculus BC	2	(Subgrade 3,4,5) MATH 124 (5 cr.) First quarter of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Chemistry	5	CHEM 142, 152, 162 (5, 5, 5) General chemistry for science and engineering majors. Counts toward Natural World general education requirement for graduation. CHEM 142 also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Chemistry	4	CHEM 142, 152 (5, 5) General chemistry for science and engineering majors. Counts toward Natural World general education requirement for graduation. CHEM 142 also satisfies Quantitative and Symbolic Reasoning graduation requirement. Note: Students with AP scores of 4 or 5 who plan to major in chemistry or biochemistry are strongly encouraged to discuss the option of enrolling in the honors introductory chemistry sequence, Chem 145–165, with the undergraduate advisers in the Chemistry department.
Chinese Language	3,4,5	CHIN 133, 231, 232 (5,10,15 cr., respectively) Courses are parallel to CHIN 103, 201, 202; cannot earn credit for both sequences. Credit for 133, 231, 232 does not imply placement into specific CHIN courses.
Computer Science A	4,5	CSE 142 (4 cr.) Computer programming for science/engineering students. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Computer Science AB	5	CSE 142, 143 (4, 5 cr.) Computer programming for engineering and science students. Counts toward Natural World general education requirements for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.

Computer Science AB	3,4	CSE 142 (4 cr.) Computer programming for engineering and science students. Counts toward Natural World general education requirements for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Economics: Micro	4,5	ECON 200 (5 cr.) Introduction to Microeconomics. Counts toward Individuals & Societies general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Economics: Macro	4,5	ECON 201 (5 cr.) Introduction to Macroeconomics. Counts toward Individuals & Societies general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
English: Language & Composition	4,5	ENGL 190 (5 cr.) AP English. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.
English: Literature & Composition	4,5 on both	ENGLISH 191 (5 cr.) AP English. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.
Environmental Science	3,4,5	ESRM 100 (5 cr.) Introduction to environmental science. Counts toward Natural World general education requirement for graduation.
European History	4,5	HIST 113 (5 cr.) Western Civilization history survey (modern). Counts toward Individuals & Societies general education requirement for graduation.
French Language	3,4,5	FRENCH 201, 202, 203 (5, 10, 15 cr., respectively) Intermediate French. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
French Literature	3,4,5	FRENCH 298 (5, 10, 15 cr., respectively) Does not imply a particular placement. French credit at the second-year college level. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
German Language	3,4,5	GERMAN 201, 202, 203 (5, 10, 15 cr., respectively) Intermediate German. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Government and Politics: American	4,5	POL S 202 (5 cr.) American politics. Counts toward Individuals & Societies

		general education requirement for graduation.
Government and Politics: Comparative	4,5	POL S 204 (5 cr.) Comparative politics. Counts toward Individuals & Societies general education requirement for graduation.
Human Geography	3,4,5	GEOG 100 (5 cr.) Introduction to geography. Counts toward Individuals and Societies general education requirement for graduation.
Italian Language & Culture	3,4,5	ITAL 201, 202, 203 (5, 10, 15 cr., respectively) Intermediate Italian. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences. .
Japanese Language	3,4,5	JAPAN 133, 231, 232 (5, 10, 15 cr., respectively) Courses are parallel to JAPAN 113, 211, 212; cannot earn credit for both sequences. Credit for 133, 231, 232 does not imply placement into specific JAPAN courses.
Latin Literature	4,5	LATIN 305, 306 (10 cr.) Latin literature courses. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Latin Literature	3	LATIN 103 (5 cr.) Third quarter of elementary Latin. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Latin: Vergil	4,5	LATIN 305, 307 (10 cr.) Latin literature courses. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Latin: Vergil	3	LATIN 103 (5 cr.) Third quarter of elementary Latin. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Latin Literature and Latin: Vergil	4,5	LATIN 305, 306, 307 (15 cr.) Latin literature courses. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Latin Literature and Latin: Vergil	3	LATIN 103 (5 cr.) Third quarter of elementary Latin. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Music Theory	-	None Awarded. See Music adviser for placement.
Physics B	4,5	PHYS 114/117, 115/118, 116/ 119 (15 cr.) First-year general physics sequence.

		Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Physics C: Mechanics	4,5	PHYS 121 (5 cr.) First quarter of engineering physics sequence. Also satisfies Quantitative and Symbolic Reasoning graduation
Physics C: Electricity & Magnetism	4,5	PHYS 122 (5 cr.) Second quarter of engineering physics sequence. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
Psychology	4,5	PSYCH 101 (5 cr.) Introductory psychology. Counts toward Individuals & Societies general education
Spanish Language	3,4,5	SPAN 201, 202, 203 (5, 10, 15 cr., respectively). Intermediate Spanish. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Spanish Literature	3,4,5	SPAN 298 (5, 10, 15 cr., respectively). Spanish credit at the second-year college level. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.
Statistics	3,4,5	STAT 311 (5 cr.) Statistical Methods. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.
U.S. History	4,5	HSTAA 101 (5 cr.) American history survey. Counts toward Individuals & Societies general education requirement for graduation.
World History	4,5	HIST 100 (5 cr.) AP World History. Counts toward Individuals & Societies general education requirement for graduation.

African History	7,6,5	HIST 108 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.
American History	7,6,5	HSTAA 101 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.
Anthropology	7,6,5	ANTH 202 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.
Arabic A	No credit.	
Arabic B	7	ARAB 108 (15 cr.) Satisfies foreign language requirement, and credits count toward general education requirement for graduation. See department for placement.
Arabic B	6	ARAB 108 (10 cr.)
Arabic B	5	ARAB 108 (5 cr.)
Art/Design	7,6,5	Policy to be determined.
Biology	7,6,5	BIOL 161–162 (10 cr.) Counts toward Natural World general education requirement for graduation.
Business and Organization	7,6,5	No credit
Chemistry	7	CHEM 142, 152, 162 (5, 5, 5) General chemistry for science and engineering majors. Counts toward Natural World general education requirement for graduation. CHEM 142 also satisfies Quantitative and Symbolic Reasoning general education requirement for graduation. Note: Students with IB scores of 5, 6, or 7 who plan to major in chemistry or biochemistry are strongly encouraged to discuss with the undergraduate advisers in the Chemistry department the option of enrolling in the honors introductory chemistry sequence, CHEM 145–165

INTERNATIONAL BACCALAUREATE PROGRAM

Policy Overview

In most cases, five quarter credits (or more) are granted for Higher Level subjects in which a grade of 5 or higher is earned. Students who earn an IB diploma may be awarded up to 45 quarter credits for a combination of subject grades and 15 general education credits distributed equally among the three Areas of Knowledge (general education) areas: Visual, Literary, and Performing Arts (VLPA), Individuals and Societies (I&S), and The Natural World (NW). No credit is awarded for Standard Level subject grades. Consult the Higher Level Subjects table for detailed information about credit awards in particular disciplines.

IB Credit Policies

IB Subject	Score	Courses and Credits Counts Toward/Comments
------------	-------	--

Chemistry	6	CHEM 142, 152 (5, 5) General chemistry for science and engineering majors. Counts toward Natural World general education requirement for graduation. CHEM 142 also satisfies Quantitative and Symbolic Reasoning general education requirement for graduation. Note: Students with IB scores of 5, 6, or 7 who plan to major in chemistry or biochemistry are strongly encouraged to discuss with the undergraduate advisers in the Chemistry department the option of enrolling in the honors introductory chemistry sequence, CHEM 145–165..
Chemistry	5	CHEM 142 (5) General chemistry for science and engineering majors. Counts toward Natural World general education requirement for graduation. CHEM 142 also satisfies Quantitative and Symbolic Reasoning general education requirement for graduation. Note: Students with IB scores of 5, 6, or 7 who plan to major in chemistry or biochemistry are strongly encouraged to discuss with the undergraduate advisers in the Chemistry department the option of enrolling in the honors introductory chemistry sequence, CHEM 145–165.
Chinese A	No credit.	
Chinese B	7	CHIN 201, 202, 203 (15 cr.) Satisfies foreign language requirement, and credits count toward general education requirement for graduation. For further study, instructor evaluation required for placement.
Chinese B	6	CHIN 201, 202 (10 cr.)
Chinese B	5	CHIN 201 (5 cr.)
Computer Science and Engineering	7,6,5	CSE 100 (5 cr.) Satisfies Quantitative and Symbolic Reasoning graduation requirement.
Design Technology	7,6,5	ENGR 100 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.
East/ Southeast Asia and Oceania History	7,6,5	HISTAS 108 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.

Economics	7,6	ECON 200, 201 (10 cr.) Satisfies Quantitative and Symbolic Reasoning graduation requirement and/or counts toward Individuals & Societies general education requirement for graduation.
Economics	5	ECON 200 (5 cr.) Satisfies Quantitative and Symbolic Reasoning graduation requirement or counts toward Individuals & Societies general education requirement for graduation.
English A	7,6,5	ENGL 193 (5 cr.) Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.
English B	No credit.	
European History	7,6,5	HIST 113 (5 cr.) Counts toward Individuals & Societies general education
French A	No credit.	
French B	7	FRENCH 201, 202, 203 (15 cr.) Satisfies foreign language requirement, and credits count toward Visual, Literary, and Performing Arts general education requirement for graduation.
French B	6	FRENCH 201, 202 (10 cr.)
French B	5	FRENCH 201 (5 cr.)
Geography	7,6,5	GEOG 100 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.
Germanics A	No credit.	
Germanics B	7	GERMAN 201, 202, 203 (15 cr.) Satisfies foreign language requirement, and credits count toward Visual, Literary, and Performing Arts general education requirement for graduation.
Germanics B	6	GERMAN 201, 202 (10 cr.)
Germanics B	5	GERMAN 201 (5 cr.)
History		See African History; American History; East/Southeast Asia and Oceania History; European History
Italian A	No credit.	
Italian B	7	ITAL 201, 202, 203 (15 cr.) Satisfies foreign language requirement, and credits count toward general education requirement for graduation.

Italian B	6	ITAL 201, 202 (10 cr.)
Italian B	5	ITAL 201 (5 cr.)
Japanese A	No credit.	
Japanese B	7	JAPAN 321, 322, 323 (15 cr.) Satisfies foreign language requirement, and credits count toward general education requirement for graduation.
Japanese B	6	JAPAN 321, 322 (10 cr.)
Japanese B	5	JAPAN 321 (5 cr.)
Latin	7,6,5	LATIN 305, 306, 307 (15 cr.) Satisfies foreign language requirement, and credits count toward Visual, Literary, and Performing Arts general education requirement for graduation.
Mathematics	7	MATH 124 (5 cr.) Satisfies Quantitative and Symbolic Reasoning basic skills requirement and/or Natural World general education requirement for graduation
Mathematics	6,5	MATH 120 (5 cr.) Satisfies Natural World general education requirement for graduation
Music	7,6,5	MUSIC 120 (5 cr.) Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.
Near East	7,6,5	NEAR E 210 (5 cr.) Counts toward Visual, Literary, and Performing Arts or Individuals & Societies general education requirement for graduation.
Philosophy	7,6,5	No credit
Physics	7,6,5	PHYS 114/117, 115/118, 116/119 (15 cr.) Satisfies Natural World general education requirement for graduation. PHYS 114 also satisfies Quantitative and Symbolic Reasoning basic skills requirement for graduation.
Psychology	7,6,5	PSYCH 101 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.
Russian A	No credit. Consult the departmental adviser for case-by-case review.	
Russian B	7	RUSS 301, 302, 303 (15 cr.) Satisfies foreign language requirement, and credits count toward general education requirement for graduation.

Russian B	6	RUSS 301, 302 (10 cr.)
Russian B	6	RUSS 301, 302 (10 cr.)
Spanish A	No credit.	
Spanish B	7	SPAN 201, 202, 203 (15 cr.) Satisfies foreign language requirement, and credits count toward general education requirement for graduation.
Spanish B	6	SPAN 201, 202 (10 cr.)
Spanish B	5	SPAN 201 (5 cr.)
Swahili A	To be determined.	
Swahili B	7	AFRAM 306, 307, 308 (15 cr.) Satisfies foreign language requirement.
Swahili B	6	AFRAM 306, 307 (10 cr.) Counts toward foreign language requirement.
Swahili B	5	AFRAM 306 (5 cr.) Counts toward foreign language requirement.
Theater Arts	7,6,5	DRAMA 101, 201 (10 cr.) Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.

REGISTRATION POLICIES

Full-Time Requirements

You should register for 12 or more credits to be considered full-time if you are an undergraduate or professional student. If you are a graduate student, you should register for 10 or more credits. It is important to note that differing criteria and standards for full-time enrollment exist for eligibility in certain programs. Consult the Financial Aid Office for its requirements on satisfactory student progress. The tuition schedule does not reflect full-time credit requirements for loan deferments, teaching assistantships or other programs.

Class Attendance

If you do not attend regularly scheduled class meetings during the first week of the quarter, you are subject to being dropped at the discretion of the teaching department to allow enrollment space for other students. Affected courses should be identified in the Time Schedule and/or posted in departmental offices. Do not assume that departments will automatically drop you from the course if you do not attend. If you are not going to go to class, you should drop the course through the registration system. Students who are registered for a course section but do not attend will be assigned a failing grade by the instructor. You may not attend a University course in which you have not been officially registered after the first two weeks of the quarter. An instructor may allow you to attend his or her class only if your name appears on the official class list from Office of the University Registrar. A faculty member may attend informally with the approval of the instructor.

Satisfactory Progress

If you are pursuing a baccalaureate degree, you are expected to make satisfactory progress toward the attainment of that degree and are expected to enter a major and graduate after completion of a reasonable number of credits. NOTE: Individual departments may have additional satisfactory progress requirements.

The 105-Credit Rule

Undergraduates must declare a major by the time they have earned 105 credits or a hold will be placed on their registration until they either declare a major, or meet with an adviser and receive a pre-major extension. The hold is placed on the student record when 105 or more credits have been completed. Transfer students who are admitted to the University with 105 or more credits are expected to declare a major before their second quarter at the UW, or obtain an extension from an adviser.

You will be granted a pre-major extension if your adviser decides that you are pursuing a reasonable goal, and have a good chance of gaining admission to your intended major. The extension will be granted for the number of quarters it should take you to complete the admission requirements of your major.

If your adviser feels that your choice of major is unrealistic, he or she will deny your request for an extension. You will not be allowed to register for subsequent quarters until you can present a reasonable degree plan. Since the intent of the rule is not to drop you from the University but to encourage you to meet with an adviser and plan for an attainable goal, if you need time to consider your options you will usually be given one or two quarters to do so, and then may be allowed additional time if necessary to meet the admission requirements of your new major.

You will receive a warning letter from the University as you approach 105 credits, if you have not yet declared a major. If you complete 105 credits and are still a pre-major, the registration system will not let you register for the next quarter. To avoid registration delays, meet with the appropriate adviser at least one quarter before you complete 105 credits.

The 210-Credit Rule

The University's satisfactory progress policy requires students to complete their undergraduate degree programs within 30 credits beyond the minimum required for the degree. Because most degrees require 180 credits, students generally must complete their programs by the time they earn 210 credits. Undergraduates who have completed over 210 credits will be notified by e-mail the third week of the quarter that a hold is being placed on their

registration due to lack of satisfactory progress. Students ineligible to graduate will be permitted to register for succeeding quarters only if they receive approval from their department and college after filing a graduation plan. Approval to enroll beyond 210 credits may not extend beyond two additional quarters.

Students receiving satisfactory progress registration holds should immediately contact their departmental academic adviser to file a graduation application or to initiate a satisfactory progress appeal.

Postbaccalaureate Students

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree, or working toward a certificate. If you are admitted as "postbaccalaureate undeclared," you must declare a major by the time you have earned 30 credits beyond your last degree. Once a degree objective has been declared, you must make progress toward that degree as evidenced by courses satisfactorily completed. College advisers may grant extensions beyond the 30-credit limit.

Excessive Course Repeats and/or Drops

The Committee on Admissions and Academic Standards may terminate your enrollment if you have demonstrated lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. You may be reinstated with the approval of your college and the Committee. EOP students may be reinstated in consultation with the Office of Minority Affairs.

Registration Tampering

A student who tampers or attempts to tamper with the registration records of another student, including but not limited to dropping courses and adding courses, may be subject to disciplinary sanctions as defined in the Student Conduct Code (WAC 478-120).

Registration Abuse

The registration system is provided for the sole express purpose for students to register themselves into sections. Any use of the registration system other than for this purpose is considered abuse of the system. Such abuse includes, but is not limited to, selling one's seat in a class or otherwise registering for a section that one has no intention of taking.

To help conserve University resources and ensure the registration system is available to all, students are locked out of Web Registration after a specific number of excessive transactions are made per day. This threshold is sufficient for students' regular use and should not interfere with typical use. The use of robots and other automated tools to submit registration requests is expressly forbidden.

If your account is locked out for excessive use, you must wait until the registration system removes the lockout (within 24 hours). The Office of the University Registrar is unable to override a locked account.

GRADING SYSTEM

Standard Grading System

The UW uses a numerical grading system, with certain exceptions in the schools of Dentistry, Law, and Medicine. Instructors may report grades from 4.0 to 0.7 in 0.1 increments and the grade 0.0. The number 0.0 is assigned for failing work or if a student does not officially withdraw. Grades in the range 0.6 to 0.1 may not be assigned. Grades reported in this range are converted by the Office of the University Registrar to 0.0. Numerical grades may be considered equivalent to letter grades as follows:

Letter	Number	Note
A	4.0–3.9	
A-	3.8–3.5	
B+	3.4–3.2	

B	3.1–2.9	
B-	2.8–2.5	
C+	2.4–2.2	
C	2.1–1.9	
C-	1.8–1.5	
D+	1.4–1.2	
D	1.1–0.9	
D-	0.8–0.7	Lowest passing grade.
E	0.0	Academic failure. No credit earned.

Additional information on grades and scholarship rules may be obtained from the Graduation and Academic Records Office, 264 Schmitz.

The following letter grades also may be used:

- **N In Progress** — Indicates that the student is making satisfactory progress and a final grade will be given at the end of the quarter the work is completed. Used only for thesis, research, and hyphenated courses (courses not completed in one quarter) and courses numbered 600, 601, 700, 750, and 800. An “N” grade carries with it no credit or grade until a regular grade is assigned.
- **I Incomplete** — An Incomplete is given only when the student has been in attendance and has done satisfactory work until within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student’s control. A written statement of the reason for the giving of the Incomplete, listing the work which the student will need to do to remove it, must be filed by the instructor with the head of the department or the dean of the college in which the course is given.

To obtain credit for the course, an undergraduate student must convert an Incomplete into a passing grade no later than the last day of the next quarter. For Spring Quarter, the following quarter is considered to be Fall Quarter. The student should never reregister for the course as a means of removing the Incomplete. An Incomplete grade not made up by the end of the next quarter is converted to the grade of 0.0 by the Office of the University Registrar unless the instructor has indicated, when assigning the Incomplete grade, that a grade other than 0.0 should be recorded if the incomplete work is not completed. The original Incomplete grade is not removed from the permanent record.

An instructor may approve an extension of the Incomplete removal deadline by writing to the Graduation and Academic Records Office no later than the last day of the quarter following the quarter in which the Incomplete grade was assigned. Extensions, which may be granted for up to three additional quarters, must be received by the Office of the University Registrar before the Incomplete has been converted into a failing grade. In no case can an Incomplete received by an undergraduate be converted to a passing grade after a lapse of one year.

In no case shall an Incomplete on the record at the time a degree is granted be subsequently changed to any other grade.

An Incomplete grade does not count for registered hours nor in computation of grade-point averages.

For DL-suffix courses that do not follow the quarter schedule, an Incomplete shall be given only when the student has done satisfactory work to within two weeks of the maximum term for completion of the course, as specified at the time of registration. In order to obtain credit for the course, a student must convert an Incomplete into a passing grade by the end of the quarter following the one in which the Incomplete was given. All other provisions and deadlines of subsections a. through d. shall also apply.

- **S Satisfactory grade** for courses taken on a satisfactory/not-satisfactory basis — An S grade is automatically converted from a numerical grade of 2.0 or above for undergraduates. The grade S may not be assigned directly by the instructor, but is a grade conversion by the Office of the University Registrar. Courses so graded can only be used as free electives and cannot be used to satisfy a University, college, or department course requirement. S is not computed in GPA calculations.
- **NS Not-satisfactory grade** for courses taken on a satisfactory/not-satisfactory basis — A grade less than 2.0 for undergraduates is converted to NS. NS is not included in GPA calculations. No credit is awarded for courses in which an NS grade is received.
- **CR Credit awarded** in a course offered on a credit/ no-credit basis only or in courses numbered 600, 601, 700, 750, and 800 — The minimum performance level required for a CR grade is determined, and the grade is awarded directly, by the instructor. CR is not computed in GPA calculations.
- **NC Credit not awarded** in a course offered on a credit/ no-credit basis only or in courses numbered 600, 601, 700, 750, and 800 — The grade is awarded directly by the instructor and is not included in GPA calculations.
- **RD Registrar Drop** for a drop made after the second week of the quarter, whether made during the quarter (current quarter drop) or after the quarter (former quarter drop), as well as complete withdrawal from the University. An official withdrawal is not computed in GPA calculations. Students who do not officially drop a course(s) will receive a grade of 0.0. For DL-suffix courses that do not follow the quarter schedule, the grade RD shall be assigned to any course dropped after the fourteenth calendar day after the start of the course and more than two weeks before the end of the maximum term for completion of the course, as specified at the time of registration. The date of withdrawal shall be noted on the transcript.

Nontraditional Grading Options

Credit/No Credit—Only as a Course Option

With appropriate departmental review and approval, a course may be offered on a credit/no credit-only basis. The standard for granting credit in credit/no credit-only courses under this option is the demonstration of competence in the material of the course to the instructor’s satisfaction.

Satisfactory/Not-Satisfactory Grading Option

You may elect to take certain courses on a satisfactory/not satisfactory (S/NS) basis.

When registering through Personal Services on MyUW, select the Grade Option box to select S/NS grading option. The S/NS grade option can be elected through the day shown on the academic calendar for the current quarter. NO EXCEPTIONS. A \$20 fee is charged beginning the eighth calendar day of the quarter.

As an undergraduate, a course in which an S is earned may not be used to satisfy any department, college, or University requirement, except that the credits may be applied to the minimum of 180 credits required for graduation. Each instructor will report numerical grades to the Registrar, who will convert satisfactory grades (2.0 or greater) to S, and unsatisfactory grades (less than 2.0) to NS for the student’s transcript. No more than 25 S/NS credits may apply toward an undergraduate degree.

If you are a graduate student and earn grades of 2.7 or above, you will receive a grade of S while 2.6 or below are recorded as NS. With the approval of your graduate program adviser or the Supervisory Committee Chairperson, you may elect to take any course for which you are eligible outside of your major academic unit on an S/NS basis. In cases of withdrawal, the W is recorded. Neither S nor NS is included in the grade-point average.

Grade-Point Average (GPA)

The University’s cumulative GPA is based solely on courses taken in residence at the UW; this includes some, but not all, courses taken through UW Extension. The UW transcript also reflects grades for UW Extension course

work that is not residence credit, and the grades for credit by examination. These latter grades do not affect the University cumulative GPA.

Computation of GPA

The GPA for graduation is computed by dividing the total cumulative grade points by the total graded credits attempted for courses taken in residence at the University. Grade points are calculated by multiplying the number of credits by the numeric value of the grade for each course. The sum of the grade points is then divided by the total graded credits attempted. Courses elected on an S/NS basis are counted as follows: Satisfactory grades are printed on the permanent record as an S and do not count in the quarterly or cumulative GPA, but they do count as credits earned toward graduation. Not-satisfactory grades, NS, do not count in the quarterly and cumulative GPA and do not count as credits earned toward graduation.

EXAMPLE 1

Course	Credits	Grade	Grade Points
CLAS 205	3	CR	
OCEAN 101	5	2.7	= 13.5
HIST 111	5	4.0	= 20.0
SCAND 100	2	3.3	= 6.6
Total credits earned toward graduation	15		
Total graded credits attempted	12		40.1

$$\text{GPA} = 40.1 \div 12 = 3.34$$

The total graded credits attempted, not the credits earned toward graduation, are used in computing the GPA.

EXAMPLE 2

Course	Credits	Grade	Grade Points
ENGL 121	5	2.3	= 11.5
OCEAN 101	5	0.0	= 0.0
SPHSC 100	3	2.7	= 8.1
ART 121	5	I	= 0.0
Total credits earned toward graduation	8		
Total graded credits attempted	13		19.6

$$\text{GPA} = 19.6 \div 13 = 1.51$$

The student attempted 18 credits, but only 13 are graded, because the Incomplete (I) is not computed in the GPA. The 0.0 for OCEAN 101 is computed in the GPA, but no credit is awarded toward graduation.

If the work in ART 121 is not made up by the end of the next quarter, the I is converted to a numeric grade and the GPA is recomputed.

Repeating Courses

Undergraduates

With the approval of the academic department offering the course, an undergraduate may repeat a course once. Both the original grade and the second grade are computed in the GPA but credit is allowed only once.

Veterans receiving benefits must receive approval from the Veterans Center before a course is repeated.

Graduates

Graduate students may repeat any course. Both the original grade and the second grade are computed in the GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once. Veterans receiving benefits must receive approval from the Veterans Center before a course is repeated.

Grading Procedures

Change of Grade

Except in case of error, no instructor may change a grade that he or she has turned in to the Registrar. Grades cannot be changed after a degree has been granted.

Grade Appeal Procedure

A student who believes he or she has been improperly graded must first discuss the matter with the instructor. If the student is not satisfied with the instructor's explanation, the student, no later than ten days after his or her discussion with the instructor, may submit a written appeal to the chair of the department, or in a non-departmental college, to the dean, with a copy of the appeal also sent to the instructor. Within ten calendar days, the chair or dean consults with the instructor to ensure that the evaluation of the student's performance has not been arbitrary or capricious. Should the chair believe the instructor's conduct to be arbitrary or capricious and the instructor declines to revise the grade, the chair (or the dean in a non-departmental school or college), with the approval of the voting members of his or her faculty, shall appoint an appropriate member, or members, of the faculty of that department to evaluate the performance of the student and assign a grade. The dean and Provost should be informed of this action.

Once a student submits a written appeal, this document and all subsequent actions on this appeal are recorded in written form for deposit in a department or college file.

Grade Reports

Grades are not mailed. You may display and print a grade report through MyUW.

PROCEDURES AND FEES

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student's dean or with the Vice Provost for Student Life in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

Registration

www.washington.edu/students/reg/regelig.html

Instructions for registration are available on MyUW (myuw.washington.edu). Notification is e-mailed to each student quarterly with information about registration for the next quarter.

Registration Period I

www.washington.edu/students/reg/addpolicy.html

Designed to accommodate currently registered matriculated students and students eligible to register under the Quarter Off Eligibility Policy, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students registering for autumn quarter do so in spring quarter.

Registration Period II

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this period. Students who have not completed their initial registration by the end of this period (update and selection of address information, insurance/optional charges, and ASUW membership) are charged a Late Registration Fee.

Registration Period III

All students may register or make course changes during this period. Dropped courses do not appear on the transcript. Students are charged a Change of Registration service fee for registration changes made after Period III. One fee is charged for all changes occurring during the same day. A tuition forfeiture is charged for total credit reductions after Period III if applicable. See Fee Forfeiture section.

Late Add Period

All students may register or make registration changes during this period. All added courses require an entry code or faculty number. A Change of Registration service fee is charged.

Unrestricted Drop Period

www.washington.edu/students/reg/wdpolicy.html

Courses dropped during this period will not appear on the transcript. A Change of Registration fee is charged.

Late Course Drop Period (Current Quarter Drop)

Students may drop one course each academic quarter after the fourteenth calendar day of the quarter through the online registration system. Students are allowed to drop more than one course through the adviser-assisted course-drop process. All course drops made during the Late Course Drop Period are recorded on the transcript with an RD. A Change of Registration service fee is charged.

Credits Required for Full- or Half-Time Status Requirements

www.washington.edu/students/reg/regpol.html

Some agencies require that a student have full-time status to receive maximum benefits. To be classified as a full-time student by the University, a professional or undergraduate student must register for and complete at least 12 credits per quarter and a graduate student must register for and complete at least 10 credits per quarter. To be classified as a half-time student by the University, a professional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

Restrictions on Attending Classes

www.washington.edu/students/reg/regpol.html

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered. An instructor may allow a student to attend his or her class only if the student's name is on the official class list from the Office of the University Registrar. An unregistered student may attend through the fourteenth calendar day of the quarter if the student is on an official wait list for the course.

Adding Courses/Permission Guidelines

www.washington.edu/students/reg/regopt.html

For reasons of public safety and instructional quality, it is important to limit course enrollment to the approved classroom capacity. The Office of the University Registrar monitors course enrollment and accepts student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, departments may choose to overload courses up to 115% of the room capacity to offset anticipated student course drops and withdrawals as demonstrated by past registration activity. Students must secure entry codes from instructors or departments to add closed courses. However, if enrollment is at 115% of room capacity, registration requests are denied. Students

should be informed when receiving entry codes to overload courses that registration is not guaranteed if enrollment exceeds 115% of room capacity. If centralized room-capacity records do not correctly reflect the actual seating capacity, notification should be made to the Room Assignments/Time Schedule Office in the Office of the University Registrar.

2. Students may add courses during the Late Add Period or through the twenty-first calendar day of the quarter. Adds after the seventh calendar day of the quarter require an entry code or faculty number. Departments may also add students to departmental courses during this period through departmental registration screens. To add courses after this period, students must submit a faculty-approved Late Add Petition form to the Registration Office.
3. A course may not be changed to or from an audit registration after the first two weeks of the quarter. See below for transcript entry.

Dropping a Course

www.washington.edu/students/reg/wdpolicy.html

Students dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh weeks of the quarter is recorded on a student's transcript with a W grade and a number designating the week of the quarter in which the course drop was transacted. Only one drop after the fourteenth day of a quarter is permitted each academic year (autumn through summer quarter). A student who does not officially drop a course through the registration system or the offering department is given a grade of 0.0.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz, 206-543-6101, before dropping a class because it may affect their eligibility.

Students receiving veterans' benefits should contact the UW Veterans Center, 520 Schmitz, when dropping courses.

Complete Withdrawal from the University for a Registered Quarter

www.washington.edu/students/reg/wdoffleave.html

Once registered, a student must officially withdraw if he or she later chooses not to attend the University for the registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To withdraw from a quarter, students may drop all their courses via the online registration system prior to the Late Course Drop Period.
2. To withdraw from a quarter during the Late Course Drop Period, students should use the adviser-assisted drop process listed above under 'Dropping a Course.'
3. Students who drop the last course on their schedules will be considered withdrawn for the quarter. Students who drop courses beginning the eighth calendar day of the quarter are charged a Change of Registration service fee per day for any course drops.
4. Submission of a graduate On-Leave application does not constitute official withdrawal from the University. Refer to the grading section in the Graduate School: Graduate Study section.
5. Students receiving veterans' benefits should immediately notify the Veterans Center of withdrawal.
6. Students with a scholarship or loan awarded through the University should notify Student Fiscal Services.
7. Students who withdraw due to conscription into the armed forces or who are called to active duty military service may be entitled to either a full refund of tuition and fees or academic credit, depending on when in the quarter official withdrawal occurs. Students should contact the Registration Office for complete information.

ADDITIONAL INFORMATION

Address Change

www.washington.edu/students/reg/address.html

Students are responsible for notifying the Office of the University Registrar when their address changes. Individual addresses may be viewed and updated through MyUW. A confirmation message will be sent to the student's e-mail address. The mailing of notices to the last address on record constitutes official notification.

Residence Classification Requirements

www.washington.edu/students/reg/residency.html

Residence classification information is available from the Graduation and Academic Records Office, 264 Schmitz.

Student Identification Cards

www.washington.edu/students/reg/id.html

All new students should go to the Husky Account and ID Card Center, Ground Floor, Odegaard Library, to be issued a permanent student identification card. Photo identification (such as a driver's license, state ID card, or passport) is required to obtain a student ID card. Returning students who have not retained a previous ID card should obtain a new one. The student ID card is used for a variety of campus services. It is the student's means of identifying his or her status as a student at the University.

Registered students whose ID cards have been lost or stolen can have them replaced at the Student ID Card Center. Students who request such replacement are charged a nonrefundable fee. Replacement of cards made invalid by changes in a student's name or rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Husky Account and ID Card Center. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved, and the incident may be referred to the Office of the Vice Provost for Student Life for appropriate University action.

Transcripts

www.washington.edu/students/reg/transcripts.html

Official copies of student academic records at the UW must bear the official seal of the University, the signature of the Registrar, and the date of issue.

Transcript Fee

A charge of \$11 is required for each transcript.

Transcripts from Other Schools

A transcript covering a student's previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

Veterans and Children of Totally Disabled Veterans and Personnel in the Armed Forces

Information on educational benefits and tuition reduction programs for veterans and their dependents is available from the Veterans' Center, 520 Schmitz. Veterans and members of the armed forces who apply for admission to the University are subject to the same minimum requirements as regular students and are expected to enroll in accordance with University requirements.

The University's academic programs of study are approved by the Washington State Higher Education Coordinating Board's State Approving Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10 USC.

TUITION, FEES, AND SPECIAL CHARGES

Estimated Expenses

The University's official estimated expenses calculator is at <https://www.washington.edu/opb/tuition-fees/estimated-annual-cost-of-attendance-for-first-year-undergraduates/>.

New Undergraduates — New Student Enrollment and Orientation Fee

As a new undergraduate, you must return the Enrollment Confirmation Form and the \$347 nonrefundable New Student Enrollment and Orientation Fee (NSEOF) to confirm your intention to enroll at the University of Washington. If you have applied for financial aid and you and your family cannot afford the \$272 NSEOF, you may apply for a fee deferral. Write to the Office of Admissions; include your name, student number, phone number, and reason for the deferral. Send your letter, along with the Enrollment Confirmation Form. Any deferral will be conditional on the verification of your financial aid status.

Returning Undergraduates, Graduates and Professional Students — \$100 Enrollment Confirmation Deposit

Returning undergraduates, new graduate students, and new students in a professional program are required to confirm his or her intention to enroll by paying a nonrefundable \$100 Enrollment Confirmation Deposit (not required of students admitted summer quarter). The \$100 is applied toward tuition and fees assessed for the quarter for which the student is determined to be admissible and subsequently enrolls. A student who pays the fee for a given quarter but does not register in that quarter is not entitled to a refund except by petition in the situation listed below.

1. A new or returning matriculated student who is unable to obtain courses required for the completion of the degree or certificate program, or courses which are determined by an appropriate academic adviser to be acceptable alternate courses. A written verification from the appropriate academic adviser must be attached to this petition. Such requests for refund must be submitted by Friday of the second week of the quarter. A new or returning matriculated student who, after meeting with an appropriate academic adviser, determines that the program for which admission was granted differs substantially from what the student was led to expect based upon earlier available information. This petition for refund must be submitted before the student registers for courses and in no case later than the first day of the quarter for which admission has been granted. A written verification from the appropriate academic adviser must be included.
2. A new or returning student who applies by the prescribed deadline for financial aid administered by the University's Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University. This petition and a copy of the Notice of Award and Acceptance must be submitted no later than two weeks after receipt of notice of the financial aid award.
3. A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or into civil duty. Documentation is required.

Fee Payment

f2.washington.edu/fm/sfs/

An obligation to pay tuition and fees in U.S. dollars is incurred when a student registers. A fee statement is mailed to the student's address on file with the Office of the University Registrar.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in a late payment charge. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The Student Guide should be consulted for fees and fee payment schedule applicable to summer quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany

the payment. In the absence of instructions, the University makes a reasoned interpretation of the student's intent and accounts for the funds accordingly. The student number must be specified on all payments.

Fees listed above do not apply to students registered through UW Professional and Continuing Education.

Special Course and Laboratory Fees

The amounts listed above cover normal University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

Other Fees

- **Auditors:** There is no reduction in fees for auditors.
- **Admission Application Fees:** Graduate, \$85 (online); Medicine, Dentistry, \$35; Law, \$60. Former students returning in the same classification, \$80.
- **On-Leave Registration Fee:** This fee of \$25, charged to graduate students only, provides for a maximum on-leave period of four successive academic quarters or any part thereof and is not refundable.
- **Late Registration/Reregistration Fees:** A late registration service charge of \$25 is assessed when a student registers after the last scheduled day of Period II registration and through the fourteenth day of the quarter. Students registering after the fourteenth day pay a \$75 Late Registration Fee. Waiver or refund of the Late Registration Fee may be petitioned in the Registration Office. Waiver or refund of the \$75 reregistration fee may be petitioned in the Student Fiscal Services Office.
- **Change of Registration Service Fee:** A charge of \$20 is made for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter.
- **Transcript Fees:** A charge of \$11 is required for each transcript. Additional costs may apply, depending on the type of transcript requested.
- **Replacement Fees:** Duplicate diploma, \$20; student identification card, \$10.
- **U-PASS Fee:** The U-PASS is valid on all Metro and Community Transit routes at all times and provides parking privileges to carpoolers, riding privileges to vanpool and Night Ride passengers, and merchant discounts. The quarterly fee of \$80 (subject to change) is included on the tuition bill.

All fees are subject to change without notice.

Cancellation of Tuition

Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

Continuing Students

1. A student who withdraws on or before the seventh calendar day of the quarter does not pay tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition.
3. A student who withdraws after the thirtieth calendar day must pay full tuition.

New and Returning Students

1. A student who withdraws on or before the seventh calendar day forfeits the \$347 New Student Enrollment and Orientation fee or the \$100 Enrollment Confirmation Deposit but does not pay the regular tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.
3. A student who withdraws after the thirtieth calendar day of the quarter must pay full tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.

Fee Forfeiture

A student who does not completely withdraw but drops one or more courses may be eligible for lower tuition, depending on the total number of credits remaining after the course drop and on the time period when the drop was made. Tuition for students making a course drop on or before the seventh calendar day of the quarter is determined by the total credits remaining. Tuition for students making a course drop after the seventh calendar day through the thirtieth calendar day of the quarter is computed on the total credits remaining plus one-half the difference between the old tuition and the new tuition. There is no cancellation or reduction in tuition for courses dropped after the thirtieth calendar day of the quarter.

Fee Refund

When a fee payment is made by check, a waiting period is required before a refund can be authorized. An application for refund may be refused, unless it is made during the quarter in which the fees apply. A student who withdraws for disciplinary reasons forfeits all rights to refund or cancellation of any portion of his or her fees.

Financial Obligations

The Comptroller is authorized under certain circumstances to place a hold (administrative) on the records of any student who fails to pay amounts due the University.

Until this hold is cleared, the University (1) does not release the student's record or any information based upon the record, (2) does not prepare transcripts or certified statements, and (3) denies registration.

In cases of serious financial delinquency, the Comptroller, with the consent of the University Registrar, may order that a student's registration be canceled and that privileges of attendance be withdrawn.

An administrative hold or cancellation also may occur when a student has not complied with other University rules, procedures, or obligations. The hold may be placed on the student's record by the authorized University office responsible for enforcement of the rule, procedure, or obligation involved. The student is not permitted to register for any subsequent quarter or to obtain a transcript of his or her record or a certified statement except on the written release of the office that placed the hold.

Tuition Exemptions and Reductions

www.washington.edu/students/reg/tuition_exempt.html

Faculty, Staff, and Washington State Employee Tuition Exemption Programs

Eligible faculty, staff, and state employees admitted to the University may request an exemption for a maximum of 6 credits each quarter under these tuition exemption programs. Applicable tuition will be charged for credits that exceed the 6-credit limit. Because such students are registered on a space-available basis, they must register after other students. The quarterly Time Schedule lists registration dates when students enrolling under these exemption programs may register. Eligibility information may be obtained from either the Professional & Organizational Development Office, or the Registration Office.

"Access" Program for Older Adults

www.washington.edu/students/reg/access.html

The UW allows Washington residents who are 60 years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access Program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit, participate in discussions, complete laboratory work, or take examinations.

Tuition Reductions

The following categories of students may be eligible for reduced tuition and fees. Students in these categories may contact the offices shown for information or to obtain an application. The reductions are established by legislative mandate and may be revoked by the legislature at any time.

STUDENT LIFE AND STUDENT SERVICES

Freshman Convocation

Freshman Convocation is an academic ceremony involving the President of the University, other administrators, student leaders, and members of the Board of Regents and the faculty, to welcome and honor new freshmen and their families. It is held annually on the Sunday preceding the first day of autumn quarter. The President presides over the ceremony, which features remarks by a distinguished member of the faculty. Neither tickets nor reservations are required for the Convocation. Formal invitations are mailed in mid-August. A no-host brunch, which requires tickets, is held in the Student Union Building (HUB) and precedes the Convocation.

Student Health Insurance Program

An accident and sickness insurance plan is available to matriculated University students (Seattle campus) and dependents on a voluntary basis. A student may enroll in the plan at the time of registration through the seventh calendar day of each quarter. The appropriate premium is paid by the quarterly tuition due date. Brochures describing the insurance eligibility, coverage, and costs are available at the Office of Business Services and Student Insurance, Hall Health Primary Care Center, and the HUB.

The University also sponsors a field-trip accident insurance plan. Application forms may be requested from the Risk Management Office, 22 Gerberding, Box 351276, (206) 543-3419.

Insurance for Foreign Students

All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, proof of which must be furnished to the International Services Office and for which an insurance waiver must be obtained. To avoid cancellation of registration, international

students must pay tuition and either pay for the University-sponsored insurance or have a waiver on file by the tuition due date.

International Services Office

The International Services Office provides assistance to international students, scholars, and faculty in meeting United States Immigration and Naturalization Service regulations dealing with such matters as maintaining lawful status, extensions of stay, transfers of schools/programs, and working authorizations. The office also provides a formal orientation to the campus and community for new international students and visiting faculty; advice and counsel for educational, financial, and personal problems; and dissemination of important and timely information through newsletters and workshops. The office is located in 459 Schmitz, (206) 543-0841.

UW Veterans' Center

The Veterans' Center, 520 Schmitz, assists students eligible for veterans' educational benefits.

Office of Student Financial Aid

The Office of Student Financial Aid, 105 Schmitz, administers federal, state, and private financial aid programs designed to help form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. Information describing the different programs, eligibility criteria, and application procedures may be viewed at www.washington.edu/students/osfa or may be obtained by calling (206) 685-9535. To be eligible for financial aid, an individual must be a citizen or permanent resident of the United States and be admitted to the University as a matriculated, degree-seeking student. Priority consideration is given to students who apply before the University's financial aid application deadline of February 28 (e.g., February 28, 2014, for the academic year beginning in September 2014).

The Office of Student Financial Aid also administers a short-term loan program for full-time students who find themselves in temporary financial difficulty. University students may take advantage of the short-term loan program without applying for financial aid.

Student Legal Services

Student Legal Services (SLS) provides legal advice, counseling, negotiating, and court representation in many civil and criminal matters. All currently enrolled undergraduate and graduate students at UW Seattle are eligible for a free initial consultation. If additional services are needed, there is an hourly charge, plus an office supply fee. Students are responsible for court costs, if any. The office is staffed by third-year law students supervised by licensed attorneys.

Student Publications

The Daily is published Monday-Friday throughout the academic year and is distributed in the mornings on campus without charge. During summer quarter, The Daily is published once a week. Any student with an interest in journalism may serve on The Daily staff.

Student Union Facilities

The Husky Union Building (Student Union Building) and the South Campus Center are the principal centers of student activities and programs on the campus.

Husky Union Building

The Husky Union Building (HUB), located in the center of campus, is currently undergoing renovation, to reopen in autumn quarter 2012. Most of the offices that resided in the HUB have relocated to Condon Hall during construction.

South Campus Center

The South Campus Center, located on the shore of Portage Bay, serves as the central meeting place for students and faculty on the southern end of campus. Facilities and services similar to those in the HUB are available and include meeting and conference rooms, display cases, a hair-styling shop, amusement games, a cash machine, a branch of the University Book Store, a newsstand, and lounges with beautiful views of Portage Bay.

Student Activities and Organizations

Student Activities Office

The services provided by the Student Activities Office (SAO) include assisting student organizations in understanding University policies and procedures, providing technical help in the planning and conduct of student events, and furnishing information and assistance in order that they may represent themselves and their interests in an effective manner. Advisers are available to assist students involved in group activities with budget and program planning, advertising, orientation to campus resources, and leadership and organizational skill development. Underlying the SAO service functions is a desire to provide an environment in which students can learn from their experiences in extracurricular activities as a supplement to their classroom experiences. Additional information about the services is available from the Student Activities Office, 232 HUB, (206) 543-2380.

Student Organizations

Students at the University are encouraged to become active in at least one of the campus's approximately 450 voluntary student organizations, which include honorary, professional, and social organizations; service clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, 232 HUB, (206) 543-2380.

Associated Students of the University of Washington

The Associated Students of the University of Washington (ASUW) is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW's annual budget is supported by the services and activities fees paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of directors elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include the Experimental College, a bicycle repair shop, and an ongoing film and entertainment series. Questions regarding the ASUW and its services should be directed to either the ASUW Office, 121/131 HUB, (206) 543-1780, or the Student Activities Office, 232 HUB, (206) 543-2380.

Recreational Sports

The Department of Recreational Sports Programs provides a comprehensive program of more than seventy sports and fitness activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities Building (IMA), Golf Driving Range, Waterfront Activities Center (canoe rentals), outdoor facilities (Denny Field and tennis courts), Hutchinson Hall swimming pool and locker rooms, and the practice Climbing Rock. Programs and facilities are open to students with a valid student identification card (Husky card). For additional information visit the Recreational Sports website at depts.washington.edu/ima/.

Student Rights and Responsibilities

Student Conduct Code

The University Board of Regents has adopted a Student Conduct Code, which applies to both the academic and nonacademic conduct of students while they are attending the University. The Code specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due-process procedures. Students may obtain copies of the code through either their advisers or the Office of the Vice Provost for Student Life, 101 Gerberding Hall.

Computer Use Policy

All faculty, staff, and students who use any computer at the University are responsible for using computer resources in an ethical and legal manner. For example, it is not appropriate to share computer accounts or use them for

commercial purposes, to send unwanted e-mail, or to distribute copyrighted software, music, or images. Those who do not follow the rules could lose their UW computing privileges. For detailed information see www.washington.edu/itconnect/policy/.

University Policy on Student Education Records

A copy of the University's policy on a student's right to inspect his or her education records and the University's responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available at the Registration Office, 225 Schmitz.

Sexual Harassment Complaint Procedure

Students, staff, faculty, and other users of University services who have a concern or complaint regarding sexual harassment may contact either the University Ombudsman, (206) 543-6028, or the University Complaint Investigation and Resolution Office, (206) 616-2028. Personnel in these offices provide assistance in resolving concerns and complaints. Also, University staff may contact their human resources representative about sexual harassment concerns.

Office of Minority Affairs and Diversity

Fostering diversity is the ongoing work of the entire University, but it is a special responsibility of the Office of Minority Affairs and Diversity (OMAD). To this end, OMAD provides a variety of services to undergraduates from

underrepresented and economically and educationally disadvantaged backgrounds. These services include a statewide Recruitment and Outreach Office whose staff provides assistance with the admissions and financial aid process in high schools and community colleges throughout Washington state. Through its Counseling Center, OMAD offers academic advising, financial aid advocacy, housing assistance, and other services related to life on campus. OMA's services are available mainly to students who, following admission, are invited to become members of the Educational Opportunity Program (EOP). Participation in EOP is limited to students who are U.S. citizens or permanent residents, with priority given to Washington state residents. OMAD's other services are open to EOP participants and other students as resources permit.

The Office of the Vice President for Minority Affairs and many of OMAD's services are located on the third floor of Schmitz Hall. For information about OMAD's program locations and services, call (206) 685-0774.

Residence Halls

Students like the convenience of living in the residence halls (being close to classes and having access to a variety of dining options), but that's just the beginning. Those who live on campus are part of a community that offers opportunities for fun, friendships, personal development and academic success.

Undergraduate Study

Office of Undergraduate Academic Affairs

www.washington.edu/uaa/

The University of Washington established the Office of Undergraduate Academic Affairs (UAA) in 1992 (as the Office of Undergraduate Education) in order to make undergraduate education a more visible and central part of the University's work and purpose. UAA offers opportunities and resources for students and their families, faculty members, and academic departments and programs. UAA's unique mission of ensuring excellence in undergraduate teaching and learning is critical to the University's commitment to providing students a rich academic experience.

Individualized Studies

www.washington.edu/students/gencat/academic/indivstudies.html

Individualized Studies provides students an opportunity to obtain an individually designed interdisciplinary degree through the College of Arts and Sciences. Students may also pursue a major in one of several existing interdisciplinary programs. Requirements for the Bachelor of Arts or Bachelor of Science degree are shown in the Arts and Sciences section of this catalog.

Undergraduate Majors

www.washington.edu/students/ugrad/advising/maimenu.html

To graduate from the UW, students must complete one of the majors listed below. In many cases, the student need not make a final choice until the beginning of the junior year, although programs with considerable mathematics and science (e.g., engineering and premedicine) include lock-step requirements that must be started early on if the student expects to finish in four years.

Students can enter some majors directly (e.g., those in Ocean and Fishery Sciences, most in Forest Resources, and some in Arts and Sciences), but most students start out as premajors. As premajors, they take courses to fulfill general requirements and admission requirements for the major. Many majors require one or two years of pre-admission course work, although a few require more. Admission to many majors is competitive, which means students may not be accepted even if they complete all the prerequisite course work, depending on their grades and other factors.

The General Catalog shows requirements for all majors, but students should see an adviser to ask about changes, course sequences, or new options.

Satisfactory Progress

www.washington.edu/students/reg/satprog.html

Students admitted to the University to pursue baccalaureate degrees are expected to make satisfactory progress toward the attainment of the degree and are expected to enter a major and to graduate after completion of a reasonable number of credits. By the time undergraduate students have completed 105 credits, they must either be accepted in their major or have their premajor status extended temporarily by an adviser. Extensions are normally granted only to students who are in the final phases of completing admission requirements for a major to which they have a reasonable chance of acceptance.

Students who do not either declare a major or have their premajor status extended by the time they have earned 105 credits will have a "hold" placed against registration for the following quarter. Students must normally graduate with their first baccalaureate degree by the time they have completed 30 credits beyond the credits required for the first degree or concurrent degrees. Departmental advisers may grant extensions beyond the 30-credit limit.

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree. Students admitted as "postbaccalaureate undeclared" must declare a major by the time they have earned 30 credits beyond their last degree,

and once a degree objective has been declared, must make progress toward that degree as evidenced by the courses they have completed satisfactorily. Advisers may grant extensions beyond the 30-credit limit.

The Faculty Council on Academic Standards may terminate a student's enrollment if the student demonstrates lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. The student may be reinstated with the approval of the student's college and the council. EOP students may be reinstated in consultation with the Office of Minority Affairs and Diversity.

Undergraduate Minors

Undergraduate students have the option of completing a minor. Minors require the completion of at least 25 credits, 15 of which must be taken in residence at the UW. There are no departmental admission requirements for minors. Students may declare an approved minor when they have earned 90 credits or more. A cumulative GPA of 2.00 is required for courses within the minor. Some departments do not offer minors. Requirements for minors established as of spring 2002 are shown in the academic programs section of this catalog. A list of currently offered minors is available at the Undergraduate Gateway Center, 171 Mary Gates Hall.

Undergraduate Degrees

The UW grants the following degrees upon satisfactory completion of appropriate programs of study in the departments, schools, and colleges:

- Bachelor of Arts BA
- Bachelor of Arts in Business Administration BABA
- Bachelor of Clinical Health Services BCHS
- Bachelor of Fine Arts BFA
- Bachelor of Landscape Architecture BLArch
- Bachelor of Music BMus
- Bachelor of Science BS
- Bachelor of Science in Aeronautical and Astronautical Engineering BSA&A
- Bachelor of Science in Bioengineering BSBioE
- Bachelor of Science in Chemical Engineering BSChE
- Bachelor of Science in Civil Engineering BSCE
- Bachelor of Science in Computer Engineering BSCompE
- Bachelor of Science in Construction Management BSCM
- Bachelor of Science in Electrical Engineering BSEE
- Bachelor of Science in Engineering BSE
- Bachelor of Science in Health Information Administration BSHIA
- Bachelor of Science in Human Centered Design BSHSCDE
- Bachelor of Science in Industrial Engineering BSIE
- Bachelor of Science in Informatics BSInfo
- Bachelor of Science in Materials Science and Engineering BSMSE
- Bachelor of Science in Mechanical Engineering BSME
- Bachelor of Science in Medical Technology BSMedTech
- Bachelor of Science in Nursing BS Nurs

Freshmen Interest Groups

A FIG consists of 20–25 freshmen who have similar academic interests and share the same cluster of three or four courses for their first quarter at the UW. The FIG provides both a social support network and a learning community. More than 100 FIGs are offered in the autumn, spanning a range of topics and interests.

Freshman Seminars

Taught by faculty members, many nationally and internationally recognized leaders in their fields, these seminars meet once a week, are limited to 15 students, and are graded credit/no credit. Students can establish a rapport with a professor while learning about different fields of study, all in a low-pressure academic setting.

The University Honors Program offers the best of both worlds: the combined riches of a small learning community and the inexhaustible resources of a large research university.

Phi Eta Sigma

A national freshman honor society with more than 300 chapters and 500,000 lifetime members. The UW chapter focuses on community service, campus service, and membership services.

University Honors Program

The University Honors Program provides a special learning context for high-achieving students looking for a rigorous and enhanced educational experience.

Most Honors students enter the Full College Honors Program as incoming freshmen. This Honors option is a four-year track through our program consisting of an Honors Core followed by Departmental Honors and results in a degree earned "With College Honors." The rest of our students participate only in Departmental Honors (which students enter once they enter their department). Completion of Departmental Honors alone results in a degree earned "With Distinction."

The University Honors Program assists and encourages students to find ways to enrich their education and to create an experience that facilitates their long-term goals. Honors seeks to enhance the already rich experience available at the University of Washington by bringing students and the best opportunities of a large research university into close contact. Honors students benefit from unique opportunities such as:

- Personalized and Comprehensive Honors Advising
- Small, Intensive, Interdisciplinary Honors Classes
- Continuous Contact with Honors Faculty
- Assistance in Finding Appropriate Research and Internship Opportunities
- Bonderman Honors Travel Fellowship
- Mary Gates Research Grants
- Mary Gates Leadership Grants
- Honors Peer Advisers
- Honors Computer Lab

CLUE

The Center for Learning and Undergraduate Enrichment (CLUE) is a free late-night study center. It is designed to provide supplementary educational opportunities for and enhance the academic achievement of all UW undergraduates. The program places a strong emphasis on creating a rich

learning community while supporting freshmen, sophomore, and transfer students who are enrolled in many of the UW's crucial lower-division courses. CLUE services include drop-in help sessions for subjects like chemistry, math, biology, writing, economics, and foreign languages; evening discussion and review sessions with TAs and fellow students; and exam reviews for a variety of courses.

Computing Resources

UW students have access to computers, e-mail, the Internet (in campus labs or from home), MyUW, and other online resources, training, and Web services for publishing. You don't need to buy your own computer, although it's recommended. Regardless of your major or future career plans, learning how to navigate campus computing resources— and to make the most of them— will be a significant part of your UW education.

Educational Opportunity Program

EOP provides educational opportunity and creates greater cultural diversity within the University. The program is open to underrepresented minority students from American Indian, Native American, African-American, Hispanic, and Asian/Pacific Islander backgrounds, and to economically disadvantaged students of all ethnicities whose parents do not have 4-year college degrees. EOP services include academic and personal counseling, advocacy and support with financial aid and housing, placement testing, academic tutoring, and special instruction.

Libraries

The University of Washington Libraries received the 2004 Excellence in Academic Libraries Award, which recognizes the top university research library in the country. UW Libraries rank 12th among North American research libraries. Here are some more numbers: 5.9 million volumes, 6.9 million items in microform, and more than 50,000 periodical titles. Impressive, but what does all of this mean to you? Simple: the chance to explore to the fullest extent of your interest and imagination. And in the process, you'll be acquiring valuable skills for navigating and analyzing information. There's no more important skill in the 21st century.

Women's Center

Located in historic Imogen Cunningham Hall, the Women's Center offers classes, workshops, and events. The Re-Entry Program offers free services to women and men who are considering returning to the University after a significant time away or who, for whatever reason, feel they need additional support and advice in making the transition into higher education.

The Graduate School: Graduate Study

www.grad.uw.edu

The University of Washington offers more than 110 graduate degrees through 370 graduate programs across all three UW campuses and online, from master's degrees for people launching or continuing their careers to doctoral degree programs for those pursuing academic, research or professional careers. The Graduate School manages graduate education from application through graduation for all UW degree programs, with the exception of the M.D., D.D.S., J.D. and Pharm.D. A list of graduate degrees offered is below.

Guided by the dean and vice provost, the Graduate School serves approximately 14,000 graduate students a year. The Graduate School processes nearly 30,000 applications and grants about 4,300 degrees each year, in addition to ensuring compliance with the University's policies concerning graduate education.

Interdisciplinary Programs

The Graduate School is home to several interdisciplinary degree programs, including a master's degree in Museology and PhD.s in Urban Design and Planning, Neuroscience and Molecular and Cellular Biology. Interdisciplinary programs draw together faculty from various disciplines to create new fields of study and provide research and education.

Student Success and Diversity

The Graduate School creates endowments and oversees fellowships and awards totaling approximately \$11 million a year. To help programs attract students, the Graduate School provides about \$1.3 million a year in recruitment funding. In addition, GO-MAP (the school's Graduate Opportunities & Minority Achievement Program) awards about \$600,000 a year to approximately 25 departments so they can recruit graduate students from diverse backgrounds. The Seattle chapter of Achievement Rewards for College Scientists Foundation (ARCS) is a steadfast supporter of graduate education at the UW as its members fund approximately 90 fellowships worth more than \$500,000 yearly, which aids graduate programs in offering multi-year financial commitments to top recruits.

In support of the University's outreach, recruitment and retention of ethnic minority and other underrepresented graduate students, GO-MAP presents networking and professional development opportunities for graduate students throughout the academic year, in collaboration with graduate programs and campus units. GO-MAP's recruitment efforts include sponsoring a series of Prospective Student Days, in which admitted graduate students visit the Seattle campus as they weigh the UW's offer of admission. The National Name Exchange is a UW Graduate School-coordinated database involving more than 50 institutions nationwide that share names of 7,000 exceptional minority undergraduates who are interested in graduate study.

The Graduate School's Core Programs offers professional development and support for graduate students in the form of workshops, events and online content, such as guides covering how to find a mentor, select a lab and look for a job in academia. Grad School Prep is a for-credit course offered most quarters for undergraduates and returning students who are considering graduate school. The course addresses how to identify graduate programs that fit students' goals and how to craft strong applications.

Quality and Assessment

Academic program reviews ensure that the UW continues to offer innovative, high quality education by reviewing each program – undergraduate and graduate – every 10 years through a streamlined process that encourages strategic planning and can be linked to national accreditation reviews.

The Center for Teaching and Learning is a collaboration of the Graduate School, UW Libraries and Undergraduate Academic Affairs that brings together individuals, departments and communities to share best practices and evidence-based research on teaching, learning and mentoring. The center offers training to graduate students who are teaching assistants and

research assistants, as well as supports and promotes innovation in teaching among the faculty.

Public Scholarship and Outreach

The Graduate School's public lecture series, funded by the Jessie and John Danz, Walker-Ames and Mary Ann and John D. Mangels endowments, shares the UW's academic expertise with general audiences through lectures that are promoted in collaboration with the UW Alumni Association. Lecturers have included educator Geoffrey Canada, author Amy Tan, astrophysicist Neil deGrasse Tyson and statistician Nate Silver.

The UW Press produces award-winning books — for general and academic audiences — that highlight UW research in fields such as the environment, Asian American studies and the built environment. The Press publishes many books on the history, culture and geography of the Pacific Northwest and Seattle.

The Graduate School advocates for graduate education and graduate students on campus and throughout the state through raising money for fellowships and student support, producing online reports on issues and trends in graduate education and highlighting the impact our graduate students and alumni are making in their communities and our state, region and world.

Graduate Degree Programs

College of Arts and Sciences

- | | |
|---|---------------------|
| • Anthropology | PhD |
| • Applied Mathematics | MCFRM, MS, MSc, PhD |
| • Art | MDes, MFA |
| • Art History | MA, PhD |
| • Asian Languages & Literature | MA, PhD |
| • Astronomy | PhD |
| • Biology | PhD |
| • Chemistry | PhD |
| • Classics | MA, PhD |
| • Communication | MA, MC, PhD |
| • Comparative Literature | MA, PhD |
| • Creative Writing | MFA |
| • Dance | MFA |
| • Digital Arts and Experimental Media | PhD |
| • Drama | MFA, PhD |
| • Economics | PhD |
| • English | MA, MAT, PhD |
| • French Studies | MA, PhD |
| • Gender, Women, and Sexuality Studies | PhD |
| • Geography | MA, MGIS, PhD |
| • Germanics | MA, PhD |
| • Hispanic Studies | MA, PhD |
| • History | MA, PhD |
| • International Studies | MAIS, PhD |
| o China Studies | |
| o Comparative Religion | |
| o International Studies | |
| o Japan Studies | |
| o Korea Studies | |
| o Middle East Studies | |
| o Russian, East European, and Central Asian Studies | |
| o South Asian Studies | |
| o Southeast Asian Studies | |
| • Linguistics | MA, MS, PhD |
| • Mathematics | MA, MS, PhD |
| • Music | MA, MMus, DMA, PhD |
| • Near Eastern Languages & Civilization | MA |
| • Philosophy | PhD |

• Physics	PhD
• Political Science	PhD
• Psychology	PhD
• Scandinavian Studies	MA, PhD
• Slavic Languages & Literatures	MA, PhD
• Sociology	PhD
• Spanish and Portuguese	MA, PhD
• Speech and Hearing Sciences	MS, PhD, AudD
• Statistics	MS, PhD

College of Built Environments

• Architecture	MS, MSArch
• Built Environments	PhD
• Construction Management	MSCM
• Landscape Architecture	MLA
• Urban Design and Planning	MSRE, MIPM, MUP

Foster School of Business

• Accounting	MPAcc.
• Business Administration	MSIS, MBA, PhD

School of Dentistry

• School of Dentistry	MSD
• Oral Biology	MS, PhD

College of Education

• College of Education	MEd, MIT, EdD, EdS, PhD
------------------------	-------------------------

College of Engineering

• Aeronautics and Astronautics	MSSA, MAE, PhD
• Chemical Engineering	MSE, MSChE, PhD
• Civil and Environmental Engineering	MS, MSE, MSCE, MST, PhD
• Computer Science and Engineering	MS, PhD
• Electrical Engineering	MSE, MSEE, PhD
• Human Centered Design and Engineering	MSHCDE, PhD
• Industrial and Systems Engineering	MISE, MSIE, PhD
• Materials Science and Engineering	MSMSE, MSE, PhD
• Mechanical Engineering	MSME, MSE, PhD

College of Engineering and School of Medicine

• Bioengineering	MS, PhD
• Medical Engineering	MME
• Pharmaceutical Engineering	MPB

College of the Environment

• Aquatic and Fishery Sciences	MS, PhD
• Atmospheric Sciences	PhD
• Bioresource Science and Engineering	MS, PhD
• Earth and Space Sciences	MS, PhD
• Environmental Horticulture	MEH
• Environmental and Forest Sciences	MS, MFR, PhD
• Marine and Environmental Affairs	MMA
• Oceanography	MS, PhD
• Quantitative Ecology and Resource Management	MS, PhD

The Information School

• The Information School	MSIM, MLIS, PhD
--------------------------	-----------------

Interdisciplinary Degree Programs

• Biology Teaching	MS
• Biological Physics, Structure, and Design	PhD
• Biological Structure	PhD
• Health Services Administration	MHA
• Individual PhD	PhD
• Molecular and Cellular Biology	PhD
• Museology	MA
• Near and Middle Eastern Studies	PhD

• Neuroscience	PhD
• Pathobiology	PhD
• Quantitative Ecology and Resource Management	MS, PhD
• Urban Design and Planning	PhD

School of Law

• School of Law	LLM, PhD
-----------------	----------

School of Medicine

• Biochemistry	PhD
• Bioethics and Humanities	MA
• Biological Structure	MS, PhD
• Biomedical Informatics and Medical Education	MS, PhD
• Comparative Medicine	MS
• Genome Sciences	PhD
• Immunology	PhD
• Laboratory Medicine	MS
• MEDEX Northwest	MCHS
• Microbiology	PhD
• Pathology	MS, PhD
• Pharmacology	MS, PhD
• Physiology and Biophysics	PhD
• Rehabilitation Medicine	MOT, MPO, MS, DPT, PhD

School of Medicine and School of Public Health

• Global Health	MPH, PhD
-----------------	----------

School of Nursing

• School of Nursing	MN, MS, DNP, PhD

University of Washington Bothell

• Business Administration	MBA
• Computing and Software Systems	MSCSSE
• Creative Writing and Poetics	MFA
• Education	MEd
• Interdisciplinary Arts and Sciences	MACS, MAPS, MFA
• Nursing and Health Studies	MN
• Policy Studies	MAPS

University of Washington Tacoma

• Accounting	MAcc
• Business Administration	MBA
• Computer Science and Systems	MSCSS
• Cybersecurity and Leadership	MCL

• Education	MEd, EdD
• Interdisciplinary Studies	MAIS
• Nursing	MN
• Social Work	MSW

Because the following professional doctoral degrees offered by the University are not considered to be graduate degrees, they are not administered through the Graduate School: Doctor of Medicine (MD), Doctor of Dental Surgery (DDS), Juris Doctor (JD), and Doctor of Pharmacy (PharmD).

GRADUATE ADMISSIONS

Additional program information is available on the World Wide Web at www.grad.washington.edu.

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam-era veteran in accordance with University policy and applicable federal and state statutes and regulations.

Application to the UW through the Graduate School is available for three types of students:

A **graduate student** is someone who has been admitted to a specific program and is working toward a master's or doctoral degree, or earning a school administrator's credential.

A **visiting graduate student** plans to transfer a limited number of graduate credits earned at the UW to another institution where he or she is actively pursuing a graduate degree. A certificate of status signed by the home institution is required. The application and certificate are available at www.grad.washington.edu/admissions/visiting.shtml. Individual departments may require additional materials, such as transcripts, GRE/GMAT scores, a statement of purpose or a list of desired course work.

Graduate non-matriculated students are taking courses without seeking a graduate degree. They may apply a maximum of 12 credits to degree requirements at a later time.

Admission to the UW is necessarily a selective process. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or an equivalent degree from a foreign institution. The student's record should be a strong one with an average grade of "B" or a 3.00 grade-point, or better.

The primary criterion and the priority for admission of new applicants into a graduate program is the applicant's ability, as decided by the appropriate faculty, to complete the graduate program expeditiously with a high level of achievement. One aspect of meeting this criterion is the matching of interests between applicants and faculty. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

1. Priority for admission of applicants into a graduate degree program based upon the applicant's apparent ability, as determined by the University, to complete the program with a high level of achievement.
2. No practice may discriminate against an individual because of race, color, creed, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran.
3. Sustained efforts shall be made to recruit qualified applicants who are members of groups that are underrepresented in certain disciplines.
4. All applicants to a degree-offering unit shall be processed through the same set of procedures to assure that all applicants are evaluated on their individual merits.
5. Tests and criteria for admission should relate to the actual requirements of the graduate program. Reasonable accommodation for testing conditions may be made to compensate for relevant disabilities.
6. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors may vary among graduate degree programs. No

factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

- a. Grades earned, especially for subjects in or closely related to the field of the applicant's proposed graduate work.
- b. Scores on the Graduate Record Examination (GRE) verbal, quantitative and analytical tests, on the GRE advanced test, on other tests related to the applicant's field, and on other aptitude tests which may be required.
- c. Personal interviews of the applicant by the department admissions committee.
- d. The career objectives of the applicant and the extent to which the graduate degree program may be expected to prepare the applicant for those objectives.
- e. Written and oral recommendations from persons who are qualified to evaluate the applicant's academic record and promise.
- f. The applicant's degree objective (i.e., master's degree, doctoral degree, or a master's followed by a doctoral degree).
- g. Activities or accomplishments; educational goals; prior employment experience; living experiences, such as growing up in a disadvantaged or unusual environment; special talents.
- h. Academic accomplishments in light of the applicant's life experiences and special circumstances. These experiences and circumstances may include, but are not limited to disabilities, low family income, first generation to attend college, need to work during college, disadvantaged social or educational environment, difficult personal and family situation or circumstances, and refugee status or veteran status.

Importance given to these factors will vary among degree programs.

Each academic program at the UW has a graduate program coordinator who is responsible for providing advice, guidance, and assistance to applicants, as well as to students working toward graduate degrees. Prospective graduate students are urged to contact the graduate program coordinator in their program of interest for information about any aspect of graduate study, including research, curriculum, faculty, and financial support in the form of teaching and research assistantships, grants, and scholarships. Information about graduate programs is available at www.grad.washington.edu.

Admission Process

Information about the application process for both graduate and graduate non-matriculated status must be obtained directly from the department. Visiting graduate applicants should go to www.grad.washington.edu/admissions/visiting.shtml for application information. It is very important to submit all application documents in time to meet departmental deadlines as these will supersede graduate admissions deadlines.

Registration

After successful applicants have been offered admission, the registration office sends a request for an enrollment confirmation deposit to indicate the intent to register. This nonrefundable deposit will apply toward the first quarter's tuition.

Once admitted, graduate students are expected to maintain registered or on-leave status until the degree is conferred. (See section on continuous enrollment.)

Financial Aid for Graduate Students

Students applying for fellowships, traineeships, and assistantships or associateships must make certain that complete transcripts and other credentials are on file by Feb. 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program advisor of the appropriate department.

Fellowships, Traineeships, and Scholarships

A limited number of fellowships, traineeships, and scholarships is available through individual departments to outstanding students in fields of study

leading to advanced degrees. Application forms may be obtained from the graduate program advisors in the departments.

The Graduate School and the UW Libraries have collaborated to provide the Graduate Funding Information Service (GFIS) for UW graduate students (and faculty) who are seeking any type of general research funding for use at the UW. Located in the Research Commons, Allen Library, South Wing, the service works to provide resources for outside funding opportunities to graduate students at the master's and doctoral levels who have been admitted to or who are attending the UW.

The service offers workshops and individual consultations to help students explore resources for potential funding. The service does not provide search services or money directly to students, but does guide students to resources (print, database, or web-based) and helps students better understand how to use these resources.

To set up a consultation, email gfis@u.washington.edu. For drop-in office hours and funding seminar schedules, check www.lib.washington.edu/gfis/events.html.

Work Study Graduate Assistantships

Graduate students who are eligible for the need-based college work-study program may qualify for work study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the Feb. 28 to be considered for these positions. Information is available from the Office of Student Financial Aid.

Employment Opportunities

The campus offers other job opportunities for graduate students. Students may apply directly to the department in which they hope to work or check the Career Center's Husky Jobs website careers.washington.edu/HuskyJobs/Students. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs. Advisory positions in University residence halls paying room and board are available for graduate students. Additional information may be obtained from the Housing and Food Services Human Resources Office, 305 Schmitz Hall, hfsjobs@uw.edu.

Spouses of students also may apply for regular full- and part-time University employment. Job listings are posted at www.washington.edu/admin/hr/jobs/

Loans

Long-term educational loans are available to graduate students through the Federal Perkins Student Loan, the Federal Direct PLUS, and the Federal Direct Unsubsidized Stafford Loan programs. For more detailed information on these loan programs, visit the Office of Student Financial Aid www.washington.edu/students/osfa/. An application form for these programs (the Free Application for Federal Student Aid, or FAFSA) is available at www.fafsa.gov. The priority filing date is Feb. 28 for the following autumn quarter. The Office of Student Financial Aid may be reached at osfa@uw.edu or www.washington.edu/students/osfa/.

Students should meet the priority filing date even if they have not yet been admitted to the Graduate School.

Short-term emergency loan funds also are available through the Office of Student Financial Aid. For information, see their website at www.washington.edu/students/osfa/gradaid/short.term.loans.html

GRADUATE DEGREE POLICIES

Usually focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships and participation in research. Graduate programs leading to the master of arts, master of science or doctor of philosophy degrees emphasize the development of the student's ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many masters and all doctoral programs (excluding practice doctorates) culminate in the presentation of a thesis or dissertation conveying the results of the independent study and research carried out by the student. A master's thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student's field, be presented in scholarly form and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems.

The student must defend the doctoral dissertation in a final examination conducted by a faculty committee and open to all other graduate faculty members. A member of the graduate faculty from some other discipline participates as an official representative of the Graduate School, including various major evaluations such as the general examination and final examination.

Graduate Program Coordinator

The graduate student's initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the graduate faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

Graduate Courses

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate non-matriculated students, and are given numbers from 500 through 801. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only. Courses at the 300 level are not included in the calculation of grade-point average (GPA) and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master's or doctoral degree. Approved 400-level courses are accepted as part of the major, as well as minor or supporting fields. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum 36 offers additional information on graduate courses. With the exception of summer, students are limited to a maximum of 10 credits per quarter of any combination of courses numbered 600, 700 or 800.

Repeating Courses

Graduate students may repeat any course. Both the first and second grades will be included in the cumulative GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once.

Grading System for Graduate Students

In reporting grades for graduate students, graduate degree-offering units shall use the system described herein. Grades shall be entered as numbers, the possible values being 4.0, 3.9, . . . and decreasing by one-tenth until 1.7 is reached. Grades below 1.7 will be recorded as 0.0 by the Registrar and no credit is earned. A minimum of 2.7 is required in each course that is counted toward a graduate degree. A minimum cumulative grade-point average of 3.0 is required for graduation.

Correspondence between number grades and letter grades is as follows:

Numeric Grade Point Equivalent	Letter Grade
4.0	A
3.9	
3.8	A-
3.7	
3.6	
3.5	
3.4	B+
3.3	
3.2	
3.1	
3.0	B
2.9	
2.8	B-
2.7	
2.6	
2.5	
2.4	C+
2.3	
2.2	
2.1	
2.0	C
1.9	
1.8	
1.7	
1.6–0.0	E

The following letter grades also may be used:

- **I Incomplete.** An Incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control. To obtain credit for the course, a student must successfully complete the work and the instructor must submit a grade. In no case may an Incomplete be converted into a passing grade after a lapse of two years or more. An incomplete received by the graduate student does not automatically convert to a grade of 0.0 but the "I" will remain as a permanent part of the student's record.
- **N No grade.** Used only for hyphenated courses and courses numbered 600 (Independent Study and Research), 601 (Internship), 700 (Thesis), 750 (Internship), and 800 (Dissertation). An N grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or Supervisory Committee Chairperson should change the N grade(s) to one reflecting the final evaluation.

- **S/NS Satisfactory/Not-Satisfactory.** A graduate student, with the approval of the Graduate Program Coordinator or Supervisory Committee Chairperson, may elect to be graded S/NS in any numerically-graded course for which he or she is eligible. If a student does not so elect, then he/she will be graded on a numerical basis. If approval is granted the student must elect the S/NS option either when registering or no later than the end of the seventh week of the quarter. The instructor shall submit a numeric grade to the Registrar, who shall convert grades of 2.7 and above to S and grades lower than 2.7 to NS.
- **CR/NC Credit/No Credit.** With the approval of the faculty in the academic unit, any course may be designated for grading on the CR/NC basis by notice in the appropriate Time Schedule. For such courses, the instructor will submit a grade of CR or NC to be recorded by the Registrar's Office for each student in the course at the end of the quarter. All courses numbered 600, 601, 700, 750 and 800 may be graded with a decimal grade, a CR/NC or N at the instructors' option.
- **RD Registrar Drop** for a drop made after the second week of the quarter, whether made during the quarter (current quarter drop) or after the quarter (former quarter drop), as well as complete withdrawal from the University. An official withdrawal is not computed in GPA calculations. Students who do not officially drop a course(s) will receive a grade of 0.0. The date of withdrawal shall be noted on the transcript.

Graduate students who withdraw from the University (dropping all courses for the quarter) during the first week of two consecutive quarters (Summer Quarter excepted) will not be eligible to register as a continuing graduate student for the third quarter. Such graduate students must reapply as former graduate students returning to the University. For example, if a graduate student withdraws during the first week of Spring Quarter and Autumn Quarter, he or she must reapply as a returning former graduate student for Winter Quarter.

Of the minimum credits required for a graduate degree, a graduate student must show numerical grades in at least 18 quarter credits of course work taken at the University of Washington. These numerical grades may be earned in approved 400-level courses and 500-level courses.

A graduate student's grade-point average will be calculated entirely on the basis of number grades in 400- and 500-level courses. The grades of S, NS, CR, NC, and N will be excluded, as will all grades in courses numbered 600, 601, 700, 750, and 800, and in 100- and 200- level courses.

The graduate student may petition the Dean of the Graduate School to modify the procedures described above. The petition should be accompanied by comments and recommendations from the Graduate Program Coordinator or Supervisory Committee Chairperson.

Scholarship

A cumulative GPA of 3.00 or above is required to receive a degree from the Graduate School. A graduate student's GPA is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of S, NS, CR, NC, and N are excluded, as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 GPA, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School. Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

For more information, see Graduate School Memorandum 16:
grad.washington.edu/policies/memoranda/memo16.shtml

Withdrawal Policy

Refer to the University of Washington Time Schedule for procedures and dates, or look on the Web at
www.washington.edu/students/reg/wdoffleave.html

Language Competency Requirements and Examinations

Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly

and research-oriented programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy.

Requirements for foreign-language competence are established by the graduate faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may have special significance to the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University's language-competence requirements in French, German, and Spanish may be satisfied by successful completion of the standardized examinations given by the Educational Assessment Office. Other foreign language examinations are also given at the UW.

It is assumed that citizens of certain English-speaking countries who are admitted to the Graduate School are competent in the English language; citizens of non-English-speaking countries must demonstrate a satisfactory command of English, both for admission and for appointment as teaching assistants.

Refer to Graduate School Memorandum No. 8, English Language Competence for Admission to the Graduate School (www.grad.washington.edu/policies/memoranda/memo08.shtml) and Graduate School Memorandum 15, Conditions of Appointment for TAs Who Are Not Native Speakers of English (www.grad.washington.edu/policies/memoranda/memo15.shtml) for more information.

Enrollment Requirement

The enrollment requirement for the master's degree is 36 credits, 30 of which must be taken at the University of Washington.

For the doctoral degree, the enrollment requirement is 90 credits, 60 of which must be taken at the University of Washington. With the approval of the degree-granting unit, an appropriate master's degree from a regionally accredited institution may substitute for (30 credits) of enrollment. Doctoral Study requires an immersion in an academic field and its intellectual community. Degree-granting units may require a period of full-time and/or on-site study.

Only courses numbered 400, 500, 600, 700, and 800 can be applied to enrollment or course credit in the major field for advanced degrees (please see the Graduate Courses policy regarding courses numbered 499). Courses numbered 300 are not applicable to enrollment or course credit toward advanced degrees except when applied by permission of the graduate program coordinator or supervisory committee toward the graduate minor or supporting courses. Courses numbered below 300 are not applicable to enrollment or course credit for advanced degrees.

Full-Time Enrollment

Full-time quarterly enrollment for graduate students is 10 credits.

Final Quarter Registration

A student must maintain registration as a full- or part-time graduate student at the University for the quarter the master's degree, the candidate certificate, or doctoral degree is conferred. A student who does not complete all degree requirements by the last day of the quarter must be registered for the following quarter.

Continuous Enrollment and Official On-Leave Requirement

Policy

To maintain graduate status, a student must be enrolled on a full-time, part-time, or official on-leave basis from the time of first enrollment in the Graduate School until completion of all requirements for the graduate degree. (Summer quarter on-leave enrollment is automatic for all graduate students who were either registered or officially on-leave during the prior

spring quarter.) Any student who fails to register for classes or on-leave status after being admitted to the UW will need to be approved for reinstatement by his or her program to regain active student status within the Graduate School. Failure to maintain either continuous enrollment or on-leave status constitutes evidence that the student has resigned from the Graduate School.

Registration is required to take the master's final examination or doctoral general or final examinations. Students may either be registered or eligible to use the graduate registration waiver fee for filing the request for master's degree, submitting a thesis or dissertation, and receiving the degree.

To be eligible for on-leave status, the student must have registered for, and completed, at least one quarter as a graduate student at the University of Washington immediately prior to going on-leave; international students must complete three consecutive quarters (see international graduate students section below).

Any student who has registered for a quarter may NOT submit a petition for on-leave status form directly to the registration office for that quarter unless he/she officially withdraws from all courses before the first day of the quarter. Students who have been registered for even one day of a quarter are deemed to have status for the quarter and will be eligible to register for classes or apply for on-leave for the following quarter. (Spring enables registration for summer or autumn.) The student's email account will be active for the quarter, but library privileges will not be maintained once courses are dropped.

The procedure for going on leave is online at www.grad.washington.edu/policies/memoranda/memo09.shtml.

If a student who is in on-leave status registers in any other status, i.e., matriculated, non-matriculated, graduate nonmatriculated, it will terminate their official on-leave status for that quarter, even if they subsequently drop those courses.

Readmission

A student previously registered in the Graduate School who has failed to maintain graduate student status, but wishes later to resume studies, must for reinstatement to the Graduate School by the published closing dates. If the student is reinstated by the department, registration will occur during the usual registration period.

The Graduate School allows a maximum of six years to complete requirements for a master's degree and 10 years for a doctoral degree. Periods spent on-leave or out of status are included.

Concurrent Degree Programs

Concurrent programs are defined as a pair of programs that may be pursued at the UW by a post-baccalaureate student resulting in completion of the requirements for either two graduate degrees or a graduate and a professional degree. Rather than sequentially completing first one degree and then the other, the student's time and the University's resources may be conserved by arrangements that permit the student to proceed in a coordinated way toward completion of the degree programs. Graduate School policy allows for both formal and informal concurrent degree programs, as described below.

Formal Concurrent Degree Programs

Graduate School policy defines a formal concurrent degree program as a curriculum established by two participating academic units resulting in completion of two graduate degrees, or a graduate and a professional degree. These specific programs must be formally approved by the Graduate School, and students in formal concurrent degree programs are designated by unique program codes.

The two types of formal concurrent degree programs are as follows:

1. Graduate/Professional Degrees

Examples of formal graduate/professional concurrent degrees:

- School of Dentistry: DDS/Master's or Doctoral degree

- School of Law: JD/Master's or Doctoral degree
- School of Medicine: M.D./Master's or Doctoral degree
- School of Pharmacy: PharmD/Master's or Doctoral degree

The graduate program coordinators are the primary representatives of the professional schools, and the graduate degree requirements for the master's degree are those which are in effect at the time the degree is awarded. All program and Graduate School minimum requirements must be met by appropriate graduate courses. It is the responsibility of the student to submit a written list of courses which apply toward the graduate degree at the time the student applies for the master's degree. This list must be approved by both programs.

Requirements for the doctoral degree are those which are in effect at the time the degree is awarded with the understanding that only approved graduate courses will be applicable.

2. Graduate/Graduate degrees

Examples of formal graduate/graduate concurrent programs:

- Master of Health Administration/Master of Business Administration
- International Studies/Epidemiology
- Master of Arts in International Studies/Master of Public Health

To earn two master's degrees in a formal concurrent degree program, a student must complete at least the equivalent of two Graduate School minimum degree requirements of 36 credits each for a minimum total of 72 credits. If one or both of the participating programs require more than the minimum of 36 credits, those additional credits may be "shared" and applied to both degrees. Further, a maximum of 12 credits from one master's program, earned beyond the 36 credit minimum, may be applied in the second master's program towards the Graduate School minimum of 36 credits required. In this case, the minimum number of additional credits for the second degree, with the 12 approved credits, is 24. In all cases the total minimum required credits remains 72. For formal concurrent degree programs, both programs must approve the shared credits counting toward both degrees. A formal concurrent degree program may allow a shared thesis as described within the formal concurrent degree proposal. The proposing programs should follow the best practices guidelines developed by the Graduate School Council (Concurrent Degrees Shared Thesis Best Practices) and articulate these in the proposal sent to the Graduate School.

For formal PhD/masters concurrent programs, up to 12 credits earned toward a PhD may be counted toward a master's degree in another program with the approval of both degree-offering units.

The student is responsible for submitting a list of courses which apply toward each respective degree at the time he or she files an application for the master's degree or schedules the general examination. This list must be approved by both programs.

Informal Concurrent Degree Programs

Students may pursue two degrees from different departments simultaneously in an informal concurrent degree program. These programs have not been approved as formal concurrent programs and do not have unique program codes, but students have flexibility to "share" coursework, given the approval of both programs.

Current graduate students wishing to pursue an informal concurrent degree program must go to apps.grad.uw.edu/applForAdmiss/ and submit an application and fee for the second program.

Graduate School Memorandum 35: Concurrent Degree Programs contains additional information.
grad.washington.edu/policies/memoranda/memo35.shtml.

Master's Degree

Summary of Requirements

- A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.
- Total credits required for the degree program must be completed.

- All courses numbered 400-799 that are numerically graded 2.7 and above, or have a grade of satisfactory (S) or credit (CR) count toward total credits. 499 courses are not counted in the total credits.
- At least 18 credits must be in courses numbered 500 and above.
- 18 credits must be numerically graded in department approved 400-level courses accepted as part of the major and in 500-level courses. This excludes 499 and transfer credits.
- No more than six graduate level quarter credits can be transferred from other academic institutions to count toward the credit total.
- No more than 12 UW graduate non-matriculated credits can be applied to the credit total.
- No more than 12 credits derived from any combination of UW graduate non-matriculated credits and transfer credits can be applied to the credit total.
- If a student repeats a non-repeatable class, only one set of credits counts toward the credit total.
- A minimum cumulative GPA (grade point average) of 3.00 is required for a graduate degree at the University.
- The master's degree request must be filed.
- If the master's degree request is filed during weeks 10 and 11, it is not accepted. The system is closed.
- In summer quarter, any master's degree request filed in weeks eight and nine is not accepted. The system is closed.
- All degree requirements must be completed within six years.
- The six-year timeframe begins on the first day of the quarter in which the student — coded as either a graduate non-matriculated student (department code with class 6) or as a graduate student (department code with class 8) — uses a course to satisfy degree requirements in the department to which he or she is admitted.
- Only UW graduate non-matriculated credits taken within the six-year time frame may be applied toward the credit total.
- Quarters spent on-leave and out of status are counted in the six years.
- A student must maintain registration through the end of the quarter in which the degree is conferred or, if eligible, pay the graduate registration waiver fee within 14 days following the last day of the quarter in which all degree requirements were met.
- Thesis track students are required to take a minimum of nine thesis credits in their credit total.
- Thesis track students are required to submit an electronic copy of an acceptably formatted thesis and the supervisory committee approval form to the Graduate School no later than the last day of the quarter.
www.grad.washington.edu/students/etd/.

Second Master's Degree Requirement

A second master's degree may be earned at the UW by completing an additional separate set of requirements. Please refer to Concurrent Degree Programs earlier in this section and to Graduate School Memorandum No. 35 (grad.washington.edu/policies/memoranda/memo35.shtml) for more specific information.

Transfer Credit

A student working toward the master's degree may petition the dean of the Graduate School for permission to transfer to the University of Washington the equivalent of a maximum of six quarter credits of graduate level course work taken at another recognized academic institution. These credits may not have been used to satisfy requirements for another degree. The petition must include a recommendation from the graduate program coordinator and an official transcript indicating completion of the course work. Transfer credits are not entered on the UW transcript.

University of Washington students who are within six credits of completing their undergraduate degree, and who have met the requirements for admission to the Graduate School, may register the quarter immediately preceding admission to Graduate School for up to six credits in 500-level courses in addition to their remaining six credits of required undergraduate work. The graduate program which has admitted the student must approve registration for the courses. The student, after admission to the Graduate School, must file a petition with the dean of the Graduate School to transfer the six credits. The student must also provide a letter or email from Graduations and Academic Records stating that these credits have not been applied toward the undergraduate degree.

Approved transfer credits are applied toward the total credit count only for the master's degree. (Transfer credits are not applicable toward a doctoral degree.) The 18 quarter credits of numerically graded course work, and 18 quarter credits of 500-level-and-above course work may not be reduced by transfer credit.

Credit taken as an undergraduate non-matriculated student or post-baccalaureate student at the UW may not be transferred to a graduate program. Credit by advanced credit examinations is not transferable.

Thesis Program

The master's thesis should be evidence of the graduate student's ability to carry out independent investigation and to present the results in clear and systematic form. Thesis track students are required to submit an electronic copy of an acceptably formatted thesis and the supervisory committee approval form to the Graduate School no later than the last day of the quarter (www.grad.washington.edu/students/etd/) or by the deadline specified in the graduate registration waiver fee. The faculty in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes online format guidelines for theses and dissertations (www.grad.washington.edu/students/etd/). These guidelines should be read thoroughly before the student begins writing the thesis. The thesis must meet all format requirements before being accepted by the Graduate School. A thesis adviser is available in the Graduate School for consultation during the thesis preparation process.

Non-thesis Programs

The faculty in some graduate programs have arranged programs of study for the master's degree that do not require the preparation of a thesis. These non-thesis programs normally include a more comprehensive plan of course work for more extensive examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

Final Examination for Master's Degree

As soon as is appropriate, the faculty in the student's graduate program appoints a supervisory committee, consisting of two to four members. The chair and at least one-half of the total membership must be members of the graduate faculty. (See Graduate School Memorandum 13 grad.washington.edu/policies/memoranda/memo13.shtml). The committee chairperson arranges the time and place of the final examination, the results of which must be reported to the Graduate School by the last day of the quarter (last day of finals week) in which degree requirements are met. The examination may be oral or written, and all members of the supervisory committee must certify its results. If the examination is not satisfactory, the committee may recommend to the dean of the Graduate School that the student be allowed to take another examination after a period of further study. A student must be registered the quarter in which any required exam or presentation occurs.

Application for Master's Degree

Students apply for the master's degree on at www.grad.washington.edu/mygrad/student.htm. The online application period commences on the first day of each quarter and closes on Sunday (midnight Pacific Time) of the ninth week of the quarter (eighth week during summer quarter). If degree requirements are not met in the requested quarter, students must complete another degree request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their master's degree request. The filing of the application is the responsibility solely of the student. When the application is received, the student's record is reviewed in the Graduate School. All requirements for the degree must be met by the end of the current quarter if the application is to be approved. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application becomes void and a new one must be submitted at the appropriate time.

Master of Arts for Teachers

Master's degree programs for experienced teachers, which focus upon the fields of knowledge normally taught in the common school and the community college, provide alternatives to the research-oriented master of

arts and master of science degree programs, which emphasize particular fields of knowledge.

Doctoral Degree

The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

Summary of Requirements

In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School minimum requirements:

- Completion of a program of study and research as planned by the graduate program coordinator in the student's major department or college and the supervisory committee. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the general examination.
- Presentation of 90 credits, 60 of which must be taken at the University of Washington. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment.
- Numerical grades must be received in at least 18 quarter credits of course work taken at the UW prior to scheduling the general examination. The Graduate School accepts numerical grades in approved 400-level courses accepted as part of the major, and in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- Creditable passage of the general examination.
- Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.
- Preparation of and acceptance by the dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. The candidate must register for a minimum of 27 credits of dissertation. At least one quarter must come after the student passes the general examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (800).
- Creditable passage of a final examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The general and final examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.
- Completion of all work for the doctoral degree within 10 years. This includes quarters spent on-leave or out of status, as well as applicable work from the master's degree from the UW.
- Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under final quarter registration).
- A student must satisfy the requirements that are in force at the time the degree is to be awarded.

Appointment of Doctoral Supervisory Committee

A supervisory committee is appointed by the dean of the Graduate School to guide and assist a graduate student working toward a doctoral degree and is expected to evaluate a student's performance throughout a program. A supervisory committee should be appointed no later than four months prior to a general examination. Appointment of a supervisory committee indicates that the graduate faculty in a student's field finds a student's background and achievement a sufficient basis for admission into a program of doctoral study and research. "Preliminary" examinations, if required, should be completed prior to a request for appointment of a supervisory committee. If preliminary examinations are not an academic unit's requirement, it is appropriate to request appointment of a supervisory committee during a student's first year of study. See Graduate School Memorandum 13:

Supervisory Committees for Graduate Students,
grad.washington.edu/policies/memoranda/memo13.shtml.

Admission to Candidacy for Doctoral Degree

A general examination may be scheduled if: (a) the student has completed 60 credits (some of these credits may be taken the same quarter of the exam); (b) all required program examinations that do not need Graduate School approval have been completed and; (c) all members of the supervisory committee agree that the student's background of study and preparation is sufficient and have approved the student to schedule a general examination. At least four members of a supervisory committee — including the chair, Graduate School representative, and one additional graduate faculty member — must be present at the examination.

If the general examination is satisfactory, the supervisory committee members who participate at the examination sign the warrant and return it to the student's graduate program by the last day of the quarter. If an examination is unsatisfactory, a supervisory committee may recommend that the dean of the Graduate School permit up to a maximum of two additional re-examinations after a period of additional study. Any members of a supervisory committee who do not agree with the majority opinion are encouraged to submit a minority report to the dean of the Graduate School.

The student must be registered as a graduate student during the quarter that he or she takes the general examination. When the Graduate School approves candidacy, a student is identified and designated as a candidate for the appropriate doctoral degree and is awarded a candidate certificate. After achieving candidate status, a student ordinarily devotes his or her time primarily to completing research, writing the dissertation and preparing for the final examination.

A candidate certificate and the doctoral degree may not be awarded the same quarter.

Candidate's Certificate

A candidate certificate is formal recognition of the completion of a very significant step towards a doctoral degree. Students who have passed a general examination and have completed all requirements for a doctoral degree, except a final examination and Graduate School acceptance of a dissertation, are awarded a candidate certificate. Candidacy is conferred on the last day of a quarter, and certificates are issued by Graduation and Academic Records approximately four months after this date.

Dissertation and Final Examination

A candidate must present a dissertation demonstrating original and independent investigation and achievement. A dissertation should reflect not only a mastery of research techniques, but also ability to select an important problem for investigation, and to deal with it competently.

Normally, a dissertation is written in English. However, if there are circumstances that warrant a dissertation be written in another language, approval must be received from the dean of the Graduate School via petition.

The Graduate School publishes online formatting guidelines for theses and dissertations (www.grad.washington.edu/students/etd/) and students should familiarize themselves with the requirements before they begin. A dissertation must meet these format requirements before being accepted by the Graduate School. Thesis and dissertation advisers are available in the Graduate School to answer questions.

A final examination may be scheduled if: (a) a student passed a general examination in a previous quarter; (b) a reading committee is officially established with the Graduate School; (c) the reading committee has read an entire draft of the dissertation and; (d) the entire supervisory committee has agreed that the student is prepared and has approved the student to schedule a final examination. At least four members of a supervisory committee — including the chair, Graduate School representative, and one additional graduate faculty member — must be present at the examination.

If the final examination is satisfactory, the supervisory committee members who participate at the examination sign the warrant and return it to the student's graduate program by the last day of the quarter. Any members of a

supervisory committee who participate at an examination, but do not agree with the majority opinion, are encouraged to submit a minority report to the dean of the Graduate School. If an examination is unsatisfactory, a supervisory committee may recommend that the dean of the Graduate School permit a second examination after a period of additional study.

Registration as a graduate student is required the quarter that a final examination is taken *and* the quarter the dissertation is submitted. The degree is conferred the quarter in which the student's dissertation is accepted by the Graduate School.

Publication of Doctoral Dissertations

Part of the obligation of research is publication of the results and, in the case of doctoral research, this means microfilm publication of the dissertation. This is a Graduate School requirement, in addition to any previous or planned publication of any or all of a dissertation, and provides worldwide distribution of the work. A candidate signs a publication agreement when a dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

Individual PhD Program

The Graduate School maintains the individual Ph.D. program for exceptionally able students whose objectives for study are of an interdisciplinary nature that cannot be met within one of the University units authorized to grant the Ph.D. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. It is not intended as a mechanism for offering the Ph.D. within units that do not have their own authorized Ph.D. programs.

A graduate student may apply to the individual Ph.D. program when he or she has completed the master's degree, or has been admitted to the Graduate School and has completed at least three quarters of full-time work at the UW, and has carefully planned an appropriate program of studies.

Proposals, including GRE scores, are due by Dec. 15 of each year. Decisions on admission are made by May 31 of the following year. Information and application materials for the individual Ph.D. program are available at www.grad.washington.edu/students/interdisciplinary/iphd/index.shtml

College of Arts and Sciences

School Overview

Dean

Robert Stacey
50 Communications

Divisional Deans

Catherine Cole -- Dean, Arts
Suzanne Hawley -- Dean, Natural Sciences
George Lovell -- Dean, Social Sciences
Brian Reed -- Dean, Humanities

The departments and schools of the College of Arts and Sciences offer nearly 100 curricula leading to the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Design, and Bachelor of Science, as well as graduate study leading to master's and doctoral degrees.

Undergraduate Study

Graduation Requirements

A liberal arts education entails mastery of certain basic skills, exposure to a broad range of academic disciplines, and concentration in a particular field of knowledge. To be awarded a baccalaureate degree a student in the College must fulfill requirements in the following areas: Language Skills, Reasoning and Writing in Context, Areas of Knowledge, Diversity, and a Major (see table below). All required courses must be taken for a numerical grade. In addition, the student must present at least 90 credits outside the major department and must meet minimum GPA requirements as specified below.

Requirement*	Credits	
Language Skills	5-20	<ul style="list-style-type: none"> English composition (5 credits) Foreign language (0-15 credits, depending on placement or high school background)
Reasoning and Writing in Context	15	<ul style="list-style-type: none"> Quantitative/symbolic reasoning (QSR) (5 credits) Additional writing (W) courses (10 credits)

Areas of Knowledge	75	General-education courses to include at least 20 credits in each of the following three areas: <ul style="list-style-type: none"> • Visual, Literary, & Performing Arts (VLPA) • Individuals & Societies (I&S) • The Natural World (NW)
Diversity	3	Sociocultural, political, and economic diversity (DIV)
Major	50-90	An area of specialization, usually in a single department
Minor (optional)	25-35	An additional area of specialization
Electives	varies	Free choice; as many credits as necessary to bring the total to 180

* Requirements of colleges other than Arts and Sciences are based on these, but may differ. Students who have not chosen a major are advised to follow the College of Arts and Sciences requirements.

Language Skills

To receive a degree from the College of Arts and Sciences, students whose first enrollment in college (whether at the UW or elsewhere) was in autumn quarter 1985 or later are required to complete 5 credits of English composition with a minimum 2.0 grade. They must also complete coursework through the end of the first-year college sequence in a foreign language, with a 2.0 or higher grade in the third-quarter course, or demonstrate equivalent proficiency through one of the following: successful completion of the third-year or higher level of high school language instruction; by passing a proficiency examination and placing into a course beyond the first year; or by receiving a passing grade in a qualifying course beyond the first-year level. Credits used for these two requirements (including the entire first year of foreign language, if taken) cannot also be applied to the Areas of Knowledge requirements described below.

Reasoning and Writing in Context

Students who first entered college autumn quarter 1985 or later must complete a minimum of 5 credits in Quantitative or Symbolic Reasoning (QSR) and 10 credits of additional composition courses or courses that emphasize the development of writing skills in the context of an academic discipline (W courses).

QSR and writing courses, if they apply, can also be counted toward Areas of Knowledge or major requirements. The writing requirement is in addition to the English composition requirement mentioned in the preceding paragraph.

Areas of Knowledge

The Areas of Knowledge requirement is the means by which the student develops a breadth of knowledge. Undergraduate courses are currently divided broadly into three categories: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Each student must select at least 20 credits in courses from each of the three fields and an additional 15 credits from any courses in the three fields. Of the 75 total credits required, 15 may be from courses in the student's major department.

Diversity

No fewer than 3 credits of courses focusing on the sociocultural, political, and economic diversity of human experience at local, regional, or global scales.

Course Designators

The following symbols, included in course descriptions in this catalog, indicate which, if any, of the above requirements are fulfilled by certain courses:

VLPA -- Visual, Literary, & Performing Arts (Area of Knowledge requirement)

I&S -- Individuals & Societies (Area of Knowledge requirement)

NW -- The Natural World (Area of Knowledge requirement)

QSR -- Quantitative and Symbolic Reasoning

DIV -- Diversity

Courses that meet the foreign-language requirement and the additional-writing requirement are not marked. The third-quarter (or second-semester) course in any language meets the language requirement, so long as the entire first-year sequence totals at least 12 credits (regardless of whether the student earned credit for the earlier parts of the sequence). Consult the quarterly Time Schedule for writing-intensive courses that meet the additional-writing requirement.

Major

In fulfilling the requirements for a major, the student engages in thorough study of a discipline or subject, aimed at developing knowledge in depth. This part of the student's program is determined by the department, school, or faculty committee with which the major study is pursued. Measured in academic credits, the "major" required of each student consists of 50 or more prescribed credits in a department of the College or a closely related group of departments. Descriptions of major programs are shown below.

Minor

Completion of a minor, available through many departments, is optional. Requirements are shown under individual department undergraduate programs, below, or in a minors handout available in UAA Advising, 141 Mary Gates Hall. The following interdisciplinary minors are also offered: Arctic Studies; Disability

Studies; Diversity; Education, Learning, and Society; Human Rights; Labor Studies; Paleobiology; and Values in Society. Websites for these minors may be found in the alphabetical listing of Arts and Sciences degree programs.

Credits Required Outside Major Department

So that the student does not overspecialize, the College limits to 90 the number of credits from a single department that the student may elect to count in the 180 credits required for the baccalaureate degree. A department itself can require no more than 70 credits from courses within the department, and no more than 90 credits from within the department and related fields combined, as constituting its major program for the baccalaureate degree. Exceptions to these restrictions may be granted by the Dean.

GPA Required for Graduation

To be eligible to receive the baccalaureate degree, the student must achieve at least a 2.00 cumulative GPA in the major (some departments prescribe a higher minimum GPA for the major), as well as a 2.00 cumulative GPA for all work done in residence through the University.

Applying for Graduation

Students should apply for the baccalaureate degree no later than the first quarter of their final year. Seniors who apply by announced quarterly deadlines receive Graduating Senior Registration Priority (GSP), allowing them to register first for the following quarter. GSP status is limited to two quarters.

All current and past UW students may graduate under the College requirements published in this catalog. Students may use the department requirements in effect at the time they are admitted to the major, if they graduate within 10 years of that time. Otherwise, the department may insist on more recent major requirements. Students wishing to fulfill a previous set of requirements should see an adviser for details and options. All responsibility for fulfilling graduation requirements rests with the student concerned.

Limits on Physical Education Courses Allowed Toward Graduation

A student graduating from the College of Arts and Sciences may count a maximum of three credits of 100-level physical-education activity courses taken at the University of Washington, or their equivalents at other collegiate institutions, as elective credits toward graduation. At present, physical-education courses are not offered at the University.

Graduate Study

Students who intend to work toward advanced degrees must apply for admission to the [Graduate School](#) and must meet the general requirements outlined in this General Catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree in force at the time the degree is to be awarded.

American Ethnic Studies

Department Overview

B504 Padelford

American Ethnic Studies exposes students to key content, methodologies, and theories in the comparative and interdisciplinary study of African Americans, Asian/Pacific Americans, and Chicanos in the United States.

Undergraduate Program

Adviser

B509 Padelford, Box 354380
(206) 221-0664

The Department of American Ethnic Studies offers the following undergraduate programs:

- The Bachelor of Arts degree with a major in American ethnic studies
- A minor in diversity

Bachelor of Arts

Suggested First- and Second-Year College Courses: United States history, literature, drama, arts, sociology, political science, ethnic studies.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

60 credits as follows:

1. *Core courses (30 credits):*
 - a. 15 credits of AES 150, AES 151, AES 212
 - b. 15 credits of AFRAM 101, AAS 101, CHSTU 101
2. *Concentration:* 30 credits in one of the following: African American Studies, Asian/Pacific American Studies, Chicano Studies, Comparative American Ethnic Studies. See department for list of concentration courses. Some concentration requirements may be met while fulfilling the core courses requirement.
3. *Electives:* Sufficient electives to reach 60 credits of approved courses applied to the major.

Minor

Adviser

B505 Padelford, Box 354380

(206) 616-5789

Email: divminor@uw.edu

Diversity minor requirements: 25 credits to include the following:

1. One foundation course (5 credits) chosen from an approved list of courses. A list of courses is available at <http://depts.washington.edu/divminor/>.
2. Minimum four additional courses, with at least one each from four of the five following categories (20 credits): arts/cultural; historical; global; contemporary/institutional; applications. A list of courses by category is available at depts.washington.edu/divminor/.
3. Minimum 15 credits must be completed in residence through the UW.
4. Maximum 10 credits from one department and maximum 10 credits from the student's major department may be applied toward the minor.
5. Diversity minor students are strongly encouraged to complete an internship, volunteer project, research project, study abroad program, intergroup dialogue course, or some applied learning opportunity that promotes the goals of the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The American Ethnic Studies curriculum prepares undergraduate students to understand the breadth, key content, methodologies, and theories in the field of ethnic studies as well as comparative interdisciplinary knowledge of African American, Asian/Pacific American, and Chicano issues. The major is designed to help students acquire the skills to think and write critically about race, class, and ethnicity in social and historical contexts and multiple categories of social diversity.
- *Instructional and Research Facilities:* Writing Center
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students have the opportunity to become actively engaged in personalized research and discovery through independent study and research courses in each program concentration.
- *Department Scholarships:* None
- *Student Organizations/Associations:* Ethnic Studies Student Association

American Indian Studies

Department Overview

C514 Padelford

American Indian Studies fosters Indigenous wellness, political sovereignty and self-determination, cultural revitalization, and cross-cultural understanding. It also engages with the histories, psychological and social realities, expressive cultures, traditional land- and water-based practices, and political status of Indigenous peoples in the Pacific Northwest and beyond.

Undergraduate Program

Adviser

C514 Padelford, Box 354305
(206) 543-9082

The Department of American Indian Studies offers the following undergraduate programs:

- Bachelor of Arts degree with a major in American Indian studies
- Minors in American Indian studies and in Oceania and Pacific Islander Studies

Bachelor of Arts

Suggested First- and Second-Year College Courses: Completion of AIS 102 and AIS 103. Completion of two courses from AIS 170, AIS 202, AIS 203, HSTAA 209/AIS 209, or HSTAA 210/AIS 210. Courses that sharpen writing and analytical reasoning skills. Exposure to courses in history, environmental studies, sociology, anthropology, ethnic studies, literature, political science, communications, and gender, women, and sexuality studies.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

55 credits

1. Introductory courses (10 credits): AIS 102, AIS 103
2. Content courses (10 credits): two courses from AIS 170, AIS 202, AIS 203, HSTAA 209/AIS 209, and HSTAA 210/AIS 210
3. Concentrations (25 credits): Minimum 5 credits each from governance; environment and health; and culture and history. (See department website for courses that fulfill concentration requirements.)
4. Electives (10 credits): Any AIS courses not used to satisfy other major requirements; also, approved courses taught by AIS adjunct faculty. (See department website for adjunct faculty courses.)

5. Minimum 30 credits completed at the 300 level or above

Minor

American Indian Studies: Minimum 30 credits

1. Introductory courses (10 credits): AIS 102, AIS 103
2. Content course (5 credits): one selected from AIS 170, AIS 202, AIS 203, HSTAA 209/AIS 209, and HSTAA 210/AIS 210
3. Electives (15 credits): in AIS courses; minimum 5 credits at the 300 level or above

Oceania and Pacific Islander Studies: Minimum 25 credits

1. Required Core Courses (15 credits): AIS 102; one from AAS 206, AAS 210; one from AES 494, AIS 497, ANTH 489
2. Electives (10 credits): two courses from the following, including at least one at the 300 or 400 level: ANTH 307/AAS 300, ANTH 306, ANTH 312, ARCHY 325, ENGL 257, GWSS 392, AAS 320, AAS 360, AAS 385, AAS 392, AAS 402, SMEA 103, SMEA 485; or any other course with significance for Oceania/Pacific Islander Studies, as approved by the program adviser.
3. Minimum 50% or 15 credits (whichever is greater) completed in residence at the UW Seattle campus.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The AIS curriculum prepares students to understand the breadth, key content, methodologies, and theories in American Indian and Indigenous studies, while developing their skills to write and think critically. The degree prepares students to earn advanced degrees in related fields, as well as to pursue careers involving critical thinking and knowledge of American Indian and the Indigenous experiences.
- *Honors Options Available:* None
- *Undergraduate Research, Internships, and Service Learning:* Contact adviser for internship opportunities
- *Department Scholarships:* None
- *Student Organizations/Associations:*
 - American Indian Science and Engineering Society (AISES): College of Engineering, 013 Loew Hall
 - American Indian Student Commission “ASUW: asuwaisc@uw.edu
 - First Nations at the UW: Samuel E. Kelly Ethnic Cultural Center, 3931 Brooklyn Avenue N. E.
 - Medicine Wheel Society: Samuel E. Kelly Ethnic Cultural Center
 - Native Organization of Indigenous Scholars: Samuel E. Kelly Ethnic Cultural Center

Anthropology

Department Overview

314 Denny

Anthropology is the study of human beings in all their cultural and biological diversity. It includes the study of human evolution, the archaeological record, language and culture, the relationship between humans and their environment, and cultural modes of being as these differ in time and space. In studying anthropology, students can better understand how to find ways to live together in today's world, respecting cultural diversity while building upon common human values.

Study of anthropology at the University of Washington comprises three sub-disciplines:

- *Archaeology* is the study of the human past through investigation of material remains (artifacts, food remains, features, structures, etc.) and their relationships in space and time.
- *Biological anthropology* focuses on understanding human variation through the study of the ecological, demographic, genetic, developmental, paleontological, and epidemiological dimensions of modern human adaptation and its evolutionary basis.
- *Sociocultural anthropology* is the study of human societies, their cultures and histories, and the circuits of power and exchange that link them to the world at large.

Study at the undergraduate level can further entail any of four optional tracks: Medical Anthropology and Global Health, Anthropology of Globalization, Archaeological Sciences, and Human Evolutionary Biology.

Undergraduate Program

Adviser
316 Denny, Box 353100
(206) 543-7772

The Department of Anthropology offers the following undergraduate programs:

- Bachelor of Arts degree with a major in anthropology
- Bachelor of Arts degree with a major in anthropology, with options in medical anthropology and global health (MAGH), anthropology of globalization (AG), archaeological sciences (ASc), human evolutionary biology (HEB), or Indigenous Archaeology (IA)
- Bachelor of Science degree with a major in anthropology, with options in medical anthropology and global health (MAGH); archaeological sciences (ASc); or human evolutionary biology (HEB)
- Minor in anthropology

Suggested First- and Second-Year College Courses: ARCHY 205; BIO A 201; any additional 200-level ANTH course; and one from CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts

Major Requirements

55 credits as follows:

1. *Core courses (20 credits)*: BIO A 201; any 200-level ANTH course; any 200-level ARCHY course; and one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. Minimum 20 of these credits in upper-division (300- or 400-level) courses. One 100-level ANTH, ARCHY, or BIO A course, or AIS 102 may be counted toward the major, but is not required.
 - a. The following AIS courses may apply toward this requirement: AIS 202, AIS 203, AIS 209, AIS 210, AIS 311, AIS 330, AIS 335, AIS 340, AIS 425, AIS 443, AIS 480. No limit on the number of AIS courses that may apply to this requirement.
 - b. Maximum 12 credits (18 credits for departmental Honors students) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major.
3. *Additional major requirements*:
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 15 upper-division credits in anthropology completed through the UW.
4. Students may pursue either the general anthropology major or one of the four options shown below.

Medical Anthropology and Global Health (MAGH) Option: Requirements for the general anthropology major, as shown above, to include either ANTH 215 or ANTH 302 and 15 additional credits from ANTH and BIO A courses approved for the MAGH option. A list of approved courses is available on the department website.

Anthropology of Globalization (AG) Option: Requirements for the general anthropology major, as shown above, to include 20 credits from courses in ANTH, ARCHY, and BIO A approved for the AG option. A list of approved courses is available on the department website.

Archaeological Sciences (ASc) Option: Requirements for the general anthropology major, as shown above, to include ARCHY 205 and at least 15 credits from courses approved for the ASc core, and at least 15 credits from courses approved for the ASc elective lists. Lists of approved courses are available on the department website.

Human Evolutionary Biology (HEB) Option: Requirements for the general anthropology major, as shown above, to include BIO A 351 or BIO A 355; either BIO A 101 or BIO A 348; and 15 credits from courses approved for the HEB option. A list of approved courses is available on the department website.

Indigenous Archaeology (IA) Option: Requirements for the general anthropology major, as shown above, to include AIS 102, ARCHY 205, three courses from the approved IA core list, and 15 credits from courses approved for the IA elective list. Lists of approved courses are available on the department website.

Bachelor of Science

Major Requirements

75 credits

1. *Core Courses (20 credits)*: ARCHY 205; BIO A 201; any 200-level ANTH course; one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. Completion of one of the following options (45 credits)
 - a. *Medical Anthropology and Global Health (MAGH)*: ANTH 215 or ANTH 302; minimum 40 credits from courses approved for the MAGH list; see department website for approved courses.
 - b. *Archaeological Sciences (ASc)*: Minimum 15 credits from ASc core course list; minimum 15 credits from approved ASc elective course list; minimum 15 additional credits in ANTH, ARCHY, or BIO A; see department website for approved courses
 - c. *Human Evolutionary Biology (HEB)*: BIO A 351 or BIO A 355; BIO A 101 or BIO A 348; minimum 35 credits from approved HEB course list; see department website for approved courses
3. Additional credits from Department of Anthropology courses at the 200 level or above: (10 credits)
4. Additional Requirements
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 40 credits in upper-division (300-400 level) courses; one 100-level ANTH, ARCHY, or BIO A course may be counted toward the major, but is not required.
 - c. Maximum 12 credits (18 credits for departmental Honors) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major
 - d. Minimum 35 upper-division credits in Department of Anthropology courses completed through the UW
 - e. Minimum 50 credits of Natural World (NW) courses in Department of Anthropology courses
 - f. Minimum 55 ANTH, ARCHY, and BIO A credits

Minor

Minor Requirements: 30 credits (at least 15 credits at upper-division level) from courses with the following prefixes: ANTH, ARCHY, BIO A. ANTH 100 may be applied to the minor but is not required. (Certain AIS courses may apply toward this requirement. See departmental adviser for list.) Minimum 2.0 grade required in each course.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of anthropology develops skills in critical thinking, research, and writing, as well as technical skills specific to the different subfields (ethnographic field techniques, interpretation of data, statistical analysis, archaeological methods of data collection and interpretation). An undergraduate degree prepares students for many positions that involve working with people, as well as for academic studies in a variety of fields. Careers in anthropology can be developed through employment with government agencies, museums, teaching and research, private consulting firms, and nongovernmental organizations.

- *Instructional and Research Facilities:* Undergraduate students have access to the following facilities for classroom training in laboratory methods and for research experiences subject to faculty approval and supervision: the Burke Museum (ethnological, archaeological, natural history, and archival collection), Quaternary Research Center, Biodemography Laboratory, Luminescence Dating Laboratory, Electron Microscope Laboratory Cooperative, Geoarchaeology Laboratory, Digital Imaging and Microscopy Laboratory, Geographical Information System (GIS) Computer Laboratory, Primate Evolutionary Biomechanics Laboratory. In addition, the department has a writing center offering undergraduate writing support for anthropology classes.
- *Honors Options available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The Department of Anthropology supports students who undertake community-based internships under faculty supervision.
- *Department Scholarships:*
 - The Brett E Baldwin Scholarship, for approximately \$1,000, is awarded to an outstanding graduate or undergraduate majoring in anthropology.
 - The Wienker Prize for Best Undergraduate Essay. Four awards are given each year, one in each sub-discipline for the best essay in an undergraduate anthropology class, and one for the best senior honors thesis.
- *Student Organizations/Associations:* The Anthropology Club is run by and for students in the department.

Graduate Program

Graduate Program Coordinator
329 Denny Hall, Box 353100
(206) 685-1562

The department recognizes three principal subfields of anthropology: archaeology, biological anthropology, and sociocultural anthropology (including linguistic anthropology). The department offers three distinct PhD programs within the sub-disciplines. A concurrent MPH/PhD degree program with four options in the School of Public Health is also offered. The MA degree, which usually requires two years, may be earned within the PhD program as a thesis or non-thesis option. Completion of the PhD usually requires at least three years beyond the master's level. Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies.

Admission Requirements

1. Official transcripts
2. Three recommendations
3. Statement of purpose
4. GRE scores
5. TOEFL for international students
6. Admission is for autumn only
7. Application materials due by December 15

Degree Requirements

Minimum 90 credits

Archaeology PhD

1. Completion of core requirements (ARCHY 510, ARCHY 576, ARCHY 599), one area studies course, three methods courses, and one "social impacts in archaeology" course (ARCHY 465, ARCHY 467, ARCHY 512, or ARCHY 573)
2. Comprehensive written examination, language translation, teaching requirement, general examination, dissertation colloquium, dissertation field research, and dissertation.

Biological Anthropology PhD

1. Completion of core requirements (BIO A 525), five courses in human biology, paleo anthropology/anatomy, evolution, and primatology (see list of approved courses on department website), and one approved statistics sequence.
2. Comprehensive written examination, master's paper, teaching requirement, general examination, dissertation colloquium, dissertation research, and dissertation.

Sociocultural Anthropology PhD

1. Completion of core requirements (ANTH 507, ANTH 508, ANTH 550, ANTH 551, ANTH 565, ANTH 566, ANTH 567) and four additional courses at the 400-500 level with different members of the anthropology faculty.
2. First-year portfolio, research competency paper, teaching requirement, language competency, general examination, dissertation colloquium, dissertation field research, and dissertation.

Financial Aid

One multi-year recruitment fellowship is awarded to an outstanding entering student. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Applicants should apply for Foreign Language Area Studies Fellowships if qualified. Applicants are encouraged to seek funding from outside sources. Work-study positions may also be available for eligible graduate students.

Department Scholarships

Student Training in Anthropological Research Tools and Skills (STARTS), in support of graduate students conducting pre-dissertation pilot research.

The Brett E. Baldwin Scholarship, for approximately \$1,000, awarded to an outstanding graduate or undergraduate majoring in anthropology.

Evan David James Fellowship, for approximately \$5,000, awarded to an outstanding graduate student conducting research in any time period in the PNW.

Ronald Leroy Olson Fellowship, for one quarter of funding (tuition and a stipend), for UW graduate students in the field of anthropology. Whenever possible, such students are to be members of a Native American or Native Alaskan Tribe, ideally from Washington, Alaska, or British Columbia.

Applied and Computational Mathematical Sciences

Program Overview

C36 Padelford

Mathematics is the common language of modern science, engineering, and business. Techniques of mathematical modeling and data analysis are key instruments in the tool kit of modern practitioners and researchers in a wide array of disciplines. ACMS is an interdisciplinary program in the mathematical sciences that provides sound training in mathematical modeling, scientific computation, mathematical reasoning, and statistical analysis. The program is jointly administered by the Departments of Applied Mathematics, Computer Science and Engineering, Mathematics, and Statistics, offering students access to their combined resources. An ACMS major is an excellent stepping stone to a career in engineering and the physical, life, and management sciences.

Undergraduate Program

Adviser

C36 Padelford, Box 354350
(206) 543-6830

advising@math.washington.edu

ACMS offers a Bachelor of Science degree that builds on the strengths of the four mathematical sciences departments as well as the many quantitatively oriented departments across campus. All students complete a core set of courses developing basic skills in modeling, computation, mathematics, and statistics. Students choose one of the eight option areas listed below for further training and specialization.

1. *Biological and Life Sciences* focuses on basic techniques of mathematical modeling and computing that are employed in the life sciences.
2. *Discrete Mathematics and Algorithms* gives students a broad background in mathematics and computation with special emphasis on discrete mathematics and its application to optimization and algorithm design.
3. *Engineering and Physical Sciences* is an excellent choice for students with an interest in the physical world and classical areas of applied mathematics.
4. *Mathematical Economics and Quantitative Finance* provides a firm foundation in applied and computational mathematics as well as a basic grounding in economic theory.
5. *Operations Research* provides a firm foundation in the mathematical tools of operations research, particularly optimization and stochastic modeling (effective summer quarter 2018, admission suspended until further notice).
6. *Scientific Computing and Numerical Algorithms* focuses on the design, mathematical analysis, and efficient implementation of numerical algorithms for such problems.
7. *Social and Behavioral Sciences* provides a foundation in commonly used statistical and computational techniques followed by flexibility in pursuing different sets of advanced courses.

8. *Data Science and Statistics* focuses on building, using, and interpreting statistical models from scientific or engineering data.

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, PHYS 123, CSE 142, CSE 143

Program Admission Requirements

Applications are accepted at the beginning of autumn and spring quarters. Admission is competitive. Admission decisions are based on grades in core courses and a student's overall academic record. Completion of minimum requirements does not guarantee admission. Minimum requirements: minimum 2.50 GPA in the following courses, with a minimum 2.0 grade in each course: CSE 142, CSE 143; MATH 124, MATH 125, MATH 126; one from MATH 307, MATH 308, AMATH 351, AMATH 352.

Major Requirements

90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core:* 43 credits to include MATH 124, MATH 125, MATH 126; MATH 308; MATH 307 or AMATH 351; MATH 390/STAT 390; CSE 142, CSE 143; AMATH 352; AMATH 381/MATH 381, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for MATH 390/STAT 390.
3. Completion of one of the following options:
 - a. *Biological and Life Sciences Option.* 47 credits to include option core (27 credits): PHYS 121, PHYS 122, PHYS 123 or BIOL 101 and BIOL 102 or BIOL 180 and BIOL 200; MATH 324, AMATH 353, AMATH 422, AMATH 423; and option electives (20 credits): outside area (12 credits or double major/double degree; see adviser for options) and 8 credits of approved courses at the 300 level or above, chosen from the four participating departments.
 - b. *Discrete Mathematics and Algorithms Option.* 47 credits to include option core and option electives. Option core: 33 credits for non-Computer Science and Engineering majors - PHYS 121, PHYS 122, PHYS 123, MATH 300, MATH 394/STAT 394, CSE 373, CSE 417, and two of CSE 374, CSE 410, CSE 413, CSE 415; 9 credits for Computer Science/Computer Science and Engineering double major/double degree - MATH 394/STAT 394, CSE 421, CSE 431. Option electives: 14 credits for non-Computer Science and Engineering majors, 23 credits for Computer Science/Computer Science and Engineering double majors, to include 9 credits from MATH 407, MATH 408, MATH 409, MATH 461, MATH 462, or one of AMATH 481, AMATH 482, or AMATH 483. Remaining 15 credits from approved courses at the 300 level or above from the four participating departments.
 - c. *Engineering and Physical Sciences Option.* 47 credits to include option core (30 credits): PHYS 121, PHYS 122, PHYS 123, MATH 324, AMATH 401, AMATH 402, AMATH 403; and option electives (17 credits): outside area (11 credits or double major/double degree; see adviser for options) and 6 credits of approved courses at the 300 level or above, chosen from the four participating departments.
 - d. *Mathematical Economics and Quantitative Finance Option.* 47 credits to include option core and electives. Option core (27 credits): PHYS 121, PHYS 122, PHYS 123 or ECON

200, ECON 201, ECON 300; MATH 300, MATH 327, MATH 407; and either MATH 408 or STAT 423. Option electives: Either (1) or (2), below. (1) 20 credits including at least 15 credits from CFRM 405, CFRM 410, CFRM 415, CFRM 420, CFRM 425, ECON 301, ECON 400, ECON 401, ECON 404, ECON 421, ECON 422, ECON 424, ECON 426, ECON 435, ECON 472, ECON 482, ECON 483, ECON 485, ECON 486 (only one of CFRM 420 and ECON 424 may be counted toward the major); at least 5 additional credits at the 300 level or above from AMATH, CSE, MATH, STAT, or from the Department of Economics (taken from ECON courses listed above). (2) Complete a double major with a Bachelor of Science degree in economics.

- e. *Operations Research Option.* (As of summer quarter 2018, admission to the Operations Research Option is suspended until further notice.) 47 credits to include option core and electives. Option core (30 credits): PHYS 121, PHYS 122, PHYS 123, MATH 300, MATH 394/STAT 394, MATH 395/STAT 395; and at least two of the following: MATH 407, MATH 408, MATH 409. Option electives: Either (1) or (2), below. (1) 17 credits, including at least 6 credits from MATH 491/STAT 491, MATH 492/STAT 492, STAT 421, STAT 423; at least 8 credits from OPMGT 301, OPMGT 402, OPMGT 443, OPMGT 450, OPMGT 490, QMETH 450, QMETH 490, IND E 321, IND E 337, IND E 410, IND E 412, IND E 424, IND E 426, IND E 430, IND E 433, (with at least one course at the 400 level); at least 3 additional credits at the 300 level or above from the four participating departments or from the departments of Management Science and Industrial Engineering (taken from IND E courses listed above). (2) Complete a double degree in Management Science in the Foster School of Business or in Industrial Engineering in the College of Engineering.
- f. *Scientific Computing and Numerical Algorithms Option.* 47 credits to include option core (27 credits): PHYS 121, PHYS 122, PHYS 123, MATH 300, MATH 327, two of MATH 464, MATH 465 AMATH 481, AMATH 482, or AMATH 483; and option electives (20 credits), to include 11 credits from the following: AMATH 301; AMATH 353 or MATH 309; CSE 373 or CSE 326; CSE 410; AMATH 401, AMATH 402, AMATH 403; MATH 407, MATH 408, MATH 409; MATH 427, MATH 428; remaining 9 credits from approved courses at the 300 level or above from the four participating departments.
- g. *Social and Behavioral Sciences Option.* 47 credits to include option core (31 credits): PHYS 121, PHYS 122, PHYS 123, STAT 340, STAT 341, STAT 342, STAT 423; and option electives (16 credits): outside area (10 credits or double major/double degree; see adviser for options) and 6 credits of approved courses at the 300 level or above, chosen from the four participating departments.
- h. *Data Science and Statistics Option.* 46-47 credits to include program core (29 or 30 credits): PHYS 121, PHYS 122, PHYS 123, AMATH 301 or STAT 302, STAT 395/MATH 395, STAT 391, CSE 414; and option electives (17 credits): at least 6 credits from List A and 6 credits from List B. Remaining credits from approved courses (List C) at the 300 level or above, chosen from the four participating departments. See adviser for approved lists.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted above.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The ACMS degree emphasizes the development of advanced skills in discrete and continuous mathematical modeling, computing and scientific computation, mathematical reasoning and analytic skills, and statistical reasoning and analytic skills. Students develop an expertise at an advanced level in an applications area. This set of skills provides the basis for careers in a wide array of quantitative disciplines including engineering; the physical, life, and social sciences; as well as business and management sciences. In addition, the ACMS program has developed partnerships with a number of departments on campus to facilitate the pursuit of double majors.
- *Instructional and Research Facilities:* The program has access to the combined instructional and research facilities of the four participating departments, as well as the Mathematics and Statistics library and the Math Study Center.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The program is provided with internship opportunities periodically, which are then passed on to students.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* MAA Student Chapter, Actuarial Club, SIAM

Applied Mathematics

Department Overview

202 Lewis Hall

Applied mathematics is concerned with mathematical modeling and analysis of problems from the physical, biological, and social sciences, and from engineering.

Undergraduate Program

Adviser

202 Lewis Hall, Box 353925
(206) 543-5493

The department offers the following undergraduate programs:

- Bachelor of Science degree with a major in applied mathematics
- Bachelor of Science degree with a major in computational finance and risk management
- The Bachelor of Science degree with a major in applied and computational mathematical sciences, offered in cooperation with departments of [Computer Science and Engineering](#), [Mathematics](#), and [Statistics](#). See [Applied and Computational Mathematical Sciences \(ACMS\)](#) for specific degree information. Advising for ACMS is available through the Department of Mathematics.
- Minors in applied mathematics and in computational finance.

Bachelor of Science with a Major in Applied Mathematics

Department Admission Requirements

1. Minimum 2.0 grade in each of MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
2. Minimum 2.0 grade in AMATH 301
3. Admission is twice a year. Application deadlines: 5 p.m. the second Friday of autumn quarter; 5 p.m. the second Friday of spring quarter
4. Admission is capacity constrained. Meeting minimum requirements does not guarantee admission. Admission is based on a holistic review of the student's record to include: grades in courses required for admission, overall cumulative GPA, and rigor of courses completed; time to degree set by the UW Satisfactory Progress Policy, including frequency of incompletes or withdrawals and number of repeated courses; personal statement that demonstrates interest in pursuing advanced study in the field of applied mathematics and related fields.
5. Successful applicants typically have earned above a minimum 2.50 cumulative GPA in courses listed above with no individual course grade lower than a 2.0.

General Education Requirements

1. Areas of Knowledge: VLPA (20 credits); I&S (20 credits); NW (20 credits). 15 additional credits in any area.

2. English Composition: 5 credits
3. Additional Writing: 10 credits
4. Foreign Language: completion of the third college quarter of a foreign language
5. Quantitative and Symbolic Reasoning: 4 or 5 credits from the QSR list

Major Requirements

Minimum 55 credits

1. *Mathematics*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136) (15 credits)
2. *Computing*: AMATH 301 (4 credits)
3. *Introductory Applied Mathematics*: AMATH 351, AMATH 352, AMATH 353 (9 credits)
4. *Electives* (minimum 27 credits):
 - a. Minimum two courses from AMATH 401, AMATH 402, AMATH 403
 - b. Minimum two courses from AMATH 342, AMATH 383, AMATH 422, AMATH 423
 - c. Minimum two courses from AMATH 481, AMATH 482, AMATH 483, CFRM 410, CFRM 420, CFRM 421
5. Minimum 2.00 cumulative GPA in courses applied to the major

Bachelor of Science with a Major in Computational Finance and Risk Management

Department Admission Requirements

1. Minimum 2.0 grade in each of MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
2. Minimum 2.0 grade in AMATH 301
3. Admission is twice a year. Application deadlines: 5 p.m. the second Friday of autumn quarter; 5 p.m. the second Friday of spring quarter
4. Admission is capacity constrained. Meeting minimum requirements does not guarantee admission. Admission is based on a holistic review of the student's record to include: grades in courses required for admission, overall cumulative GPA, and rigor of courses completed; time to degree set by the UW Satisfactory Progress Policy, including frequency of incompletes or withdrawals and number of repeated courses; personal statement that demonstrates interest in pursuing advanced study in the field of applied mathematics and related fields.
5. Successful applicants typically have earned above a minimum 2.50 cumulative GPA in courses listed above with no individual course grade lower than a 2.0.

General Education Requirements

1. Areas of Knowledge: VLPA (20 credits); I&S (20 credits); NW (20 credits). 15 additional credits in any area.
2. English Composition: 5 credits
3. Additional Writing: 10 credits
4. Foreign Language: completion of the third college quarter of a foreign language
5. Quantitative and Symbolic Reasoning: 4 or 5 credits from the QSR list

Major Requirements

Minimum 69 credits

1. *Mathematics*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136) (15 credits)
2. *Computing*: AMATH 301, CFRM 425 (7 credits)
3. *Statistics for Finance*: CFRM 410 (3 credits)
4. *Applied Mathematics*: AMATH 351, AMATH 352, AMATH 353 (9 credits)
5. *Quantitative Finance*: CFRM 405, CFRM 415, CFRM 420 (9 credits)
6. *Electives* (minimum 26 credits from the following): CFRM 421, CFRM 422, CFRM 430, CFRM 442, AMATH 481, AMATH 482, AMATH 483
7. Minimum 2.00 cumulative GPA in courses applied to the major

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minors

Applied Mathematics

Minor Requirements: Minimum 27 credits

1. MATH 124, MATH 125, MATH 126 or equivalent
2. Four applied mathematics courses at the 300 level or above (excluding AMATH 400, AMATH 498, AMATH 499)
3. Minimum 2.0 grade required in each course.

Computational Finance

Minor Requirements: 29-30 credits

1. *Core Courses (15 credits)*: CFRM 405, CFRM 410, CFRM 415, CFRM 420 (or ECON 424), CFRM 425
2. *Additional Requirements (14-15 credits)*:
 - a. MATH 125, or MATH 135, or equivalent
 - b. MATH 126, or MATH 136, or equivalent
 - c. STAT 311 or STAT 390
3. Minimum 2.0 cumulative GPA for courses applied to the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Through the Applied Mathematics major, students will gain the ability to apply mathematics to problems that society is facing today in the physical,

engineering and biological sciences, industry, and many additional application areas. Students develop advanced skills in mathematical modeling, computing and scientific computation, mathematical reasoning and analytical skills. Through the Computational Finance and Risk Management major, students will gain the ability to master mathematical and computing aspects, such as financial software development, financial modeling, machine learning and data science; gain advanced quantitative computational finance competencies and next generation risk management skills.

- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* When available, internship opportunities are passed on to students. Course credit available for undergraduate reading/research with faculty.
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* None currently active

Graduate Program

Graduate Program Coordinator
Lewis Hall, Box 353925
(206) 543-5493

The department offers graduate programs of study leading to the degrees of master of science and doctor of philosophy. These programs involve broad training in those mathematical methods and techniques that have been found useful in applications, in-depth study in at least one field of application, and opportunities to explore various specialized aspects of applied mathematics.

Master of Science, Applied Mathematics

Offered on campus.

Admission Requirements

1. Baccalaureate degree from a regionally accredited college or university in the U.S. or its equivalent from a foreign institution, either in mathematics with a strong background in applications such as physical, engineering, biological, or social sciences with a strong background in applications-oriented mathematics. Proficiency in coursework that includes: calculus, differential equations, linear algebra, and numerical analysis or scientific computing. Recommended: advanced calculus and real analysis.
2. Minimum 3.00 GPA
3. GRE general test scores
4. Proficiency in English: Applicants whose native language is not English must demonstrate English language proficiency.

Degree Requirements

Minimum 36 credits

1. *Core Courses (20 credits):* AMATH 567, AMATH 568, AMATH 569, AMATH 584.
2. *Additional Courses:* from AMATH or other departments. Any non-AMATH courses taken to fulfill degree requirements must be at the graduate level, numerically graded, and approved by the department.

3. *Applied Mathematics Courses*: minimum 24 credits from the Applied Mathematics curriculum. Core courses count toward this requirement.
4. Minimum nine numerically graded courses, including core courses listed above, with a minimum 3.20 cumulative GPA. One may be substituted with 4 credits of AMATH 500 or AMATH 600.
5. *Program Plan*: approved no later than the end of the first quarter of registration.
6. *Satisfactory Progress*: minimum 3.20 GPA. Students normally complete requirements for an MS degree in one year.

Master of Science, Applied and Computational Mathematics

Offered both on campus and online. Requirements are the same for both degrees. See adviser for possible exceptions.

Admission Requirements

1. Baccalaureate degree from a regionally accredited college or university in the U.S. or its equivalent from a foreign institution, either in mathematics with a strong background in applications such as physical, engineering, biological, or social sciences with a strong background in applications-oriented mathematics. Proficiency in coursework that includes: calculus, differential equations, linear algebra, and numerical analysis or scientific computing. Recommended: advanced calculus and real analysis.
2. Minimum 3.00 GPA
3. GRE general test scores
4. Proficiency in English: Applicants whose native language is not English must demonstrate English language proficiency.

Degree Requirements

Minimum 36 credits

1. *Core Courses (20 credits)*: AMATH 501, AMATH 502, AMATH 503, AMATH 581.
2. *Additional Courses*: from AMATH or other departments. Any non-AMATH courses taken to fulfill degree requirements must be at the graduate level, numerically graded, and approved by the department.
3. *Applied Mathematics Courses*: minimum 24 credits from the Applied Mathematics curriculum. Core courses count toward this requirement.
4. Minimum nine numerically graded courses, including core courses listed above, with a minimum 3.20 cumulative GPA. One may be substituted with 4 credits of AMATH 500 or AMATH 600.
5. *Program Plan*: approved no later than the end of the first quarter of registration.
6. *Satisfactory Progress*: minimum 3.20 GPA. Full-time students normally complete requirements for an MS degree in one year.

Master of Science, Computational Finance and Risk Management

The MS-CFRM addresses the demand in the financial-services profession for advanced quantitative and computational finance skills, and next generation risk-management competencies. Three degree options are available: general program (42 credits), computing concentration (54 credits), and risk management concentration (54 credits).

Admission Requirements

1. Proficiency in coursework that includes calculus through partial differentiation, matrix algebra, and one-dimensional optimization. Probability and statistics equivalent to an upper-level undergraduate course or entry-level graduate course. A programming language such as Java or C++, or a mathematics or statistics programming language such as Matlab or R/S-PLUS.
2. Baccalaureate degree from a regionally accredited college or university in the U.S. or its equivalent from a foreign institution, with a minimum 3.00 GPA (on a 4.0 scale)
3. GRE, GMAT, or waiver petition
4. Proficiency in English: Applicants whose native language is not English must demonstrate English language proficiency.

Degree Requirements

Minimum 42 or 54 credits

1. *Core Courses (26 credits)*: CFRM 501, CFRM 502, CFRM 503, CFRM 504, CFRM 505, CFRM 509, and either CFRM 506 or CFRM 507
2. *CFRM program options*:
 - a. General program (minimum 16 credits): remaining credits satisfied by available CFRM elective courses
 - b. Computing concentration (minimum 28 credits) from
 - i. CFRM 520, CFRM 521, CFRM 522, CFRM 523, CFRM 524, AMATH 582, AMATH 583
 - ii. CFRM 506, if CFRM 507 taken as a core course
 - iii. Up to 12 non-CFRM elective credits at graduate level, approved by CFRM program director
 - c. Risk management concentration (minimum 28 credits) from
 - i. CFRM 521, CFRM 530, CFRM 531, CFRM 532, CFRM 540, CFRM 541, CFRM 542, CFRM 580
 - ii. CFRM 507, if CFRM 506 taken as a core course
 - iii. Up to 12 non-CFRM elective credits at graduate level, approved by CFRM program director
3. *Final Examination*: Students pursuing a thesis give an oral defense. Final examination not required for non-thesis students.
4. *Satisfactory Progress*: minimum 3.20 GPA

Doctor of Philosophy

Admission Requirements

Primarily a research degree, based on proficiency in applied mathematics, and the ability to carry out an independent investigation. The dissertation must exhibit original mathematical contributions relevant to a significant area of application.

1. Minimum 3.40 GPA (either undergraduate or graduate, or both)
2. GRE

3. Three letters of recommendation sent directly to the department
4. Proficiency in English: Applicants whose native language is not English must demonstrate English language proficiency.

Degree Requirements

Minimum 90 credits

1. *Course Requirements*: Two of the following three sequences taken within the first year: AMATH 561, AMATH 562, AMATH 563; AMATH 567, AMATH 568, AMATH 569; either AMATH 581 or AMATH 584, and AMATH 585, AMATH 586. AMATH 600 (Reading during first five quarters, including first summer) (4 credits, 2 each with separate faculty members)
2. *Minimum 13 Numerically Graded Courses*: Minimum 9 courses from Applied Mathematics curriculum. Maximum two courses at the 400 level (or cross-listed with courses at the 400 level).
3. *Supervisory Committee*: formed no later than end of the second year
4. *Qualifying Examination*: three written two-hour examinations, covering core course material
5. *General Examination*: oral examination
6. *Dissertation*: 27 credits over at least three quarters; at least one quarter after student passes the general examination
7. *Final Examination*: oral defense of dissertation
8. *Satisfactory Performance*: Minimum overall 3.40 GPA
9. *Satisfactory Progress*: timely passing of examinations. Department funding contingent on satisfactory progress.

Financial Aid

Both research and teaching assistantships are available to full-time students who qualify. Fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.

Research Facilities

Five mid-scale computer servers (12-cores and 24 GBRAM each), available to faculty, staff, students, and visitors via physical or remote access. All faculty and student accounts use Dropbox for backup and cloud access.

In addition to desktop computers, the department maintains five network printers, scanner facilities, six Bloomberg terminals, local laptops and projectors, camera and camcorders and other computing peripherals, including a conference room wired with a large-screen television and webcams for remote conferencing.

Licensing for commercial software packages such as Matlab, Maple and Mathematica, Microsoft products and Adobe, and media tools, is provided by the College of Engineering and the UW IT Department. In addition, the department makes use of many free and open source tools such as Python, Numpy, and Scipy, as well as mathematical software packages.

Art, Art History, and Design

School Overview

104 Art

The School of Art serves a dual role within the University of Washington — both a professional school and an academic department. As a professional school it trains students for active careers in the visual arts; as a school of the College of Arts and Sciences it offers studio and lecture courses. All course offerings and curriculum requirements are based on the underlying philosophy that an awareness and understanding of the visual arts are necessary to a liberal education, and that a liberal education is necessary to the training of a professional artist.

The school's academic advising office offers preview information sessions for prospective college transfer or high school students. More information: art.washington.edu/preview

Undergraduate Program

Adviser

104 Art, Box 353440

(206) 543-0646

uaskart@uw.edu

The School of Art, Art History, and Design offers the following undergraduate programs:

- Bachelor of Arts degree with concentrations in interdisciplinary visual art, painting and drawing, photomedia, and three-dimensional forum
- Bachelor of Arts degree with a major in art history
- Bachelor of Design degree with majors in industrial design, interaction design, or visual communication design
- A minor in art history
- Bachelor of Arts degree with a major in interdisciplinary visual arts, or painting and drawing (effective winter quarter 2018, admission suspended until further notice)
- Bachelor of Fine Arts degree with a major in painting and drawing, photomedia, or three-dimensional forum (effective winter quarter 2018, admission suspended until further notice)

Bachelor of Arts with a Major in Art

Department Admission Requirements

1. Minimum 2.50 cumulative GPA
2. 5 credits college-level art with a minimum 2.5 grade
3. Art does not accept postbaccalaureate applicants.

How to Declare a Major in Art

1. Current UW Students/Freshmen: After completing any 100-or 200-level ART class in the School of Art, Art History, and Design, meet with an academic adviser (room 104 Art) to declare the major.
2. Transfer Students: Complete any 5-credit introductory art class with a minimum 2.5 grade prior to transferring to UW. During initial orientation and advising appointment, meet with an academic adviser (room 104 Art) to declare the major.

Major Requirements

1. Core courses (40 credits)
 - a. 15 credits introductory art classes: ART 101, ART 140, ART 190, ART 191, ART 233, ART 240, ART 245, ART 246, ART 253, ART 260, ART 272, ART 290, ART 292
 - b. 10 credits from ART 400, ART 440, ART 453, ART 494
 - c. 15 credits art history to include one 300-level class from an approved list.
2. Concentrations (tracks) (30 credits)
 - a. Interdisciplinary Visual Art: 5-credit additional introductory ART class; 20 credits from ART 333, ART 345, ART 350, ART 353, ART 355, ART 360, ART 365, ART 372, ART 390, ART 392, ART 393, ART 395; 5 credits from the following: ART 400, ART 450, ART 453, ART 457, ART 458, ART 490, ART 492, or ART 496
 - b. Painting and Drawing: ART 290 or ART 292; ART 390, ART 392; ART 393; ART 490; ART 492
 - c. Photomedia: ART 241; ART 242; 15 credits of ART 340; either ART 400 or ART 440
 - d. Three-Dimensional Forum: 10 credits additional introductory art classes; 20 credits from ART 333, ART 353, ART 372
3. Minimum 35 credits taken in 300/400 level courses
4. Minimum 40 credits of ART-prefixed courses taken in residence through the UW

Bachelor of Arts with a Major in Art History**Department Admission Requirements**

Entering freshmen and transfer students may declare the major by meeting with an academic adviser (room 104 ART) on or after their orientation/registration date. art.washington.edu/undergraduate-students

Currently enrolled University students must present a minimum 2.50 GPA and meet with an academic adviser (room 104 ART) any time during the quarter. art.washington.edu/advising

Art History does not accept postbaccalaureate applicants.

Major Requirements

60 credits

1. 10 credits from ART H 200, ART H 201, ART H 202, ART H 203, ART H 204, ART H 206, ART H 209, ART H 212, ART H 214, ART H 220, ART H 233, ART H 270, ART H 272, ART H273, ART H 290

2. 20 credits from ART H 309, ART H 310, ART H 311, ART H 312, ART H 314, ART H 333, ART H 361, ART H 373, ART H 380, ART H 381, ART H 390, ART H 391
3. 20 credits from ART H 400, ART H 412, ART H 413, ART H 414, ART H 435, ART H 471, ART H 473, ART H 484, ART H 488, ART H 491, ART H 492, ART H 494
4. 10 credits from ART H electives to include any ART H courses listed above or other courses with an ART H prefix (10 credits)

Minor

Minor Requirements: 30 credits of art history courses, of which 15 must be upper-division. Minimum 2.0 grade in each course applied to the minor. Minimum 15 credits completed through the UW.

Bachelor of Design

Department Admission Requirements

3.00 minimum GPA

For currently enrolled students

Admission to Industrial Design, Interaction Design, and Visual Communication Design: DESIGN 166. Students receiving a minimum 3.7 grade in DESIGN 166 are admitted. Students below a minimum 3.7 grade may apply to the design program via the design workshop in June. For details on the design workshop, see department website art.washington.edu.

For transfer students

Admission to Industrial Design, Interaction Design, and Visual Communication Design: DESIGN 166 (see admission requirements for currently enrolled students) or the equivalent of DESIGN 166 at their previous school. Students apply for admission to the UW, and attend the design workshop in June. Transfer students should meet with a School of Art adviser prior to applying to the UW to discuss the design workshop and selection process. See program guides at department website for specific information: art.washington.edu.

Admission Policy for Postbaccalaureate Applicants: Postbaccalaureate study in studio art is limited; admission requirements vary within each major. See information concerning specific postbaccalaureate admissions online at department website: art.washington.edu.

Major Requirements

93-103 credits, as follows:

Industrial Design (89-93 credits)

1. Successful completion of design admission selection process
2. 76-78 credits from DESIGN 206, DESIGN 207, DESIGN 208, DESIGN 209, DESIGN 210, DESIGN 211, DESIGN 316, DESIGN 317, DESIGN 318, DESIGN 319, DESIGN 322, DESIGN 324, DESIGN 445, DESIGN 446, DESIGN 485, DESIGN 486
3. 3-5 credits from DESIGN 325, DESIGN 326, DESIGN 373, DESIGN 374, DESIGN 376, DESIGN 400, DESIGN 467, DESIGN 483, DESIGN 488

4. 10 credits of art history

Interaction Design (87-93 credits)

1. Successful completion of design admission selection process
2. 61-63 credits from DESIGN 206, DESIGN 207, DESIGN 208, DESIGN 209, DESIGN 210, DESIGN 215, DESIGN 371, DESIGN 372, DESIGN 383, DESIGN 481, DESIGN 483, DESIGN 485, DESIGN 486
3. 16-20 credits from DESIGN 325, DESIGN 326, DESIGN 373, DESIGN 374, DESIGN 376, DESIGN 400, DESIGN 467, DESIGN 488
4. 10 credits of art history

Visual Communication Design (89-93 credits).

1. Successful completion of design admission selection process.
2. 76-78 credits from DESIGN 207, DESIGN 208, DESIGN 209, DESIGN 210, DESIGN 214, DESIGN 368; DESIGN 369, DESIGN 370, DESIGN 371, DESIGN 372, DESIGN 376, DESIGN 466; DESIGN 478, DESIGN 485, DESIGN 486
3. 3-5 credits from DESIGN 325, DESIGN 326, DESIGN 373, DESIGN 374, DESIGN 376, DESIGN 400, DESIGN 467, DESIGN 483, DESIGN 488
4. 10 credits of art history

Bachelor of Arts

As of winter quarter 2018, admission to the Bachelor of Arts degree with a major in interdisciplinary visual arts, or painting and drawing, is suspended until further notice.

Interdisciplinary Visual Arts (IVA), Painting and Drawing (Students may earn a Bachelor of Arts or a Bachelor of Fine Arts with a major in Painting and Drawing, but not both.)

Department Admission Requirements

2.50 minimum GPA

Admission to the Interdisciplinary Visual Arts Major for Freshmen or Currently Enrolled

Students: Complete 5 credits of 100-/200- level art, then meet with an Art adviser to declare the major.

Admission to the Interdisciplinary Visual Arts Major for Transfer Students: Complete equivalent of 5 credits of 100-/200-level prior to transferring. Once admitted to the UW, students meet with an Art adviser to declare the major. Prior to transfer, students may address questions to uaskart@uw.edu.

Admission to the Painting and Drawing Major for Freshmen and Currently Enrolled Students: Complete ART 190, then meet with an Art adviser to declare the major.

Admission to the Painting and Drawing Major for Transfer Students: Once admitted to the UW, students meet with an Art adviser to enroll in ART 190. Students who transfer with college credits in painting and drawing may present a portfolio for advanced placement in the program. Prior to transfer, students may address questions to uaskart@uw.edu.

Major Requirements

Interdisciplinary Visual Arts (60 credits)

1. ART 260 (5 credits)
2. 15 credits of introductory art selected from ART 101, ART 124, ART 126, ART 131, ART 140, ART 190, ART 191, ART 201, ART 202, ART 224, ART 226, ART 227, ART 232, ART 233, ART 245, ART 246, ART 272, ART 273, ART 280, ART 290, ART 292, DESIGN 165, DESIGN 166, DESIGN 208
3. 25 upper-division credits in art selected from ART 327, ART 328, ART 329, ART 332, ART 333, ART 334, ART 335, ART 338, ART 339, ART 345, ART 350, ART 351, ART 352, ART 353, ART 355, ART 360, ART 361, ART 365, ART 380, ART 390, ART 392, ART 393, ART 395, ART 400, ART 427, ART 428, ART 450, ART 457, ART 458, ART 490, ART 492, ART 496, ART 498, ART H 498, ART H 499
4. 15 credits ART H courses

Painting and Drawing (65 credits)

1. 5 credits: ART 190
2. 15 credits drawing classes: 5 credits of ART 290; 5 credits of ART 390; 5 credits of ART 490
3. 20 credits painting classes: 5 credits of ART 292; 5 credits of ART 392; 5 credits of ART 393; 5 credits of ART 492 or ART 494
4. 15 credits of ART H, which may include 5 credits of ART 361
5. 10 credits of studio ART electives

Bachelor of Fine Arts

As of winter quarter 2018, admission to the Bachelor of Fine Arts degree with a major in painting and drawing, photomedia, or three-dimensional forum, is suspended until further notice.

Painting and Drawing (Students may earn a Bachelor of Fine Arts or a Bachelor of Arts with a major in Painting and Drawing, but not both), Photomedia, Three-Dimensional Forum

Department Admission Requirements

3.00 minimum GPA

For currently enrolled students

Admission to Painting and Drawing: Complete ART 190, then meet with an Art adviser to declare the major.

Admission to Three-Dimensional Forum (for entering freshman or currently enrolled students): ART 272 followed by two from ART 201, ART 202, ART 233 ART 273. Students apply while taking the third course, no later than the third week of the quarter in which the third course is being taken. See guidelines/deadlines for application at this [webpage](#). Address questions to Art advising at (206) 543-0646 or uaskart@uw.edu.

Admission to Photomedia: Admission is competitive. Students enroll in ART 140 spring quarter of their freshman year to prepare the portfolio required for the competitive selection process for ART 241 autumn quarter. Students selected to register for ART 241 work with the photomedia faculty autumn quarter, revising their portfolio which is then used to select students admitted to the photomedia major winter quarter. See department website at art.washington.edu/ for timing and suggestions for successful completion of portfolio requirements.

For transfer students

Admission to Painting and Drawing: Once admitted to the UW, students meet with an Art adviser to enroll in ART 190. Students who transfer with college credits in the proposed area of study may present a portfolio for advanced placement in the program. Prior to transfer, address questions to uaskart@uw.edu.

Admission to Three-Dimensional Forum: Students are assigned an advising appointment with an Art adviser during UW orientation, when placement and timeline for application to 3D4M are determined. Students who transfer with college credits in ceramics, glass, or sculpture may present a portfolio for advanced placement in 3D4M and apply to the major when minimum course requirements are satisfied. Address questions to Art advising at (206) 543-0646 or uaskart@uw.edu.

Admission to Photomedia: Admission is competitive. Transfer students must apply for admission to the UW for summer or autumn quarter, must have completed an equivalent course to ART 140, and must submit their portfolios by mid-August for consideration to register for ART 241 autumn quarter. Students selected to register for ART 241 work with photomedia faculty autumn quarter, revising their portfolios which are then used to select students admitted to the photomedia major winter quarter. See department website at art.washington.edu for information on timing and suggestions for successful completion of portfolio requirements.

Admission Policy for Postbaccalaureate Applicants: Postbaccalaureate study in studio art is limited; admission requirements vary within each major. See information concerning specific postbaccalaureate admission online at department website: art.washington.edu.

Major Requirements

Painting and Drawing (90 credits)

1. 5 credits: ART 190
2. 15 credits drawing classes: 5 credits of ART 290; 5 credits of ART 390; 5 credits of ART 490
3. 40 credits painting classes: 5 credits of ART 292; 5 credits of ART 392; 5 credits of ART 393; 10 credits ART 492 or 5 credits of ART 492 and 5 additional credits ART 490; 15 credits of ART 494
4. 15 credits studio art or related electives
5. 15 credits ART H, which may include 5 credits of ART 361

Photomedia (80 credits)

1. 55 credits: ART 140 or adviser-approved course; ART 240; ART 241; ART 340 (15 credits); ART 361; ART 440 (15 credits)
2. 10 credits: ART and DXARTS courses
3. 15 credits: ART H, ANTH 209, DXARTS 200

Three-Dimensional Forum (75 credits)

1. 25 credits from one of the following tracks:
 - a. *Ceramics*: ART 253; one from ART 233, ART 272, or ART 273; ART 353 (15 credits) or ART 353 (10 credits) and either ART 332 or ART 333
 - b. *Glass*: ART 233; one from ART 253, ART 272, or ART 273; ART 333 (15 credits) or ART 333 (10 credits) and either ART 332 or ART 353
 - c. *Sculpture*: ART 273; one from ART 233, ART 253, or ART 272; ART 332 (15 credits) or ART 332 (10 credits) and ART 333 or ART 353
2. 20 credits of ART 453
3. 15 credits of ART electives
4. 15 credits ART H or ART 361

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 1. Practiced problem-finding and problem-solving skills
 2. Expertise in visual literacy
 3. Polished presentation and communication skills
 4. Collaboration and leadership experience
 5. Research methods and ability to complete resulting projects
 6. Motivated for and by critical feedback
 7. Ability to network, create, and engage in community
- *Study Abroad*: art.washington.edu/study-abroad/art
- *Instructional and Research Facilities*: art.washington.edu/spaces
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Available for Art History and for the Bachelor of Arts in Art.
- *Research, Internships, and Service*
Learning: art.washington.edu/advising/internships; art.washington.edu/design/design-resources
- *Department Scholarships*: art.washington.edu/advising/undergraduate-scholarships

Graduate Program

Graduate Program Coordinator
 104 Art Building, Box 353440
 (206) 543-0646
gradart@u.washington.edu

The Master of Fine Arts program offers an intense, two-year studio and seminar/classroom experience leading to an advanced degree in visual art. The program builds on prior, significant academic experience and studio work. Admission is competitive to any one of the following five programs: ceramics, painting and drawing, photography, sculpture, and visual communication design.

Applicants to the master's degree program in art history normally have a broad undergraduate background in art history.

The PhD program in the Division of Art History prepares graduates for university-level teaching, curator positions at major museums, and independent research in the field. Before beginning work for the PhD, students should have completed a master of arts degree in the history of art.

Master of Fine Arts

Admission Requirements

1. Bachelor of fine arts degree or equivalent (determined by the quality of the applicant's work and equivalent experience, based on UW BFA requirements) with a minimum 3.00 GPA in the undergraduate art major.
2. Graduate Record Examination is not required. Admission is competitive. Application deadline is February 1, for admission the following autumn quarter.

Degree Requirements

For each program, 90 credits

Ceramics

1. *Ceramics Studio*: 20 credits of ART 553
2. *Interdisciplinary Seminar*: 25 credits of ART 590
3. *Art History, Theory, and Criticism*: 10 credits of approved courses
4. *Studio Electives* : 15 credits of approved electives
5. *Thesis*: 20 credits of ART 700. The thesis may consist of one major work or a body of work that involves one central theme. Ceramics graduates exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery along with a one person show at the Ceramics Gallery.

Painting and Drawing

1. *Drawing Studio*: 6 credits of ART 591
2. *Painting Studio*: 25 credits of ART 592
3. *Graduate Seminar*: 30 credits of ART 594
4. *Art History, Theory, and Criticism*: 10 credits of approved courses
5. *Studio electives*: 9 credits of approved electives
6. *Thesis*: 10 credits of ART 700. The thesis may consist of one major work or a body of work that involves one central theme. Painting and drawing graduates exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Photography

1. *Photography Studio*: 20 credits of ART 515
2. *Interdisciplinary Seminar*: 25 credits of ART 590
3. *Art History, Theory, and Criticism*: 15 credits of approved courses

4. *Studio Electives*: 15 credits of approved electives
5. *Thesis*: 15 credits of ART 700. The thesis may consist of one major work or a body of work that involves one central theme. Photography graduates exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Sculpture

1. *Sculpture Studio*: 20 credits of ART 552
2. *Interdisciplinary Seminar*: 25 credits of ART 590
3. *Art History, Theory, and Criticism*: 10 credits of approved courses
4. *Studio Electives*: 15 credits of approved electives
5. *Thesis*: 20 credits of ART 700. The thesis may consist of one major work or a body of work that involves one central theme. Sculpture graduates exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Visual Communication Design

1. *Design Studio*: 25 credits of ART 580/ART 582
2. *Design Seminar*: 20 credits of ART 581
3. *Art History, Theory, and Criticism*: 15 credits of approved courses
4. *Studio Electives*: 20 credits of approved electives
5. *Thesis*: 10 credits of ART 700. The thesis may consist of one major work or a body of work that involves one central theme. Design graduates exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Master of Arts

Admission Requirements

1. Bachelor of Arts degree with major in the history of art, or equivalent coursework, with a minimum 3.00 GPA or B average in art history courses. Students in other majors may apply if they have a strong background in art history.
2. One copy of all academic transcripts (international applicants submit two copies)
3. Three letters of recommendation
4. Statement of professional objectives in the field
5. Samples of the applicant's written work
6. Graduate Record Examination scores (General Test)

Degree Requirements

55 to 65 credits

1. 55 credits in the thesis track or 65 credits in the non-thesis track. Minimum 45 credits in the thesis track or 55 credits in the non-thesis track must be numerically graded art history courses numbered 400 and above, exclusive of thesis or practicum credits. Maximum 10 credits in related fields, in numerically graded courses numbered 300 and above, may be approved in place of art history courses. Maximum 12 credits of ART H 600 may be counted toward the minimum credit requirement for the master of arts degree.

2. Minimum 5 numerically graded credits each in four of five major areas: African or Native American; East Asian; Ancient, Classical, and Medieval; Italian and Northern Renaissance, Baroque, and Rococo; or late eighteenth- to twenty-first-century Western.
3. Minimum 15 credits in 500-level seminars, in addition to ART H 500 and ART H 504, both of which must be taken within the first year of residence. At least one seminar each in a Western and a non-Western area
4. Knowledge of French, German, or Italian, or of Chinese or Japanese if appropriate. Degree candidates specializing in Native American art may substitute Spanish for French, German, or Italian. Candidates in the thesis track must, in addition, demonstrate knowledge in a second language appropriate to the student's area of study as determined by the faculty. Petitions for exemption from the second language requirement are considered as warranted. Language requirements may be satisfied by passing graduate proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of the second year of French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the UW with a minimum 3.00 grade. Students are expected to satisfy at least one language requirement no later than the first quarter.
5. Students in the thesis track take 10 credits in ART H 700; students in the non-thesis track take 10 practicum credits in ART H 598.

Doctor of Philosophy

Admission Requirements

1. Prior preparation in art history at a general level (usually master of arts degree in the history of art)
2. One copy of all academic transcripts (international applicants submit two copies)
3. Three letters of recommendation
4. Statement of professional objectives in the discipline
5. Samples of written research work in art history
6. Graduate Record Examination scores

Graduation Requirements:

Minimum 90 credits

1. 60 credits in numerically graded art history courses numbered 400 and above, beyond the master of arts degree or equivalent, and exclusive of dissertation credits; maximum 20 credits in related fields in numerically graded courses numbered 300 and above may be approved for credit in place of art history courses; minimum 10 credits in areas other than those tested by the general examination; at least 30 credits in 500-level seminars
2. Knowledge of German, French, or Italian, or of Chinese or Japanese if appropriate; research capability in a second language judged appropriate to the student's area of study; knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied by passing graduate-proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of second-year French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the UW with a minimum 3.0 grade.
3. General examination: covers three specific fields of art history chosen from the following: African, Native American, Chinese, Japanese, Ancient, Medieval, Renaissance, Baroque and eighteenth century, Modern, and Contemporary; no more than two fields may be selected from the same area.

4. 30 dissertation credits (ART H 800) distributed over a minimum of three quarters
5. Dissertation demonstrating original and independent investigation and achievement

Scholarships and Teaching Assistantships

Scholarships are awarded annually to new and returning students, based on merit. Applicants admitted to the MFA program may be offered School of Art scholarships for the coming year on a merit basis. Further application is not required.

The School of Art offers a limited number of teaching assistantships to incoming graduate students on a merit basis, as determined by each program. Enrolled graduate students may apply for a limited number of additional, competitive teaching assistantships.

Art history offers certain scholarship funds, as well as teaching assistantships, for art history graduate students. A small number of grants are awarded to outstanding entering students, but otherwise financial aid and assistantships are awarded only to students who have completed at least one year of graduate study.

Asian Languages and Literature

Department Overview

225 Gowen

The Department of Asian Languages and Literature offers instruction in the principal languages and literatures of Asia, including East, Southeast, Central, and South Asia. Emphasis is placed on the roles of these languages within the cultures they serve as well as on linguistic, textual, and literary analysis. Courses on Asian literature in English are offered for majors and nonmajors alike.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of Asian Languages and Literature offers the following undergraduate programs:

- The Bachelor of Arts degree with majors in Chinese, Japanese (with either a linguistic or literature concentration), Korean, South Asian languages and literature (Hindi and Sanskrit), and Asian Languages and Culture
- Minors in Chinese, Japanese, Indonesian Language and Culture, Japanese, Korean, South Asian languages and literature, Vietnamese Language and Culture, and Asian Languages and Cultures

Bachelor of Arts

Suggested First- and Second-Year College Courses: First and second years of the target foreign language(s): Chinese, Japanese, Korean, or South Asian (Hindi or Sanskrit). (For the Asian Languages and Cultures major, first year of an Asian language, or languages.) Any courses relating to the area or discipline of major study.

Department Admission Requirements

1. Minimum 20 credits of college coursework (or department-approved equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be taken through the UW, with a minimum 2.5
2. Completion of one writing course (W-prefix) taught in English with a minimum 2.0 grade.
3. The department prefers that prospective majors present a cumulative 2.50 GPA. Students with a cumulative GPA below 2.50 may be considered for the major if they submit materials in addition to transcripts, clarifying any aspect of past coursework. Denied applicants may appeal.
4. Transfer students must be enrolled at the UW before applying to the major.
5. For the major in Asian Languages and Cultures, students in good academic standing may declare the major at any time, without fulfilling requirements stated above.

Note: A student entering the junior year without two years of the appropriate foreign language is not able to complete the degree requirements in two years unless he or she takes accelerated courses such as Chinese or Japanese through the UW during summer quarter.

Major Requirements

Chinese

Minimum 50 credits

1. Minimum 50 credits in Chinese language, linguistics, literature, and/or culture. Maximum 10 credits may be in courses outside Asian Languages and Literature. See department for list of courses outside Asian Languages and Literature that may apply. (Students who begin language study with first-quarter Chinese need 75 credits to complete the major.)
2. *Language:* CHIN 213 (heritage-track Chinese, considered equivalent of third-year level) or CHIN 303 required, unless waived because of advanced skills. Students may take additional modern Chinese language courses (CHIN 411, CHIN 412, CHIN 413, CHIN 445, I BUS 490 [when the topic is business Chinese], CHIN 470, CHIN 482, CHIN 496 [when the topic is advanced language instruction]) toward the major, or may take additional courses in linguistics, literature, culture, and/or classical language beyond the minimum 30 credits required as shown in 3, below. No more than 20 credits of modern Chinese language courses may apply toward the major, although students may need to take more to reach the required third-year level of language competence.
3. Linguistics, literature, culture, and/or classical language courses (minimum 30 credits), to include CHIN 451, CHIN 452 (10 credits); CHIN 342 or CHIN 442 (5 credits); CHIN 461, CHIN 463 (10 credits). See department for additional courses in linguistics, literature, culture, and/or classical language that may apply.

Japanese

Minimum 50 credits

1. Minimum 50 credits in Japanese language, linguistics, literature, and/or culture. (Students who begin language study with first-quarter Japanese need 75 credits to complete the major.)
2. *Language:* JAPAN 303 (or JAPAN 334) required, unless waived because of advanced skills. Maximum 20 language credits may be counted toward the major, chosen from JAPAN 203 (or five credits of JAPAN 234); JAPAN 245; or any 300- or 400-level Japanese language courses. See department for list of approved language courses.
3. Linguistics, literature, and/or culture courses (minimum 30 credits, including at least 25 credits taken in the department.) Minimum 5 credits of advanced work, which may require linguistics, literature, and/or culture prerequisites. Any such prerequisites also count toward the 30-credit requirement. See department for list of approved courses.
4. Students entering with advanced language skills complete a placement test and interview to determine language course placement. Students who need fewer than 20 credits to complete JAPAN 303, or for whom JAPAN 303 is waived because of advanced skills, must still earn a minimum 50 credits for the major. These students may take 400-level Japanese language courses (placement interview may be required), or additional linguistics, literature, and/or culture courses. Students are strongly encouraged to consult an adviser to determine both language and other course options.

Korean

50-75 credits

1. *Language*: (15-45 credits; minimum 15 credits beyond second year)
2. Area-related humanities and social science courses (30-35 credits, to reach minimum 50 credits for the major).
3. Students placed beyond second year Korean must take 35 credits of area-related humanities and social science courses.

South Asian Languages

70 credits

1. *Language*: 45 credits beyond first-year level in a single South Asian language (Hindi or Sanskrit)
 - a. *Basic Language*: For Hindi - HINDI 201, HINDI 202, HINDI 203, HINDI 301, HINDI 302, HINDI 303; for Sanskrit - SNKRT 201, SNKRT 202, SNKRT 203, SNKRT 311, SNKRT 312, SNKRT 313
 - b. *Advanced Language, Literature, and Linguistics*: 15 credits at 400 level, all drawn from either the following Hindi or Sanskrit courses, depending on the basic language selected: For Hindi - HINDI 404, HINDI 421, HINDI 422, HINDI 423, HINDI 431, HINDI 451; for Sanskrit - SNKRT 491, SNKRT 492, INDN 401, INDN 402, INDN 410
2. *Literature in Translation (10 credits)*: ASIAN 203, ASIAN 206
3. *South Asian History (5 credits)*: One course from among HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404
4. *South Asian Humanities and Social Sciences (5 credits)*: Chosen in consultation with adviser. A list of courses that satisfy this requirement is included on the expanded description of the major available from the adviser.
5. *Capstone Seminar (5 credits)*: INDN 490

Asian Languages and Cultures

60 credits

1. Core Courses
 - a. Primary language. Second-year level (course numbered 203 or above) in one Asian language (15 credits)
 - b. Literature, culture, linguistics at 300-400 level, chosen from Asian Languages and Literature courses, not primarily using original-language materials. See department for list of approved courses. (5 credits)
2. Electives
 - a. Literature, culture, linguistics, chosen from Asian Languages and Literature courses, not primarily using original-language materials. See department for list of approved courses. (10 credits)
 - b. Language, literature, culture, linguistics. Any combination of language and/or disciplinary Asian Languages and Literature courses, subject to major's other requirements. See

department for list of approved courses. (30 credits; 10 credits may be chosen from outside Asian Languages and Literature.)

3. At least 30 credits at the 300-400 level
4. Minimum 2.0 cumulative GPA for courses applied to the major
5. Minimum 30 credits taken in residence through the UW

Minor

Minor Requirements

Chinese: 30 credits

1. Minimum 30 credits in modern Chinese language, linguistics, literature, culture, and/or classical language, taken within Asian Languages and Literature. (See department for Asian Languages and Literature courses other than Chinese that may be counted toward the minor.)
2. *Language:* CHIN 213 (heritage-track Chinese, considered equivalent to third-year level) or CHIN 303 (or equivalent). Maximum 15 credits of modern Chinese language, which may include CHIN 213, CHIN 301, CHIN 302, CHIN 303, or certain 400-level Chinese courses. First and second-year Chinese courses may not apply to the minor.
3. *Linguistics, literature, culture, and/or classical language:* Minimum 15 credits to include CHIN 342 or CHIN 442 (5 credits) and CHIN 461 or CHIN 463 (5 credits). Additional credits in linguistics, literature, culture, and/or classical language may be taken from courses on the department website.

Indonesian Language and Culture: 30 credits

1. *Language Courses:* 15 credits of second- and/or third-year Indonesian language (INDO 211, INDO 212, INDO 213; INDO 311, INDO 312, INDO 313)
2. *Culture Courses:* 15 credits of humanities and social science courses offered through the UW, chosen from approved Indonesian-related content courses or joint-listed equivalents. See department website for approved list.
3. Minimum 15 credits from 1 and 2 (above) taken at the 300 level or above
4. Minimum 2.0 cumulative GPA for courses applied to the minor

Japanese: 30 credits

1. Minimum 30 credits in Japanese language, linguistics, literature, and culture
2. Minimum 15 credits at the 300 or 400 level
3. *Language:* JAPAN 303 (or equivalent). Maximum 15 credits of Japanese language, which may include 300- or 400-level Japanese language courses. See department for list of approved courses. First and second-year Japanese courses may not apply to the minor. Students entering with advanced language skills complete a placement test and interview to determine language course placement. Students for whom JAPAN 303 is waived because of advanced skills must still earn a minimum 30 credits for the minor. These students may take 400-level Japanese language courses (placement interview may be required), or additional linguistics, literature, and/or culture courses. Students should consult an adviser to determine both language and other course options.
4. Linguistics, literature, and culture: Minimum 15 credits, all taken in the department. See department for list of approved courses.

5. In addition to JAPAN 303 and 15 credits of Japanese linguistics, literature, and culture, students choose 10 additional credits in language, linguistics, literature, or culture.
6. Minimum 2.00 cumulative GPA for all courses applied to the minor
7. Minimum 15 credits taken in residence through the UW

Korean: 30 credits

1. *Language courses:* 15 credits at or above third-year level (KOREAN 301, KOREAN 302, KOREAN 303, and/or KOREAN 345)
2. 15 credits in Korea-related humanities and social sciences courses: ASIAN 207 (when Korea is the topic), ASIAN 498 (when Korea is the topic), HSTAS 212, HSTAS 481, HSTAS 482, KOREAN 415, KOREAN 416, KOREAN 417, KOREAN 445, KOREAN 499, JSIS A 448
3. Minimum 15 credits taken in residence through the UW.

South Asian Languages and Literature (Bengali, Hindi, Sanskrit, Urdu): 30 credits

1. *Language courses:* 15 credits at the second-year level or above in a single Indic language: for Bengali, BENG 201, BENG 202, BENG 203; for Hindi, HINDI 201, HINDI 202, HINDI 203; for Sanskrit, SNKRT 201, SNKRT 202, SNKRT 203; for Urdu, URDU 201, URDU 202, URDU 203
2. South Asia related humanities and social science courses (15 credits): Literature (5 credits) ASIAN 203 or ASIAN 206; South Asia area studies (10 credits) chosen in consultation with adviser. A list of courses that satisfy this requirement may be found on the following website: <https://asian.washington.edu/south-asian-undergraduate-minor>.
3. Minimum 15 credits taken in residence through the UW.

Vietnamese Language and Culture: 30 credits

1. *Language:* 15 credits of second and/or third year Vietnamese (VIET 211, VIET 212, VIET 213, VIET 214, VIET 311, VIET 312, VIET 313)
2. *Culture:* 15 credits of Vietnamese-related humanities and social science courses offered at UW, chosen from approved list. See department for approved courses.
3. Minimum 15 credits at the 300 level or above
4. Minimum cumulative 2.00 GPA for courses applied to the minor

Asian Languages and Culture: 30 credits

1. Primary language (15 credits): second-year (200-level) courses, or above, in one Asian language
2. Language, literature, culture, linguistics (15) credits: 10 credits of disciplinary (non-language) courses; 5 credits may be chosen from outside Asian Languages and Literature. (See department for list of approved courses.)
3. Minimum 15 credits at the 300-400 level
4. Minimum 2.0 cumulative GPA for courses applied to the minor
5. Minimum 15 credits taken in residence through the UW

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*
 - *Language:* A student of one of the languages achieves competency in speaking, listening, reading, and writing. Skills acquired for the **minor** include the ability to manage simple spoken communicative tasks and social situations; to understand sentence-length utterances on familiar topics in face-to-face situations; to read simple connected texts dealing with personal and social topics; to write short essays on familiar topics grounded in personal experience and immediate surroundings. Skills acquired for the **major** include the ability to manage spoken communicative tasks, including topics of common interest, description and narration, expression of personal viewpoints, and presentation and support of an argument; to understand the main idea and important details of connected spoken discourse, ranging from face-to-face situations to radio and TV broadcasting; to understand the main idea and important details of written texts in a range of styles and registers; to write routine social correspondence using the appropriate conventions, and to write connected essays of several paragraphs in an appropriate linguistic register.
 - *Linguistics:* A student with a **minor** achieves competency in understanding the basic structure of the language, including its grammatical forms, writing system, and phonology; recognizing the language's historical relationships with other languages in the geographical region; understanding the structured and hierarchical nature of linguistic systems. A student with a **major** additionally achieves competency in understanding basic linguistic concepts and terminology in such fields as syntax, morphology, and phonology, and applying them to the analysis of the linguistic structures of the language; understanding the historical development of the language, including its historical linguistic features and dialectal development; recognizing the relationship between linguistic structures and literary forms and devices.
 - *Literature:* A student with a **minor** achieves competency in identifying major works and forms within the literary tradition; understanding the place of selected literary texts within the ongoing tradition; understanding the historical and cultural contexts of major literary forms and works; understanding the roles of literary works and literary activity within the culture; utilizing basic research skills. A student with a **major** additionally achieves competency in reading selected literary texts in the original; employing linguistic and philological analysis as tools for understanding literary texts; performing formal analysis of literary texts; analyzing literary texts with reference to relevant literary traditions and intertextual dynamics; analyzing literary texts with reference to their historical background and broader cultural context; practicing critical reading of primary and secondary texts; employing research and writing skills to produce formal written analysis of literary texts.
 - *Asian Languages and Cultures: Common Skills:* Basic foundation in at least one Asian language, including competency in speaking listening, reading, and writing; fundamental skills in critical thinking, research, and oral and written communication; knowledge of various Asian cultural traditions, familiarity with disciplinary methodologies of the humanities. *Shared Outlook:* Appreciation of Asian cultures in broader regional and international contexts, emphasizing mutual relations and influences. *Skills Specific to Students' Individual Choices:* Varying levels of competence in from one to three Asian languages; advanced proficiency in disciplinary methodologies; more in-depth knowledge of selected Asian cultural traditions; comparative understanding of cultural phenomena and their history across different regions of Asia. *Career Preparation:* Skills in one or more languages, critical thinking, research, and written and oral communication; capacity to explore and find connections among diverse fields of knowledge; adaptability, broad skill set, and learning capacity (as opposed to narrow specialization) necessary to succeed within the diverse and rapidly changing technological, economic, social, and cultural environments of today's global economy in such fields as teaching and research, professional programs, consulting firms, commerce, law, the media, museums, cultural

institutions, public administration, government agencies, and non-governmental organizations.

- *Instructional and Research Facilities:* None
- *Honors Program:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* None offered
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* None

Graduate Program

Graduate Program Coordinator
225 Gowen, Box 353521
(206) 543-4996

The department offers programs of study leading to the master of arts and doctor of philosophy degrees with specializations in (1) the languages and literatures of China; (2) the language and literature of Japan; (3) the languages and literatures of South Asia, subsuming Sanskrit and Hindi; (4) Buddhist studies. All graduate students affiliate themselves with one of these programs. The department does not offer degrees or specializations in language pedagogy.

Master of Arts, Buddhist Studies

Admission Requirements

1. Undergraduate major in the language and literature of specialization (four years of language training if the language is Chinese or Japanese; fewer years of language acquisition may be acceptable in South Asian languages), or equivalent background. Other students may qualify for admission, but must acquire program prerequisites during the earliest stages of their graduate study.
2. Statement of academic goals
3. Three letters of recommendation addressed to the Graduate Program Coordinator

Degree Requirements

45-54 credits plus language requirements

1. *Coursework requirement:*
 - a. *Non-thesis program:* 45 course credits, 18 at the 500 level and above. Seminars and text reading courses must be included. Language study through the fourth-year level in the major language.
 - b. *Thesis program:* 45 course credits plus 9 thesis credits. Minimum 18 of the 45 course credits at the 500 level or above. Seminars and text reading courses must be included. Language requirements the same as in the non-thesis program. MA thesis. Oral examination.
2. *Foreign language requirements:* Competence in the major language.

Master of Arts, Chinese

Admission Requirements

1. Minimum 3.00 undergraduate GPA in the junior and senior years
2. Three letters of recommendation and statement of purpose
3. Strong undergraduate preparation in one of the following: Chinese language and literature, another foreign language and literature, Asian regional studies, comparative literature, linguistics, English, philosophy, or history. Completion of four years of modern Chinese and one year of classical Chinese, each with a minimum 3.00 GPA.
4. Students lacking such preparation may be admitted provisionally, and are required to make up deficiencies during their first year of residence.

Degree Requirements

38-40 credits

1. Two options: (1) thesis program, and (2) non-thesis program which requires two seminar or research papers in lieu of a thesis, and two 500-level departmental courses in addition to the requirements specified below.
2. *Coursework requirements:*
 - a. *Second-Year Classical Chinese*(15 credits): CHIN 551, CHIN 552, CHIN 553
 - b. *Methods and Materials* (5 credits): CHIN 559
 - c. *History of Chinese Literature* (5 credits): Any one course of the following three-quarter sequence: CHIN 461, CHIN 462, CHIN 463
 - d. *Chinese Language* (5 credits): CHIN 442
 - e. Minimum one course from each of the following two groups (8-10 credits):
 1. *Group I -- Literature:* CHIN 461, CHIN 462, CHIN 463; CHIN 482; CHIN 554, CHIN 555, CHIN 556; CHIN 561, CHIN 562, CHIN 563; CHIN 573; CHIN 575; CHIN 580; CHIN 582; CHIN 583; CHIN 590; CHIN 591, CHIN 592, CHIN 593
 2. *Group II -- Linguistics and Philology:* CHIN 443; CHIN 531, CHIN 532, CHIN 533; CHIN 540; CHIN 541; CHIN 542; CHIN 544; CHIN 557; CHIN 558
3. *MA examination:* Covers Chinese literature: second part focuses on language (linguistics and philology) and texts. Normally taken no later than autumn quarter of the third year.

Master of Arts, Japanese Language and Literature

Admission Requirements

1. Minimum 3.00 undergraduate GPA in the junior and senior years
2. Three letters of recommendation and statement of purpose
3. Strong undergraduate preparation in any of the following: Japanese language and literature, with the equivalent of at least four years' work in the language; another language and literature, Asian regional studies, comparative literature, linguistics, art history, English, philosophy, or history.
4. A student lacking such preparation may be admitted, but is expected to concentrate initially on coursework to compensate for deficiencies. In case of inadequate training in Japanese, intensive courses are available.

Degree Requirements

45-75 credits

1. *Coursework*: Minimum 45 credits above the 300 level earned through a combination of coursework and research. At least 18 credits in numerically graded courses at the 400 and 500 level, and 18 credits at the 500 level and above.

The following courses normally constitute a minimal level of training: JAPAN 321, JAPAN 322, JAPAN 323 (no graduate credit); JAPAN 421, JAPAN 422, JAPAN 423; JAPAN 431, JAPAN 432, JAPAN 433; JAPAN 471, JAPAN 472, JAPAN 473. Students with a background comparable to this may enter more advanced courses. Less well prepared students may require a program considerably in excess of the minimum 45 credits.

The student completes requirements by submitting (1) a thesis, or (2) two research papers.

2. *MA general examination*: two written examinations, one pre-modern (pre-Meiji) literature, the other modern.

Master of Arts, Japanese Language and Linguistics

Admission Requirements

1. Minimum 3.00 undergraduate GPA in the junior and senior years
2. Three letters of recommendation and statement of purpose
3. Strong undergraduate preparation in any of the following: Japanese language and literature, with the equivalent of at least four years' work in the language; another language and literature, Asian regional studies, comparative literature, linguistics, art history, English, philosophy, or history
4. A student lacking such preparation may be admitted, but is expected to concentrate initially on coursework to compensate for deficiencies. In case of inadequate training in Japanese, intensive courses are available.

Degree Requirements

45-75 credits

1. *Coursework*: Minimum 45 credits above the 300 level earned through a combination of coursework and research. Minimum 18 credits in numerically graded courses at the 400 and 500 level, and 18 credits at the 500 level and above.

The following courses normally constitute a minimal level of training: JAPAN 421, JAPAN 422, JAPAN 423 (if language training is necessary); JAPAN 342 (no graduate credit); JAPAN 343 (no graduate credit); JAPAN 440; JAPAN 442; JAPAN 443. Students with a background comparable to this may enter more advanced courses. Less well prepared students may require a program considerably in excess of the minimum 45 credits.

The student completes requirements by submitting (1) a thesis or (2) two research papers.

2. *Linguistics*: Two written examinations in Japanese linguistics, whether in descriptive linguistics, theoretical linguistics, applied linguistics, or sociolinguistics.

Master of Arts, South Asian Languages and Literature

Admission Requirements

1. Minimum 3.00 undergraduate GPA in the last 90 quarter or 60 semester credit hours
2. Three letters of recommendation and statement of purpose
3. Preference given to students with prior preparation in a South Asian language and literature, in South Asian regional studies, or in a humanistic discipline pertinent to the study of South Asian civilization. Students lacking such preparation may be admitted but must add courses to compensate for deficiencies. South Asian language specializations at the UW are Sanskrit and Hindi.

Degree Requirements

45-75 credits

1. *Coursework:*
 - a. *Non-thesis program:* 45 course credits, 18 at the 500 level and above. Language study through the fourth-year level in the student's major language. Two approved seminar papers.
 - b. *Thesis program:* 45 course credits plus 9 thesis credits. At least 18 credits at the 500 level or above. Language requirements are the same as in the non-thesis program. An acceptable MA thesis. Oral examination.
2. *Foreign language requirement:* Competence in the major South Asian language.

Doctor of Philosophy, Buddhist Studies

Admission Requirements

MA degree in Asian Languages and Literature at the UW and satisfactory evaluation by South Asian language faculty. Students with comparable background, usually successful completion of a relevant MA degree at another institution, may be considered.

Degree Requirements

90 credits

1. Competence in their major Asian languages
2. Written examinations in two research languages other than English and the student's native language (i.e., one written examination in addition to that completed at the MA level)
3. Ability to do original research utilizing primary languages of Buddhist traditions in accord with chosen areas of concentration
4. Recommended: competence in a modern research language in order to pursue research in the field, e.g., in India, Nepal, Sri Lanka, Tibet, China, or Japan
5. Three written field examinations. At least two of these examinations directly related to some aspect of Buddhist Studies; a third will fall within the general purview of South Asian languages and literature in an adjacent field or discipline.
6. Comprehensive oral examination
7. Dissertation

Doctor of Philosophy, Chinese

Admission Requirements

1. Completion of 45 credits (minimum three quarters) of graduate study in the department.
2. Petition stating post-MA academic plans and goals.
3. Normally an MA degree in Chinese language and literature or an MA in another pertinent field; e.g., linguistics, comparative literature, philosophy, history, or Asian regional studies. A student, however, must satisfy all course and examination requirements for the department's MA program. Upon admission, such a student should be prepared to take courses in modern Chinese at the 500 level, and should have at least two years of Classical Chinese.
4. Students intending to go directly from the BA to the PhD need exceptionally strong background preparation in literary study or linguistics, are expected to satisfy all curriculum requirements for the MA, and must petition the department for special permission to bypass the MA.

Degree Requirements

90 credits:

1. *Course requirements:* Complete the course requirements for the MA in Chinese. Equivalent courses from other programs may be substituted subject to written approval by the regular instructor. CHIN 461, CHIN 462, CHIN 463 not taken for the MA must be taken for the PhD. Post-MA coursework should be designed to strengthen weaknesses in the student's background, and to establish and develop three fields of special study that the student pursues in depth.
2. *Field requirements:* Three fields. Familiarity with both original texts and secondary scholarship of each field. Show potential for carrying out original research in these areas or fields. Written field examinations.

The three fields must reflect both the primary components of the department's graduate-level offerings, i.e., language (linguistics and philology) and literature. In at least one field students are encouraged to incorporate some aspect of Chinese history and culture, exclusive of strictly literary or linguistic facets. A student may offer one field from outside the department; e.g., general linguistics, literary criticism, a non-Chinese literature, Chinese philosophy or religion, or a specific period of Chinese history. Such a field must be related in a significant way to the student's overall course of study.

3. *Examinations:* Taken in the three fields separately. Prior to the general examination the student demonstrates reading knowledge of an additional Asian language and a pertinent European language.

Doctor of Philosophy, Japanese

Admission Requirements

Students are admitted first to the department, then later petition for entry to the PhD program. Applicants with an MA in Japanese literature and culture from another institution complete at least 45 credits of coursework, then submit a petition, which allows them to bypass other MA requirements. Students without an MA in Japanese literature and culture enter the MA program and complete all requirements before submitting a petition. See the Japanese MA program for more information.

Degree Requirements

95 credits

1. *Course requirements:* In addition to the minimum 45 credits or equivalent required for the master's program, at least 50 credits of coursework at the graduate level, 20 of which at the 500 level.
 - a. Modern Japanese: JAPAN 431, JAPAN 432, JAPAN 433 (may be bypassed with previous training, if approved)
 - b. Classical Japanese and kambun: JAPAN 471, JAPAN 472, JAPAN 505 (may be bypassed with previous training, if approved)
 - c. 10 credits in classical Japanese literature and culture: JAPAN 571, JAPAN 572, or JAPAN 573
 - d. 10 credits in modern Japanese literature and culture: JAPAN 531, JAPAN 532, or JAPAN 533
2. Additional coursework may be required.
3. *Language requirement:* In addition to English and Japanese, proficiency in a third language related to the student's course of study.
4. *Fields:* Advanced studies in three distinct fields. One must be classical Japanese literature and one modern Japanese literature. Each requires a substantial research paper. The third field may be pursued outside the department.
5. *General examination*
6. *Dissertation and final examination*

Doctor of Philosophy, South Asian Languages and Literature

Admission Requirements

Normally entry is contingent upon successful completion of the MA degree in Asian Languages and Literature at the UW and a satisfactory evaluation by South Asian Language program faculty. Students with sufficient background, usually successful completion of a relevant MA degree at another institution, may be considered.

Degree Requirements

90 credits

1. *Languages:* Competence in the major South Asian language, to include written examinations in two research languages other than English and the student's native language (i.e., one examination in addition to the examination completed at the MA level). One of these must be a European language.
2. *Fields:* Three written field examinations, at least two of which must fall within the general purview of South Asian languages and literature. The third may have as its subject an adjacent field or discipline, if the candidate so chooses.
3. *Comprehensive oral examination*
4. *Dissertation*

Financial Aid

Financial aid for graduate students newly entering the department is very limited and is awarded on a competitive basis. National Resource Fellowships are awarded for the study of Chinese, Japanese, and Korean. The department offers incoming graduate students limited opportunities for teaching assistant positions in Chinese, Japanese, and Korean. Since some financial aid is determined by need, all prospective students are urged to submit the Free Application for Federal Student Aid (FAFSA), and to apply for other forms of aid mentioned in the department's cover letter to prospective students.

Astronomy

Department Overview

C319 Physics-Astronomy Building

Modern research in astronomy and astrophysics encompasses a large number of disciplines and specialties. Research areas include planetary systems and astrobiology, stellar structure and evolution, interstellar matter, binaries and compact objects, galactic structure and dynamics, galaxies and quasars, and large scale structure and cosmology.

Undergraduate Program

Adviser

C319 Physics-Astronomy, Box 351580
(206) 543-2888

office@astro.washington.edu

The Department of Astronomy offers the following undergraduate program:

- The Bachelor of Science degree with a major in astronomy

Bachelor of Science

Suggested First-Year Courses: MATH 124, MATH 125, MATH 126, MATH 308, MATH 324; PHYS 121, PHYS 122, PHYS 123. At community colleges it is better to take courses in physics, chemistry, mathematics, and computer science rather than the usual introductory astronomy courses.

Department Admission Requirements

1. Minimum requirements for consideration: PHYS 121, PHYS 122, PHYS 123 (or transfer equivalent; may be presently enrolled in PHYS 123). Minimum 2.00 cumulative GPA for physics courses. Either MATH 124, MATH 125, MATH 126 or MATH 134, MATH 135 (or full transfer equivalent; may be presently enrolled in MATH 126 or MATH 135).
2. Standard admission is twice a year. Application deadlines: third Friday of autumn quarter and third Friday of spring quarter.

Winter quarter transfer admission: Students transferring to the UW in autumn or winter quarter may also apply the third Friday of winter quarter.

3. Meeting minimum requirements does not guarantee admission. Admission is capacity constrained, based on holistic review of a student's record as follows:
 - a. Academic performance to include review of overall GPA and content of all courses completed; frequency of incompletes or withdrawals and number of repeated courses; and an academic record that demonstrates interest in science, technology, engineering, and/or mathematics.
 - b. Personal statement, consisting of a brief (500-1,000 word) description of the student's interest and goals in the astronomy major and addresses strategies of success in the major. In cases of exceptional or extenuating circumstances, the personal statement may

include a petition for waiver of one of the stated minimum requirements shown in admission requirement 1, above. A more extensive list of possible additional topics is provided on the Astronomy Department Undergraduate Admission web page.

Consult the Astronomy Department website for additional application information and sample graduation plans.

Major Requirements

89 credits as follows:

1. ASTR 300, ASTR 321, ASTR 322, ASTR 323
2. 9 graded credits of astronomy 400-level courses (with at least 3 credits in ASTR 480 or ASTR 499). Data analysis (ASTR 480) and senior-year research (ASTR 499) are highly recommended, especially for students planning graduate work.
3. PHYS 121, PHYS 122, PHYS 123; PHYS 224, PHYS 225, PHYS 226, PHYS 227, PHYS 228; PHYS 321, PHYS 322, PHYS 334
4. MATH 124, MATH 125, MATH 126, and 6 credits from MATH 307, MATH 308, MATH 309, MATH 324, MATH 326, AMATH 352, OR AMATH 353
5. An additional 6 physics credits in courses at the 300 level or above in physics (chosen from PHYS 311, PHYS 323, PHYS 324, PHYS 325, PHYS 328, PHYS 331, PHYS 335, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 431, PHYS 432, PHYS 433, PHYS 434) or engineering as approved by adviser.
6. No grade below 2.0 is acceptable in courses fulfilling the above requirements.
7. Undergraduates interested in advanced work in astronomy are advised to take a double major in astronomy and physics. Undergraduates interested in immediate employment at an observatory or other scientific institution should include computing and electronics courses as part of their program. As a capstone sequence of hands-on research and dissemination of results, the following is highly recommended: ASTR 480, followed by either ASTR 481 or ASTR 499 or a Research Experience for Undergraduates (REU) project, and ending with ASTR 482.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* With this degree, students obtain knowledge of the components of the universe, an understanding of the physics of its structure, and the technical skills to obtain and analyze data from telescopes. Graduates go on to graduate school or work at observatories or in industrial applications (lasers, x-ray, optical imaging) or in teaching applications. Students are able to do the following:
 - Understand the principal findings, common application, and current problems within astronomy as a scientific discipline
 - Be versed in the computational methods and software resources utilized by professional astronomers
 - Have experience operating modern astronomical instrumentation and analyzing a range of experimental data
 - Assess, communicate, and reflect their understanding of astronomy and the results of astrophysical experiments in both oral and written formats
 - Learn in a diverse environment with a variety of individuals, thoughts, and ideas
- *Instructional and Research Facilities:* The department operates a 30-inch telescope with modern instrumentation, primarily for students, at the Manastash Ridge Observatory near Ellensburg. The

department is also part of a consortium of universities that operate a 3.5-meter optical/infrared telescope located on Sacramento Peak, New Mexico and that are partners in the innovative Sloan Digital Sky Survey and the future Large Synoptic Survey Telescope. Students also have access to a variety of national facilities, such as the Kitt Peak and Cerro Tololo observatories and the Very Large Array. A variety of research is conducted with satellite instruments such as the Hubble Space Telescope. Data analysis and theoretical research are conducted on the department's cluster of computers, and on a variety of UW and national supercomputer facilities. Undergraduate majors often assist faculty members in acquisition, reduction, and interpretation of data.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Washington State Space Grant, NSF research experiences for undergraduates. NASA internships, outreach opportunities
- *Department Scholarships:* Baer Prize. See adviser for details.
- *Student Organizations/Associations:* The Society of Physics Students. Undergraduate Astronomy Institute/Palen Radio Astronomy Group. League of Astronomers. See adviser for details.

Of Special Note: The first required astronomy course, ASTR 321, must be preceded by at least one year of college physics and mathematics. Any lower-division astronomy courses count as electives and not as part of the major. To finish in four years, the student must have completed PHYS 123 before winter quarter of the sophomore year. Students are encouraged to take the capstone sequence: spring: ASTR 480; summer: ASTR 481 or ASTR 499 or an REU (Research Experiences for Undergraduates) program; autumn: ASTR 482.

Graduate Program

Graduate Program Coordinator
C319 Physics-Astronomy, Box 351580
(206) 543-2888
grad@astro.washington.edu

Graduate courses in solar system, stellar, galactic, and extragalactic astrophysics are offered. The heart of the program, collaboration of students and faculty members in research at the frontiers of astronomy, involves developing techniques and insight necessary for successful research and, subsequently, defining a thesis topic. Thesis research may use theoretical, computational, or observational material (obtained through facilities of the UW or one of the national ground- or space-based observatories, or a combination). Active research programs in observations and theory are carried out in a variety of areas, including astrobiology and extrasolar planets, interplanetary dust and comets, stellar atmospheres and interiors, stellar evolution and populations, interacting binary stars and compact objects, interstellar matter and nebulae, computational astrophysics and data mining, galaxies and quasars, large scale structure and cosmology, and dark matter and energy.

Doctor of Philosophy

Admission Requirements

Most entering students have a bachelor's degree in physics. Entering students are not required to have a background in astronomy, although some knowledge of general astronomy is expected of those to whom a teaching assistantship is offered. Interested undergraduates are urged to concentrate on preparation in physics and mathematics before entering.

Visit www.astro.washington.edu/grad for details on admission requirements. Most application material is submitted through the Graduate School online application.

Degree Requirements

90 credits minimum, to include the following:

Typically PhD students take formal courses during their first two years at the UW while sampling research projects with various faculty. Areas covered include planetary astronomy, stellar interiors and atmospheres, interstellar medium, galaxies, dynamics, cosmology, physical processes, observational astronomy, and a variety of special topics. Early on, students may embark on faculty-supervised research programs.

Core Curriculum: Typical core courses include ASTR 507, ASTR 519, ASTR 521, ASTR 531, ASTR 557, ASTR 561 in one year, and ASTR 508, ASTR 509, ASTR 511, ASTR 512, ASTR 513, ASTR 541 in the alternate year, along with ASTR 500 and ASTR 581 (latter two often offered annually). In addition, each quarter students take a third course emphasizing additional physical or mathematical science study or astronomical research.

Examinations: (1) Qualifying written examination covering general knowledge, taken and passed by the end of the third year. (2) General examination, an oral examination on a topic related to a student's proposed PhD research topic.

Dissertation: Students begin PhD research after passing the general examination, typically in the third or fourth year at UW. Most students complete the PhD thesis and defense two to three years later.

A master of science degree is offered but the department is not currently accepting students for a master's-only program. Students typically earn the master's degree as part of the PhD program. The departmental requirements for a master's degree are either (1) adequate performance on the qualifying exam or (2) an approved and supervised master's thesis.

Assistantships

Normally all students making satisfactory academic progress receive financial support. More than three-quarters of the department's graduate students hold fellowships or research assistantships. Teaching assistantships are available, primarily in elementary astronomy courses.

Biochemistry

Program Overview

303 Bagley

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

Undergraduate Program

Adviser

303 Bagley, Box 351700

(206) 616-9880, (206) 543-9343, (206) 685-8376

advisers@chem.washington.edu

The Biochemistry Program offers the following programs of study:

- The Bachelor of Science degree with a major in biochemistry (requires 195 credits)
- The Bachelor of Arts degree with a major in biochemistry

Suggested First- and Second-Year Courses: BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

Bachelor of Science

Program Admission Requirements

Application to BA and BS degree programs in biochemistry is capacity constrained. Applicants are considered in the following groups: Direct Freshman Admission, Research/Honors Admission, Early Admission, and Regular Admission. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered twice each academic year and are due on the second Friday of October and the second Friday of April, with the exception of Direct Freshman Admission. The application and additional information is available at depts.washington.edu/chem/undergrad/.

Direct Freshman Admission

1. Open to freshman students formally admitted to the UW
2. Indication on the UW freshman application of biochemistry as the student's first choice of major
3. Successful direct-admission applicants generally have received a minimum 1400 on the SAT (math and verbal sections), or minimum 30 on the ACT
4. Admission is for autumn quarter only

Research/Honors Admission

1. Students with exceptional records can apply for consideration for admission to the biochemistry major via the Honors or Research track. Students seeking admission should submit an application that includes:
 - a. Cover sheet (available on the Department of Chemistry website)
 - b. Unofficial transcript
 - c. Statement of purpose. May include a description of interest in biochemistry, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.
 - d. (Research track only) Written letter or recommendation from research adviser
2. Honors Track. Students participating in the chemistry Honors sequence who have completed the following courses with a minimum 3.00 cumulative GPA: CHEM 145, CHEM 155; MATH 124 and MATH 125, or MATH 134 and MATH 135
3. Research Track. Students who have performed at least 6 credits of undergraduate research (CHEM 199, CHEM 299, or higher) and who provide a strong recommendation from faculty research adviser. Chemistry undergraduate research may be considered as well.

Early Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); BIOL 180; MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors included in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS biochemistry program typically have a cumulative GPA greater than 3.20 in courses listed above under course requirements. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 3.00 in courses listed above under course requirements.

Regular Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238 (or CHEM 335, CHEM 336); BIOL 180, BIOL 200; MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS biochemistry program typically have over the minimum 2.5 cumulative GPA in courses listed above under course requirements, with no individual course grade lower than a 2.0. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 2.00 in courses listed above under course requirements, with no individual grade below a 1.7.

Major Requirements

103-114 credits

1. *General Chemistry*: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry*: CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
3. *Physical Chemistry*: CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457)
4. *Biochemistry*: BIOC 426, BIOC 440 (or BIOC 450), BIOC 441 (or BIOC 451), BIOC 442
5. *Biology*: BIOL 180, BIOL 200
6. *Mathematics*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
7. *Physics*: PHYS 121, PHYS 122, PHY 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
8. *Genome Science*: GENOME 361 or GENOME 371
9. 11 credits chosen from a current department list (available in 303 Bagley or at depts.washington.edu/chem/undergrad/degreereqs.html) of upper-division science classes including math, biology, microbiology, chemistry, and genome sciences. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.
10. *Grade and Graduation Requirements*: Minimum 2.0 grade and minimum cumulative 2.50 GPA required for all chemistry, biology, and biochemistry courses counted toward the major. Minimum 2.50 GPA required for the BIOC 440, BIOC 441, and BIOC 442 sequence. Minimum 2.50 cumulative GPA required for graduation.

Bachelor of Arts

Program admission requirements same as for BS degree, above.

Major Requirements

90-92 credits as follows:

1. *General Chemistry*: either CHEM 142, CHEM 152, CHEM 162, (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry*: either CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347
3. *Biochemistry*: BIOC 405, BIOC 406
4. *Physical Chemistry*: CHEM 452, CHEM 453
5. *Biology*: BIOL 180, BIOL 200
6. *Mathematics*: either MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136
7. *Physics (12-15 credits)*: either PHYS 121, PHYS 122, PHYS 123, or PHYS 114, PHYS 115, PHYS 116
8. *Science Electives*: 9 credits to be taken from a current department list available in 303 Bagley or at depts.washington.edu/chem/undergrad/degreereqs.html. Up to 3 credits of advanced

undergraduate research may count toward this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.

9. *Grade and Graduation Requirements:* Minimum 1.7 grade in chemistry, biochemistry, and biology courses required for the major. Minimum 2.00 cumulative GPA required for graduation.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors.

Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- *Instructional and Research Facilities:* Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology, and molecular and cellular biology, with which the department has common research interests. Laboratories are equipped with modern research equipment and are supported by external, centralized research facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

Research, Internships, and Service Learning: No formal internship program. Students are encouraged to pursue national and regional internships. See adviser for more information.

- *Program Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department adviser for more information.
- *Student Organizations/Associations:*
 - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
 - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
 - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

Of Special Note:

- The Bachelor of Science in biochemistry degree requires a minimum of 193 credits.
- Students are strongly encouraged to participate in undergraduate research.

Biology

Department Overview

106 Kincaid

Biology is the broadly based study of living organisms and has become an increasingly dynamic and wide-ranging discipline. It may be approached by focus on cell and molecular processes, development, organismal physiology and morphology, natural history, evolution, conservation, or ecology. The aim is to elucidate general principles applicable to many different sorts of organisms rather than to concentrate on any particular taxonomic group. Biology is often interdisciplinary in nature and may involve aspects of biochemistry, botany, genetics, microbiology, zoology, and many other natural sciences.

Undergraduate Program

Adviser

318 Hitchcock, Box 355320

206-543-9120

bioladv@uw.edu

The Department of Biology offers the following programs of study:

- The Bachelor of Arts degree with a major in biology.
- The Bachelor of Science degree with a major in biology. Students choose one of the following options: ecology, evolution, and conservation; general; molecular, cellular, and development; physiology; and plant.
- A minor in paleobiology.

Designed for students desiring breadth of training, the Bachelor of Arts program does not require physics. Students do not select an emphasis, and hence have greater flexibility in upper-division biology electives.

The Bachelor of Science options are as follows:

1. *Ecology, Evolution, and Conservation.* Emphasizes ecological and evolutionary processes and conservation biology. Relates these areas to systematics, the distribution and abundance of organisms, and environmental policy. Prepares students for graduate study in ecology and evolution, for professional schools that seek individuals with strong system-level approaches to problem solving, and for careers in natural resources and conservation.
2. *General.* Emphasizes breadth of training in biology. This is the most flexible program and offers a greater variety of advanced electives than other options. Attractive to students desiring K-12 teaching credentials or who otherwise wish to tailor their degree to their needs.
3. *Molecular, Cellular, and Development.* Designed for students who wish to pursue graduate studies in genetics, biochemistry, microbiology, cell biology, or developmental biology, as well as for candidates for professional schools such as medicine and dentistry.
4. *Physiology.* Emphasizes physiological processes from the cellular to the organismal levels, and across all groups of organisms. An attractive option for students interested in graduate and professional fields in animal and human physiology, medicine, and veterinary sciences.

5. *Plant*. Offers students both breadth and depth of training in the field of botany. Ideal for students desiring to enter graduate programs in botany or for those wishing to pursue careers in the plant biology or horticultural fields in state and federal agencies.

Each of the above bachelor's degree programs in the biological sciences can be combined with Washington State requirements to prepare students to teach biology in public schools at the secondary level. See the Biology Teaching Program adviser for specific requirements.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Same as for the Bachelor of Science degree as described below, except no physics or third quarter of organic chemistry is required.

Department Admission Requirements

Same as for the Bachelor of Science degree as described below.

Major Requirements

87-98 credits

1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
2. One of the following general and organic chemistry sequences (15-23 credits)
 1. CHEM 120, CHEM 220, CHEM 221
 2. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224
 3. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238
 4. CHEM 143, CHEM 153, CHEM 237, CHEM 238
3. Physics: not required
4. One of the following calculus/statistics sequences (9-10 credits)
 1. MATH 124 and MATH 125
 2. Q SCI 291 and Q SCI 292
 3. Either BIOST 310, Q SCI 381 or STAT 311; Q SCI 482
 4. One approved calculus class and one approved statistics class; see adviser for approved lists.
5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340 (3-5 credits)
6. Natural history/biodiversity: one course selected from approved list (3 credits)
7. 300- and 400-level courses, in addition to any 300-/400-level courses taken to fulfill requirements above. See department website for approved courses. (42 credits.)
8. Minimum 2.0 cumulative GPA for courses applied toward major requirements

Bachelor of Science

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for

specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Knowledge requirement during the first two years.

Department Admission Requirements

Application to the BA and BS degree programs is capacity constrained. Applications, accepted quarterly, are due the second Friday of autumn, winter, spring, and summer quarters, by 11:59 p.m. Applications received after the quarterly deadline are considered for the subsequent quarter.

Minimum requirements for consideration

1. Matriculated student in good academic standing at UW Seattle.
2. Minimum 2.0 grade in each of BIOL 180, BIOL 200, and BIOL 220; or in BIOL 240
3. Minimum 2.50 cumulative GPA for any supporting chemistry, physics, mathematics, and biology courses (or other courses that may apply to major requirements) completed at time of application.
4. Personal statement: May include description of interest in biology, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.

Meeting minimum requirements does not guarantee admission. Other factors include overall academic record and difficulty of other courses completed; time to degree set by UW Satisfactory Progress Policy, including frequency of incompletes or withdrawal grades and number of repeated courses; relevant work and life experience; and record of honors.

Major Requirements

87-104 credits for all options:

1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
2. One of the following general and organic chemistry sequences:
 - a. CHEM 120, CHEM 220, and CHEM 221
 - b. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224
 - c. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239
 - d. CHEM 143, CHEM 153, CHEM 237, CHEM 238, CHEM 239
3. One of the following two-quarter sequences of mathematics (calculus/statistics):
 - a. MATH 124 and MATH 125
 - b. Q SCI 291 and Q SCI 292
 - c. Either BIOST 310, Q SCI 381, or STAT 311; Q SCI 482
 - d. One approved calculus class and one approved statistics class; see adviser for approved lists.
4. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340.
6. Natural history/biodiversity: one course selected from approved list (3 credits)
7. *Option Requirement:* 300- and 400-level courses selected from lists specific to each option. See department website for additional information. (34 credits)

*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and that sequence does require CHEM 162.

8. *Additional Degree Requirements:*

- a. Minimum 2.00 cumulative GPA for all UW courses applied toward major requirements, including required supporting courses (chemistry, physics, mathematics), introductory biology, and upper-division coursework. (A grade of 2.0 is not required in individual courses.)
- b. Minimum 15 credits of 400-level biology electives taken through the UW.
- c. Two 300- or 400-level laboratory courses

Because of the differing specific requirements and choices for each option, it is extremely important for students to work closely with the Biology departmental advisers to insure completion of these 22-25 credits.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Paleobiology

Along with the departments of [Anthropology](#) and [Earth and Space Sciences](#), the Department of Biology offers a minor in paleobiology. For more information on the minor, see its entry [elsewhere](#) in the General Catalog.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The department graduates between 350 and 400 students each year. Biology degrees are applicable to many different fields, depending upon student interests. Students in the program gain analytical and laboratory skills that prepare them for entry-level positions in a variety of biologically related areas, including, but not limited to, biotechnology, laboratory and/or field research support, health science support, wildlife biology, and ecology and conservation work with a variety of agencies, consulting firms, and research organizations in the Northwest. Students may enter graduate programs that focus on some aspect of biological science (such as genetics, microbiology, immunology, ecology, environmental health, or cell and molecular biology), or enter a variety of professional programs, such as veterinary medicine, medicine, dentistry, pharmacy, laboratory medicine, and nursing.
- *Instructional and Research Facilities:* The Department of Biology occupies 128,000 square feet in Hitchcock, Johnson, and Kincaid Halls. Extensive research laboratories, teaching laboratories, computer workstations, and support services are found throughout the department.

Specialized facilities include more than 16,000 square feet of greenhouse, seawater facilities, growth rooms, electron microscopes, and other specialized equipment. Undergraduates have access to most of these facilities, especially those engaged in undergraduate research.

Off campus, the internationally recognized Marine Research Station, Friday Harbor Laboratories, provides many opportunities for undergraduates, from courses to research apprenticeships.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Biology faculty welcome undergraduates into their research programs, often working closely with them. Approximately 40 percent of the 900 undergraduate biology majors finish with undergraduate research experience.

UW proximity to such Seattle area organizations as the Fred Hutchinson Cancer Research Center, Swedish Hospital, numerous biotech companies, NOAA, National Marine Fisheries Research Center, the Seattle Aquarium, and the Woodland Park Zoo, as well as the close ties of Biology faculty to Friday Harbor Laboratories and the faculty in the College of the Environment provide opportunities for biology majors to develop internships within these organizations. See adviser for ways to get credit for such experiences.

- *Department Scholarships:* Several scholarships are available, in a few cases to biology majors only. Most of these support students wishing to pursue an undergraduate research experience. They are competitive, sometimes highly so. They include:
 - *Howard Hughes Undergraduate Research Internship:* approximately 20 per year for freshmen and 20 per year for juniors and seniors.
 - *Friday Harbor Laboratory (FHL) Apprenticeships:* \$3,000 for one quarter, spring or autumn.
 - *Mary Gates Scholarships:* very competitive, across all science disciplines.
 - *Herschel and Caryl Roman Scholarship:* \$2,500-\$5,000 annually to one or two students who have an interest in genetics research.
 - *Porath/Johnson Endowed Scholarship:* one-year, \$5,000 scholarship to an outstanding biology major.

For qualifications, deadlines, and other details, see adviser or consult the Department of Biology website.

- *Student Organizations/Associations:* Beta Beta Beta Biology Honor Society, tribeta@uw.edu; Pre Med Society (Alpha Epsilon Delta), aed@uw.edu.

Graduate Program

Graduate Program Coordinator
106 Kincaid Hall, Box 351800
206-685-8240
biolgrad@u.washington.edu

Doctor of Philosophy

Admission Requirements

1. UW Graduate School requirements as shown at www.grad.washington.edu/students/index.shtml
2. Academic background equivalent to that required of students receiving a BS degree from the department www.biology.washington.edu. Assessment of background and requirements for any remedial work occurs prior to the beginning of autumn quarter in the student's first year.

Degree Requirements

1. Request appointment of a Supervisory Committee no later than autumn quarter of the second year in residence. Meet at least once annually with the Supervisory Committee.
2. Upon completion of 18 graded credits and 60 regular credits of coursework, schedule the general examination, which consists of a written research proposal followed by an oral examination, taken no later than spring quarter of the second year in residence. Successful completion makes the student a candidate for the PhD degree.
3. Hold an appointment as a teaching assistant (TA) for at least three quarters while in residence.
4. Request appointment of a dissertation reading committee at the beginning of the quarter of anticipated graduation. The committee consists of three members of the student's Supervisory Committee.
5. Successfully defend the doctoral dissertation at the final examination. After completion of 27 dissertation credits, the student is ready to take the final examination, devoted to the subject of the dissertation. The format of the examination is a public seminar.

Chemistry

Department Overview

303 Bagley

Chemistry is a branch of natural science that deals principally with the properties of molecules, the chemical reactions that occur between them, and the natural laws that describe molecular interactions. Chemistry is a central science, having strong interactions with biology, medicine, earth and environmental sciences, physics, and mathematics.

Undergraduate Program

Adviser

303 Bagley, Box 351700

(206) 616-9880, (206) 543-9343, (206) 685-8376

advisers@chem.washington.edu

The Department of Chemistry offers the following programs of study:

- The Bachelor of Arts degree with a major in chemistry
- The Bachelor of Science degree with a major in chemistry - ACS certified
- The Bachelor of Science degree with a major in chemistry
- A minor in chemistry

The Bachelor of Science degree is designed primarily for those who wish to pursue a career in chemistry or a career in which chemistry plays a central role.

The department offers two Bachelor of Science degrees. The Bachelor of Science with a major in chemistry (ACS certified) meets guidelines established by the American Chemical Society (ACS). It provides an extensive education in all branches of chemistry and also emphasizes laboratory training. The non-certified major does not emphasize laboratory work as strongly, offers more options among chemistry courses, and allows more flexibility in incorporating coursework outside of chemistry.

The Bachelor of Arts in chemistry fills the needs of students whose chosen career requires a strong background in chemistry with additional expertise in other disciplines.

Bachelor of Science

Suggested First- and Second-Year Courses: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.

Department Admission Requirements

Application to BA and BS degree programs in chemistry is competitive. Applicants are considered in the following groups: Direct Freshman Admission, Research/Honors, Early Admission, and Regular Admission. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered twice each academic year and are due on the second Friday of October and the second Friday of April, with the exception of Direct Freshman Admission. The application and additional information is available at depts.washington.edu/chem/undergrad/.

Direct Freshman Admission

1. Open to freshman students formally admitted to the UW
2. Indication on the UW freshman application of chemistry as the student's first choice of major
3. Successful direct-admission applicants generally have received a minimum 1400 on the SAT (math and verbal sections) or a minimum 30 on the ACT.
4. Admission is for autumn quarter only.

Research/Honors

1. Students with exceptional records can apply for consideration for admission via the Honors or Research track. Students seeking admission should submit an application that includes:
 - a. Cover sheet (available on the Department of Chemistry website)
 - b. Unofficial transcript
 - c. Statement of purpose: May include a description of interest in chemistry, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.
 - d. (Research Track only) Written letter or recommendation from research adviser.
2. Honors Track. Students participating in the chemistry Honors sequence who have completed the following courses with a minimum cumulative GPA of 3.00: CHEM 145, CHEM 155 (10 credits); MATH 124 and MATH 125 (or MATH 134 and MATH 135) (10 credits).
3. Research Track. Students who have performed at least 6 credits of undergraduate research (CHEM 199, CHEM 299, or higher) and who provide a strong recommendation from faculty research advisers. Biochemistry undergraduate research may be considered as well.

Early Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); PHYS 121, PHYS 122 (recommended) or PHYS 114, PHYS 115. MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS chemistry and BS chemistry-ACS certified programs typically have a cumulative GPA greater than 3.20 in courses listed above under course requirements. Successful applicants for the BA chemistry program typically have a cumulative GPA greater than 3.00 in courses listed above under course requirements.

Regular Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238 (or CHEM 335, CHEM 336). PHYS 121, PHYS 122 (recommended) (or PHYS 114, PHYS 115). MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS chemistry and BS chemistry-ACS certified programs typically have a cumulative GPA greater than 2.50 in courses listed above under course requirements, with no individual grade lower than a 2.0. Successful applicants for the BA chemistry program typically have a cumulative GPA greater than 2.00 in courses listed above under course requirements, with no individual grade lower than 1.7.

Major Requirements

Chemistry (ACS-Certified)

93-107 credits

1. *Chemistry and Biochemistry Courses:*
 - a. *General Chemistry:* CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165)
 - b. *Organic Chemistry:* CHEM 237, CHEM 238, CHEM 239, CHEM 241, and CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346 and CHEM 347)
 - c. *Inorganic Chemistry:* CHEM 312, CHEM 317, and CHEM 416 (students completing CHEM 165 are exempt from CHEM 312)
 - d. *Analytical Chemistry:* CHEM 321, CHEM 426
 - e. *Physical Chemistry:* CHEM 455, CHEM 456, CHEM 457, CHEM 461
 - f. *Biochemistry:* BIOC 405 (contact adviser regarding alternative prerequisites for BIOC 405), or CHEM 432 or CHEM 436
 - g. *Advanced Chemistry:* 5 credits of numerically graded CHEM or BIOC 400-level courses (not previously listed) and one more course with laboratory (currently CHEM 428, CHEM 462, CHEM 463, CHEM 464, and CHEM 466)
 - h. Strongly recommended, research credits in CHEM 399 and CHEM 499.
2. *Mathematics:* MATH 124, MATH 125, MATH 126 and two additional math courses above 300 (recommended MATH 307 and MATH 308, or AMATH 351 and AMATH 352); (alternative math requirement: MATH 134, MATH 135, MATH 136)
3. *Physics:* PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.
4. *Grade Requirements:* Minimum 2.0 grade in each chemistry course; minimum 2.50 GPA for courses used to satisfy the major degree requirements; minimum overall cumulative 2.50 GPA and minimum 183 credits required for graduation.

Chemistry

90-101 credits

1. *Chemistry and Related Courses:*

- a. *General Chemistry:* CHEM 142, CHEM 152, CHEM 162, and CHEM 312 (or accelerated series CHEM 143, CHEM 153, and CHEM 312; or Honors series CHEM 145, CHEM 155, CHEM 165, and CHEM 416)
 - b. *Organic Chemistry:* CHEM 237, CHEM 238, CHEM 239, and CHEM 241 (or CHEM 335, CHEM 336, CHEM 337, and CHEM 346)
 - c. *Physical Chemistry:* CHEM 455, CHEM 456, CHEM 457
 - d. *Advanced Chemistry Laboratories:* Two of the following three: CHEM 317, CHEM 321, or CHEM 461
 - e. *Additional Laboratories:* 5 additional laboratory credits chosen from the following: CHEM 242, CHEM 317, CHEM 321, CHEM 347, CHEM 426, CHEM 428, CHEM 461, CHEM 462, CHEM 463, CHEM 464, CHEM 466, and BIOC 426
 - f. *Science Electives:* 11 credits chosen from CHEM 242, CHEM 317, CHEM 321, CHEM 347, any 400-level numerically graded chemistry or biochemistry courses, or MATH 307 (or AMATH 351). Students with a chemistry GPA of 3.30 or higher may apply up to 6 credits of approved research (CHEM 399 or CHEM 499) toward satisfying this requirement. CHEM 498 may *not* be used to satisfy this requirement.
2. *Mathematics:* MATH 124, MATH 125, MATH 126 and one course above 300 (recommended: MATH 308 or AMATH 352); alternative MATH requirement: MATH 134, MATH 135, MATH 136.
3. *Physics:* PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.
4. *Grade Requirements:* Minimum 2.0 grade in each chemistry course; minimum 2.50 GPA required for all chemistry, mathematics, and physics courses used to satisfy major requirements; minimum overall cumulative 2.50 GPA and minimum 180 credits required for graduation.

Bachelor of Arts

Suggested First- and Second-Year Courses: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.

Department Admission Requirements

Same as for Bachelor of Science, shown above

Major Requirements

79-82 credits as follows:

1. *Chemistry Courses:*

- a. *General Chemistry*: : CHEM 142, CHEM 152, CHEM 162, CHEM 312 (or accelerated series CHEM 143, CHEM 153, CHEM 312; or Honors series CHEM 145, CHEM 155, CHEM 165)
 - b. *Organic Chemistry*: CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
 - c. *Analytical Chemistry*: CHEM 321
 - d. *Advanced Chemistry Lab*: Either CHEM 317 or CHEM 461
 - e. *Advanced Chemistry*: 11 credits of numerically graded CHEM 400-level courses to include either CHEM 455, CHEM 456, CHEM 457 series, or CHEM 452, CHEM 453 series
2. *Mathematics*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
 3. *Physics*: One year of physics including at least 1 credit of laboratory (PHYS 114, PHYS 115, and PHYS 116 and at least one of PHYS 117, PHYS 118, or PHYS 119; or PHYS 121, PHYS 122, and PHYS 123; PHYS 121 sequence recommended).
 4. *Grade Requirements*: Minimum 2.00 GPA in chemistry courses counted toward major; minimum 1.7 grade in all required chemistry courses

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minor

Minor Requirements: 35-44 credits as follows:

1. One of the following three sequences:
 - a. CHEM 142, CHEM 152, CHEM 162, and one of CHEM 223, CHEM 237, or CHEM 335
 - b. CHEM 145, CHEM 155, CHEM 165, and one of CHEM 223, CHEM 237, or CHEM 335
2. MATH 124 (or Q SCI 291 and Q SCI 292)
3. PHYS 114 or PHYS 121
4. Three of the following four groups:
 - a. CHEM 312 (or CHEM 165)
 - b. CHEM 321
 - c. One of CHEM 452, CHEM 455, or CHEM 456
 - d. One of CHEM 224, CHEM 238, CHEM 336
5. Minimum 2.00 GPA for the minor; minimum 1.7 grade in each course presented for the minor.
6. A minimum of 15 credits taken for the minor must be completed in residence at the University of Washington.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: At the conclusion of their studies, graduating chemistry majors should have a general knowledge of the basic areas of chemistry with a working knowledge of at least one area: be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications

of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of chemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to chemistry majors.

Teaching high school chemistry, environmental or patent law practice, or working in the chemical industry in sales or management positions are career choices for which the BA in chemistry is generally useful.

- *Instructional and Research Facilities:*
 - Departmental facilities include a spectroscopic and analytical instrumentation laboratory (NMR, GC-MS, X-Ray, IR), Chemistry Library, Center for Enabling New Technologies through Catalysis (CENTC), Center for Process and Analytical Chemistry (CPAC), Materials and Devices for Information Technology Research (MDITR), Center for Nanotechnology, and extensive computing capabilities.
 - The department's local area network (LAN) is extended through a fiber optic cable to the university-wide network that is connected to Internet, HEPNET, SPAN, and other national and international computer networks.
 - The Chemistry Study Center offers assistance to students in 100-level chemistry courses and has 40 Pentium computers available to undergraduates taking chemistry courses.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for information.
- *Department Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.
- *Student Organizations/Associations:*
 - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
 - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
 - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors

Of Special Note:

- The BS degree in chemistry requires a minimum of 180 credits to graduate.
- The BS degree in chemistry, ACS-Certified option, requires a minimum of 183 credits to graduate.
- The BA degree in chemistry requires a minimum of 180 credits to graduate.
- Students are strongly encouraged to participate in undergraduate research.
- The maximum number of credits that may be earned combining CHEM 199 and CHEM 299 is 12; the maximum number of credits that may be earned combining CHEM 399 and CHEM 499 is 24.

Graduate Program

Graduate Program Coordinator
109D Bagley, Box 351700
(206) 543-4787
graduate@chem.washington.edu

The master of science and doctor of philosophy programs are designed to lead to positions of leadership and independent investigation in research institutes, industrial laboratories, and government agencies, and to positions as teachers, researchers, or administrators in colleges and universities in chemistry or allied fields.

Students can pursue research in the following areas of chemistry: analytical, bioanalytical, bioinorganic, bioorganic, biophysical, environmental, inorganic, materials, medicinal, nuclear, organic, organometallic, physical, polymer, process analytical, and theoretical.

Thesis research for the MS and dissertation research for the PhD must constitute an original contribution of knowledge worthy of report in the scientific literature.

Refer to the [Chemistry Department website](#) for more detailed information regarding admission and graduation requirements.

Master of Science

The department offers primarily the PhD degree. The master of science program is not open to master's-only students, except under specific conditions.

Degree Requirements

45 credits

With Thesis - 36 approved credits with 18 in courses at the 500 level or above; 18 credits in courses at the 400 or 500 level taken for numerical grade with a minimum 2.7 grade in each graded course; 9 credits in thesis research.

Without Thesis - Same as with thesis, except that additional coursework may be substituted for the required research. Minimum 3.00 GPA required.

Doctor of Philosophy

Admission Requirements

1. Baccalaureate degree with major in chemistry or allied sciences
2. GRE scores

Degree Requirements

90 credits

1. *Required coursework:* 18-27 credits of coursework to support the student's individualized program of study, approved by the Graduate Program Coordinator, at the 400 or 500 level, with a minimum 2.7 grade in each graded course, and a minimum 3.00 GPA
2. *Seminars:* Participation in departmental seminars
3. *Dissertation:* minimum 27 credits of dissertation (CHEM 800)
4. Candidacy examinations covering area of specialization

Cinema and Media Studies

Program Overview

B-531 Padelford

From our smartphones to the movie theater, human experiences across the globe today are shaped by the media we view and create. Visual media are entwined with culture, art, politics, and entertainment. Understanding these relationships is at the core of Cinema and Media Studies. Out of this mastery, a world of possibilities opens up. Our students and alumni do much more than watch film and television. They build skills as active participants with media, able to critically engage with it as analysts and researchers who communicate their findings clearly and persuasively. They interpret and utilize the tools of visual communication to affect and influence the world.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of Cinema and Media Studies offers the following programs of study:

- Bachelor of Arts with a major in cinema and media studies.
- Bachelor of Arts with a major in comparative literature and options in literary studies and in cinema studies
- Minors in comparative literature (literary studies only) and environmental cultures and values
- Students selecting the cinema studies option in comparative literature are ineligible also to receive the Bachelor of Arts degree with a major in cinema and media studies.

Bachelor of Arts with a major in Cinema and Media Studies

Suggested First-and Second-Year College Courses: Any course related to the area or discipline of major study.

Department Admission Requirements

One from CMS 270, CMS 271, CMS 272, CMS 273, CMS 274, or CMS 275; minimum 2.00 cumulative GPA; completion of one course fulfilling either College of Arts and Sciences English composition requirement or W (writing) requirement (5 credits).

Department Policy for Double Majors

Students receiving a BA in Cinema and Media Studies are ineligible to also receive the BA in Comparative Literature with Cinema Studies Option. Any other double major is acceptable, including Comparative Literature majors selecting the Literary Studies Option.

Major Requirements (60 credits)

1. Core courses: CMS 301; CMS 480 (10 credits)
2. History courses: either CMS 310 or CMS 311; one of CMS 312, CMS 313, CMS 314, or CMS 315 (10 credits)
3. Critical concepts courses: one from CMS 302, CMS 303, or CMS 304; either CMS 320 or CMS 321 (10 credits)
4. Approved electives (30 credits). See adviser for approved list.
 - a. Minimum 20 credits from 300- and 400-level courses
 - b. Minimum 10 credits from CMS courses
 - c. May include additional history and critical concepts CMS courses
 - d. Maximum 5 credits of independent study (CMS 490) and maximum 5 credits of internship (CMS 491)
5. At least 35 credits applied toward the major completed in residence through the UW.
6. Minimum 2.0 cumulative GPA for courses applied to the major

Bachelor of Arts with a major in Comparative Literature

Suggested First- and Second-Year College Courses: Courses in foreign languages, classics, history, philosophy, literature, and writing.

Department Admission Requirements

One of C LIT 250, C LIT 251, or C LIT 252; minimum 2.00 cumulative GPA; completion of one course fulfilling either College of Arts and Sciences English composition requirement or W (writing) requirement (5 credits).

Major Requirements

50 credits

1. Core Courses: one of C LIT 250, C LIT 251, or C LIT 252; one of C LIT 320, C LIT 321, C LIT 322, C LIT 323; C LIT 400 (15 credits).
2. CMS course: one of CMS 310, CMS 311, CMS 312, CMS 313, CMS 320, CMS 321 (5 credits)
3. 300-400 level electives. See adviser for approved list. (15 credits)
4. Options
 - a. Literary Studies
 - i. One of C LIT 360, C LIT 361, or C LIT 362; one additional course from C LIT 320, C LIT 321, C LIT 322, C LIT 323, C LIT 360, C LIT 361, C LIT 362 (10 credits)
 - ii. One from 300/400-level comparative literature courses. See adviser for approved list (5 credits)
 - iii. One course must focus on literature written before 1800.
 - b. Cinema Studies
 - i. One from CMS 270, CMS 271, CMS 272 (5 credits)

- ii. One from CMS 310, CMS 311, CMS 312, or CMS 313; one from CMS 301, CMS 302, CMS 303, CMS 303, CMS 320, or CMS 321 (10 credits)
 - iii. Maximum 5 credits of internship (CMS 491) may be applied toward the cinema studies option with approval of the faculty internship coordinator
5. Minimum 35 credits applied toward the major completed in residence through the UW
 6. Minimum 2.00 cumulative GPA for courses applied to the major

Minors

Comparative Literature (Literary Studies Only)

Minor requirements: 30 credits

1. C LIT 250, C LIT 251, or C LIT 252 (5 credits)
2. C LIT 400 (5 credits)
3. Two differently numbered courses from C LIT 320, C LIT 321, C LIT 322, C LIT 323 (10 credits)
4. Remaining credits in upper-division literature courses offered through Comparative Literature, Cinema, and Media, and the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Studies, and Slavic Languages and Literatures. See adviser for approved list.

Environmental Cultures and Values

Minor requirements: 25 credits

1. CHID 450 or C LIT 450 (5 credits)
2. 20 credits with at least one course taken from each of the following (see department for approved list)
 - a. Area I: Environmental Values and Histories
 - b. Area II: Cultures, Communities, and the Environment
 - c. Area III: Ecocriticism and Ecoaesthetics
3. Minimum 15 upper division credits
4. Minimum 15 credits outside student's major
5. Minimum 15 credits taken through UW Seattle campus

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of comparative literature provides training in the analysis and critique of varied kinds of social texts and discourses. It stresses the centrality of historical and cross-cultural awareness for effective interpretation of both verbal and visual texts. Students earning the degree in comparative literature may pursue advanced work at the MA and PhD. level in language and literature programs, or allied curricula in film studies, philosophy, intellectual history, and cultural studies. They may aim for degrees in education, specializing in language arts, foreign language teaching, or both. Comparative literature majors may also find jobs in fields where liberal arts skills, such as strong writing ability and fluency in foreign languages, are valued.

Cinema and media studies emphasizes the study of film, television, and related media in the context of global culture. It stresses the importance of historical and cultural awareness for effective interpretation of visual, audiovisual, and verbal texts. Students may pursue work at the MA and PhD levels in allied curricula in the humanities and the arts. They may aim for a broad range of careers including advertising, education, entertainment law, information technology, media archiving, museum work, or public relations. Or, they may seek positions related to film, television, and digital media production, marketing, or distribution.

- *Honors Options Available:* Comparative Literature major only. With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). With Distinction (Departmental Honors, by invitation). See adviser for requirements.
- *Undergraduate Research, Internships, and Service Learning:* See adviser for internship information.
- *Department Scholarships:* None
- *Student Organizations/Associations:*
 - UW Film Club, <https://www.facebook.com/UwFilmClub>

Graduate Program

Graduate Program Coordinator
 B531 Padelford, Box 354338
 (206) 543-7542
clitgrad@uw.edu

The department offers study with faculty members from the following participating departments: Asian Languages and Literature, English, French and Italian Studies, Germanics, Near Eastern Languages and Civilization, Scandinavian Studies, Slavic Languages and Literatures, Spanish and Portuguese Studies, and Gender, Women, and Sexuality Studies. Study leads to a master of arts or doctor of philosophy degree. Students concentrate on graduate courses in comparative literature and specialize in two or more national literatures of major interest to them, studied in the original language. With permission, a PhD. aspirant may choose as a third area of study a field outside literature (e.g., philosophy, religion, art, political thought).

Master of Arts

Admission Requirements

Bachelor of Arts degree in Comparative Literature, English, or any other literature, or equivalent background; advanced reading knowledge in one language other than English.

Degree Requirements

45 credits

1. *Coursework:* Minimum 45 quarter credits at the 400 and 500 level; at least 25 at the 500 level. Three courses in comparative literature. Remaining credits to include study in two or more literatures with at least three courses in each of two literatures.
2. *Language Requirements:* Advanced reading knowledge in at least one language other than English and a basic reading knowledge of a second, demonstrated before starting to write the MA

essay. Language competence attested either by examinations or by satisfactory coursework in the language.

3. *Essay*: Prepared after completion of coursework, under supervision of two faculty members.
4. *Study Abroad*: Students may participate in exchange programs offered through individual language and literature departments or through the UW's Office of International Programs and Exchanges.

Doctor of Philosophy

Admission Requirements

Master of arts degree in Comparative Literature, English, or any other literature, or equivalent background; advanced reading knowledge in two languages other than English.

Degree Requirements

90 credits

1. *Coursework*: Minimum 90 postbaccalaureate degree credits at the 400 and 500 level; at least half in each section of the program at the 500 level. Credits include: (1) minimum 30 credits in comparative literature courses; (2) 30 credits in the literature of major interest to the student; (3) 20 credits in the student's minor field (or, if more than one minor field is chosen, at least 15 credits in each); (4) 10 elective credits chosen from any area of the student's choice. One of two minor fields may be extra-literary.
2. *Language Requirements*: Advanced reading knowledge in one language other than English and a basic reading knowledge of a second, demonstrated before PhD examinations. Language competence attested either by examinations or by coursework in the language.
3. *General Examination*: Requires one quarter; taken after completion of the 90-credit course requirement and language requirements.
4. *Dissertation*: Topics chosen from a broad range of areas. See department website for more information.
5. *Final Examination*: Oral examination devoted to the dissertation and to fields covered by written examinations.
6. *Study Abroad*: Students may participate in exchange programs offered through individual language and literature departments or through the UW's Office of International Programs and Exchanges

Financial Aid

The department awards teaching assistantships annually to qualified students and provides up to five years of support toward the PhD. to students who enter with a B.A. Teaching assistantships can be assigned in comparative literature, cinema studies, or in any of the national literature departments affiliated with Comparative Literature.

Classics

Department Overview

218 Denny

The discipline of classics concerns itself with the cultures of ancient Greece and Rome from prehistoric times to the Middle Ages. The department is concerned with the Greek and Latin languages and their literatures, including poetry, drama, history, philosophy, rhetoric, and political theory, as well as with classical art and archaeology. The ancient cultures of Greece and Rome hold an extraordinary place in the American past and present, thanks to their central role in forming the basic conceptual categories that shape our intellectual, professional, and civic lives. The vast temporal and geographic gulf that divides these ancient cultures from modernity brings students and scholars of classics face to face with the otherness of antiquity and forces a critical examination of our own cultural roots.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of Classics offers the following programs of study:

- The Bachelor of Arts degree with majors in classics, Greek, Latin, and classical studies.
- Minors in classical studies, Greek, Latin, and classics and ancient history.

The majors in classics, Greek, and Latin emphasize the development of expertise in Greek and Latin and can include coursework in the history, literature, philosophy, science, and the art and archaeology of these two contrasting but related cultures. Students who intend to continue their studies to the PhD degree are advised to take the BA in classics or, alternatively, the BA in Latin or Greek with as many courses in the second language as possible.

A fourth major, the Bachelor of Arts with a major in classical studies, is especially suited to students wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity, primarily through English translations. The classical studies major demands less study of the classical languages of Greece and Rome than is required for the other majors. Students with no previous exposure to Greek or Latin can complete the classical studies major in two years. Students have often combined this major with another major such as English, history, or art history, and even with a non-humanities major such as computer science, biochemistry, or economics.

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Latin and/or classical Greek, classics in translation, ancient history, classical art and archaeology, ancient philosophy.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Greek (52-58 credits)

1. Either GREEK 101, GREEK 102, GREEK 103; or GREEK 300, GREEK 301 (10-15 credits)
2. 15 credits of 300-level GREEK courses, excluding GREEK 300 and GREEK 301
3. 20 credits of 400-level GREEK courses
4. 5 credits from approved classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list.
5. CLAS 495 (2-3 credits)

Latin (52-58 credits)

1. Either LATIN 101, LATIN 102, LATIN 103; or LATIN 300, LATIN 301 (10-15 credits)
2. 15 credits of 300-level LATIN courses, excluding LATIN 300 and LATIN 301
3. 20 credits of 400-level LATIN courses
4. 5 credits from approved classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list.
5. CLAS 495 (2-3 credits)

Classics (67-68 credits)

1. 15 credits of 300-level classical Greek, excluding GREEK 300, GREEK 301
2. 15 credits of 300-level Latin, excluding LATIN 300, LATIN 301
3. Minimum 30 credits in 400-level GREEK and LATIN courses, with at least 10 credits in each language
4. 5 credits from approved classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list.
5. CLAS 495 (2-3 credits)

Classical Studies (61-67 credits). Especially suited for students not preparing for graduate study in classics but wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity, primarily through English translation.

1. Either Greek or Latin through 307, or the equivalent (25-30 credits)
2. 34 additional credits chosen with department approval from the following courses: Greek and Latin at the 400 level; classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list
3. CLAS 495 (2-3 credits)

Note: Competence to take 400-level courses which count toward the Latin, Greek, and classics majors generally requires four-to-six quarters (20-30 credits) of previous study.

Minor

Minor Requirements: Minimum 30 credits as follows for each of the minors except classical studies, which requires 25 credits:

- *Classical Studies:* 25 credits chosen with departmental approval from classics in English, classical art and archaeology, ancient history, history of ancient philosophy, and history of ancient science, or up to 15 credits of Latin or Greek. Minimum 15 credits must be at the 300/400 level. See list of acceptable courses. .
- *Greek:* 25 credits in Greek and 5 credits chosen with departmental approval from classics in English, classical art and archaeology, ancient history, history of ancient philosophy, and history of ancient science. Minimum 15 credits must be at the 300/400 level. See list of acceptable courses.
- *Latin:* 25 credits in Latin and 5 credits chosen with departmental approval from classics in English, classical art and archaeology, ancient history, history of ancient philosophy, and history of ancient science. Minimum 15 credits must be at the 300/400 level. See list of acceptable courses.
- *Classics and Ancient History:* 30 credits from the course list below, including at least 20 upper-division credits (15 of which must be taken at the UW). 100-level credit is not accepted. Minimum 10 credits from each department (Classics and History). A minimum grade of 2.0 is required in each course. Not available to students pursuing majors or other minors in classics.

Courses: CLAS 210, CLAS 320, CLAS 322, CLAS 324, CLAS 326, CLAS 328, CLAS 330, CLAS 424, CLAS 427, CLAS 428, CLAS 430, CLAS 432, CLAS 435, CLAS 445, CLAS 496 (except when topic is medieval); CL AR 340, CL AR 341, CL AR 342, CL AR 343, CL AR 442, CL AR 443, CL AR 444, CL AR 446, CL AR 447, CL AR 448; GREEK (all upper-division courses except GREEK 300 and GREEK 301); LATIN (all upper-division courses except LATIN 300, LATIN 301, LATIN 401, and LATIN 402); HSTAM 205, HSTAM 302, HSTAM 312, HSTAM 313, HSTAM 314, HSTAM 330, HSTAM 401, HSTAM 402, HSTAM 403; HIST 490 (when topic is ancient), HIST 498 (when topic is ancient).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The undergraduate study of classics emphasizes critical analysis of language and culture and clear and effective writing. The BA with a major in classics is a respected terminal degree in itself. Like other degree programs in the humanities, it emphasizes the acquisition of those analytic and communications skills which are indispensable for careers in government, journalism, law, industry, medicine, and business. The classics major (especially in its more language-intensive forms) is often a mark of distinction when a graduate applies for admission to professional school.

Many who take the bachelor's degree in classics go on to pursue graduate work in the subject at leading PhD programs. Graduates include winners of prestigious national awards such as Mellon Fellowships for graduate study and the Rhodes Scholarship.

- *Instructional and Research Facilities:* The departmental office provides access to several computers for research and coursework. The Classics Department sponsors numerous lectures by distinguished speakers visiting from universities in this country and abroad; undergraduates are always welcome to attend.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* None offered.
- *Department Scholarships:*
 - *Jim Greenfield Undergraduate Scholarship* is intended for undergraduate majors in classics. The object of the Jim Greenfield scholarship is to enable exceptionally well-qualified students to devote the maximum time and energy to their study of the classics at the University of Washington. While the first criterion is academic promise, an applicant's current means of support is also taken into consideration; therefore, the amount of the award may vary from partial tuition to full tuition and some expenses. Successful candidates may reapply for the following year.
 - *Jim Greenfield Undergraduate Travel Bursaries:* Jim Greenfield Undergraduate Travel Bursaries may be used for the department's Rome program, for travel associated with participation in archaeological excavations, for independent travel to areas of classical interest, or for other kinds of study-related travel for which the applicant can make a cogent case. In some cases an award might allow a student to remain overseas for study travel in the wake of the department's Rome Program. Further information about applying for a Jim Greenfield Undergraduate Travel Bursary is available in the department office.
 - In addition to the above, undergraduates are eligible to apply or be nominated for:
 - *Classics Students Travel Fund:* provides financial support for students in the Classics Department who are intending to participate in the departmental Rome program or extramural programs, to attend conferences, or to travel to specific places in support of their studies.
 - *Harvey Bruce Densmore Memorial Fund:* rewards distinguished undergraduate students of Greek.
- *Student Organizations/Associations:* None

Of Special Note:

- CLAS 101, CLAS 102, CLAS 205, and HIST 111 may not be taken in fulfillment of major requirements for baccalaureate degrees in the Department of Classics.
- *Classical Seminar in Rome:* During spring quarter, the department offers instruction in classics for advanced undergraduate majors and graduate students at the University of Washington Rome Center, located in the Palazzo Pio on the Campo de Fiori.

Graduate Program

Graduate Program Coordinator
 218 Denny, Box 353110
 (206) 543-2266
clasdept@uw.edu

The Department of Classics offers programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The MA degree may be in Greek, Latin, or classics (a combination of Greek and Latin). The PhD degree requires both Greek and Latin.

The program of formal instruction ensures comprehensive and thorough training in the basic disciplines needed for teaching and research. The department offers courses in the major writers and periods of literature, philosophy, and history, in classical art and archaeology, and in Greek and Latin linguistics. The courses in Greek and Latin literature include many works on the PhD-degree reading list. Seminars introduce research techniques through the study of more specialized topics, which vary from quarter to

quarter. Students may include in their programs courses and seminars given by other departments in such subjects as ancient philosophy, ancient and medieval history, comparative literature, and linguistics.

Master of Arts

Admission Requirements

Strong preparation in Latin and Greek, preferably a full undergraduate major. Although the MA may be attained with work in only one of the languages, students who plan to work toward the PhD must be prepared to do graduate work in both Latin and Greek.

Degree Requirements

36 credits, as follows:

1. 27 credits in courses and seminars approved by the department as applicable toward an advanced degree and either a) 9 additional credits and a research paper or b) a thesis (9 credits). At least 18 of the total 36 credits must be at the 500 level or above.
2. Competence in reading German, French, or Italian, demonstrated by passing a departmental examination.

Doctor of Philosophy

Admission Requirements

Strong preparation in Latin and Greek, preferably a full undergraduate major. Admission to the PhD program is granted after completion of the MA degree.

Degree Requirements

90 credits, as follows:

1. Minimum three academic years of graduate study, of which at least two must be at the UW, and one in full-time residence at the University for three out of four consecutive quarters.
2. 90 credits in courses approved by the department. At least half (which include dissertation credits) must be at the 500 level or above.
3. Competence in reading German and French, or German and Italian, demonstrated by passing departmental examinations.
4. Graduate courses (or the equivalent) in Greek and Latin composition.
5. The classics proseminar (or equivalent).
6. Written preliminary examinations:
 - a. Translation exams on Greek and Latin literature. Reading lists guide the student's preparation for these exams.
 - b. A written examination on a special field of classical studies, e.g., a period of Greek or Roman history, Greek or Latin epigraphy, Athenian or Roman topography, Greek or Roman religion, classical linguistics, metrics, or palaeography, an area of intellectual history, a literary theme or cultural institution. Examination must be taken before doctoral orals but preferably earlier in the student's graduate program.

- c. Written examinations on two special authors, one Greek and one Latin, which assume a deep familiarity with the text, a knowledge of the textual history, and the important secondary works and trends in scholarship. A special author examination may be taken only after the translation examination in that language has been passed.
7. Oral general examination on Greek and Roman history, literature, philosophy, and related subjects.
8. Dissertation approved by the student's Supervisory Committee, and an oral examination on the dissertation.
9. Graduate students are expected to have teaching experience before completing their terminal degrees.

Research Facilities

The Suzzallo Library has an extensive classics collection. The department's seminar room in Denny Hall, which is available to graduate students for their study and research, contains an excellent non-circulating library with such reference works as Pauly-Wissowa, *L'Année Philologique*, the *Thesaurus Linguae Latinae*, the Müller Handbuch series, the Teubner and Oxford texts, commentaries on the classical authors, standard collections of inscriptions and fragments, and a number of important serials. The department also possesses a license for the *Thesaurus Linguae Graecae*, *Thesaurus Linguae Latinae*, and other databases.

Teaching Assistantships and Fellowships

The Department of Classics is able to provide substantial support at the graduate level. Jim Greenfield Graduate Fellowships are typically available to highly meritorious incoming graduate students; Jim Greenfield Dissertation Fellowships provide support at the dissertation stage; Phillip and Estelle DeLacy Fellowships and Nesholm Family Endowment Fellowships provide funding to graduate students for various needs; and the Classics Student Travel Fund provides travel funding (to academic conferences, programs abroad, etc.)

In addition, a number of teaching assistantships are available. Assistants teach sections of elementary Latin and Greek, courses in Latin and Greek derivatives, conduct discussion sections in classical literature in translation, or assist faculty members with other courses. The teaching load is four to six hours a week throughout the academic year.

Communication

Department Overview

102 Communications

Communication is a process that creates and reveals meanings, relationships, and cultural patterns.

Undergraduate Program

Advising Office/Communication Commons
118 Communications, Box 353740
(206) 543-8860

The Department of Communication offers the following programs of study:

- The Bachelor of Arts degree with a major in communication
- The Bachelor of Arts degree with a major in communication: journalism and public interest communication option

Bachelor of Arts

Suggested First- or Second-Year College Courses: COM 200 and one additional COM 200-level course

Department Admission Requirements

1. Minimum 10 200-level COM credits, including minimum 2.5 grade in both COM 200 and one additional 200-level COM course. (COM 201 and COM 202 may substitute for COM 200 to fulfill the 10-credit, 200-level requirement.)
2. Minimum 2.50 cumulative GPA in all COM coursework
3. Minimum 2.50 cumulative GPA for all college coursework, including transfer credits
4. Admission is capacity constrained, based on information in the application packet, cumulative GPA, and COM GPA. Completion of the above requirements does not guarantee admission.
5. Students are admitted quarterly: autumn, winter, and spring. Applications are due two weeks after the quarter begins, autumn, winter, and spring quarters. Applications and additional information are available on the [department website](#). Students are notified of acceptance by the end of the fifth week of the quarter. If accepted, they can register for the next quarter as majors.
6. Applications are available from the department website on the first day of the quarter. Applications should include application form, copies of transcripts and grade reports, and an essay explaining what led applicants to apply to the major.

Requirements for admission to the Journalism and Public Interest Communication Option:

1. Minimum 2.5 grade in COM 200. (COM 201 and COM 202 may substitute for COM 200 to fulfill the requirement)
2. Minimum 2.50 cumulative GPA in all COM coursework
3. Minimum 2.50 cumulative GPA for all college coursework, including transfer credits

4. Admission is capacity constrained, based on information in the application packet, cumulative GPA, and COM GPA. Completion of the above requirements does not guarantee admission.
5. Students are admitted quarterly: autumn, winter, and spring. Applications are due two weeks after the quarter begins, autumn, winter, and spring quarters. Applications and additional information are available on the [department website](#). Students are notified of acceptance by the end of the fifth week of the quarter. If accepted, they can register for the next quarter as majors.
6. Applications are available from the department website on the first day of the quarter. Applications should include application form, copies of transcripts and grade reports, selection of the journalism and public interest communication option, an essay explaining what led applicants to apply to the major, and a writing sample. See department adviser or website for approved types of writing samples.

Major Requirements

Communication: 50 credits

1. *Introductory Courses (10 credits):* COM 200 and one additional 200-level COM course.(COM 201 and COM 202 may substitute for COM 200 to fulfill the 10-credit, 200-level requirement.)
2. *Methods in Inquiry (5 credits):* See department adviser or website for list of approved courses.
3. *Theory in Communication (5 credits):* See department adviser or website for list of approved courses.
4. *Electives (30 credits)* from the Department of Communication and from selected courses outside the department. See advising office or website for electives list.

Of the 50 required credits specified above, at least 25 must be Communication courses at the 300 level or above, and of those 25, at least 10 must be Communication courses at the 400 level (excluding COM 498/COM 499). In addition, of the 50 required credits specified above, only 10 credits may be from courses offered outside the Department of Communication, unless approved by a departmental adviser.

Journalism and Public Interest Communication Option: Minimum 55 credits

1. *Introductory Courses (10 credits):* COM 200 and one additional 200-level COM course. (COM 201 and COM 202 may substitute for COM 200 to fulfill the 10-credit, 200-level requirement.)
2. *Methods of Inquiry (5 credits):* See department adviser or website for list of approved courses.
3. *Skills/Competencies Core (20 credits):* COM 360, COM 361, COM 362, COM 364, and COM 457.
4. *Law and Ethics Core (10 credits):* COM 440 and COM 468.
5. *Advanced Skills/Competencies (10 credits minimum):* See department adviser or website for list of approved courses.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The Department of Communication prepares students for the challenges of a society that is informed, entertained, persuaded, and shaped by communication. The department seeks out and appeals to students from a variety of backgrounds and perspectives. It nurtures socially responsible, literate citizens who can interpret and evaluate images and messages they create and receive. It teaches students to think critically, respect diversity, communicate effectively, and develop the skills needed for the life-long learning that is central to successful careers and rewarding lives. Undergraduate study in communication has four pedagogical emphases: communication literacy, communication inquiry, theory and concepts, and community engagement.

- *Instructional and Research Facilities:* The Department of Communication has the following laboratories: Media Lab. News Lab. Observation Labs. It also has an Instructional Resources Center and video-editing facilities. Additionally the department manages the following centers: The Dart Center, the Center for Communication and Civic Engagement, and the Center for Communication, Difference, and Equity. See the department website for further information.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors; With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* See adviser for details.
- *Department Scholarships:* See adviser for details.
- *Student Organizations/Associations:* Society of Professional Journalists, Public Relations Student Society of America, The Association for Women in Communication

Graduate Program

Graduate Program Coordinator
 221 Communications, Box 353740
 (206) 543-7269
cominfo@uw.edu

Engages students in the complexity of modern communication and its centrality to society and prepares them to become thoughtful scholars, teachers, practitioners, and leaders related to this field. The department offers graduate programs leading to the degrees of Master of Arts, Doctor of Philosophy, and Master of Communication (MC).

Graduate study is guided by four related principles: intellectual and cultural pluralism, interdisciplinary theorizing, collaboration, and public scholarship. Coursework brings together humanistic and social scientific intellectual traditions through a unified core curriculum and a wide selection of graduate seminars. Research and teaching focus on six interrelated areas: communication and culture; communication technology and society; international communication; social interaction; political communication; and rhetoric and critical studies.

The MA provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. The MA requires a minimum 45 credits of approved coursework and a research thesis. The PhD program develops conceptual and methodological capabilities in a substantive area of communication and requires a minimum 45 post-master credits, general examinations, and a dissertation demonstrating an original scholarly contribution to the field.

The department also offers three MC degrees, each of which has specific requirements tailored to that degree. The general MC degree is targeted for mid-career communication professionals who seek to develop an understanding of communication theory related to a special area of interest. The MC in digital media is a professional degree focused on digital media content creation, management, and policy. Native Voices is an MC degree offered in conjunction with American Indian Studies, designed for documentary filmmakers who focus their work on subjects relevant to the Native American community.

Master of Arts

Admission Requirements

- Minimum 3.00 or B GPA over the two most recent years guarantees consideration. However, average GPAs for students admitted have been higher.

- Bachelor's degree
- Full-time status strongly encouraged, although domestic U.S. residents who do not receive assistantships may enroll half-time.
- Students planning to continue directly into the UW PhD program after completing the UW MA should apply to the MA/PhD program.
- U.S. permanent residents/immigrants (green card holders): Applicants not native speakers of English must submit TOEFL scores taken within the past two years, unless exempt. Applicants not U.S. citizens must submit a TSE score to be considered for departmental funding.

Degree Requirements

Minimum 45 credits

- Two core courses (COM 500 and COM 501) during the first year of study.
- One additional methods course beyond COM 501
- Maximum 5 credits of COM 594 in five different topics may count toward total, although COM 594 credits are not required for master's students.
- Maximum 3 credits of COM 596. Required for students with assistantships; optional for others.
- Thesis (minimum 10 credits in COM 700) and oral defense.
- Specific courses selected in consultation with the Supervisory Committee.

Master of Communication

Admission Requirements

Same as for the Master of Arts program (above).

Degree Requirements

Minimum 45 credits

- Minimum 12 credits in communication courses at the 400 and 500 level.
- Minimum 15 credits outside the Department of Communication in a coherent substantive area of specialization.
- 10 credits in COM 600 in an area of specialization for broadcast or publication. Oral defense of the project.
- Remaining credits selected in consultation with the Supervisory Committee.
- Minimum 21 credits at the 500 or 600 level. .
- Maximum 5 credits of COM 594 may count toward total, although COM 594 credits are not required for MC students.
- Maximum 3 credits of COM 596. Required for students with assistantships; optional for others

Digital Media

A professional degree focused in three concentrations: digital media content creation, management, and policy.

Minimum 45 credits

1. Core courses: COM 529, COM 546, and COM 558
2. Students choose either 45 credits of coursework or 40 credits of coursework (including three core courses) and a final project worth 5 credits. Specific courses selected in consultation with the Supervisory Committee.

Native Voices

Minimum 45 credits

1. 20 credits in the Department of Communication:
 - a. 10 credits of 500-level communication courses, typically two 500-level seminars.
 - b. COM 600: 10 credits in documentary research and production, taken for completion of the final project.
2. 25 credits in American Indian Studies/Native Voices: GWSS 443, AIS 501, AIS 502, AIS 503, AIS 504

Doctor of Philosophy

Admission Requirements

1. Minimum 3.00 or B GPA over the two most recent years guarantees consideration; however, GPAs for students admitted have been higher.
2. Master's degree
3. Full-time status strongly encouraged, although domestic U.S. residents who do not receive assistantships may enroll half-time.
4. U.S. permanent residents/immigrants (green card holders): Applicants not native speakers of English must submit TOEFL scores taken within the past two years, unless exempt. Applicants not U.S. citizens must submit a TSE score to be considered for departmental funding.

Degree Requirements

Minimum 45 post-master credits

1. Two core courses (COM 500 and COM 501) during the first year of study.
2. Two additional methods courses beyond COM 501
3. 5 credits of COM 591 or COM 592
4. 3 credits of COM 594 in three different topics, taken before the general examinations (up to five credits in five different topics may be taken).
5. Maximum 3 credits of COM 596. Required for students with assistantships; optional for others.
6. General examination. COM 600 credits do not count toward the 45 required post-master credits (unless student is a UW Communication MA).
7. Dissertation (minimum 27 credits in COM 800 over at least three quarters) and final examination. These 27 credits do not count toward the 45 required post-master credits (or 30 required post-master credits for UW Communication MA students).
8. Specific courses selected in consultation with the Supervisory Committee.

Students who completed their MA in Communication at the UW do not repeat the core courses, and need only 30 post-master credits, which may include COM 600 credits, and 3 credits of COM 594 in three different topics. Such students take two methods courses beyond the minimum methods course requirements for the MA degree. COM 594 credits and additional methods courses beyond the minimum MA requirements taken during MA work may fulfill the COM 594 and methods requirements for the doctoral program, but may not be applied to the 30 post-master credits.

Research Facilities

In addition to the University's research facilities available to all students, the department houses a collection of specialized research laboratories, including the Digital Media Lab, Graduate Computer Lab, Observational Research Facility, Instructional Resources Center, and Video Editing Lab.

Comparative History of Ideas

Program Overview

B102 Padelford

Comparative History of Ideas is an interdisciplinary program that draws on a wide variety of disciplines within the College of Arts and Sciences to examine the interplay of ideas and their cultural, historical, and political contexts. The program encourages its students to engage thoughtfully in critical intellectual inquiry and reflection. Emphasis is on the significance of students being actively in the world; understanding the social, cultural, and political forces that shape lives and identities; and their role in transforming our world.

Undergraduate Program

Adviser

B102D Padelford, Box 354300

(206) 543-2097

chid@uw.edu

The Comparative History of Ideas program offers the following programs of study:

- The Bachelor of Arts degree with a major in comparative history of ideas
- A minor in comparative history of ideas

Bachelor of Arts

Suggested First- and Second-Year College Courses: Introductory courses in history, philosophy, English, comparative literature, ethnic and gender studies, American Indian studies, and other areas of the humanities and social sciences.

Department Admission Requirements

Students in good academic standing may declare this major after meeting with an adviser.

Major Requirements

60 credits as follows:

1. CHID 101 (2 credits)
2. Gateways to CHID (10 credits)
3. Cultural and historical engagements (5 to 10 credits). Students choose from three options: CHID study abroad program; local/global engagements; or encounters across cultures. Must be chosen with guidance of program adviser.
4. Ideas in the world (5 credits). Must be chosen with guidance of program adviser.

5. Power and difference (5 credits). Must be chosen with guidance of program adviser.
6. CHID 390 (5 credits)
7. Senior thesis/capstone project (CHID 491 and CHID 493) (10 credits)
8. Remaining 13-18 credits chosen from among approved electives (300 level or above).
9. At least half the credits presented for the major must be at the upper-division level.
10. Minimum 2.50 GPA in courses presented for the major.
11. Students may expand the senior project to 15 credits (CHID 492). The 5 optional senior project credits are in addition to the 60 credits required of all CHID majors.

Minor

Minor Requirements: 30-35 credits as follows:

1. Gateways to CHID (5 credits)
2. Cultural and historical engagements (5-10 credits). Students choose from three options: CHID study abroad program; local/global engagements; or encounters across cultures. Must be chosen with guidance of program adviser.
3. Ideas in the world (5 credits). Must be chosen with guidance of program adviser.
4. Power and difference (5 credits). Must be chosen with guidance of program adviser.
5. CHID 390 (5 credits)
6. One upper-division CHID course (5 credits)

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The program encourages students to adopt nuanced perspectives on their position relative to texts, cultures, societies, and historical periods. Program graduates have gone on to postgraduate studies in the humanities and social sciences, as well as professional training and careers in a wide variety of fields including law, administration and public policy, medicine, education, journalism, new media, and film.
- *Instructional and Research Facilities:* Computer workstations for students in B102 Padelford and in C101 Padelford.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* CHID undergraduates participate in a variety of educational experiences outside the classroom. Students interested in the opportunity to integrate theory with practice while making connections to organizations outside the University may sign up for CHID 399. Additionally many CHID study abroad programs incorporate an "engaged community learning" project, which provides an opportunity for students to apply their analytical skills and understanding of the historical and cultural context to a close participation in the work of local organizations. The diversity of these community efforts allows students to engage their particular interests through participation in social welfare organizations, grassroots community groups, after-school programs, health clinics, theater and other performing arts groups, as well as video and other visual arts projects.
- *Department Scholarships:* See CHID website for information and deadlines
- *Of Special Note:* CHID also sponsors two undergraduate journals: *interSections*, which features senior theses, research papers, seminar papers, and essays addressing subjects within the arts,

humanities, and social sciences; and *The Anthology Project*, which is dedicated to providing a forum where students can discuss and reflect on experiences abroad.

Computer Science

Overview

AC101 Paul G. Allen Center for Computer Science and Engineering

The Paul G. Allen School of Computer Science and Engineering educates students to become leaders in the design and implementation of the computing systems that touch every aspect of modern society. The Allen School is widely recognized as one of the top programs in the world, with passionate faculty bringing the latest advances into the classroom and the lab.

The Allen School offers two undergraduate degrees: Computer Science (through the College of Arts & Sciences) and Computer Engineering (through the College of Engineering). While the degree requirements differ in some details, undergraduate majors working toward either degree have the same broad opportunities to take the wide array of courses that the Allen School offers. Many of our graduates go on to careers at the world's great technology companies, from the largest industry titans to the smallest start-ups. Others join innovative companies and non-profit organizations outside the traditional computing industry to use software, hardware, and data to solve the world's greatest challenges. Still others go on to challenging graduate programs in a variety of fields.

At the graduate level, the Allen School offers (1) an integrated Master's program for some of our undergraduate majors seeking a deeper education before leaving campus, (2) an evening Master's program for currently employed software professionals, and (3) a Ph.D. program for students seeking a research career.

The field of computing is broad and growing, and the Allen School's course catalog reflects this breadth. Beyond the popular introductory programming courses taken by thousands of students from every major on campus, our courses cover everything from the mathematical foundations of what computers can and cannot do; to hands-on experiences building software and hardware artifacts with a range of programming languages and tools; to advanced courses in software engineering, human-computer interaction, computer graphics and animation, artificial intelligence, machine learning, large-scale data management, natural language processing, computer networking, computational biology, robotics, computer security and privacy, and much more.

Computers are the most flexible and powerful machines ever created. While the applications of computing continue to grow and change, the core magic of the Allen School is timeless: computer scientists and engineers combine creative problem-solving, rigorous design, and the creation of algorithms, software, and hardware systems to build solutions that change the world.

Undergraduate Program

Adviser

Bill and Melinda Gates Center, Room 170, Box 352355
(206) 543-2656

ugrad-advisor@cs.washington.edu

The Paul G. Allen School of Computer Science and Engineering offers the following programs of study:

- The Bachelor of Science degree with a major in computer science

- The Bachelor of Science in computer engineering degree (see [Computer Engineering](#) section)

The core requirements of the two undergraduate majors are similar. The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be primarily interested in the design of software systems and applications.

The computer engineering major includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole. It may be more appropriate for students who are interested in building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints.

Bachelor of Science

Department Admission Requirements

Applicants are considered in three groups - Entering Freshmen, Currently Enrolled UW Students, and Entering Transfers. Admission is capacity constrained. Completion of minimum requirements does not guarantee admission.

1. *Entering Freshmen*: The largest pathway for admission to Computer Science is directly out of high school, prior to completion of university-level prerequisites. Freshman applicants listing Computer Science as their intended major are automatically considered. Competitive applicants have usually taken the equivalent of four years of high school mathematics and at least one year of high school laboratory science upon entering the University. Admission is for autumn only.
2. *Currently Enrolled UW Students*: A portion of each year's class is admitted after matriculating to UW. Admission is for autumn or spring quarter. Application deadlines: July 1 for autumn and January 15 for spring. To be considered, applicants must meet the following course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); minimum five credits of Natural World, including one of the following: PHYS 121, CHEM 142/CHEM 145, or BIOL 180 (or any approved science course that requires one of these courses as a prerequisite); CSE 142, CSE 143; at least five credits of English composition.
3. *Entering Transfers*: A portion of each year's class is admitted from students transferring from another college or university. Admission is for autumn or spring. Transfer applicants are considered based on their University transfer application; no additional departmental application is required. Applicants must identify Computer Science as their intended major, and indicate they will begin the major immediately upon transferring. Entering transfer applicants not admitted to Computer Science upon initial admission to the UW are eligible to apply as Currently Enrolled UW Students after completing one quarter of enrollment. Entering transfer applicants must meet the following requirements:
 - a. Minimum 30 graded college credits completed by the University transfer application deadline.
 - b. Completion of the following courses prior to matriculation to UW: MATH 124, MATH 125, MATH 126; PHYS 121, CHEM 142, or BIOL 180; CSE 142, CSE 143; and at least five credits of English composition.

Major Requirements

87-90 credits:

1. *Science (10 credits)*: 10 credits from the list of approved natural science courses in the CS&E handbook. Courses that meet the department's science requirement include PHYS 121, CHEM 142/CHEM 145, and any course in biology, chemistry, physics, earth and space sciences, astronomy, and atmospheric sciences that requires PHYS 121 or CHEM 142/CHEM 145 as a prerequisite.
2. *Mathematics (15-18 credits)*: MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken); MATH 390/STAT 390 or MATH 391/STAT 391
3. *Required Courses (29 credits)*: CSE 142, CSE 143, CSE 311, CSE 312, CSE 331, CSE 332, CSE 351
4. *Senior Electives*: 33 additional credits from courses on the approved CSE electives list in the CS&E handbook, of which at least 20 credits must be at the 400-level. The following must be included:
 - i. Six courses from the CSE core courses list in the CS&E handbook of which four courses must be 400-level CSE courses
 - ii. Either one additional course from the CSE core courses list or one course from the CSE capstone list in the CS&E handbook
 - iii. Minimum 2.0 grade for any course applied to the major. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.

Data Science Option: Additional credits required for the Data Science Option increase total major requirements to 89-92 credits. All courses listed below may be completed as part of the Computer Science major shown above.

1. CSE 421, CSE 442, CSE 444, CSE 446 (15 credits)
2. SOC 225 (3/5 credits)
3. One additional course from the data science elective list (see the Allen School website for list.)

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The computer science field has a broad base of private- and public-sector jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, applications programmer, technical sales and marketing, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers. The field is also highly valued for practicing entrepreneurship.
- *Instructional and Research Facilities*: [Paul G. Allen Center for Computer Science and Engineering](#) includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

The Allen School general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. The special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center and Gates Center are two of the finest computer science and computer engineering facilities in the nation. All Allen School students have access to these resources.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. See www.engr.washington.edu/coop and depts.washington.edu/careers for information.
- *Departmental Scholarships:* The Allen School has a limited number of scholarships available to current Allen School majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html
- *Student Organizations/Associations:* A student chapter of the Association for Computing Machinery (ACM) operates within the Allen School.

Dance

Program Overview

256 Meany

Dance is part of a liberal arts curriculum and provides students a foundation for future advanced work in dance pedagogy, performance, choreography, dance science, dance studies, or other movement-related fields. Faculty work closely with students to guide them on the educational track that best serves their career goals. Information about the dance major's creative studies and dance studies options, dance minor, dance endorsement, and Master of Fine Arts degree in dance can be found at dance.washington.edu

Undergraduate Program

danceadv@uw.edu

The Dance Program offers the following programs of study:

- The Bachelor of Arts degree with a major in dance, with options in either creative or dance studies.
- A minor in dance.
- OSPI approved Dance Endorsement

Bachelor of Arts

Program Admission Requirements

Applicants who meet the following requirements are accepted during autumn, winter, and spring quarters on a rolling basis.

1. Minimum 2.00 cumulative GPA.
2. Successful completion of 5 credits in any of the required core courses for the major.
3. Successful completion of or registration in at least one technique course.

Major Requirements

Minimum 56-65 credits in dance

1. *Core Courses (minimum 32 credits):* DANCE 166; DANCE 242; DANCE 250 (5 credits); DANCE 251; DANCE 271 (1 credit); and DANCE 493 (5 credits); one of DANCE 101, DANCE 344 (5 credits), or DANCE 345 (5 credits); DANCE 494 (3 credits) or DANCE 480 (strongly suggest both)

2. *Technique Courses*: Minimum 15 credits from approved 200-level or higher dance technique courses, representing at least four different movement idioms. See adviser for approved list.
3. One of the following:
 - a. Electives (minimum 9 credits): See adviser for approved list. A core course or technique course on the electives list may not be used for both an elective and technique/core requirement.
 - b. Dance Studies Option (18 credits)
 - i. Either DANCE 350 or DANCE 420; DANCE 415; DANCE 416
 - ii. Minimum 9 credits additional approved electives based on individual interests and agreed to in conjunction with Dance Program adviser or faculty member
 - c. Creative Studies Option (minimum 17 credits)
 - i. DANCE 266; DANCE 270; DANCE 480 or DANCE 494 (whichever not taken for core)
 - ii. Minimum 10 additional credits selected from approved, advanced 300-level or higher dance technique courses. See adviser for approved list.
4. Minimum 2.00 cumulative GPA for courses applied to the major.

Minor

Minor Requirements: Minimum 25 credits

Minimum 25 credits to include 10 credits from Dance academic courses, and 15 credits from Dance technique courses. See adviser for approved lists.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The Dance Program curriculum provides a balance between academic rigor and artistic development and serves as a basis for a broad range of career choices in dance related and other fields demanding strong communication skills, creativity, commitment, and the ability to work collaboratively and independently. Majors are encouraged to supplement their dance studies with coursework in other disciplines that provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.
- *Instructional and Research Facilities*: Three spacious and well-equipped dance studios in Meany Hall. A video and sound editing facility. Use of Meany Hall and the Meany Studio Theatre for Dance Program performances.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Dance Endorsement*: dance.washington.edu/dance-program-endorsement.
- *Department Scholarships*: See adviser.
- *Research, Internships, and Service Learning*: See adviser.
- *Student Organizations/Associations*: Dance Student Association

Graduate Program

Graduate Program Coordinator
255 Meany, Box 351150
206-543-5594
uwdance@uw.edu

The program offers graduate study leading to an MFA that prepares dance artists (with a minimum eight years professional performance experience) for careers in higher education. The full two-year program begins mid June and includes summer quarter study. MFA candidates are supported in the development of a scholarly dimension to their creative work in dance, receive a tuition waiver, and earn a monthly stipend in exchange for working as a teaching assistant in the Dance Program. For more information visit: dance.washington.edu/graduate-programs

Master of Fine Arts

Admission Requirements

1. Letter of interest, resume, and writing sample
2. Undergraduate degree from an accredited institution
3. Minimum eight years of professional performing experience
4. Ability to demonstrate movement skills at a professional level in at least one idiom, performance or website demonstrating performance range and ability, in person interview for final candidates
5. Three letters of reference verifying accomplishments in the professional dance arena and readiness for graduate study in dance
6. Neither a foreign language nor the GRE is required.
7. Application deadline October 15; September 15 for foreign applicants.
8. Online application procedures available at www.grad.washington.edu/admissions/

Degree Requirements

Minimum 72 credits

During the full two-year program, students enroll full-time (minimum 10 credits/quarter, including 9 credits during summer quarter). Of the 72 credits, 40 are in required courses.

1. *Required Coursework:* DANCE 510 (12 total), DANCE 515, DANCE 516, DANCE 520, DANCE 521, DANCE 530 (4 total), DANCE 531 (6 total), DANCE 595
2. *Coursework or Competency:* Students must have taken the following courses as an undergraduate, or have mastered their content through practical experience, or complete them during the program: DANCE 493, DANCE 544, DANCE 545, DANCE 590.
3. *Coursework of Interest (not required):* DANCE 420, DANCE 535, DANCE 536, DANCE 550, PHIL 445 or PHIL 446

Financial Aid

All graduate students receive tuition waivers and teaching assistant stipends.

Digital Arts and Experimental Media

Program Overview

207 Raitt

The processes of inquiry encompassing imagination, exploration, discovery, and reflection are universal among artists, scholars, scientists, and engineers. All seek to uncover new knowledge through innovations that improve our lives and communicate new ways of understanding ourselves and the universe. The Center for Digital Arts and Experimental Media (DXARTS) is a creative research convergence zone for intrepid artists and scholars who are pioneers of an unfolding new era in the arts.

The DXARTS program embraces an expansive range of arts practice, theory, and research across multiple disciplines. The center is home to its own graduate degree program, but welcomes into its facilities and courses many who are not directly affiliated with this program. Faculty and students at DXARTS may focus their work in a particular area of experimental arts (digital video, digital media art, computer music and sound art, computer animation, design computing, mechatronics, and so on), or they may pursue areas of creative research that have no media allegiance overlapping with and drawing from several or many different areas. Whatever the case, artists and scholars working at DXARTS engage in teaching, learning, and research within the synergistic, multidisciplinary setting of the center's labs, studios, and classrooms.

A common thread running through all of the work at DXARTS is the implicit maxim that to discover new knowledge we must challenge all assumptions. DXARTS is a place where the ideas and outcomes of creative arts research are in an ongoing state of becoming.

Undergraduate Program

dxarts@uw.edu

The DXARTS program offers the following program of study:

- Bachelor of Fine Arts degree with a major in digital arts and experimental media
- Minor in digital arts and experimental media

Bachelor of Fine Arts

Program Admission Requirements

Not currently accepting new students.

Admission is once a year. Application, normally during the sophomore year, is made during winter quarter for admission in spring. Admission is competitive. A minimum 2.50 GPA guarantees consideration, but the GPA of accepted applicants is normally considerably higher.

All applicants, regardless of background and proposed course of study, are expected to show a significant level of computing skill and general technology literacy.

Students must enroll in DXARTS 200 autumn quarter. Based on performance in DXARTS 200, students are selected to continue in DXARTS 201 winter quarter. Students enrolled in DXARTS 201 are eligible to submit an application and supplemental materials to be considered for admission spring quarter. Supplemental materials include an electronic portfolio, a statement of interest in the program, and a proposed course-of-study plan. For details, see the program's [website](#). Students must complete the following prior to application:

1. CSE 142
2. PHYS 114 or PHYS 121
3. MUSIC 120
4. ART H 203
5. Mathematics proficiency through the pre-calculus level. Proficiency may be demonstrated by completion of MATH 120 or equivalent, a minimum score of 68% on the UW Advanced Mathematics placement test, a minimum score of 2 on the mathematics AP exam, or completion of a college-level calculus course.

Major Requirements

In addition to the courses required for admission as described above, major requirements include the following:

1. 64-74 credits of DXARTS courses, as follows:
 - a. DXARTS 202 (5 credits)
 - b. Three quarters of DXARTS 400 (9 credits total)
 - c. DXARTS 461, DXARTS 462, DXARTS 463 (15 credits)
 - d. Completion of one of the following four DXARTS sequences (15 credits): DXARTS 441, DXARTS 442, DXARTS 443 (3D Motion and Graphics); DXARTS 451, DXARTS 452, DXARTS 453 (Video); DXARTS 471, DXARTS 472, DXARTS 473 (Mechatronics).
 - e. Completion of a third core sequence as listed above or one of the following fundamentals courses dealing with a third content area (5 to 15 credits): DXARTS 440, DXARTS 450, DXARTS 460, or DXARTS 470.
 - f. Senior thesis in the form of 15 credits of DXARTS 491, DXARTS 492, and DXARTS 493, including the completion and exhibition of a B.F.A. thesis project that is a significant and original contribution both aesthetically and technically.

2. 20-30 credits in additional DXARTS courses, or courses from a list of approved electives in other areas, to bring total major credits to 94. See department website or advising office for a list of approved electives.
3. A minimum 2.0 grade in all DXARTS courses counted toward the major. A cumulative 2.50 GPA in all DXARTS courses and approved electives.
4. For complete information about the B.F.A. program visit the program's [website](#).

Minor

Minor Requirements

Minimum 30 credits of digital arts and experimental media courses (DXARTS) to include:

1. DXARTS 200 (5 credits)
2. 25 additional credits from DXARTS courses
3. Minimum cumulative 2.00 GPA for courses applied to the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The program goal is to create opportunities for entering artists to discover and document new knowledge and expertise. Unlike other BFA degrees, which offer initial professional studio art education, this BFA is primarily a pre-graduate, research-oriented degree, signifying that an individual is professionally qualified to investigate fundamental problems in the nature and practice of digital arts and experimental media. Graduates are prepared to pursue original creative and technical research in the field and contribute to the development of knowledge and its consequences in society and culture.
- *Instructional and Research Facilities:* DXARTS houses extensive laboratories and advanced research studios with state-of-the art computing, imaging, sound, networking, mechatronics, and electronics equipment to support a wide range of experimental art.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Some areas of research and professional opportunities within DXARTS include digital video art, computer music composition, website design and programming, 3D animation, motion graphics design, user interface design, sound design, interactive media production, multimedia art, electronic stage and set design, authoring of electronic online publications, special effects design, virtual environment design, sound art, and installations art (in galleries, public, and virtual spaces).
- *Department Scholarships:* Limited in number with competitive application processes. See adviser for details.
- *Student Organizations/Associations:* None.

Graduate Program

Graduate Program Coordinator
207 Raitt Hall, Box 353414
(206) 543-4218
dxarts@uw.edu

Doctor of Philosophy

Doctoral education in Digital Arts and Experimental Media creates opportunities for artists to discover and document new knowledge and expertise at advanced levels. Creating new art is at the center of all activities in the program; the PhD degree prepares artists to pursue original creative and technical research in digital arts and experimental media and to pioneer lasting innovations on which future artists and scholars can build.

Admission Requirements

1. Master's degree or equivalent in a discipline or field related to the proposed doctoral work
2. Portfolio of artistic work
3. Statement of purpose
4. Competence in computing, general technology literacy, and skill and imagination in the applicant's areas of interest
5. One copy of the Graduate School's Application Form
6. One sealed official transcript from each collegiate institution attended
7. A digitally-based portfolio of artistic work including any other documentation that can help the admissions committee make its evaluations. The portfolio should be thoughtfully organized in a digital format (CDROM, DVD, URL, etc.) that best represents the applicant's work. Non-digital supplemental materials should be included in the index on the digital portfolio.
8. A complete curriculum vitae and narrative biography
9. Three letters of recommendation from instructors or professors familiar with the applicant's academic qualifications
10. International applicants submit TOEFL and TSE scores

Degree Requirements

90 credits

1. Prior to the general examination, six quarters of full-time study (minimum 10 credits per quarter). DXARTS 500 required every quarter.

2. 60 credits of DXARTS approved courses (not including DXARTS 800 credits). At least 30 credits at the 500 level. At least 30 in graded 400- and 500-level courses.
3. Minimum 3.00 GPA in DXARTS courses
4. General examination
5. Final project - a substantial and original contribution in both artistic and technical domains. Minimum 27 credits of DXARTS 800 over a period of at least three quarters before taking the final doctoral examination
6. Two-part final examination. Registration as a doctoral student is required during the quarter the examination is taken.

Drama

School Overview

101 Hutchinson

Theatre reflects the most compelling and complex issues of the human experience. It invites innovative understanding, collaborations, and dialogue and in turn creates community through the unique shared social experience of live performance. For artists and scholars it demands curiosity, invention, the courage to take risks, as well as practical application and the discipline required to succeed in any field.

The School of Drama offers courses of study which transforms artists and scholars into innovative and courageous poised-to-become creative leaders and engaged global citizens.

Through mastering skills and techniques applicable to any group endeavor, and acquaintance with established and innovative performance traditions and theories, students of theatre employ intellectual and creative rigor and develop entrepreneurial skills. This approach enables them to develop their own authentic, original voices and visions and engage the complexities, gravity, and joys of our world.

Undergraduate Program

Adviser

129 Hutchinson Hall, Box 353950

(206) 543-4204

uwdrama@uw.edu

The School of Drama offers the following program of study:

- The Bachelor of Arts degree with a major in drama
- Minors in acting, in design for performance, and in theatre studies

Bachelor of Arts

The Bachelor of Arts in drama teaches the history, theory, methods, and techniques of the art of theatre. Students who study drama discover their individual creative voices that help make them unique and engaged global citizens.

At its core, the undergraduate program in drama instills creative and critical thinking skills, promotes collaboration and academic rigor, and provides practical experiences in creative enterprise.

Suggested First- and Second-Year College Courses: See department admission requirements below.

Department Admission Requirements

DRAMA 201

No audition is required to enter the program.

Major Requirements

60-65 credits as follows:

1. DRAMA 201, DRAMA 251, DRAMA 302, DRAMA 371, DRAMA 372, DRAMA 373 (30 credits)
2. Three courses from DRAMA 210, DRAMA 211, DRAMA 212, DRAMA 213, DRAMA 215 (12-13 credits)
3. Two courses from DRAMA 290, DRAMA 291, DRAMA 292 (2-4 credits)
4. One choice/special studies course from DRAMA 365, DRAMA 367, DRAMA 416, DRAMA 494, or other adviser-approved course (5 credits)
5. One of the options shown below (10-15 credits)
 - a. *General Drama*: 9-11 elective credits from approved list of 300- and 400-level courses on the department website
 - b. *History, Theory, and Criticism Option*: No longer accepting students - pending elimination
 - c. *Performance Option (15 credits)*
 - i. DRAMA 466 (2 credits)
 - ii. One course from DRAMA 351, DRAMA 352, DRAMA 353 (4 credits)
 - iii. One course from DRAMA 451, DRAMA 452, DRAMA 453, DRAMA 454, DRAMA 455, DRAMA 456, DRAMA 457 (3-4 credits)
 - iv. *Electives*: See department website for approved list of 300- and 400-level courses (to reach 15 credits)
 - d. *Design Option (15 credits)*
 - i. One additional course from DRAMA 210, DRAMA 211, DRAMA 212, DRAMA 213, DRAMA 215 (4-5 credits)
 - ii. DRAMA 466 (2 credits)
 - iii. One additional course from DRAMA 290, DRAMA 291, DRAMA 292 (1 credit)
 - iv. *Advanced design*: DRAMA 314, DRAMA 316, DRAMA 414, DRAMA 415, DRAMA 417, DRAMA 418, DRAMA 419, DRAMA 420, DRAMA 421 (3-4 credits)
 - v. *Electives*: See department website for approved list of 300- and 400-level courses (to reach 15 credits)
6. Minimum 2.00 cumulative GPA in courses applied to the major

Minors

Minor in Acting: 25 credits

1. DRAMA 251, DRAMA 252 (10 credits)
2. 15 credits from the following: DRAMA 351, DRAMA 352, DRAMA 353, DRAMA 451, DRAMA 452, DRAMA 453, DRAMA 454, DRAMA 455, DRAMA 456, DRAMA 457, DRAMA 460, DRAMA 461, DRAMA 490, DRAMA 498
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Minor in Design for Performance: 25 credits

1. Two from DRAMA 210, DRAMA 211, DRAMA 212, DRAMA 213; and DRAMA 290 (2 credits). (10 credits)
2. 15 credits from the following: DRAMA 316, DRAMA 317, DRAMA 391, DRAMA 414, DRAMA 415, DRAMA 416, DRAMA 417, DRAMA 418, DRAMA 419, DRAMA 420, DRAMA 421, DRAMA 491, DRAMA 498
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Minor in Theatre Studies: 25 credits

1. DRAMA 201 (5 credits)
2. 20 credits from the following: DRAMA 302, DRAMA 303, DRAMA 365, DRAMA 371, DRAMA 372, DRAMA 373, DRAMA 416, DRAMA 494, DRAMA 499
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The faculty of the School of Drama considers the optimum preparation for the theatre artist to be comprised of a liberal arts undergraduate major in drama and a graduate conservatory education.

Learning objectives include enriched artistic expression, a foundation for further study, and cultivation of essential life skills: teamwork, communication, critical thinking, and imagination.

Students earning the Bachelor of Arts in drama are prepared to seek employment in the theatre industry, apply for advanced degrees in a specific area of theatre (e.g., MFA in acting or design), or transfer the skills gained through the program to broader career opportunities. Recent graduates have pursued careers in acting, design, directing, technical direction, stage management, dramaturgy, playwriting, literary management, teaching, and in such non-theatre occupations as real estate agent, fund-raiser, public relations staff, politician, librarian, academic counselor, lawyer, nurse, translator of foreign films, admissions counselor, trade show/convention production assistant, talent agent, casting director, music promoter, special events coordinator, tour guide, human resources coordinator, wedding coordinator, aerobics instructor, music promoter.

- *Instructional and Research Facilities:* Rehearsal and performance spaces include the Glenn Hughes Penthouse Theatre (the first theatre-in-the-round built in the United States), the thrust-stage Floyd and Delores Jones Playhouse, the end-stage Meany Studio Theatre, and the proscenium in Meany Hall. Other spaces include the Cabaret, Studio 201, and Hutchinson 218. School of Drama facilities include a design studio, costume shop, scene shop, and computer labs.

The Drama Library houses reserve books, plays, sound effects, dialect tapes, local audition and job notices, and a special collection of acting editions. Also available are specialized indexes and theatre databases. The librarian assists in the use of reference materials and indexes,

bibliographic searches of on-line databases, and offers reference service and bibliographic instruction sessions for groups and individuals.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Student participation in all aspects of dramatic art is provided through student productions, and faculty- and student-directed plays drawn from the full range of world dramatic literature and produced throughout the year. The school also produces operas in association with the School of Music

To enhance employability and gain hands-on experience, students are encouraged to participate in internships with regional theatres, and related organizations or businesses. Academic credit may be earned for internships under the course number DRAMA 493. Internship credits count toward drama elective credits to graduate. A resource guide to drama-related internships is available at the drama undergraduate advising website.

Drama students are also encouraged to apply for undergraduate research, leadership, and/or fellowship grants available through the Mary Gates Endowment.

- *Department Scholarships:* School of Drama scholarships are awarded annually every spring for the following academic year to students who have demonstrated academic merit and contributed significantly to the School of Drama. Applications are distributed from the advising office.
- *Student Organizations/Associations:* The Undergraduate Theater Society (UTS) is a student organization that produces undergraduate theatre works in the Cabaret black-box performance space in Hutchinson Hall. Any UW student may audition for UTS productions. UTS members also participate in annual New Student Orientation and other school events on a volunteer basis.

A volunteer elected group of drama students, the BA Council, meets regularly with the School of Drama Executive Director and head of the Bachelor of Arts program to discuss issues relative to the undergraduate program.

Graduate Program

Graduate Program Coordinator
101 Hutchinson, Box 353950
(206) 543-0714
uwdrama@uw.edu

The school offers professional training and scholarly programs leading to the Master of Fine Arts (MFA) and Doctor of Philosophy (PhD) degrees. Areas of study for the MFA degree are acting, stage direction, scene design, lighting design, and costume design. Most students should expect to spend three intensive years completing requirements for the MFA degree.

The PhD program provides students training for scholarly research in theatre history, dramatic literature, theory, and criticism. It also hosts the UW's Center for Performance Studies and connects students with related classes on campus.

Master of Fine Arts -- Acting

Admission Requirements

Admission is based on a private audition and interview with the head of the Professional Actor Training Program (PATP).

Applicants prepare the following:

1. A two-minute monologue from a modern prose play
2. A two-minute Shakespearean verse monologue
3. Approximately 16 bars of a song, a cappella or with auditioner-provided accompaniment
4. Auditioners should be ready to detail their previous training.

Students who hold (or will hold by the time they enroll) a baccalaureate degree from an accredited institution may apply. Most applicants have undergraduate degrees in theatre, but that is not essential. All applicants must demonstrate outstanding talent. GRE not required. International applicants must meet minimum TOEFL and TSE scores.

Applicants submit the following to Graduate Programs, School of Drama, University of Washington, Box 353950, Seattle, WA 98195-3950:

1. School of Drama PATP application form (available from [the school's website](#)) with preferred audition date indicated
2. Non-refundable audition fee to the School of Drama. Applications postmarked after the deadline must include a late application fee of \$10, separate from the fee due to the Office of Graduate Admissions.
3. Headshot
4. Current résumé of training and experience in the applicant's field
5. One set of unofficial transcripts
6. Statement of purpose, including educational and professional goals
7. Two letters of recommendation

Degree Requirements

90 credits

PATP training provides actors the practical tools and sensibilities to become outstanding theatre actors comfortable and effective in all media. During the three years of study, every student appears in at least seven productions, two self-written solo shows, an in-depth dialect project, and extensive scene and technique classes.

The program immerses students in the traditional vocabulary and practices set down by Konstantin Stanislavski and increases the actors' expressiveness through "instrument classes" in voice, speech, dialects, coordination (Alexander Technique), Viewpoints, and Suzuki-based movement. PATP students become well versed in the established canon of Western dramatic literature and have opportunities to audition for summer theatre festivals from around the region and country. The program also maintains relationships with professional theatres in Seattle and the region such as the Seattle Repertory Theatre,

Intiman, Empty Space, ACT, Seattle Children's Theatre, The Guthrie Theatre, and the Oregon Shakespeare Festival.

At the end of the third year, students prepare a professional showcase for Seattle, Los Angeles, and New York, and each actor leaves with a professional quality audition reel.

Required coursework

1. 36 credits of DRAMA 557
2. 36 credits of DRAMA 558
3. DRAMA 551
4. DRAMA 552
5. DRAMA 553
6. 6 credits of DRAMA 559
7. 9 credits of DRAMA 700

Master of Fine Arts -- Directing

Admission Requirements

The program, which accepts only two candidates, chooses applicants who show evidence of accomplishment "out in the world," who may have successfully assisted seasoned directors, and who have at least the beginning of a professional and artistic record. It is extremely difficult to gain admission directly out of a BA program with no other credentials.

1. Applicants submit the following to Graduate Programs, School of Drama, Box 353950, Seattle WA 98195-3950:
 - a. Directing application form (available for download from the school's [website](#)) and fee, made payable to the School of Drama (separate from the fee due to the Office of Graduate Admissions)
 - b. Résumé of training and experience in the field
 - c. Statement of purpose including educational and professional goals
 - d. Three letters of recommendation
 - e. One set of unofficial transcripts
 - f. Directorial analysis of a play or opera chosen from a preselected list
 - g. GRE not required. International applicants must meet minimum TOEFL and TSE scores.
 - h. Application deadline: November 1
2. *Selected applicants:* Twelve to 16 applicants are invited to interview, either in person or via video conferencing. Candidates interview with the head of the program; present a monologue; and respond to a two-page questionnaire.
3. *Final step for short-listed applicants:* Four to eight candidates are invited to Seattle for in-person interviews. Each candidate conducts a rehearsal of one of three pre-selected scenes with actors provided by the School of Drama. Candidates receive scene options and any additional information when notified of their selection.

Degree Requirements

90 credits

The intensive, three-year, conservatory directing program prepares students for successful entry into the professional theatre. Classes and training include a range of types and styles of dramatic work, including realistic, nonrealistic, classical, and contemporary plays. Directing laboratory, seminar, Suzuki, and Viewpoints are taken every quarter. Acting process work includes Stanislavski, action theory, Shakespeare, Chekhov, and contemporary realism.

Every quarter each student directs in the classroom, studio, or both.

1. Coursework

- a. 14 credits of DRAMA 563
 - b. 12 credits of DRAMA 567
 - c. Electives chosen from DRAMA 419, DRAMA 510, DRAMA 560, DRAMA 561, DRAMA 562, and DRAMA 569
 - d. 9 credits of DRAMA 700
 - e. Faculty may advise additional coursework in areas such as Alexander technique, dialects, lighting design, combat, literature, or history of styles and costume.
2. **Internships:** One quarter is devoted to a professional internship experience. MFA directors may intern either locally, nationally, or internationally during winter or spring quarter of the third year.

Master of Fine Arts -- Design

Admission Requirements

The program generally accepts two students in each area (scenic design, costume design, and lighting design). It is extremely difficult to gain admission directly out of a BA/BFA program with no other credentials.

Interviews: Held in Seattle from mid-January to the beginning of March. Applicants indicate how and when they plan both to submit their portfolio and interview with faculty. Applications must be received before an interview is scheduled.

Portfolio: May include hand drafting, renderings, photographs of realized work or of models, costume sketches, and other graphic work or high-quality photocopies of same, blue lines and/or duplicate slides. Work should demonstrate strong graphic skills (including accurate rendering of the human figure) and the ability to devise effective design solutions to the problems posed by a script. Portfolio should include examples of drawing or painting not intended as theatre design projects: figure drawing, landscape, architectural sketching or lighting, lighting installations, etc. High quality photocopies are acceptable.

For lighting design applicants, the portfolio should include examples of hand or computer drafting, two or more complete projects including a one-page statement of conceptual approach, hook-up, plot, and cue ideas. Also, samples of set sketches and life drawing.

Application Requirements: For questions, contact the School of Drama's graduate program assistant at (206) 543-0714 or email uw drama@uw.edu.

1. GRE not required. International applicants must meet minimum TOEFL and TSE scores.

2. Portfolio (or bring to the interview in Seattle)
3. Design application form and fee
4. Résumé of training and experience in the field
5. Three letters of recommendation
6. Statement of purpose, including goals
7. Unofficial transcripts

Degree Requirements

90 credits

First year devoted primarily to studio course and skill building; realized production designs become a focus of the second and third years. In the third year, students complete a ten-week professional internship before returning to the School of Drama for two quarters with a final thesis project occurring in either of those quarters.

Scenic Design: Students develop proficiency of expression via drawing and painting, drafting, model building, scene painting, and a working knowledge of scenic and property construction. Production work is emphasized in the second and third years of residency.

Costume Design: Encompasses design, construction, graphic skills, and history. Production work in costume design is emphasized in the second and third year.

Lighting Design: Emphasizes development of both theoretical/thinking and practical/compositional skills. Production work in lighting may occur in the first year, but is emphasized in the second and third years, and often includes dance.

Doctor of Philosophy

Admission Requirements

Preference given to applicants with MA/MFA degrees and theatre experience but those who hold a baccalaureate degree from an accredited college or university are eligible to apply. Applicants submit the following materials online at <https://www.grad.washington.edu/applForAdmiss/>

1. Essay or thesis chapter representative of the applicant's best scholarly work
2. GRE test scores
3. Current résumé of training and experience in the field
4. Statement of purpose including educational and professional goals
5. Three letters of recommendation.
6. One set of unofficial transcripts

International applicants must meet minimum TOEFL and TSE scores

Degree Requirements

Minimum 110 credits

1. Three years of coursework, including a sequence of 16 seminars and annual examinations. Drama courses include DRAMA 571, DRAMA 572, DRAMA 573, DRAMA 575, DRAMA 576, DRAMA 577, DRAMA 581, DRAMA 582, DRAMA 583, DRAMA 585, DRAMA 586, and DRAMA 587
2. Minimum three courses outside the School of Drama
3. Upper-level reading course in a foreign language
4. Dissertation: 30 credits of DRAMA 800

The PhD program hosts the UW's Center for Performance Studies and connects doctoral students with related classes on campus. Special topics in the history sequence have included Restoration theatre, drama in the Industrial Age, communism and capitalism, and ancient theatre history. Seminars in criticism have included reading, interpretation and performance; mimesis and theatrical representation; the semiotics of theatre; and drama and Marxist theatre theory. Students are encouraged to develop original research in these seminars and to present their work at professional meetings or publish it in academic journals.

Economics

Department Overview

305 Savery

Economics studies the institutions and arrangements that societies use to create and allocate productive resources and advances our understanding of the choices and behaviors of individuals, households, firms, and other organizations. Its deep intellectual roots, rigorous analytical methods, and powerful ability to explain social phenomena warrant the importance of economics within the social sciences.

Undergraduate Program

Advisers

305 Savery, Box 353330
(206) 543-5794

econadv@uw.edu

The Department of Economics offers the following programs of study:

- The Bachelor of Arts degree with a major in economics
- The Bachelor of Science degree with a major in economics

The Bachelor of Arts degree is designed to provide a general background in economics, and is the choice of most departmental majors.

The Bachelor of Science degree requires more mathematics for admission, and its graduation requirements have a more pronounced quantitative emphasis.

Applied fields of study available include money and banking, industrial organization, environmental and natural resource economics, labor economics, public finance, comparative systems and development, international trade, and econometrics.

Bachelor of Arts

Suggested First- and Second-Year College Courses: ECON 200, ECON 201; and MATH 120, MATH 124 or MATH 111, MATH 112. Courses that develop strong analytical and quantitative-reasoning skills.

Department Admission Requirements

1. Minimum 45 quarter credits, including ECON 200, ECON 201; STAT 311; one of the following: MATH 124, MATH 134, or MATH 145; and 5 credits of English composition
2. Minimum 2.50 cumulative GPA for all prior college work; minimum 2.50 GPA for all UW coursework, when applicable.
3. Minimum 2.50 cumulative GPA for the following four courses: ECON 200, ECON 201; STAT 311; one of the following: MATH 124, MATH 134, or MATH 145, with a minimum 2.0 grade for each of these courses and for English composition.

4. A one-page personal statement, typed and double-spaced, responding to the following questions: What are your personal/educational goals, and how do you expect those to be met through an economics major? What background do you bring to the program? Describe any special experiences that would contribute to your studies in the field.
5. Completion of reading comprehension, critical thinking, and writing assessment essay. See department website for details.
6. Application deadline is the second Friday of each quarter (autumn, winter, spring). Admission is competitive. Meeting above criteria does not guarantee admission to the major.

Major Requirements

60 credits

1. Admission to the major
2. STAT 311 (or equivalent) and MATH 112 or MATH 124 (or equivalent)
3. ECON 200 and ECON 201; minimum 2.0 grade
4. ECON 300 and ECON 301; minimum 2.0 grade
5. ECON 382
6. Five ECON courses (25 credits) at the 400 level (not including ECON 496, ECON 497, ECON 499)
7. Minimum 50 credits in ECON-prefix courses; minimum 2.00 GPA for these 50 credits
8. ECON 300, ECON 301, and ECON 382 taken in residence as a matriculated student through the UW, Seattle
9. Maximum 10 credits at the 400 level taken out of residence at the UW
10. Maximum 10 credits at the 400 level taken out of residence at the UW

Bachelor of Science

Suggested First- and Second-Year College Courses: ECON 200, ECON 201, and MATH 120, MATH 124 and STAT 311. Additional calculus preparation during the first year is strongly recommended as MATH 125 and MATH 126 are required for admission. Courses that develop strong analytical and quantitative-reasoning skills.

Department Admission Requirements

1. Minimum 45 quarter credits completed, including ECON 200, ECON 201; STAT 311, STAT 341, or STAT 390; MATH 124, MATH 125, and MATH 126 (or MATH 134, MATH 135, MATH 136); and 5 credits of English composition
2. Minimum 2.50 cumulative GPA for all prior college work; minimum 2.50 GPA for all UW coursework, when applicable.
3. Minimum 2.50 cumulative GPA for four of the seven courses required for entrance - ECON 200, ECON 201; STAT 311, STAT 341, or STAT 390; calculus at the level of MATH 124, or first calculus course taken, with a minimum 2.0 grade for each of the seven courses required for entrance.
4. A one-page personal statement, typed and double-spaced, responding to the following questions: What are your personal/educational goals, and how do you expect those to be met through an economics major? What background do you bring to the program? Describe any special experience that would contribute to your studies in the field.

5. Completion of reading comprehension, critical thinking, and writing assessment essay (RTW). See department website for details.
6. Application deadline is the second Friday of each quarter (autumn, winter, spring). Admission is competitive. Meeting the above criteria does not guarantee admission to the major.

Major Requirements

70 credits

1. Admission to the major
2. STAT 311 (or equivalent) and MATH 124, MATH 125, MATH 126 (or equivalent) (20 credits)
3. ECON 200 and ECON 201, minimum 2.0 grade (10 credits)
4. ECON 300 and ECON 301, minimum 2.0 grade. Must be taken in residence as a matriculated student at the UW, Seattle (10 credits).
5. Six ECON courses (30 credits) at the 400 level (not including ECON 496, ECON 497, ECON 499). Of these, minimum 15 credits of the following theory and methods courses: ECON 400 or ECON 401, ECON 404, ECON 405, ECON 424, ECON 482, ECON 483, ECON 484, ECON 485, ECON 486, ECON 487, ECON 488. Of these, 5 credits chosen from either ECON 400 or ECON 401; and another 5 credits from either ECON 424, or ECON 482, or ECON 483; 15 additional credits at the 400 level.
6. Minimum 50 credits in ECON-prefix courses; minimum 2.00 cumulative GPA in these 50 credits
7. Minimum 20 credits at the 400 level taken in residence at the UW, Seattle

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* For undergraduates, the role of the Department of Economics is to train students in a rigorous, analytical discipline that advances their problem-solving abilities and their understanding of important public issues.

The Bachelor of Arts program provides the flexibility and social science training to prepare students for employment in a variety of areas. Also, it is excellent preparation for many master's-level graduate programs in other disciplines and for professional schools such as law, business, and medicine.

The Bachelor of Science program is designed to provide undergraduates a rigorous background in economic analysis. This degree is designed for students who plan to do graduate study in economics or who plan to enter certain technically oriented professions, such as actuarial science, demography, financial analysis, or environmental consulting.

- *Honors Options Available:* College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors. See adviser for requirements.
- *Internships, Research, and Service Learning:* Course credit available for internships and research. Visit www.econ.washington.edu/instruction/undergrad/beyond.html.

- *Department Scholarships:* Scholarship opportunities are available for application during spring quarter. See departmental advisers for details. Note: Students must have filed a FAFSA with the University of Washington's Financial Aid Office to be eligible.
- *Study Abroad Opportunities:* The department offers a variety of exchange programs. For more information, visit www.washington.edu/instruction/undergrad/studyabroad.htm.
- *Student Organizations/Associations:* The Economics Undergraduate Board (EUB) serves as a liaison between economics students, faculty, and alumni, and also provides services to the general economics undergraduate student body. The EUB provides free tutoring for ECON 200, ECON 201, ECON 300, and ECON 301; holds career seminars and faculty lectures; and publishes the quarterly newsletter, "The Economizer." For more information on these services, as well as others provided by the EUB, visit depts.washington.edu/ecnboard/.

Of Special Note:

- Courses accepted in transfer as ECON 1XX or ECON 2XX cannot be applied to major requirements unless courses equivalent to ECON 200 and ECON 201 were required as prerequisites. ECON X courses not having these prerequisites may be applied to electives for the degree, but not to the 50-credit economics-course requirement.
- Internship and independent study economics credits do not count toward the required economics credits for the BA or BS degree.

Graduate Program

Graduate Program Coordinator
306 Savery, Box 353330
(206) 685-1384
econadv@uw.edu

The department offers the doctor of philosophy degree. The program is designed to develop trained economists for careers in teaching, private industry, government, and international agencies. Frequent seminars led by U.S. and foreign visitors as well as by faculty and students are conducted as an integral element of the department's graduate program.

Doctor of Philosophy

Admission Requirements

1. Intermediate-level microeconomic and macroeconomic theory.
2. One year of calculus, one term of linear algebra, and one term of statistics.
3. Strongly recommended: differential equations, additional work in calculus, matrix algebra, and probability and statistics.
4. An undergraduate major in economics is not required provided the above prerequisites have been met.
5. General Test of the GRE.
6. International applicants (except those noted below) must submit a valid score from one of the following tests to demonstrate spoken English proficiency. Scores noted meet the UW language requirement for international teaching assistants: 26 on the speaking portion of the TOEFLiBT, or 7.0 on the speaking portion of the IELTS, or 70 on the Versant English Test. Applicants who achieve one of these scores are given priority for departmental funding, although students who achieve slightly lower scores may also be considered.

The following international applicants are not required to take a language test to demonstrate spoken English proficiency: (1) Those who have completed, or will complete before starting the graduate program, a bachelor's degree at a regionally accredited U.S. institution. (This exemption does not apply to applicants who have completed, or will complete, only a master's degree at a U.S. institution.) (2) Those who are native English speakers.

7. The department does not accept admission to a terminal master's (MA) degree. A sequential MA degree is offered for students already enrolled in the PhD program.

Degree Requirements

Minimum 90 credits

1. ECON 500, ECON 501, ECON 502, ECON 503, ECON 508, ECON 509, ECON 580, ECON 581, and ECON 582.
2. Core examinations in microeconomics and macroeconomics.
3. Eight other elective field courses in economics at the graduate level, including two fields of specialization. Fields of specialization include advanced macroeconomic theory, advanced microeconomic theory, comparative systems and development, econometrics, finance, health economics, industrial organization, international economics, labor economics, natural resource economics, and public finance
4. General examination
5. Doctoral dissertation

Financial Aid

The principal form is a teaching assistantship. Assistantships are available to entering graduate students with promising academic records. A small number of fellowships are also available.

Research and Computing Resources

The department houses a computer laboratory that provides hardware and software for economic modeling, economic estimation, word processing, and other faculty and graduate student research functions. Access is restricted to economics graduate students and faculty. In addition, the Center for Social Science Computation and Research (CSSCR) maintains an extensive library of computer software and data, and offers free consulting services to aid faculty and students with computing problems.

English

Department Overview

A101 Padelford

The Department of English offers courses in English, American, and related literatures. Courses in literature emphasize techniques of literary analysis; theoretical problems in the interpretation of texts; the social, historical, and political context of literary production and reception; and the pleasures of reading. Most require significant written work and stress critical thinking skills. Courses in language study examine the structural, historical, social, and aesthetic dimensions of English. The creative writing program offers workshops in verse, short story, novel, and expository writing. English majors are exposed to many critical perspectives, and pursue interests in literary history, critical theory, language studies, and creative writing.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of English offers the following program of study:

- The Bachelor of Arts degree with a major in English. A creative writing option is also available.
- Minors in English: English and Writing

Bachelor of Arts

Suggested First- and Second-Year College Courses: Foreign languages, classics, English history, American history, and philosophy.

Department Admission Requirements

1. Minimum cumulative 2.00 GPA
2. Minimum cumulative 2.50 English GPA
3. Enrolled students may declare the English major in the English Advising Office, A2B Padelford, during the first two weeks of autumn, winter, spring, and summer quarters.

Additional requirements for admission to the creative writing option:

1. Admission to the English major
2. Minimum 2.0 grade in ENGL 202.
3. ENGL 283 and ENGL 284 or transfer equivalents
4. Submission of an unofficial transcript and a writing sample of 3-5 poems and 5-10 pages of fiction (preferably a complete story)

5. Students interested in the creative writing option should apply to the Creative Writing Office, B-25 Padelford, during the first three weeks of autumn, winter, and spring quarters.
6. Admission is capacity constrained. Completion of the above requirements does not guarantee admission.

Major Requirements

Minimum 60 credits

1. Minimum 2.0 grade in ENGL 202, taken within one quarter of admission to the major. (5 credits)
2. Minimum 2.0 grade in ENGL 302, taken within two quarters of admission to the major. (5 credits)
3. *English Core (15 credits)*: Minimum 5 credits from each of the following: (1) theories/methodologies of language and literature; (2) forms/genres/media; (3) cultures in contexts. See list of approved courses, available from the department advising office or department website: depts.washington.edu/engl/.
4. *English Electives (30 credits)*: 200-level or above
5. *Historical breadth*: Minimum 10 credits of pre-1945 literature and 5 credits of pre-1700 literature. See list of approved courses at: depts.washington.edu/engl/.
6. Minimum 2.0 grade in approved 400-level senior capstone English course (5 credits). See list of approved senior capstone courses at depts.washington.edu/engl/ugrad/ugbareqs.php.
7. Maximum 20 credits of 200-level courses and maximum 5 credits of creative writing may apply towards the major.
8. Minimum 30 credits of English at the 200-level or above must be completed in residence through the UW.

The department strongly recommends, but does not require, 5 credits in one of the following English language courses: ENGL 370, ENGL 371, ENGL 373, ENGL 374, ENGL 478, ENGL 479, or LING 200.

Creative Writing Option

Minimum 60 credits

1. Minimum 2.0 grade in ENGL 202, taken within one quarter of admission to the major. (5 credits)
2. ENGL 283 and ENGL 284 (10 credits)
3. *English Core (25 credits)*: Minimum 5 credits from each of the following: (1) theories and methodologies of language and literature; (2) cultures in contexts. See list of approved courses, available from the department advising office or [department website](#).
4. *Historical breadth*: Minimum 10 credits of pre-1945 literature and 5 credits of pre-1700 literature. See list of approved courses at: depts.washington.edu/engl/.
5. ENGL 383 and ENGL 384 (10 credits)
6. Approved 400-level creative writing courses (10 credits)
7. Maximum 20 credits of 200-level courses may apply towards the major.
8. Minimum 30 credits of English at the 200-level or above must be completed in residence through the UW.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minors

Minor Requirements

English: 30 credits of English courses, of which 20 credits must be upper division, with a minimum 2.00 cumulative GPA in courses applied toward the minor. Minimum 20 credits must be completed in residence through the UW.

Writing: 25 credits, of which 15 must be upper division, with a minimum 2.00 cumulative GPA in courses applied toward the minor. 15 credits from approved list of courses in academic, professional, and creative writing. 10 credits from approved list of courses in theory, history, and design. See adviser or department website for approved lists. No more than 5 credits from creative writing or courses outside the English Department. Minimum 15 credits must be completed in residence through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Good writing, analytical ability, research skills, and broadened perspectives are among the practical accomplishments majors acquire, all of which can be applied to a range of careers, including, but not limited to advertising, business and marketing, law, library science, the media, public administration, publishing, the social services, and teaching.

The undergraduate program of study in English concentrates on developing students' critical and interpretive abilities with regard to literatures written in English. Students become familiar with the critical developments in the study of language and literary forms, including especially understanding the cultural and historical contexts of various forms of literature. Students are, accordingly, asked to cultivate a habit of self-conscious and careful reading of written texts. Honing a successful habit of reading depends on acquiring an early awareness of the broad range of critical and interpretive methods available to readers of literature, as well as comprehending the basic purpose and effects at stake in different reading methods. Finally, students develop the ability to compose effective and persuasive written analyses of texts in a manner that demonstrates comprehension of the complexities or nuances of language, literature, and culture.

- *Instructional and Research Facilities:* Computer laboratories in Mary Gates Hall for computer-integrated sections.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The English internship program maintains an active list of over 200 local employers, including publishers, arts organizations, the media, advertising agencies, social service groups, schools, and businesses. Credit is available to declared English majors (ENGL 491).

- *Department Scholarships:*
 - English Department scholarships are available to declared English majors enrolled at the UW for at least two quarters with a 3.50 UW GPA and a 3.70 UW English GPA. Scholarship recipients must enroll for at least two quarters and carry at least 6 credits each quarter during the term of the scholarship. Applications, due in early March, are available in A11 and A2B Padelford.
 - Additional scholarships and prizes in creative writing are open to UW English majors only. Applications, due in early March, are available in B25 and A2B Padelford.
- *Student Organizations/Associations:* *Bricolage* is a student literary arts annual published entirely by UW undergraduates and features the works of University students, faculty, staff, and alumni. Students from all majors welcome. Contact: brico@uw.edu for details.

Of Special Note::

- Students considering teaching English at the secondary level should consult an English adviser regarding coursework for the English Language Arts endorsement required for entry into the Secondary Teacher Education Program (TEP).
- The Department of English offers study abroad opportunities in London and Rome. Students from all majors welcome. See department website for more information.

Graduate Program

Graduate Program Coordinator
 A105 Padelford, Box 354330
 (206) 543-6077
englgrad@uw.edu

The department offers a complete program of graduate courses and seminars designed to provide aspirants for the MA and PhD degrees with a knowledge of English literature and language and the necessary scholarship for training in literary criticism and theory, literary history, and English-language study, including rhetoric and composition. It is possible to pursue a literature- or language-study emphasis. The MFA in creative writing emphasizes projects in imaginative writing in fiction and poetry, supported by courses in criticism and literary periods and types. A special degree program, the Master of Arts for Teachers, is offered for English teachers in secondary schools and community colleges and a Master of Arts for Teachers (of English to speakers of other languages) for those interested in teaching English to speakers of other languages. The graduate program permits completion of master's degree requirements in four to six quarters and doctoral degree requirements in five years (including the master's degree). In a typical five-year PhD program, a student is encouraged to complete course requirements (75 credits) during the first three years, the general examination for the doctorate in the fourth year, and the dissertation in the fifth year. Those admitted with a master's degree from another university can complete the doctorate in four years: two years of coursework, examination year, and dissertation year.

Master of Arts

Admission Requirements

1. Bachelor of Arts degree: Major in English equivalent to that awarded by the UW preferred.
2. GRE general test; subject test (literature in English) recommended
3. Three letters of recommendation, statement of purpose, and a critical writing sample.

Degree Requirements

40 credits

1. Intermediate-level proficiency in a language other than English
2. 30 credits in graduate English seminars
3. For students continuing to the doctoral program, a 10-credit master's essay. For a terminal master's degree, students may substitute 10 additional credits in graduate English seminars for the master's essay.
4. Maximum 5 credits may be transferred from an accredited graduate program elsewhere.

Master of Fine Arts***Admission Requirements***

1. Bachelor of Arts degree
2. GRE general test
3. Three letters of recommendation, statement of purpose, a critical-writing sample, and a creative-writing sample

Degree Requirements

55 credits

1. 20 credits in creative writing
2. 15 credits in graduate English seminars (5 credits must be from an approved course in criticism)
3. 5 elective credits
4. 15 thesis credits (including a creative thesis, an MFA essay, and a final oral examination); demonstration of proficiency in a language other than English.

Master of Arts for Teachers***Admission Requirements***

Same as for the Master of Arts degree, but usually including prior teaching experience.

Degree Requirements

45 credits

1. 25 credits in courses numbered 500 or above; including at least one course each in English language or linguistics, rhetoric and/or composition, literary criticism or critical theory, and literature; three courses must have a stated orientation on teaching English.
2. 5 credits of MAT essay
3. 15 credits may be taken outside the department in courses related to the teaching of English, subject to approval.
4. In addition to the 45 credits, a student with no regular or formal teaching experience is required to complete at least 6 credits of ENGL 601 (Internship).

Master of Arts for Teachers (of English to Speakers of Other Languages)

Admission Requirements

1. Bachelor of Arts degree
2. GRE general test
3. Statement of purpose, three letters of recommendation
4. Students without training in linguistic method and theory must take LING 400 as a prerequisite for other 400-level linguistics courses.

Degree Requirements

45-54 credits

1. ENGL 571, ENGL 572, ENGL 574, ENGL 576; LING 446 or LING 450, ENGL 575 or LING 461; three courses from ENGL 471, ENGL 478, ENGL 479, ENGL 560, ENGL 561, ENGL 562, ENGL 563, ENGL 564, ENGL 567, ENGL 569, ENGL 575, LING 433/ANTH 464, LING 457/PSYCH 457, LING 451, LING 462; one elective course; 3-6 credits of ENGL 570
2. Intermediate-level proficiency in a language other than English

Doctor of Philosophy

Admission Requirements

By petition to the Graduate Studies Committee upon completion of the MA degree option in literature. Students with recent master's degrees from other institutions are admitted at the post-master's level following the guidelines for admission to the MA option and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transferring with a master's degree from other institutions may be required to submit an equivalent to the master's essay. Students with MFA, MAT, or MAT (ESL) degrees from this University must complete coursework and language requirements for the MA degree option and submit an equivalent to the master's essay.

Graduation Requirements

Minimum 102 credits

1. 75 graded credits of electives in graduate English seminars. Students with a recent master's degree from another university may count up to 30 credits from their master's program, upon approval of the Director of Graduate Studies. Students with a master's degree from the UW may count up to 40 credits in courses taken before admission to the doctoral program.
2. Fluency in at least one language other than English, plus whatever additional language study the Supervisory Committee advises
3. Written examinations for literature emphasis: (1) historical period, (2) specialized field of study, (3) second period, genre, or topic. Written examinations for language emphasis: (1) major approach to English-language study, (2) second approach to language study, (3) textual focus (can be literary period)
4. Oral general examination
5. 27 credits of ENGL 800 (dissertation); and a final examination based on the dissertation

Financial Aid

The department annually awards 10 or more new teaching assistantships. To be considered, applicants must submit an assistantship application and supporting materials for admission to the graduate program by January 15. A statement of purpose, three recommendations, the GRE general test, and a critical-writing sample are required [except MAT (E.S.O.L.)]. Teaching assistantship applicants who are not native speakers of English must submit as part of their application a score of 290 or better on the Test of Spoken English (TSE) or UW-administered SPEAK test.

French and Italian Studies

Department Overview

French and Italian studies provide cultural literacy in dialogue with global contexts; and professionally relevant linguistic, research, interpretive, and expressive skills and tools. The aim is to understand our multilingual, multicultural world in historical perspective and to prepare students to convincingly convey this understanding to others in Italian or French as well as in English, thus preparing them to become leaders in an increasingly diverse society – to include the ability to articulate and implement career transferability of the skills and knowledge acquired in the course of study.

Undergraduate Program

C254 Padelford

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Division of French and Italian Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in French or Italian
- Minors in French Language, Sociolinguistics, and Translation; French Language, Literature, and Culture; and Italian Language and Culture

Bachelor of Arts

Suggested First- and Second-Year College Courses: Community college students should take as many lower-division language courses as possible before transferring to the UW.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

French (55 credits)

1. Core: 30 credits from FRENCH 301, FRENCH 302, FRENCH 304, FRENCH 305, FRENCH 306; one course at the FRENCH 370 level
2. Advanced: 10 credits at the 400 level. Transfer credits at the 400 level accepted only by petition.
3. Electives: 15 credits above FRENCH 203 from an approved list. See adviser for approved list
4. Minimum 2.00 cumulative GPA for courses applied to the major
5. Maximum 15 credits of approved study-abroad coursework may be petitioned to apply to the major

Italian (55 credits)

1. Core: 30 credits from ITAL 203, ITAL 301, ITAL 302, ITAL 304, and two courses at the ITAL 350-level
2. Electives: 25 credits above ITAL 203 from an approved list of electives. See adviser for approved list.
 - a. Must include 5 credits at the ITAL 400-level. Transfer credits at the 400 level accepted only by petition
3. Minimum 15 credits in courses taught in Italian
4. Minimum 2.00 cumulative GPA for courses applied to the major
5. Maximum 15 credits of approved study-abroad coursework may be petitioned to apply to the major

Minor***Minor Requirements*****French Language, Sociolinguistics, and Translation (30 credits)**

1. 20 credits from FRENCH 203, FRENCH 301, FRENCH 302, FRENCH 304
2. 10 credits from FRENCH 303, FRENCH 313, FRENCH 314, FRENCH 315, FRENCH 320, FRENCH 406, FRENCH 472
3. Minimum 2.00 cumulative GPA for courses applied to the minor
4. Maximum 10 credits of approved study-abroad coursework maybe petitioned to apply to the minor.
5. Students may not earn both the minor in French Language, Sociolinguistics, and Translation, and the minor in French Language, Literature, and Culture.

French Language, Literature, and Culture (30 credits)

1. FRENCH 203, FRENCH 301, FRENCH 302, FRENCH 304
2. One of FRENCH 305 or FRENCH 306
3. One course at the FRENCH 370 level
4. Minimum 2.00 cumulative GPA for courses applied to the minor
5. Maximum 10 credits of approved study-abroad coursework may be petitioned apply to the minor
6. Students may not earn both the minor in French Language, Literature, and Culture and the minor in French Language, Sociolinguistics, and Translation.

Italian Language and Culture (31 credits)

1. ITAL 201, ITAL 202, ITAL 203; or ITAL 234 (15 credits)
2. ITAL 301 (5 credits)
3. ITAL 351, ITAL 352, ITAL 353, ITAL 354, ITAL 355, ITAL 356, ITAL 357, one of which must be taken concurrently with ITAL 380 (6 credits)
4. Electives (see website or adviser for approved list of courses) (5 credits)

5. Minimum 2.00 cumulative GPA for courses applied to the minor
6. Maximum 10 credits of approved study-abroad coursework may be petitioned to apply to the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students achieve levels of linguistic and cultural competency that allow them to pursue professional opportunities in a wide variety of internationally oriented fields and to be effective citizens in a rapidly changing world.

Students with substantial foreign language fluency who combine language skills with a solid foundation in liberal education and adequate job preparation and internships find fulfilling occupations. . The combination of studies in foreign languages and international affairs is ideal for students seeking job opportunities in government (foreign service and diplomatic fields, intelligence agencies, immigration and customs, Department of Labor, law enforcement, armed forces, legal agencies, public aid, social and community work, and international agencies, such as the United Nations and UNICEF), business (airlines, marketing, banking/finance, multi-national corporations, shipping industry, travel and hotel industries, import/export firms, publishing houses, and consulting), and communication fields (journalism, radio and television, fashion enterprises, teaching/counseling, translation, bilingual office work, library/museum work, nursing, phone companies, art and cultural affairs, and film and theatrical industries).

Beyond the practical, the department's commitment is to impart to our students the skills and the genuine desire to learn throughout their lives, fostering the type of cultural and intellectual flexibility that lends itself to the multiple work and personal changes that most will face over the course of their lives.

- *Instructional and Research Facilities:* UW Rome Center in Rome, Italy.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The Rome Center offers one intern position per year, providing room and board and a modest stipend. Interns work in the administrative Rome/UW office and are required to follow an independent course of language and literature study or other proposed course of study.
- *Department Scholarships:* Scholarships for departmental study abroad programs are available. Program applicants are notified of opportunities by their program director.
- *Student Organizations/Associations:* French Club, Italian Club.

Of Special Note: The department sponsors study-abroad programs in France, Italy, and Martinique. See adviser for details.

Graduate Program

Graduate Adviser
C256 Padelford, Box 354361
(206) 616-5366

Graduate Program Coordinator
C259 Padelford

The department offers programs of study leading to the degrees of Master of Arts in French or Italian and Doctor of Philosophy in French. Students who wish to complete doctoral studies in Italian may apply through the Department of Comparative Literature, Cinema, and Media during their second year in the master's program.

Master of Arts in French Studies

Admission Requirements

Undergraduate major in French or related field. Proficiency in speaking and writing French.

1. Application for Graduate Admission, with supporting documents
2. Letter of intent
3. Writing sample
4. Three letters of recommendation
5. Digital file of applicant speaking in French
6. GRE scores
7. Applicants whose native language is not English must demonstrate English language proficiency. Students who wish to be appointed as teaching assistants (TAs) must meet conditions specified in [Graduate School Memorandum 15](#).

Degree Requirements

50 credits

1. Coursework (40 credits) taken at the 400 and 500 levels
 - a. Minimum 18 credits at the 500 level or above
 - b. Minimum 18 graded credits in approved 400-level courses accepted as part of the major, and in 500-level courses. Excludes FRENCH 499 and transfer credits.
 - c. Coursework to include:
 - i. Methodology of French language teaching course – FRENCH 510 and FRENCH 590 (5 credits total), or equivalent
 - ii. Designated methods course (FRENCH 550, FRENCH 551, or FRENCH 577), or other approved course
 - iii. Minimum two courses with content drawn largely from pre-1800 sources
2. Master's project (10 credits): FRENCH 600. Emphasizes independent research and creative projects.

Master of Arts in Italian Studies

Admission Requirements

Undergraduate major in Italian or a related field. Proficiency in speaking and writing Italian.

1. Application for Graduate Admission, with supporting documents
2. Letter of intent
3. Writing sample
4. Three letters of recommendation
5. Digital file of applicant speaking in Italian
6. GRE scores
7. Applicants whose native language is not English must demonstrate English language proficiency. Students who wish to be appointed as teaching assistants (TAs) must meet conditions specified in Graduate School [Graduate School Memorandum 15](#).

Degree Requirements

50 credits

1. Coursework (40 credits) taken at the 400 and 500 levels
 - a. At least 18 credits must be at the 500 level or above.
 - b. Minimum 18 graded credits in approved 400-level courses accepted as part of the major, and in 500-level courses, excluding ITAL 499 and transfer credits
 - c. Coursework to include:
 - i. Methodology of Italian language teaching course – ITAL 510 and ITAL 590 (5 credits total)
 - ii. Designated methods course (ITAL 550 or ITAL 551) or other approved course
 - iii. Minimum two courses with content drawn largely from pre-1800 sources
2. Master's Project (10 credits) ITAL 600. Emphasizes independent research and creative projects.

Doctor of Philosophy in French Studies

Admission Requirements

Students are rarely admitted directly into the PhD program; only those with an MA degree in French or a related field are considered. Incoming PhD students must have a well-defined project, a demonstrable and broad knowledge of French and Francophone literature, culture, and history, as well as extensive preparation in research methods. Some MA applicants who apply for the PhD program may instead be considered for admission to the MA in French Studies.

Degree Requirements

67 credits (beyond the MA)

1. Coursework (40 credits) to include:

- a. Minimum 18 credits at the 500 level before the general examination
 - b. Minimum 18 graded credits at the 400 and 500 levels (excluding FRENCH 499) before the general examination
 - c. 10 credits at the 600 level, taken concurrently with the general examination
2. General examination
 3. Dissertation prospectus
 4. Dissertation (27 credits)
 5. Final examination

Financial Aid

The department awards a number of teaching assistantships. Teaching assistants normally participate in teaching three classes during the academic year. Research assistantships are available on a limited and competitive basis.

Gender, Women, and Sexuality Studies

Department Overview

B110 Padelford

Gender, Women, and Sexuality Studies is an interdisciplinary field that offers students a cohesive framework for the study of women's and men's lives within historical and contemporary contexts, and from multi-disciplinary, multi-cultural, and international perspectives. As a field of inquiry, gender, women, and sexuality studies challenges traditional scholarship about human societies and fosters the construction of new theoretical and methodological approaches to understanding diverse experiences and realities.

Undergraduate Program

Adviser

B110S Padelford, Box 354345

(206) 543-6902

gwssadvs@uw.edu

The Department of Gender, Women, and Sexuality Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in gender, women, and sexuality studies
- A minor in gender, women, and sexuality studies

Bachelor of Arts

Suggested First- and Second-Year College Courses: GWSS 200, and any of the following: GWSS 206, GWSS 257, GWSS 283, GWSS 290.

Department Admission Requirements

Any student with a cumulative GPA of at least 2.00 can declare this major at any time.

Major Requirements

Minimum 58 credits

1. GWSS 200 or equivalent (5 credits)
2. GWSS 302 (5 credits)
3. One upper-division course focusing on transnational perspective. See adviser for list of eligible courses. (5 credits)
4. GWSS 497 (fieldwork) (minimum 3 credits)
5. One course in at least three of the four following overlapping focus points: Global Identity Formations; Decolonizing Empire; Feminist Knowledge Production and Radical Critique; Building Social, Cultural, and Political Movements for Change. See adviser for list of courses in each category (15 credits)

6. Additional gender, women, and sexuality studies upper-division credits. 10 credits must be graded. Maximum 10 credits from variable credit courses (GWSS 495, GWSS 496, GWSS 497, GWSS 499) can be applied toward this requirement. (20 credits)
7. Senior capstone, GWSS 494 (5 credits)
8. Minimum 20 credits applied toward the major must be completed in residence through the UW.
9. Minimum 2.00 cumulative GPA in courses applied to the major.

Minor

Minor Requirements: 30 credits

1. GWSS 200 or equivalent; and one additional GWSS 200-level course (10 credits)
2. GWSS 302 (5 credits)
3. Additional upper-division (300-400 level) credits in gender, women, and sexuality studies. Minimum 10 credits must be graded. Maximum 5 credits from variable credit courses (GWSS 495, GWSS 496, GWSS 497, and GWSS 499) may be applied toward this requirement. (15 credits)

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A Bachelor of Arts in gender, women, and sexuality studies helps students prepare for careers in human, health, legal, or civil service, as well as in the private sector. Some gender, women, and sexuality studies graduates develop careers that focus directly or indirectly on women and women's issues. Many others move into careers that entail understanding the dynamics of gender, race, class, and sexuality. Such positions exist in politics, business, education, government, medicine, and the arts. Recent graduates of gender, women, and sexuality studies have found employment in public agencies, community services, health services, private businesses, and legal firms.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students intern in local agencies or businesses to develop skills in an area of specialization appropriate to their area of interest. For lists of these opportunities, see adviser.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* Students can join the National Women's Studies Association (NWSA).

Graduate Program

Graduate Program Coordinator
B110 Padelford, Box 354345
(206) 543-6900
gwss@uw.edu

The department offers graduate training leading to the PhD in interdisciplinary women studies as well as in a chosen discipline. A master's degree may be awarded to students in the doctoral program, but the department does not offer a terminal master's degree. The core faculty represent the following disciplines: anthropology, American Indian studies, cultural studies, economics and development, English, history, international studies, psychology, queer/sexuality studies, and sociology. Although students work

primarily with a core faculty member in Gender, Women, and Sexuality Studies, they have the opportunity to study with more than 90 adjunct faculty members from a wide range of disciplines.

Doctor of Philosophy

Admission Requirements

Applicants are admitted for autumn quarter only and must complete application materials by the beginning of the prior January. A complete application file includes the Graduate School application, one copy of official transcripts, three recommendations, a statement of purpose, and scores from the GRE.

Degree Requirements

Minimum 90 credits

In addition to 15 credits of core seminars (GWSS 501, GWSS 502, and GWSS 503), students pursue an individual program of study. The program usually requires three years of study beyond the master's level, including independent field research and preparation of a dissertation. PhD students must exhibit proficiency in a language relevant to their theoretical and regional areas of specialization. Students are urged to establish foreign language competency as undergraduates before entering the graduate program or soon after.

Financial Aid

A limited number of teaching and research assistantships are offered to PhD students.

Geography

Department Overview

408A Smith

Geography is about the relationship between people and the environment. It provides important insights into the spatial transformations associated with globalization, environmental change, migration, health, development, and many other contemporary processes. The Department of Geography has a strong commitment to social justice and public scholarship, and provides a rich undergraduate experience for those who are passionate about exploring our world and understanding the social and spatial processes that shape it.

Geography seeks to understand the complex processes that result in the patterns, trends, and impacts of urbanization, migration, trade, and development. Geographers use ethnographies, statistical analysis, databases, scholarly research, and observation to construct models, maps, and other tools for understanding, and to address pressing social and environmental issues.

Undergraduate Program

Advisers

415 A & B Smith, Box 353550
(206) 543-3246

The Department of Geography offers the following programs of study:

- Bachelor of Arts degree with a major in geography
- A minor in geography

Students may choose from among four multifaceted tracks (Cities, Citizenship, and Migration; Environment, Economy, and Sustainability; Globalization, Health, and Development; and GIS, Mapping, and Society), or customize their own hybrid focus along more thematic or issue-driven lines, such as inequality, race/class/gender studies, etc. Lists of courses in each track may be found at depts.washington.edu/geog/program-details/.

For an overview of main faculty research themes and how they relate to these tracks, visit depts.washington.edu/geog/research-themes.html.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Any 100- or 200-level GEOG course. Courses that develop strong writing, analytical, and qualitative- and quantitative-reasoning skills. Geography is inherently interdisciplinary, so exposure to many social science fields of study in the first two years is ideal.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

60 credits:

1. *Foundations (30 credits)*: See departmental adviser for approved track courses.
 - a. GEOG 315
 - b. One methods course from the following: GEOG 317, GEOG 326, GEOG 425, GEOG 426, or faculty approved methods course
 - c. One Cities, Citizenship, and Migration Track course (5 credits)
 - d. One Environment, Economy, and Sustainability Track course (5 credits)
 - e. One Globalization, Health, and Development Track course (5 credits)
 - f. One GIS, Mapping, and Society Track course (5 credits)
2. *Track (20 credits)*: Students select one of the following four tracks:
 - a. Cities, Citizenship, and Migration
 - b. Environment, Economy, and Sustainability
 - c. Globalization, Health, and Development
 - d. GIS, Mapping, and Society

Four upper-division (300- and 400-level) geography courses are required for the track the student selects, at least two of which must be at the 400 level. As an alternative to one of the four defined tracks, students may also customize their own hybrid focus along more thematic or issue-driven lines, such as inequality, race/class/gender studies, etc. See depts.washington.edu/geog/program-details for approved track courses, and/or geography adviser for details.

3. *Electives (10 credits)*: GEOG electives at the 200 level or above; 300- and 400-level courses preferred.
4. *Additional Degree Conditions and Program Features*
 - a. Students must complete a minimum of 25 upper-division credits (300- and 400-level) in geography in residence through the UW.
 - b. Students are encouraged to take appropriate elective courses outside the Department of Geography in fields that support their track. Courses appropriate to various tracks are available on lists supplied by geography advisers, or may be recommended by the faculty adviser. Students should be aware that 300- and 400-level courses in other departments likely have prerequisites.
 - c. 5 credits of internship (GEOG 496) or independent study (GEOG 499) may apply toward the required 60 credits.
 - d. No single course may be counted toward more than one degree requirement.
5. Minimum 2.00 cumulative GPA in courses applied to the major.

Data Science Option

66 to 69 credits

1. *Foundations (30 credits)*: GEOG 258, GEOG 315, GEOG 317 or GEOG 326, GEOG 360, GEOG 381; one additional course from either the Environment, Economy, and Sustainability track or the Globalization, Health, and Development track
2. *Data Science Electives (36-39 credits)*:
 - a. *Programming*: CSE 142 or CSE 160; either CSE 143 or CSE 163
 - b. *Machine Learning*: either STAT 311 or STAT 390; one of CSE 416/STAT 416, STAT 435, or INFO 371
 - c. *GIS, Mapping, and Society*: GEOG 458, GEOG 461, GEOG 465, GEOG 482
3. *Additional Degree Conditions and Program Features*
 - a. Students must complete a minimum of 25 upper-division credits (300- and 400-level) in geography in residence through the UW
 - b. No single course may be counted toward more than one degree requirement
4. Minimum 2.00 cumulative GPA in courses applied to the major

Minor

Minor Requirements: 30 credits in geography, including 15 upper-division geography credits with at least 5 credits at the 400 level. No more than 5 credits applied to the minor may be from 100-level classes. Independent learning and internship credits (GEOG 494, GEOG 496, GEOG 497, GEOG 499) may not be counted as part of the 30 credits. A minimum 2.0 grade for each course counted toward the minor. At least 15 credits of upper-division geography courses must be taken through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Geographers address some of the world's most urgent challenges, including global and environmental change, economic and social inequality and poverty, world hunger, global health and healthcare, social justice in the city, migration and immigration, and what it means to be a global citizen in the twenty-first century. Responses to such questions are complex and partial, and these issues are not "fixable" by one-dimensional solutions. Geography's contribution to these public issues and solutions is through evidence-based, multi-scalar analyses and mapping of socio-spatial and environmental change. Social justice, community engagement and activism, and an accountability to place inform our inquiry and study.

In geography classes students learn how to design and conduct research, employing quantitative and qualitative methods; use statistical and demographic analysis; and interpret and analyze data, discourses, and texts and images in order to address significant topics and questions in human geography. Students combine classroom study with internships, community service, and independent research to develop integrated, rich, and relevant learning experiences. These experiences help develop and refine critical and analytical research and communication skills, offer hopeful and engaged responses to daunting problems, and emphasize that individuals can make a difference.

Typical questions or lines of inquiry in each track include:

1. **Cities, Citizenship, and Migration**: Why do people move, and where do they go? What are the constraints and opportunities for migrants as they settle and integrate in new

cities and new nations? How are cities formed and what are the forces that impact their economic and cultural development? The courses in this track focus on themes of urbanization and human movement, emphasizing the importance of labor and housing, as well as cultural processes and historical forms of discrimination that shape where people live and work. Students in this track develop an understanding of the intersections of power and place as they pertain to migration and immigrant life, citizenship and belonging, and the production of urban space.

2. **Environment, Economy, and Sustainability:** Courses in this track study the reciprocal and often contradictory forces of economic activity, environmental policy, and sustainability. Using such key geographic concepts as scale, place and location, they analyze relations between such complex processes as: land use, labor markets, corporate location, international trade, energy policy and consumption, environmental regulatory policy, resource use, and food systems.
3. **Globalization, Health, and Development** How does globalization shape life and death around the planet? How can development initiatives address global health disparities? Providing geographical answers to such questions, this track traces the extraordinarily uneven effects of global trade, global finance, and market-led development on food systems, health, and the geography of impoverishment. By putting global health challenges in a global socio-economic context, the track simultaneously highlights how social movements and social organizing can make a difference, including differences in formal policies affecting human well-being directly as well as innovations in the ethics of care. Courses in the track provide frequent opportunities for service learning as part of the goal of helping students engage with real world challenges. All classes also approach these themes through a geographical lens: charting global-local relations and the links between nature, society, and political-economy in particular places. This geographical approach in turn enables us to explore how nutrition, health, and development are intertwined with other processes ranging from the personal experiences of migrant farm workers, to urban and regional redevelopment, to global financial reforms. Specific questions that frame our classes include: What are the links between life and debt (GEOG 123)? How have sixty years of development increased in-country inequality (GEOG 230)? How do global disease etiologies reflect other global interconnections (GEOG 280)? How does agricultural modernization relate to hunger (GEOG 371)? And what are the implications for food security, health security, and developmental security when they are re-framed in terms of geopolitics and the global security challenges of international relations (GEOG 375)?
4. **GIS, Mapping, and Society** In courses that comprise the GIS, Mapping, and Society track, students learn to use GIS, web-based geospatial applications, and database management systems for problem solving in relation to a diverse range of societal concerns, such as those within the other geography tracks. Students learn a range of analytical and critical methods for cartographic representation, spatial analysis, geovisualization, and database management. Further, students learn about the politics, ethics, and values of mapping and geospatial technologies, and integrate their social and technical skills to undertake projects with research partners in the region.

Graduates have pursued careers as urban planners, environmental planners and land-use analysts, GIS analysts, economic analysts (marketing, location, geo-demographics), public health researchers, NGO specialists in developing nations, airline route analysts, import-export/international-trade specialists, real estate valuation specialists, lawyers, economic development specialists, social studies teachers, and college professors.

- *Instructional and Research Facilities:* A map center in Suzzallo Library houses atlases, sheet maps, and aerial photographs. Departmental facilities include the Edward L. Ullman Geography Collaboratory and the John C. Sherman Laboratory, which houses a variety of computer workstations connected to the campus computer network. The Ullman Collaboratory in 415 Smith

provides a unique collaborative classroom with networked computer work stations. The Geography Commons also provides computer work stations for students. The Department of Geography is a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* More than 125 geography students participate each year in internships. For lists of these opportunities, see the department's [career site](#).
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* The Undergraduate Geography Association (UGA) organizes field trips, alumni career panels, public-service projects, and social gatherings.

Of Special Note: Students interested in GIS are encouraged to learn a high-level programming language such as C, C++, Java, or Visual Basic.

Graduate Program

Graduate Program Coordinator
415B Smith, Box 353550
(206) 543-3246

The department has flexible programs leading to the master of arts and doctor of philosophy degrees. The aspirant to the master's degree completes all work in four to six quarters. The aspirant to the doctoral degree undertakes two years of post-master's study and must take a departmental diagnostic examination upon entry, pass the general examination, attain an appropriate level of competence in a foreign language or cognate field, and successfully complete a dissertation. Normally doctoral program students complete degree requirements in three to four years.

Master of Arts

Admission Requirements

1. Minimum undergraduate 3.00 GPA (on a 4.00 scale), or B. Higher minimum GPA in graduate work for students holding a master's degree.
2. GRE

Degree Requirements

Minimum 36 credits

Students may write either a thesis or two high-quality papers

Required Courses

1. GEOG 500
2. GEOG 511. One additional methods course, from the following: GEOG 471, GEOG 525, GEOG 526, GEOG 560, GEOG 561, GEOG 562, and GEOG 564.
3. Minimum three quarters of GEOG 598

4. Two departmental research seminars (designated “seminars” or “research seminars”). GEOG 500, GEOG 502, GEOG 511, and GEOG 513, and methods courses listed above do not count toward this requirement. In some cases, a directed readings course (GEOG 600) may count in lieu of this requirement. See department website for more information.

Additional Requirements

1. Minimum 18 graded credits. With thesis, students complete at least 9 credits of GEOG 700 as part of the minimum 36-credit requirement.
2. Minimum three full-time (at least 9 credits) quarters of residence credits. Part-time quarters may be accumulated to meet one quarter’s worth of this requirement.
3. Minimum 3.0 grade in all departmental courses, and minimum 2.7 grade in all related courses. Minimum 3.00 GPA maintained.
4. Final examination
5. All work completed within six years.

Master in Geographic Information Systems

The online master's program (M-GIS) helps working professionals enter or advance their careers in the field of geographic information science and sustainability management. Students combine geovisualization, data management, and geospatial analysis to develop, examine, and portray data in two- and three- dimensional maps. Specialized program courses explore sustainability and investigate the interconnection of social, environmental, and economic issues on a regional to global scale. www.gisonline.uw.edu

Students address complex geographic information problems with GIS technologies, and create solutions that balance economic, social, and environmental issues.

Admission Requirements

1. Bachelor's degree from an accredited U. S. college or university, or equivalent from a foreign institution, in a spatially-oriented discipline such as, but not limited to, geography, urban planning, geology, environmental science, civil engineering, environmental science/studies, and/or forest resources
2. Minimum 3.00 GPA in the last 60 graded semester hours or last 90 graded quarter hours of undergraduate and graduate study
3. Minimum one year of professional work experience in a field that emphasizes spatial relationships, wherein analyzing and synthesizing phenomena related across space are important
4. GRE scores
5. Personal statement describing educational goals and objectives
6. Three letters of recommendation
7. Previous coursework or work experience in GIS may offset any relative weaknesses in previous criteria.
8. *International applicants:* Demonstrated English language proficiency.

Degree Requirements

45 credits

1. GEOG 514, GEOG 517, GEOG 560, GEOG 562, GEOG 564, GEOG 565, GEOG 568, GEOG 569, GEOG 582
2. Primarily for part-time students. Most courses taught online; however, students attend three, three-day summer sessions in Seattle. Each course is 5 credits. A non-thesis program.
3. Core courses expose students to the fundamentals of GIS software technologies and advanced spatial thinking skills. Concentration courses in sustainability management consider how resources are being treated currently and how they will be treated for future generations.

Doctor of Philosophy

Admission Requirements

1. Minimum undergraduate 3.00 GPA (on a 4.00 scale), or B. Also, higher minimum GPA in graduate work for students holding a master's degree.
2. GRE

Degree Requirements

90 credits

1. GEOG 500
2. GEOG 511
3. One methods course from among: GEOG 471, GEOG 525, GEOG 526, GEOG 560, GEOG 561, GEOG 562, and GEOG 564
4. Minimum three quarters of GEOG 598

Additional Requirements*

1. Minimum 3.00 overall GPA. Minimum 3.0 grade in departmental courses. Minimum 2.7 grade in related courses.
2. Two departmental research seminars numbered 500 or above, not including GEOG 502 or GEOG 513
3. Scholarly article submitted to a professionally reviewed academic journal, or application for research support from an external agency, such as the National Science Foundation.
4. Reading competence in a foreign language or sound level of competence in a cognate field
5. Minimum 60 credits through UW (including 27 GEOG 800 credits). An approved master's degree may substitute for 30 credits.
6. Numerical grades in at least 18 quarter credits taken through UW
7. General examination
8. Dissertation (or three papers of publishable quality)
9. Final examination

* Students who earned an MA at the University of Washington have already met several of these requirements.

Financial Aid

The department awards approximately 15 to 20 teaching assistantships for the academic year. Most assistantships are for teaching quiz sections for a larger lecture class. A few advanced doctoral candidates may teach a class. Normally several research assistantships are also available. In recent years, all the department's graduate students have been funded by internal or external sources.

German Studies

Department Overview

340C Denny

The Department of German Studies focuses on the language, literature, and civilization of the German-speaking countries; on the role of their history, literature, and philosophy in Western civilization; and on linguistic analysis, especially historic, of the Germanic languages.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of German Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in Germanics
- A minor in Germanics

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year German or equivalent. Courses in Central European history, literature and culture. Courses on broad cultural topics taught in English by Germanics.

Department Admission Requirements

Admission to the major status requires completion of GERMAN 202 or equivalent.

Major Requirements

51 credits:

1. GERMAN 203, GERMAN 311, GERMAN 401 (15 credits)
2. Two 400-level courses in literature and culture chosen from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, GERMAN 490, GERMAN 493, GERMAN 494, GERMAN 495, GERMAN 497 (10 credits)
3. Two 300-level courses in language, chosen from GERMAN 301, GERMAN 302, GERMAN 303 (6 credits)
4. 20 additional credits from any combination of the following courses, or additional courses from the list above. No more than 10 credits at the 200 level. Students who test out of language courses (GERMAN 203, GERMAN 301, GERMAN 302, GERMAN 303, GERMAN 401) because of prior competency in German must take additional courses from those listed below to bring the minimum German credits for the major to 51.

- a. *Language*: GERMAN 304, GERMAN 307, GERMAN 333, GERMAN 334, GERMAN 498
 - b. *Literature*: GERMAN 210, GERMAN 243, GERMAN 293, GERMAN 295, GERMAN 300, GERMAN 312, GERMAN 313, GERMAN 340, GERMAN 341, GERMAN 342, GERMAN 345, GERMAN 346, GERMAN 349, GERMAN 350, GERMAN 351, GERMAN 352, GERMAN 353, GERMAN 360, GERMAN 390, GERMAN 397, GERMAN 490, GERMAN 494, GERMAN 497
 - c. *Culture*: GERMAN 322, GERMAN 323, GERMAN 355, GERMAN 370, GERMAN 371, GERMAN 399, GERMAN 499
 - d. *Linguistics*: GERMAN 220, GERMAN 451, GERMAN 452, GERMAN 479
 - e. *Other*: GERMAN 395/GERMAN 396 (4 credits max.), GERMAN 398, GERMAN 446 (5 credits max.), GERMAN 447 (5 credits max.)
5. Minimum 2.0 grade in every upper-division German course counted toward the major. Overall 2.50 GPA for all German courses counted toward the major.

Minor

Germanics

35 credits

1. GERMAN 203, GERMAN 311 (10 credits)
2. 400-level coursework from either GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, GERMAN 490, GERMAN 493, GERMAN 494, GERMAN 495, GERMAN 497, GERMAN 498, GERMAN 499 (5 credits)
3. 20 additional credits from the following courses (no more than 10 credits may be taken from 200-level courses). Students who test out of GERMAN 203 because of prior competency in German must take additional courses from those listed below to bring the minimum German credits for the minor to 35.
 - a. *Language*: GERMAN 301, GERMAN 302, GERMAN 303, GERMAN 304, GERMAN 307, GERMAN 333, GERMAN 334, GERMAN 401, GERMAN 498
 - b. *Literature*: GERMAN 210, GERMAN 243, GERMAN 293, GERMAN 295, GERMAN 300, GERMAN 312, GERMAN 313, GERMAN 340, GERMAN 341, GERMAN 342, GERMAN 345, GERMAN 346, GERMAN 349, GERMAN 350, GERMAN 351, GERMAN 352, GERMAN 353, GERMAN 360, GERMAN 390, GERMAN 397, GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, GERMAN 490, GERMAN 494, GERMAN 495, GERMAN 497
 - c. *Culture*: GERMAN 285, GERMAN 322, GERMAN 323, GERMAN 355, GERMAN 370, GERMAN 371, GERMAN 385, GERMAN 399, GERMAN 493, GERMAN 499
 - d. *Linguistics*: GERMAN 220, GERMAN 451, GERMAN 452, GERMAN 479
 - e. *Other*: GERMAN 395/GERMAN 396 (4 credits max.), GERMAN 398, GERMAN 446 (5 credits max.), GERMAN 447 (5 credits max.)
 - f. 2.0 minimum grade for each course counted toward the minor

German Linguistics

As of winter quarter, 2018, admission to the German linguistics minor is suspended until further notice.

35 credits

1. GERMAN 203; either GERMAN 311 or GERMAN 322; GERMAN 401; GERMAN 451; GERMAN 452
2. Two additional courses (from any of the following):
 - a. *Language*: GERMAN 301, GERMAN 302, GERMAN 303, GERMAN 304, GERMAN 307, GERMAN 333, GERMAN 334, GERMAN 401, GERMAN 498
 - b. *Literature*: GERMAN 210, GERMAN 293, GERMAN 295, GERMAN 300, GERMAN 311 (if not used for requirement above), GERMAN 312, GERMAN 313, GERMAN 340, GERMAN 341, GERMAN 342, GERMAN 345, GERMAN 346, GERMAN 349, GERMAN 350, GERMAN 351, GERMAN 352, GERMAN 353, GERMAN 360, GERMAN 390, GERMAN 397, GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, GERMAN 490, GERMAN 494, GERMAN 495, GERMAN 497
 - c. *Culture*: GERMAN 322 (if not used for requirement above), GERMAN 323, GERMAN 355, GERMAN 370, GERMAN 371, GERMAN 399, GERMAN 493, GERMAN 499
 - d. *Linguistics*: GERMAN 220, GERMAN 479, or courses from other departments offering linguistics
 - e. *Other*: GERMAN 395/GERMAN 396 (4 credits max.), GERMAN 398, GERMAN 446 (5 credits max.), GERMAN 447 (5 credits max.)
3. Minimum 2.0 grade is required for each course counted toward the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 - a. To acquire linguistic fluency in German and broad knowledge of German/Austrian/Swiss language, literature, and culture;
 - b. To increase critical awareness and sensitivity to other languages and cultures as well as to one's own;
 - c. To develop skills of analytical and integrative thinking, critical reading, and writing;
 - d. To communicate clearly and concisely both in written and spoken form;
 - e. To understand how to do research in German literacy and cultural studies.
 - f. *Instructional and Research Facilities*: None
 - g. Honors Options Available: With College Honors (Completion of Honors Core and Departmental Honors requirements). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*:
 - a. Advanced undergraduate majors and minors can sign up for 1-5 credits of faculty-sponsored research (GERMAN 447) for one quarter with a maximum of 15 credits. Five credits can count towards the major as an elective. Regular grades are assigned for research results. To see examples of research projects currently being offered, see the departmental website.

- b. The internship in German (GERMAN 446) offers students the opportunity to do internships in public institutions or private businesses to apply their German language skills in practice. The internship experience provides a valuable tool to further increase students' communication skills in the German language, to explore and test potential career options, and to specify or expand study goals. Ideally an internship in German serves to enhance and further students' educational and professional objectives.
- *Study Abroad:* The Office of International Programs and Exchanges offers a number of different study abroad options for Austria and Germany. Students can consult their website at www.ipe.washington.edu. The Department of Germanics offers a program in Vienna, Austria. Qualified students are invited to take part in the "Spring in Vienna" program. Every spring quarter the department sends a group of approximately 20 students to Vienna to participate in a program of studies in German language and Austrian culture for which students are able to earn 16 credits. Program costs are commensurate with in-state tuition at the University of Washington. Consult the departmental website for more information.
- *Department Scholarships:* The department's German Express program consists of a series of intensive courses able to take a student from no knowledge of German to fluency in one year. The best five students are awarded stipends of \$1,000 each to be applied toward study during spring quarter at a German university. Additional scholarship opportunities can be found on the departmental website.
- *Student Organizations/Associations:* German Club.

Graduate Program

Graduate Program Coordinator
333 Denny, Box 353130
(206) 543-4580
uwgerman@uw.edu

The graduate program offers a background for different professional pursuits: careers as scholars and teachers in literature, cultural studies, the humanities, linguistics, and philology on the university level; the teaching of German language and civilization on the college and secondary school level; and professional writing, editing, and publishing.

The MA and PhD programs concentrate on German literature, civilization, cultural history, and philosophical traditions, with an option to include Germanic linguistics and courses outside the department.

Master of Arts, Literature and Culture

Admission Requirements

Undergraduate major in German, or equivalent. Superior German language skills.

Degree Requirements

40 credits

1. GERMAN 500, GERMAN 518/GERMAN 576, GERMAN 575 (15 credits)
2. GERMAN 590, GERMAN 591, or GERMAN 592 (5 credits)
3. Electives in consultation with the Graduate Program Coordinator (20 credits)

4. One critical MA paper
5. Text analysis in one MA area of expertise (see below)
6. Written comprehensive examination in one MA area

Areas of expertise for the MA are literary history; intellectual history; cultural studies; and linguistics or applied linguistics.

Students demonstrate foundational competency in three of the four areas of expertise. Evaluation is based on three procedures: one comprehensive examination (based on the MA reading list); one text analysis (text selected by the MA committee from the MA reading list); one critical MA paper (based on work in a graduate seminar). Students choose how these three evaluation procedures are distributed across their areas of expertise.

Master of Arts, Pedagogy and Culture

Admission Requirements

Undergraduate major in German, or equivalent. Superior German language skills.

Degree Requirements

60 credits

1. GERMAN 500, GERMAN 518/GERMAN 576, GERMAN 575 (15 credits)
2. GERMAN 580, GERMAN 591, or GERMAN 592 (5 credits)
3. Areas such as second language acquisition and language teaching offered through English, Linguistics, and other language departments (25 credits)
4. Electives in consultation with the Graduate Program Coordinator (15 credits)

Doctor of Philosophy

Admission Requirements

Undergraduate major in German, or equivalent. With approval of department, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment. Superior German language skills. Reading knowledge of a second foreign language (in addition to German) required before the student is admitted to the PhD general examination. Languages subject to approval by the department.

Degree Requirements

90 credits, to include:

1. 60 credits at the 500 level or higher (GERMAN 411, GERMAN 451, GERMAN 452, GERMAN 497, GERMAN 498, GERMAN 499 may be counted if not already counted toward the MA)
2. Knowledge of a foreign language other than German
3. One PhD paper and a dissertation prospectus (or three PhD papers)
4. Three written doctoral examinations
5. Oral examination

6. Dissertation

Financial Aid

A limited number of teaching assistantships and fellowships are available. The teaching load consists of a five-hour course on the first- or second-year level. Teaching assistants are supervised by experienced faculty members.

History

Department Overview

315 Smith

History undertakes the study of human affairs in a manner that seeks to understand change and development rather than the state of things at a given moment, taking into account societies in diverse parts of the world from the earliest times for which written records exist to the present.

Undergraduate Program

Adviser

318 Smith, Box 353560

(206) 543-5691

histadv@uw.edu

The Department of History offers the following programs of study:

- The Bachelor of Arts degree with a major in history
- The Bachelor of Arts degree with a major in history, with options in history of empire and colonialism; history of race, gender, and power; history of religion and society; and history of war and society.
- The Bachelor of Arts degree with a major in the history and philosophy of science, offered jointly with the Department of [Philosophy](#)
- Minors in history; history of empire and colonialism; history of race, gender, and power; history of religion and society; history of science; and history of war and society.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that develop writing skills.

Department Admission Requirements

1. Minimum college/university GPA of 2.00
2. Completion of 10 credits of college history with a minimum cumulative GPA of 2.50
3. Completion of 10 credits of composition/writing courses with a minimum 2.0 grade for each course. The requirement may be met by a freshman English composition course or a "W" course.
4. Students may apply to the major at any time in the quarter. Transfer students must be enrolled at the UW before applying.

Major Requirements

60 credits, to include:

1. At least one 5-credit in four of the following six fields: Asia; Europe; Latin America and the Caribbean; Middle East and Africa; United States and Canada; and Comparative and Trans-Regional
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division history credits completed in residence at the UW
4. 5 credits of HSTRY 388, to be completed no later than within two quarters of declaring the major
5. 5 credits of undergraduate senior seminar (as designated by the department)
6. Approved electives to reach 60 credits
7. Students wishing to complete thematic options within the major may choose from the following four options. Credit requirements for the options all count toward the 60 total credits for the major. HSTRY 388, HSTRY 494, HSTRY 498 do not count for option requirements. See the Department of History for an approved course list for all four options.
 - a. Empire and Colonialism: 25 credits from approved course list, of which 15 credits must be upper division
 - b. Race, Gender, and Power: 25 credits from approved course list, of which 15 credits must be upper division
 - c. Religion and Society: 25 credits from approved course list, of which 15 credits must be upper division
 - d. War and Society: 25 credits from approved course list, of which 15 credits must be upper division.
8. Minimum 2.25 cumulative GPA in courses applied to the major.

Minor

Minor Requirements

History: 30 credits of history, of which 20 must be upper-division, with a minimum 2.0 grade in each course applied toward the minor. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW.

History of Empire and Colonialism: 30 credits from approved course list, of which 20 credits must be upper division, with a minimum 2.00 cumulative GPA in courses applied toward the minor. A minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

History of Race, Gender, and Power: 30 credits from approved course list, of which 20 credits must be upper division, with a minimum 2.00 cumulative GPA in courses applied toward the minor. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

History of Religion and Society: 30 credits from approved course list, of which 20 credits must be upper division, with a minimum 2.00 cumulative GPA in courses applied toward the minor. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

History of Science: 25 credits, including HSTCMP 311, HSTCMP 312, HSTRY 390, and HSTRY 493; plus one course from an approved list of elective courses. A minimum 2.0 grade is required in each course.

History of War and Society: 30 credits from approved course list, of which 20 credits must be upper division, with a minimum 2.00 cumulative GPA in courses applied toward the minor. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of history enhances critical thinking and writing skills. It is a creative process in which students learn to use arguments and evidence to communicate a sound historical thesis. It is a liberal arts degree that encourages students to become well rounded, educated people. Graduates are prepared for a variety of careers in many professions and businesses. In addition to teaching, research, and museum and archives work, recent graduates have pursued careers as political lobbyists, journalists, and law enforcement officers. Many history majors pursue, and are well prepared for, further education and professional programs such as medicine, law, library science, and museum curatorship.
- *Instructional and Research Facilities:* The department funds a writing center for students enrolled in history courses. The department also has a small computer laboratory available for history majors.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department encourages students to participate in internships that include historical elements. Students work with a sponsoring organization and a history faculty member. See adviser for details.
- *Department Scholarships:*
 - *The Faye Wilson Scholarship* is awarded to students emphasizing U.S. history and *the Schwartz Fellowship* to students pursuing historical study of a non-western civilization. The *Freedman Remak Scholarship* is awarded to non-resident history majors based on academic merit.

- History majors may compete for two paper prizes: *the Thomas Power Prize* for papers written in a history course during the last year, and the *York/Mason Award* for history papers written on African Americans in the West.
- The *Millican Fund* and the *Willstadter Snow-Smith Award* provide funding for travel in the course of historical research.
- In addition, the department allows students to nominate their high school history teacher for the *Pressly Prize*, which honors excellence in education.
- Scholarship and prize competitions run in February and March of each year. See adviser for details.
- *Student Organizations/Associations*: Phi Alpha Theta, a history honors society. See adviser for details.

Graduate Program

Graduate Program Coordinator
206C Smith, Box 353560
(206) 543-8291
histgrad@uw.edu

The department offers graduate training leading to the master of arts and doctor of philosophy degrees in a large number of fields within the discipline. Students in the programs prepare for careers as college teachers who combine teaching with scholarship and professional writing. A few graduates enter government service, college administration, or publishing. The MA program is normally completed in five or six full-time academic quarters or their equivalent.

Master of Arts

Admission Requirements

1. Strong undergraduate program in history, ordinarily as a history major
2. Usually a minimum 3.50 (A-) GPA, particularly in history and related subjects, and especially in the final two years of work, and in any graduate work completed prior to application
3. Ordinarily a score in the 80th percentile or higher on the verbal portion of the General Aptitude Test of the GRE
4. Evidence of intellectual ability and interest beyond the routine performance of academic tasks
5. Reading knowledge of at least one language in addition to English is not required for admission, but qualified applicants with knowledge of at least one foreign language may be favored. Also, an applicant who proposes to work for a degree in Greek, Roman, European, Russian, Medieval, Modern European, Latin American, Middle Eastern, or Asian history should have begun study in foreign languages essential to research in the field.

Degree Requirements

36 credits minimum

1. Submission of a two-field MA form or proposed course of study no later than end of the second quarter
2. Establishment of an MA committee and submission of a request for establishing a master's Supervisory Committee form, no later than the end of the third quarter of study.
3. Language requirements satisfied no later than the quarter immediately preceding completion of the master's degree.
4. Written examination mastery of a substantial body of historical knowledge. Students construct their fields of study in consultation with their supervising faculty.
5. Completion of a graduate seminar which includes preparation of a research paper; or completion of an MA thesis. Most seminars are two- or three-quarter classes.
6. Submission of a degree application
7. All Graduate School requirements

Doctor of Philosophy

Admission Requirements

1. Strong master's program in history, or closely related field
2. Usually a minimum 3.50 (A-) GPA, particularly in history and related subjects
3. Ordinarily a score in the 80th percentile or higher on the verbal portion of the General Aptitude Test of the GRE
4. Evidence of intellectual ability and interest beyond the routine performance of academic tasks
5. Reading knowledge of at least one language in addition to English is not required for admission, but qualified applicants with knowledge of at least one foreign language may be favored. Also, an applicant who proposes to work for a degree in Greek, Roman, European, Russian, Medieval, Modern European, Latin American, Middle Eastern, or Asian history should have begun study in the foreign languages essential to research in the field.

Degree Requirements

Minimum 90 credits

1. Submission of proposed course of study form no later than the end of the second quarter after entrance to the PhD program. Students continuing from the MA program complete this form by the end of the first quarter of doctoral study.
2. Establishment of the doctoral Supervisory Committee and submission of the request for establishing a doctoral Supervisory Committee no later than the end of the third quarter

after entrance to the program. Students continuing from the MA program complete this requirement by the end of the first quarter of doctoral study.

3. Language requirements completed no later than the quarter immediately preceding the PhD general examination.
4. PhD general examination, consisting of written examinations in four fields and an oral examination. Fields must be distributed among at least two divisions, such that at least one lies clearly outside the student's primary division of concentration. Students construct fields of study in consultation with supervising faculty. PhD students concentrating in U.S. history offer at least one of the following three chronological fields: Early America, Nineteenth Century, Twentieth Century. • "Honors" or "high pass" in a departmental field examination for the MA degree may exempt the student from the PhD examination in that field.
5. Completion of a seminar paper, while enrolled as a PhD student, before taking the PhD general examination. Students who did not complete a graduate seminar in this department for their MA ordinarily enroll in such a seminar as part of their coursework for the PhD, and write their research paper in the context of this seminar.
6. Establishment of the doctoral reading committee
7. Preparation of an acceptable doctoral dissertation
8. Final oral examination in defense of the dissertation

Financial Aid

Entering graduate students are considered for any departmental fellowships and other funding for which they are eligible. Students with, or who expect to receive, the MA degree by the time they begin their studies may apply for teaching assistantships and may, with continued satisfactory scholarly progress, hold a TA appointment for a total of nine quarters, provided adequate funds are available.

Human Rights

Program Overview

The issue of human rights has attracted increased attention around the world. The tri-campus Human Rights minor at the University of Washington provides students the opportunity to learn about the political, philosophical, economic, cultural, and legal aspects of this complex subject.

Undergraduate Program

Adviser

215 Smith, Box 353530

(206) 543-1824

polsadv@uw.edu

111 Thomson, Box 353650

(206) 543-6001

jsisadv@uw.edu

The human rights minor is offered at all three University campuses, allowing students to take advantage of the expertise available on the campuses where they are not regularly in residence, although the minor can be completed on any one campus.

Minor

Minor Requirements: 25 credits, to include the following:

1. 10 credits from an approved list of courses* concerned with human rights as a core concept
2. 5 credits from an approved list of courses* concerned with human rights in a broad context
3. 10 additional credits drawn from the above approved lists of courses* concerned with human rights
4. At least 3 credits of the required 25 credits must be in a human-rights-related internship, practicum, international study abroad, or demonstrated equivalent. Courses that satisfy this requirement include BIS 403, BIS 480; LSJ 310, LSJ 499, POL S 496, JSIS 387, and similar practicum and study-abroad courses in other programs (on the Seattle campus); and TIAS 496. See adviser for faculty-approved alternatives. Courses used to satisfy this requirement must be approved/supervised by the faculty offering courses appropriate to the minor. Credits for the minor may be completed across the three UW campuses, or on any single campus. If the minor is completed by a Seattle-major student, no more than 10 credits applied to the minor may be in the student's major department.

* The list of core courses and context courses is maintained by the Human Rights Advisory Committee. For the current list of such courses, see depts.washington.edu/hrights/hrminor.html. Note: From time to time, the advisory committee adds, subtracts, or reclassifies courses on the approved list. Students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified in that earlier list.

Humanities (Evening Degree)

Program Overview

103 Lewis Hall

This multidisciplinary major includes upper-division humanities courses selected by faculty of the College of Arts and Sciences. Students explore diverse perspectives in thematically related courses from classics, literature, intellectual history, comparative religion, communications, and art history. Focus is on the ways human beings from different cultures understand their world through communication, literature, and the arts. Students discuss literary and artistic works from a variety of perspectives and approaches, as well as theories of interpretation and practical communication. Analytical, research, and communication skills which can enhance a person's career opportunities are emphasized. Coursework encourages greater understanding of issues, ideas, and themes in history and the contemporary world.

Undergraduate Program

Adviser

103 Lewis Hall, Box 353921

(206) 543-6160

advisers@pce.uw.edu

Humanities offers the following program of study:

- The Bachelor of Arts degree with a major in humanities

Bachelor of Arts

Suggested First- and Second- Year College Courses: English composition and additional writing. Introductory courses in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S). First-year foreign language study.

Program Admission Requirements

Students are not being admitted to this program for the 2014-2015 academic year.

1. [Admission](#) to the Evening Degree program (separate from admission to the UW day program)
2. Minimum 75 college quarter credits completed. Most students admitted have completed two years of lower-division college work.
3. See adviser for evaluation of applicable courses and credits.

Major Requirements

60 credits from the approved list of humanities courses, as follows:

1. Not more than 15 credits in 200-level courses (some or all of which may have been completed prior to admission to the major)
2. At least 45 credits of 300- and 400-level courses, of which a minimum 15 credits must be at the 400 level

3. Minimum 15 credits of 300- and 400-level humanities courses that do not overlap with second-major requirements when double majoring in communication, English, and social sciences
4. Minimum 2.25 GPA for all courses counted toward the major
5. Minimum 25 credits completed in residence through the UW
6. For list of applicable courses, consult the adviser or go to www.evedegree.washington.edu/edp/majors/humanities_courses.asp.

Additional Degree Requirements

1. English composition and additional writing (15 credits)
2. Quantitative and Symbolic Reasoning (QSR) (4-5 credits)
3. Foreign language - through the third quarter of a single foreign language (0 to 15 credits, depending on placement)
4. Areas of Knowledge
 - a. Visual, Literary, & Performing Arts (VLPA) (20 credits)
 - b. Individuals & Societies (I&S) (20 credits)
 - c. Natural World (NW) (20 credits)
 - d. Some credits in VLPA and/or I&S may count also toward the major
5. Additional work to complete a minimum 180 credits overall

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students investigate the social, historical, ethical, and aesthetic meanings attached to and manifested in cultural texts and artifacts. These include visual, literary, performance, and philosophical works in different forms and genres, and in different historical periods and cultural contexts. Students gain a critical understanding of developments in and approaches to the study of literary and cultural forms, as well as the processes by which they are produced, received, and used. They develop an appreciation for the complexities and nuances of language, literature, and cultural expression and communication. In learning to interpret and contextualize texts, to pose questions, to construct arguments, and to conduct effective research, students become better critical thinkers, speakers, and writers, capable of engaging cultural debates and producing new cultural knowledge.

Specific skills developed include writing in various genres; critical, analytic, and integrative thinking; textual and archival research in different media; argumentation; and effective public speaking.

Humanities majors pursue widely varied careers, including education, editing, private enterprise, public administration, creative writing, management, arts administration, museology, development, and events planning.

- *Instructional and Research Facilities:* Students use all university library resources and facilities corresponding with their individual research needs. In addition, each of the contributing

humanities academic departments offers individual resources to majors. Check with advisers for options.

- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* The program works collaboratively with students interested in pursuing independent study and research opportunities through academic departments that contribute to the major. Opportunities for work with the Carlson Center, Office of International Programs and Exchanges, and service learning are possible for all students.
- *Department Scholarships:* The Evening Degree program awards need-based financial aid assistance each year to students from a general fund. Two additional scholarship resources are the Rodney I. Straub Endowed Scholarship and the Nicole Snyder Dettmar Endowed Scholarship.
- *Student Organizations/Associations:* None at present.

Individualized Studies

Program Overview

171 Mary Gates Hall

Individualized Studies is an interdisciplinary major option for students who wish to create a program of study by combining selected courses from two or more departments. Students are required to identify a central organizing theme for their major and design it under the guidance and supervision of at least two faculty members and an Individualized Studies adviser.

Undergraduate Program

Adviser

171 Mary Gates Hall, Box 352805

(206) 543-2550

istudy@uw.edu

The Individualized Studies program offers the following programs of study:

- Bachelor of Arts with a major in Individualized Studies
- Bachelor of Science with a major in Individualized Studies
- Degree depends on the theme and curriculum of the approved major.

Bachelor of Arts, Bachelor of Science

Suggested First- and Second-Year College Courses: Varies, depending on student's area of concentration.

Program Admission Requirements

Before developing an Individualized Studies major, students should read "[Designing an Individualized Studies Major](#)," or obtain a copy from the UAA Advising, 141 Mary Gates Hall. Particular attention should be paid to the sections defining restrictions on themes and restricted access to courses. Individualized Studies majors are not possible in a number of subjects because the UW does not offer sufficient coursework. Upper-division courses in departments with competitive admission are generally not available to students not in that major and ordinarily cannot be included in Individualized Studies proposals.

After reading the guidelines, the student must go through the following steps to design a major:

1. Identify the unifying interdisciplinary theme of the program.
2. Make a list of courses taken or planned to be taken toward this goal. This list should comprise between 50 and 70 quarter credits, all of which are related to the area of concentration. These courses must come from at least two departments, but may come from any number of areas, so long as interrelationships are discernible. Most courses must be at the 300- or 400-level. At least half the 50-70 credits selected for the major must come from courses taught within the College of Arts and Sciences.

3. Draft a statement that describes the proposed major and discusses the interrelationships among the courses chosen. Propose a brief, descriptive title for the major.
4. Submit the proposal to the Individualized Studies Committee for initial approval. Prospective majors should submit proposals to the Individualized Studies Committee for review at least three quarters prior to graduation.
5. Identify at least two faculty sponsors for the major. The faculty sponsors attest to the intellectual soundness of the proposal and agree to provide whatever guidance is jointly decided upon. They may also suggest changes in the previously approved written proposal or list of courses.
6. Obtain final approval from an Individualized Studies adviser.
7. Transfer students must be enrolled at the UW before applying to the major.
8. For admission requirements for the technical writing option, see an adviser.

Major Requirements

55 to 70 credits, including completion of the approved curriculum and a 5-credit required senior study (minimum grade of 2.7 required for senior study). Awarding of the Bachelor of Arts or Bachelor of Science degree depends on the content of each student's program.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Varies, depending on student's area of concentration.
- *Instructional and Research Facilities:* None
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* None
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* None

Integrated Social Sciences

Program Overview

The Integrated Social Sciences program provides a broad interdisciplinary education in the social sciences for undergraduates. It emphasizes development of critical and integrative thinking for students interested in human society and social problems. ISS is an online degree-completion program aimed at students who have already completed a substantial amount of college coursework.

Undergraduate Program

Adviser

206 Cunningham Hall, Box 353070

(206) 685-9415

issadv@uw.edu

Integrated Social Sciences offers the following program of study:

- Bachelor of Arts degree with a major in integrated social sciences

Bachelor of Arts

Suggested First- and Second-Year College Courses: General coursework developing critical thinking, analytical, and writing skills. Coursework which satisfies general education requirements for the College of Arts and Sciences, including courses in English composition, foreign language, and quantitative and symbolic reasoning.

Department Admission Requirements

1. Minimum 75 transferable quarter credits
2. Minimum 2.00 GPA in all transferable college coursework
3. Minimum 2.50 GPA in all courses applied to ISS major requirements
4. Completion in high school or community college of College Academic Distribution Requirement (CADR).
5. Demonstrated progress toward University and College of Arts and Sciences general education requirements

ISS accepts only program-specific students. Admission is competitive. Completion of minimum admission requirements does not guarantee admission to the University. In addition, applicants are evaluated on the following criteria: (1) overall academic record; (2) a personal statement; (3) likelihood of success in an online-format program, based on a separate application question.

Major Requirements

60 credits as follows:

1. *ISS Core (20 credits):* ISS 301; ISS 302; ISS 350; ISS 355; ISS 401

2. Thematic areas courses (40 credits), to include at least one 5-credit course from each of five of the following seven areas of inquiry: (1) information and technology; (2) population movement; (3) conflict and cooperation; (4) diversity and global justice; (5) inequalities and power; (6) health and risk; (7) societies and environments. Three or more disciplinary prefixes must be included. The list of approved courses is available from the ISS advising office or the program website.
3. 30 of the 40 thematic areas course credits must be upper division.
4. Minimum 45 credits applied to major requirements must be taken through the UW ISS program.
5. Minimum 2.00 cumulative GPA in courses applied to major requirements
6. Completion of all Arts and Sciences general education requirements

International Studies

School Overview

401 Thomson

The Henry M. Jackson School of International Studies organizes and supports interdisciplinary teaching and research in international affairs. The school consists of a group of interdisciplinary area-studies programs on major world regions, as well as topical and comparative programs of study that transcend national and regional boundaries.

Undergraduate Program

Adviser

111 Thomson, Box 353650

(206) 543-6001

jsisadv@uw.edu

The School of International Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in Asian studies; Canadian studies; comparative religion; European studies; international studies; Jewish studies; or Latin American and Caribbean studies
- Minors in Africa and the African diaspora; Canadian studies; China studies; comparative Islamic studies; comparative religion; European studies; Hellenic studies; international studies; Japan studies; Jewish studies; Korea studies; Latin America and Caribbean studies; Middle East studies; Portuguese Language and Luso-Brazilian Studies; Russian, Eastern European, and Central Asian studies; South Asian studies, and Southeast Asian studies.
- A minor in arctic studies (offered jointly between the [Jackson School of International Studies](#) and the [School of Oceanography](#))

African Studies

Daniel J. Hoffman, Chair

Adviser

326 Thomson, Box 353650

(206) 616-0998

africa1@uw.edu

African studies involves a multi-campus interdisciplinary group of faculty, staff, and students who share an interest in interdisciplinary questions relating to Africa and the African diaspora. Africa-focused courses are taught in a variety of scholarly disciplines and programs, including art, music, anthropology, forestry and fisheries, geography, history, international health, American ethnic studies, and the interdisciplinary arts and sciences programs at UW Bothell and UW Tacoma. The African studies program coordinates and disseminates information on Africa-related activities; facilitates research, internships, and study abroad opportunities; and administers the Africa and African diaspora minor.

Minor

Minor Requirements 30 credits from at least three departments whose approved courses are shown on the African studies website, jsis.washington.edu/africa/, including:

1. Minimum 15 credits at the 300 level or above
2. Minimum 5 credits from the approved list of courses on the African diaspora
3. Minimum 10 credits from the approved list of courses on Africa
4. Maximum 10 credits of language courses, which may include 5 credits at the third-year level or above from the Africa-relevant languages of Arabic, French, or Portuguese and 10 credits of Swahili at the second-year level or above
5. Other courses not on the website may be approved by the program office.
6. Minimum 15 credits completed through the UW
7. Minimum 2.0 grade in each course applied toward the minor

Asian Studies

The undergraduate program in Asian studies is directed by a committee consisting of the chairs of China studies, Korea studies, Japan studies, South Asian studies, and Southeast Asian studies (see below under Minors), and a designated faculty coordinator.

The Asian studies major combines language training with interdisciplinary study of an Asian region or single country. The program emphasizes social science approaches to the study of history, culture, and society, with provision for study of literature and the arts as well. Students may focus on China, Japan, Korea, South Asia (Bangladesh, India, Nepal, Pakistan, Sri Lanka, Tibet), Southeast Asia (Brunei, Burma [Myanmar], Cambodia, East Timor, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, Vietnam), or Asia as a whole. Five interdisciplinary minors on individual countries or regions also are offered.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Either JSIS 203 or JSIS A 207, and two introductory Asian civilization courses (see major requirements, below). Progress toward two years of a relevant Asian language. Courses that develop writing skills, especially in the social sciences.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

80 credits as follows:

1. 30 credits or second-year equivalent language training in a language appropriate to student's concentration, plus 50 credits as follows:
2. Either JSIS 203 or JSIS A 207 (5 credits)
3. JSIS 201 (5 credits)

4. An Asian civilization course in student's concentration chosen from JSIS A 212/HSTAS 212, JSIS A 241/HSTAS 241, JSIS A 242, HSTAS 201, HSTAS 202, HSTAS 211, JSIS A 206, JSIS A 221/HSTAS 221 (5 credits)
5. 35 credits of approved coursework from one regional or country concentration, or from the general Asia concentration
6. Approved research paper required in one of the upper-division concentration courses
7. Minimum grade of 2.0 in all courses counted toward the major (except first- and second-year language courses, where grades must average 2.00)
8. 30 of the 35 credits required for the concentration requirement must be taken in residence through the UW.

Minor

China Studies

Madeleine Yue Dong, Chair

Minor Requirements: 30 credits, to include the following:

1. HSTAS 211 and either JSIS C 202 or one additional introductory Asian civilization course (10 credits)*
2. 10 credits of electives taken through the UW, chosen from the China history/social science electives list*
3. 5 credits of electives taken through the UW, chosen from the China history/social science list or the China arts/literature electives list*
4. 5 additional credits chosen from: the China history/social science electives list*, or upper-division transfer courses on China, or Chinese language beyond second-year level.
5. Minimum grade of 2.0 required in each course applied toward the minor

*The list of Asian civilization courses and China electives is maintained by the China studies program. For the current list of such courses, see jsis.washington.edu/advise/undergraduate/minors.shtml.

Japan Studies

Minor Requirements: 30 credits, to include the following:

1. JSIS A 241/HSTAS 241 or JSIS A 242 and one course on a different Asian civilization (10 credits)*
2. 10 credits of electives taken through the UW, chosen from the Japan history/social science electives list*
3. 5 credits of electives taken through the UW, chosen from either the Japan history/social science list or from the Japan arts/literature elective list*
4. 5 additional credits chosen from: the Japan history/social science electives list*, or upper-division transfer courses on Japan, or Japanese language beyond second-year level.
5. Minimum grade of 2.0 required in each course applied toward the minor.

*The list of Asian civilization courses and Japan electives is maintained by the Japan studies program. For the current list of such courses, see jsis.washington.edu/advise/undergraduate/minors.shtml.

Korea Studies

Clark W. Sorensen, Chair

Minor Requirements: 30 credits, to include the following:

1. JSIS A 212/HSTAS 212 and one additional introductory Asian civilization course (10 credits)*
2. 20 credits of electives, 15 of which must be taken through the UW, to include: (a) 10 credits chosen from the list of core courses*; (b) 5 credits chosen from the list of core courses or the list of electives*; (c) 5 additional credits chosen from: the Korea history/social science electives list*, or upper-division transfer courses on Korea, or Korean language beyond second-year level.
3. Minimum grade of 2.0 required in each course applied toward the minor.

*The lists of Asian civilization core and elective classes are maintained by the Korea studies program. For the current list of such courses, see jsis.washington.edu/advise/undergraduate/minors.shtml.

South Asian Studies

Priti Ramamurthy, Chair

Minor Requirements: 30 credits, to include the following:

1. HSTAS 202 or JSIS A 200 (5 credits)
2. One additional introductory Asian civilization course (5 credits)*
3. 15 credits of electives taken through the UW, chosen from the approved list*
4. 5 additional credits chosen from: the South Asia history/social science electives list*, or upper-division transfer courses on South Asia, or a South Asian language beyond second-year level
5. Minimum grade of 2.0 required in each course applied toward the minor.

*The list of Asian civilization courses and South Asia electives is maintained by the South Asian studies program. For the current list of such courses, see jsis.washington.edu/advise/undergraduate/minors.shtml.

Southeast Asian Studies

Laurie J. Sears, Chair

Minor Requirements: 30 credits, to include the following:

1. JSIS A 221/HSTAS 221 (5 credits)
2. One introductory Asian civilization course (5 credits)*
3. 15 credits of electives taken through the UW, chosen from the approved list*
4. 5 additional credits chosen from: the Southeast Asia history/social science electives list*, or upper-division transfer courses on South Asia, or a Southeast Asian language beyond second-year level.

5. Minimum grade of 2.0 required in each course applied toward the minor.

*The list of Asian civilization courses and Southeast Asia electives is maintained by the Southeast Asia program. For the current list of such courses, see jsis.washington.edu/advise/undergraduate/minors.shtml.

Canadian Studies

Daniel Hart, Chair

Canadian studies provides a broad understanding of Canadian society, culture and communications, historical development, and contemporary problems.

Bachelor of Arts

Suggested First- and Second-Year College Courses: ECON 200, ECON 201. Progress toward two years of French language. Canadian history courses. Courses that develop writing skills.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

30 credits or second-year-equivalent French language training, plus 53 credits as follows:

1. JSIS 200, JSIS 201, JSIS 202; ECON 200, ECON 201; JSIS A 356, JSIS A 498
2. Minimum 18 credits from approved Canadian Studies elective course list

Minors

Canadian Studies Minor Requirements: 25 credits as follows:

1. JSIS A 356 and JSIS A 498 (10 credits)
2. 15 credits of electives chosen from an approved list*
3. Minimum grade of 2.0 in each course applied to the minor
4. Minimum 15 credits toward the minor completed through the UW

*The list of Canada electives is maintained by the Canadian studies program. For the current list, see jsis.washington.edu/advise/undergraduate/minors.shtml. Since the program from time to time adds, subtracts, or reclassifies approved courses, students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified on that list.

Minor in Arctic Studies: See entry for [Arctic Studies](#) in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Comparative Islamic Studies

Comparative Islamic studies provides a broad understanding of Islamic society, culture and communications, historical development, and contemporary problems.

Minor

Minor Requirements: 30 credits as follows:

1. NEAR E 210/JSIS A 210 (5)
2. NEAR E 211/JSIS C 211 or NEAR E 212/JSIS C 212 (5)
3. 10 credits in Islamic religious traditions and texts, chosen from an approved list*
4. 10 credits in history, society, and culture of Islam, chosen from an approved list*
5. Minimum grade of 2.0 in each course counted toward the minor

*The approved list of Comparative Islamic studies electives is maintained by the School of International Studies. For the current list, see jsis.washington.edu/advise/undergraduate/minors.shtml. Since the school from time to time adds, subtracts, or reclassifies courses on the approved list, students who have planned their studies on the basis of an earlier list may fulfill the requirements as specified on that list.

Comparative Religion

James K. Wellman, Chair

The comparative religion major introduces students to broad theoretical issues in the academic study of religion, and encourages them to explore these issues through mastering details of the textual canons, historical traditions, social contexts, and cultural forms of religion.

Bachelor of Arts

Suggested First- and Second-Year College Courses: JSIS C 201, JSIS C 202. Courses that develop writing proficiency. Courses in particular religious traditions such as Christianity, Judaism, Islam, Hinduism, and Buddhism. Courses in the history of civilizations such as Chinese, South Asian, and Western.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

55 credits as follows:

1. JSIS C 201, JSIS C 202; JSIS B 380/CHID 380; JSIS 201
2. 35 additional credits in comparative religion courses, of which at least 15 must be at the 300 level or above, selected from the three rubrics of textual canons, historical traditions, and social contexts and cultural forms. The distribution must include at least 5 credits and no more than 20 credits in any particular rubric.

Minor

Minor Requirements: 30 credits as follows:

1. JSIS C 201, JSIS C 202
2. 15 additional credits in comparative religion courses or joint-listed equivalents
3. 5 additional credits chosen from comparative religion courses or from an approved list of electives*

*The list of approved comparative religion courses is maintained by the Comparative Religion program. For the current list of such courses, see jsis.washington.edu/advise/undergraduate/minors.shtml.

European Studies

Christine Ingebritsen, Chair

The curriculum in European studies prepares students to pursue careers requiring an understanding of all the forces, both material and cultural, contemporary and historical, that are shaping Europe today (North, South, East, and West), taking into account transitions involved in the post-Soviet era and the movement toward greater political, economic, and cultural integration among the various nations involved. Students also may concentrate, within the major, on Hellenic studies, European Union studies, or Russian, East European, and Central Asian studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Progress toward two years of a modern European language. A survey course on modern Europe.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

60 credits as follows:

1. 10 credits of a modern European language at the third-year level or beyond
2. 20 credits of core courses, including JSIS 201, JSIS A 301, JSIS A 302, and an approved survey course on modern Europe
3. One quarter (10 credits minimum, at least 9-10 weeks) of study in Europe
4. 15 credits from approved list of electives, including at least one course designated as a pre-modern elective and one course designated as a global elective.
5. Either JSIS A 494, Senior Seminar or JSIS A 495, Senior Thesis. The senior-thesis option (JSIS A 495) constitutes the major's research-intensive track. Criteria and admission procedures are described at jsis.washington.edu/advise/catalog/eur_ba.shtml.
6. See adviser for specific course options.

Minors

Minor in European Studies

Minor Requirements: 25 credits

1. JSIS A 301 (5 credits)
2. JSIS 201 (5 credits)
3. European Studies elective courses (15 credits from approved list)
4. Language proficiency through first-year (from approved list)
5. Minimum 15 credits at the 300-400 level

Minor in Russian, Eastern European, and Central Asian Studies

Minor Requirements: 30 credits from courses in at least three disciplines

1. JSIS A 301 (5 credits)
2. An approved modern REECAS survey course chosen from the approved list* (5 credits)
3. 20 credits of electives at the 300 level or above, chosen from the approved list*
4. Study of a regional language is encouraged, but not required. Maximum 10 credits of BCS, Czech, Estonian, Kazakh, Latvian, Lithuanian, Polish, Russian, Uighur, or Uzbek language beyond the first-year level may be applied toward the 30-credit total.
5. Minimum 15 credits completed in residence through the UW
6. Minimum 2.00 cumulative GPA in courses applied to the minor
7. Minimum 18 credits outside student's major
8. Participation in service learning and Study Abroad programs in completing minor requirements is encouraged.

*For list of approved REECAS courses, see: [REECAS Minor Approved Electives](#). Since the program from time to time adds, subtracts, or reclassifies approved courses, students who plan their studies on the basis of an earlier list may fulfill requirements as specified on that list.

Minor in Hellenic Studies

Minor Requirements: 25 credits

1. Minimum 5 credits from history and 10 credits from contemporary Greece (see department website for list of approved courses) (15 credits)
2. Electives (see department website for list of approved courses) (10 credits)
3. Minimum 15 credits at the 300-400 level

International Studies

Sara R. Curran, Chair

The general program in international studies gives students a comprehensive and interdisciplinary perspective on world problems and an ability to analyze the subtle interactions of politics, economics, and culture within the global system.

Bachelor of Arts

Suggested First- and Second-Year College Courses: 30 credits of a single foreign language. ECON 200, and either ECON 201 or JSIS 123/GEOG 123

Department Admission Requirements

1. Admission is competitive, based on overall GPA, grades in the social sciences, a written statement of goals, language background, and any international experience. Before applying, students must complete ECON 200, ECON 201, or JSIS 123/GEOG 123 *and* either JSIS 200 or JSIS 201. Grades in these courses are given special consideration.
2. Application deadline is the third Friday of autumn, winter, and spring quarter; students are notified by the sixth Friday of the quarter in which they apply. Transfer students must be enrolled through the UW before applying to the major.

Major Requirements

Foreign-language competency through the second-year college level, plus 70 credits as follows:

1. ECON 200 and either ECON 201 or JSIS 123/GEOG 123; JSIS 200, JSIS 201, JSIS 202, JSIS B 330, JSIS 495, JSIS 498
2. Three or four upper-division courses in an approved option
3. Three upper-division interdisciplinary courses in international studies from an approved core list
4. A research paper of approximately 25 pages to be completed in one of the courses in the student's approved option or in one of the approved interdisciplinary courses
5. Majors are required to maintain a GPA of at least 2.50, both overall and in the program, and to earn a minimum 2.0 grade in all required Jackson School prefix courses.

Minor

Minor Requirements 30 credits as follows:

1. 10 credits chosen from JSIS 200, JSIS 201, JSIS 202
2. 15 credits in JSIS B-prefix courses, including at least 10 credits at the 300 or 400 level (courses with other JSIS prefixes are not eligible, but JSIS 478 may be counted).
3. 5 additional credits chosen from courses in any of these prefixes: JSIS A, JSIS B, JSIS C, JSIS D
4. Minimum 2.0 grade required in each course applied toward the minor.

Jewish Studies

Noam Pianko, Chair

Jewish studies offers students from varied backgrounds and disciplines a comprehensive and interdisciplinary perspective on the study of Jews and Judaism. Students explore the geographic, temporal, philosophical, and cultural diversity of the Jewish experience and gain critical skills that complement and can be applied to myriad future aspirations.

Bachelor of Arts

Suggested First- and Second-Year College Courses: JSIS C 145; JSIS C 250/HSTCMP 250; JSIS C 201; JSIS 200, JSIS 201, or JSIS 202. Courses that develop critical analysis skills and writing proficiency. Courses in modern or biblical Hebrew.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

50 credits as follows:

1. Either proficiency in one Jewish language, completion of two years (or equivalent) in one Jewish language, or completion of one year each (or equivalent) in two different Jewish languages. See adviser for approved Jewish languages. Students who wish to satisfy language requirements by demonstrating sufficient knowledge may take a proficiency examination. See department adviser for information.
2. Introductory Courses (15 credits): JSIS C 145; JSIS C 250/HSTCMP 250; one of JSIS 200, JSIS 201, or JSIS 202
3. Minimum 35 credits of electives from an approved list. May include up to 10 credits from the second year of Jewish language courses. See adviser for approved list.
4. Minimum 25 credits at the 300-400 level
5. Maximum 15 credits from an approved UW Study Abroad program (exclusive of language)
6. Minimum 2.00 cumulative GPA for courses applied to the major

The list of Jewish studies courses is maintained by the Jewish studies program on the Jackson School website. For the current list of approved courses, see jsis.washington.edu/advise/catalog/jewish_b.shtml

Minor

Minor Requirements 30 credits as follows:

1. JSIS C 145; JSIS C 250/HSTCMP 250 (10 credits)
2. 20 credits of Jewish studies courses from an approved electives list. See adviser or jsis.washington.edu/advise/undergraduate/minors.shtml for approved list. May include up to 5 credits of Jewish language courses.

3. Minimum 15 credits at the 300-400 level
4. Minimum 15 credits taken in residence through the UW
5. Minimum 2.00 cumulative GPA for courses applied to the minor

*The list of Jewish studies electives is maintained by the Jewish studies program. For the current list of such courses, see jsis.washington.edu/advise/undergraduate/minors.shtml.

Latin American and Caribbean Studies

Jose Antonio Lucero, Chair

The Latin American and Caribbean studies major combines language study with work in history, the humanities, and the social sciences. It provides a comprehensive, interdisciplinary understanding of this major world region, emphasizing themes such as economic development, popular movements, cultural analysis, and hemispheric relations. At the same time, it gives students the option to develop their own particular disciplinary and thematic interests.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Substantial progress toward completing the language requirement described below. Courses in any of the following disciplines that deal with Latin America and the Caribbean: history, literature, economics, geography, sociology, political science.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

52 credits plus language training, as follows:

1. Training in two foreign languages of Latin America and the Caribbean, to include the sixth quarter (or equivalent) of one language chosen from Spanish, Portuguese, or French, and the third quarter (or equivalent) of a second of these languages
2. JSIS 201
3. Latin American History (10 credits): Courses to be selected from an approved list.*
4. Contemporary Latin America (15 credits): Courses drawn from a range of disciplines including anthropology, comparative literature, geography, international studies, and Spanish. See program website for a complete list of courses.
5. Electives (15 credits): Courses on Latin America, the Caribbean, and international studies selected from an approved list*
6. Interdisciplinary Seminar: JSIS A 486, JSIS A 492, or another course chosen from an approved list of research seminars
7. JSIS 493: Senior paper or project

*Lists of Latin American and Caribbean studies courses are maintained by the Latin American and Caribbean studies program as part of its website. For the current list of such courses, see jsis.washington.edu/advise/catalog/latam_ba.shtml.

Minor

Minor Requirements 30 credits as follows, plus foreign language:

1. One year of Spanish or Portuguese, or equivalent proficiency
2. At least 5 credits in history chosen from an approved list*
3. At least 15 credits chosen from an approved list of courses on contemporary Latin America*
4. At least 10 additional credits chosen from the history or contemporary Latin America lists, or from an approved list of electives*
5. At least 20 of the 30 credits must be completed through the UW (UW foreign study programs included).
6. Minimum 2.0 grade required in each course applied toward the minor.

*The list of Latin American and Caribbean studies courses is maintained by the Latin American and Caribbean studies program. For the current list, see <http://jsis.washington.edu/advise/undergraduate/minors.shtml>. Since the program from time to time adds, subtracts, or reclassifies approved courses, students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified on that list.

Middle East Studies

Arzoo Osanloo, Chair

The undergraduate curriculum in Middle East studies provides a grounding in the modern Middle East and a view of how this region fits into the world community politically, historically, and economically. To achieve this understanding, students take courses in the social sciences and the humanities, and are strongly encouraged to study a Middle Eastern language.

Minor

Minor Requirements 28-30 credits as follows:

1. Two courses chosen from JSIS A 210/NEAR E 210, JSIS A 215/NEAR E 213, ANTH 318, HIST 161, or HIST 163
2. 20 credits of electives chosen from the approved list.*
3. Study of a Middle East language is encouraged, but not required. A maximum 5 credits in Arabic, modern Hebrew, Persian, or Turkish language beyond the first-year level may be applied toward the 20 credits of approved electives. No credits from any first-year language course may be counted.
4. No more than 12 credits counted in the minor may also be counted toward requirements of a major.
5. Minimum 15 credits of 300-/400-level courses
6. Minimum 15 credits completed in residence through the UW
7. Minimum 2.00 cumulative GPA in courses applied to the minor.

*The list of Middle East electives is maintained by the Middle East studies program. For the current list of such courses, see <http://jsis.washington.edu/advise/undergraduate/minors.shtml>.

Portuguese Language and Luso-Brazilian Studies

Minor

Minor Requirements: 25 credits

1. PORT 202, PORT 203, PORT 301 (PORT 299 may substitute for PORT 202 or PORT 203) (15 credits)
2. Two courses from the following: JSIS A 243, JSIS A 410, JSIS A 365/PORT 365, PORT 366, JSIS B 436/POL S 436, HSTLAC 482, JSIS A 355/SOC 355 (5 credits may be cross-listed with the student's major or from another minor/certificate) (10 credits)
3. Minimum 15 credits at the 300-400 level
4. Minimum 20 credits taken at the UW

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The majors offered in the School of International Studies emphasize development of critical thinking and provide a challenging framework for research and writing. Graduates attain competency in foreign language and an understanding of the political, economic, and cultural underpinnings of the global system and specific world regions. This background lays a foundation for advanced study in professional and academic disciplines, and for careers in the evolving global community. Graduates work in a wide range of jobs, depending on their interests and skills, including: Foreign Service officers, international trade specialists, political analysts, human rights associates, research assistants, social studies and language teachers, international student advisers, foreign study coordinators, program officers/managers for international non-profits and NGOs, foreign exchange specialists, international sales representatives/managers, import/export brokers, marketing analysts, associate editors/publicists, international news writers/journalists.
- *Instructional and Research Facilities:* More than 1.5 million volumes in the University library system are related to international studies. The library has a large current international and domestic newspaper collection, with an emphasis on Slavic, South, and Southeast Asian papers and a selection of European papers. Specialized facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. The University's library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

Jackson School undergraduates can draw upon an extensive roster of more than 500 UW Study-Aboard programs and exchanges, in 70 countries, to enrich their studies.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The School's Office of Career Services provides resources for students exploring job and internship opportunities. The Jackson School has limited funds available for students who serve as unpaid interns in nonprofit and governmental agencies. The Leslie Shedd Memorial Internship Fund honors a Jackson School alumna killed while serving with the CIA. The Dorothy Fosdick Internship Fund is sponsored by the Henry M. Jackson Foundation in memory of the senator's foreign policy adviser. The George E. Taylor Internship Endowment supports students engaged in community-based internships. The Fathi-DiLuck Endowment supports unpaid internships with organizations in the greater Seattle area.

- *Department Scholarships:* Ivy Hovey Fitch Endowed Scholarship, Neal and Helen Fosseen Endowed Scholarship, David Hughes Endowed Scholarship (tuition); Vincent H. Gowen Scholarship (undergraduate-China); Margaret Mykut Scholarships; Ayako Betty Murakami Scholarship (Japan); I. Mervin and Georgiana Gorasht Scholarship, Arthur A. Jacobovitz Scholarship, Richard M. Willner Memorial Scholarship, and Jewish Studies Advisory Board Scholarship (Jewish Studies); Katherine M. Tyler Endowed Fellowships (Asia); Eugene and Marilyn Domoto Webb Scholarship and Marilyn Domoto Webb Fellowship (Comparative Religion); Margaret Mykut scholarships, Alice Wanamaker scholarships, and Jao scholarships (undergraduate study abroad). See also the funding opportunities described under Internships.
- *Student Organizations/Associations:* Jackson School Student Association

Graduate Program

Graduate Program Information

111 Thomson, Box 353650

(206) 543-6001

jsisinfo@uw.edu

In addition to the PhD, nine programs that lead to a Master of Arts in International Studies degree: seven world area-studies programs, a comparative religion program, and a comparative and thematic program in international studies that concentrates on the interaction of international, economic, political, and cultural processes with states and societies around the world. Area-studies programs include China studies; Japan studies; Korea studies; Middle East studies; Russian, East European, and Central Asian studies; South Asian studies; and Southeast Asian studies. The comparative and thematic international studies program can be taken as a concurrent degree program with several professional schools. Specific requirements vary, but all stress interdisciplinary study within the context of the historical cultures, contemporary situations, and languages either of world areas or comparatively.

Master of Arts in International Studies

Admission Requirements: For all MAIS programs shown below.

1. Baccalaureate degree from an accredited university
2. Minimum 3.00 GPA in last 90 quarter (60 semester) hours
3. GRE general scores
4. Other requirements as specified by individual Jackson School programs, including foreign language

Degree Requirements: See individual programs, below.

China Studies

Madeleine Yue Dong, Chair

Provides a broad understanding of the Chinese people and their culture, historical development, and contemporary problems. Curriculum emphasizes the attainment of facility in Chinese language, a grounding in history, and a familiarity with the approaches of the social sciences. Cultural aspects are covered through offerings of several departments, with special strengths in art history and literature.

Admission Requirements

See [above under](#) under Master of Arts in International Studies. Previous study of Chinese language highly recommended.

Degree Requirements

36 credits, plus language training.

1. JSIS A 521, JSIS 522 (10 credits)
2. China-related study from at least two different disciplines (26 credits)
3. Two seminar papers (or a thesis)
4. Comprehensive oral examination
5. Chinese language training through the third year

Comparative Religion

James K. Wellman, Chair

Required core seminars focus on methodology and comparative perspective in the study of religion. Primary and secondary curricular concentrations are available in Buddhism, Hinduism, Judaism, Islam, Christianity, Biblical and Near Eastern religion, and religion and culture; further secondary curricular concentrations are available in Greco-Roman religions, religions in America, East Asian indigenous traditions, African traditions, and Native American traditions.

Admission Requirements

See [above](#) under Master of Arts in International Studies. Sufficient language preparation and background in the study of religion.

Degree Requirements

1. Basic competency in the history of world religions
2. JSIS B 501, J SIS B 502, JSIS B 598
3. Additional courses: colloquium course each quarter; one course focused on historical relations between religious traditions; minimum four courses in a major concentration and two in a minor
4. Research paper(s); one or two
5. Comprehensive examination, both oral and written
6. Third year in language of primary sources in chosen concentration; first-year reading proficiency in a second foreign language

International Studies

Sara R. Curran, Chair

Students prepare to undertake sophisticated analyses of international affairs and typically hold positions after graduation with international divisions of federal and state governments, international divisions of banks, trading companies, policy-study institutes, corporations with international operations, and

international development and educational organizations. About half the students enroll in a concurrent graduate professional-degree program, which adds approximately one year to the course of study.

Admission Requirements

See [above](#) under Master of Arts in International Studies. Students applying concurrently to a professional program ([Foster School of Business](#), [Public Affairs](#), [Marine Affairs](#), [Environmental and Forest Sciences](#), [Law](#), or [Public Health](#)) must also be accepted by the professional school. For non-concurrent applicants, preference is given to those who have a professional interest, or previous professional experience or education. Prior study of a foreign language and preparation in intermediate-level microeconomics and macroeconomics are highly recommended.

Degree Requirements

1. JSIS 500, JSIS 501, JSIS 511 (15 credits)
2. Courses in two of the following: regional studies; professional; international studies (minimum 9 credits for each)
3. Two seminar papers, or a thesis
4. Oral examination
5. Foreign language: Japanese or Chinese through the third year; or other modern foreign language through the second year

Japan Studies

Marie Anchordoguy, Chair

Gives students in-depth knowledge of many facets of Japan, including history, political economy, society, and language. Designed (1) for students who need language and interdisciplinary training on Japan to pursue their career goals, or (2) as preparation for doctoral work in an academic discipline involving Japan for students with little or no training on Japan or in the language. A concurrent degree program with the Foster School of Business (MAIS/MBA) is offered; other combinations (e.g., with Public Affairs and Law) can be arranged.

Admission Requirements

See [above](#) under Master of Arts in International Studies. Minimum one year in Japanese language strongly recommended.

Degree Requirements

46 credits, plus language training.

1. JSIS A 555 (3-6 credits)
2. Discipline (non-language) coursework to include at least one history course and one social science course (46 credits)
3. Japanese through the third year. Maximum 15 credits from advanced Japanese language may be counted toward the 46 credits.

Korea Studies

Clark W. Sorensen, Chair

Offers courses in Korean language, history, and society. Emphasizes the study of Korea in the context of East Asian civilization and the modern world economy.

Admission Requirements

See [above](#) under Master of Arts in International Studies. Previous language training recommended.

Degree Requirements

36 credits, plus language training.

1. HSTAS 482, JSIS A 566, JSIS A 584, JSIS A 585 (20 credits)
2. Discipline study: East Asia or international studies (15 credits)
3. Two seminar papers/or essay
4. Oral examination
5. Korean language through third year

Middle East Studies

Arzoo Osanloo, Chair

Social, political, economic, and legal systems of the Middle East and/or Islamic Central Asia. Students take courses in the social sciences, humanities, and a Middle Eastern or Central Asian language.

Admission Requirements

See [above](#) under Master of Arts in International Studies. One year's study (or equivalent) of language in which the student plans to concentrate.

Degree Requirements

1. Modern Middle East: courses from minimum two social science or humanities disciplines (20 credits)
2. One Jackson School course
3. Two courses in one social science discipline (or in one professional school, other than courses taken for preceding requirements)
4. Thesis and oral examination, or two seminar papers and written examination
5. Language: three 3-credit or two 5-credit Middle Eastern language courses beyond second year.

Russian, East European, and Central Asian Studies

Scott Radnitz, Chair

Includes language training, a concentration of study in a chosen discipline, and a combination of courses in other disciplines. Students usually focus on one region (Russia, East Europe, the Baltic States, or Central Asia), although they may take courses on another region.

Admission Requirements

See [above](#) under Master of Arts in International Studies. Two years of college-level language courses or the equivalent: Russian for those focusing on Russia; for other regions of the former Soviet Union and East Europe, two years of a language of the region, or another relevant language.

Degree Requirements

48 credits, plus language training.

1. JSIS A 504; JSIS A 514; JSIS A 515 (9 credits)
2. Disciplines other than language: 15 to 20 credits in discipline of concentration; 5 credits in minor field; 10 to 15 credits in other REECAS-related courses
3. Thesis: JSIS 700 (9 credits)
4. Oral examination
5. Language: Including two years required for entry, four years of a language of the region; or two years each of two relevant languages (four years Russian required for Russian focus)

Research Facilities: In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has a major Central Asian language collection and the largest collection of Latvian books outside Latvia.

Graduate Certificate in Russian, East European, and Central Asian Studies

Objectives:

- Provide a thorough grounding in REECA history and key economic, social and political issues affecting contemporary society in the region
- Improve oral and written communication skills
- Enhance understanding of the relationship between REECA and other areas of the world and provide answers to global questions of political, social, cultural, and environmental change.

Requirements (16 credits): JSIS A 504 (5 credits); two elective REECA focused courses (10 credits); certificate capstone (1 credit).

Maximum six credits may apply to a student's degree program (double counted credits must be elective coursework in the degree program).

South Asian Studies

Anand Yang, Chair

Encompasses India, Pakistan, Bangladesh, Sri Lanka, Tibet, and Nepal.

Admission Requirements

See [above](#) under Master of Arts in International Studies.

Degree Requirements

1. JSIS A 508, JSIS A 509, JSIS 510 (15 credits)
2. Coursework from at least two different departments, focused primarily on South Asia or courses taught by South Asia faculty on topics relevant to a student's specializations, to include maximum 10 credits not focused on South Asia, nor taught by South Asia faculty (21 credits)
3. Two seminar papers or a thesis
4. Oral examination
5. Language: Third year of a South Asian language, to include at least 7 credits at the 400 level or above

Research Facilities: The University of Washington library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

Graduate Certificate in South Asian Studies

Objectives include grounding in South Asian history and key economic, social, and political issues affecting contemporary South Asia; understanding the relationship between South Asia and other areas of the world, and considering global questions of political, social, cultural, and environmental change; improving oral and written communication skills; developing interdisciplinary analytical and thinking skills.

Requirements (16 credits): JSIS A 508; JSIS A 509; one elective South-Asia-focused course (5); JSIS A 513, capstone portfolio (1).

Southeast Asian Studies

Laurie J. Sears, Chair

Encompasses Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, Timor Loro'sae, and Vietnam. The curriculum combines training in one or more Southeast Asian languages with study of various aspects of modern and classical Southeast Asian civilizations.

Admission Requirements

See [above](#) under Master of Arts in International Studies.

Degree Requirements

36 credits, plus language training.

1. JSIS A 506, JSIS A 580/HSTAS 530, JSIS A 582/HSTAS 532 (15 credits)
2. Coursework from at least two different departments focused primarily on Southeast Asia or courses taught by Southeast Asia faculty on topics relevant to a student's specializations, to include maximum 5 credits not focused on Southeast Asia, nor taught by Southeast Asia faculty (21 credits)
3. Thesis, or non-thesis project
4. Language: third year of a Southeast Asian language

Doctor of Philosophy

Saadia M. Pekkanen, Director

Framed around four foundational fields: (1) "Religions, Cultures, and Civilizations (RCC)," the diversity of cultural and religious life anchored in concrete studies of world areas, histories, cultural and political movements, as well as religious institutions and practices; (2) "States, Markets, and Societies (SMS)," theoretical and empirical debates about the engagement of states with their societies and with transnational actors in their historical, political, and social settings; (3) "Peace, Violence, and Security (PVS)," theoretical and foreign policy debates about global security challenges, conflicts, and violence, as well as issues of their prevention; and (4) "Law, Rights, and Governance (LRG)," theoretical and policy debates about the causes and consequences of legal evolution, rule of law, and a broad range of governance concerns in world affairs.

Offers two tracks for the dissertation. (1) Writing three thematically linked article-length research papers; (2) Writing one book-length monograph. Doctoral candidates situate their dissertations under an overarching theme/topic in one of the four foundational fields of the PhD Program, and also ground them in one of the existing area-based MAIS degrees in the Jackson School.

Admission Requirements

1. *Master's Degree*
2. *Statement of Purpose:* detailing research question/interests in at least one of the four foundational fields of the PhD program and at least one of the area-based MAIS programs; also identifying relevant JSIS faculty member(s) for research supervision
3. *Writing Sample:* published or unpublished sample/excerpt (not to exceed 40 pages) demonstrating ability to write critically and analytically
4. *Curriculum Vitae*
5. *Three Letters of Recommendation*
6. *All Undergraduate and Graduate Transcripts*
7. *Language:* stronger applicants normally have knowledge of relevant language sufficient for research
8. *All Test Scores:* GRE General Test Scores and TOEFL (for international students) sent directly by the Educational Testing Service

Degree Requirements

100 credits minimum, as follows:

1. 28 transfer credits corresponding to previous graduate-level work; completion of 45 JSIS PhD program credits including introduction to international and area studies course, research tutorial, two field seminars, two specialization courses, two methods courses
2. Capstone presentation
3. General examination, consisting of three written examinations (two in PhD program fields, one in area-based field)
4. Doctoral dissertation (either three thematically linked article-length research papers or one multi-chapter book-length monograph (27 credits)
5. Final examination, consisting of oral defense of the written dissertation

Research Facilities:

Along with entry to the UW library system, students have access to research resources, facilities, and networks of formal programs in the Jackson School, including those on Africa, Canada, China, Comparative Religion, Europe, Japan, Jewish Studies, Korea, Latin America and the Caribbean, Middle East, Russia, East European and Central Asia, South Asia, and Southeast Asia. Further, programs and resources of Title-VI National Resource Centers (NRCs) in the Jackson School, including the Canadian Studies Center, Center for Global Studies, Center for West European Studies, East Asia Center, The Ellison Center for Russian, East European and Central Asian Studies, Middle East Center, South Asia Center, and Southeast Asia Center. Also, resources of other centers at the Jackson School, including the Center for Human Rights, Center for Korea Studies, East Asia Resources Center, European Union Center of Excellence, and the Latin American and Caribbean Studies Center. Students also draw on the Jackson School's affiliation with the Center for Statistics and the Social Sciences (CSSS).

Research and training facilities for specific areas include the following: For East Asia, the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. In addition, the University is affiliated with the Inter-University Program for Chinese Language Studies in Beijing, language programs in Japan and the People's Republic of China sponsored by the Council on International Educational Exchange, the Inter-University Center for Japanese Language Studies in Yokohama, and other programs which provide intensive language training for advanced undergraduate and graduate students. For descriptions of research facilities in other areas, see Russia, East Europe, and Central Asia as well as South Asia under the appropriate headings above.

Financial Aid:

Financial awards are made at the time of admission and during the course of a student's time at JSIS. Funding guarantees for consecutive years is contingent upon satisfactory academic progress. All accepted doctoral candidates are automatically considered for fellowships, teaching assistantships, and research assistantships. Financial support is available on a competitive basis to U.S. citizens and permanent residents in the form of Title VI Foreign Language and Area Studies Fellowships. Additional funding comes from the master's-level programs as well as other sources in the Jackson School.

Labor Studies

Undergraduate Program

Adviser

101 Smith, Box 353530

(206) 543-7946

hbcls@uw.edu

Minor

The Labor Studies minor brings together a series of courses on labor in core social-science departments. It provides students an interdisciplinary program of study focusing on the importance of labor to the economic, social, political, and cultural evolution of modern societies.

Minor Requirements: 25 credits

1. HIST 249/POL S 249/SOC 266; or HSTAA 353 (5 credits)
2. 20 additional credits from courses related to labor studies, with no more than 10 credits from one department. See department website for current list: depts.washington.edu/pcls/resources-courses.html.
3. Minimum 2.0 grade for each course applied toward the minor.

Law, Societies, and Justice

Program Overview

42 Gowen

The program in Law, Societies, and Justice provides an interdisciplinary liberal arts education focusing on the roles of law and law-like systems in structuring social life. Courses challenge students to understand the multiple forms of law – criminal, civil, administrative, and constitutional – and the multiple roles law plays in the conduct of social action. Courses stress the importance of examining law in comparative perspective, and of recognizing the increasing significance of rights discourse in shaping how law is understood and practiced. Faculty are trained in several social science disciplines, and hence students learn to analyze law from multiple perspectives.

Undergraduate Program

Adviser

42 Gowen, Box 353530

(206) 543-2396

lsjadv@uw.edu

Law, Societies, and Justice offers the following programs of study:

- The Bachelor of Arts degree with a major in law, societies, and justice.
- A minor in law, societies, and justice
- A minor in disability studies

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that emphasize development of reading, writing, and especially analytical skills. Also, classes that provide background knowledge of modern world history, politics, institutions, and political theory.

Department Admission Requirements

1. Admission is capacity constrained, based on the following: GPA, with emphasis on grades in courses required for admission and for completion of major requirements (applicants accepted normally present cumulative UW GPAs above 2.50); personal statement representing the student's interest in and commitment to becoming a Law, Societies, and Justice major; other evidence of a commitment to the study of society, justice, and law. Admitted applicants often show evidence of success in social science courses. (See department website or academic adviser for recommended social science courses.)
2. Minimum 2.50 cumulative UW GPA
3. Two of the following courses: LSJ 200 or LSJ 363/POL S 363; LSJ 320/POL S 368, LSJ 321/ANTH 323, LSJ 322/JSIS A 324, or LSJ 329; LSJ 367/POLS S 367 or LSJ 366/JSIS B 366
4. One English composition course. (Further evidence of writing skills in the social sciences is encouraged.)

5. Students may apply autumn, winter, or spring quarters. Application deadline: second Friday of the quarter. Students are notified of admission decisions by the sixth week of the quarter in which they apply.
6. Satisfactory progress to degree may be considered when making admission decisions.

Major Requirements

Minimum 53-55 credits as follows:

1. Completion of four LSJ core courses (20 credits):
 - a. one of LSJ 200 or LSJ 363/POL S 363 (5 credits)
 - b. two of LSJ 320/POL S 368, LSJ 321/ANTH 323, LSJ 322/JSIS A 324, or LSJ 329 (10 credits)
 - c. one of LSJ 367/POLS S 367 or LSJ 366/JSIS B 366 (5 credits)
2. Three courses from one of the two designated subfields of study (comparative legal institutions; and rights) and two courses from the other subfield. See program website or advisers for list of approved courses. (23-25 credits)
3. One LSJ departmental seminar. Departmental seminar cannot count simultaneously towards the LSJ subfield requirements. (5 credits)
4. Completion of LSJ 401, which includes completion of 100 hours of volunteer experience or internship in a field related to LSJ. (5 credits)

Minor

Minor Requirements (Law, Societies, and Justice): 28-30 credits

1. Two courses from the following: LSJ 320/POL S 368, or LSJ 321/ANTH 323, or LSJ 322/JSIS A 324; LSJ 363/POL S 363 or LSJ 200; LSJ 367/POL S 367 or LSJ 366/JSIS B 366; LSJ 375 or SOC 372. (10 credits)
2. Two courses from each LSJ major subfield. (Major subfields are "comparative legal institutions" and "rights." Courses fulfilling subfield requirements are outlined on the departmental website and handouts. (18-20 credits).

Minor Requirements (Disability Studies): 30 credits

1. *Core Courses:* DIS ST 230/LSJ 230/CHID 230 (5 credits)
2. Completion of three DIS ST courses. See disability studies adviser or disability studies program website for list of approved courses (15 credits)
3. *Disability studies electives:* Courses from at least two of the following three subfields: Rights, Policy, and Inequality; Global and Historical Perspectives; Diversity, Representation, and Identity. See disability studies adviser or disability studies program website for list of approved courses (10 credits)
4. Minimum 15 credits at the 300- or 400-level

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The Law, Societies, and Justice curriculum emphasizes the development of a range of analytic and communicative skills. Courses challenge students to develop the capacities to: read and interpret texts, including theoretical, empirical, and legal documents; comprehend and contrast arguments; develop and defend arguments; contrast

theoretical arguments with empirical realities; assess contemporary practices of justice delivery against contemporary conceptions of justice. Students are required to express these skills in both verbal and written forms, through active class discussions and well-constructed writing assignments. Development of these skills assists students in a range of possible future endeavors, including a wide array of careers in law and justice.

- *Instructional and Research Facilities:* Students have access to the Political Science/Law, Societies, and Justice/School of International Studies writing center for most classes. Research opportunities are available on an individual and group basis with many professors.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* LSJ requires each of its majors to complete an internship for credit. Internship aims: (1) to provide students with insights into the workings of law in practice; (2) to scrutinize and 'test' some of the theories and concepts found in the literature against 'real world' practice; (3) to advance career development and goals, and (4) to provide 100 hours of local community service. Student assignments vary, and include government agencies, non-profit social service organizations, private law firms, rights-focused organizations, and other sites that focus on issues connected to LSJ coursework. It is the student's responsibility to find an internship, although the LSJ adviser can help find a suitable one. Students are required to write two papers according to specific guidelines for internship course credit.

Many LSJ faculty regularly invite majors to assist them in the development and execution of research endeavors. These provide students an unparalleled opportunity to understand the challenges and mechanics of high-level research.

- *Department Scholarships:* The Stromberg Study Abroad Fund provides financial assistance to LSJ majors who pursue Study Abroad opportunities in socio-legal studies.
- *Student Organizations/Associations:* The Law, Societies, and Justice Student Association sponsors regular events of interest to LSJ students, including career panels and service events.

Of Special Note: The required departmental seminar emphasizes close reading of texts, active class discussions, and well-reasoned analytic writing, providing an opportunity to establish a close connection to faculty and other students, and to hone analytic and communicative skills.

Linguistics

Department Overview

Guggenheim Hall, 4th Floor

Linguistics is the scientific study of language, which is one of the most characteristic human attributes. In contrast to other language-related disciplines, linguistics is concerned with describing the rule-governed structures of languages, determining the extent to which these structures are universal or language-particular, positing constraints on possible linguistic structures, and explaining why there is only a fairly narrow range of possible human languages.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of Linguistics offers the following programs of study:

- The Bachelor of Arts degree with options in general linguistics and Romance linguistics
- A minor in linguistics
- A minor in American sign language

Bachelor of Arts

General Linguistics

Suggested First- and Second-Year College Courses: One year of a foreign language that belongs to a different family from the student's native language.

Department Admission Requirements

1. Completion of at least the third quarter, or equivalent, of a foreign language, with a minimum 2.0 grade
2. Completion of either LING 200, LING 400, or an approved introductory linguistics course; at least one writing (W) course; and one additional quantitative and symbolic reasoning (QSR) course. Minimum 2.0 grade in each course and a cumulative 2.50 GPA in the three courses
3. The department accepts students who meet the minimum requirements stated above, but recognizes that a 2.50 GPA or higher is indicative of the motivation and academic skills needed for a reasonable probability of success in the program.

Major Requirements

80 credits, as follows:

1. LING 400 or other introductory course in linguistics

2. LING 450, LING 451, LING 461, LING 462
3. Minimum one additional 400-level LING course, excluding LING 400, LING 419, LING 430, LING 480, LING 490, and LING 499
4. At least one year of each of two languages, one of which must belong to a language family different than the student's native language, with a minimum grade of 2.0 in the third quarter of each language
5. 20 additional credits of departmentally approved courses in linguistics.

Romance Linguistics

Suggested First- and Second-Year Courses: Two college years of study in a Romance language.

Department Admission Requirements

1. Completion of at least one year of college work in a single Romance language
2. Completion of either LING 200, LING 400, or an approved introductory linguistics course; at least one writing (W) course; and one additional quantitative and symbolic reasoning (QSR) course. Minimum 2.0 grade in each course and a cumulative 2.50 GPA in the three courses
3. The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for a reasonable probability of success in the program.

Major Requirements

Minimum 63 credits, as follows:

1. LING 400 or another introductory course in linguistics
2. LING 450, LING 451, LING 461, and LING 462
3. 15 credits at the 300 level or higher of one Romance language
4. LING 419
5. 20 additional credits of departmentally approved courses in linguistics, with at least one course for which a research paper on a Romance language is written

Minors

Linguistics -- Minor Requirements: 32 credits to include LING 400 or another introductory course in linguistics; three courses from LING 432, LING 442, LING 450, LING 451, LING 461, LING 462, or LING 481; 12 additional credits from a list of departmentally approved courses in linguistics, 6 of which must be in upper-division courses

American Sign Language -- Minor Requirements: 33-35 credits as follows:

1. *Second-year American Sign Language (15 credits):* ASL 201; ASL 202; ASL 203
2. *Culture and History (3 credits):* ASL 305
3. *Theory and Structure (8-10 credits):* LING 400 or LING 461; either ASL 343 or LING 403
4. Approved 300- 400-level electives (minimum 7 credits). See adviser for approved list.
5. Minimum 2.00 cumulative GPA for all courses applied to the minor

6. Minimum 18 credits from outside student's major requirements

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of linguistics emphasizes formal reasoning and critical thinking skills. Linguists' skill sets include the ability to analyze sound, word, and sentence structures of individual languages; the ability to understand and account for how languages change in certain patterns; the ability to understand how social factors can affect language, how people learn their first or second languages; and the ability to find out and appreciate how apparently vastly different languages can be governed by the same set of rules. Linguistics is a valuable component of liberal education and vocationally can have applications wherever language itself becomes a matter of practical concern. Graduates have a good foundation for pursuing further training and careers in teaching languages, in areas of rehabilitative medicine such as audiology or speech therapy, in special education, in work with native peoples or with immigrant groups, in lexicographic work, in interpretation and translation, in work in computer science and artificial intelligence, or in academic disciplines such as psychology, philosophy, literature and language studies, where the contribution of linguistics is recognized. An undergraduate degree in linguistics from the UW also serves as preparation for graduate work in linguistics or language-related fields such as speech and hearing science or language teaching.
- *Instructional and Research Facilities:* The Language Learning Center located in Denny Hall provides audio and video services facilitating language learning. It also has a computer laboratory providing instructional software for linguistics and varieties of languages. Departmental facilities include a phonetics laboratory for students conducting phonetic experiments and doing digital acoustic analyses, a linguistics library that supplements the linguistics collection of the UW libraries and provides a quiet study place, and a computer laboratory for research in computational linguistics.
- *Honors Options Available:* With College Honors (Completion of both Honors Core Curriculum and Honors requirements in the major). With Honors (Completion of Departmental Honors requirements). See adviser for requirements.
- *Research, Internships, and Service Learning:* None offered
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* The Linguistics Undergraduate Association (LingUA)

Graduate Program

Graduate Program Coordinator
A210B Padelford, Box 354340
(206) 543-2046
phoneme@uw.edu

The department offers a program leading to the degrees of master of arts and doctor of philosophy. The major interest of the core faculty lies in syntax, semantics, phonetics, phonology, sociolinguistics, computational linguistics, and in theoretical aspects of second-language acquisition.

Some coursework is also available in various cooperating departments, including psycholinguistics, philosophy of language, speech synthesis, and the structure and history of a number of individual languages and language families.

Master of Arts

An MA is not required as a prerequisite to PhD study. Students are not admitted directly into the MA program.

Degree Requirements

Thesis Option

1. Minimum 35 credits - LING 507, LING 508, LING 532, LING 551, LING 552, either LING 550 or LING 553, either LING 542 or LING 579
2. Language Requirement: Satisfied by one of the following:
 1. One year of study at the university or community college level. Language instructors in other UW departments can use their language teaching experience to satisfy one language requirement.
 2. A major research project that involves significant primary data collection that includes substantial structural analysis and results in a major paper such as a generals paper
 3. Translation examination to demonstrate the ability to read linguistic literature in a foreign language
3. A thesis, written under the supervision of a Linguistics faculty member, and accepted by a second faculty reader. Normally 10 credits of LING 700.

Non-thesis Option: Students who pass the general examination automatically receive an MA degree in general linguistics; two research papers (referred to as “generals papers”) and the general examination constitute the capstone project necessary for a master’s degree (or the student may complete the thesis model shown above).

Master of Science in Computational Linguistics

Admission Requirements

1. Ability to program, including knowledge of data structures and algorithms (equivalent to CSE 373); broad familiarity with C++ and Java; expertise in C++ or Java; and Perl and/or Python.
2. College-level introductory course in linguistics or equivalent
3. Introduction to statistics and probability (equivalent to STAT 391)
4. Some knowledge of languages other than English is strongly encouraged.
5. One- or two-page statement of purpose.
6. Two or three letters of recommendation, preferably from people familiar with the applicant's academic work
7. Sample of the applicant's academic work (required for applicants who have completed their previous degree within the past two years. Other applicants who wish to send samples of academic work are encouraged to do so). Types of samples include coding projects (together with write-ups), theses and term papers.
8. One complete set of official transcripts
9. International applicants must meet UW English language proficiency requirements. For more information, refer to Memo 8: Graduate School English Language Proficiency Requirements.

Degree Requirements

43 credits

1. *Required Courses:* LING 450, LING 566
2. One additional 400- or 500-level course in phonetics, phonology, morphology, syntax, semantics, or pragmatics
3. *Computational Linguistics Courses:* LING 570, LING 571, LING 572, LING 573
4. One elective in computational linguistics and one elective in computational linguistics or a related area
5. Minimum 10 credits of LING 600 or LING 700

Doctor of Philosophy

General Linguistics Option

Admission Requirements

1. Three letters of recommendation and Graduate Record Examination scores
2. Master's thesis or a paper of high quality, or both

Degree Requirements

Minimum 90 credits

1. Required courses (35 credits): LING 507, LING 508, LING 532, LING 551, LING 552, LING 550 or LING 553, LING 542 or LING 579
2. Additional courses for a minimum of 90 credits (27 of which are LING 800) to be determined by specialization and consultation with the Supervisory Committee
3. Language knowledge requirement: Non-computational linguistics graduate students satisfy two natural language requirements for the PhD through the following:
 - a. One year of study at the university or community college level. Language instructors in other UW departments may use their language teaching experience to satisfy one language requirement.
 - b. A major research project that involves significant primary data collection that includes substantial structural analysis and results in a major paper (such as a general's paper).
 - c. Translation examination to demonstrate the ability to read linguistic literature in a foreign language; only one of the two language requirements for the PhD can be satisfied through the translation examination.
4. Colloquium conference talks: Two papers delivered at a colloquium or conference
5. Constitution of the PhD committee by the end of the second year of study
6. Generals (research) papers: Two general's papers in different areas, at least one in grammatical theory. (normally 10 credits of LING 600)
7. General examination: An oral examination, in which the candidate is questioned on the two papers.

8. Dissertation prospectus: Within six months of the oral examination, the student presents a formal dissertation proposal to the subset of the PhD Supervisory Committee members who constitute the reading committee, along with a proposed calendar for completion of the dissertation.
9. Final examination
10. Dissertation
11. All-but-dissertation (ABD) requirement: All degree requirements except for the dissertation and the two colloquia completed before the general examination.

Computational Linguistics Option

Admission Requirements

Students who complete the Computational Linguistics Master of Science degree (CLMS) and who wish to be admitted to PhD study in linguistics must satisfy the following:

1. Completion of CLMS degree requirements
2. Completion of master's thesis option
3. Completion of three courses required for the linguistics PhD (computational linguistics option), subject to the following restrictions: (a) Courses must be taught by at least two non-computational linguistics faculty; (b) Courses may not include LING 570 through LING 573
4. The required general linguistics courses for the computational linguistics track PhD are shown below.

Degree Requirements

Requirements are the same as for the general linguistics option, except for the following:

1. Required courses: two from LING 507, LING 508, LING 566; two from LING 550, LING 551, LING 552, LING 553; one from LING 542, LING 579; one from LING 532, LING 533; three from LING 567, LING 570, LING 571, LING 572, LING 573
2. Language knowledge requirement: only one language requirement; excludes translation examination
3. Generals (research) papers: Same as for the general linguistics program except a master's thesis completed as part of the CLMS program may count as one of the two generals papers.
4. Transition from the CLMS to PhD program
 - a. Step 1: Entering the general linguistics graduate program registered as a post-master's program student: Students may apply for admission to the linguistics graduate program after receiving their CLMS degree; admission decision is made by the computational linguistics faculty; after admission, students pay regular UW tuition for courses.
 - b. Step 2: Entering the linguistics PhD program: Students may apply after completing all requirements listed above. If all requirements are completed upon receipt of the CLMS degree, Steps 1 and 2 may be completed simultaneously.

Mathematics

Department Overview

C138 Padelford

Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, mathematics is a surprisingly effective tool for describing the natural world. Indeed, mathematics has come to serve as the foundation of modern science, through its language and results. Some mathematical results were initially developed in order to solve internally generated mathematical problems and only later found application in other disciplines; other mathematical results were inspired by the needs of these other disciplines. The two facets of mathematics -- tool of science and subject of inquiry for its own sake -- have come to be interwoven into a complex fabric.

Undergraduate Program

Adviser

C36 Padelford, Box 354350

(206) 543-6830

advising@math.washington.edu

The Department of Mathematics offers the following programs of study:

- The Bachelor of Arts degree with a major in mathematics - standard program
- The Bachelor of Arts degree with a major in mathematics - philosophy option
- The Bachelor of Arts degree with a major in mathematics, with an option designed specifically for students who plan to pursue secondary teaching careers
- The Bachelor of Science degree with a major in mathematics
- The Bachelor of Science degree with a major in applied and computational mathematical sciences (ACMS). The Department of Mathematics cooperates with the departments of Applied Mathematics, Computer Science and Engineering, and Statistics in offering this major. (See ACMS for requirements.)
- A minor in mathematics
- The Bachelor of Science degree with a major in mathematics - standard option (effective summer quarter 2018, admission suspended until further notice)
- The Bachelor of Science degree with a major in mathematics - comprehensive option (effective summer quarter 2018, admission suspended until further notice)

Bachelor of Arts

Department Admission Requirements

Admission to all programs is capacity constrained. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. The application and additional information are available online at www.math.washington.edu/Undergrad.

Admission Criteria

1. *Minimum Course Requirements:* MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), with a minimum 2.0 grade in each of these calculus courses and an overall minimum 2.50 GPA in all mathematics courses.
2. *Determining Factors:* Factors considered include performance in all mathematics courses as measured by GPA, difficulty of all mathematics courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, amount and type of AP credit (i.e., AB vs. BC), relevant work and life experience, and record of honors.
3. *When to Apply:* Applications are accepted via catalyst twice each year. Deadline is the end of the day on January 15 and September 15.

Major Requirements

Standard Option (51 credits)

Intended for students interested in a versatile degree in mathematics. Students should choose electives to gain more knowledge in a specific area of mathematics.

1. Core (27 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 134, MATH 135, and MATH 136); MATH 300; MATH 324
2. Electives (24 credits): Eight mathematics courses numbered 301 or higher, including three at the 400 level, excluding MATH 398, MATH 399, MATH 497, MATH 498, MATH 499. No more than two courses numbered MATH 380 or MATH 480. MATH 420 cannot be applied toward the three required 400-level classes.
3. Minimum 2.0 grade in all courses presented to satisfy major requirements. Minimum 2.00 cumulative GPA in all mathematics courses at the University, including course repeats
4. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through UW, Seattle.
5. Students may pursue either the general mathematics major or one of the two options shown below.

Philosophy Option (58 credits)

1. MATH 124, MATH 125, MATH 126, MATH 308 (or MATH 134, MATH 135, and MATH 136); MATH 300; MATH 327; MATH 328; five additional mathematics courses at the 300 or 400 level, including at least one two-quarter sequence at the 400 level other than MATH 407, MATH 408, MATH 409, or MATH 421, MATH 422
2. PHIL 120 or an upper-level course in logic; PHIL 100, PHIL 160, or PHIL 240; one philosophy course at the 300 level; one philosophy course at the 400 level
3. Minimum 2.0 grade in all courses presented to satisfy mathematics major requirements. Minimum 2.00 cumulative GPA in all mathematics courses at the University, including course repeats.
4. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through the UW.

Teacher Preparation Option (52-59 credits)

1. MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 134, MATH 135, and MATH 136); MATH 300; MATH 394, MATH 411, MATH 412, MATH 444, MATH 445; either STAT

311, MATH 390/STAT 390; or Q SCI 381; 15 credits of approved electives at the 300 level in MATH, AMATH, or STAT, or PHYS 407, PHYS 408, and PHYS 409. Minimum 6 credits of electives from the Mathematics Department.

2. Minimum 2.0 grade in all courses presented to satisfy the program requirements. Minimum 2.50 cumulative GPA in all mathematics courses at the University, including course repeats
3. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through the UW

Bachelor of Science

Department Admission Requirements

Same as for bachelor of arts programs, shown above.

Major Requirements

69 credits

1. *Core (33 credits)*: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 134, MATH 135, MATH 136); MATH 300; MATH 324; MATH 327; MATH 328
2. *Advanced Mathematics (18 credits)*: At least six courses from the following, either in two three-quarter sequences or three two-quarter sequences, with at least one sequence from items a. through d.
 - a. *Modern Algebra*: MATH 402, MATH 403, MATH 404
 - b. *Concepts of Analysis*: MATH 424, MATH 425, MATH 426
 - c. *Complex Analysis*: MATH 427, MATH 428
 - d. *Topology & Geometry*: MATH 441, MATH 442, MATH 443
 - e. *Optimization*: MATH 407, MATH 408, MATH 409
 - f. *Combinatorics*: MATH 461, MATH 462
 - g. *Numerical Analysis*: MATH 464, MATH 465
 - h. *Probability*: MATH 491, MATH 492

Proficiency in items a. and b. is generally expected for graduate study in mathematics. In addition, items c. and d. are recommended for PhD programs in pure mathematics. Alternative combinations may be preferred for graduate study in other areas of the mathematical sciences and for industry careers. Consult Mathematics Student Services for more information.

3. *Electives (18 credits)*: Six additional mathematics courses at the 300- or 400-level, excluding MATH 398, MATH 399, MATH 411, MATH 412, MATH 444, MATH 445, MATH 497, MATH 498, MATH 499. No more than two courses numbered MATH 380 or MATH 480 may be counted. With approval, two of the six courses may be chosen from appropriate courses offered by other departments. Courses from the Advanced Mathematics core sequences not used to fulfill that requirement may be used to fulfill the elective requirement.
4. Minimum 2.0 grade in all courses presented to satisfy mathematics major requirements. Minimum 2.00 cumulative GPA in all mathematics courses at the University, including course repeats.
5. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through the UW Seattle campus.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minor

Minor requirements (minimum 30 credits)

1. *Core (24-25 credits)*: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 309; or MATH 134, MATH 135, and MATH 136 (25 credits, including 10 advanced-placement credits)
2. *Electives (6 credits)*: mathematics courses numbered 301 or higher
3. At least 9 credits of courses numbered 301 or higher taken in residence through the UW. Minimum 2.0 grade required for each course offered as part of the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of mathematics emphasizes exposure to the core foundational areas of analysis, modern algebra, and geometry. A mathematician's skill set includes the technical tools specific to each area as well as the development of critical thinking skills necessary for logical reasoning. Graduates have pursued careers in teaching, finance, science, engineering, and professional fields such as law and medicine.
- *Instructional and Research Facilities*: Mathematical Research Library and Math Sciences Computing Center
- *Honors Options Available*: With College Honors (Completion of Honors core curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: When available, internship opportunities are passed on to students.
- *Department Scholarships*: None offered.
- *Student Organizations/Associations*: MAA Student Chapter, Actuarial Club, Math Club.

Graduate Program

Graduate Program Coordinator
C36 Padelford, Box 354350
(206) 543-6830
grads@math.washington.edu

The department offers the master of arts, master of science, and doctor of philosophy. Opportunities are available for study of abstract and applied mathematics for each degree program. The MA is appropriate for students who need a broad background in advanced mathematics and who expect to continue working with mathematics of approximately the same level in their careers. The MS is appropriate for students who expect to be working with more specialized mathematics of increasing order of complexity in their careers. The PhD is appropriate for students who plan on a career of research and/or teaching of mathematics at the highest levels.

Of the master's degrees, the MS non-thesis program has the most demanding course requirements and most closely matches the early stages of the PhD program. Most students in the department begin their

studies with the PhD or MS non-thesis program in mind. The MS programs with options in numerical analysis or optimization provide more focused training in these directions, which can be useful for students seeking employment in certain industries; however, students intending to do research in these areas would normally follow the requirements of the PhD program. The department does not offer a master's degree in mathematics education.

Master of Arts

Admission Requirements

BA degree with major in mathematics or equivalent background (minimum 45 quarter credits or 30 semester credits of mathematics beyond college algebra)

Degree Requirements

Master of Arts, Non-Thesis (36 credits): Twelve approved one-quarter courses at the 400 or 500 level, including two courses each in algebra, analysis, and one other field. Must include six courses chosen from designated core graduate courses or, with prior approval, from other 500-level sequences. 500-level courses distributed over no more than three sequences. Transfer credits not accepted at the 400 level; other transfer credits and substitutions accepted at the discretion of the Graduate Program Coordinator.

Written examination. Oral examination may be substituted with prior approval.

Master of Science

Admission Requirements

BS degree with major in mathematics, BA degree with strong major in mathematics or equivalent background. At least one senior-level course in abstract algebra or real analysis.

Degree Requirements

1. *Master of Science, Thesis (36 credits):* Twelve numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586; plus 9 thesis credits (MATH 700). Other courses may be included with prior approval. At least two quarters from each of two designated core graduate courses and one other 500-level sequence. Transfer credits not accepted at the 400 level; other transfer credits and substitutions accepted at the discretion of the Graduate Program Coordinator.

The thesis, defended in an oral examination, should demonstrate ability to do independent research.

2. *Master of Science, Non-Thesis (45 credits):* Fifteen numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other courses may be included with prior approval. At least two quarters from each of two designated core graduate courses, and one three-quarter sequence of 500-level mathematics courses in an approved area of specialization. Transfer credits not accepted at the 400 level; other transfer credits and substitutions accepted at the discretion of the Graduate Program Coordinator.

Oral examination in the area of specialization on a topic agreed upon by the student and the chair of the examining committee, or the general examination for the PhD degree.

3. *Master of Science, Numerical Analysis and Optimization Options, Non-thesis (45 credits)*: Fifteen one-quarter courses, at least six of which are at the 500 level, chosen from MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 438, MATH 439; MATH 441, MATH 442, MATH 443; MATH 461, MATH 462; MATH 491, MATH 492; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other approved courses may be included. Four from AMATH 584, AMATH 585, AMATH 586 and MATH 594, MATH 595, and MATH 596. Transfer credits not accepted at the 400 level; other transfer credits and substitutions accepted at the discretion of the Graduate Program Coordinator.

Oral examination in a special topic agreed upon by the student and the chair of the student's examining committee.

Doctor of Philosophy

Admission Requirements

Mathematical training equivalent to a bachelor's degree with strong major in mathematics, including rigorous coursework in real analysis and abstract algebra.

Degree Requirements

Minimum 90 credits

1. *Core Courses*: Two three-quarter sequences from MATH 504, MATH 505, MATH 506 ; MATH 524, MATH 525, MATH 526 ; MATH 534, MATH 535, MATH 536 ; MATH 544, MATH 545, MATH 546 ; A passing performance in a preliminary examination substitutes for satisfactory completion of the corresponding designated core course. Twelve quarters of 500-level numerically graded courses in mathematics, applied mathematics, or statistics. Approved courses from other departments may be included.
2. *Preliminary Examinations*: Two preliminary examinations. At least one must be in algebra or topology and geometry of manifolds.
3. *Foreign Language/Computer Requirement*: Either one foreign language examination or one computer programming examination, passed by the end of summer quarter after the third year.
4. *General Examination*: Given only after two years of graduate study. Normally taken by the middle of the fourth year.
5. *Thesis*: 27 credits of MATH 800
6. *Final Examination*

Doctor of Philosophy (Mathematics: Advanced Data Science)

Admission Requirements

For current doctoral students who wish to complete Advanced Data Science requirements. See department faculty to discuss admission.

Degree Requirements

109 credits

1. *Core (30 credits)*: Two, three-course sequences from the following:

- a. *Algebra*: MATH 504, MATH 505, MATH 506 (15 credits)
 - b. *Real Analysis*: MATH 524, MATH 525, MATH 526 (15 credits)
 - c. *Complex Analysis*: MATH 534, MATH 535, MATH 536 (15 credits)
 - d. *Manifolds*: MATH 544, MATH 545, MATH 546 (15 credits)
2. *Data Science Foundation (15-16 credits)*
 - a. Either STAT 509 or STAT 512. If STAT 512 taken, consider also taking STAT 513. (4 credits)
 - b. Either CSE 546 or STAT 535 (3 or 4 credits)
 - c. CSE 544 (4 credits)
 - d. CSE 512 (4 credits)
 3. *Data Science Seminar (4 credits)*: CHEM E 599. One credit for each of four quarters
 4. *Electives (33 credits)*: Any 500-level MATH courses except the following: MATH 510, MATH 530, MATH 550, MATH 570, MATH 580, MATH 590, MATH 597
 5. *Dissertation (27 credits)*: MATH 800
 6. *Additional Requirements*: preliminary examination; foreign language/computer requirement; 12 quarters of 500-level numerically graded courses in MATH, AMATH, or STAT

Financial Support

Most graduate students in mathematics are supported by fellowships, research assistantships, and teaching assistantships. The workload of teaching assistants allows ample time for graduate courses and thesis work.

Microbiology

Department Overview

K357A Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

Undergraduate Program

Adviser

K-357A Health Sciences, Box 357735

(206) 543-5824

micro@uw.edu

The Department of Microbiology offers the following programs of study:

- The Bachelor of Science degree with a major in microbiology
- A minor in microbiology

Bachelor of Science

Suggested First- and Second-Year Courses: PHYS 114, PHYS 115, or PHYS 121, PHYS 122; one of the following: MATH 112, MATH 124, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

Department Admission Requirements

1. Minimum 75 credits applicable to graduation, with a minimum 2.00 overall cumulative GPA.
2. Completion of the following prerequisite courses with a minimum 2.50 cumulative GPA: BIOL 180; BIOL 200 (minimum 2.3 grade); BIOL 220; either CHEM 142, CHEM 152, CHEM 162; or CHEM 143 and CHEM 153; either CHEM 223, CHEM 237, or CHEM 335

Major Requirements

Minimum 90 credits (including microbiology courses) in the biological, physical, and mathematical sciences, as follows:

1. Minimum 2.50 cumulative GPA in courses required for admission: BIOL 180; BIOL 200 (minimum 2.3 grade), BIOL 220; either CHEM 142, CHEM 152, and CHEM 162, or CHEM 143 and CHEM 153; either CHEM 223, CHEM 237, or CHEM 335
2. *Core Courses (8 credits)*: MICROM 402; MICROM 410; MICROM 496
3. *Distribution Groups and Electives (28 credits)*: Minimum one course from each of the following four distribution groups; minimum two laboratory courses. Remaining credits from additional courses from the distribution groups or from an approved list of electives. See adviser for approved list
 - a. *Medical Microbiology*: IMMUN 441, MICROM 442 MICROM 443, MICROM 460, or both MICROM 460 and MICROM 461
 - b. *Virology*: MICROM 445 or MICROM 450
 - c. *Diversity and Ecology*: MICROM 412 or MICROM 435
 - d. *Genetics and Molecular Biology*: MICROM 411; or MICROM 431; and either GENOME 361 or GENOME 371
4. Either PHYS 114 and PHYS 115; or PHYS 121 and PHYS 122 (PHYS 116 or PHYS 123 recommended)
5. Either MATH 112, MATH 124, MATH 144, Q SCI 381, STAT 220, or STAT 311
6. Either BIOC 405 and BIOC 406, or BIOC 440, BIOC 441, and BIOC 442
7. All required courses taken for a numerical grade unless course is offered credit/no-credit only. Minimum 2.25 cumulative GPA; minimum 1.8 grade in all MICROM and IMMUN core and elective courses applied to the major
8. Transfer students must complete at least 20 required and elective microbiology credits through the UW.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minor

Minor Requirements: 29 credits as follows:

1. 14 credits to include BIOL 200; one of CHEM 152, CHEM 155, CHEM 162, or CHEM 165; one of CHEM 223, CHEM 237, or CHEM 355.
2. 15 credits from the following: MICROM 410; one from MICROM 302, MICROM 402, MICROM 431, or MICROM 443; and approved 400-level, graded microbiology courses to reach 29 credits. See adviser for approved list.
3. Minimum cumulative 2.00 GPA for all courses counted toward the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal BS degree or qualify to pursue advanced degrees in graduate or professional schools.

Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves.

Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.

- *Instructional and Research Facilities:* Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.
- *Department Scholarships:* The department offers four awards each year. More information is available at the department's website.
- *Student Organizations/Associations:* The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topics such as research and career opportunities, graduate school, and peer teaching.

Graduate Program

Graduate Program Coordinator
K357A Health Sciences, Box 357735
(206) 543-2572
microadv@uw.edu

The department offers a graduate program leading to the doctor of philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

Doctor of Philosophy

Admission Requirements

Background in any biological science discipline. Selection based on evaluation of a student's undergraduate record for indications of ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. Prospective students are strongly advised to seek opportunities to carry out undergraduate research.

Required background courses (generally satisfied prior to entry into the graduate program):

1. Biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
2. Classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
3. General microbiology (equivalent to MICROM 410)
4. Medical microbiology and basic immunology recommended for those considering research in the area of medical microbiology or virology.

Degree Requirements

90 credits minimum, as follows:

1. **Conjoint (6 credits):** See department website for specific courses.
2. **Virology and Bacteriology (6-7 credits):** See department website for specific courses.
3. **Faculty Research Presentations for first-year students:** MICROM 599
4. **Laboratory Rotation:** MICROM 500, minimum three quarters
5. **Journal Club:** MICROM 522, continuous enrollment
6. **Seminar:** MICROM 520 seminar series or attendance at Fred Hutchinson seminars, where students are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.
7. **Additional requirements:**
 - a. Teaching assistant in at least two laboratory courses for undergraduates (usually satisfied in the first and/or second year).
 - b. Minimum two formal lectures given in an undergraduate course (third or fourth year).
 - c. First author on multiple papers related to thesis research published or accepted for publication in refereed journals. Under some circumstances, one first-author publication satisfies this requirement.
8. General examination, dissertation, final examination

Music

School Overview

102 Music

The mission of the School of Music is creation, discovery, preservation, and transmission of a wide and diverse range of music from across time and place. Students, faculty, and staff of the School of Music work together to expand the frontiers of artistic knowledge through the creative processes of performance, composition, and scholarly research.

The school's faculty includes leading performers, composers, and scholars. Renowned guest artists and scholars regularly perform and teach. Through its instructional offerings, the School of Music provides opportunities for all UW students to explore the role of music in cultures of the world -- past, present, and future. The school teaches students to think creatively and critically. The faculty provides professional training to musical performers, composers, and academic scholars. The school's ultimate goal is to inspire students to reach the highest standards and ideals of excellence in both artistic and scholarly endeavors.

The school is a vital part of the artistic and scholarly life of the UW and plays a prominent role in Seattle and greater Pacific Northwest music and art communities. The school also offers each year over 100 public concerts of music spanning more than a millennium, with offerings that extend across many cultures.

Undergraduate Program

Adviser

116 Music, Box 353450

(206) 543-1239

musicadv@uw.edu

The School of Music offers the following programs of study:

- Bachelor of Arts degree with a major in music (plus music history option; voice option; instrumental track; early music option; music theory option)
- Bachelor of Arts degree with a major in American music studies
- Bachelor of Music degree with a major in composition, piano, string instruments, voice, organ, orchestral instruments, guitar, jazz studies, percussion (with options in orchestral percussion and in contemporary percussion and mallet keyboard), and music education; and an option in music history.
- Bachelor of Arts degree with a major in ethnomusicology.
- Minor in music

Information Applicable to All Music Majors

Department Admission Requirements

Admission is competitive to all music programs. All students must participate in an entrance audition or submit an application and satisfy the requirements of each degree program or track for admittance. Check department website for entrance audition dates. Major status in performance areas is accorded when, after admission to the College of Arts and Sciences is acknowledged and the required School of Music audition is successfully completed, the student commences applied-music study in a performance medium (e.g., voice) with an approved faculty member of the School of Music. In American music studies, music education, composition, and ethnomusicology, additional entrance requirements apply.

All music programs require instruction on an instrument. Auditions into freshman-level applied-music instruction (private lessons) are based on the assumption that a student's background includes four to eight years of private study on an instrument. Completion of a further two years of college-level private instruction does not automatically guarantee entry at the junior level of private instruction; placement is determined by an audition.

Most degree programs in the School of Music require one to two years of basic piano, to be completed during the course of study at the University.

Theory and Ear Training Preparation

In preparation for theory and ear training coursework, all students must be evaluated by placement test to determine their levels in music theory and music history. Students who have minimal background in these areas may be required to take MUSIC 113/MUSIC 119 and MUSIC 120.

Transfer students who have had at least two quarters of music theory or music history are evaluated by a faculty member the quarter they are admitted to their program.

Grade Requirements

Undergraduate music majors are required to earn a minimum 2.0 grade in each course (core and elective) counted toward music major requirements. An overall 2.50 minimum GPA in music coursework is required for graduation.

Bachelor of Arts

General Requirements

Minimum 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Minimum cumulative 2.50 GPA for all music courses and a minimum 2.0 grade for each music course counted toward the major.

Major Requirements

1. *Music (63 credits):* MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/ MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 6 credits approved upper-level MUSIC or MUHST electives, 6 credits approved 300- or 400-level MUSAP, MUSEN, MUSIC, or MUHST courses, 10 credits MUSICP vocal or instrumental private applied instruction, 5 credits MUSEN (ensembles)

2. *Instrumental Track (69 credits)*: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 6 credits approved upper-level MUSIC or MUHST electives, 18 credits MUSICP instrumental private applied instruction, and 9 credits in ensembles
3. *Voice Option (75 credits)*: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course, plus 6 credits approved upper-level MUSIC or MUHST electives, 18 credits MUSICP vocal private applied instruction, 6 credits vocal diction, and 9 credits in ensembles. Proficiency through the third quarter college level in two languages from French, German, and Italian
4. *Early Music Option (66 credits)*: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 15 credits approved 300- and 400-level electives, selected from MUHST 400, MUHST 401, MUHST 406; MUSIC 418, MUSIC 421; MUSEN 369, MUSEN 383, and other approved 300- or 400-level courses. 10 credits MUSICP vocal or instrumental private applied instruction, 5 credits MUSEN (ensembles). Students are strongly encouraged to take 10 credits in pre-1700 literature, art history, and history courses as part to their VLPA requirement.
5. *Music History Option (69 credits)*: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 12 credits approved 400-level MUHST electives; 6 credits approved 300- or 400-level music theory or MUHST courses; 10 credits MUSICP vocal or instrumental private applied instruction; 5 credits MUSEN (ensembles). Students must earn a minimum 2.00 cumulative GPA for all required MUHST courses.
6. *Music Theory Option (63 credits)*: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; MUSIC 470, MUSIC 471, and minimum 6 credits selected from MUSIC 472, MUSIC 485, MUSIC 487, and/or MUSIC 489; 10 credits MUSICP vocal or instrumental private applied instruction; 5 credits MUSEN (ensembles)

Bachelor of Arts (with major in American music studies)

Study of the regional, racial, ethnic, sacred, secular, communal, and cultural diversities represented in the music of the Americas. Students are strongly encouraged to formulate individual programs under the guidance of faculty mentors. Interdisciplinary approaches, both within music or between music and other areas of study, serve as a primary focus of the program. In addition to major requirements, students must also complete general education requirements for the College of Arts and Sciences.

Admission Requirements

Admission is competitive. Meeting minimum grade and course requirements does not guarantee admission. Minimum 3.0 grade in two of the following courses: MUSIC 160, MUSIC 161, MUSIC 162, MUSIC 216, MUSIC 250, MUSIC 317, MUSIC 325, MUSIC 331, or MUHST 212. Minimum 2.50 cumulative GPA. Admission is based on student's transcripts, musical ability, and statement of purpose, which should explain the student's interest and intent, specifying the direction of study the students wishes to take and indicating the desired outcome(s) in terms of specialized knowledge and skills, and possible career directions(s).

74 credits

1. Core courses (30 credits): MUSIC 201, MUSIC 202, MUSIC 203, MUSIC 204, MUSIC 205, MUSIC 206, MUSIC 216, MUSIC 250, MUSIC 331, MUSIC 498, MUHST 212
2. Minimum 6 credits MUSEN ensembles
3. Minimum 23 credits approved American music studies electives with at least one course from each of the following lists: theory/music analysis; comparative perspective; and ethnomusicological/cultural. See adviser for approved lists.
4. Interdisciplinary electives (15 credits): upper-division non-music electives selected with faculty mentor, with permission of offering department
5. Minimum 2.50 cumulative GPA in music courses applied to the major
6. Minimum 2.0 grade in music courses applied to the major

Bachelor of Arts (with a major in ethnomusicology)

The BA degree with a major in ethnomusicology emphasizes the study of music as culture as well as art. Students may be admitted to the degree program on the basis of a written application. Course requirements include selected courses in the School of Music's core curriculum, ethnomusicology courses encompassing diverse repertoires and topics, several interdisciplinary courses including at least one in socio-cultural anthropology, world music performance study, and a capstone senior project. In addition to the ethnomusicology major requirements, students must also complete the general education requirements for the College of Arts and Sciences.

Admission Requirements

Admission is competitive. Minimum 3.0 grade in either MUSIC 251 or MUSIC 252, minimum 2.0 grade in each MUSIC course taken, and minimum 2.50 cumulative GPA. Admission is based on the student's transcript(s), musical interests, and statement of purpose, which should explain the student's interest in ethnomusicology and potential areas of specialization.

Major Requirements

51-67 credits

1. Core courses (33-39 credits): MUSIC 201, MUSIC 202, MUSIC 203, MUSIC 204, MUSIC 205, MUSIC 206, MUSIC 251, MUSIC 252, MUSIC 499 (5 credits), and minimum six quarters of MUSEN 389 and/or MUSAP 389 (6-12 credits)
2. Ethnomusicology electives (9-15 credits): minimum three 400-level ethnomusicology courses from approved list
3. Sociocultural anthropology elective (3 credits): minimum one sociocultural anthropology course from approved list
4. Interdisciplinary electives (6-10 credits): minimum two interdisciplinary electives from approved list
5. Minimum 2.00 cumulative GPA in courses applied to the major

Bachelor of Music

Admission Requirements

All students must participate in an entrance audition as described above. Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years. The composition and music education programs have additional application requirements as described below.

General Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Knowledge, to include at least 20 credits each in two of the following three areas: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements (and Additional Admission Requirements, as noted)

Composition (114-120 credits)

Additional Admission Requirements: MUSIC 302 and MUSIC 305; MUHST 212; and MUSIC 216, MUSIC 217, MUSIC 218. Prospective students must also submit a portfolio of recent compositions. See adviser for more information on the application process.

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus MUSIC 216, MUSIC 217, MUSIC 218; PHYS 207; 18 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 380, MUSIC 381, MUSIC 382; MUSIC 400 or MUSIC 401; MUSIC 471 or MUSIC 472; MUSIC 490; 18 credits of private instruction in composition (MUSIC 391/MUSIC 491); 12-18 credits of MUSICP applied instruction; 6 credits of MUSEN ensembles; and one 400-level course in ethnomusicology. See undergraduate adviser for more specific information.

Guitar (120 credits)

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; and at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487 or MUSIC 438; 36 credits of MUSICP applied instruction; 7 credits of electives; 2 credits of recitals; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 380, MUSIC 381, MUSIC 382; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Jazz Studies (120 credits)

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 319 or MUSIC 331; MUHST 425; MUSIC 336 and MUSIC 436; MUSIC 467, MUSIC 468, MUSIC 469; MUSIC 379, MUSIC

479; 6 credits of MUSIC 464; 10 credits of music electives; 30 credits of MUSICP applied instruction; 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Music Education (115-119 credits)

Additional Admission Requirements: Students must complete a separate music education audition and interview. See adviser for more information on the application process.

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus MUSIC 350, MUSIC 351, MUSIC 352 (or MUSIC 380, MUSIC 381, MUSIC 382); MUSED 301; MUSED 304, MUSED 305; MUSED 340; MUSED 403; MUSED 405 (or MUSEN 303); MUSED 440; MUSED 442 (or MUSED 443); MUSED 452; MUSED 465; 18 credits of MUSICP applied instruction; 6-7 credits of MUSEN ensembles; 12-14 credits of techniques courses; 3 credits of approved jazz coursework; EDC&I 494; and 3 credits of education electives. See undergraduate adviser for more specific information.

Orchestral Instruments (116 credits)

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 12 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSICP applied instruction; 18 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Organ (120 credits)

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306, MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course, plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSICP applied instruction; MUSIC 454; MUSIC 473 and MUSIC 474; MUSIC 458 and MUSIC 459; MUSIC 350, MUSIC 351, MUSIC 352; 1 credit of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Piano (120 credits)

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course, plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSICP applied instruction; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 326, MUSIC 327, MUSIC 328; 7 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Percussion (111 credits)

MUSIC 201, MUSIC 202, MUSIC 203, MUSIC 204, MUSIC 205, MUSIC 206, MUSIC 301, MUSIC 302, MUSIC 303; MUSIC 304, MUSIC 305, MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from MUSIC 250, MUSIC 251, MUSIC 252, or any 400-level ethnomusicology course; minimum 18 credits from MUSICP 337; MUSIC 379; MUSIC 479; minimum 18 credits from MUSICP 437; minimum 12 credits of MUSEN 304; minimum 12 credits from MUSEN 300, MUSEN 301, or MUSEN 302; minimum

1 credit from MUSEN 384, MUSEN 389, MUSEN 410, or MUSEN 411; 12 credits of approved upper-division MUSIC or MUHST electives.

Strings (105 credits)

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 15 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSICP applied instruction; MUSIC 380; 3 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Voice (119 credits)

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 307, MUSIC 308, MUSIC 309; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434; MUSIC 460, MUSIC 461, and MUSIC 462; MUSIC 379 and MUSIC 479; 36 credits of MUSICP applied instruction; 10 credits of MUSEN ensembles; and 3 credits of music electives. Proficiency through the third quarter college level in two languages from French, German, and Italian. See undergraduate adviser for more specific information.

Academic Options

Music History

Admission Requirements: In addition to the admission requirements for all music majors, shown above, formal application to the music history division, to include verified completion of core courses, 3.00 GPA in core courses, 3.00 overall GPA, and a writing sample. Completion of minimum entrance requirements does not guarantee admission. The program of study and preparation of the senior thesis is developed in consultation with a music history faculty adviser. Students who intend to pursue graduate studies are strongly advised to establish proficiency in German or French and to acquire some acquaintance with one or two additional foreign languages.

Major Requirements: 135 credits as follows: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 6 credits of 300-level MUHST electives; 36 credits of 400-level MUSIC or MUHST electives; a 3-credit, 400-level course in ethnomusicology; 3 credits of MUSIC 498; 18 credits of MUSICP applied instruction (3 years); 9 credits of MUSEN ensembles; and 24 credits of music electives.

Minor

Minor Requirements: Minimum 25 credits of music courses (MUSIC, MUHST, MUSEN, MUSAP, or MUSED prefixes). Maximum 10 credits at the 100 level, minimum 15 credits at the 200 level or above including:

1. At least 4 credits from courses dealing with the elements of music (chosen from MUSIC 116, MUSIC 117, MUSIC 118, MUSIC 113/MUSIC 119, or MUSIC 120).

2. 5 credits from courses for non-majors that focus on a particular music area (MUSIC 121, MUSIC 122, MUSIC 160, MUSIC 162, MUSIC 316, MUSIC 317, MUSIC 318, MUSIC 319, MUSIC 331).
3. Maximum 10 transfer credits (including maximum 5 transfer credits in performance lessons and ensembles) may count toward the minor.

Student Outcomes and Opportunities

- *Instructional and Research Facilities:* None.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* None.
- *Department Scholarships:* None.
- *Student Organizations/Associations:*
 - *Music Student Association (MSA):* A group of undergraduate and graduate students from various divisions of the School of Music, working to foster a stronger sense of professional community, serve the larger cultural community, and build practical tools for encouraging and promoting student musicians' endeavors. For more information, contact sonare@uw.edu.
 - *Ethnomusicology Student Association:* A student association which deals with the concerns of the ethnomusicology division, as well as meeting socially. For further information, contact the division at 206-543-0949 or 64 Music Building.
 - *Music Educators National Conference (MENC):* A local chapter of this national scholarly organization of music educators is directly involved in annual state and regional meetings and events. Contact Professor Patricia Campbell (pcamp@uw.edu) for further details.

Of Special Note:

Continuation of Major Status

Performance studies should begin after audition and acceptance, and continue each subsequent quarter of registration until the minimum program requirements for applied-music lessons have been met. Applied-music study should continue as long as the student is registered and in residence until the final approved recital is given. In order to retain major standing, the student must make and demonstrate consistent and acceptable progress at the annual required jury. Concurrent enrollment or participation in at least one School of Music ensemble is required during each quarter in which a student receives MUSAP (applied-music) instruction, at the 300 level and above, except for MUSAP 389/589. Also, basic piano proficiency is required for all majors. Non-keyboard majors must enroll in the MUSAP 133/235 series until appropriate proficiency is attained. Any departure from the above requirements must have the recommendation of the appropriate program chair and the written consent of the Director of the School of Music.

Graduate Program

Graduate Adviser
116 Music, Box 353450
206-543-2726
musicadv@uw.edu

Graduate programs in the School of Music take into consideration the dual nature of music's subject matter. First, it is one of the creative arts, requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development. Each degree focuses on one of these areas.

Master of Music or Doctor of Musical Arts

- Choral conducting
- Composition
- Instrumental conducting
- Jazz studies and improvised music
- Opera production
- Performance piano, organ, harpsichord, voice, strings, brass, woodwinds, percussion, harp

Master of Arts or Doctor of Philosophy

- Ethnomusicology
- Music education
- Music history
- Music theory

Master of Arts

Admission Requirements

1. A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a bachelor's degree in music or the equivalent experience and training in the field.
2. Minimum GPA of 3.00 or B average in the most recent two years of study.
3. Scores from the Graduate Record Exam (GRE), unless the applicant holds an earned doctorate from an accredited institution
4. International Applicants
 - International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores is 90.

Degree Requirements

45 credits minimum, as follows:

1. 45 credits as specified for the student's particular degree program; of these, 18 credits must be numerically graded and 18 credits must be at the 500-level
2. Proficiency in a foreign language as required by the degree program
3. Thesis, as required by the degree program
4. All work for the degree completed within six years, to include applicable work transferred from other institutions (max. 6 credits transferable) and time spent on leave.

Master of Music

Admission Requirements

1. A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a bachelor's degree in music or the equivalent experience and training in the field.
2. Minimum GPA of 3.00 or B average in the most recent two years of study.
3. (Only if applying to Composition): Scores from the Graduate Record Exam (GRE), unless the applicant holds an earned doctorate from an accredited institution.
4. International Applicants
 - International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores is 90.

Entrance Auditions: Before acceptance into a performance-based School of Music graduate program, applicants need to pass an entrance audition in their major performance area.

Degree Requirements

All students in the performance degree programs (MM, DMA) are expected to enroll in music applied lessons (MUSICP courses at the 500-level) until all recital requirements are met. The School of Music requires that all students registered for music applied lessons must also be enrolled in an ensemble (MUSEN 5XX).

Minimum 45 credits, to include:

1. Minimum 45 credits as specified for the student's particular degree program; of these credits, 18 credits must be numerically graded and 18 credits must be at the 500-level
2. Oral master's examination
3. All work for the degree completed within six years, to include applicable work transferred from other institutions (max. 6 credits transferable) and time spent on leave.

Doctor of Music Arts

Admission Requirements

1. Generally a master's degree or equivalent in the same field of music or music performance from an accredited U.S. institution or its equivalent from a foreign institution.
2. Minimum GPA of 3.00 or B average in the most recent two years of study.

3. (Only if applying to Composition): Scores from the Graduate Record Exam (GRE), unless the applicant holds an earned doctorate from an accredited institution.
4. International Applicants
 - International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum score is 100.

Entrance Auditions: Before acceptance into a performance-based School of Music graduate program, applicants need to pass an entrance audition in their major performance area.

Degree Requirements

All students in the performance degree programs (MM, DMA) are expected to enroll in music applied lessons (MUSICP courses at the 500-level) until all recital requirements are met. The School of Music requires that all students registered for music applied lessons must also be enrolled in an ensemble (MUSEN 5XX).

Minimum 90 credits, to include:

1. Minimum 90 credits of resident study with at least 60 registered credits from the UW
2. Reading knowledge of one or more foreign languages as required by the particular degree program
3. Performance requirements as specified
4. General examination for admission to candidacy consisting of written and oral examinations.
5. Dissertation which is a significant contribution to knowledge in a specific field and which clearly indicates training and research
6. Final examination devoted to the dissertation in the field with which it is concerned
7. All work for the degree completed within ten years. Applicable work from the master's degree and work transferred from the other institutions must fall within the ten-year period, including time spent on leave and away from the program. Up to thirty credits from an approved master's degree may be counted toward the 90 credits required for the degree. (Master's degree credits are applied toward the general elective requirements of the degree plan.)

Doctor of Philosophy

Admission Requirements

1. Generally a master's degree or equivalent in the same field of music or music performance from an accredited U.S. institution or its equivalent from a foreign institution.
2. Minimum GPA of 3.00 or B average in the most recent two years of study.
3. Scores from the Graduate Record Exam (GRE), (except for Ethnomusicology), unless the applicant holds an earned doctorate from an accredited institution
4. International Applicants
 - International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum score is 100.

Degree Requirements

Minimum 90 credits, to include:

1. Minimum 90 credits of resident study with at least 60 registered credits from the UW
2. Reading knowledge of one or more foreign languages as required by the particular degree program
3. Performance requirements as specified for the particular degree
4. General examination for admission to candidacy consisting of written and oral examinations. Dissertation which is a significant contribution to knowledge in a specific field and which clearly indicates training and research
5. Final examination devoted to the dissertation in the field with which it is concerned
6. All work for the degree completed within ten years. Applicable work from the master's degree and work transferred from other institutions must fall within the ten-year period, including time spent on leave and away from the program. Up to thirty credits from an approved master's degree may be counted toward the 90 credits required for the degree. (Master's degree credits are applied toward the general elective requirements of the degree plan.)

Financial Aid

A limited number of teaching and staff assistantships (including accompanying) are available. Competitive auditions for performance scholarships for new and returning students are held each year. See the school's Website (above) for more information about applications and audition dates.

Research Facilities

The Music Building contains the music library, an electronic composition laboratory, a listening center, and the ethnomusicology archives, as well as the studio, practice, and classroom facilities of a modern music department.

Ensembles available for student participation include University Symphony Orchestra, University Chorale, Opera Chorus, Contemporary Group, Wind Ensemble, University Symphonic Band, Studio Jazz Ensemble, Baroque Ensemble and Chamber Singers, as well as non-Western ensembles with visiting artists from around the globe.

Near Eastern Languages and Civilization

Department Overview

229 Denny

Near Eastern languages and civilization focuses on the languages and civilizations of the Near East with an emphasis on the ancient and medieval roots of these civilizations as well as more recent cultural developments. Each language offered represents a major literary tradition. Arabic, Persian, Turkish, and Central Asian Turkic are the languages of the most significant literary manifestations of Islamic civilization. Hebrew and Aramaic are the languages of the Bible and are central to Judaism and Jewish culture. Egyptian languages (Coptic, hieroglyphic) and other Mesopotamian and Mediterranean languages (Akkadian, Ugaritic, Phoenician) are important to the ancient and Christian cultures of the Near East. These languages are taught in conjunction with courses on the social, cultural, and religious history of the Near East, providing students with a broad understanding and solid foundation for more advanced studies or professional career development.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The department offers the following programs of study:

- The Bachelor of Arts degree with a major in Near Eastern studies with options in Near Eastern languages and cultures, Near Eastern comparative civilizations, comparative Islamic studies, and Biblical and ancient Near Eastern studies
- A minor in Near Eastern languages and civilization

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses in any discipline that deals with the Near East. Courses in writing, history, literature, comparative religion, French, and German are also recommended. Students should begin their studies of Near Eastern languages as soon as possible.

Department Admission Requirements

Students in good academic standing may declare this major at any time. Admission to the comparative Islamic studies option is suspended through spring, 2015.

Major Requirements

Near Eastern Studies -- Languages and Cultures

69 credits as follows:

1. Gateway Course (5 credits): NEAR E 101

2. One introductory (200 level) course on the Near East (5 credits)
3. Primary Language (30 credits): Two years of one Near Eastern language, or its equivalent as evidenced by examination
4. Advanced level coursework in primary language (10 credits): Advanced literature or text courses in primary language
5. Senior Seminar (2 credits): NEAR E 491
6. Near East Electives (20 credits): Supporting coursework from the following categories: advanced literature: 300- or 400-level courses from NEAR E or language prefixes; second Near Eastern language (must not exceed 15 credits); approved relevant exceptions from other departments (must not exceed 15 credits). NEAR E 498 may be used toward this requirement.
7. At least 22 of the 72 required credits must be taken in residence through the department.

Near Eastern Studies - Comparative Civilizations

72 credits as follows:

1. Gateway Course (5 credits): NEAR E 101
2. One introductory (200 level) course on the Near East (5 credits)
3. Primary Language (30 credits): Two years of one Near Eastern language, or its equivalent as evidenced by examination
4. Senior Seminar (2 credits): NEAR E 491
5. Senior essay on a topic of Near Eastern civilization (5 credits): NEAR E 498
6. Near East Electives (25 credits): Supporting coursework at the 300 level or above (maximum 15 credits of approved exceptions)
7. At least 22 of the 72 required credits must be taken in residence through the department.

Near Eastern Studies - Comparative Islamic Studies

Admission to this option is suspended through spring, 2015.

70 credits as follows:

1. Two years of one of the following languages or its equivalent as evidenced by examination: Arabic, Persian, Turkish, Uzbek, Kazakh, or other appropriate languages with approval of adviser
2. NEAR E 210
3. NEAR E 212 or NEAR E 240
4. An approved program of 10 credits in courses in Islamic religious traditions and texts, and 15 credits in history, society, and culture of Islam
5. A senior essay on a topic in comparative Islamic studies (5 credits).

Near Eastern Studies -- Biblical and Ancient Studies

72 credits as follows:

1. Gateway Course (5 credits): NEAR E 101

2. NEAR E 201 and NEAR E 202
3. Two years of Biblical Hebrew or its equivalent as evidenced by examination. Alternatively a student may satisfy this language requirement by combining a minimum four quarters of Biblical Hebrew with two quarters of other ancient Near Eastern languages, including Aramaic, Ge'ez, hieroglyphic Egyptian, Coptic, Akkadian, second-year Greek, or other appropriate languages as approved by adviser and/or faculty (30 credits)
4. Senior Seminar (2 credits): NEAR E 491
5. Near East Electives (25 credits): Supporting coursework from the following categories: advanced literature - 300- or 400-level courses from NEAR E or language prefixes; second ancient Near Eastern language (must not exceed 15 credits); approved relevant exceptions from other departments (must not exceed 15 credits). NEAR E 498 may be used toward this requirement.
6. A senior essay on a topic in Biblical and ancient Near Eastern studies (5 credits)
7. At least 22 of the 72 required credits must be taken in residence through the department.

Minor

Minor Requirements: 30 credits as follows:

1. NEAR E 101 (5 credits)
2. Two introductory courses (200-level) on the Near East (10 credits)
3. 15 additional credits from Near Eastern civilization or advanced-level language courses (may not include language courses at the beginning or intermediate level).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The NELC undergraduate degree offers a liberal arts education with a particular focus on the study of cultures and languages of the Near East and Central Asia. Educational outcomes from this degree serve a broad spectrum of undergraduates, ranging from those intending to begin the acquisition of specific linguistic and cultural proficiencies for the purpose of pursuing some career, academic or otherwise, related to these regions, to students for whom the Near East and/or Central Asia are regions with histories and cultures that are of special intellectual or personal interest. Students often combine Near Eastern studies as a double major with some other degree program that may be in a quite different discipline. For these students the NELC undergraduate major offers the important opportunity, as a core element in a broader liberal arts education, for expanding their cultural vision and understanding in ways made possible only through serious study of a language and literature other than one's own. Graduates from the BA degree have followed a wide range of post-baccalaureate paths, including further graduate study in the humanities or social sciences, professional degree programs in law or medicine, and employment with government or non-governmental organizations.
- *Instructional and Research Facilities:* The department draws on collections of books, serials, and other resources in the UW libraries that are unusually rich in the quantity and quality of items relating to Near Eastern and Central Asian languages and cultures. Students in the department's language classes make use of the University's well-equipped Language Learning Center.
- *Honors Options Available:* With College Honors (Completion of Honors core curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Undergraduate research is carried out under the supervision of faculty members. Students can also undertake research and internship opportunities while studying abroad.
- *Department Scholarships:* See departmental website for most current information.

- *Student Organizations/Associations:* There are no formal student organizations in the department, but the department frequently sponsors educational and cultural events organized by students and faculty involved in interest groups such as the Central Asian Circle or the Persian Circle.

Graduate Program

Graduate Program Coordinator
M25 Denny, Box 353120
(206) 543-6033
neareast@uw.edu

Master of Arts

The department offers a graduate program of studies leading to the master of arts degree, designed to provide students advanced training in at least one Near Eastern language and in a field of specialization. Students may concentrate in Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended both for students who wish to continue their studies at the doctoral level and for students who wish to pursue careers in government or business.

Admission Requirements

1. Statement of purpose
2. Sample of written academic work
3. Three letters of recommendation, of which at least two must attest to scholarly ability
4. Official transcripts from all collegiate institutions attended
5. Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years' study of the language in which they plan to concentrate.
6. Bachelor's degree from an accredited institution
7. Minimum 3.00 (or B) GPA for last 90 quarter (60 semester) credits
8. GRE scores
9. TOEFL scores for international students

Degree Requirements

36 credits

1. Reading knowledge of French or German; or, with prior approval of the student's MA committee, any other language pertinent to the student's research. To satisfy this requirement, the student normally passes a reading examination before beginning the second year of study.
2. A seminar paper representing the student's best work
3. Coursework determined in consultation with M.A. committee to prepare for written examinations.
4. A written examination consisting of four parts: (1) general culture of the Near East, (2) student's field of specialization, (3) student's language of concentration, (4) second Near Eastern language related to the language of concentration

Doctor of Philosophy

Some department faculty are part of an interdisciplinary faculty group which offers doctoral study in Near and Middle Eastern studies. See the Interdisciplinary Graduate Degree Programs section of this catalog.

Summer Programs

The department offers summer intensive language programs in Arabic, Hebrew, and Central Asian languages (Uzbek, Kazakh, Tajik, and others).

Research Facilities

UW libraries hold an extensive collection of books and materials in languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. The library participated in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials. Library staff includes Near East and Central Asia specialists. The library maintains book exchanges with the Central Asian republics, handled through the Near East and Slavic sections of the University's Suzzallo Library. Staff include an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the East Asia Library.

Financial Aid

A limited number of teaching assistantships are available for graduate students fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

Exchange Agreements

The department participates in exchange programs, sending students abroad and training students from institutions overseas. Formal UW exchange agreements exist with several universities in North Africa and the Middle East, such as American University in Cairo; Al-Akawayn University in Ifrane, Morocco; Yarmouk University and Mu'tah University in Jordan; American University in Beirut; Hebrew University in Jerusalem; and Bogazici University in Istanbul. Department-level exchange agreements have also existed with Xinjiang University in Urumchi, China (for Uighur, Kazakh, Kirghiz), or institutions in Central Asia such as Tashkent State University, the Humanities University of Bishkek, Kyrgyzstan, or Kyrgyz State National University, Bishkek. NELC students also study at institutions in which there are not currently formal exchanges, such as the University of Damascus (for the study of Arabic and related subjects).

Neuroscience

Program Overview

318 Hitchcock

Neuroscience offers students an intense introduction to the study of nervous systems. Faculty in both the College of Arts and Sciences and the School of Medicine teach courses in the major. Students study the cellular and molecular properties of single nerve cells and the connections among them and learn how these properties determine animal behavior and human disease.

Undergraduate Program

Adviser

318 Hitchcock, Box 355320
(206) 616-3982

Neuroscience offers the following program of study:

- The Bachelor of Science degree with a major in neuroscience

Bachelor of Science

Program Admission Requirements

Applicants are considered in the following groups: Direct Freshman Admission and Regular Admission. Admission is capacity constrained; meeting minimum standards guarantees consideration but not acceptance. Application deadline is the second Friday in October each year except for Direct Freshman Admission.

Direct Freshman Admissions

The department enrolls up to 15 percent of its incoming class directly from high school. Students accepted to the UW who indicate neuroscience as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school and generally have received a minimum 1400 on the SAT (mathematics and verbal sections) or a minimum 30 on the ACT. Admission is for autumn quarter only.

Regular Admission

1. BIOL 180, BIOL 200, BIOL 220, with minimum 2.0 grade in each
2. Completion of most supporting coursework in physics, math, and chemistry recommended (see specific course lists, below), with minimum 2.50 GPA in any such work completed at time of application

Major Requirements

Minimum 86 credits

1. *Supporting coursework (minimum 48 credits):*

- a. *Chemistry*: One of the following three sequences: CHEM 120, CHEM 220, CHEM 221; CHEM 142, CHEM 152 (or CHEM 143, CHEM 153), CHEM 223 CHEM 224; CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165), CHEM 237, CHEM 238, CHEM 239 (or CHEM 335, CHEM 336, CHEM 337). Third sequence recommended. Organic chemistry laboratories not required. (15-27 credits)
 - b. *Physics*: Pathway 1 - PHYS 114, PHYS 115; Pathway 2 (recommended) - PHYS 121, PHYS 122. (8 to 10 credits)
 - c. *Mathematics*: Two quarters of calculus (MATH 124, MATH 125, or Q SCI 291, Q SCI 292) (10 credits)
 - d. *Introductory Biology (minimum 15 credits)*: BIOL 180, BIOL 200, BIOL 220 (15 credits)
2. *Introduction to Neuroscience (10 credits)*: NEUSCI 301, NEUSCI 302.
 3. *Advanced courses in neuroscience (12 credits)*: NEUSCI 401, NEUSCI 402, NEUSCI 403, NEUSCI 404.
 4. *Electives*: Minimum 16 credits from a wide variety of 400-level courses in the biological sciences. See adviser for list of courses. Courses not listed may be allowed with permission of program director. Students may apply up to 7 credits of undergraduate research toward the 16 elective credits.
 5. Minimum cumulative 2.00 GPA for courses applied to the major.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Throughout the core sequence of neuroscience, students gain a deep understanding of the basic concepts of nervous system function and learn many of the basic techniques used to study nerve cells. Students also learn how to analyze neurophysiological data, and compose and present results. Graduates pursue careers in medicine, public health, education, pharmaceutical sales, computing, and graduate study.
- *Instructional and Research Facilities*: Laboratories are required with introductory courses. (NEUSCI 301 and NEUSCI 302). The program offers state-of-the-art facilities and equipment for each course.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: Most neuroscience students participate in undergraduate research with faculty from both the College of Arts and Sciences and the School of Medicine.
- *Program Scholarships*: None offered.
- *Student Organizations/Associations*: Neuroscience Student Club; Alpha Epsilon Delta, the national premedical honorary society.

Philosophy

Department Overview

361 Savery

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

Undergraduate Program

Adviser

361 Savery, Box 353350

(206) 543-5855

philadv@uw.edu

The department offers the following programs of study:

- Bachelor of Arts degree with a major in philosophy and an option in ethics
- Bachelor of Arts degree with a major in history and philosophy of science, offered jointly with the [Department of History](#)
- A minor in philosophy

The department also administers the interdisciplinary minor in [ethics](#).

Bachelor of Arts

Philosophy

Suggested First- and Second-Year College Courses: Introductory courses in symbolic logic, social philosophy, major problems of philosophy, and history of philosophy. Courses to develop writing, language, and analytic skills.

Department Admission Requirements

Minimum 2.00 cumulative GPA and completion of 10 credits of philosophy coursework

Major Requirements

50 credits

1. One course from PHIL 115, PHIL 120, or an upper-division course in logic
2. One course from PHIL 320, PHIL 330, PHIL 335, or PHIL 340 (undergraduate adviser must approve substitutions)

3. One course from PHIL 322, PHIL 332, PHIL 342, or 400-level courses in the same areas (undergraduate adviser must approve substitutions)
4. At least four UW philosophy courses at the 400 level, excluding PHIL 484
5. At least 25 credits through the UW
6. Minimum 2.00 cumulative GPA for all philosophy courses taken

Ethics Option

Minimum 50 credits

1. Minimum 25 credits from approved list of ethics and justice-related courses. See department for approved course list.
2. One from PHIL 115, PHIL 120, or upper-division course in logic (5 credits)
3. One from PHIL 320, PHIL 330, PHIL 335, or PHIL 340. Adviser must approve substitutions (5 credits)
4. One from PHIL 322, PHIL 332, PHIL 342, or 400-level course in the same areas. Adviser must approve substitutions (5 credits)
5. Minimum four UW 400-level philosophy courses, excluding PHIL 484, two of which must be from approved list of ethics and justice-related courses (12-20 credits)
6. Minimum 25 credits taken through UW
7. Minimum 2.00 cumulative GPA for all philosophy courses taken

History and Philosophy of Science

Suggested First- and Second-Year College Courses: PHIL 120, PHIL 160. Courses that develop writing skills. Introductory science courses and mathematics courses through calculus.

Department Admission Requirements

1. HSTCMP 311, HSTCMP 312; PHIL 160 or PHIL 460; PHIL 120, each with a minimum 2.0 grade
2. Completion of 10 credits toward the Natural World (science) requirement (see below), each course with a minimum 2.0 grade
3. Minimum UW 2.00 GPA
4. Completion of 10 credits of composition/writing courses with a minimum 2.0 grade for each course. This requirement may be met by freshman English composition courses, "W" courses, or any courses in which the student has written a graded paper (to be reviewed by HPS faculty) of at least 10 pages.

Major Requirements

85 credits

1. *Core Courses (25 credits):* HSTCMP 311, HSTCMP 312, HSTCMP 390; PHIL 160 or PHIL 460; PHIL 120. Minimum 2.0 grade in each course and overall minimum 2.50 GPA.
2. *Electives:* 25 credits from the following, of which at least 10 must be PHIL courses and at least 5 must be HIST courses (or others upon petition): ESS 404, HIST 211, HIST 215, HIST 310, HIST 313 (or ASTR 313), HIST 314, HIST 315, HIST 316, HIST 317 (also MHE 422), HIST 318 (also

MHE 424), HIST 412; PHIL 243, PHIL 350, PHIL 360, PHIL 406, PHIL 450, PHIL 460 (if PHIL 160 taken), PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, PHIL 483. Minimum 2.0 grade in each class.

3. *Capstone (5 credits)*: Completion of HPS 400, with a minimum 2.0 grade
4. *Science Component*: 30 credits Natural World (NW) courses from anthropology, astronomy, atmospheric sciences, biology, chemistry, computer science, earth and space sciences, economics, environmental studies, mathematics, physics, psychology, and sociology, with a minimum 2.50 GPA in these courses and a minimum 2.0 grade in each course. At least 15 of the credits must be outside mathematics.

Minor

Minor Requirements: 30 credits

1. PHIL 115 or PHIL 120, or an upper-division course in logic
2. At least 15 UW philosophy credits at the 300 level or above, excluding PHIL 484.
3. 10 philosophy elective credits at any level

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Graduates of the Department of Philosophy acquire considerable skills in abstract thinking, analysis, and critical writing (constructing and critiquing arguments). Because of these skills, philosophical training is invaluable in almost any area of life. Recent graduates have been successful in software development, financial planning, journalism, teaching, and law. A few go on to graduate school and become professional philosophers.

Students' work is subjected to careful critical scrutiny. As a result, students benefit from philosophy courses with an increased competence in expository clarity, logical rigor, and analytical skill.

Philosophy is an excellent undergraduate major for pre-professional students. It is perhaps ideal for those who aspire to work in the legal profession. The history and philosophy of science major is of particular interest to those planning careers in the sciences. Courses in ethics offer students in any field the opportunity to think clearly about the normative dimensions of their career choices. Because the skills of philosophical analysis can be applied widely, philosophy is always a good complementary second degree for any major, whether it is in the physical sciences, social sciences, arts, or humanities.

- *Instructional and Research Facilities*: The Philosophy Writing Center provides a free tutoring service to any student writing a philosophical paper.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: The department offers internship credits for students participating in the philosophy of children program. Students may also arrange for internship credit with individual faculty. See adviser for details.
- *Department Scholarships*: The Kenneth Clatterbaugh scholarship acknowledges a student with financial need who has outstanding academic merit and commitment to philosophy. The Kenneth R. Parker Award for Excellence in Community Service honors an undergraduate philosophy major or minor who has blended her or his studies in philosophy with a volunteer-based community project. The recipient receives a \$500 scholarship. A donation of \$250 is made on

behalf of the recipient to a community organization of the student's choice. See adviser for details.

- *Student Organizations/Associations:* The undergraduate student club, Lyceum, is dedicated to the informal discussion of philosophical issues.

Of Special Note: The department offers a new majors seminar for those wishing to explore the major.

Graduate Program

Graduate Program Adviser
361 Savery, Box 353350
(206) 543-5863
philinfo@uw.edu

The department offers programs of study leading to the master of arts and doctor of philosophy degrees, the MA program serving as the initial stage of the PhD program. The department's Program on Values in Society (POV) offers an interdisciplinary Graduate Certificate in Ethics.

Master of Arts

Admission Requirements

Fulfilling requirements below guarantees consideration but not acceptance.

1. Three letters of recommendation written on the recommender's departmental letterhead.
2. Writing sample of academic philosophical work (approximately 8-15 pages; 2500-5000 words) written for a course in philosophy. Applicants are allowed one writing sample only.
3. Official GRE scores (verbal, quantitative, and analytical writing).
4. Personal 300-500 word statement of the applicant's reasons for doing graduate work in philosophy at the UW and his or her professional objectives
5. Complete set of unofficial college transcripts (official transcripts required upon matriculation)
6. Undergraduate major in philosophy recommended although not required.
7. International applicants refer to UW Graduate School policies (including English proficiency required for employment as a teaching assistant).

Degree Requirements

All students, whether or not they have earned an MA at another institution, must complete the MA requirements before entering the PhD program.

A two-year, non-thesis program; no language requirement.

36 credits minimum

1. **Formal Methods Requirement:** Either a minimum 3.0 grade in a graduate-level logic or inductive reasoning course (PHIL 470, PHIL 471, PHIL 472, PHIL 474, PHIL 483, or PHIL 570); or a 400-level course in another department with suitable formal content. Part-time students must satisfy this requirement by the time they submit master's papers.

2. **Distribution Requirement:** At least three courses in each of the following three areas:
 - a. **Area One**
 - i. Greek Philosophy -- PHIL 430, PHIL 431, PHIL 433, PHIL 520
 - ii. Modern Philosophy -- PHIL 422, PHIL 436, PHIL 437, PHIL 438, PHIL 522
 - iii. Recent Philosophy -- PHIL 426, PHIL 526
 - b. **Area Two**
 - i. Logic and Philosophy of Mathematics -- PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 570
 - ii. Philosophy of Science -- PHIL 459, PHIL 460, PHIL 466, PHIL 481, PHIL 482, PHIL 483, PHIL 560, PHIL 564, PHIL 566, PHIL 574
 - iii. Philosophy of Mind -- PHIL 463, PHIL 464, PHIL 563
 - iv. Philosophy of Language -- PHIL 453, PHIL 479
 - v. Epistemology -- PHIL 450, PHIL 490, PHIL 550
 - vi. Metaphysics -- PHIL 456, PHIL 556, PHIL 587
 - c. **Area Three**
 - i. Ethics -- PHIL 412, PHIL 413, PHIL 415, PHIL 416, PHIL 417, PHIL 418, PHIL 440, PHIL 538, PHIL 540
 - ii. Philosophy of Art -- PHIL 445, PHIL 446, PHIL 545
 - iii. Philosophy of History -- PHIL 465, PHIL 565
 - iv. Social and Political Philosophy -- PHIL 406, PHIL 407, PHIL 408, PHIL 409, PHIL 410, PHIL 411, PHIL 414, PHIL 461, PHIL 510, PHIL 514
 - v. Philosophy of Religion-- PHIL 467
3. **Course Requirement:** Students complete 11 courses (numbered 400 or above) in philosophy, with a minimum 3.0 grade in each course. At least four courses must be seminars. (12 courses including 6 seminars are required for the PhD. Students should if possible complete all course requirements during the master's portion of the program.)
4. **Master's Qualifying Papers:** Students submit a qualifying paper at the end of the second year. (Part-time students submit their paper for evaluation upon completion of 11 courses in philosophy.)
5. **Evaluation:** Students completing the above requirements are (a) awarded an MA and admitted to the PhD program; (b) awarded an MA and invited to revise and resubmit a qualifying paper a second time, or prepare a new qualifying paper; (c) awarded a terminal MA; or (d) dropped from the program without a degree.
6. **Satisfactory Progress:** Students not yet admitted to the PhD program must take at least two courses (10 credits) per quarter with a minimum 3.0 grade.
7. **Other Courses:** Students may use up to three approved courses outside philosophy. (Such courses do not automatically satisfy the twelve-course requirement.)

Doctor of Philosophy

Admission Requirements

Based on level of performance with the MA requirements. (See above.)

Degree Requirements

Minimum 90 credits (60 credits minimum beyond the master's degree)

1. **General Requirements:**

- a. General written examination (dissertation proposal, from master's qualifying papers)
- b. General oral examination (defense of the dissertation proposal)
- c. Dissertation
- d. Final examination

Master's papers constitute the written portion of the general examination.

2. **Course Requirement:** Minimum 12 graduate-level courses in philosophy (six of which are seminars) with a minimum 3.0 grade in each (courses and seminars taken to fulfill MA requirements may count toward this total).
3. **Proseminar and Literature Review:** PHIL500, proseminar, autumn and spring of third year; literature review, autumn quarter
4. **Language Requirement:** Determined by the student's Supervisory Committee. No departmental language requirement. However, in writing a dissertation a student must be able to deal with primary sources in the original language. Also, for particular areas of study, language courses or demonstration of proficiency may be required.
5. **Satisfactory Progress:** Determined by the student's Supervisory Committee.

Financial Aid

Graduate students are admitted only if they can be offered some financial support. Typically students receive teaching assistantships, and the Graduate School makes some research assistantships available on a competitive basis. Funding packages are typically for five years and require satisfactory academic progress.

Graduate Certificate in Ethics

Facilitates graduate research in ethics. Designed to provide non-philosophy graduate or professional students the knowledge and skills necessary for integrating ethics and ethics scholarship into their chosen field.

Open only to students already enrolled in other graduate degree programs at the University of Washington.

Certificate Requirements

15 credits

1. Selection of a faculty adviser from the Program on Values in Society (POV) core faculty
2. One core course
3. VALUES 511 or VALUES 512 (5 credits)

4. Two other approved graduate level values-laden courses specific to the student's field of study (6-8 credits). Elective courses from the student's home department may be eligible (maximum 6 credits of overlap, but no core courses overlapped).
5. VALUES 513 (2 credits)

Physics

Department Overview

C121 Physics-Astronomy Building

Physics is the study of the fundamental structure of matter and the interaction of its constituents, with the goal of providing a quantitative description of nature based on a limited number of physical principles.

Undergraduate Program

Adviser

C139A Physics-Astronomy, Box 351560
(206) 543-2772

The Department of Physics offers the following programs of study:

- The Bachelor of Science degree with a major in physics
- A minor in physics

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 308.)

These physics and mathematics courses are required prerequisites for junior-level work in physics, not only at the UW, but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college either need to take more than four years to earn a degree or be limited to a minimal course of study for graduation in four years.

Admission Requirements

1. Completion of PHYS 121, PHYS 122, PHYS 123 and either MATH 124, MATH 125, MATH 126 or MATH 134, MATH 135.
2. Enrollment in minimum one physics lecture course with course number higher than 220 during the application quarter. Completion of minimum one physics lecture course (any course number, either at UW or elsewhere) within the two quarters prior to application.
3. Standard admission is twice a year. Application deadlines: third Friday of autumn quarter and third Friday of spring quarter.

Winter quarter transfer admission: Students transferring to the UW in autumn or winter quarter may also apply the third Friday of winter quarter.

4. Meeting minimum requirements does not guarantee admission. Admission is capacity constrained, based on holistic review of a student's record as follows:
 - a. Personal statement which should discuss reasons for choosing a physics major and strategies for success in the major, including discussion of lessons learned from previous successes and difficulties and plans for accessing support in the major. The statement

should also address how the chosen degree option (applied, comprehensive, biophysics, teaching) and submitted graduation plan (see 4.c.) are suited to life and career goals. In cases of extenuating circumstances, a personal statement may also include a petition for waiver of one of the stated minimum requirements.

- b. Academic performance as measured by GPA; grades in courses required for admission; difficulty of other courses completed; frequency of incompletes, repeated courses, and withdrawals; relevant work and life experience.
- c. Graduation plan completed in MyPlan and printed to a pdf file, submitted with the application. Preapproval of graduation plan by Physics Student Services is recommended; incoming majors must have their Graduation Plan approved no later than six weeks after acceptance into the major to avoid having a hold placed on registration.

See department website for a description of degree requirements for the four physics degree options, sample graduation plans, and suggestions of topics to include in a personal statement. Successful applicants typically have over a minimum 2.60 cumulative GPA in physics and math courses, especially those taken recently.

Major Requirements

Minimum 89-106 credits, including the following:

1. *Physics core courses (37 credits)*: PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 294, PHYS 321, PHYS 322, PHYS 334
2. *Mathematics core courses (18-19 credits from one of the following options)*:
 - a. MATH 124, MATH 125, MATH 126, and one course from MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - b. MATH 134, MATH 135, MATH 136 and one course from MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
3. One of the four options shown below (34-56 credits): any course used to satisfy departmental degree requirements can be used only once in any option listed below.
 - a. *Comprehensive Physics Option (38-43 credits)*:
 - i. 20-22 credits from PHYS 226; PHYS 228; PHYS 324; minimum three courses from PHYS 323, PHYS 325, PHYS 328, PHYS 329, ASTR 321, or ASTR 322
 - ii. One additional mathematics course from the core list (3-4 credits): MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - iii. *Advanced laboratory (6-8 credits)*: two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, and either ASTR 480 or ASTR 481
 - iv. *Upper division lecture electives (6 credits)*: See adviser for approved list of electives.
 - v. *Undergraduate research*: 3 credits from any combination of PHYS 485, PHYS 486, PHYS 487, PHYS 494, PHYS 495, PHYS 496, PHYS 499, ASTR 481 or ASTR 499. (ASTR 481 may count as laboratory or research).
 - b. *Applied Physics Option (34-39 credits)*:
 - i. PHYS 231; one course from PHYS 226, PHYS 323, PHYS 324, PHYS 329; and AMATH 301 (10-11 credits)

- ii. Two additional mathematical courses (6-8 credits) from PHYS 228, MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - iii. *Advanced laboratory (6-8 credits)*: two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, and either ASTR 480 or ASTR 481
 - iv. *Electives (9 credits)*: See adviser for approved list of electives.
 - v. *Undergraduate research*: 3 credits from any combination of PHYS 485, PHYS 486, PHYS 487, PHYS 494, PHYS 495, PHYS 496, PHYS 499, ASTR 481 or ASTR 499. (ASTR 481 may count as laboratory or research).
- c. *Biophysics Option (51-56 credits)*:
- i. PHYS 228, PHYS 324, PHYS 328, PHYS 429; one course from PHYS 226, PHYS 323, PHYS 325, PHYS 329 (17-18 credits)
 - ii. *Chemistry (15 credits)*: CHEM 142, CHEM 144, or CHEM 145; CHEM 152, CHEM 154, or CHEM 155; and CHEM 162, CHEM 164, or CHEM 165
 - iii. *Biology (10 credits)*: BIOL 180 and BIOL 200
 - iv. *Additional chemistry and biology (6-10 credits)*: two courses from CHEM 223 or CHEM 237, CHEM 224 or CHEM 238, CHEM 428, CHEM 452 or CHEM 456, CHEM 453 or CHEM 457, BIOL 220, BIOL 340, BIOL 350, BIOL 355, BIOL 401, BIOL 427, BIOL 467, BIOC 405, or BIOC 440
 - v. *Undergraduate research*: 3 credits from any combination of PHYS 499, BIOC 499, BIOL 499, CHEM 499, GENOME 499, MICROM 499, N BIO 499, P BIO 499, or BIOEN 499
- d. *Teacher Preparation Option (38-42 credits)*:
- i. 14-15 credits from PHYS 226, PHYS 228, PHYS 324; one course from PHYS 323, PHYS 328, PHYS 329
 - ii. *Physics by inquiry (15 credits)*: PHYS 407, PHYS 408, and PHYS 409
 - iii. One additional mathematics course from the core list (3-4 credits): MATH 307/AMATH 351, MATH 308/AMATH 352, MATH 309/AMATH 353, MATH 324, MATH 326, or AMATH 401
 - iv. *Advanced laboratory (3-5 credits)*: One course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, and either ASTR 480 or ASTR 481
 - v. *Teaching practicum (3 credits)*: PHYS 499, working on a project that involves teaching

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements: 30-36 physics credits (in addition to 15 credits of MATH 124, MATH 125, and MATH 126) as follows:

1. *Core courses*: PHYS 121, PHYS 122, PHYS 123, PHYS 224, and PHYS 225
2. One of the following options:
 - a. *Physics Education*: PHYS 407, PHYS 408, PHYS 409 (total 36 physics credits)
 - b. *Experimental Physics*: PHYS 231, PHYS 334, and one course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434 (total 30 physics credits)
 - c. *Mathematical Physics*: PHYS 227, PHYS 228 (MATH 308 required), and one course from PHYS 321 or PHYS 324 (MATH 324 required) (total 30 physics credits)
3. Minimum grade of 2.0 required for each physics course counted toward the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The program is one of the largest in the nation, with approximately 80-100 majors graduating every year. Graduates may join the work force in a variety of technical occupations where analytical, computational, and problem-solving skills are highly valued, both in government and the private sector. They may also continue with further studies in physics or in other fields (such as astronomy, medicine, law, business, biology, or engineering).
- *Instructional and Research Facilities*: The Physics and Astronomy Departments share a modern building which contains excellent instructional and research facilities. Undergraduate students are strongly encouraged to participate in ongoing research in the department.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: Most undergraduate physics majors participate in a research experience, either on campus or off. Research internships in physics and related departments are available for both pay and course credit. Many students participate in national programs, typically the summer after their junior year. The department also maintains an exchange program with Universitat Justus-Leibig in Geissen, Germany.
- *Department Scholarships*: Select scholarships available every spring upon nomination by an instructor.
- *Student Organizations/Associations*: Society of Physics Students, www.uwsps.org; Career Development Organization for Physicists and Astronomers, students.washington.edu/cdophys/CAREER/

Of Special Note:

- One year of high school physics is strongly recommended before taking PHYS 121.

Graduate Program

Graduate Program Coordinator
C139 B Physics-Astronomy, Box 351560
(206) 543-2488

The department offers studies leading to the degrees of master of science and doctor of philosophy. The department awards an average of twenty PhD and thirty MS degrees annually.

Research Facilities

Areas of research include atomic physics, astrophysics, condensed-matter physics, biological physics, elementary-particle physics, nuclear physics, and physics education. Students may also do research in physics with appropriate faculty in other departments such as Aeronautics and Astronautics, Applied Mathematics, Astronomy, Biochemistry, Bioengineering, Chemistry, Earth and Space Sciences, Electrical Engineering, Materials Science and Engineering, or Physiology and Biophysics.

Experimental and theoretical research in atomic, biological, statistical, and condensed-matter physics is concentrated on nano-scale systems, topological phenomena, quantum matter, and fundamental symmetries. On-campus laboratories include laser, ion trap, and radio frequency techniques, low-temperature, scanning-probe microscopy, x-ray and light scattering, and surface-physics equipment. Off-campus facilities include synchrotron x-ray radiation and neutron sources in the United States and abroad. Research in the Center for Experimental Nuclear Physics and Astrophysics (CENPA) is concentrated on the measurement of fundamental physical properties, including experiments on neutrinos, axions, muons, light nuclei, and gravity. Facilities include the on-campus accelerator of CENPA, as well as major facilities in the United States, Canada, and Europe.

High-energy and particle astrophysics groups are engaged in quantum field theory, phenomenology, cosmology, and in experimental research at the European Center for Nuclear Research (CERN) in Geneva, Fermilab in Illinois, and LIGO.

The Institute for Nuclear Theory, a national facility closely associated with the department, offers a unique opportunity for students to pursue research.

Department facilities are housed in the Physics-Astronomy Building and the Center for Experimental Nuclear Physics and Astrophysics (CENPA).

Master of Science (Applications of Physics)

Admission Requirements

Designed for students currently employed and whose background is in physical science, engineering, mathematics, or computer science. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of instruction offered in the physics department. Entering students should have a BS degree in physical science, engineering, mathematics, or computer science. The program is part time and does not support student (F) visa applications. Classes are offered evenings; some classes may be attended online.

Degree Requirements

36 credits

1. Core courses: PHYS 441, PHYS 541, and PHYS 543, and appropriate electives.
2. Independent-study project, which may be carried out at the University or at the student's place of employment. A written report, as well as an oral presentation, is required.
3. PHYS 600 (at least 3 credits) taken while completing the project noted in 2, above.
4. 36 credits at the 400 level or above, with at least 18 credits at the 500 level or above. At least 18 credits must be from numerically graded courses. No thesis required.

Master of Science, Doctor of Philosophy

Admission Requirements

1. Undergraduate preparation to include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics to include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions.
2. Admission determined by the applicant's undergraduate program, undergraduate grades, GRE aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

Master of Science

Degree Requirements

36 credits

1. Minimum 3 credits of PHYS 600
2. 36 credits of work at the 400 level or above, with at least 18 credits at the 500 level or above. At least 18 credits from numerically graded courses. A qualifying examination is required. No thesis is required.

Doctor of Philosophy

Minimum 90 credits

Degree Requirements

1. Master's degree, with a background in physics equivalent to that contained in the following courses: PHYS 505, PHYS 513, PHYS 514, PHYS 515, PHYS 517, PHYS 518, PHYS 519, PHYS 520, PHYS 525, and PHYS 528
2. Specialized courses appropriate to each student's interests; and two advanced elective Physics Department courses outside the student's area of research.
3. Written qualifying examination (typically completed before or during the second year), oral general examination for admission to candidacy, and oral final examination.
4. Teaching experience. Courses in teaching techniques in physics, PHYS 501 through PHYS 503, are required of students holding teaching assistantships.

Financial Aid

Most graduate students are supported by fellowships and assistantships. Applications for the PhD program are automatically considered for these fellowships and assistantships.

Political Science

Department Overview

101 Gowen

Political science, broadly conceived, is the study of governments and other political actors, including their origins and foundations, interactions with groups and individuals, and interactions with nations. Within this larger framework political scientists study power, authority, conflict, economic relationships, culture, laws, policy, values, ethics, justice, equality, rights, legitimacy, and representation, to list only a few. Using these and other concepts, they analyze the political impacts of social issues such as war, peace, poverty, crime, education, the environment, race, gender, and globalization. Modes of inquiry are highly interdisciplinary.

Undergraduate Program

Adviser

215 Smith, Box 353530

(206) 543-1824

polsadvc@uw.edu

The Department of Political Science offers the following programs of study:

- The Bachelor of Arts degree with a major in political science and options in political economy and in international security
- A minor in political science

Coursework in the discipline covers four major fields of political science: American politics, comparative politics, international relations, and political theory. In addition to major requirements, students may pursue faculty-supervised internships, research, independent study projects and an optional senior thesis.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that develop writing skills and breadth of knowledge. Introductory statistics.

Department Admission Requirements

1. Minimum 2.00 cumulative GPA
2. Three introductory political science courses (15 credits) with a minimum 2.0 grade in each from the following: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
3. Students are admitted all quarters. Applications are due the second Friday of each quarter. Applications and additional information available from advisers in 215 Smith and on the Political Science Department website.
4. Applicants who meet the stated requirements are admitted in time to register for the following quarter as majors.

Major Requirements

50 credits in political science as follows:

1. *Introductory Requirement (15 credits)*: three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
2. *Field Requirement (15 credits)*: one course numbered POL S 210 or above in three different fields of political science chosen from political theory, comparative politics, international relations, American politics, and research methods, with a minimum grade of 2.0 in each
3. *Electives (20 credits)*: Four courses numbered POL S 210 or above with a minimum 2.0 grade in each
4. *GPA Requirement*: Minimum 2.25 cumulative GPA in political science courses at graduation and minimum 2.0 grade in each political science course taken to fulfill requirements for the major
5. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 political science credits numbered 210 or above through the UW.

Political Economy: This interdisciplinary option is a specialized program that combines study of political science and economics. Students who wish to pursue this option should consult a political science adviser. A list of recommended coursework is available.

International Security: Recommended to students interested in an in-depth study of international security. Concentrates on the relationship between politics and security, and specifically on the causes of war and the use and control of force, threats, promises, and the tactics, techniques, and ethics of violence. Teaches theories to address security issues and provides historical context for understanding contemporary security issues. Option coursework is completed in addition to the requirements of the major, however, up to 25 credits from the option may also fulfill requirements for the political science major. A list of recommended coursework is available.

45 credits as follows:

1. POL S 203, POL S 321, POL S 407 (15 credits)
2. 30 additional credits from an approved list of courses maintained in the department. At least 15 elective credits must be at the 300 or 400 level.

Minor

Minor Requirements: 30 political science credits as follows:

1. One introductory course chosen from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205
2. 25 elective credits numbered POL S 210 and above. (Internship and independent study courses such as POL S 496, POL S 498, POL S 499 do not count toward the minor)
3. Minimum 2.00 cumulative GPA for courses applied to the minor
4. Minimum 15 credits for the minor completed in residence through the UW

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of political science arms students with substantive knowledge of the discipline, including its concepts and theories. It also prepares them to be knowledgeable and active citizens. Through their study, students develop critical thinking, analytical, research, writing, interpersonal, and communication skills.

Graduates of political science pursue careers in many fields, including government (federal, state, and local), business, trade, public service (including non-governmental and international organizations), law, journalism, and teaching.

- *Instructional and Research Facilities:*
 - *Political Science Laboratory:* This facility with 25 computer stations, functions as a computer classroom and also as a general laboratory.
 - *Center for Social Science Computation and Research* maintains an extensive data archive and offers many statistical and software consulting services.
 - *Political Science/Jackson School/Law, Societies, and Justice/Comparative History of Ideas Writing Center:* The Writing Center is staffed by peer tutors and provides free help to students seeking feedback about their writing. The Writing Center director works with instructors to design workshops to help students with assignments.

The Department of Political Science is affiliated with a number of research centers:

- *The Center for American Politics and Public Policy* is a focal point for the study of politics and policy processes in the United States. Research relates to public policy processes, including issues of agenda setting, decision making, implementation, quantitative and qualitative measures of policy change, and the role of ideas and dialogue in policy change. Policy arenas include education reform, health care, environmental regulation, and building code enforcement.
- *The Center for Communication and Civic Engagement* investigates how innovative communication can improve the quality of civic life. The center's primary focus is to understand how new information technologies can supplement more traditional forms of communication to facilitate civic engagement.
- *The University of Washington's Institute for the Study of Ethnicity, Race, and Sexuality* is an interdisciplinary research center dedicated to bringing the tools of contemporary social science inquiry to the careful examination of issues of social, economic, and political exclusion and disadvantage of marginalized minority populations in the United States, and their potential solutions.
- *Harry Bridges Center for Labor Studies* promotes the study of labor as a central concern in higher education and focuses on labor's contribution to society—locally, nationally, and worldwide. The center supports research, teaching, and community outreach.
- *The Comparative Law and Society Studies Center* is committed to promoting interdisciplinary research and teaching as well as community service regarding law, justice, and human rights throughout the world.
- *European Union Center* promotes the study of the European Union and trans-Atlantic relations.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department offers three internship programs that range from part-time to full-time programs. Students may work in local agencies (POL S 496), in the state legislature (POL S 497), and in Washington, D.C. (POL S 498).

Listings of local internships and applications are available in 215 Smith.

[The Washington State Legislative Internship Program](#) is a winter-quarter program in Olympia and is open to students from all majors. Students earn 15 credits for the internship and attend a class taught by a political science faculty member. Applications are available from departmental advisers in 215 Smith and are due by the end of October.

Students in all majors may apply for The [Washington Center](#), a comprehensive internship program that places students in Washington, D.C. Students earn 15 credits for the internship. Additional information is available from departmental advisers in 215 Smith.

- *Department Scholarships:*
 - *Hugh Bone Scholarship:* The endowed Hugh A. Bone Scholarship was established by the Department of Political Science in 1986 to recognize Professor Bone, a former department chair, and to continue his commitment to a "participative citizenry." Professor Bone founded the Washington State Legislative Internship Program and many students who studied with him continue active political lives because of his stewardship and interest. The scholarship was established in his name to help students with financial need study and intern away from the UW-Seattle campus.
 - *Agnes C. Nelson Memorial Scholarship:* The departments of Political Science and Economics make annual full-tuition awards to students who demonstrate interest in the interrelationship of politics and economics and who meet financial eligibility requirements. To apply for the scholarship, students must have completed a minimum 25 credits in political science and economics with at least 10 credits in each discipline. Deadlines are posted early in spring quarter.
- *Department Awards*
 - *The Robert A. Dahl Award:* The Department of Political Science recognizes an outstanding graduating senior with the Robert A. Dahl Award. To be eligible for consideration, a student must demonstrate scholarship excellence as well as interest in political science as a discipline.
 - *Daniel C. Lev Award:* The Department of Political Science created this award to recognize the contribution of Professor Dan Lev to the department's Honors program. The award recognizes an exceptional senior Honors thesis.
 - *Sharon S. Redeker Award for Public Service:* The Department of Political Science created this award in honor of Sharon Redeker, who served for many years as the department's Director of Academic Services. This award recognizes the exceptional public service of a political science senior while at the UW.
- *Student Organizations/Associations:* Pi Sigma Alpha (Political Science Honor Society), Phi Alpha Delta (pre-law fraternity). See adviser for details.

Graduate Program

Graduate Program Coordinator
 215 Smith, Box 353530
 (206) 543-1898
polsgrad@uw.edu

Graduate study integrates traditional education in political science's primary fields with other fields in the social sciences.

Areas of study include comparative politics, international relations, American politics, political theory, political economy, race and ethnic politics, public policy, public law, political communication, and methodology.

Graduate work is primarily preparation for the doctor of philosophy degree. The master of arts requirement serves as the initial stage of the PhD program; the department does not offer a terminal master of arts degree and admits students for the PhD program only.

Doctor of Philosophy

Admission Requirements

1. **Statement of Purpose** academic background, including any research experience and methodological skills; plans and goals for study, including intellectual interests and areas of specialization; and reasons for interest in studying at the UW.
2. **Writing sample:** A paper (not to exceed 20 pages) or excerpts from a larger work (e.g., honors thesis) demonstrating ability to write critically and analytically.
3. **Resume**
4. **Letters of recommendation**
5. **Transcripts**
6. **Test scores:** GRE General Test scores sent directly by the Educational Testing Service (ETS). English proficiency scores for international students, sent directly by the Educational Testing Service (ETS)-

Degree Requirements

Minimum 92 credits

1. *General Fields:* One from American politics, comparative politics, international relations, and political theory. At least one additional core course in another general field. Either a second general field or a specialized field (public law, political communication, political economy, political methodology, public policy processes, or minority and race politics).
2. *Political Research Methods:* Minimum level of competence. (Foreign language is not required for the PhD, unless the student selects a field(s) where competence in a language is beneficial.)
3. *MA Degree (40 credits):* Usually completed within the first two years of study.
4. *Additional Field:* A third field which can be another general field and/or one or more of the specialized fields listed above, and/or at most one non-designated field (from either another academic discipline or individually defined by the student).
5. *PhD Degree:* Normally four years beyond the MA, including written and oral examinations in the three fields; general examination (dissertation prospectus); dissertation (minimum 27 credits).

Research Facilities

Access to computing facilities and extensive data holdings is available. The department is also affiliated with several research centers, including the Center for American Politics and Public Policy, the Center for Communication and Civic Engagement, the Center for Statistics and Social Sciences, the Comparative Law and Society Studies Center, the Harry Bridges Labor Studies Center, the Center for Comparative and Historical Analysis of Organizations and States, and the UW's Institute for the Study of Ethnicity, Race, and Sexuality. The University is also a member of the Inter-University Consortium for Political and Social Research.

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students, including those in their first year of study. Provided they make satisfactory progress, students are eligible for departmental financial assistance for five consecutive years.

Psychology

Department Overview

119 Guthrie

Psychology involves the scientific study of behavior and its causes and the understanding of human and animal behavior in a variety of settings. Psychology is studied both as a natural science, which stresses physical and biological causes of behavior, and as a social science, which stresses the effects of the social setting on human and animal behavior. Major areas of emphasis are human cognition and perception, animal behavior, behavioral neuroscience, developmental, social and personality, and clinical psychology.

Undergraduate Program

Adviser

119 Guthrie, Box 351525

(206) 543-2698

psyadvis@uw.edu

The Department of Psychology offers the following programs of study:

- The Bachelor of Science degree with a major in psychology
- The Bachelor of Arts degree with a major in psychology

The Bachelor of Science program prepares students for doctoral programs in psychology, leading to careers in teaching, research, or clinical psychology. The program emphasizes laboratory/research experience and statistics.

The Bachelor of Arts program provides a general background in psychology for students preparing for master's-level graduate programs or professional schools, seeking employment at the baccalaureate level, or wanting to apply the principles of psychology in other disciplines.

The department does not have formal programs in educational, school, or counseling psychology; engineering psychology; or industrial psychology.

Bachelor of Science

Suggested First-Year College Courses: MATH 120 and MATH 124. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and PSYCH 209 should be completed as soon as possible during this year; BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

Department Admission Requirements

Students apply to the Department of Psychology under the same admission requirements, regardless of the degree they wish to pursue.

1. Minimum 2.00 cumulative UW GPA
2. Completion of one of the following math courses with a minimum 2.0 grade: MATH 111, MATH 112, MATH 120, or MATH 124.
3. Completion of the following psychology courses with a minimum 2.0 grade in each course and a cumulative 2.50 GPA in the three courses: PSYCH 101, PSYCH 202, and PSYCH 209.
4. Admission is competitive based on the following criteria:
 - a. Preparation for a major in psychology as indicated by the grades earned in courses required for admission
 - b. GPA, with an emphasis on grades earned in psychology courses
 - c. Other evidence of a commitment to becoming a psychology major
 - d. Personal statement reflecting an interest in and commitment to becoming a psychology major
 - e. Copies of unofficial transcripts from all schools attended (UW and transfer).

Meeting the above criteria does not guarantee admission to the department.

5. The application deadline is the first Friday of autumn, winter, and spring quarters; no applications are accepted summer quarter. Applications and additional information are available in 119A Guthrie.

Major Requirements

84-86 credits as follows:

1. PSYCH 101, PSYCH 202, PSYCH 209 (with a grade of 2.5 or higher), PSYCH 317 and PSYCH 318
2. One laboratory course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
3. One course from PSYCH 300, PSYCH 302, PSYCH 333, or PSYCH 355
4. One course from PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 345, or PSYCH 357
5. One additional course from PSYCH 300, PSYCH 302, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, PSYCH 355, or PSYCH 357
6. Three additional graded upper-division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
7. PSYCH 499 (3 credits)
8. PSYCH 496, PSYCH 497, or PSYCH 498 (3 credits) or 3 additional credits of PSYCH 499
9. Up to 6 credits in 200- to 400-level electives to make a minimum total of 66 psychology credits
10. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
11. *Courses in related fields:*

- a. MATH 120 and MATH 124. Students may satisfy this requirement by testing out of MATH 124 or MATH 144
 - b. One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - c. One of the following philosophy courses: PHIL 120, PHIL 160
 - d. One social science course (3 to 5 credits) from anthropology or sociology
12. Cumulative minimum 2.50 GPA in all PSYCH courses applied toward the degree (UW and transfer), with a minimum 2.0 grade in each course presented for the major. Note that a grade of 2.5 or higher is required in PSYCH 209 in order for students to progress to the PSYCH 317/PSYCH 318 statistics series.
13. Transfer students must meet all of the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level through the UW.

Bachelor of Arts

Suggested First-Year College Courses: MATH 111, MATH 112, MATH 120, or MATH 124. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and 209 should be completed as soon as possible during this year. BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

Major Requirements

66 to 68 credits as follows:

1. PSYCH 101, PSYCH 202, PSYCH 209, PSYCH 315 (or PSYCH 317 and PSYCH 318)
2. One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
3. One course from PSYCH 300, PSYCH 302, PSYCH 333, or PSYCH 355
4. One course from PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 345, or PSYCH 357
5. One additional course from PSYCH 300, PSYCH 302, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, PSYCH 355, or PSYCH 357
6. Two additional graded upper division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
7. 3 credits from the following list: PSYCH 494, PSYCH 496, PSYCH 497, PSYCH 498, PSYCH 499; or credit from an approved Study Abroad program
8. Up to 4 credits of PSYCH 200- to 400-level electives to make a minimum total of 53 psychology credits
9. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
10. *Courses in related fields:*

- a. One MATH course from MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Students may satisfy this requirement by testing out of any of the specified classes.
 - b. One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - c. One social science course (3 to 5 credits) from anthropology or sociology
11. Minimum 2.50 cumulative GPA in all psychology courses applied toward the degree (UW and transfer), with a minimum 2.0 grade in each course presented for the major
12. Transfer students must meet all the above requirements and must to complete at least 15 graded credits in psychology at the 300 and 400 level through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students understand and apply scientific methods and principles, receive an excellent preparation in the theoretical explanations of human and animal behavior, and understand the introductory concepts underlying the biological basis of behavior.
- *Instructional and Research Facilities:* The psychology faculty have extensive research facilities and research laboratories on the UW campus and nearby buildings.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The Department of Psychology offers academic credit for approved fieldwork experience. The advising office maintains internship listings which are updated regularly.
- *Department Scholarships:* none offered
- *Student Organizations/Associations:* Psi Chi (national honors society for undergraduate psychology students).

Of Special Note: A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Graduate Program

Graduate Program Adviser
 127 Guthrie, Box 351525
 (206) 543-8687
psygrad@uw.edu

Graduate work in psychology is organized primarily as preparation for the doctor of philosophy degree. The optional master of science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into eight major areas of study: adult/general clinical, animal behavior, behavioral neuroscience, child clinical, cognition & perception, developmental, quantitative, and social psychology & personality. Specialization groups also exist in the sub-areas of diversity science and quantitative.

The programs in adult clinical and child clinical psychology are accredited by the American Psychological Association and provide scientific and professional training.

Master of Science (Optional)

A master's-degree-only program is not available. Doctoral students have the option of obtaining a master's degree while working toward the PhD.

Doctor of Philosophy

Admission Requirements

1. Undergraduate degree in psychology desirable, but not required
2. Some preparation in biological, social, or quantitative sciences strongly advised
3. Academic and research backgrounds
4. GRE scores
5. Written evaluations submitted by former professors or supervisors
6. Application deadline: December 1, for admission the following autumn quarter.

Degree Requirements

Minimum 90 credits

1. Coursework
 - a. Orientation: PSYCH 500A
 - b. Proseminar in psychology for the first three quarters: PSYCH 500B
 - c. Psychology colloquium for the first three quarters: PSYCH 550
 - d. Statistics and general methodology: PSYCH 522, PSYCH 523, PSYCH 524, PSYCH 525. Minimum 2.7 grade for each course.
 - e. Dissertation: PSYCH 800 (27 minimum)
 - f. Completion of individualized training program (section 2, below) or clinical area requirements (section 3, below)
2. Individualized Training Program in Non-Clinical Areas
 - a. One quantitative methods/statistics course beyond those indicated in 1.d., above, or one methodology course directly relevant to the student's research focus
 - b. Three core concepts courses
 - c. Three advanced or focused courses providing specialized research training
 - d. Three quarters of seminars, brown bags, or journal clubs. Requires attendance throughout training.

Courses may be taken outside the Department of Psychology, but students are strongly urged to utilize department-based options when available.

All coursework in these areas should be taken for a numerical grade, unless the course itself is offered on a credit/no-credit only (CR/NC-only) basis. At least half a student's program must be in courses numbered 500 or above.

3. Clinical Area Program Requirements

- a. Courses: PSYCH 517, PSYCH 531, PSYCH 560 (2-30), PSYCH 580, PSYCH 586, PSYCH 587, PSYCH 588, PSYCH 589 (8 - second-year students register A, W, Sp, and S); PSYCH 591 (1 - A, W, first year), PSYCH 593A (1-6 per quarter), PSYCH 593B (1-6 per quarter)
- b. One-year predoctoral internship
- c. Additional requirements for adult track students
 - i. PSYCH 511, PSYCH 518, PSYCH 519
 - ii. APA discipline - specific knowledge; one course each in biological, social, cognitive, developmental, and affective bases of behavior. History and systems satisfied by PSYCH 591
 - iii. PSYCH 571 or PSYCH 572
 - iv. Two courses in assessment: PSYCH 586 and either PSYCH 576 and PSYCH 590 or PSYCH 577
 - v. Minimum one internal (PSYCH 594) and one external (PSYCH 597) practicum
- d. Additional requirements for child track students
 - i. PSYCH 553, PSYCH 571, PSYCH 572, PSYCH 573, PSYCH 576, PSYCH 590
 - ii. PSYCH 594 (internal) or PSYCH 597 (external) - two practica
 - iii. Minimum one treatment seminar
 - iv. One additional quantitative methods course
 - v. APA discipline - specific knowledge: one course each in biological, social, cognitive, developmental, and affective bases of behavior. History and systems satisfied by PSYCH 591

Assistantships, Fellowships, or Traineeship Opportunities

Research and teaching assistantships are generally available. Traineeships and fellowships are also available.

Scandinavian Studies

Department Overview

318 Raitt

Scandinavian studies is concerned with the study of languages, literature, history, politics, and cultures of Denmark, Finland, Iceland, Norway, Sweden, and the Baltic States of Estonia, Latvia, and Lithuania. Emphasis is placed both on contemporary literature and culture and on historical development. Although most courses designed for majors are taught in the original languages, a broad spectrum of courses designed primarily for nonmajors is offered in English.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of Scandinavian Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies.
- Minors in Danish, Finnish, Norwegian, Swedish, Baltic studies, and Scandinavian area studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Danish, Estonian, Finnish, Latvian, Lithuanian, Norwegian, or Swedish.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Danish, Finnish, Norwegian, or Swedish: 65 credits, of which 35 are in upper-division courses.

1. First- and second-year courses in target language (DAN/FINN/NORW/SWED) (30 credits)
2. Upper-division courses in target language (DAN/FINN/NORW/SWED). See department for list of approved courses. (10 credits)
3. Upper-division SCAND courses. See department for list of approved courses. (20 credits)
4. SCAND 498 (5 credits)

Scandinavian Area Studies: 65 credits, of which 35 are in upper-division courses.

1. First- and second-year courses in target Scandinavian or Baltic language (DAN/ESTO/FINN/LATV/LITH/NORW/SWED) (30 credits)
2. Upper-division SCAND courses. See department for list of approved courses. (30 credits)
3. SCAND 498 (5 credits)

Minor

Minor Requirements:

Baltic Studies: 35 credits

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 20 credits of upper-division Scandinavian coursework, including at least one Baltic studies course from the following: SCAND 344, SCAND 345, SCAND 454, SCAND 455
3. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework

Danish, Finnish, Norwegian, or Swedish: 35 credits

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 15 credits of second year Danish, Finnish, Norwegian, or Swedish
3. 5 credits of upper-division Scandinavian coursework or 5 credits of an upper-division language course
4. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Estonian, Latvian, Lithuanian: 35 credits

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 15 credits of second year Estonian, Latvian, or Lithuanian
3. 5 credits of Baltic studies coursework (SCAND 344, SCAND 345, SCAND 454, or SCAND 455), or 5 credits of an upper-division language course.
4. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Scandinavian Area Studies: 35 credits

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 20 credits of upper-division Scandinavian coursework
3. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduates of the Department of Scandinavian Studies have an advanced level of proficiency in a Scandinavian, Fenno-Ugric, or Baltic language. They can talk about a wide range of concrete topics in a sustained conversation and have the ability to interpret and write about literary texts, non-fiction, and other media. Graduates also have knowledge of major figures, ideas, and institutions in Baltic or Nordic culture, history, literature, and politics that enriches a global perspective. They have the ability to research and synthesize source material in the target language and can produce a scholarly essay in English on a topic within their area of concentration.

Graduates of the Scandinavian studies program have the qualifications to embark on careers that require skills in the interpretation of information in various media, critical analysis, and effective communication and to continue in graduate programs and professional schools that value an international perspective.

- *Instructional and Research Facilities:* None
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships at museums or with Scandinavian businesses are possible. Exchange program opportunities with Aarhus, Copenhagen, Linköping, Stockholm, Uppsala, Bergen, Oslo, Åbo/Turkku, and Helsinki also exist.
- *Department Scholarships:* The department offers several scholarships for students of Danish, Finnish, Norwegian, and Swedish.
- *Student Organizations/Associations:* the Danish Club, the Norwegian Club, the Swedish Club, and the Finnish Club.

Graduate Program

Graduate Program Coordinator
318 Raitt, Box 353420
(206) 543-0645
uwscand@uw.edu

The department offers graduate programs of study leading to the master of arts and doctor of philosophy degrees. For the MA degree, the emphasis may be on Old Icelandic (Old Norse), Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies. PhD degree aspirants must complete one quarter's study of Old Icelandic and concentrate their studies primarily within one of five areas: Danish language and literature, Finnish language and literature, Norwegian language and literature, Swedish language and literature, or Scandinavian area studies.

Programs in Scandinavian studies open several areas of inquiry: medieval, particularly Old Icelandic; modern, including the eighteenth century; Romanticism; the Modern Breakthrough; and the twentieth century. Attention is paid to the history of Scandinavian languages, prose, drama, and poetry. Opportunities for supervised study and specialization also exist in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies, as well as in comparative-literature study.

Master of Arts

Two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

1. Emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of literary history, critical theory and text analysis, plus study of one secondary area.
2. Emphasis on Scandinavian area studies includes the study of Scandinavian folklore, mythology, history, politics, society, and Baltic studies, with an emphasis in one of these areas.

Admission Requirements

Bachelor of Arts degree with major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background, including advanced language proficiency in one Nordic language.

Degree Requirements

Minimum 40 credits

1. 40 credits in Scandinavian and related subjects approved by the department, including a minimum 20 credits in courses numbered 500 and above
2. Reading knowledge of French or German (or other non-Scandinavian language with faculty approval)
3. Written and oral examination
4. Thesis or non-thesis option
5. Candidates in Scandinavian languages and literature satisfy the department requirement in Old Icelandic

Doctor of Philosophy

Concentration primarily on one of two areas: Scandinavian languages and literature, or Scandinavian area studies, with emphasis on the student's target language. Major attention given to the history of Scandinavian languages, literary history and theory, and genre study. Opportunities for graduate work in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies exist.

Admission Requirements

Master of Arts degree with major in Scandinavian languages and literature or equivalent background.

Degree Requirements

Minimum 90 credits

1. 40 credits beyond the master's degree in Scandinavian languages and literature and related subjects approved by the department.
2. One quarter's study of Old Icelandic
3. Reading knowledge of French and German (other non-Scandinavian languages may be substituted with faculty approval)

4. General examination for admission to candidacy
5. 27 credits of SCAND 800 (dissertation) taken over at least three quarters
6. Final examination on the dissertation.

Financial Aid

Teaching assistantships in Danish, Finnish, Norwegian, Swedish, and Scandinavian area studies are usually available, as well as occasional research assistantships. If funding allows, a Baltic-language teaching assistantship may be available.

Slavic Languages and Literatures

Department Overview

Padelford A210

Slavic languages and literatures include the principal East European languages and literatures as well as Slavic linguistics. Languages include Bosnian/Croatian/Serbian, Bulgarian, Czech, Georgian, Polish, Romanian, Russian, Slovene, and Ukrainian.

Undergraduate Program

Adviser
Humanities Academic Services
A-002 Padelford, Box 354330
has-center@uw.edu

The Department of Slavic Languages and Literatures offers the following programs of study

- Bachelor of Arts degree with a major in Russian language, literature, and culture
- Bachelor of Arts degree with a major in Eastern European languages, literature, and culture
- Minors in Russian language, Russian literature/Slavic literatures, and Slavic languages

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Russian. Courses that develop writing skills.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Russian Language, Literature, and Culture (Minimum 50 credits):

1. RUSS 322, RUSS 323
2. RUSS 301, RUSS 302, RUSS 303; or RUSS 350. Students may satisfy the language requirement with a placement test. A successful placement test does not count toward the 50-credit requirement.
3. RUSS 110
4. RUSS 340
5. Courses from an approved list of electives to reach 50 credits. See adviser for approved list. Maximum 5 credits at the 100-level.
6. Minimum 50% of credits applied to the major taken at the 300- or 400-level

7. Minimum 2.00 cumulative GPA for all courses presented for the major
8. Minimum 15 graded credits presented for this major must be completed through the UW

Eastern European Languages, Literature, and Culture (Minimum 50 credits):

1. Principal Eastern European language to include one of the following: BCMS 406, BCMS 410, BULGR 406, CZECH 406, POLSH 406, ROMN 406, SLVN 406, UKR 406
2. SLAVIC 101, SLAVIC 320, SLAVIC 370, SLAVIC 425 (20 credits)
3. Courses selected from preceding principal Eastern European language courses or from an approved list of electives to reach 50 credits. See adviser for approved list. Maximum 5 credits at the 100-level.
4. Minimum 50% of credits applied to the major taken at the 300- or 400-level
5. Minimum 2.0 grade in each course and minimum 2.50 cumulative GPA for all UW and transfer courses presented for this major.
6. Minimum 15 graded credits presented for this major must be completed through the UW.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Russian Language: Minimum 25 credits

1. RUSS 201, RUSS 202, RUSS 203. Students may satisfy the language requirement with a placement test. A successful placement test does not count toward the 25-credit requirement.
2. Courses from an approved list of electives to reach 25 credits. See adviser for approved list. Minimum 15 credits at the 300- or 400-level.
3. Minimum 2.00 cumulative GPA for all courses presented for the minor.
4. Minimum 15 graded credits presented for the minor must be completed through the UW.

Russian Literature/Slavic Literatures: Minimum 25 credits

1. RUSS 322, RUSS 323, and 15 credits from an approved list of electives. See adviser for approved list. Maximum 5 credits at the 100-level.
2. Minimum 2.0 grade in each course presented for the minor.
3. Minimum 15 graded credits presented for the minor must be completed through the UW.

Slavic Languages: Minimum 25 credits

1. Completion of second-year language of one of the principal Eastern European languages, chosen from the following: BCMS 404, BCMS 405, BCMS 406; BULGR 404, BULGR 405, BULGR 406; CZECH 404, CZECH 405, CZECH 406; POLSH 404, POLSH 405, POLSH 406; SLVN 404 and 406; or UKR 404, UKR 405, UKR 406. Students may satisfy the language requirement with a placement test. A successful placement test does not count toward the 25-credit requirement.

2. Courses from an approved list of electives to reach 25 credits. See adviser for approved list. Maximum 5 credits at the 100-level. Minimum 15 credits at the 300- or 400-level.
3. Minimum 2.00 cumulative GPA for all courses presented for the minor.
4. Minimum 15 graded credits presented for the minor must be completed through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduating majors in Slavic languages and literatures have a solid command of the Slavic language of focus, with speaking, listening, reading, writing, and translation skills at the intermediate high or advanced level. They have a broad knowledge of the history of the relevant country, and of its modern culture. Students have a general knowledge of major periods and literature and detailed knowledge of two or three particular authors or genres. Students have a good understanding of Slavic languages in general and the language of their specialization in particular, as well as knowledge of major issues in contemporary phonology, morphology, and syntax. All students develop good general analytical skills and the ability to explore and understand another culture through mastery of its language.
- *Instructional and Research Facilities:* UW Language Learning Center
- *Honors Options Available:* Dobro Slovo membership is available to qualifying students (see adviser for requirements). With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Undergraduates may present their current research at the annual Slavic Student Symposium each spring. Suzzallo Library holdings include some 400,000 titles in Slavic languages and in other languages on Slavic subjects. The library subscribes to all important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles on microfilm and microfiche.
- *Department Scholarships:* Vadim Pahn Scholarship for continued study of Russian in an intensive summer language program; Asante Outstanding Paper Prize for the best undergraduate paper written in a Slavic Department course; Polish Studies Scholarship awarded for study in Poland of the Polish language and culture.
- *Student Organizations/Associations:* Rodnoi Ugolok, the Russian student society; Ukrainian Students United, the Ukrainian student society.

Graduate Program

Graduate Program Coordinator
 A210C Padelford, Box 354335
 (206) 543-6848
slavadv@uw.edu

The department offers the master of arts and doctor of philosophy degrees in Russian and East European languages, literatures, and cultures. Languages include Czech, Old Church Slavonic, Polish, Russian, and Bosnian/Croatian/Serbian.

The master's degree takes four to six quarters and the doctoral degree three additional years. Duration of each program, however, depends on the student's preparation upon entrance to the program.

Master of Arts

Admission Requirements

1. Bachelor's degree in Russian or Slavic studies, to include four years of Slavic language.

2. Conditional admission may be granted to those with equivalent experience and basic coursework. Students with three years of language who enroll in fourth-year summer intensive Russian are considered.
3. Diagnostic language test to establish level of proficiency.

Degree Requirements

Minimum 54-55 credits

1. *Coursework*
 - a. Slavic core courses (9-10 credits): RUSS 501, RUSS 502, SLAVIC 501, and SLAVIC 518 or SLAVIC 519
 - b. One Slavic linguistics course from the following (5 credits): SLAVIC 425, SLAVIC 426, SLAVIC 481, SLAVIC 550, SLAVIC 551, SLAVIC 561, SLAVIC 562, SLAVIC 563, SLAVIC 570
 - c. One Slavic literature course from the following (5 credits): RUSS 520, RUSS 521, RUSS 522, RUSS 523, RUSS 526, RUSS 542, RUSS 543, RUSS 570, RUSS 577
 - d. Second Slavic language sequence from the following (15 credits):
 1. BCMS 401, BCMS 402, BCMS 403
 2. BULGR 401, BULGR 402, BULGR 403
 3. CZECH 401, CZECH 402, CZECH 403
 4. POLSH 401, POLSH 402, POLSH 403
 5. SLVN 401, SLVN 402, SLVN 404
 6. UKR 401, UKR 402, UKR 403
 - e. Electives (10 credits): See department website for list of approved courses
2. *Language Exam*: Language proficiency exam in Russian or another Slavic language.
3. *Cumulative Project*: Complete a cumulative project, chosen from the following options:
 - a. *Thesis Option*: 10 credits of MA Thesis (SLAVIC 700). Directed by a graduate faculty member.
 - b. *Exam Option*: Two comprehensive MA examinations, and 10 credits of Independent Study (SLAVIC 600).
 - c. *Project Option*: 10 credits of Independent Project (SLAVIC 600). Emphasizes research and creativity.

Doctor of Philosophy

Admission Requirements

MA or equivalent degree. Students are admitted on the basis of language skills (Slavic and English), general background in Slavic cultures, and a comprehensive statement of purpose.

Degree Requirements

Minimum 90 credits

1. Minimum 90 credits, including graduate credits taken toward the MA degree. See Supervisory Committee chair for course planning.
2. Minimum one full year residence through the UW
3. Comprehensive examinations to include language reading ability, written field examinations, and a general oral examination
4. Dissertation: three quarters of SLAVIC 800, followed by dissertation defense

Research Facilities

Suzzallo Library holdings include some 400,000 titles in Slavic languages and other languages on Slavic subjects. The library subscribes to important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles.

Assistantship Opportunities

The department offers teaching assistantships and several other types of fellowships.

Social Science (Evening Degree)

Program Overview

103 Lewis Hall

This multidisciplinary major includes upper-division social science courses selected by faculty of the College of Arts and Sciences. Students explore diverse political, social, environmental, gender, ethnic, and cultural perspectives in pursuit of their degrees. Coursework encourages greater understanding of issues, ideas, and themes in history and in the contemporary world. Analytical, research, and communication skills which can enhance a person's career opportunities are emphasized.

The coursework in social science is organized into three tracks:

- Social and Environmental Issues
- Law, Politics, and the Economy
- Gender, Ethnicity, and Culture

Social and Environmental Issues addresses key ecological, environmental, and social issues of tribal, peasant, industrial, and post-industrial societies from around the world. This track includes assessments of how technological, ecological, environmental, economic, cultural, and sociopolitical factors interact to affect the form and function of social, cultural, and political systems and institutions. It also features courses which explain classical and contemporary theories of anthropology, economics, geography, history, political science, and sociology bearing on these issues.

Law, Politics, and the Economy deals with the role and function of government, legal institutions, and economic and political processes, focusing on the complex interaction of political and economic forces which shape social life. Important areas of study include the character of political power and inequality, law and other sources of state legitimacy, international relations and the economic interdependence of nation-states, and the role of the state in maintaining social order and ameliorating conflict within and between societies.

Gender, Ethnicity, and Culture studies the cultural, geographic, historical, political, psychological, and social factors which define, shape, and change the various peoples of the United States. Racism, age and sex discrimination, the status and role of women, the treatment of immigrants, the emergence of classes and sociocultural interest groups, and aspects of religious movements and religious conflict are core topics. Courses assessing theories that examine and explain these issues are also essential.

Undergraduate Program

Adviser
103 Lewis Hall, Box 353921
(206) 543-6160
advisers@pce.uw.edu

Social Science offers the following program of study:

- The Bachelor of Arts degree with a major in social science

Bachelor of Arts

Suggested First- and Second-Year College Courses: English composition and additional writing. Introductory courses in Individuals & Societies (I&S); Visual, Literary, & Performing Arts (VLPA); and Natural World (NW). First-year foreign language study.

Program Admission Requirements

Students are not being admitted to this program for the 2014-2015 academic year.

1. [Admission](#) to the Evening Degree program (separate from admission to the UW day program)
2. 75 college quarter credits. Most students admitted have completed two years of lower-division college work.
3. See adviser for evaluation of applicable courses and credits.

Major Requirements

60 credits from the approved list of social science survey and track courses, as follows:

1. Survey courses (15 credits maximum). Normally at the 200 level
2. Primary track (25-35 credits from one track)
3. Track electives (10-20 credits). From courses in other than the primary track
4. Minimum 45 credits in 300- and 400-level courses, including at least 15 credits in 400-level courses.
5. Minimum 15 credits of 300- and 400-level social science courses that do not overlap with second-major requirements when double majoring in communication, English, and humanities
6. Minimum 25 credits completed in residence through the UW. For list of applicable courses, consult the adviser or go to www.evedegree.washington.edu/edp/majors/social_courses.asp

Additional Degree Requirements

1. English composition and additional writing (15 credits)
2. Quantitative and Symbolic Reasoning (Q/SR) (4-5 credits)
3. Foreign language -- through the third quarter of a single foreign language (0 to 15 credits, depending on placement)
4. Areas of Knowledge
 - a. Visual, Literary, & Performing Arts (VLPA) (20 credits)
 - b. Individuals & Societies (I&S) (20 credits)
 - c. Natural World (NW) (20 credits)
 - d. Some credits in I&S and/or VLPA may count also toward the major
5. Additional work to complete a minimum 180 credits overall.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Social science graduates are prepared to think critically and communicate effectively about the interplay among political, demographic, cultural, and social dynamics in considering domestic and international legal, media, environmental, gender, and ethnicity issues. They are able to examine complex issues in a contemporary and historical context. Majors develop the ability to analyze and evaluate issues from varied disciplinary perspectives. A greater respect for diversity and the ability to integrate knowledge when applying learning to the challenges of living in a complex global society results.

Specific skills acquired include writing, critical thinking, research, analytical thinking, integrative cognitive abilities, and effective public speaking.

Social science majors pursue widely varied careers, including labor relations, human resources, law, social work, broadcast journalism, corporate training, private enterprise, education, public administration, mental health, marketing, and non-profit management.

- *Instructional and Research Facilities:* Students use all university library resources and facilities corresponding with their individual research needs. In addition, each of the contributing social science academic departments offers individual resources to majors. Check with advisers for options.
- *Honors Options Available:* None offered.
- *Research, Internships, and Service Learning:* The program works collaboratively with students interested in pursuing independent study and research opportunities through academic departments that contribute to the major. Opportunities for work with the Carlson Center, Office for International Exchanges, and service learning are possible for all students.
- *Department Scholarships:* The Evening Degree program awards need-based financial aid assistance each year to students from a general fund. Two additional scholarship resources are the Rodney I. Straub Endowed Scholarship and the Nicole Snyder Dettmar Endowed Scholarship.
- *Student Organizations/Associations:* None

Sociology

Department Overview

211 Savery

The Department of Sociology has a strong commitment to research, publication, and training and is dedicated to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

Undergraduate Program

Adviser
203 Savery Hall, Box 353340
(206) 543-5396
asksoc@uw.edu

The Department of Sociology offers the following program of study

- The Bachelor of Arts degree with a major in sociology

Bachelor of Arts

Suggested First- and Second-Year College Courses: SOC 110, SOC 212, SOC 240, SOC 270, or any 200-level sociology courses. General coursework developing critical thinking or analytical skills.

Department Admission Requirements

1. Introductory courses (10 credits): SOC 300 (may be in progress at time of application). Any additional 5 credit sociology course.
2. Minimum 2.0 grade for completed course(s) required for admission. Minimum 2.00 cumulative UW GPA.
3. Application: See department website for information required as part of application packet. Exceptions based on special circumstances are reviewed on a case-by-case basis. Application deadlines are the first Friday of each quarter. All applicants who meet the qualifications stated above are admitted in time to register as sociology majors for the following quarter.

Major Requirements

50 credits as follows:

1. Introductory courses (10 credits): SOC 300 and any additional 5 credit sociology course
2. Statistics and theory (10 credits): 5 credits from STAT 220, STAT 311, SOC 221/STAT 221/CS&SS 221, or SOC 321/STAT 321/CS&SS 321; and 5 credits for SOC 316
3. Upper-division sociology electives (20 credits): Any 300-level or 400-level sociology courses, excluding SOC 316, SOC 395, SOC 399, SOC 499
4. Sociology electives (10 credits): Any additional sociology courses, with a maximum 5 credits of either SOC 399 or SOC 499

5. Maximum 10 credits from sociology practicum coursework (SOC 402, SOC 403, SOC 404, or SOC 494) may apply to elective major requirements. Maximum 5 credits from sociology practicum coursework may apply toward the upper-division elective requirement.
6. Academic standards: Minimum 2.0 grade in any course applied to major requirements. Minimum cumulative 2.50 GPA for courses applied to major requirements. 25 of 50 required sociology credits completed in residence through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The Department of Sociology's undergraduate degree is designed to teach majors to think systematically about the relationships among individuals, groups, organizations, and societies. Sociology majors engage current research in political sociology, social stratification, race and ethnicity, deviance and social control, demography and other areas, and develop quantitative and analytical skills in research methods and social theory courses.
- *Instructional and Research Facilities:* The Center for Social Science Computing and Research (CSSCR) maintains an extensive data archive, and offers consulting support and computer lab access to students in sociology courses. The Center for Studies in Demography and Ecology (CSDE) and the Center for Statistics and the Social Sciences (CSSS) provide interdisciplinary courses, seminars, and research opportunities for sociology students.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Sociology majors participate in a variety of internships each quarter. Students can receive academic credit under the supervision of a Sociology faculty member. See adviser for details.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* A chapter of the Alpha Kappa Delta International Sociology Honor Society organizes events involving undergraduates with faculty and graduate students.

Graduate Program

Graduate Program Coordinator
211 Savery, Box 353340
(206) 221-3280
socadvis@uw.edu

Sociology seeks to explain social structure, social institutions, and social interaction. There are three emphases in the graduate training program: understanding and critically evaluating social theory and empirical research; doing theoretically guided research that explores, assesses, and further develops explanatory theories; and developing communication skills (with emphasis on teaching and scholarly writing) that are useful in transmitting sociological knowledge. The department has particular strengths in social and formal demography, deviance and social control, stratification and inequality, health, comparative and historical sociology, family and gender studies, and quantitative methods.

Emphasis is on empirical research aimed at developing explanatory theories. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered on various methods: statistical, survey, demographic and ecological, field research, and historical. Students learn social research by participating in faculty projects or developing their own studies.

Master of Arts

Admission Requirements

1. Applicants are evaluated on undergraduate performance, Graduate Record Examination scores, statement of educational plans, recommendations, and samples of written work.
2. *Application Deadline:* December 15. Admission is for autumn quarter only. International applicants should submit required application materials by November 1.
3. *Application Materials:* All applicants use the web-based application. See departmental website (<http://www.soc.washington.edu>) for more information.

Degree Requirements

Minimum 45 credits

The master's program, primarily preparation for PhD work, is not a terminal degree, although it may serve as good training for non-academic research. The MA program consists of three elements:

- *Substantive training:* coursework in substantive areas and social theory
 - *Methodological training:* work in social statistics, general social science methodologies, and a data analysis practicum
 - *The master's thesis:* independent empirical research conducted under the supervision of the MA committee
1. Sociological Theory - SOC 510
 2. Statistics - SOC 504, SOC 505, SOC 506
 3. Logic of Social Inquiry - SOC 508
 4. Proseminar - SOC 501
 5. MA Thesis - SOC 700
 6. Electives - 18 credits.

Minimum 12 graded elective credits in courses offered by the Sociology Department. All courses should be at the 500 level or above, although a student may petition for inclusion of a 400-level course. No more than 3 elective credits may be assigned a letter grade (e.g., S or CR) in place of a numerical grade. Minimum 3.30 cumulative GPA.

Doctor of Philosophy

Admission Requirements

Completion of an MA degree in sociology. Occasionally MA degrees in other fields are accepted.

See above Master of Arts section for admission requirements.

Degree Requirements

Minimum 90 credits, to include:

45 credits beyond the Master of Arts requirements (above) as follows:

1. Eight graded Sociology courses beyond the required first-year required courses. Electives taken while completing the MA can be counted. Minimum 24 credits overall.
2. PhD training plan – four methods/skills/knowledge courses focusing on particular advanced methodological skills (broadly defined) or knowledge necessary to undertake dissertation research. Up to two of these courses may also count as part of the required eight graded sociology courses.
3. Comprehensive examination
4. General examination
5. Final examination
6. Dissertation (27 credits)
7. Minimum 3.30 cumulative GPA

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

Spanish and Portuguese Studies

Department Overview

C104 Padelford

Undergraduate Program

C104 Padelford

The educational philosophy of Spanish and Portuguese studies is that knowledge and understanding of other cultures is fundamental in an increasingly global world, and that competence in the languages of those cultures is an indispensable gateway to them. Spanish studies provides students with the four basic language skills (listening, speaking, reading, and writing) in increasing levels of sophistication so that they may read and analyze works of literature written in Spanish as well as understand complex cultural structures and artifacts from Spain, Latin America, and the Latino populations of the United States. The UW offers beginning and intermediate Portuguese and all levels of Spanish.

Adviser

Humanities Academic Services

A-002 Padelford, Box 354330

has-center@uw.edu

The Department of Spanish and Portuguese Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in Spanish
- A minor in Spanish

Bachelor of Arts

Suggested First- and Second-Year College Courses: SPAN 101, SPAN 102, SPAN 103, or SPAN 121, SPAN 122, SPAN 123, or SPAN 134; SPAN 201, SPAN 202 (or SPAN 210), SPAN 203. Spanish, Latin American, and Chicano literature. Courses related to history and culture. Courses in English literature and comparative literature

Department Admission Requirements

1. Completion of SPAN 203, with a minimum cumulative 2.70 GPA for all Spanish coursework completed and a minimum 2.5 grade in each Spanish course
2. Completion of at least 5 credits of English composition with a minimum 2.5 grade
3. Change-of-major forms, available online and outside C-104F Padelford Hall, are processed autumn, winter, and spring quarters only. Forms and unofficial transcripts must be turned in by the end of the third week of the quarter to assure registration priority for the following quarter. Paperwork turned in after the third week of the quarter is processed during the following admission cycle.

Major Requirements

58 credits beyond SPAN 203 as follows:

1. SPAN 301, SPAN 302, SPAN 303 (or equivalents, SPAN 314, SPAN 315, SPAN 316; SPAN 310; SPAN 330)
2. SPAN 321, SPAN 322, SPAN 323
3. One 300-level literature elective: See department website for list of eligible courses.
4. Five 400-level courses
5. Participation in an approved Study Abroad program (one quarter minimum, any level) or one or more experiential learning projects (minimum 2 credits of SPAN 392) which involve significant engagement with the Spanish-speaking community. Students are strongly encouraged to do both.
6. Other than SPAN 400 through SPAN 406, only one course whose instructional materials are primarily in English may apply to the major.

Minor

Minor Requirements: Minimum 27 credits above SPAN 203 level to include the following:

1. One of the following sequences: SPAN 301, SPAN 302, and either SPAN 303 or SPAN 330; SPAN 314, SPAN 315, and either SPAN 316 or SPAN 330; SPAN 310 and either SPAN 303, SPAN 316, or SPAN 330
2. Four 300- or 400-level electives
3. Only one course in which instructional materials are primarily in English may apply to the minor. SPAN 327 may not apply to the minor and is not open to heritage/native speakers.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of Spanish and Portuguese is both skills- and content-based, i.e., it has practical and cognitive elements. Students learn to communicate in Spanish or Portuguese, refining their language skills as they acquire a body of knowledge about the literary and cultural history of Spain, Latin America, and the Spanish-speaking populations of the United States. Graduates have found these skills extremely useful as they pursue careers in teaching, business, NGOs and human rights organizations, law, and politics.
- *Instructional and Research Facilities:* Departmental facilities include a Writing Center for students registered in third-year Spanish. The Center for Spanish Studies, housed in the department, is a joint initiative of the University of Washington, the Education Office of the Embassy of Spain, and the Office of Superintendent of Public Instruction. This center provides services that include workshops for K-12 teachers of Spanish, sponsorship of cultural events, and a lending library of books as well as audio and visual materials. A branch of the Spanish government sponsored Cervantes Institute, also housed in the department, offers linguistic and cultural resources to the university and the general community as well.

The department directs three study abroad programs, in León (Spain), Oaxaca (Mexico) and Cádiz (Spain). These programs are "living laboratories." Approximately 100 students participate each year.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Experiential Learning:* Internship opportunities are posted on the department website as they become available. Also, students may participate in experiential learning (which may include service learning), in which they combine study with service to the community. Students must volunteer two-to-five hours per week (a minimum of 30 hours per

quarter) in organizations that provide services primarily, although not exclusively, to Spanish speakers. Alternatively, they may volunteer in public schools as tutors of different academic themes. Some of the organizations and schools involved include CASA Latina, The Mexican Consulate, El Centro de la Raza, Our Lady of Mt. Carmel, Northwest Immigrant Rights Project, Cascade People's Center, Center for Spanish Studies, John Stanford International School, Bryant Elementary School, John Hay Elementary School, Hamilton Middle School, Nathan Hale High School, the Pipeline Project, and the East Side Literacy program. Students apply and increase their knowledge of the Spanish language in a real context. They are exposed to Hispanic multiculturalism and become active agents of social change in the community.

- *Department Scholarships:* An annual scholarship, the Susan B. Johnson Memorial Endowment Fund, is awarded to a student of Spanish for foreign study in Spain.
- *Student Organizations/Associations:* None.

Of Special Note: 100- and 200-level Spanish courses do not count toward major/minor requirements.

Graduate Program

Graduate Program Adviser
C104F Padelford, Box 354360
(206) 543-2020
spsadv@uw.edu

The Department of Spanish and Portuguese Studies offers a program of graduate study leading to the Master of Arts degree.

The Master of Arts degree program in Hispanic Literary and Cultural Studies was reformed and updated in 2001 to foster study of Hispanic culture, literature, and language together. The program calls attention to the rich diversity of Hispanic cultural texts and to their interdisciplinary study while also promoting broad understanding of Spanish and Latin American literature. The program gives careful attention to acquainting students with the traditions of scholarship in the field as well as a range of current textual theory, criticism, and research methods.

Study of Portuguese and other Romance literatures and cultures, comparative literature, Romance and Spanish linguistics, and other related disciplines may be included in the master's degree program. The degree is earned normally in six academic quarters.

Students who wish to pursue advanced study in Spanish and Portuguese in a post-master's degree program may do so by entering the doctoral studies programs in Hispanic Studies of Comparative Literature or other departments of the University.

Master of Arts

Admission Requirements

1. Application for admission to the Graduate School
2. Three letters of recommendation
3. Unofficial transcripts. International applicants must also submit official transcripts to the Graduate School.
4. Academic autobiographical statement composed by the applicant in Spanish

5. A sample of the applicant's written work in Spanish in some area of Hispanic literature and culture. This may be a copy of a paper written for a course in the area of the applicant's major. An analytical or critical writing sample is preferred.
6. Graduate Record Examination (GRE) scores are required from applicants whose first language is English, and from applicants whose first language is not English who hold a bachelor's, master's, or doctoral degree from a regionally accredited university in one of the countries noted in Memo 8 from the Graduate School Memoranda. The GRE requirement is waived for applicants whose first language is not English, if they do not hold a bachelor's, master's, or doctoral degree from a regionally accredited university in one of the countries noted in Memo 8 from the Graduate School Memoranda.
7. Foreign students: Applicants whose native language is not English should note that the Graduate School requires proof of proficiency in the English language in one of the ways described in detail in Memo 8 of the Graduate School Memoranda. TOEFL (Test of English as a Foreign Language) or its computerized version (TOEFLC) or the Michigan Test and also the TSE (Test of Spoken English). A TOEFL score of 500 (or a TOEFLC score of 173) is required for admission, and a score of 580 (or 237 on the computerized form) is required for teaching assistant eligibility. Alternatively a Michigan Test score of 80 is required for admission and 90 for teaching assistantship eligibility. A minimum score of 55 is required on the TSE.8. Complete and upload Assistantship and Fellowship Application regardless of whether or not applicant is applying for a TA position.
8. Complete and upload Assistantship and Fellowship Application regardless of whether or not applicant is applying for a TA position. If applying for a Teaching Assistant position, the following is also required.
 - A digital voice recording (mp3 file format preferred) in which the applicant summarizes his/her reasons for applying to the graduate program and explains his/her interest in the TA position. Only spontaneous speech is considered. The recording must be in English for native Spanish speakers, and in Spanish for all other applicants.
 - Resume or Curriculum Vitae

Degree Requirements

1. A total of 60 applicable credits (500 level and above). To remain in good standing the student must maintain a 3.00 cumulative GPA. The minimum acceptable grade for any given course is 2.7.
2. Either SPAN 577, or an alternate graduate-level literary theory course which must be pre-approved by the Graduate Program Coordinator
3. SPAN 510 is required of all teaching assistants and is taken during or before a student's first quarter of teaching.
4. *Distribution requirement:* Minimum 5 credits (normally one course) must be earned in five of the six: Medieval Spain, "Golden Age" Spain; Spain of the eighteenth and nineteenth centuries; twentieth-century Spain; colonial and nineteenth-century Latin America; and twentieth-century Latin America.
5. MA candidates must pass an MA examination: During the first quarter of graduate study, students must select one area in which to be examined from the six areas of study specified above. They then have a year to prepare that field. Students may not write their MA thesis in the field they have chosen for their examination. The MA examination is written at the beginning of the fourth quarter of study (ordinarily fall quarter). The examination consists of one question, and the student has five hours to answer his/her question, with only a dictionary available for consultation. The examination in the chosen area is based on the MA reading list, available on this website: depts.washington.edu/spanport/programs/grad_readingList.html.

6. MA candidates must complete an MA Thesis: Students must take ten credits of MA thesis (SPAN 700) in their second year of study (5 credits in the fall quarter and 5 credits in the winter quarter). The MA thesis (minimum 45 pages of text, plus bibliography) is directed by a graduate faculty member and submitted to the Graduate Studies Committee for its approval by the end of the fifth quarter of study.
7. Admission to the Graduate School allows students to continue graduate study and research at University of Washington only as long as they maintain satisfactory performance and progress toward completion of their degree program. Details can be found here: depts.washington.edu/spanport/programs/grad_academicRequirement.html.

Financial Aid

The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the ten weeks of the quarter.

Applicants whose native language is not English must demonstrate English proficiency in one of the ways described in the Graduate School's Memorandum 15 to be considered for a TA position. For more information

see: www.grad.washington.edu/policies/memoranda/memo08.shtml; www.grad.washington.edu/policies/memoranda/memo15.shtml.

Speech and Hearing Sciences

Department Overview

210 Eagleson Hall

Speech and hearing sciences concern the processes and disorders of human communication and swallowing across the life span. This includes the study of typical hearing, speech, and language, cognitive-communication, and swallowing development; anatomy and physiology of speech, hearing, and swallowing; speech acoustics and perception; the nature of language, speech, cognitive-communication, swallowing, and hearing disorders in children and adults; social and cultural aspects of communication disorders; and the clinical processes involved in identification, prevention, and remediation of those disorders.

Undergraduate Program

Adviser

210 Eagleson, Box 354875

(206) 685-7403

shugadv@uw.edu

The Department of Speech and Hearing Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in speech and hearing sciences. (Formerly Speech and Hearing Sciences offered two major options: (1) General Academic and (2) Communication Disorders. As of summer quarter, 2019, however, those two options have been replaced by a single major. Please refer to the [UW Seattle General Catalog Archive](#) for information about the options.)
- An accelerated, fee-based, Bachelor of Science degree with a major in speech and hearing sciences for candidates with an existing bachelor's degree.

Bachelor of Science

Suggested First and Second-Year College Courses: Social/behavioral science: anthropology, public health, psychology, or sociology. Biological science: BIOL 118 or BIOL 180. Physics or chemistry: PHYS 107, PHYS 110, or CHEM 110, CHEM 220. Statistics: STAT 220 or EDPSY 490. Linguistics: LING 200 or LING 400.

Department Admission Requirements

1. Minimum 75 credits
2. Minimum 2.50 cumulative GPA
3. Completion of the following with a minimum 2.0 grade in each
 - a. *Social/Behavioral Science:* psychology, educational psychology, sociology, anthropology, or public health. See department for approved list.(3-5 credits)
 - b. *Biological Science:* human- or animal-based biological science, anatomy and physiology, neuroanatomy and neurophysiology, human genetics, or veterinary science. Laboratory component not required. See department for approved list.(3-5 credits)

- c. *Physical Science*: chemistry or physics. Laboratory component not required. See department for approved list.(3-5 credits)
 - d. *Statistics*: non-remedial, historical, or methodological. See department for approved list.(3-5 credits)
 - e. *Linguistics*: linguistics that provides introductory knowledge of phonology, phonetics, morphology, syntax, and semantics. See department for approved list. (3-5 credits) (Transfer students may apply with this course in progress or planned. See adviser.)
4. Admission is capacity constrained, based on the following criteria. Meeting the criteria guarantees consideration but not admission.
 - a. GPA
 - b. Preparation for major in speech and hearing sciences as indicated by grades earned in courses required for admission
 - c. Personal statement reflecting an interest in and commitment to speech and hearing science
 - d. Other evidence of a commitment to becoming a speech and hearing sciences major
 - e. Copies of unofficial transcripts from all colleges attended (UW and transfer)
 5. Admission is for autumn quarter only. Application deadline: for UW students - Monday of the third week of spring quarter; for transfer students - February 15. Transfer students may apply to the department (if they are at or near junior standing) and to the UW concurrently. Applicants are notified of the department's decision within four weeks. Applications and additional information available outside 210 Eagleson and on the department's website.

Major Requirements

Minimum 50 credits

1. SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 305, SPHSC 306, SPHSC 320, SPHSC 371, SPHSC 405, SPHSC 425, SPHSC 461, SPHSC 481
2. Minimum 2.00 cumulative GPA for all courses applied to the major

Post-baccalaureate Bachelor of Science

A fee-based postbaccalaureate program, designed for individuals who already have a bachelor's degree or an advanced degree in a discipline other than speech and hearing sciences and wish to obtain the necessary academic background to apply directly to a graduate program in speech-language pathology or audiology. An intensive program designed to take four quarters with a mandatory summer quarter start. Students have matriculated status at the UW as they work toward a second bachelor's degree in preparation for graduate school.

Admissions Requirements

1. Bachelor's degree or advanced degree outside the area of speech and hearing sciences
2. Minimum 2.50 cumulative GPA
3. Completion of the following with a minimum 2.0 grade in each
 - a. *Social/Behavioral Science*: psychology, educational psychology, sociology, anthropology, or public health. See department for approved list. (3-5 credits)

- b. *Biological Science*: human- or animal-based biological science, anatomy and physiology, neuroanatomy and neurophysiology, human genetics, or veterinary science. Laboratory component not required. See department for approved list. (3-5 credits)
 - c. *Physical Science*: chemistry or physics. Laboratory component not required. See department for approved list. (3-5 credits)
 - d. *Statistics*: non-remedial, historical, or methodological. See department for approved list. (3-5 credits)
 - e. *Linguistics*: linguistics that provides introductory knowledge of phonology, phonetics, morphology, syntax, and semantics. See department for approved list. (3-5 credits)
4. Admission is capacity constrained, based on the following criteria. Meeting the criteria guarantees consideration but not admission.
 - a. Overall academic record and GPA from prior degree
 - b. Preparation for major in speech and hearing sciences as indicated by grades earned in courses required for admission
 - c. Personal statement reflecting an interest in and commitment to speech and hearing science
 - d. Other evidence of a commitment to becoming a speech and hearing sciences major
 - e. Copies of unofficial transcripts from all college attended
 - f. Three letters of recommendation sent to the department. SPHSC recommendation form available on department website. However, a letter is acceptable.
 5. Application deadline: February 15. Incomplete applications are not processed. Admission is contingent upon admission to UW. (See program website for details on the two-part admission process.)

Degree Requirements

Minimum 50 credits:

1. SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 305, SPHSC 306, SPHSC 320, SPHSC 371, SPHSC 405, SPHSC 425, SPHSC 461, SPHSC 481
2. Minimum 2.00 cumulative GPA for all required courses

Continuation Policy

All students must make satisfactory academic progress in the degree program. Failure to do so results in probation, which can lead to dismissal. For the complete continuation policy, contact the department adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The graduate (1) has knowledge of the following: mechanisms involved in speech, language, and hearing; societal implications of language differences and of disorders of speech, language, and hearing; opportunities in, and requirements for, careers available to those in the speech and hearing sciences; (2) understands the following: normal acquisition of speech and language; the etiology and nature of communication disorders across the lifespan; principles and procedures for diagnosis and treatment of speech, language, and hearing disorders; the manner in which context (specifically, situation, social/interpersonal, and culture context) influences communication and disorders; social-cultural aspects of communication development and disorders; (3) has the following abilities: to analyze language in

terms of its auditory, phonetic, phonological, morphological, and syntactic properties; to utilize strategies for solving scientific problems; to read and understand relevant literature; (4) has experience with a research project

- *Instructional and Research Facilities:* classrooms, research laboratories, computer laboratory, and clinic located in the department and in nearby campus buildings
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Faculty welcome undergraduate students into their research labs, offering independent study research opportunities (SPHSC 499), in addition to mentored, year-long honors research projects (SPHSC 498). No formal internship programs offered. Clinical learning opportunities are available (SPHSC 491). See adviser for community-based service learning and internship opportunities.
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* The National Student Speech Language Hearing Association (NSSLHA) UW chapter, 153 Eagleson Hall.

Graduate Program

Graduate Student Services
Eagleson Hall, Box 354875
(206) 685-7402
shgrad@uw.edu

The department offers four graduate degree programs that equip students to do research, teach at the college and university level, and provide clinical services to the communicatively impaired.

- The Master of Science in Speech-Language Pathology (MS SLP)
- The Master of Science in Medical Speech-Language Pathology (MS MedSLP)
- The Doctor of Audiology (AuD)
- The Doctor of Philosophy (PhD)

At the MS and AuD level, specific focus is on evidence-based clinical procedures involved in the identification, prevention, and remediation of communication disorders. Students meet all requirements of the Certificate of Clinical Competence (CCC) granted by the American Speech-Language-Hearing Association (ASHA), the professional, scientific, and credentialing organization for speech-language pathology and audiology professionals.

At the PhD level, the program provides opportunities for development of scholarly and professional competence in various areas of specialization: speech and language acquisition, phonetics, speech production, hearing, hearing development, psychoacoustics, physiological acoustics, speech perception, and assessment and treatment of human communication disorders related to language, speech, and hearing.

Master of Science in Speech-Language Pathology (MS SLP)

Entrance is for autumn quarter only. The department does not accept transfer students, Graduate Non-Matriculated (GNM) applicants, or applicants interested in a non-clinical master's degree.

Admission Requirements

1. Complete UW Graduate School application between September 15 and January 15, to include the following:
 - a. Department's supplemental application
 - b. Unofficial transcripts for all schools attended
 - c. Official GRE scores earned within the last five years
 - d. Three letters of recommendation
 - e. Personal statement
 - f. Resume
2. Minimum 3.00 GPA for the last 90 quarter credit hours of study (60 semester)
3. English language proficiency
4. Bachelor's degree from a regionally accredited institution with a major in speech and hearing sciences (communication disorders, communication sciences and disorders, or a similarly named major) or in another major with sufficient undergraduate coursework in speech and hearing sciences (communication disorders, communication sciences and disorders, or a similarly named program)
5. Prerequisite undergraduate coursework as required by the American Speech-Language-Hearing Association's (ASHA) accreditation standards and guidelines.
 - a. Speech and hearing sciences coursework across these areas of knowledge:
 - i. Linguistics
 - ii. Phonetics/language science
 - iii. Anatomy and physiology of the speech mechanism
 - iv. Speech and language acquisition/development
 - v. Speech and language disorders
 - vi. Hearing science/nature of sound
 - vii. The hearing mechanism
 - viii. Hearing disorders
 - ix. Audiometry
 - x. Aural rehabilitation/management of hearing loss
 - xi. Social cultural aspects of communication
 - xii. Principles of assessment
 - xiii. Principles of treatment
 - b. Basic science and statistics coursework: one course in each of the following areas:
 - i. Biological science (biology, anatomy & physiology, neuroanatomy & neurophysiology, human genetics, or veterinary science)
 - ii. Social or behavioral science (psychology, sociology, anthropology, or public health)
 - iii. Physical science (physics or chemistry)
 - iv. Statistics

6. Minimum 25 documented, clinical observation hours within the scope of practice of speech-language pathology, under direction of an ASHA-certified speech-language pathologist.

Degree Requirements

Minimum 108 credits

1. *Didactic (57 credits)*: SPHSC 500, SPHSC 501, SPHSC 506, SPHSC 529, SPHSC 531, SPHSC 532, SPHSC 533, SPHSC 534, SPHSC 535, SPHSC 536, SPHSC 537, SPHSC 538, SPHSC 539, SPHSC 540, SPHSC 565
2. *Clinical (43 credits)*
 - a. Minimum 43 credits from SPHSC 591, SPHSC 551, SPHSC 552, SPHSC 555, either SPHSC 601 or SPHSC 602. Includes completion of a pre-internship and a full-time internship in a community-based clinical facility.
 - b. Minimum 375 clock hours of supervised clinical experience in the practice of speech-language pathology.
3. *Electives*: Either adult-emphasis path or pediatric-emphasis path (8 credits)
 - a. *Adult-emphasis path*: one from SPHSC 541, SPHSC 545, SPHSC 546, or SPHSC 548, and two out-of-department elective courses
 - b. *Pediatric-emphasis path*: SPHSC 526, SPHSC 543, SPHSC 550
4. *Thesis (optional)*: SPHSC 700 (minimum 9 credits)
5. *Additional Requirements*: 36 credits of non-clinical practicum work at the 400 level or above. Minimum 18 of these 36 credits in courses numbered 500 and above. Maximum 9 thesis credits at 500 level or above. Completion of requirements for the Certificate of Clinical Competence (CCC) of the American Speech-Language-Hearing Association.

Master of Science in Medical Speech-Language Pathology (MS MedSLP)

Entrance is for autumn quarter only. The department does not accept transfer students, Graduate Non-Matriculated (GNM) applicants, or applicants interested in a non-clinical MS degree.

Admission Requirements

1. Complete UW Graduate School Application between September 15 and January 15, to include the following:
 - a. Department's supplemental application
 - b. Unofficial transcripts for all schools attended
 - c. Official GRE scores earned within the last five years
 - d. Three letters of recommendation
 - e. Personal statement
2. Minimum 3.00 GPA for the last 90 quarter credit hours of study (60 semester)
3. Demonstrated English language proficiency
4. Bachelor's degree from a regionally accredited institution with a major in speech and hearing sciences (communication disorders, communication sciences and disorders, or a similarly named major) or in another major with sufficient undergraduate coursework in speech and hearing sciences (communication disorders, communication sciences and disorders, or a similarly named program).

5. Completed prerequisite undergraduate coursework as required by the American Speech-Language-Hearing Association's (ASHA) accreditation standards and guidelines.
 - a. Speech and hearing sciences coursework across these areas of knowledge:
 - i. Linguistics
 - ii. Phonetics/language science
 - iii. Anatomy and physiology of the speech mechanism
 - iv. Speech and language acquisition/development
 - v. Speech and language disorders
 - vi. Hearing science/nature of sound
 - vii. The hearing mechanism
 - viii. Hearing disorders
 - ix. Audiometry
 - x. Aural rehabilitation/management of hearing loss
 - xi. Social cultural aspects of communication
 - xii. Principles of assessment
 - xiii. Principles of treatment
 - b. Basic science and mathematics coursework. Minimum one course in each of the following areas:
 - i. Biological science (biology, anatomy & physiology, neuroanatomy & neurophysiology, human genetics, or veterinary science)
 - ii. Social or behavioral science (psychology, sociology, anthropology, or public health)
 - iii. Physical science (physics or chemistry)
 - iv. Statistics
6. Minimum 25 documented, clinical observation hours within the scope of practice of speech-language pathology, under direction of an ASHA certified speech-language pathologist.

Degree Requirements

Minimum 114 credits

1. *Didactic (72 credits)*: SPHSC 500, SPHSC 501, SPHSC 506, SPHSC 507, SPHSC 529, SPHSC 531, SPHSC 532, SPHSC 533, SPHSC 534, SPHSC 535, SPHSC 536, SPHSC 537, SPHSC 538, SPHSC 539, SPHSC 540, SPSHC 541, SPSHC 543, SPSHC 545, SPHSC 546, SPHSC 548, SPHSC 549, SPHSC 565
2. *Clinical (42 credits)*
 - a. 42 credits of SPHSC 553 and SPHSC 554. Includes a full-time internship in a community-based clinical facility.
 - b. Minimum 375 clock hours of supervised clinical experience in the practice of speech-language pathology. Includes completion of a pre-internship and a full-time internship in a community-based clinical facility.
3. *Thesis (optional)*: SPHSC 700 (minimum 9 credits)

4. *Additional Requirement:* 36 credits of non-clinical graduate work at the 400 level or above. Minimum 18 of these 36 quarter credits in courses numbered 500 and above. Maximum 9 thesis credits at the 500 level and above. Satisfactory completion of all didactic and practicum requirements detailed above. Completion of requirements for the Certificate of Clinical Competence (CCC) of the American Speech-Language-Hearing Association.

Doctor of Audiology

Entrance is for autumn quarter only. The department does not accept transfer students, Graduate Non-Matriculated (GNM) applicants, or applicants interested in a non-clinical AuD degree.

Admission Requirements

1. Complete UW Graduate School Application between September 15 and January 15, to include the following:
 - a. Departmental's supplemental application
 - b. Unofficial Transcripts for all schools attended
 - c. Official GRE scores earned within the last five years
 - d. Three letters of recommendation
 - e. Personal statement
 - f. Resume
2. Minimum 3.00 GPA for last 90 quarter credit hours of study (60 semester)
3. Demonstrated English language proficiency
4. Bachelor's degree from a regionally accredited institution

Undergraduate Coursework: Foundational coursework is required for the graduate degree and clinical certification in audiology. The department encourages, but does not require, students to complete foundational coursework prior to starting graduate study.

1. Basic science and mathematics: Minimum one undergraduate course in each of the following areas to be eligible for ASHA certification: biological science; social or behavioral science; physical science; statistics. See adviser for list of acceptable courses.
2. Speech and hearing sciences coursework. Undergraduate coursework in normal development of speech and language; and in language and speech disorders across the life span, to be eligible for ASHA certification.
3. If undergraduate coursework is not completed prior to graduate study, students take one or more of the following speech and language courses during their graduate program: SPHSC 250, SPHSC 304, SPHSC 305, SPHSC 425.

Degree Requirements

Minimum 186 credits

1. *Didactic (minimum 82 credits):* SPHSC 462, SPHSC 503, SPHSC 504, SPHSC 509, SPHSC 521, SPHSC 522, SPHSC 523, SPHSC 542, SPHSC 570, SPHSC 571, SPHSC 572, SPHSC 574, SPHSC 575, SPHSC 576, SPHSC 577, SPHSC 579, SPHSC 580, SPHSC 581, SPHSC 582, SPHSC 583, SPHSC 584, SPHSC 585, SPHSC 586, SPHSC 588, SPHSC 592, SPHSC 593
2. *Clinical (minimum 92 credits)*

- a. 2 credits of SPHSC 552
 - b. 50 credits of SPHSC 591
 - c. 40 credits of SPHSC 601
3. *Practice Doctorate/Capstone Research Coursework (minimum 12 credits)*
 - a. Minimum 12 credits of SPHSC 801
 - b. Statistics at the 400 level or above (e.g., EDPSY 490)
 - c. Written document and oral defense of research
 4. *Additional Degree Requirement:* 36 credits of non-clinical graduate work at the 400 level or above. Minimum 18 of these 36 quarter credits in courses numbered 500 and above. No more than 12 credits of courses 500 level and above in 801 capstone research credits. Completion of requirements for the Certificate of Clinical Competence (CCC) of the American Speech-Language-Hearing Association

Doctor of Philosophy

Entrance is for summer or autumn quarter only. The department does not accept Graduate Non-Matriculated (GNM) applicants.

Admission Requirements

1. An identified faculty mentor from within the department who officially agrees to support the application.
2. UW Graduate School Application completed between September 15 and February 15. Submit the following to the department by February 15:
 - a. Unofficial transcripts for all schools attended
 - b. Official GRE scores earned within the last 5 years
 - c. Three letters of recommendation
 - d. Statement of Purpose
 - e. Writing sample or paper
 - f. Department's supplemental application
3. Minimum 3.00 GPA for the last 90 quarter credit hours of study (60 semester)
4. Demonstrated English language proficiency
5. Bachelor's or master's degree from a regionally accredited institution, depending upon area of interest

Degree Requirements

Minimum 90 credits

Includes 36 credits of graduate work at the 400 level or above and a minimum 18 of the 36 quarter credits in courses numbered 500 and above.

1. *Academic Coursework:* For students with a prior undergraduate or graduate degree in speech and hearing sciences (minimum 41 credits as follows):
 - a. SPHSC 560, SPHSC 561, and SPHSC 562 (minimum 9 credits)

- b. SPHSC 504, SPHSC 506, or approved alternative (minimum 3 credits)
 - c. Four statistics courses (chosen in consultation with advisory committee). (minimum 14 credits)
 - d. SPHSC 568 (minimum 3 credits)
 - e. SPHSC 567; research seminar series (minimum 12 credits) Required autumn, winter, and spring quarters throughout the program
 - f. *Other Coursework*: Students with a degree in a field other than speech and hearing sciences complete the following: SPHSC 303; SPHSC 320; SPHSC 461; plus one of the following: SPHSC 250; SPHSC 305; SPHSC 371
2. *Research Coursework*: (minimum 43 credits). Pre-dissertation (16 credits) and dissertation (27 credits). All students conduct supervised research by the end of their first year.
 3. *Teaching Experience*: (minimum 6 credits)
 - a. Instructional Development Forum (minimum 2 credits)
 - b. Teaching Practicum (minimum 1 credit) For students pursuing an academic career
 - c. Other Coursework: (3 credits)

Financial Aid

PhD students are guaranteed financial support as teaching or research assistants as long as they make adequate progress in the program.. In addition, the department has traineeships/fellowships supported by the National Institutes of Health on a competitive basis. Students are strongly encouraged to apply to the National Institutes of Health or other funding agencies for individual fellowships to support dissertation work. Summer support, although not guaranteed, can also generally be arranged.

Research Facilities

The department's research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, the Institute for Learning and Brain Sciences, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Center on Human Development and Disability also provide laboratories to support basic and applied research in speech, language and hearing development and disorders, across the life span.

Statistics

Department Overview

B309 Padelford

Probability provides the conceptual foundation and mathematical language for the logic of uncertainty and induction. Statistics is concerned with procedures for the acquisition, management, exploration, and use of information in order to learn from experience in situations of uncertainty and to make decisions under risk. Statistical practice includes design of experiments and of sampling surveys; exploration, summarization, and display of observational data; drawing inferences, and assessing their uncertainty; and building mathematical models for systems with stochastic components.

Instruction is enriched through academic contacts with the Foster School of Business; the College of Engineering; the departments of Applied Mathematics, Atmospheric Sciences, Biology, Cardiology, Computer Science, Earth and Space Sciences, Economics, Genetics, Mathematics, Psychology, Radiology, and Sociology; the Quantitative Ecology and Resource Management program; the Center for Statistics and the Social Sciences; the Applied Physics Laboratory; the Applied Statistics Division of the Boeing Company; Microsoft Research; and Insightful Corporation. The department has an especially close relationship with the Department of Biostatistics; for example, the two departments are jointly developing new curricula in statistical genetics.

Undergraduate Program

Adviser

B309 Padelford, Box 354322
(206) 543-8296

The Department of Statistics offers the following programs of study:

- The Bachelor of Science degree with a major in statistics. Provides training in theoretical foundations of statistics, statistical modeling and methodology, and applied data analysis. Also offered is a Data Science option that in addition emphasizes computation and data management.
- In conjunction with the departments of Applied Mathematics, Computer Science and Engineering, and Mathematics, the Bachelor of Science degree with a major in applied and computational mathematical sciences (ACMS).
- A minor in statistics

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 324; one of CSE 142 or CSE 160; STAT 311. Additional courses in the sciences and quantitative methods add strength to this major.

Department Admission Requirements

Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered once each academic year and are due on the third Friday in April.

Minimum course requirements for admission applications as follows:

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
2. One of STAT 311 (highly recommended), STAT 390, or an approved substitute. See website for approved list.
3. MATH 324; one of CSE 142 or CSE 160
4. Factors in the admission decision include but are not limited to academic performance as measured by GPA in courses listed above and any additional advanced quantitative courses presented for application consideration.
5. Admission is competitive. Successful applicants typically have a cumulative GPA higher than 3.00 in courses listed above under course requirements, with no individual course grade lower than 2.5.

Major Requirements

Minimum 65 credits

1. *Mathematics (25-30 credits)*: either MATH 124, MATH 125, MATH 126, MATH 300, MATH 307, MATH 308, MATH 324, and MATH 327; or the Honors sequence MATH 134, MATH 135, MATH 136, MATH 334, and MATH 335.
2. *Computing (7-9 credits)*: For the major in statistics: CSE 142 or CSE 160; either STAT 302 (recommended), CSE 143, or an approved substitute. For the data science option: 9 credits from the following: CSE 142, CSE 143, STAT 302, CSE 160, CSE 163
3. *Statistics (24-27 credits)*: STAT 311 (highly recommended), or STAT 390, or an approved substitute (STAT 220, STAT 221, or STAT 301 which is seldom allowed); either STAT 340 (highly recommended) or both STAT 394/MATH 394 and STAT 395/MATH 395. (Note that both STAT 394/MATH 394 and STAT 395/MATH 395 are required to replace STAT 340 as a prerequisite for STAT 341.) STAT 341, STAT 342, STAT 421, STAT 423. (STAT 342 is required for enrollment in STAT 421 or STAT 423 by a statistics major; STAT 390 is not sufficient for a statistics major.)
4. *Electives*: For the major in statistics: at least three courses for a minimum total of 9 credits. Elective choices require prior approval of the Statistics undergraduate adviser. For the data science option: two courses from STAT 435, STAT 403, STAT 425; CSE 491, SOC 225, or another 1-credit seminar covering privacy, security, ethics, and societal implications of data science; CSE 414 or INFO 340; one of the following: HCDE 411, INFO 474, CSE 412, CSE 442
5. Minimum 2.0 grade in all courses used to satisfy major requirements.
6. Minimum 2.50 cumulative GPA for all courses used to satisfy major requirements.

A "Majors Factsheet" is available from the Statistics department.

Minor

Minor Requirements: 26 credits, as follows:

1. MATH 126 or MATH 136 (5 credits)
2. STAT 302, STAT 390/MATH 390, STAT 394/MATH 394, STAT 395/MATH 395 (13 credits)
3. either STAT 425/BIOST 425 or STAT 396/MATH 396 (3 credits)
4. Minimum 5 credits of approved electives. See adviser for approved list.

5. Minimum grade of 2.0 in each course used to satisfy minor requirements
6. Maximum 5 credits may be applied to a student's major.
7. At least 20 credits must be taken through the UW.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Statistics emphasizes decision making in the face of uncertainty. Tools developed by the major include probability theory, mathematical statistics, experience with data analysis, and use of statistical tools via the computer. Graduates have pursued careers in actuarial science, financial planning, drug development, statistical consulting, teaching, public health, military science, aerospace, computer technology, and forest resources.
- *Instructional and Research Facilities:* Computer workstations are available on a drop-in basis through the College of Arts & Sciences Instructional Computing Laboratory. Tutoring in a set of introductory statistics courses is currently available at the Statistics Tutor and Study Center.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* A special seminar series for undergraduates is offered in conjunction with the ACMS program.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* The Actuary Club at the University of Washington

Graduate Programs

Graduate Program Coordinator
B309 Padelford, Box 354322
(206) 685-7306

The graduate programs emphasize both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. Computing facilities in the department reflect the department's expertise in the field of statistical computing. An ongoing statistical consulting program provides students practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers master of science and doctor of philosophy degrees.

Admission Requirements

1. Background in mathematics, statistics, or a quantitative field, with 30 or more quarter credits in mathematics and statistics, to include a year of advanced (second-year) calculus, one course in linear algebra, and one course in probability theory
2. Graduate Record Examination scores (the Advanced Mathematics subject test is encouraged but not required)
3. Three letters of recommendation from appropriate former or current faculty

Master of Science

Degree Requirements (36-49 credits)

Part-time/Concurrent Track (minimum 36 credits)

At least twelve approved courses numbered 400 or above (minimum 36 credits); of these, at least six courses numbered in the 500 series (exclusive of STAT 512, STAT 513) – minimum 18 credits or more,

representing a coherent theme. Approved proficiency in statistical computing. Satisfactory participation in statistical consulting and the departmental seminar. Passage of an appropriate final master's examination or successful completion of a master's thesis which can count as up to three courses worth 9 credits but cannot replace any of the six courses in the 500 series mentioned above. All programs must be approved by the departmental Graduate Program Coordinator.

Advanced Methods and Data Analysis Track (minimum 49 credits)

1. Core Courses: STAT 502, STAT 504, STAT 512, STAT 513, STAT 534, STAT 536, STAT 570, STAT 571
2. Statistics capstone data analysis: STAT 528
3. Satisfactory participation in at least one quarter of the departmental seminar
4. Passage of the first year MS theory examination

Doctor of Philosophy

Degree Requirements

Minimum 90 credits, to include:

1. Training in statistics and related sciences
2. General examinations of basic graduate-level knowledge in statistics and probability (including two preliminary examinations)
3. MATH 574, MATH 575, MATH 576
4. Three approved core-course sequences chosen from STAT 570, STAT 571, STAT 572; STAT 581, STAT 582, STAT 583; STAT 521, STAT 522, STAT 523; STAT 534, STAT 535, STAT 538; and STAT 516, STAT 517, STAT 518. (In some circumstances, other graduate-level mathematical science courses may be used as a substitute.)
5. Statistical consulting (typically STAT 598 and STAT 599)
6. Proficiency in computing
7. STAT 590 (1 credit per quarter)
8. Final examination

Graduation requirements for PhD tracks in statistical genetics and statistics in the social sciences may replace or be in addition to some of the requirements listed above.

Financial Aid

The department annually awards a limited number of teaching and research assistantships and fellowships for the support of new and continuing graduate students on the basis of academic promise.

College of Built Environments

College Overview

224 Gould

Dean

John Schaufelberger

Associate Dean

Jeffrey Ochsner

www.be.washington.edu

The College of Built Environments (CBE) devotes its resources to the tangible improvement of built and natural environments. Four departments comprise the college: architecture, construction management, landscape architecture, and urban design and planning. Each prepares students for professional careers involving the design, planning, production, and sustainability of physical and natural environments, as well as addressing policies and programs that engage problems of urban growth and livable communities.

The College offers a variety of programs and degrees focusing on the environmental design and construction disciplines within a liberal arts education. The undergraduate programs of the Departments of Construction Management and Landscape Architecture lead to professional degrees that serve as the educational credentials for careers in their respective fields. Undergraduate programs in the Departments of Architecture and Urban Design and Planning offer students pre-professional undergraduate majors-in Architectural Studies and in Community, Environment, and Planning respectively-that prepares students for professional programs in the design and planning disciplines, as well as related leadership roles in society.

The College offers a variety of professional and post-professional Master's degrees: Master of Architecture; Master of Science in Architecture; Master of Science in Construction Management (evening degree); Master of Urban Planning; Master of Landscape Architecture; and Master of Science in Real Estate. Master's students may elect also to work toward the interdisciplinary Certificates in Urban Design and in Historic Preservation. The College offers two interdisciplinary doctoral degrees: the Ph.D. in the Built Environment and the Ph.D. in Urban Design and Planning. All program curricula encompass an appropriate level of design and technical understanding, and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

As a part of a major university and metropolis in the Pacific Northwest, the College directly engages this extraordinary setting as a laboratory for study. Faculty members in CBE departments and programs work closely with various professional communities to build curricula and offer experience attuned to the understanding and creation of appropriate built environments.

Facilities

Computing Facilities

Mark Baratta, Director

The College provides an extensive computing infrastructure to support student work. Students have easy access to high-speed wired and wireless networking in the College's buildings, computers in labs and studios, a comprehensive collection of software used in our disciplines, specialized hardware (large-format scanning and plotting, laser cutters, 3D printer), an equipment loaner program (laptops, digital cameras (fixed-lens and SLR), camcorders, digital audio recorders, projectors), and consulting. Most classrooms and seminar rooms are equipped with projectors; several have interactive whiteboard displays.

Built Environments Library

Alan Michelson, Librarian

The Built Environments Library, 334 Gould, is the primary location for materials on architecture, landscape architecture, construction management, and urban design and planning. The collection contains 46,745 volumes, 7,500 microforms, and 163 currently-received serial subscriptions and 243 serial titles in total. Access to its collection is provided through the UW Libraries Information Gateway, a single World Wide Web location which encompasses all the library's print and electronic resources as well as tools, services, and the ability to search the library's catalog and a wide range of Internet resources. The Gateway is available in all UW libraries and on the Web at www.lib.washington.edu.

Photography Lab

John Stamets, Lecturer

A large photography laboratory is provided with studio and film darkroom facilities for use by photography classes, design-studio classes, special instruction, and independent activity.

Shop

Penny Maulden, Director

Fully staffed and well-equipped workshops provide students opportunities to design and make projects using wood, metals, concrete, plaster, plastics and other materials. A wide and deep selection of hand-tools, machine-tools and digital fabrication tools support the instructional use of the workshops and adjacent classroom. Coursework and research supported by the workshops include building design, design/build, furniture studios, structures, materials, and digital fabrication courses. Individual projects including thesis and research can also be accommodated.

Visual Resources Collection

Joshua Polansky, Director

The Visual Resources Collection consists of over 80,000 digital images covering architectural, landscape, design and planning, and construction subject matter, supporting the curricular and research needs of the

College. They are accessible to students and faculty through an online image database. New materials for lectures and projects are continually added.

Undergraduate Degree Programs

The College of Built Environments offers the following professional and pre-professional undergraduate degree options and opportunities:

College Bachelor Degree Programs

- [Bachelor of Arts in Architectural Studies](#)
- [Bachelor of Arts in Community, Environment, and Planning](#)
- [Bachelor of Landscape Architecture](#)
- [Bachelor of Science in Construction Management](#)

Minors and Dual Degree Options

- [Minor in Architecture](#)
- [Minor in Landscape Architecture](#)
- [Minor in Urban Design and Planning](#)
- Dual Degree option combining the Bachelor of Arts in Architectural Studies with the Bachelor of Science in Construction Management

Graduate Program

The College of Built Environments offers the following professional, post-professional graduate degrees, and doctoral options and opportunities:

College Graduate Degree Programs

- [Master of Architecture](#)
- [Master of Science in Construction Management](#)
- [Master of Landscape Architecture](#)
- [Master of Science in Real Estate](#)
- [Master of Urban Planning](#)
- [Distance Learning Master Program in Construction Engineering](#)
- [Distance Learning Master in Infrastructure Planning Management](#)

Interdisciplinary Ph.D Degree Programs

- [Ph.D. in the Built Environment](#)
- [Ph.D in Urban Design and Planning](#)

College-wide Certificate Programs

Historic Preservation Certificate Program

The College of Built Environments offers education in historic preservation. This approach reflects a conscious choice to emphasize preservation within the context of the individual design professions. Thus, the curriculum offers an awareness and familiarity with issues involved in the identification, designation, interpretation, and preservation of historic places, as well as the restoration, adaptive reuse, and design of sympathetic new construction in historic contexts.

Program Coordinator

Box 355740

206-543-5996

histpres@uw.edu

www.be.washington.edu/certificates/hp.html

Admission Requirements

Open to students accepted into a professional or graduate program in the College of Built Environments, including the M.Arch., M.S. (Arch. History/Theory), B.L.A., M.L.A., M.U.P., and Ph.D. programs. Application is made first for admission to a degree program within the college. Once accepted, a separate "Statement of Interest" form is required. Application is made within the first two weeks of classes for two-year degree programs, and by the end of the first year for three-year programs.

Certificate Requirements

The certificate consists of courses required for the student's degree and an additional, complementary 12-15 credits of preservation study which may not overlap with courses required for students' degrees but which may fall into elective requirements and be part of the total credits required for the degree. We recommend students meet with the program coordinator and Preservation faculty to choose the courses that will best complement their degree program and academic interests in preservation.

1. **Track I:** Requirements for Students in the M.Arch. Degree Program
 - a. *Courses Required from the M.Arch. curriculum:* ARCH 500 (6), ARCH 590 (3), an advanced studio on preservation design or design in an historic context
 - b. *Core Certificate Courses:* ARCH 582 (3) if available; Case Studies, either ARCH 498 (3) or URBDP 587 (3); Preservation Planning, either URBDP 585 (3) or URBDP 586 (4)
 - c. *Elective Course(s):* Additional electives in areas related to preservation in architecture, landscape architecture, planning, or related design.
 - d. *Thesis:* Thesis topic with content in the area of preservation design or related issues in historic preservation. Thesis committee chaired by a member of the Historic Preservation faculty.
2. **Track II:** Requirements for Students in the B.L.A., M.L.A., M.S. (Arch), M.U.P., and Ph.D. Degree Programs
 - a. *Courses Required from Degree Curriculum:* Any required or "selective" courses with preservation/historical content, and if the degree requires studio work (B.L.A., M.L.A., M.U.P), choose a studio with preservation content.
 - b. *Core Certificate Courses:* URBDP 585 (3), URBDP 586 (4), one graduate seminar in preservation planning (3).

- c. *Elective Course(s)*: Additional electives in areas related to preservation in architecture, landscape architecture, planning, or related design.
- d. *Thesis*: Thesis, professional paper, or dissertation topic with content in the area of preservation planning and design or related issues in historic preservation. Thesis must be chaired by a member of the Historic Preservation faculty.

Urban Design Certificate Program

The College of Built Environments offers an interdisciplinary program which leads to the Certificate of Achievement in Urban Design for students in the B.L.A., M.L.A., M.Arch., and M.U.P. professional degrees and to students in the Interdisciplinary Ph.D. in Urban Design and Planning or the Ph.D. in the Built Environment. It is designed to give students in these programs a broad and strong understanding of urban design that they may incorporate into their later professional and scholarly careers.

Program Coordinator

Box 355740

206-543-5996

ud@uw.edu

www.be.washington.edu/certificates/ud.html

Admission Requirements

Any student accepted into the degree programs listed above is eligible and may begin participate in the program by returning a Statement of Interest (this form may be obtained from the program office or the program website). We recommend that students in two-year programs apply at the beginning of their programs and that those in longer programs apply at the beginning of their second year. However, students must possess the necessary design abilities prior to enrollment in advanced studios. Such enrollment is determined by the studio in question (for example, advanced studios may require a prerequisite studio preparatory class and/or previous studios and/or the equivalent as evaluated by the studio instructor).

Certificate Requirements

The certificate consists of courses required for the student's degree and an additional, complementary 12-15 credits of urban design courses, which may not overlap with courses required for students' degrees but which may fall into elective requirements and be part of the total credits required for the degree.

These requirements vary with the students' degree requirements (for example, if a course listed below is required for the students' degree requirements, the student must meet the 12-15 credit requirement by choosing an additional course). We recommend students meet with the program coordinator and Urban Design Program faculty to choose the courses that will best complement their degree program and academic interests in urban design.

1. Core Curriculum:

- a. *Introductory Course*: ARCH 590 (M.Arch. and M.L.A. students); L ARCH 362 (B.L.A. students); URBDP 470 (any program); URBDP 500 (M.U.P. students)
- b. URBDP 479
- c. URBDP 580
- d. Thesis prep as appropriate for students' degree programs

2. *Urban Design Studios*: Three required from ARCH 500-505, L ARCH 402-403, L ARCH 503-505, or URBDP 507-508 as designated by the program each quarter; students must take at least one studio either outside their home department or with a clear interdisciplinary focus)
3. *Mandatory Course Areas*
 - a. Urban Form and History: one course from L ARCH 450, L ARCH 451, L ARCH 498 (when history of urban design), URBDP 564, URBDP 565, or others as appropriate
 - b. Urban Design Methods: two courses from L ARCH 341, L ARCH 571, URBDP 474, URBDP 576, URBDP 598, or others as appropriate
 - c. Urban Studies: one course from PB AF 527, URBDP 422, URBDP 466, URBDP 500, URBDP 510, URBDP 520, URBDP 530, URBDP 560, URBDP 562, or others as appropriate
 - d. Urban Development: one course from URBDP 561, URBDP 552, URBDP 553, URBDP 554, URBDP 555, or others as appropriate
4. *Thesis*: Students' theses, professional projects, or dissertations must have an urban design component and a member of the Urban Design Program faculty member as their committee chair.

Architecture

Department Overview

208 Gould

Architecture includes the study of building design, representation, computing, structures, construction materials, environmental control systems, history, theory, and professional practice. In its teaching, research, practice, and community engagement, the department addresses the traditions of architecture within the context of social and technological change, a legacy of craft in the making of architecture, an activist and community-based design process, and the principles of ethical action to address human and environmental concerns.

Undergraduate Program

Adviser

208 Gould Hall, Box 355720

(206) 543-3043

bainfo@uw.edu

Advising for the first two years of the program is done through the Undergraduate Gateway Center, 141 Mary Gates Hall.

The Department of Architecture offers the following programs of study:

- Bachelor of Arts degree with a major in architecture
- Bachelor of Arts degree with a major in architectural design
- A dual-degree program leading to the Bachelor of Arts degree with a major in architectural design and the Bachelor of Science degree in construction management
- A minor in architecture

The Bachelor of Arts (with a major in architecture) is a four-year, undergraduate degree program in architecture in which students explore the factors that shape our built environment. The program provides a liberal arts foundation in the discipline of architecture, which covers spatial reasoning, aesthetics, political and economic structures, socio-cultural influences, urbanism, landscape, and ecology, and gives students the opportunity to concentrate their studies through a sequence of courses investigating history and theory, materials and making, or sustainable technologies. Students in the Bachelor of Arts (with a major in architecture) program can prepare for graduate study in architecture and related fields such as construction management, landscape architecture, real estate, and urban planning, as well as careers in other fields.

The Bachelor of Arts (with a major in architecture) consists of two, two-year sequences. Years one and two include 14 credits of preparatory architectural coursework in addition to at least 76 credits devoted to satisfying the UW's general education requirements. These include coursework in the Visual, Literary, and Performing Arts (VLPA), Individuals and Societies (I&S), mathematics, science, and other areas of knowledge. The intent of these first two years is to help students build their skills in communication and critical thinking; gain broad exposure to other disciplines in order to make more informed academic and career decisions; and provide the broad academic foundation essential to successful study in architecture. All interested UW students are welcome to participate in this first two-year sequence.

The second two-year sequence begins in the junior year. Upper-division admission to the program requires the completion of architecture prerequisites and a minimum of 90 credits, and occurs through a selection process at the beginning of spring quarter of the sophomore year. Years three and four include 29 credits of required courses, including the capstone, 38 credits of discipline-specific selectives and electives, and 23 credits of upper-division electives. Students can focus their studies by choosing a concentration of history and theory, materials and making, or sustainable technologies, or a combination of these.

The Bachelor of Arts (with a major in architectural design) is a pre-professional degree that prepares candidates for admission with advanced standing to professional architectural programs. It is also good preparation for other roles in society that benefit from an understanding of and exposure to architectural design and problem solving such as government, development, management, planning, art, graphic design, and digital arts. Students develop visual literacy and complex problem solving through the design process, including researching historical precedents, analyzing theoretical texts, and on-site understanding of the physical built and natural environment. International study programs (Rome, Scandinavia, India, Mexico, Japan) provide further opportunities for students to engage built environments within global/local and contemporary/historical cultural contexts. A focus on sustainable technologies and the craft and making of architecture play an important role throughout the program.

The Bachelor of Arts (with a major in architectural design) is for students who are interested in the architecture profession and who may continue their studies by earning a graduate professional degree in architecture. The master's degree in architecture is a professional degree and generally takes two or more years to complete if the student enters with the pre-professional Bachelor of Arts (with a major in architectural design).

The college also offers a design and construction concurrent degree (Bachelor of Arts with a major in architectural design, BS in construction management), awarded after completion of 225 credits. Students interested in this double degree must complete the prerequisites for the architectural design major, be admitted to architectural design, and then apply to construction management while completing the architectural design major. This is a five-year program. In addition, the College of Built Environments offers three other bachelor degrees: the BLA in landscape architecture, a five-year professional degree; the BS in construction management, a four-year professional degree; and the BA in community, environment, and planning, a four-year interdisciplinary degree.

Bachelor of Arts (with a major in architecture)

Suggested First- and Second-Year College Courses: See Department Admission Requirements below.

Department Admission Requirements

Applicants are considered for autumn admission only. Admission is competitive. Admission groups are freshmen/sophomore admission (F/S A) and upper-division admission (UA). Consult department website for more information and application form.

Freshman Admission

The department enrolls freshman-year students directly out of high school, prior to their completion of any university-level prerequisites. All freshmen indicating architecture on their UW application are considered for freshman admission to the BA (with a major in architecture) program; no additional application materials are required. Students admitted as freshmen must complete all preparatory and general education requirements listed under upper-division admission as well as all major requirements in order to earn a degree.

Sophomore Admission

Application deadline is the first Monday of spring quarter. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and personal motivation. Completion of prerequisite requirements does not guarantee admission. Students admitted as sophomores must complete all preparatory and general education requirements listed under upper-division admission as well as all major requirements in order to earn a degree.

Transfer Admission

Transfer students may apply for admission at the beginning of the sophomore year or the beginning of the junior year. Application deadlines are the same as for sophomore or upper-division admission. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and personal motivation. Transfer students must also submit a separate application to the UW.

1. Sophomore-year transfer students must complete all preparatory architectural coursework and general education requirements listed under upper-division admission requirements, as well as all major requirements, in order to earn a degree.
2. Junior-year transfer students must complete all general education requirements and are strongly encouraged to complete all preparatory architectural coursework before entry into the program. These courses can be taken through UW Educational Outreach, on a non-matriculated basis, prior to admission to the UW. These, as well as all major requirements, must be completed in order for a student to earn a degree.

Upper-Division Admission Requirements (UA)

1. Junior Standing (90 or more credits completed by the quarter of admission), to include the following:
 - a. Preparatory Architectural Coursework (19 credits): ARCH 200, ARCH 231, ARCH 350, ARCH 351, ARCH 352
 - b. General Education Requirements: minimum of 71 credits selected from Visual, Literary, and Performing Arts (VLPA) (20 credits); Individuals and Societies (I&S) (20 credits); Natural World (NW) (20 credits), including 5 credits of mathematics (MATH 112 or MATH 124); additional Areas of Knowledge (6 credits); electives (3 credits). Composition/writing (10 credits total) may be met by freshman English composition courses and/or other general education courses designated "W," with a minimum 2.0 grade for each course; diversity (3 credits) may be satisfied by general education courses designated DIV.
2. Minimum 2.80 college/university GPA
3. Department Application (See department website)
4. Transcripts of all college-level work. Unofficial transcripts are accepted.
5. Application Deadline: First Monday of spring quarter. For enrolled UW students, all prerequisite requirements must be completed or under way by the application deadline, and all prerequisite requirements must be completed by the time the student enters the program in autumn quarter. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and personal motivation. Completion of prerequisite requirements does not guarantee admission.

Major Requirements

1. Coursework (91 or more credits completed during years three and four): ARCH 331, ARCH 332, ARCH 361, ARCH 362, ARCH 468, ARCH 469. One history and theory selective course (3 credits), one craft and fabrication selective (3 credits), and one sustainable technologies selective (3 credits). Three Department of Architecture areas of concentration courses (at least 9 credits), two approved electives offered with College of Built Environment programs (at least 6 credits), five approved Department of Architecture electives (at least 15 credits), and at least 23 credits of approved upper-division electives. Selective and concentration courses are chosen from approved lists maintained by the department.
2. Capstone (ARCH 469) completed in residence through the UW
3. Minimum 2.00 cumulative GPA for all courses presented for the major

Bachelor of Arts (with a major in architectural design)

Department Admission Requirements

1. 90 credits to include the following:
 - a. *Preparatory Architectural Coursework (19 credits)*: ARCH 350, ARCH 351, ARCH 352 (9 credits); ARCH 200, ARCH 201 (10 credits). *Note*: These courses can be taken through UW Extension on a nonmatriculated basis, prior to admission to the UW, or they can be taken in the sophomore year on campus.
 - b. *General Education Requirements (70 credits)*: English composition (5 credits); Visual, Literary, and Performing Arts (VLPA) (20 credits); Individuals and Societies (I&S) (20 credits); Natural World (NW) (20 credits, including MATH 112, MATH 124, or MATH 145); additional Areas of Knowledge (5 credits).
 - c. *Electives (1 credits)*
2. While the cumulative GPA is an important factor in the admission evaluation, the committee places emphasis on the evaluation of performance in the preparatory architectural coursework the student has completed. It is to the student's advantage to take as many of these courses as possible before applying.
3. *Application deadline*: May 15 for autumn quarter only. Prerequisite courses must be completed by the time the student enters the program in autumn quarter.

Major Requirements

90 credits as follows:

1. *Preprofessional Coursework (69 credits)*: ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 362, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431, CM 313. One selective course in each of the following areas: (1) graphics/media; (2) history/theory; (3) building science/materials. Selective courses to be chosen from approved lists maintained by the department.
2. 21 credits of approved upper-division electives.
3. The final 45 credits must be completed as a matriculated student in residence through the UW.
4. Minimum 2.50 cumulative GPA for all work done in residence.

Dual-Degree Program

Admission Requirements

Dual-degree majors first apply to the architectural design program and must meet architectural design admission requirements. Admitted architectural design students apply to the construction management program during spring quarter of their junior year (first year in the architecture program). For architectural design students, construction management prerequisites are waived, but such students must take CM 313 and CM 323 prior to the construction management application deadline, April 1.

Dual Degree Program Requirements

142 credits

1. *Architecture Foundation Courses (60 credits)*: ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 362, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431
2. *Architecture Selectives (6 credits)*: 3 credits of graphic/media selective chosen from among the following BIM-recommended courses: ARCH 316, ARCH 410, ARCH 412, ARCH 413, ARCH 415, ARCH 418, ARCH 478, ARCH 481, ARCH 482, ARCH 484, ARCH 485, ARCH 486, ARCH 498. 3 credits of history/theory selective from among the following courses: ARCH 441, ARCH 442, ARCH 450, ARCH 452, ARCH 455, ARCH 457
3. *Construction Management Courses (76 credits)*: CM 301; CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 330, CM 331, CM 332, CM 333, CM 334, CM 335, CM 410, CM 411, CM 412, CM 414, CM 421, CM 422, CM 423, CM 426, CM 431 (capstone experience), CM 432, and CM 434
4. *Additional Major Requirement*: Minimum 2.50 cumulative GPA in upper-division college courses completed in the College of Built Environments. Minimum 2.0 in CM 431

Note: A minimum of 225 credits is required to complete a dual degree.

Minor

Minor Requirements: 25 credits to include a minimum of 20 credits in ARCH courses (at least 9 credits at the upper-division level) and 5 additional upper-division credits from courses in the College of Built Environments.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 - The architecture program emphasizes a broad liberal arts foundation followed by a focus on architectural history and theory, materials and making, and sustainable technologies. Specific goals for student learning include an understanding of the sequences and history of human building activities; social, political, legal, and economic influences on design and construction; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; relationships of buildings to their sites and ecological contexts; sustainable technologies used in building construction.
 - The architectural design program emphasizes a broad liberal arts foundation followed by a focus on entry-level courses in architectural design, theory, the technology of building, and materials. Specific goals for student learning include an understanding of the organization of three-dimensional space in response to specific human needs; the

sequences and history of human building activities; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; building systems and their integration for human comfort; structural principles, relationships of buildings to their sites; social, political, legal, and economic influences of design and construction. Specific goals in the area of personal development include an ability to visualize three dimensions and think spatially; graphic, verbal, and written communication skills for design development and presentation; an ability to think critically and exercise self-criticism.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are available and vary according to individual interests within the program. See adviser for details.
- *Department Scholarships:* A limited number of department scholarships are available to eligible students entering their final year of the major.
- *Student Organizations/Associations:* AIAS (American Institute of Architectural Students)

Of Special Note:

Most states require that an individual intending to become an architect hold an architecture degree accredited by the National Architectural Accrediting Board (NAAB). The NAAB accredits three types of degrees: (1) the Bachelor of Architecture (BArch), which requires a minimum of five years of architectural study (this degree is not offered at the University of Washington), (2) the Master of Architecture (MArch), which requires a minimum of three years of study following an unrelated bachelor's degree or two years following a related pre-professional bachelor's degree, and (3) the Doctor of Architecture (this degree is not offered at the University of Washington). These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects.

The UW's four-year, Bachelor of Arts degree in architectural design is a pre-professional degree and is not accredited by NAAB. The pre-professional degree is useful to those desiring a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment options in fields related to architecture.

Architectural education at the University of Washington requires a minimum of six or seven years of higher education to attain the first professional degree, the Master of Architecture. The curriculum is divided into three two-year segments of coursework with a pre-professional Bachelor of Arts degree (with a major in architectural design) awarded at the completion of the second two-year segment. The professional degree, Master of Architecture, is awarded only upon completion of the third segment. (Students with the Bachelor of Arts in Architecture or bachelor's degrees in unrelated fields take an additional year of coursework).

Graduate Program

Graduate Program Coordinator
208 Gould, Box 355720
(206) 543-4180
archinfo@uw.edu

The department offers the Master of Architecture (MArch) and the Master of Science in architecture (MS Arch).

The MArch is a National Architectural Accrediting Board (NAAB)-accredited program for students already grounded in the sciences or liberal arts. Applicants interested in entering the profession of architecture should apply to the MArch program, which has three accredited tracks:

- 2+year accredited MArch for candidates holding a BA or BS in architectural design
- 3+year accredited MArch for candidates holding a bachelor's degree in a discipline other than architecture
- accredited dual degree, MArch/MLA, for candidates with or without prior architecture or landscape architecture degrees
- MArch in high performance building, a 1-year non-accredited post-professional program for candidates holding an accredited BArch or MArch

The MS Arch is a non-accredited advanced research-oriented degree for candidates who hold a bachelor's degree from a wide range of disciplinary backgrounds. The MS in architecture has two distinct degree streams:

- MS Arch in design computing
- MS Arch in architectural history and theory

Master of Architecture

The MArch degree, accredited by the National Architectural Accrediting Board (NAAB), is the only professional degree offered by the University of Washington. Completion of the department's 2+year or 3+year MArch degree program satisfies the educational requirement for licensing (and registration) as an architect.

1. 2+year MArch degree: design studio (30 credits); core courses (31 credits); electives (21 credits); thesis preparation (4 credits); thesis (9 credits). Students pursue one of three transcribed degree options: history, theory, and criticism; materials and fabrication; sustainable systems and design.
2. 3+year MArch degree: preparatory coursework and optional summer internship (51 credits); remaining 95 credits as described in 1, above.
3. MArch/MLA dual degree
4. Post-professional MArch degree in high-performance building: studio (6 credits); core courses (15 credits); electives (12 credits); thesis preparation (4 credits); thesis (9 credits)

Admission Requirements

1. Completed MArch application form
2. Transcripts from baccalaureate (or higher) degree(s). Primary emphasis on more recent and architecturally related coursework; minimum 3.00 (B) (or higher) GPA in the last 90 graded quarter hours or last 60 semester hours.
3. GRE test scores from within the last five years
4. Portfolio of work in visual arts and/or design. Of primary significance for all candidates.
5. Statement of purpose describing the candidate's professional aspirations and the extent to which the program can prepare the student for those objectives
6. Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the program

Degree Requirements

95 credits for 2+year degree; 146 credits for 3+year degree

1. *Preparatory-year requirements (for students in the 3+year MArch program only):* ARCH 303, ARCH 304, ARCH 305, ARCH 310, ARCH 311, ARCH 312, ARCH 323, ARCH 324, ARCH 331, ARCH 332, ARCH 350, ARCH 351, ARCH 352, ARCH 360
2. *First-year requirements* ARCH 500, ARCH 501, ARCH 502, ARCH 521, ARCH 531, ARCH 533, ARCH 570, ARCH 590, ARCH 591, one architectural history and theory selective, elective.
3. *Second-year requirements:* ARCH 503, ARCH 504, ARCH 571, ARCH 595 or ARCH 599, one professional practice selective, electives.
4. *Final year requirement:* ARCH 700, and one elective

1-Year MArch in High Performance Building Degree Requirements

46 credits

1. *Core Curriculum:* ARCH 503, ARCH 526, ARCH 530, ARCH 533
2. *Selectives:* 6 credits of building technology courses
3. *Electives:* 12 credits of electives
4. *Thesis:* 4 credits of ARCH 599; 9 credits of ARCH 700

Master of Science

45 credits

The MS Arch offers advanced, specialized study in two areas: design computing and architectural history and theory.

Design computing includes design methods, augmented and virtual environments, building simulation and analysis, digital fabrication, human computer interfaces for design, collaboration and community in design, and other related topics. Students work in the Design Machine Group (DMG), a collaborative research studio that fosters innovation and actively seeks ideas that shape the future of design and information technology. Coursework: 11 core credits, 21 credits of design computing electives, 4 credits of thesis preparation, and 9 credits of thesis.

Architectural history and theory encompasses the architectural, cultural, and political forces that have shaped modernity in architecture, including all its contemporary manifestations. Coursework: 11 core credits, 21 credits of history and theory electives, 4 credits of thesis preparation, and 9 credits of thesis.

Admission Requirements

1. Completed MS in Architecture application form
2. Transcripts from baccalaureate (or higher) degree(s) with a minimum 3.00 (B) (or higher) GPA in the last 90 graded quarter hours or last 60 semester hours of coursework
3. GRE test scores taken within the last five years
4. Portfolio of work showing evidence of the applicant's preparation for study in design computing, or a writing sample that shows evidence of applicant's preparation for study in the history and theory of architecture.

5. Statement of purpose that clearly articulates the applicant's goals and the extent to which the program can be expected to prepare him or her for those objectives. The statement should also describe the applicant's background and experience appropriate to the program and must also include a proposed research focus.
6. Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the MS in Architecture program

Design Computing Stream Degree Requirements

45 credits, as follows:

1. *Core Curriculum*: ARCH 587, ARCH 588, ARCH 597
2. *Electives*: 21 credits chosen from design computing courses, or other approved courses.
3. *Thesis*: 4 credits of ARCH 599; 9 credits of ARCH 700

History and Theory Stream Degree Requirements

45 credits, as follows:

1. *Core Curriculum*: ARCH 560, ARCH 597, B E 552
2. *Electives*: 21 credits of architectural history and theory courses, or other approved courses.
3. *Thesis*: 4 credits of ARCH 599; 9 credits of ARCH 700

Certificate Programs

Two interdisciplinary certificate programs offered by the College of Built Environments are available to MArch students in the areas of historic preservation and urban design.

The department also offers certificates in design computing and lighting design.

International Studies

The department offers architecture in Rome, Italy, at the UW Rome Center; architecture in Mexico City, Mexico; and architecture in Chandigarh, India. Other programs include travel to Scandinavia, Germany, Japan, and Australia.

Financial Aid

Scholarships and assistantships are more typically available to students already enrolled in the architecture program at the time of awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School's Fellowships, Assistantships, and Awards and the Office of Student Financial Aid.

Built Environment

Program Overview

410 Gould Hall

The PhD in built environment a College-wide, interdisciplinary degree program housed within the College of Built Environments. Provides students a common core of substantial, integrated knowledge concerning the multi-faceted built environment and then offers areas of specialization in three discrete fields of knowledge and practice:

- Sustainable Systems and Prototypes (across a range of scales, from building elements and assemblages, to buildings, site, and neighborhood context, city, and region)
- Technology and Project Design/Delivery (focusing on design of computing tools for planning and design and other built-environment fields)
- History, Theory, and Representation studies (focusing on issues of regional-global modernity)

Graduate Program

Graduate Program Coordinator
410 Gould Hall, Box 355740
(206) 543-5996
bephd@uw.edu

Doctor of Philosophy

Admission Requirements

1. Program application form
2. Three letters of recommendation
3. Curriculum vitae
4. An exhibit of work which best illustrates applicant's interests and abilities related to the built environment. May be an essay, a paper, a publication, a report, or a project for which the applicant has had major responsibility.
5. Statement of purpose
6. Graduate Record Exam (GRE) scores
7. Prospective international, immigrant, and permanent resident students whose native language is other than English and who have not received a bachelor's or master's degree from an accredited institution where the native language is English: TOEFL, with a minimum score of 92 on the Internet-based test.

Program Requirements

90 credits minimum

1. *Core courses (21 credits):*

- a. B E 551, B E 552, B E 553
 - b. Colloquium/Practicum (2 quarters at 3 credits each)
 - c. Research methods and design: 6 credits from list, including both qualitative and quantitative coursework
2. *Specialization (minimum 30 credits)*: One of three fundamental areas (sustainable systems and prototypes; technology and project design/delivery; history, theory, and representation), within which the student takes advanced and specialized coursework and conducts the dissertation research project. Courses within the College of Built Environments and in other UW units are available.
 3. *General Examination*: Written and oral.
 4. *Dissertation (30 credits)*: Concludes with a final oral defense.

Construction Management

Department Overview

120 Architecture

Construction management is a diverse discipline focused on the delivery of projects that compose the world's built environment. Included are the determination of project requirements, management of design, procurement of materials, and management of the construction of the project within cost, time, and design parameters. In terms of dollar value output, the construction industry is the largest single production activity in the U. S. economy - accounting for almost 10 percent of the gross national product. The construction industry is heterogeneous and enormously complex. The major classifications of construction differ markedly from one another: residential, commercial, industrial, and infrastructure, as well as specialties such as electrical, mechanical, framing, excavation, and roofing. Construction management is the study of how projects are conceived, designed, and built; the types of materials and methods used; techniques for estimating the cost of construction; design and contract law; construction accounting; oral and written communications; safety requirements; project planning and project management.

Undergraduate Program

Adviser

120 Architecture, Box 351610

(206) 543-6377

uwcm@uw.edu

The department offers the following programs of study:

- Bachelor of Science in Construction Management degree
- A dual-degree program leading to the Bachelor of Arts degree with a major in architectural design and the Bachelor of Science degree in construction management
- A minor in Construction Management

Students take the first two years of study as an undeclared major in the College of Arts and Sciences or a community college, completing program prerequisite requirements. Upon admission to the major, students take the prescribed curriculum shown below.

Bachelor of Science

Suggested First- and Second-Year Courses: M E 123; PHYS 114, PHYS 115, PHYS 117, and PHYS 118; 5 credits of economics; ENGL 131, ENGL 281; ESS 101; MATH 112 or MATH 124; ACCTG 215 and ACCTG 225, CM 250, COM 220, MGMT 200, QMETH 201; chemistry or environmental-science courses.

Department Admission Requirements

Admission is for autumn only, is capacity constrained, and is divided into three groups: Freshmen Direct (FA), Early Admission (EA), and Upper-Division Admission (UA). Consult department website for more information.

- *Freshman Direct Admission (FA)*

The department enrolls a small number of students each year directly out of high school, prior to their completion of any university-level prerequisites. Freshman applicants to the University listing construction management as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores. Freshman Direct students work with the construction management adviser to plan their first two years of coursework before beginning the standard curriculum. Such students are eligible to join the construction management student organizations, apply for scholarships, and participate in student competitions.

Students admitted under the Freshman Direct Admission program must complete all prerequisite course requirements listed under Upper-Division Admission as well as all major requirements to earn their degrees.

- *Early Admission (EA)*

Students may also apply to the department in spring of their freshman year to enter as part of the Early Admission (EA) group in their sophomore year. This admission path is open to students who began their studies through UW as freshmen, have been enrolled no more than three quarters, and have completed at least 27 credits through UW (25 of the 27 UW credits must be numerically graded). Courses completed prior to applying must include: MATH 112 (or MATH 124 or Q SCI 291), PHYS 114 and PHYS 117 (or PHYS 121), and ECON 200. Other courses from the list of upper-division prerequisites may be taken to complete the minimum 27 credits.

Application deadline for Early Admission is April 1. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission and all prerequisite requirements must be completed by the April 1 deadline.

Students admitted under the Early Admission program must complete all prerequisite course requirements listed under Upper-Division Admission as well as all major requirements in order to earn their degrees.

- *Upper-Division Admission (UA)*

1. *Prerequisite Courses:* Minimum 88 credits in the following categories (courses must be completed by the beginning of autumn quarter for admission that quarter):
 - a. *Construction:* CM 260
 - b. *Business and Management:* ACCTG 215 and ACCTG 225; MGMT 200
 - c. *Individuals & Societies (I & S):* 5 credits of economics; 5 additional I & S credits from UW Areas of Knowledge list (CM 250 recommended)
 - d. *Natural World (NW):* PHYS 114 and PHYS 117 (or PHYS 121), and PHYS 115 and PHYS 118 (or PHYS 122); MATH 112 (or MATH 124 or Q SCI 291); ESS 101; QMETH 201 (or STAT 220 or STAT 311); 10 additional NW credits from UW Areas of Knowledge list (chemistry or environmental studies recommended)
 - e. *Language Skills:* 5 credits from English composition list; 5 credits from "W" courses or English composition list (ENGL 131 and ENGL 281 recommended)
 - f. *Visual, Literary & Performing Arts (VLPA):* COM 220; 5 additional VLPA credits (from UW Areas of Knowledge list)

- g. *Diversity (DIV)*: 5 credits that meet UW's diversity requirement.
2. Admission to the major is capacity constrained. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission. Completion of prerequisite requirements is not required to apply, but is required prior to being admitted in autumn quarter.
3. Departmental application deadline: April 1, for the following autumn quarter. Selection for acceptance is made by early May, and all applicants are notified shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year.

Major Requirements

92 credits:

1. *Foundation Courses (78 credits)*: ARCH 320, ARCH 321; MGMT 300; CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 330, CM 331, CM 332, CM 333, CM 334, CM 335, CM 410, CM 411, CM 412, CM 414, CM 420, CM 421, CM 422, CM 423, CM 432, and CM 434
2. *Construction Electives (minimum 6 credits)*: Two of the following: CM 415, CM 416, CM 425, CM 426, CM 428, CM 429, CM 430, or CM 433
3. *Capstone Experience (5 credits)*: Minimum 2.0 in CM 431
4. *Additional Writing Requirement (3 credits)*: CM 301
5. *Additional Major Requirement*: Minimum 2.50 cumulative GPA in upper-division courses completed in the College of Built Environments

Dual-Degree Program

For requirements of the dual-degree program in architectural design and construction management, see the Architecture section.

Minor

Construction Management: Minimum 27 credits

1. Required courses (15 credits): CM 310, and CM 311 or CEE 307; CM 331; CM 333; CM 411
2. Electives (12 credits): four courses from the following: CM 321, CM 322, CM 332, CM 335, CM 414, CM 415, CM 421, CM 423, CM 428
3. Minimum 2.0 GPA in courses counted toward the minor

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of construction management involves an interdisciplinary curriculum that contains a mix of technical, managerial, and business courses to

provide graduates the essential skills needed to be successful in the construction industry. Oral and written communication skills are strengthened through written requirements and oral presentations. Construction management skill sets include the ability to read and interpret construction contract documents; the ability to determine appropriate methods for project construction and the proper sequence for each associated construction task; the ability to estimate project costs and time requirements; the ability to evaluate project site safety hazards and take action to minimize the potential for accidents occurring; an understanding of the legal framework associated with contract construction; and the ability to manage the myriad activities associated with constructing a project. Graduates pursue careers with construction companies, design firms, public agencies, homebuilders, consulting firms, real estate developers, and construction material suppliers.

- *Instructional and Research Facilities:* The Built Environments Library (located on the third floor of Gould Hall) houses construction management books and periodicals. Additional materials are located in the Engineering Library and the Foster Library (Business School). College resources include a 30-work-station computer laboratory in the basement of Gould Hall.
- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* An internship is required for completion of the degree program. Every student is encouraged to seek summer employment in the construction industry, to provide a taste of real-world experience and an opportunity to work for a construction firm. While the department seeks to identify opportunities for internship positions, the responsibility for securing a position rests with each student.
- *Department Scholarships:* A limited number of scholarships are available to eligible students.
- *Student Organizations/Associations:*
 - *Sigma Lambda Chi* is a national student honor society for recognition of outstanding students majoring in construction management. Membership is offered only to those students in the top twentieth percentile of their class. Each year the student chapter conducts community service activities.
 - *Associated Students in Construction (ASIC)* is an umbrella organization for several student chapters of national organizations: Associated General Contractors of America, National Association of Home Builders, Mechanical Contractors Association of America, and the National Electrical Contractors Association. Activities include professional guest lectures, field trips, attendance at professional meetings and seminars, and community service.

Graduate Program

Graduate Program Coordinator
120 Architecture Hall, Box 351610
(206) 616-1917

Master of Science in Construction Management

Admission Requirements

1. BS or BA in civil engineering, construction management, building technology, architecture, or similar field from an accredited college or university in the United States, or its equivalent from a foreign institution. Students with undergraduate degrees in an area other than construction management or building technology must demonstrate an understanding of estimating, project planning and control, and project management either by transcript, validation examination, or successful completion of the following courses: CM 410; CM 411; CM 421.

2. Minimum 3.00 GPA, based on last 60 graded semester hours or last 90 graded quarter hours of undergraduate and graduate study
3. GRE scores
4. Statement of goals and objectives
5. Letters of recommendation
6. International applicants whose first language is not English must submit a valid Test of English as a Foreign Language (TOEFL) or Michigan Language Test (MLT) score. Minimum score of 580 (TOEFL) or 237 (TOEFLC) or 90 (MLT)

Degree Requirements

45 credits

1. *Core Courses (9 credits):* CM 500, CM 535, CM 575
2. *Construction Management Elective Courses (15-21 credits):* 15 to 21 credits of the following: CM 505, CM 510, CM 515, CM 520, CM 525, CM 530, CM 540, CM 545, CM 550, CM 555, CM 565, CM 570, CM 580, CM 582, CM 584, CM 586, CM 588, CM 590, CM 598, B E 551, B E 552, B E 553. Thesis option requires 15 credits of CM electives; non-thesis option 21 credits of CM electives.
3. *General Elective Courses (12 credits):* Other graduate-level courses approved by adviser.
4. *Thesis or Research Paper (3 or 9 credits):* research paper - CM 600 (3); thesis - CM 700 (9)

Graduate Program in Construction Engineering

Students who complete this program earn a Master of Science in Construction Management.

Admission Requirements

1. BS or BA in civil engineering, construction management, building technology, architecture, or similar field from an accredited college or university in the United States, or its equivalent from a foreign institution. Students with undergraduate degrees in an area other than construction management or building technology must demonstrate an understanding of estimating, project planning and control, and project management either by transcript, validation examination, or successful completion of the following courses: CM 410; CM 411; CM 421.
2. Minimum 3.00 GPA, based on last 60 graded semester or 90 graded quarter credits of undergraduate and graduate study
3. GRE scores
4. Statement of goals and objectives
5. Letters of recommendation
6. International applicants must demonstrate English language proficiency

Degree Requirements

45 credits

1. *Heavy Construction Project Management (12 credits):* CM 520, CM 580, CM 582, CM 588
2. *Infrastructure Construction (12 credits):* CM 584, CM 586, CEE 595, CM 596

3. *Other Required Courses (17 credits):* CM 500, CM 525, CM 590, CEE 552, CEE 592, CEE 594
4. *Graduate Research Report (4 credits)*

Landscape Architecture

Department Overview

348 Gould

Landscape architecture is a professional design discipline that addresses both the built and natural environments. It focuses on the design, analysis, and planning of outdoor spaces across a wide range of scales, with the intent of creating places that are both meaningful and functional. Landscape architects design everything from infrastructure elements, such as roadways, drainage systems, and parks, to prominent cultural monuments and gardens for public and private housing units. The education of a landscape architect includes aesthetic design skills, the development of social and environmental ethics, technical design skills, knowledge of a wide range of natural processes, an awareness of design history, and skills for working with other people. At the University of Washington, the focus is on urban ecological design education, which allows students to make a difference in the future of cities and urban regions all over the world.

Undergraduate Program

Adviser

348 Gould, Box 355734

(206) 543-9240, (206) 685-4486

belarc@uw.edu

The Department of Landscape Architecture offers the following programs of study:

- The Bachelor of Landscape Architecture (BLA) degree
- A minor in urban ecological design
- Certificates in Urban Design and Historic Preservation (see College of Built Environments)

Bachelor of Landscape Architecture

Department Admission Requirements

Core courses within the department form a seven-quarter curriculum designed to start autumn quarter of the junior year. Students take a sequence of seven studios, other sequential skills-based courses, theory courses, and directed electives.

1. Admission is competitive. Completion of the requirements listed below does not guarantee admission. Admission is based on academic record, a portfolio of creative work, three letters of recommendation, and other application materials. Refer to the department's website, <http://larchwp.be.washington.edu/> to select "undergraduate program" link from the "admissions" bar for application materials and detailed information on admission, prerequisites, and required coursework.
2. Minimum 69 credits
 - a. *Departmental Pre-professional Requirements (12-16 credits)*: L ARCH 300* (usually offered autumn and summer quarters) and two of the following: L ARCH 322 (spring quarter); L ARCH 341 (autumn quarter); L ARCH 352 (autumn quarter); L ARCH 353 (winter quarter); L ARCH 361 (winter quarter); L ARCH 363 (spring quarter). For transfer

students, these seven courses may be taken through UW's Professional and Continuing Education as non-matriculated students prior to admission to the UW.

- b. *General Education Coursework*: minimum 69 credits to include 5 credits of English composition; 4-5 credits of Quantitative and Symbolic Reasoning; and 60 credits selected from the following Areas of Knowledge: Visual, Literary, & Performing Arts (20 credits); Individuals & Societies (20 credits); Natural World (20 credits), of which one course (usually ESS 101, or equivalent) is shown as the prerequisite for ESS 315/ENVIR 313 or ESS 301

*L ARCH 300 can be counted toward general education requirements. Other L ARCH courses which are not required within the BLA program, or as admission requirements, may be counted for general education requirements. Students planning to complete the degree in seven quarters should finish all departmental general education requirements prior to starting major requirements.

3. *Application Deadline*: 5 p.m. the first day of spring quarter for the following autumn quarter. Admission is for autumn quarter only. Applications must include BLA application materials. Students should apply during their second college year to make satisfactory progress toward the degree.

Program Requirements

Minimum 182-196 credits

General Education Requirements (69-83 credits): L ARCH 300 and other L ARCH courses which are not requirements, either within the BLA program or as prerequisites, may count toward I&S/NW/VLPA requirements.

1. *Written and Oral Communication (5 credits)*: one 5-credit English composition course from the University list. 10 additional writing credits are required, but can be met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA) (20 credits)*: L ARCH 300; 14 additional VLPA credits; drawing class recommended
3. *Individuals & Societies (I&S) (20 credits)*
4. *Natural World (NW) (20 credits)*: one course (usually ESS 101, or equivalent) shown as the prerequisite for either ESS 315/ENVIR 313 or ESS 301; additional NW credits to total 20 credits
5. *Quantitative and Symbolic Reasoning (QSR) (4-5 credits)*
6. *Diversity (DIV) (3 credits)*: Some courses may count for both DIV and I&S.

Major Requirements

Minimum 113 credits

1. *Studio Classes*: L ARCH 401, L ARCH 402, L ARCH 403, L ARCH 404, L ARCH 405, L ARCH 474, L ARCH 475
2. *Planting Design*: L ARCH 424
3. *History*: L ARCH 352 and L ARCH 353
4. *Theory*: L ARCH 341, L ARCH 361, L ARCH 363
5. *Graphics*: L ARCH 411, L ARCH 440, L ARCH 441

6. *Professional Practice*: L ARCH 473
7. *Construction*: L ARCH 431, L ARCH 432, L ARCH 433
8. *Hydrology and Soils*: L ARCH 434
9. *Plant Identification*: either BIOL 331/ESRM 331, BIOL 317, or equivalent course approved by department
10. *Managing Plants*: either ESRM 473, ESRM 474, ESRM 479, or ESRM 480
11. *Geology*: Either ESS 301 or ESS 315/ENVIR 313
12. *Directed Electives* to bring major total to 113 credits, chosen from approved lists maintained by the department: two 1-to-5-credit courses in ecology and forestry, totaling at least 6 credits; one 3-to-5-credit course in environmental legislation/law; one 3-to-5-credit course in urban design and planning

Minor

Urban Ecological Design

Minor Requirements: Minimum 25 credits

1. L ARCH courses open to non-majors (20 credits)
2. Courses 200-level and above from within the College of Built Environments or from ESRM or GEOG courses (5 credits)
3. Minimum 2.0 grade in all courses counted toward the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The BLA program provides a professional, accredited degree which enables graduates to practice successfully in design firms, nonprofit organizations, and public agencies. Building from a liberal arts foundation, the program focuses on developing design knowledge, skills, and abilities through a sequence of nine environmental- and community-based design studios.

The program provides students a broad academic and professional exposure to landscape architecture and design so their creative potential and professional growth are realized, and so they may become leaders in the field. Includes learning to conceptualize and design through practice on studio projects; fostering creativity; developing graphic, written, and verbal communication skills; facilitating cognitive abilities; and developing applicable computer skills in the design process. Studios use individual, team-oriented, and interdisciplinary projects to develop strong interactive and evaluative skills. Studio education applies knowledge gained in lecture courses which include historic and contemporary concepts in landscape architecture, design theory, site planning, construction, and communications, as well as elective courses in allied disciplines. The studio sequence addresses projects from detailed to neighborhood scales, varied contexts, and with diverse cultures. Overall, the program focuses on the application of ecological design strategies to urban and urbanizing areas, which characterizes the department's focus on urban ecological design.

- *Instructional and Research Facilities*: The program affords some opportunities for independent study and work in professional settings, beyond minimum requirements for the major. Departmental courses are complemented by elective courses from other areas, including urban horticulture, soils, geology, urban design and planning, botany, and ecology.

Studio classes led by departmental faculty or members of the professional community. May be taught jointly with faculty from other disciplines. Such classes address specific areas of inquiry

including basic design principles and processes, planting design, materials and craftsmanship, landscape planning for parks or natural areas, neighborhood and civic-space design, urban landscape design, ecological restoration, and culturally-based design. A capstone studio requires students to integrate their knowledge of design theory, practice, and construction in a design-build project for a local community. The department regularly offers study abroad programs as well as opportunities to work with local communities and public agencies.

- *Honors Options Available:* Students may apply for admission to the Bachelor of Landscape Architecture Honors option. See departmental program coordinator.
- *Research, Internships, and Service Learning:* Lecture courses address the functioning of natural systems, site planning issues, computer applications, and cultural and sociological forces that influence the profession's work. Advanced studio courses, including the capstone studio, typically provide service learning experiences in a community context. In addition to required coursework, the program encourages students to pursue personal interests through directed and independent study within and beyond the department. Students are encouraged to gain real-world experience through a practicum with professional firms, organizations, or agencies.
- *Department Scholarships:* Limited availability.
- *Student Organizations/Associations:* Student chapter, Washington Chapter of the American Society of Landscape Architects

Graduate Program

Graduate Program Coordinator
348 Gould Hall, Box 355734
(206) 543-9420
cauplarc@uw.edu

Master of Landscape Architecture

The MLA program offers training in design and inquiry. Design studios form the core, supported by independent investigation in seminars and a thesis project. Students develop a specialty within the discipline. The curriculum emphasizes the following:

Urban Ecological Design. Explores connections between culture and nature and testing ideas on how social and spatial conflicts between development and conservation might be addressed. Faculty focus on ecological infrastructure. Students study cultural resources of human communities as they develop relationships to their environments, and participate in the overlap between natural and cultural processes. The department currently offers Study Abroad programs in Canada, Mexico, Guatemala, Europe, and East Asia as well as opportunities to work with local communities and public agencies.

Design Leadership. Students develop leadership abilities in definition and practice of design as a basis for interdisciplinary work; environmental education and application of ecological concepts to urban design; use of communication technology to develop creative solutions to cultural and environmental conflicts; and international design-build projects in which students confront the global nature of contemporary development issues.

The program encourages applicants from diverse academic and professional backgrounds. Students may add elective courses in other disciplines to their core curriculum and may participate in College-wide certificate programs in Urban Design, and Preservation Planning and Design. See program descriptions in the College of Built Environments section.

Admission Requirements

1. Application deadline: January 15, for admission the following autumn quarter.
2. Baccalaureate degree from an accredited U.S. college or university, or the equivalent from a foreign institution
3. 3.00 or higher GPA in the most recent 90 graded quarter hours (60 graded semester hours)
4. GRE score taken within the past three years. International students with degrees from non-English speaking universities must submit TOEFL scores.
5. Admission is competitive. Contact the department for additional information.

Degree Requirements**Minimum 72 credits**

1. Seminar and field courses to develop a specialty (12 credits), depending on individual interests. Students with a previous degree in landscape architecture begin coursework with required graduate curriculum studios, while students from other educational backgrounds begin with basic core design studios.
2. Thesis or capstone project: For the thesis, a written and graphic product, or a purely written product. Four thesis models are available: professional project, design critique, research, and design. For the capstone project, work either on a Group Project Option or a two-quarter Studio Option.

Real Estate

Department Overview

The minor provides comprehensive exposure to the field, covering areas such as market analysis, development, appraisal, finance, and management. The program examines both residential and commercial real estate, as well as the development process. It also provides coverage of issues from a public policy perspective, such as housing affordability and supply. Students develop a range of technical, statistical, and analytical skills and tools which enable them to analyze and interpret data across a wide range of topics and areas.

Undergraduate Program

Adviser
425 Gould Hall, Box 355727
reminor@uw.edu

The department offers the following program of study:

- A minor in real estate

Minor

Minor Requirements: 25 credits

1. R E 250
2. Electives: See department for approved list of courses. (22 credits)
 - a. Minimum 13 credits in 300-400 level R E courses
 - b. Maximum 9 credits of other approved electives
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Urban Design and Planning

Department Overview

410 Gould

Urban design and planning deals with critical issues of human settlement and urban development, providing communities an informed basis for coordinated public- and private-sector action. Urban design and planning constitutes a professional field of growing complexity, responding to the urban challenges of this century. The department fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built and natural environment; the financial, administrative, political, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas and regions, bringing analysis together with vision.

Departmental faculty participate in interdisciplinary research units, including the Institute for Hazard Mitigation Planning and Research, the Urban Form Laboratory, the Urban Ecology Research Laboratory, the Northwest Center for Livable Communities, and the Urban Infrastructure Laboratory.

The department, committed to public service, has strong connections to the region and beyond. The approach to urban development is driven by the values of sustainability, livability, economic vitality, and social justice. The department is also committed to developing a leading edge urban planning practice with a strong participatory ethos.

Undergraduate Program

Urban Design and Planning offers the following programs of study:

- The Bachelor of Arts degree with a major in community, environment, and planning
- A minor in urban design and planning

Community, Environment, and Planning

208Q Gould

Community, Environment, and Planning (CEP) is an interdisciplinary bachelor of arts degree program offered through the College of Built Environments as one of the University's interdisciplinary undergraduate programs. CEP has gained distinction as a model for a highly personalized, collaborative, and active educational experience within a large research institution. CEP students draw liberally from the entire range of courses, faculty, and programs at the UW.

Bachelor of Arts

Suggested First- and Second-Year College Courses: CEP 200.

Department Admission Requirements

1. Minimum 90 credits completed when student begins the program and at least 80 percent of general education requirements fulfilled
2. Minimum 2.50 GPA with additional emphasis on a written essay, demonstration of relevant extracurricular activities, and a final interview
3. Admission is once a year, for autumn quarter. Early admission deadline is February 15. Additional application dates vary each year. See CEP's website for specific dates.

Graduation Requirements

General Education Requirements

1. *Written Communication (15 credits)*: 5 credits English composition; 10 credits additional composition or W courses. W courses, if applicable, may also be counted toward Areas of Knowledge or major requirements.
2. *Quantitative or Symbolic Reasoning (4-5 credits)*: The QSR course, if applicable, may also be counted toward an Area of Knowledge or major requirement.
3. *Areas of Knowledge (60 credits)*: 20 credits Visual, Literary, & Performing Arts (VLPA); 20 credits Individuals & Societies (I & S); 20 credits Natural World (NW). Required CEP courses and other non-CEP courses used to satisfy major requirements may also be counted toward Areas of Knowledge requirements, if applicable.

Major Requirements

77-82 credits

1. Core Seminars (30 credits): CEP 301, CEP 302, CEP 303, CEP 460, CEP 461, CEP 462.
2. Methods Courses (25 credits): Upper-division courses within the University, with no more than 15 credits from one department; chosen with guidance and approved by CEP staff and faculty.
3. Diversity Course (5 credits): One course that critically analyzes and addresses social constructs and/or issues from a different perspective than that of our dominant culture. Must be approved by the program adviser
4. Digital Skills Proficiency Course (3 credits): One course that enhances student's understanding of the creation, utilization, and implications of digital material. See department for list of approved courses (a course not on approved list must be approved by the program adviser). May count toward Methods Courses requirement if the Digital Skills Proficiency course is an upper-division course.
5. Leadership Retreats (4 credits): CEP 300, autumn and spring
6. Governance Practicum (6 credits): CEP 400, quarterly
7. Internship (5 credits): CEP 446, 120- to 150-hour internship
8. Senior Project Capstone (2-6 credits): CEP 490 and CEP 491, autumn and winter

Electives to complete minimum 180 credits for degree; varies, depending on how many general education courses apply to more than one requirement.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A CEP education is founded on the following: students start where they are; articulate and embrace a vision of how they intend to make a difference in the world; construct a plan (with guidance from faculty and peers) of CEP seminars, cross-disciplinary courses, and field experiences; move deliberately with this plan in the final two years of undergraduate education; through first-hand experience and in the context of the CEP community of learners, become acquainted with effective ways for working constructively together to anticipate and address critical issues facing the complex communities and world we inhabit.

A CEP education is fully lived, not passively taken. CEP students actively make their education in community with others. CEP class cohorts range from 25-30 students. This group comprises a community of mutual learning that requires commitment, personal investment, and strong teamwork strategies for two years. Through six interconnected, quarterly seminars students engage the core content of the major: community, environment, and planning. These contemporary academic fields and areas of research include the study of community as subject and practice, exploration of the ecological context of all societal life, and an investigation of the potentials of planning for developing strategies for positive change.

CEP students have gone on to careers in a variety of interdisciplinary fields such as community planning and organization, urban development, communications, work in for-profit and nonprofit sectors, public administration, education, community and environmental activism, ecology, and government/community relations.

- *Instructional and Research Facilities:* See College of Built Environments section.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* See College of Built Environments section.
- *Department Scholarships:* Department and program offer specific scholarships. Contact program adviser for details.
- *Student Organizations/Associations:* See College of Built Environments section.

Minor

Minor Requirements: 30 credits to include URBDP 300; minimum 13 additional credits in URBDP-prefix courses; and 12 additional credits in planning-related courses with Urban Design and Planning adviser approval. Minimum 2.0 grade required for each course counted toward the minor. See departmental adviser for recommended courses.

Graduate Program

Graduate Program Coordinator
410 Gould, Box 355740
(206) 543-4190
udp@uw.edu

The department offers the Master of Urban Planning (MUP) and the Master of Science in Real Estate (MSRE) degrees and its faculty participate in the interdisciplinary Doctor of Philosophy (PhD) in Urban Design and Planning. The MUP is the professional degree for urban planners, and the MSRE is a two-year professional degree that provides students the core and advanced training necessary for successful careers and leadership positions in the real estate industry. The PhD is for persons who desire careers in urban design and planning, primarily in academic research and teaching or advanced professional work.

Master of Urban Planning

Focuses on planning the physical environment and its socioeconomic and political determinants. Advanced students are encouraged to conduct research and studies in one of the following specializations:

- urban design dealing with physical form, character, and quality issues
- real estate, designed to provide students a deep foundation and specialized skills to help launch or enhance professional careers in real estate
- historic preservation, focusing on the specialized skills needed actively to protect historic districts, buildings, and landscapes
- land-use and infrastructure planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects
- environmental planning, addressing the interactions between urban systems and natural processes

This degree, a two-year (or six-quarter) program, is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms.

Admission Requirements

1. Bachelor's degree in a discipline such as urban planning and environmental design or in other fields such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Applicants should have completed at least one college-level course in each of the following areas: micro-economics, mathematics, statistics, and cultural diversity. Students without sufficient background must take these prerequisite courses concurrently with their graduate studies.
2. GRE general test scores
3. Three letters of recommendation
4. Official transcripts for all previous college courses or programs attended
5. Resume
6. Supplemental information form and statement of purpose
7. Work sample (optional)

8. TOEFL for applicants whose native language is not English
9. Application deadline: January 15 (November 15 for international students) for admission the following autumn quarter

Degree Requirements

Minimum 72 credits

1. 33 core-course credits covering the history and theory of planning and urban design, urban form, communication methods, quantitative methods, processes and methods of land use planning, comprehensive planning, planning law, research methods, and a planning studio.
2. 14 credits of restricted electives, including courses in advanced methods and advanced studio (both may be in an area of specialization); and courses in urban development economics, and in history/theory of planning.
3. 9-credit thesis or professional project following completion of all other degree coursework
4. 16 credits in open electives

An internship is encouraged for those without previous professional experience. A specialization in one area of planning is required. Specialized areas include land-use and infrastructure planning, real estate, urban design, historic preservation, and environmental planning.

For specific courses, see program website at urbdp.be.washington.edu/mup.html.

Master in Infrastructure Planning and Management (MIPM)

A two-year, eight-quarter, online degree. Teaches professionals to master the methods and core knowledge required to sustain and ensure resiliency of major infrastructures against both man-made and natural disasters. For further information, see program website at <http://www.infrastructure-management.uw.edu/mipm/>.

Admission Requirements

1. Bachelor's degree in a discipline such as urban planning and environmental design, or other fields such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or law or criminal justice.
2. At least one college-level course in mathematics.
3. GIS introductory course (recommended).
4. TOEFL for applicants whose native language is not English
5. Application deadline: July 15 for autumn quarter

Degree Requirements

45 credits

Students take two courses per quarter for a total of 15 of the 16 courses outlined below.

1. Four required core courses: introduces key concepts about infrastructure, systems thinking, financial planning, and the fundamentals of policy making. In addition, students explore the impacts of climate change on infrastructures.
2. Four required methods courses: focuses on processes related to planning and monitoring infrastructures, general management, and leadership. Processes include advanced geospatial analysis, epidemiology, emergency management, and business continuity planning.
3. Five systems courses: focuses on infrastructure systems for food, energy, communications, transportation, and more. (Students select five of the six courses offered).
4. Two capstone courses: helps students synthesize knowledge learned across the program and then apply it to a real-world project, conduct research, and develop a case study.

Master of Science in Real Estate

Provides students basic knowledge, core skills, and advanced understanding necessary to assume leadership positions in the real estate industry. An emphasis on interdisciplinary study allows graduates to engage in collaborative efforts and to address the complex problem of achieving sustainable cities.

Admission Requirements

The Runstad Center admits students whose objectives align with those of the program, which are to apply broad business leadership skills to solve real-world problems; understand how spatial and capital markets affect creation of value; examine the effects of place-bound, three dimensional built forms on cities; explore how behavior of decision makers impacts sustainable real estate.

1. Undergraduate or graduate degree in a discipline such as architecture, business, construction, engineering, geography, public policy, law, or urban planning. Experience in real estate or related field highly valued.
2. Application form to include resume, statement of purpose, personal history
3. Official transcripts from each college or university attended
4. Three letters of reference
5. GRE or GMAT scores
6. TOEFL scores for international students
7. Application deadline: February 1 for autumn quarter (November 1 for international applicants)

Degree Requirements

Minimum 72 credits

The Master of Science in Real Estate degree, a demanding, interdisciplinary program, combines business management skills with an understanding of how real estate markets work and how the three-dimensional, place-bound attributes of real estate products affect their performance. Overarching these three interdisciplinary areas of study is a focus on how behaviors of those involved in making decisions about real estate investment and development affect desired outcomes.

The curriculum provides basic knowledge, core skills, and advanced understanding necessary for graduates to assume positions of leadership in the real estate industry of tomorrow. Learning leadership skills is integral to everything a student does throughout the two years in the program. Interdisciplinary study provides understanding of techniques and tools used in a broad range of fields essential to real estate, enabling graduates to lead collaborative efforts to solve complex problems of creating sustainable

urban environments. The limits imposed by the physical characteristics of real estate have put a premium on understanding behaviors of people involved in creating and managing real estate projects. People make the decisions that drive values of property types. Students explore ethical behaviors leading toward emphasis on using technology to support classroom and case learning and in applying the knowledge and leadership skills learned throughout the program. For curriculum details, see the program website at <http://runstad.be.washington.edu>.

Doctor of Philosophy

Many departmental faculty are part of an interdisciplinary faculty group which offers doctoral study in urban design and planning. The program is located administratively within the Graduate School. See Interdisciplinary Graduate Degree Programs.

Certificate Programs

Graduate students may elect to participate in the College-wide certificate programs in urban design and historic preservation. (See program descriptions in the College of Architecture and Urban Planning section).

Michael G. Foster School of Business

School Overview

Dean

Jim Jiambalvo
303a Dempsey

Associate Dean for Academic Affairs

Thomas Lee

303d Dempsey

busadmin@uw.edu

Men and women embarking on business careers have the opportunity to influence many of the social, political, and economic forces in today's world. The Foster School prepares students for professional careers in management and related disciplines in both the private and public sectors.

The Foster School offers an undergraduate program leading to the degree of Bachelor of Arts in Business Administration (BABA) and graduate programs leading to the degrees of Master of Business Administration (MBA), Executive Master of Business Administration (EMBA), Technology Management Master of Business Administration (TMMBA), Master of Professional Accounting (MPAcc), and Doctor of Philosophy (PhD). An evening MBA program is also offered. Additionally, the Foster School offers a Master of Science degree in Information Systems (MSIS) and a Global Executive Master of Business Administration (GEMBA).

Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business (now known as the International Association for Management Education) since 1921.

Facilities and Services

Most Foster School classes and activities are in four buildings. Dempsey Hall, named for Neal and Jan Dempsey, contains the dean's office, MBA and undergraduate offices, the Arthur W. Buerk Center for Entrepreneurship, MBA and undergraduate career centers as well as classrooms and an executive forum. PACCAR Hall offers a combination of U-shaped tiered classrooms, meeting spaces, a 250-seat auditorium, student breakout rooms, faculty offices, and a soaring atrium with a café and a boardroom. It is equipped with a wide range of technology enhancements including web-linked digital monitors and distance conferencing capabilities. Mackenzie Hall, named in memory of Professor Donald Mackenzie, Chair of the Department of Accounting from 1949 to 1955, contains the offices of the Foster School's Consulting and Business Development Center, the Global Business Center, the Center for Leadership and Strategic Thinking, and the Foster School Advancement and Alumni teams. A fourth building, on the northwest side of Dempsey, has three distinct components: the Bank of America Executive Education Center (which includes the James B. Douglas Executive Forum), the Boeing Auditorium, and the Albert O. and Evelyn Foster Business Library.

To serve the continuing education needs of middle- and senior-level managers, the Foster School offers a number of certificate programs, either University-initiated or co-sponsored with various community and industry organizations. The Executive Development Program, a nine-month, one night per week program, strengthens understanding and skills in all areas of management and provides an opportunity for

successful managers to learn from a distinguished faculty and each other. Short courses and seminars are offered throughout the year, focusing on topics such as leadership, finance and accounting for non-financial executives, and negotiation skills. In addition, the School develops and runs custom programs under contract with individual companies and organizations. Information on continuing education programs may be obtained from the Office of Executive Education, (206) 543-8560, fax (206) 685-9236, execed@uw.edu.

International Business Programs

International business programs are coordinated and developed by the Foster School's Global Business Center. These activities include special graduate and undergraduate certificate programs, the Global Business Program, seminars, internships, business foreign-language programs, special guest-speaker programs, and study tours. Although the Marketing and International Business Department offers a general curriculum in international business, each of the five academic departments within the Foster School maintains faculty with special international teaching and research expertise. Internationally oriented courses are offered by each department.

At the undergraduate level, the Foster School offers the Certificate of International Studies in Business (CISB) program. Students in the program complete the same demanding business curriculum as other students and enhance this training with foreign language study, area studies, and an international experience. The program requires that students have a solid foundation in one of five language tracks: Chinese, French, German, Japanese, and Spanish; a sixth custom track for other languages is also an option. In addition, there is a U.S. track for international students.

At the MBA level, the Foster School offers opportunities for MBA students to build on the international business foundation that every MBA develops through the first year of the program. In addition to international business electives, the program offers overseas travel through study tours, quarter-long exchange programs, and international internships. MBA students may also participate in the weekly Global Business Forum, which brings top international business leaders to campus to discuss important issues facing their companies and industries.

Questions regarding these programs may be directed to (206) 685-3432 or goabroad@uw.edu.

Entrepreneurship Programs

The focus of the Foster School's entrepreneurship programs is on nurturing skills that generate creative ideas, innovative processes, and new business growth. These skills are developed through special academic certificate programs, internships, a business plan competition, club activities, and consulting opportunities with area businesses.

The Center for Innovation and Entrepreneurship (CIE) is open to both undergraduate and graduate students from the Foster School as well as other University schools and colleges. Through its workshops, events (Entrepreneur Week), and annual competitions (Business Plan Competition, Environmental Innovation Challenge, and Venture Capital Investment Competition), CIE encourages a cross-discipline and collaborative approach to business creation, and nurtures overall entrepreneurial thinking in students. The CIE's Lavin Program is a curriculum for entrepreneurially minded undergraduates that provides the core foundational experience, skills, and know how for developing future business ventures. Graduate students may take the Entrepreneurship Certificate program, which offers real-world experience, technology internships with the UW Center for Commercialization, and mentoring from the Seattle entrepreneurial community. For more information visit www.startup.washington.edu, or contact CIE at (206) 685-9868, or uwcie@uw.edu.

The Business and Economic Development Center (BEDC) matches undergraduate and graduate student consulting teams with small-business owners in Seattle's inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the Business and Economic Development Center can be directed to the program office at (206) 543-9327.

Consulting Programs

The Business and Economic Development Center (BEDC) matches undergraduate and graduate student consulting teams with small-business owners in Seattle's inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the Business and Economic Development Center can be directed to the program office at (206) 616-1216 or wtutol@uw.edu.

Business Career Center

The Business Connections Center coordinates all MBA and MPAcc career services. These include career counseling and career management workshops, the administration of special career events such as career fairs, company presentations, on-campus MBA and MPAcc recruitment, and a job-listing service. The Business Connections Center also administers alumni and executive mentoring programs. Questions regarding these programs and services may be directed to the center's office, 202 Lewis, (206) 685-2410.

Undergraduate business-career counseling and on-campus recruitment is provided by the UW Center for Career Services, 134 Mary Gates Hall, (206) 543-0535.

Instructional Resources Office

The Instructional Resources Office promotes excellence in teaching by providing resources in current practice and research in teaching and learning. The office serves faculty and teaching assistants with individual consultations, coordinates a teaching preparation program for doctoral students, and offers assistance with instructional innovations. Questions can be directed to the Instructional Resources Office, 317 Lewis, (206) 685-9608.

The Business Writing Center

The mission of the Business Writing Center is to help undergraduates develop the writing skills essential to professional success. The center offers one-on-one tutoring, workshops and peer feedback for special class projects, and opportunities for advanced students to be peer tutors. Questions can be directed to the center's office, 337 Lewis, bwrites@uw.edu.

Honor Societies

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based on outstanding scholastic achievement.

Beta Alpha Psi is the accounting honor society. Membership is based primarily on scholastic achievement, but some community service is also required. Beta Alpha Psi provides a mechanism for students, professionals, and educators to meet on both formal and informal bases.

The goals and interests of graduate students are served by the MBA Association, Business Consulting Network, Challenge for Charity, Entrepreneurship and Innovation Club, Graduate Consulting Club, MBA Finance Club, Global Business Association, Graduate and Professional Student Senate, MBA Marketing Club, Net Impact, High-Tech Club, MBA Speakeasy, Women in Business, and the Doctoral Association.

bizinfo@uw.edu

The Foster School offers the following programs of study:

- The Bachelor of Arts in Business Administration degree with options in accounting, entrepreneurship, finance, human resources management, information systems, and marketing.
- A minor in entrepreneurship

Bachelor of Arts in Business Administration

Suggested First- and Second-Year College Courses: English composition, calculus, ECON 200, ECON 201. In addition, classes to fulfill general education requirements which develop strong writing and analytic skills. ACCTG 215, ACCTG 225, MGMT 200, and Q METH 201 are suggested second-year college work.

Department Admission Requirements

The Foster School offers admission to upper division applicants for autumn and winter quarters. Those UW students who are prepared, as freshmen, to apply for early admission, may do so only for autumn quarter. Students admitted for autumn may elect to take classes during the prior summer quarter.

Applicants are considered in two admission groups: the Freshman Direct Admission Program and the Upper-Division Admission Group (UAG), described below. The following requirements apply to the Upper-Division Admission Group:

1. A minimum cumulative 2.50 GPA for all college coursework
2. A minimum cumulative 2.50 GPA for all required business courses

3. A student who has previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business courses.
4. Since eligible applicants exceed the space available, acceptance is competitive. Admission is based on evaluation of four factors:
 - a. overall scholastic record
 - b. grades in pre-application courses, described below
 - c. written communication skills
 - d. evidence of leadership skills, community activities, and the promise of achievement in a business or professional career.

Consideration is also given to such factors as economic and educational disadvantage, significantly higher recent grades, and exceptional extracurricular activities or work experience.

Admission for UAG is offered twice a year, for autumn and winter quarters. A Foster School application, together with all supporting materials, must be on file by April 5 for autumn quarter admission or October 5 for winter quarter admission. Records of all coursework completed by the deadline must be submitted at the time of application. Admission for Freshman Direct is offered once a year, for autumn quarter only.

Freshman Direct Admission Program

The Foster School enrolls a small number of students each year directly out of high school, prior to completion of any university-level prerequisites. Freshmen applicants to the University listing Business Administration as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores.

Upper-Division Admission Group (UAG)

Students must present a minimum of 60 academic credits at the time of application including the following graded credits: ACCTG 215; ECON 200 or ECON 201; MATH 112, MATH 124, or MATH 134; an approved English composition course, chosen from C LIT 240, ENGL 104-ENGL 105, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281, ENGL 297, ENGL 298, or ENGL 299. In addition, the following courses must be completed prior to admission in autumn quarter: ACCTG 225; ECON 200 and ECON 201; MGMT 200; QMETH 201. Applicants should take general education or elective courses to complete the minimum 60 graded credits.

Students admitted to the UW as freshmen are expected to take ACCTG 215, ACCTG 225; MGMT 200; and QMETH 201 in residence.

Qualified applicants with at least 45 credits and a minimum 2.85 GPA who meet University admission requirements, but not Foster School requirements, are eligible to be placed in the College of Arts and Sciences as pre-business majors.

The University of Washington provides equal opportunity in education without regard to race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam veteran in accordance with UW policy and applicable federal and state statutes and regulations.

Graduation Requirements

180 credits as follows:

General Education Requirements: The following must be selected from the University Areas of Knowledge courses: 20 credits in Visual, Literary, & Performing Arts; 20 credits in Individuals & Societies, including 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201); 20 credits in the Natural World, including 5 credits in calculus (MATH 112, MATH 124, or MATH 134); most students need precalculus before taking college calculus (some precalculus courses qualify for the Natural World requirement); 5 credits in English composition.

Students from community colleges in Washington should check the Transfer Guide or consult with their community college adviser for equivalent courses. Students from other four-year schools should see an adviser at their school. Students entering the Foster School under the terms of the Associate Degree Agreement may apply courses selected from the community college's breadth list toward the general education requirements.

Foster School Requirements: ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300; MGMT 320; MGMT 430; and 300- or 400-level business electives (or area of concentration) to bring the total number of business credits to 72; two writing-intensive courses, one from B CMU 301, B CMU 410, ENGL 281, ENGL 381; one from English composition, or from the remaining three courses listed immediately above, or from any W course. No more than 6 lower-division business elective credits; a minimum of 90 non-business credits, which may include up to 14 credits of economics and up to 9 credits of statistics but not GEN ST 350; a minimum 2.50 cumulative GPA in all business credits earned at the UW; and a cumulative 2.50 GPA for all UW credits. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.

Accounting Option: The notation "Accounting" is indicated on the permanent record, or transcript, of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative 2.50 GPA: ACCTG 301, ACCTG 302, ACCTG 303, ACCTG 311, ACCTG 320, ACCTG 321, ACCTG 411, ACCTG 440, and at least one 400-level accounting elective, excluding ACCTG 490, ACCTG 495, and ACCTG 499. Students who have completed ACCTG 505 may not apply to the accounting option. The accounting option requires 186 credits for graduation.

Entrepreneurship Option: The notation "Entrepreneurship" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: ENTRE 370, FIN 457/ENTRE 457, MKTG 455/ENTRE 455; 8 credits from an approved list of electives. See advisor for approved list.

Finance Option: The notation "Finance" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: one course from FIN 450, FIN 453, FIN 454, or FIN 457; either FIN 460 or FIN 461; four additional courses chosen from the 400-level FIN courses, B ECON 301 or ECON 301, or the 400-level B ECON courses, excluding FIN 490, FIN 495, FIN 499, B ECON 490, and B ECON 499.

Human Resources Management Option: The notation "Human Resources Management" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative 2.50 GPA: MGMT 311, MGMT 411, MGMT 412, and two of the following courses: MGMT 323, MGMT 401, MGMT 402, MGMT 403, MGMT 404, or MGMT 413.

Information Systems Option: The notation "Information Systems" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: I S 320, I S 410, I S 445, I S 451, and I S 460.

Marketing Option: The notation "Marketing" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: MKTG 450, MKTG 460, and three additional MKTG electives, excluding MKTG 490, MKTG 495, and MKTG 499. It is recommended that students take MKTG 450 and MKTG 460 before they take the other electives.

Operations and Supply Chain Management Option: The notation "Operations and Supply Chain Management" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum 2.50 cumulative GPA: QMETH 450, OPMGT 443, OPMGT 450, I S 451.

Admission to the options: Students can apply to one option at the same time they apply to the Foster School. Continuing Foster School students can apply during publicized application periods. If demand for the option exceeds the number of spaces available, students are considered based on the factors identified for admission to the Foster School and on their GPA in all previous option-specific courses.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [School website](#).

Minor

Entrepreneurship

Admission is competitive, based on evaluation of three factors: (1) overall scholastic record; (2) grades in lower division prerequisite coursework; (3) evidence of entrepreneurial activities or the promise of achievement in an entrepreneurial business career. Application deadlines and requirements are available in the Foster School Undergraduate Programs Office or at foster.washington.edu/undergrad.

Minor requirements – 29 or more credits as follows: (1) ACCTG 219, or ACCTG 215 and ACCTG 225, or equivalent; (2) ECON 200, or equivalent; (3) ENTRE 370; (4) ENTRE 472 and ENTRE 473; (5) additional ENTRE electives at 300 level or above, selected from a list maintained in the Foster Undergraduate Programs Office to achieve a minimum of 29 credits; (6) Minimum 2.00 cumulative GPA in courses applied to the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A business education develops important communication and interpersonal skills. The ability to express an idea, negotiate a settlement, motivate others, manage time, and build collaborative networks distinguishes the most successful business people. UW Foster School students learn to recognize and define problems, examine data, and persuasively communicate their ideas to achieve results in organizations and people's lives. Regardless of post-graduation path - be it climbing up the corporate ladder, starting a company, joining the Peace Corps, entering law school, or becoming a doctor - a business education helps immeasurably.
- *Instructional and Research Facilities:* Paccar and Dempsey Halls boast a wide range of technology enhancements including web-linked digital monitors and distance conference

capabilities as well as 25 team rooms for student use, and direct access to the library. The Foster Business Library houses an extensive collection of books, reference tools, and journals necessary to the study of business. The Buerk Center Innovation Laboratory represents a new paradigm for integrating entrepreneurial education with technology development and hands-on experience.

- *Honors Options Available:* Honors students benefit from a sense of community generated by Honors seminars, as well as from the academic challenge associated with more rigorous study. The program requirements are flexible, challenging students to explore business topics in greater depth. Students entering the Honors program become candidates for the degree "With College Honors" or "With Honors."
- *Research, Internships, and Service Learning:* The Foster School encourages student participation in internships to supplement in-class learning experiences. For more information about internship guidelines and a list of undergraduate internship opportunities, visit www.foster.washington.edu/academic/undergrad/Pages/Internships.aspx.
- *Department Scholarships:* The Foster School awards approximately 90 undergraduate scholarships. Some are general scholarships while others are specific to options or areas of concentration. Only students admitted to both the UW and the Foster School are eligible to receive awards. Applicants are considered for all scholarships for which they meet the minimum qualifications and specific criteria. Although financial need is not a requirement for all business scholarships, most are awarded on the basis of need. (The FAFSA must be filed with the Office of Student Financial Aid.) The Foster School scholarship application is due April 5.
- *Student Organizations/Associations:* Chapters of Alpha Kappa Psi, Association of Black Business Students, Beta Alpha Psi, Business Ethics Association, Delta Sigma Pi, International Association of Students in Economics and Business (AIESEC), American Marketing Association, Business Information Technology Society, Hispanic Business Association, Husky Sales Club, Husky Traders, Latino Professional in Finance and Accounting, National Association of Black Accountants, Society for Human Resources Management, Startup UW, Undergraduate Management Consulting Association, University Sales Club, and Undergraduate Women in Business provide opportunities for undergraduate students to meet informally and to participate in a variety of projects and events.

Double Baccalaureate and Second Baccalaureate

Students who wish to earn more than one baccalaureate degree should consult an academic adviser in the Foster School Undergraduate Program Office, either during or before their junior year. Persons seeking a second baccalaureate should apply at the University's Office of Undergraduate Admissions. To be considered, applicants must complete by quarter of entry the same prerequisites for admission as applicants for the first baccalaureate degree. Since the number of eligible applicants exceeds available space, acceptance is competitive, based on the criteria listed above for selection of first baccalaureate degree applicants. The Foster School uses the GPA for the last 90 credits earned.

Undergraduate Diversity Services

Recruitment, admission counseling, advising, and support services are available for minority students underrepresented at the University, and students from educationally and economically disadvantaged backgrounds. Special scholarships are also available for underrepresented minority students. Academic advisers have information on this program.

Graduate Programs

Associate Dean for Master's Degree Programs

David Burgstahler

Admission

GPA, Graduate Management Admission Test score, work experience, educational and professional objectives, and other factors are considered. Applicants to graduate business programs submit scores on the Graduate Management Admission Test. Those admitted must demonstrate understanding of the fundamental concepts of calculus. Inquiries concerning details of admission should be made to the specific degree program of interest, University of Washington, Foster School of Business, Mackenzie Hall, Box 353200, Seattle, WA 98195.

Application Procedure

Admission to the MBA, EMBA, and PhD programs is for autumn quarter only. Admission to the Technology Management MBA and Master of Science in Information Systems program is for winter quarter only. Candidates for the full-time MBA program may apply by any of the following deadlines: October 15, November 15, January 15, or March 15. Preference is not given to applicants who choose an earlier deadline. Applicants receive a decision about two months after the deadline they have chosen. (January 15 is the final deadline for international applicants.) Deadlines for application to other graduate programs are February 1 for the PhD program; April 1 for Evening MBA; and April 15 for the Executive MBA and MPAcc programs. Students are encouraged to apply as early as possible.

The Foster School of Business offers programs of study leading to the advanced degrees of Master of Business Administration, Master of Professional Accounting, Master of Science in Information Systems, and Doctor of Philosophy. Four programs can lead to an MBA degree: the full-time program, the evening program, the Technology Management (TMMBA) program, and the Executive MBA program.

Master of Business Administration

Executive Director

Dan Poston

110 Mackenzie Hall, Box 353200

(206) 543-4661

mba@uw.edu

Degree Requirements

96 credits (80 credits for evening MBA)

The full-time MBA program is designed for students preparing for a professional career in management. Two academic years are required to complete the program. The first year consists of 48 credits of required courses: B A 500, B A 501, B A 502; three of the following bridge elective options: EBIZ 509 (required for EBIZ certificate), ENTRE 509 (required for CIE certificate), FIN 509 (prerequisite for most finance electives), I BUS 509, MGMT 579, or MKTG 509. The second year is 48 credits of elective courses. Students take no more than 24 credits in any one elective area.

The evening MBA program is for fully employed college graduates seeking a management degree that can be earned outside regular working hours. Instruction is two evenings per week; students typically take

two courses per quarter. The program consists of 80 academic credits, with normal completion in ten quarters. Course requirements are as follows: ACCTG 500, ACCTG 501, B ECON 500, B ECON 501, FIN 502, I S 504, MGMT 500, MGMT 502, MGMT 505, MKTG 501, OPMGT 502, QMETH 500, QMETH 501, 34 credits of electives.

Special Programs

Options for special study: global business program; e-business program, and the program in entrepreneurship and innovation. Concurrent degree programs are also available: MBA/JD with the School of Law, MBA/MAIS with the Henry M. Jackson School of International Studies, MBA/MSE with the College of Engineering's Program in Engineering and Manufacturing Management, and MBA/MHA with the School of Public Health.

Executive Master of Business Administration

Director

Louise Kapustka
(206) 685-1333
emba@uw.edu

The EMBA provides an intensive executive-development experience to a select group of midcareer managers who continue to work full-time while pursuing the degree. Candidates for this two-year program should have seven or more years of increasingly successful work experience including three to four years in management, and currently hold mid- or top-level management positions. They are typically sponsored by their organizations and have been identified as employees with high potential to advance as general managers. Students are selected to ensure diversity of industry, functional areas, and organizational size.

The Executive MBA program offers two scheduling options. Both run for two academic years, September through June. (1) The Regional Program meets for a full day once a week, on alternating Fridays and Saturdays. In addition, students attend spring and fall residence sessions each year. (2) The North America Program meets once a month, generally for three consecutive days, Thursday through Saturday. Between monthly sessions, students interact with faculty and classmates online via the Internet and interactive groupware. This format is designed for individuals from the greater Northwest as well as those from the Puget Sound area whose schedules preclude weekly attendance.

While the scope of the curriculum is comparable to that of the regular MBA program, the pace is more intense and the perspective is that of a general manager. There are 21 required courses and no electives.

Admission Requirements

1. Letter of Endorsement: Candidates must be sponsored by their employing organizations and endorsed by senior management as potential general managers. In sponsoring EMBA candidates, organizations agree to release them on class days and, in some cases, to cover the program fee. Individuals not sponsored by a company need to submit an additional letter of recommendation in place of the letter of endorsement.
2. Three letters of recommendation
3. Graduate Management Admission Test (GMAT) scores
4. Two sealed copies of official transcripts from all degree-granting institutions attended

Applications are accepted throughout the year, with an application deadline of April 15 for the class beginning each autumn. Late applications are handled on a space-available basis.

Degree Requirements

68 credits

Required courses: EMBA 502, EMBA 503, EMBA 504, EMBA 505, EMBA 506, EMBA 510, EMBA 511, EMBA 512, EMBA 520, EMBA 521, EMBA 529, EMBA 530, EMBA 531, EMBA 532, EMBA 533, EMBA 534, EMBA 540, EMBA 551, EMBA 552, EMBA 558.

Technology Management Master of Business Administration

Director

(206) 221-6995

tmmba@uw.edu

Designed for professionals employed in technology companies or work in technology jobs in more traditional businesses. The curriculum, combining the essential components of management education with a specialized focus on high-tech industries, is structured for individuals who want to play a broader role in management and are seeking the necessary management skills and business knowledge. The program focuses on real-world projects and analyses, collaborative learning in study groups, and extensive participant interaction in the classroom. Candidates for this 18-month program have technology experience and upward career progression.

The program, which provides an intensive educational experience to professionals who continue to work full-time while pursuing their degree, runs six consecutive quarters, beginning every January and ending the next year in June. Three-hour sessions are held once a week on a mid-week evening and six-hour sessions are scheduled two Saturdays per month. Two residential sessions are offered. Candidates may be sponsored by their organizations or apply on their own.

Admission Requirements

1. Professional position with a minimum five years of work experience. Career trend of increased responsibilities or promotions. Supervisory or management experience not required, but applicants should demonstrate leadership potential. Candidates' work accomplishments and letters of recommendation should provide evidence of their potential for senior management.
2. Baccalaureate degree from an accredited college or university.
3. Personal statement
4. Three letters of recommendation and evaluations
5. Resume
6. Interview
7. GMAT scores
8. Two sealed copies of official transcripts
9. International applicants: Graduate Admissions Application, Proof of Financial Ability form, photocopy of current visa (if applicable), notice of action (if applicable), proof of English language proficiency (if applicable)
10. Permanent residents: proof of English language proficiency (if applicable)

Each year approximately 50 students are accepted into the TMMBA Program. Applications are accepted throughout the year. Contact the TMMBA office for application deadlines.

Degree Requirements

68 credits, as follows:

TMMBA 500, TMMBA 501, TMMBA 502, TMMBA 503, TMMBA 505, TMMBA 507, TMMBA 510, TMMBA 512, TMMBA 515, TMMBA 516, TMMBA 517, TMMBA 520, TMMBA 521, TMMBA 522, TMMBA 528, TMMBA 530, TMMBA 551, 6 credits of electives

Master of Professional Accounting

Managing Director

Francine Shafer
231 Mackenzie
(206) 616-4964

The MPAcc prepares students for high-level careers with major accounting and consulting firms, governmental agencies, and industry. Students with undergraduate degrees in accounting may complete the program in three quarters. Students with no prior business background take an expanded version of the program. Enrollment is limited to 25 to 30 students in each of two tracks - Accounting and Assurance (A&A) and Taxation. MBA students with a strong interest in accounting and taxation may earn a joint MBA/MPAcc degree.

Admission Requirements

1. Satisfactory completion of prerequisite courses (see website)
2. Scores from the GMAT exam
3. International TOEFL scores
4. Well written essays
5. Work experience
6. Volunteer and student activities

Degree Requirements, Auditing and Assurance Pathway

48 credits, as follows:

1. ACCTG 521, ACCTG 523, ACCTG 527, ACCTG 566, ACCTG 576, ACCTG 577, ACCTG 579
2. *Internship*: ACCTG 575. If no internship, complete four approved elective classes: ACCTG 420, ACCTG 524, ACCTG 525, ACCTG 562 ACCTG 564

Degree Requirements, Taxation Pathway

48 credits, as follows:

ACCTG 530, ACCTG 531, ACCTG 533, ACCTG 534, ACCTG 535, ACCTG 536, ACCTG 537, ACCTG 538, ACCTG 539, ACCTG 541, ACCTG 541, ACCTG 543, ACCTG 547

Master of Science in Information Systems

Program Director

Sarah Garner
568 PACCAR
(206) 543-4587
msis@uw.edu

Provides professionals the tools needed to bridge the gap between business and technology. The four-quarter program trains IS students to identify the appropriate technology solution – to either solve an existing business problem or create a new business opportunity. Students learn how to critically analyze business situations and use innovative approaches that suit those situations in a manner consistent with overall organizational strategy.

This full-time, 12-month program holds classes on two weeknights and on some Saturdays, allowing professionals to earn their MSIS degree while working. The program starts in summer quarter (June). Candidates should have an information systems background.

Admissions Requirements

Applicants are evaluated using the following criteria:

1. Past academic experience
2. General intellectual ability
3. Managerial potential
4. Ability to communicate clearly, succinctly, and persuasively

For a detailed list of admission requirements, visit the MSIS website.

Degree Requirements

44 credits, as follows:

1. MSIS 501, MSIS 502, MSIS 503, MSIS 504, MSIS 510, MSIS 511, MSIS 512, MSIS 521, MSIS 522, MSIS 523, MSIS 524, MSIS 526, MSIS 547, MSIS 550
2. 4 credits of electives from: MSIS 541, MSIS 542, MSIS 543, MSIS 544, MSIS 545, MSIS 546

Doctor of Philosophy

Program Coordinator

Jaime Banaag
102 Mackenzie
(206) 543-4111
baphd@uw.edu

The PhD program is research-based and designed to train scholars interested in academic careers, although this training is also useful for individuals seeking research positions in business and government, as well as in consulting firms.

PhD students complete a program of formal coursework (minimum of 18 courses) and participate in doctoral seminars, independent study, and research. Students select one major area of specialization and complete requirements in two or three additional minor areas (including areas outside the Business School, such as economics, psychology, and mathematics).

Major areas of concentration include accounting, finance, human resource management and organizational behavior, marketing, information systems, operations management, operations research, and strategic management. Students must have research methods as one of the minor areas.

Students are admitted autumn quarter only. Most candidates require four to five years to complete the program. Financial aid is available, in the form of research and teaching assistantships, to all doctoral students. Also, fellowships are available on a competitive basis to support students engaged in their dissertation research.

Departments

Accounting

Accounting involves development and communication of financial and operational information for business and nonprofit economic entities. The curriculum includes understanding accounting information systems, using accounting information in managerial decision making, preparing and auditing financial statements under generally accepted accounting and auditing standards, and understanding the fundamental aspects of personal and corporate taxation. Elective courses provide in-depth instruction in managerial and financial accounting, not-for-profit accounting, and taxation. Courses provide a foundation for careers in accounting (public, industrial, private, or governmental), for a general business career, or for other professions such as law.

For more information, see the [Department of Accounting](#) website.

Finance and Business Economics

Finance and Business Economics address the financial and economic aspects of business decision making. The finance curriculum focuses on financial management and the financial markets within which firms and individual investors operate. Business economics courses concern the economic behavior of firms, including factors that determine costs and prices, and real and monetary forces (such as government policies) that affect the national and international economic environment.

For more information, see the [Department of Finance and Business Economics](#) website.

Management and Organization

Management and Organization provides an understanding of the processes and structures of organizations through three distinct programs. The Human Resource Management and Organizational Behavior (HRMOB) courses address personnel and industrial-relations topics such as selection, performance appraisal, compensation, and negotiations, as well as behavioral topics such as leadership, motivation, and group dynamics. They prepare students for managing an organization's human resources effectively. The Organization and Environment (O E) courses examine organization theory, organization design, and management of technology and innovation, as well as the social, political, legal, and ethical environments in which organizations operate. They give students the knowledge, perspective, and analytical tools to deal effectively with organization-environment interactions. The Business Policy (B POL) courses focus on organizational effectiveness from the viewpoint of top management. Emphasis is

placed on an integrated view through strategic management and control, planning, decision making, and entrepreneurship.

For more information, see the [Department of Management and Organization](#) website.

Information Systems and Operations Management

The Department of Information Systems and Operations Management consists of three sub-areas: Information Systems (I S), Operations Management (OPMGT), and Quantitative Methods (QMETH). The information systems area focuses on the management of computer-based information systems. The I S curriculum is designed to give students a basic understanding of I S technology and its impact on all phases of an organization. Specific areas of study include telecommunications and network design, systems analysis and design, database management, expert systems, and applications programming. The operations management area of study refers to the functional area of management which produces goods or services in an organization. Specifically, the OPMGT curriculum focuses on the many changes which have occurred in the past ten years in the way that managers think, plan, and operate manufacturing and service facilities. The area includes courses in logistics, quality, inventory and supply-chain management, project management, and waiting lines, among others. The quantitative methods area focuses on the theory and application of mathematical and statistical tools in the modeling and analysis of business problems. The QMETH curriculum includes courses in statistics and data analysis as well as courses in operations research (e.g., linear programming, forecasting, and using spread-sheets to construct decision support models).

For more information, see the [Information Systems and Operations Management](#) website.

Marketing and International Business

Marketing (MKTG) provides knowledge of concepts and relationships in the areas of consumer behavior, channels of distribution, measurement and analysis of markets, pricing, physical movement of goods, product development, promotion, and sales administration. Marketing careers may involve specialization in Internet marketing, product or brand management, advertising, selling, sales management, marketing research, retailing, wholesaling, and international marketing for a wide spectrum of firms and industries. International Business (I BUS) includes trade, payments, and multinational corporate systems and activities. The area prepares students for international responsibilities in domestic business firms, governmental agencies, and overseas business. Courses in Business Communications (B CMU) stress writing in organizations to accomplish goals, oral reporting, business plan presentation, and the use of computer graphics in communication.

For more information, see the [Department of Marketing and International Business](#) website.

School of Dentistry

School Overview

Dean

Joel Berg
D322 Health Sciences

Established in 1945, the University of Washington School of Dentistry offers courses leading to a Doctor of Dental Surgery (DDS) degree, and advanced education leading to a Master of Science in Dentistry degree and/or a certificate of proficiency in endodontics, oral medicine, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Residency training is available in oral and maxillofacial surgery and general practice. The Department of Oral Biology offers a Master of Science (MS), an MS non-thesis degree for dental hygiene educators, and a doctoral degree (PhD). Postdoctoral study is available in various disciplines.

Opportunities to earn other degrees concurrently (MS or PhD in the School of Dentistry's Department of Oral Biology and other schools) may be arranged on an individual basis.

These educational programs are enriched by the School's strong commitment to Research and the presence of a Regional Clinical Dental Research Center, the Northwest Center to Reduce Oral Health Disparities, Northwest PRECEDENT, an affiliation with the Institute of Translational Health Sciences (ITHS,) and a fellowship Research training program for predoctoral and postdoctoral students. The mission of the Regional Clinical Dental Research Center is to foster clinically relevant Research that advances dentistry's knowledge base, improves patient care, and promotes oral health. The Disparities Center performs Research aimed at reducing oral health disparities in the Pacific Northwest. Northwest PRECEDENT is the Practice-based Research Collaborative in Evidence-based DENTistry. Founded in 2005, this network of dental practices has established the infrastructure to perform a wide variety of oral health Research studies across a five-state region covering Idaho, Montana, Oregon, Utah, and Washington. The mission of the ITHS is to create, enable, and sustain innovative translational Research and Research collaborations across disciplines and professions which accelerates the development of concepts and tangible products that improve human health. State-of-the-art clinical Research facilities are available for faculty and student use.

School of Dentistry Mission Statement: "The School of Dentistry shares the University's overall mission to generate, disseminate, and preserve knowledge and serve the community. The School is an integral part of the Warren G. Magnuson Health Sciences Center and is an oral health-care center of excellence serving the people of the state of Washington and the Pacific Northwest. The primary mission, through educational, Research, and service programs, is to prepare students to be competent oral health-care professionals. The School's Research programs contribute to the fundamental understanding of biologic processes and to the behavioral, biomedical, and clinical aspects of oral health. The service mission is to improve the health and well-being of the people of the community and the region through outreach programs that are especially attentive to minority and underserved populations. The School values diversity in its students, staff, faculty, and patient populations. It seeks to foster an environment of mutual respect where objectivity, imaginative inquiry, and the free exchange of ideas can flourish to facilitate personal development, professionalism, and a strong sense of self-worth." (August 2002)

The following departments participate in the curriculum for the School's programs:

- Dental Public Health Sciences is concerned with the social, legal, political, economic, and psychological aspects of dental healthcare delivery as well as the epidemiology of oral diseases and the application of biostatistical methods in studying them.
- Endodontics offers training in the diagnosis and treatment of diseases and injuries of the tooth pulp and periradicular tissues.
- Oral and Maxillofacial Surgery trains students in the procedures used for all types of operations in the oral cavity and all phases of dental pain control.
- Oral Biology encompasses the study of basic biological mechanisms in normal and diseased oral tissues and structures.
- Oral Medicine provides training in diagnostic techniques and nonsurgical treatments of oral disease.
- Orthodontics provides training in the prevention and correction of malocclusion of the teeth.
- Pediatric Dentistry provides students with a broad understanding of prevention, diagnosis, and treatment of most dental needs from infancy through adolescence with emphasis on the psychological and educational requirements of the patient and parent.
- Periodontics offers training relative to the periodontium and dental implants, with emphasis placed on diagnosis, prevention, treatment, and maintenance.
- Restorative Dentistry offers training in the restoration or replacement of tooth structure and study of the form and function of the masticatory structures, and fabrication and maintenance of removable, complete, immediate, and partial dentures and dental implants.

Undergraduate Program

Dental hygiene seeks to understand why some people get preventable oral diseases and why others do not. Risk factors, such as poverty, ethnicity, and education, as well as environment, contribute to perpetuation of these diseases. The dental hygienist observes and defines dental diseases, assesses potential outcomes of interventions, and manages conditions that compromise oral health. As an applied discipline, dental hygiene links its theoretical foundation to behavioral and natural sciences. Using evidence-based science, the discipline seeks to facilitate holistic assessments of individuals and communities and to find solutions to oral health problems. Students in the discipline learn to transfer learning from clinical to community contexts as a means of improving the oral health status among people.

Adviser
D583 Health Sciences, Box 357475
(206) 543-5820
dhyg@uw.edu

The Dental hygiene degree completion program offers the following program of study:

- Bachelor of Science degree with a major in dental hygiene.

The UW has no pre-licensure program in dental hygiene.

Bachelor of Science

Suggested First- and Second-Year Courses: Students desiring entry into the dental hygiene profession may take their first-year general education courses in chemistry, psychology, sociology, public speaking,

English composition, mathematics, nutrition, microbiology, and liberal studies at the UW, or another community, technical, or four-year institution. Having successfully completed a pre-licensure dental hygiene program and obtained a license to practice dental hygiene, students are eligible to return to the UW to complete the Bachelor of Science degree with a major in dental hygiene.

Department Admission Requirements

The dental hygiene program is not accepting new applicants. Please contact the program for further information.

Major Requirements

Following completion of a pre-licensure dental hygiene program and being licensed to practice dental hygiene, students must complete UW general education requirements as well as dental hygiene major requirements to obtain the BS degree. UW requirements include a 45-credit senior residency; English, writing, and quantitative reasoning proficiencies; and Areas of Knowledge courses. The dental hygiene major requirements include a sequence of three dental-hygiene core courses and a minimum of one path.

Completion of the required major and UW requirements takes one to two years. Students planning to graduate in one year must have a faculty-approved plan of study within the first quarter of enrollment. Students planning a two-year program must have a faculty-approved plan of study within the first two quarters of enrollment. All students must meet with a program adviser yearly and are encouraged to meet with one quarterly.

Core Requirement

Students complete a year-long core requirement founded on significant oral health problems and probable solutions within the context of specific communities. Behavioral change, community development, health education models, and scientific literature provide a theoretical foundation for study in the core courses. The core curriculum focuses on real problems in real places. Using a people-places-problems approach, students use Internet and library resources to Research, analyze, discuss, and make evidence-based decisions relevant to oral health promotion and dental disease prevention. Further, they explore core values, ethics, laws, and issues related to care access, health promotion/disease prevention approaches, and healthcare delivery models. Included are field activities linked to education, government, business, and health resources. Additionally, dental hygiene majors complete requirements in at least one path and may take electives of their choice to complete the senior residency requirement. All students must complete the three core courses, D HYG 465, D HYG 492, and D HYG 493 (3 credits each, total 9) in the prescribed order.

Path Requirement

Students must select at least one of two pathways to fulfill the path requirement. The options are as follows:

Dental Hygiene Care. This path is for dental hygienists who desire to work as clinicians in hospitals, clinics, long-term care facilities, or other healthcare services that require advanced clinical and management skills. Students take courses in interdisciplinary health sciences, along with courses that focus on dental hygiene care and management of persons with physical, mental, developmental, and complex medical disabilities. Required courses in oral medicine augment this path. Major requirements include a minimum of 11 or 12 credits beyond the core: 10 credits in ORALM 460, or approved alternatives that focus on care of special clients; 3 credits of approved interdisciplinary health science courses; and 2 credits of approved Research.

Oral Health Promotion. This path is for dental hygienists who desire to work in multicultural and multidisciplinary settings at the local, state, national, or international levels and who require skills beyond clinical expertise. Students learn about the framework within which societies organize and manage their healthcare services and learn to link health with the environment, people's beliefs, ways of life, and kinship. They learn about differences between Western, Eastern and Shamanistic philosophies of health as prerequisites to developing educational strategies for oral health promotion and dental disease prevention. As students build skills essential for working with health agencies, they participate in community health projects as educators, advocates, or Researchers. Activities focus on the health of children and families in rural and remote areas of Washington state. Major requirements for this path include a minimum of 15 credits beyond the core, to include 3 credits in approved interdisciplinary health sciences courses, 3 credits in healthcare delivery systems, D HYG 402 or substitute; 3 credits in health promotion strategies (D HYG 403) or approved substitute; and a minimum of 4 credits in at least two sections of D HYG 404 or approved substitutes.

Academic Standards

Minimum 2.5 grade in each dental hygiene course counted toward satisfaction of graduation requirements. Minimum 2.00 cumulative GPA for all work done in residence at the University. A student whose cumulative GPA falls below 2.00 in any quarter is placed on academic probation.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The UW dental hygiene completion program emphasizes the health of populations rather than of individuals. Dental hygienists conduct community assessments; develop networks that engage community partners; set priorities; obtain baseline measures; set targets; and measure progress toward solutions to community oral health problems. Dental hygiene core skills include the ability to search and retrieve information from the Internet; use census, geographic, and demographic data; critically assess scientific literature; analyze and interpret data; and apply new scientific knowledge to solutions of health problems. In addition to the core knowledge set, dental hygienists select from two paths of study: care of special populations and oral health promotion. Depending upon area of interest, graduates pursue careers as business managers, marketing specialists, clinic administrators, hospital and nursing home dental hygienists, public health planners, program managers, Research assistants, and teachers of dental hygiene.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:*

Students in the undergraduate program take off-campus service-learning courses related to their path of study. Generally, sites are located in rural and underserved health provider shortage areas of Washington state, but may include regional, national, or international locations.

Students are eligible for international programs and exchanges following completion of their core course requirements. An applicant who is a dental hygienist from an affiliated international institution may be eligible for a tuition waiver during one or more quarters of the regular academic year (autumn, winter, spring). Students interested in these opportunities must contact the program's academic adviser at least six months in advance.

Majors may be eligible, following the completion of prerequisite courses, to participate in study-abroad programs that focus on health care delivery, oral health promotion, or dental disease prevention. The University and its affiliated sites provide the settings for fieldwork, service, and Research activities, and interdisciplinary learning experiences.

- *Department Scholarships:* Students may apply for scholarships offered by the Dental Hygiene Education fund.

- *Student Organizations/Associations:* The Washington Rural Health Organization, Washington State Public Health Association, Washington State Dental Hygienists' Association, American Dental Education Association, and International Association of Dental Research are among many from which to select.

Of Special Note: The 90-credit community college transfer limit does not apply to students admitted to this program. The last 45 credits for the degree, however, must be earned in residence through the UW.

Graduate Programs

Through their respective departments, the graduate faculty members of the School offer programs leading to the degrees of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs.

Master of Science in Dentistry/Postgraduate Certificates

Fields of study for the MSD programs include endodontics, oral pathology, oral medicine and orofacial pain, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Although students may enroll in a graduate certificate program only, they may elect to pursue an MSD. Programs are planned to prepare students to think independently, to evaluate their own services and the literature of the programs, and to develop clinical skills to a level to permit successful clinical practice, teaching, or Research in their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment. The purpose of the programs is not only to train students in their respective specialties but also to encourage preparation for academic careers or for Research. Research may be undertaken in basic or applied science. Opportunities for collaborative Research are available with the cooperation of other colleges, schools, or departments of the University.

Postgraduate certificate programs are not administered by the Graduate School, and no thesis is required. The course content may vary somewhat from the MSD program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

Master of Science in Dentistry

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school.
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of Research interest and academic goals. Optional: a personal statement that addresses the relationship between personal background and aspirations
5. A brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the department
7. GRE General Test scores
8. TOEFL -- required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

50 credits, to include:

1. *Required courses (Approximately 35 credits from this list):* ORALB 564, ORALB 565, ORALB 566, ORALB 569, PERIO 575, ORALB 570, ORALB 575, ORALB 579; either ORALB 591, ORALB 592, or DPHS 568; for foreign-trained dentists and non-dentists: ORALB 572, PATH 544
2. *Recommended electives (Approximately 15 credits from this list):* DPHS 569, MEBI 520, ORALB 562, ORALB 574, PATH 501, PATH 552
3. *Research:* Fulfilled by either a report on experimentation carried out by the student in one of the laboratories, or a case report with review of the literature. Students interested in a more Research-intensive experience should consider enrolling in the MS in Oral Biology (thesis) program.
4. *Teaching:* Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.
5. *Note:* At present, this program is not certified by the American Board of Oral Pathology.

Master of Science in Dentistry, Endodontics

Admission Requirements

1. Professional degree from a dental school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. A personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the Department of Endodontics (international applicants must also send official transcripts to the Graduate School)
7. GRE General Test - required only from applicants who graduated from a non-ADA-accredited dental school
8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

Minimum 148 credits, to include:

1. Students who have adequate backgrounds in required courses may, on presentation of appropriate documentation, be excused from required courses at the discretion of the program director.
2. *Required core courses:* ENDO 561, ENDO 580 through ENDO 587, ENDO 590, ENDO 593, ENDO 594, ENDO 600, ENDO 658, ENDO 660, DENT 565, DENT 568, DPHS 568, DPHS 569, ORALB 569, ORALB 574, ORALB 579, ORALB 591, ORALB 592, ORALM 580, ORTHO 580, PERIO 567, PERIO 582, PERIO 585, PERIO 586
3. *Non-thesis Research:* A non-thesis Research study is required. During the first year, each student is encouraged to gain familiarity with Research in progress and to help identify an area of special interest. Then, a preceptor and Research advisory committee is appointed and the student begins

Research work. The master's defense is concerned with the Research subject matter and is conducted as an open seminar followed by examination by the advisory committee.

4. *Teaching:* Students audit predoctoral lecture courses in endodontics, assist with teaching in the predoctoral endodontics laboratory course, and supervise predoctoral dental students working in the endodontic clinic.

Master of Science, Oral Biology

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of Research interest and academic goals. Optional: a personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the Department of Oral Biology
7. GRE General Test
8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections)

Degree Requirements

Minimum 70 credits, to include:

1. Minimum 70 credit hours (including at least nine credits of thesis), of which at least 7 credits must be from science courses outside the Department of Oral Biology. Students who have adequate backgrounds in required courses may, on presentation of appropriate documentation, be excused from required courses; up to six hours of transfer credit may be granted at the discretion of the Graduate School.
2. *Required core courses:* ORALB 569, ORALB 575, ORALB 578, ORALB 579, ORALB 581, ORALB 591, ORALB 592, ORALB 600, ORALB 700, DPHS 568
3. *Electives:* 7 credits from science courses outside oral biology
4. *Recommended:* One class on educational methods
5. *Thesis Research:* A Research thesis is required. During the first year, each student is encouraged to spend time in several laboratories to gain familiarity with Research in progress and to help identify an area of special interest. Then, a preceptor and thesis advisory committee is appointed and the student begins thesis work. The final examination is concerned with the subject matter of the thesis and is conducted as an open seminar followed by examination by the advisory committee.
6. *Teaching:* Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.

Master of Science in Dentistry, Prosthodontics

Admission Requirements

1. Professional degree from a dental school
2. Complete electronic application to the Graduate School, including \$65 application fee

3. Complete the Questionnaire to Applicants for Postdoctoral Training (available for download at the School's website, www.dental.washington.edu)
4. Class Standing form (available for download at the School's website, www.dental.washington.edu)
5. Waiver form
6. Three letters of recommendation or Evaluation of Applicant forms (available for download at the School's Website, www.dental.washington.edu)
7. A personal statement explaining why the student wishes to pursue an education in prosthodontics
8. A CV or Resume
9. Official transcripts, sent directly to the Department of Prosthodontics (all applicants must also send official transcripts to the Graduate School)
10. GRE General Test (required only for applicants who graduated from a non-ADA-accredited dental school outside the US or Canada)
11. TOEFL required for international students; the minimum TOEFL score required is 237 computer, 580 paper, iBT 70, (based only on listening, reading, and writing sections).

Degree Requirements

Minimum 108 credits, to include:

1. *Required Core Courses:* PROS 560, PROS 562, PROS 563, PROS 564, PROS 572, PROS 660 (minimum 16), PROS 665, RES D 570, RES D 580, RES D 585, RES D 588, RES D 589, RES D 590, RES D 600 (minimum 14), RES D 660 (minimum 24), DENT 565, DPHS 568, DPHS 569, ORALM 570, ORALM 580, ORALB 574, ORTHO 580, ORTHO 582, PERIO 561, PERIO 580, PERIO 582, PERIO 585, PERIO 586
2. *Non-thesis Research:* A non-thesis Research study is required for the MSD. During the first year, each student is encouraged to gain familiarity with Research in progress and to help identify an area of special interest. After the student identifies an area of interest, a Research committee is established. The master's defense is concerned with the Research subject matter and is conducted as an open seminar followed by examination by the committee.
3. *Teaching:* Second- and third-year students supervise predoctoral dental students working in the prosthodontics and restorative clinics.

Master of Science, Dental Hygiene

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of Research interest and academic goals. Optional - a personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the Department of Oral Biology
7. GRE General Test

8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

70 credits, to include:

1. *Coursework*: 48 credits, as follows: CONJ 401, CONJ 402, CONJ 403, PATH 544, PERIO 575, ORALB 520, ORALB 561, ORALB 572, ORALB 575; at least one of the following: PERIO 517, DPHS 568, DPHS 569, or O S 532; at least two of the following: MEBI 520, MEBI 521, GRDSCH 630, ORALB 562, D HYG 595.
2. *Electives*: 22 credits of electives. Recommended electives: ORALB 569, ORALB 574, ORALB 578, ORALB 579, ORALB 600, DENT 534, DPHS 550, DPHS 569, ORTHO 580, O S 520, PHCOL 434, PHCOL 435, ORALM 520
3. Clinical opportunities may be available in the DECOD (Dental Education in Care of Persons with Disabilities) and the Dental Fears Clinics.

Doctor of Philosophy

Admission Requirements

1. Either a baccalaureate or a professional degree from a dental or medical school
2. Completed application and application fee of \$65
3. Three letters of recommendation
4. 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional: a personal statement that addresses the relationship between the student's personal background and aspirations
5. Brief biographical sketch in a resume/CV format
6. Official transcripts, sent directly to the Department of Oral Biology
7. GRE General Test
8. TOEFL - required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections).

Degree Requirements

Minimum 90 credits, to include:

Through coursework, students are expected to gain proficiency in one or more basic biologic sciences and to master modern biological approaches in addition to gaining expertise in the subject area of oral and craniofacial sciences. At least 15 credit hours must come from science courses in departments other than oral biology. These include courses offered through the School of Medicine and courses selected to match the basic science interests of the student. Cross-disciplinary training in bioengineering is also available. All graduate students attend and participate in departmental seminars (ORALB 575).

1. *Required core courses*: ORALB 569, ORALB575, ORALB 578, ORALB 579, ORALB 581, ORALB 591, ORALB 592, ORALB 600, ORALB 800, DPHS 568
2. At least 6 credits from the following School of Medicine courses: CONJ 524 through CONJ 558 and PABIO 537
3. Strongly recommended: at least one class on educational methods

Residency Training

Residency training programs are available in oral and maxillofacial surgery and the general practice of dentistry. Both programs provide for rotation through several of the University-affiliated hospitals. Each is a fully accredited program that grants a certificate upon successful completion of the training. Stipends are provided.

The oral and maxillofacial surgery program is four years in duration and provides broad exposure to all aspects of the practice of oral and maxillofacial surgery. Application, selection, and administration of this training program is provided through the Department of Oral and Maxillofacial Surgery. Applicants to the program must be graduates of an accredited U.S. or Canadian Dental School, demonstrate proficiency in the English language, submit National Dental Board Examination scores for Part 1, and register and participate in the Postdoctoral Dental Matching Program. Further information can be obtained by contacting the Residency Program Coordinator, Department of Oral and Maxillofacial Surgery, Box 357134, University of Washington, Seattle, WA 98195-7134, (206) 543-7722.

The General Practice Residency (GPR) is a one-year training program with a second optional year that emphasizes the general dentist's role in a hospital setting and the management of medically, physically, and mentally compromised patients. It also provides multiple resources for enhancement of dental clinical skills in the dental setting, applying management techniques through minimal, moderate sedation and general anesthesia in the operating room. Applicants to the program must be graduates of an ADA-accredited dental school, submit National Dental Board Examination scores for Part 1, and register and participate in the Postdoctoral Application Support Service (PASS) and Postdoctoral Dental Matching Program (MATCH). Further information can be obtained by visiting the website at dental.washington.edu/departments/gpr/general-practice-residency.html.

Postdoctoral Fellowships

Postdoctoral training fellowships are available in behavioral or public-health Research in dentistry in addition to those in oral biology. Programs vary in duration and many accommodate degree-seeking or Research fellows pursuing an academic career. NIH-sponsored partial tuition and a stipend for up to three years are provided for U.S. citizens, noncitizen nationals, and those foreign nationals with permanent-residency status in the United States. Members of ethnic minorities and women are especially invited to apply. Application, selection, and administration of the program are provided through the Departments of Dental Public Health Sciences and Oral Biology.

Graduate Training in Dental Public Health

Opportunities exist for pursuing graduate degrees in public health which emphasize applications to Research in dentistry. Master of Public Health (MPH) programs in the Departments of Epidemiology and Health Services of the School of Public Health can be pursued in conjunction with postdoctoral training in the School of Dentistry's Department of Dental Public Health Sciences. Didactic coursework is taken in the School of Public Health and Community Medicine, augmented with independent study and thesis Research on selected topics in the School of Dentistry. Similar opportunities exist for pursuing the PhD in epidemiology or biostatistics with an emphasis on Research in dentistry. Further information may be obtained from the Office of Academic Affairs, Box 357480, School of Dentistry, University of Washington, Seattle, WA 98195-7480, (206) 221-6887.

The Office of Continuing Dental Education, School of Dentistry, offers programs and courses throughout the year to provide dentists, auxiliary personnel, and others involved in healthcare with current scientific knowledge and methodology of patient treatment. Utilizing local, national, and international experts, these programs provide a broad spectrum of information relevant to the needs of dental-health professionals. The instructional program consists of lectures, clinical courses, study clubs, extended clinical training,

correspondence, and participation courses, some of which are offered in the simulated-patient laboratory. Various programs are presented throughout the year in the Pacific Northwest, Alaska, and Hawaii.

A list of courses offered may be obtained from the Office of Continuing Dental Education, Box 357137, University of Washington, School of Dentistry, Seattle, WA 98195-7137, (206) 543-5444, dental.washington.edu/cde/current-course-listings.html.

Professional Program

Doctor of Dental Surgery

The Doctor of Dental Surgery (DDS) curriculum provides students opportunities to learn the fundamental principles significant to the entire body of oral health. Students (approximately 63 per class) learn the basic health sciences, attain proficiency in clinical skills, develop an understanding of professional and ethical principles, and develop reasoning and critical decision-making skills that enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory, and preclinical activities in basic sciences, dental anatomy, occlusion, and dental materials. There are also early clinical experiences in preventive dentistry and periodontics. In the second year, students develop additional preclinical skills, learn how basic science principles are applied to the clinical setting, and begin clinical patient treatment. In the third and fourth years, students primarily concentrate on providing clinical treatment and attend lectures that refine diagnostic and technical skills. Additionally, students are required to participate in elective clinical and didactic courses. Students choose elective courses offered by all departments, including opportunities in independent study, Research, seminars on various topics, and specialty clinical topics.

The DDS curriculum extends for 42 months or 14 quarters, including two summer quarters. Twelve of the academic year quarters are ten weeks of instruction and one week of examination, while the two required summer quarters following years two and three are each nine weeks long. If needed, students may be allowed additional time to complete required coursework beyond 42 months.

Admission

Requirements include all undergraduate courses listed below; Dental Admission Test; personal interview. The Admissions Committee encourages diversity in majors. Courses in the social sciences and the humanities are included in the committee evaluation. Dental experience, community service, and non-cognitive factors are given consideration as part of the whole file review.

The School of Dentistry is a state-supported institution and participates in the student exchange program provided by the Western Interstate Commission for Higher Education (WICHE) which supports students from western states without dental schools. Although all applications are carefully reviewed, preference in admission is given to residents of Washington and WICHE states, followed by residents of other states.

Required courses: general chemistry - two quarters or one semester; organic chemistry - two quarters or one semester; general biochemistry - two quarters or one semester; general physics - three quarters or two semesters; general biology or zoology - three quarters or two semesters; general microbiology - two quarters or one semester. Recommended: medical microbiology.

Transfer Applicants: The school rarely, and only under exceptional circumstances, admits transfer students from other dental schools.

Foreign Applicants: The school does not provide a special program for foreign-trained dentists.

Health Sciences Minority Student Programs: To increase diversity of students, the school participates in the Health Sciences Minority Student Program. In addition to advising and career counseling, this office works with Health Sciences schools to provide student development and support programs, networking opportunities, and summer Research programs. The HSMSP office activities include participation on several health sciences and campus-wide committees for purposes of collaborating and exchanging strategies on effective methods for recruiting and retaining a diverse student body, as well as promoting and celebrating diversity.

Regional Initiatives in Dental Education (RIDE) is a strategic expansion of the University of Washington School of Dentistry in conjunction with Eastern Washington University, designed to help meet the oral health needs of rural and underserved communities in the Northwest. RIDE creates regional training sites in areas lacking dental schools by partnering with regional universities, dentists and dental associations, community health centers, and others. Student admission to the RIDE program in Spokane is limited to residents of Washington State.

The School belongs to the American Association of Dental Schools Application Service (AADSAS). November 1 of the year prior to matriculation is the AADSAS priority filing deadline. Only applications received in the AADSAS Washington, D.C. office by the priority filing date are forwarded to the UW for consideration by the Admissions Committee. There are no exceptions. AADSAS applications are available online at www.adea.org. The UW Dental School's DAT deadline is October 31 of the year prior to matriculation. Information regarding the Dental Admission Test may be found at www.ada.org.

For information on admission to the UW School of Dentistry, contact the Office of Student Life and Admissions, School of Dentistry, University of Washington, Box 356365, Seattle, WA 98195-6365, (206) 543-5840, askuwsod@uw.edu, or www.dental.washington.edu (click on the "prospective student" link). University of Washington undergraduates may contact the Predental Advising Office, University of Washington, 141 Mary Gates Hall, Box 353760, Seattle, WA 98195-3760.

Once the AADSAS application has been received, a preliminary screening determines if an applicant meets the Admissions Committee's criteria to receive a supplemental application and request for the following materials:

1. A supplementary application which includes a short personal statement
2. A non-refundable application fee of \$35
3. Three letters of recommendation are required: one from a science instructor who can evaluate the applicant's academic and intellectual qualifications, a second from a dentist who is familiar with the applicant's knowledge of and motivation toward the dental profession, and a character reference from someone who can indicate the applicant's contribution to the community, etc.
4. If a predental committee exists on the applicant's campus, a combined recommendation from that committee may be used to replace all three recommendations. The School of Dentistry accepts letters of recommendation processed by AADSAS, or directly from recommenders.
5. Dental Admission Test scores. **Test must be taken by October 31 of the year prior to entry.**
6. Transcripts from all higher education institutions attended
7. A list of current and future courses
8. Acknowledgment of having read, understood, and being able to meet, with or without reasonable accommodation, the Essential Requirements of Dental Education at the University of Washington School of Dentistry (to be sent with the supplemental application form)
9. Conviction/criminal history information. Washington state law requires that all faculty, students, and staff disclose background information concerning crimes and offenses against vulnerable populations. A complete copy of the law is available from the School's Office of Student Life and

Admissions and is forwarded upon request. Applications are not considered until completed disclosure forms have been returned to student admissions.

The application is considered complete once all materials noted above (1-9) are returned. Upon receipt of the completed application, invitations for an interview are sent to applicants based on an additional screening of the whole file. The interview is an opportunity for an open, friendly discussion of the applicant's interests, background, and reasons for selecting dentistry as a profession. During the interview day, applicants have numerous opportunities to learn about UW programs, faculty, and student life. In addition to the interview, the School provides the applicant with financial aid and cost information. During the lunch hour, applicants meet with enrolled students and tour the School. Applicants also meet with the deans to learn about programs, Research, and cultural opportunities.

The admissions committee, composed of faculty and community dentists, determines admission status after considering the following:

1. *Grades.* Overall GPA and GPA in required pre dental science courses. Committee members look for a strong, consistent GPA without withdrawals, incompletes, repeated courses, or non-graded options. Grade trends are reviewed.
2. *DAT (Dental Admission Test).* The test, sponsored by the American Dental Association, covers several areas: reading comprehension, quantitative reasoning, survey of natural sciences (including biology, general, and organic chemistry), and perceptual ability (including form development, apertures, angles, cubes, and orthographic projections). At the UW, scores are reviewed to identify an applicant's areas of strength. The test must be taken no later than October 31, one year prior to admission.
3. *Level of Pre-professional Education.* The majority of applicants have completed a baccalaureate degree by the time of entry. Consideration is given to applicants who have not or do not expect to complete a baccalaureate degree, but who have completed all pre dental requirements, have a highly competitive academic record, and a minimum of three years' full-time coursework.
4. *Dental Knowledge.* Includes knowledge of the field of dentistry through volunteer experience in a dental setting (dentist's office, clinic, etc.), introductory dental coursework, and exploration of the dental literature. A qualified applicant has a clear understanding of the profession, a demonstrated interest in the field, and a minimum of 100 volunteer hours in a dental setting.
5. *Contribution to Diversity.*
6. *Unique Life Experiences.* Among other things, Research and teaching efforts, travel, and work experience are some of the life experiences considered.
7. *Personal Attributes.* In addition to motivation, the applicant's poise and communication skills are examined. Personal attributes such as integrity, responsibility, leadership, initiative, community service, perseverance, and diversity of interests are important.
8. *Demonstrated Community Service.*

Interviews begin in October and typically end in February. The American Dental Association Traffic Rules allow dental schools to begin making offers of acceptance on December 1. The School uses a "rolling admission" format, so interviews and committee decisions continue to be made between December and March.

The Admissions Committee makes one of three decisions:

1. *Offer of Acceptance.* Admission application has been accepted. The applicant has a specified time to reply to reserve enrollment in the entering first-year class. In addition, enrollment is contingent on timely submission of the following: registration deposit, transcripts showing

completion of all required pre dental courses, registration for autumn quarter of the upcoming academic year, and completion of required immunizations.

2. *Alternate Status.* Applicant is offered a position on the alternate list. The applicant has a specified time to reserve a position on this list, maintained until the beginning of the school year.
3. *Denial of Admission.* The Committee has considered the application but cannot offer a position or alternate status.

Accepted applicants receive follow-up information about registration procedures, financial aid, and the orientation program throughout the spring and summer. Attendance at orientation is mandatory and provides an opportunity for newly enrolled students to learn about the upcoming curriculum, student rights and responsibilities, financial aid information, student organizations, challenge examinations, and the start of academic coursework. Orientation begins in late August. New students attend an off-campus student retreat to interact with peer advisers and meet classmates in an informal setting.

Western Interstate Commission for Higher Education (WICHE): The school participates in a program administered by WICHE for students who reside in western states not served by a dental school (Alaska, Arizona, Hawaii, Montana, New Mexico, North Dakota, and Wyoming). Such students should seek requests for certification and information about benefits of the program from the WICHE commission office in their state of residence.

Projected costs can be found at dental.washington.edu/prospective-students/projected-costs.html.

Information on loans and scholarships may be obtained from the Director of Financial Aid, D323 Health Sciences, Box 356365. Information relating to student life, including the Academic Regulations Manual and Professional Ethics Code may be obtained from the Associate Dean for Student Life and Admissions, D323 Health Sciences, Box 356365.

Degree Requirements

285-333 credits minimum, as follows:

1. *Year 1 (71 credits, plus electives):* B STR 431, B STR 530, B STR 541; DENT 610; DPHS 510; ORALB 510 (3, 3), ORALB 520; ORALB 521; ORALM 513, ORALM 514, ORALM 515; ORALM 516, ORALM 517; P BIO 505; P BIO 506 (4, 4); PATH 544 (3, 2); PERIO 517; RES D 510 (1, 2), RES D 511, RES D 515, RES D 516, RES D 517, RES D 519
2. *Year 2 (86 credits, plus electives):* DENT 520; DENT 521, DENT 522; DENT 523; ENDO 521; O S 520; ORALM 520 (2, 2, 2), ORALM 525, ORALM 526, ORALM 527, ORALM 528, ORALM 529; ORTHO 520, ORTHO 521, ORTHO 522; PEDO 520, PEDO 525; PERIO 525, PERIO 526 (2, 2); PERIO 620; PHCOL 434, PHCOL 435; PROS 520, PROS 523, PROS 525; RES D 520, RES D 521, RES D 522 (3, 3, 3); RES D 525, RES D 526, RES D 527 (3, 3, 3); RES D 620
3. *Year 3 (74 credits, plus electives):* DENT 533, DENT 534 (1, 1), DENT 537, DENT 543; DENT 551, DENT 552, DENT 553, DENT 554; DPHS 535, ENDO 534, ENDO 535, ENDO 630 (1, 1, 1, 1); O S 530 (1, 1, 1), O S 532, O S 630 (2, 2); ORALM 531, ORALM 532, ORALM 533; ORALM 630 (1, 1, 1, 2); ORTHO 630; ORTHO 631; PEDO 630 (1, 1, 1, 1); PERIO 530, PERIO 531; PERIO 630, PERIO 631, PERIO 632; PERIO 639; PROS 630 (1, 1, 1, 2); RES D 530, RES D 531, RES D 532; RES D 535, RES D 630 (2, 3, 3), RES D 635
4. *Year 4 (55 credits, plus electives):* DENT 547, DENT 548, DENT 549 (2, 2, 2); DENT 555, DENT 556, DENT 557 (1, 1, 1); DENT 640, DENT 645; DPHS 541, DPHS 640; ENDO 630 (1, 1, 1); O S 630; ORALB 540; ORALM 540 (2, 2), ORALM 545 (1, 1), ORALM 640 (1, 1, 1); PEDO 630 (1, 1, 1); PERIO 540; PERIO 640, PERIO 641, PERIO 642 (1, 1, 1); PROS 640 (1, 1, 1); RES D 540, RES D 541, RES D 542, RES D 640 (3, 3, 3)

5. *Electives:* A minimum of two elective courses must be taken during the course of the program. Elective credits may not exceed a total of 50 credits.

Facilities

School clinics, teaching laboratories, and lecture halls are up-to-date, well maintained, and periodically renovated. Clinical modules are assigned to students for use in patient treatment. The D-1 Simulation Clinic is a state-of-the-art teaching facility used for preclinical and laboratory courses.

School Accreditation and Licensure

The school is fully accredited by the Commission on Dental Accreditation, the recognized accrediting body for dentistry and the related dental fields. For information, write to the Commission on Dental Accreditation, 211 East Chicago Ave., Chicago, IL 60611-2678. Admission to the practice of dentistry in any state is conditional upon meeting the requirements of the individual state dental licensure requirement. In order to practice in the State of Washington, the candidate for licensure must have a dental degree from a U.S. or Canadian dental school, and have successfully completed the American Dental Association National Board Examinations and the Western Regional Examining Board Examination. Additional information about licensure requirements should be requested from the Washington State Department of Health, Dental Quality Assurance Commission, PO Box 1099, Olympia WA 98504-1099, (360) 586-6898.

Health Care and Immunization Policy

Enrolled students at the UW School of Dentistry are eligible for healthcare services provided by the Hall Health Primary Care Center. In addition, the University has arranged for an Accident and Sickness Insurance Plan specifically designed for students, their dependents, and their domestic partners for which the Hall Health Primary Care Center is the preferred provider. The UW Health Sciences Center requires that its students, staff, and faculty show documentation of protection against a number of vaccine-preventable diseases. Additional information is available via the Hall Health Primary Care Center website at depts.washington.edu/hhpccweb/

College of Education

College Overview

Dean

Mia Tuan
222 Miller

Associate Deans

Janine Jones
Deborah E. McCutchen

Assistant Deans

Martin Howell
Ann O'Doherty

The College of Education is dedicated to equity and excellence in education through preparation and renewal of education professionals, promotion of social justice, advancement of knowledge through research, and connection of research to inform policy and improve practice. In its graduate programs the College has four broad curricular areas: Teaching, Learning, and Curriculum; Educational Foundations, Leadership, and Policy Studies; Learning Sciences and Human Development; and Special Education, School Psychology, and Statistics. Graduate degrees conferred include the MIT, MEd, EdS, EdD, and PhD. Certification can be earned in teaching (elementary, secondary, and special education), school administration (principals, program administrators, and superintendents), and school psychology.

In addition, the College offers three BA degrees: (1) Education, Communities, and Organizations; (2) Early Childhood and Family Studies; (3) Early Care and Education. In collaboration with the College of Arts and Sciences, the College also offers an undergraduate minor in Education, Learning, and Society.

The College of Education at the UW believes that an effective public education system for a diverse citizenry is the cornerstone of a democratic society. To that end, the College dedicates its resources to helping make an excellent education an everyday reality for every student in every community across the state and country. As part of a major university located in a metropolitan area, the College is able to work in collaboration with a number of school districts in the area to provide teaching, research, and field experiences for its students.

Special Offices and Services

The College of Education maintains a number of specialized offices. Among these are the Office of Teacher Education, the Office of Student Services, the Office of Student Diversity and Inclusion, Unite:Ed (community-practice-research partnerships), and a Writing Support Center. In addition, the College maintains formal relationships with a number of school districts and community organizations in the area to provide research and field experience opportunities for students. Individuals interested in a bachelor's degree in early learning or education in formal and informal settings, graduate degree teacher certification in general and special education, or graduate degree programs in higher education, policy, instructional leadership, school psychology, learning sciences, or educational psychology, may visit the College's website,

education.uw.edu, or e-mail edinfo@uw.edu, for additional information.

Undergraduate Program

Adviser

206 Miller Hall
(206) 221-3527
edinfo@uw.edu

The College of Education offers the following programs of study:

- Bachelor of Arts degree with a major in Education, Communities, and Organizations
- Bachelor of Arts degree with a major in Early Childhood and Family Studies with an option in teaching and learning
- Bachelor of Arts degree with a major in Early Care and Education, an online degree completion program. (Formerly the College of Education offered two major options: (1) General Core and (2) Teaching and Learning. As of autumn quarter, 2020, however, those two options have been replaced by a single major. Please refer to the [UW Seattle General Catalog Archive](#) for information about the options.)
- A minor in Education, Learning, and Society (with the College of Arts & Sciences)

Bachelor of Arts

Education, Communities, and Organizations

Department Admission Requirements

1. Satisfactory progress toward completion of general education requirements; minimum 45 credits
2. Completion of one English composition course (minimum 2.5 grade), EDUC 280 (minimum 2.0 grade), and minimum 2.50 overall GPA
3. Submission of a personal statement indicating interest in the major
4. Application deadlines: April 15 for autumn admission; October 15 for winter admission. Depending on program capacity, applications may be considered after the deadlines.

Information sessions are offered to learn more about the major and how to apply. See schedule at education.uw.edu/programs/undergraduate/eco/admissions

For further information, see: education.uw.edu/programs/undergraduate/eco

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Quantitative/Symbolic Reasoning (5 credits)
 - c. Writing Courses (10 credits)
 - d. Diversity Course (3 credits)
2. Areas of Knowledge

- a. Visual, Literary & Performing Arts (VLPA) (15 credits)
- b. Individuals & Societies (I&S) (15 credits)
- c. Natural World (NW) (15 credits)
- d. Areas of Knowledge (15 additional credits from any area)

Courses taken to satisfy admission requirements and language and reasoning skills requirements may also fulfill Areas of Knowledge requirements. Courses used to fulfill major requirements may also fulfill these requirements, including up to 15 credits of EDUC-prefix courses.

Major Requirements

68 credits

1. EDUC 280 (3 credits)
2. Core Courses (25 credits): EDUC 251, EDUC 370; one from EDPSY 302, EDPSY 380, EDPSY 404 (depending on life-span emphasis – child, adolescent, or adult development); EDUC 472, EDUC 473
3. Concentration Electives (25 credits): See adviser for current list
4. Major Capstone Courses (15 credits minimum): EDUC 481, EDUC 482, EDUC 483
5. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
6. Minimum 45 credits applied to the major taken through the UW

Student Outcomes and Opportunities

- *Learning Objectives:* The student will be able to:
 - Support learning of others across a diverse society
 - Understand that development and learning happen in context and how to enter and engage with different contexts
 - Understand the structure, assets, and values of belonging and contributing to institutions, organizations, and communities
 - Represent themselves, their stories, and their ideas orally, in writing, and in action
 - Continuously self-reflect on their own positionality to engage respectfully with people who have the same and different identities, beliefs, experiences, and ideas
 - Seek out learning and constructive feedback with an open mind
 - Commit to the wholeness and wellness of all, especially those who have historically and continue to be targeted and marginalized
- *Service Learning and Research:* Community engagement is an integral part of the student experience. Students complete three hours per week of service learning with a community-based organization or school when they take EDUC 280 Introduction to Education, Communities, and Organizations. In their final year of the program all students complete a three-quarter internship working with a community-based organization or school. Students collaborate with their site supervisor and mentor to develop an internship project that both supports the work of the partner organization and furthers the student's learning objectives.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Department Scholarships:* See [departmental website](#) for undergraduate scholarship information.
- *Student Organizations/Associations:* Associated Students of the College of Education (ASCE) and International Educators of the College of Education (IECE).

Early Childhood and Family Studies

Department Admission Requirements

1. Satisfactory progress toward completion of general education requirements
2. Admission is capacity constrained, based on the following criteria. Completion of requirements does not guarantee admission.
 - a. Minimum 2.0 grade in ECFS 200
 - b. Minimum 2.0 grade in English composition
 - c. Two-to-three page personal statement reflecting an interest in the early childhood and family studies major and a commitment to learning about the field
 - d. Overall academic performance reflected in copies of unofficial transcripts
 - e. Other evidence of interest in and commitment to the field (e.g., work experience, volunteer experience, or internships)
 - f. Grades in any completed recommended courses and courses applied to major requirements
3. Applications due October 15 for winter quarter start and April 15 for autumn quarter start. For current UW students, notification is sent two weeks later; for transfer students, notification is sent after applicants are admitted to the UW. Transfer students who have not completed ECFS 200 prior to admission must complete this course after matriculation to UW. Applications may be considered after the dates above on a case-by-case basis, depending on program capacity.

Students accepted typically have a minimum cumulative 2.50 GPA and a minimum grade of 2.0 for any prior college coursework that can be applied toward the major.

Information Sessions: Information sessions are offered to learn more about the major and how to apply. See schedule at education.uw.edu/programs/undergraduate/ecfs.

For further information see education.uw.edu/programs/undergraduate/ecfs/, or inquire at 206 Miller.

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Quantitative/Symbolic Reasoning (5 credits)
 - c. Writing Courses (10 credits)
 - d. Diversity Course (3 credits)
2. Areas of Knowledge
 - a. Visual, Literary & Performing Arts (VLPA) (15 credits)
 - b. Individuals & Societies (I&S) (15 credits)
 - c. Natural World (NW) (15 credits)
 - d. Areas of Knowledge (15 additional credits from any area)

Maximum 15 credits in ECFS-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirements.

Major Requirements

74-86 credits

1. *Early Childhood and Family Studies Core Courses (39 credits)*: ECFS 200, ECFS 303 (3), ECFS 311, ECFS 401, ECFS 402; EDPSY 302, EDPSY 406; EDUC 251; NSG 432
2. *Area of Study (35-47 credits)*: one of the areas below
 - a. Option in core (35-47 credits):
 - i. one of ECFS 315, ECFS 320, or ECFS 419 (5 credits)
 - ii. EDSPE 304 or adviser approved substitute (3-5 credits)
 - iii. ECFS 403
 - iv. *Electives*: see website for approved list of College of Education courses (25 credits)
 - b. Option in Teaching and Learning (45-47 credits):
 - i. All major requirements except ECFS 403 and 25 credits of electives
 - ii. ECFS 301, ECFS 312 (3), ECFS 321, ECFS 400, ECFS 410, ECFS 411, ECFS 454, ECFS 455, ECFS 456; EDUC 170
3. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
4. Minimum 40 credits applied to the major taken through the UW

Student Outcomes and Opportunities

- *Learning Objectives*: The early childhood and family studies major immerses students in the study of child and family development and education. Students learn about child development, early learning, and family studies from a variety of perspectives. They receive a strong grounding in reading and understanding the theory and evidence that provide the foundation for the field and drive current research and policy efforts.
- *Expected Outcomes*: Students apply their knowledge and skill as they work alongside community-based teachers, community leaders, and care providers. The degree provides preparation for a wide variety of careers in early learning, childcare, parent and family support and education, child and community advocacy and organization, and social and mental health services. It also serves as a pathway for graduate studies in education, child and family studies, educational policy, special education, and other areas.
- *Service Learning and Research*: Two sequences of field-based experiences provide students with real life-learning opportunities in community-based early childhood or family support/education settings. Students participate in both an introductory seminar experience as well as a sequenced field experience during their first year in service learning. In the Teaching and Learning option, students participate in a three-quarter senior service learning, research, and senior project that provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs, and/or research settings. The seminar ties together research and practice, demonstrating how research informs evidence-based decision-making in programs and services. Students also receive guidance in career options and current events in the field, tying in major experiences with their own developmental and career goals. Learning objectives are outlined in class.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Department Scholarships:* See [departmental website](#) for undergraduate scholarship information.
- *Student Organizations/Associations:* Associated Students of the College of Education (ASCE) and International Educators of the College of Education (IECE).

Early Care and Education (Online Degree Completion Program)

Department Admission Requirements

1. Satisfactory progress toward completion of general education requirements
2. Admission is capacity constrained, based on the following criteria. Completion of requirements does not guarantee admission.
 - a. Two-to-three page personal statement reflecting an interest in the early childhood and family studies major and a commitment to learning about the field
 - b. Overall academic performance reflected in copies of unofficial transcripts
 - c. Other evidence of interest in and commitment to the field (e.g., work experience, volunteer experience, or internships)
 - d. Grades in any completed recommended courses and courses applied to major requirements
 - e. Completion of at least 45 transferable credits
3. Application deadlines are posted on the website. Applications may be considered after the deadline on a case-by-case basis, depending on program capacity.
4. This is a limited admission program. Students admitted to the Early Care and Education online program are not allowed to transfer to another onsite or online major/degree program or complete a minor without reapplying to the UW through the normal admission review process.

Students accepted into the major typically have a minimum cumulative 2.00 GPA and a minimum grade of 2.0 for any prior college coursework that may be applied toward the major.

Information Sessions: Learn more about the major and how to apply. See schedule at <https://www.earlyeducationonline.uw.edu/admissions/info-sessions-events/>.

For further information, see <https://education.uw.edu/programs/undergraduate/ece>, or inquire at 206 Miller.

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Quantitative/Symbolic Reasoning (5 credits)
 - c. Writing Courses (10 credits)
 - d. Diversity Course (3 credits)
2. Areas of Knowledge
 - a. Visual, Literary & Performing Arts (VLPA) and Natural World (NW) (30 credits, with a minimum of 10 credits in each)

b. Individuals & Societies (I&S) (30 credits)

Maximum 15 credits in ECFS-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirements.

Major Requirements

85 credits

1. *Early Care and Education Courses (85 credits)*: ECE 201, ECE 220, ECE 322, ECE 323, ECE 401, ECE 402, ECE 419, ECE 450, ECE 456; ECFS 301, ECFS 311, ECFS 312 (5), ECFS 400, ECFS 410, ECFS 411; EDPSY 302, EDPSY 406; EDSPE 304; NSG 432
2. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
3. Minimum 64 credits applied to the major taken through the UW Seattle campus

Student Outcomes and Opportunities

- *Learning Objectives*: The early care and education major immerses students in the study of child and family development and education. Students learn about child development, early learning, and family studies from a variety of perspectives. They receive a strong grounding in reading and understanding the theory and evidence that provide the foundation for the field and drive current research and policy efforts. Upon successful completion of this degree, students will be able to:
 - Read and evaluation research.
 - Demonstrate knowledge and skills needed to apply, translate, and expand upon research findings to solve practical issues in early childhood applied settings.
 - Apply neurological, behavioral, and sociocultural knowledge of developmental and family systems theories to create practical strategies that support the development of young children and families in multicultural contexts.
 - Describe risk factors affecting child development and recognize indicators of typical and atypical child development.
 - Engage in family-sensitive practice that acknowledges the impact of biological, social, cultural, ethnic, socioeconomic, and linguistic factors on learning and development to meet the needs of students and families from diverse backgrounds.
 - Identify, evaluate, and create learning environments. While doing so, exhibit adult-child interactions that support children's social relationships, emotional and behavioral health, and self-regulation.
 - Engage in the process of impacting social policy and research by demonstrating an awareness of the assets and needs of communities.
 - Demonstrate ethical and socially responsible professional characteristics and practices anchored in a strong professional identity.
 - Discuss, apply, and teach the skills, routines, and daily habits of a resilient professional.
 - Demonstrate the appropriate selection and use of ongoing child observation and assessment to critically guide teaching and facilitate children's development and learning.
 - Assess the form and function of children's challenging behaviors, develop individual behavior support plans based on the information collected, and engage in ongoing formative assessment of children's progress.
 - Design and implement learning opportunities and justify how these are grounded in evidence-based practices that support young children's language and literacy, math, science, logic and reasoning, and learning and development.

- Design learning environments that include accommodations and adaptations for young children with varying needs and abilities.
- Enact and exhibit the use of evidence-based language and literacy practices.
- Design and implement joint adult-child interactions in mathematical situations and scientific investigations, creating tasks that can enhance children's thinking and justify how these are grounded in evidence-based practices that support young children's mathematical, scientific, logical, and reasoning development.
- *Service Learning and Research:* Two sequences of field-based experiences provide students with real life-learning opportunities in community-based early childhood or family support/education settings. Students participate in both an introductory seminar experience as well as a sequenced field experience during their first year in service learning. During the second phase, students participate in a three-quarter senior service learning, research, and senior project that provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs, and/or research settings. The seminar ties together research and practice, demonstrating how research informs evidence-based decision-making in programs and services. Students also receive guidance in career options and current events in the field, tying in major experiences with their own developmental and career goals. Learning objectives are outlined in class.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Department Scholarships:* See [departmental website](#) for undergraduate scholarship information.
- *Student Organizations/Associations:* Associated Students of the College of Education (ASCE) and International Educators of the College of Education (IECE).

Graduate Degree Programs

Graduate Program Coordinator
206 Miller, Box 353600
(206) 543-7834
edinfo@uw.edu

The College of Education currently offers five advanced degrees: Master in Teaching (MIT), Master of Education (MEd), Educational Specialist (EdS), Doctor of Education (EdD), and doctor of philosophy (PhD). The MIT degree is awarded to elementary and secondary certification students. The EdS degree is awarded to school psychology certification students. Graduate students working toward other degrees may specialize in curriculum and instruction, educational psychology, educational leadership and policy studies, or special education.. Questions should be directed to edinfo@uw.edu, or to the [College's website](#)

Master in Teaching

The Master in Teaching (MIT) degree results in a Washington residency teaching certificate for elementary or secondary (specific subjects) school teaching. The program is an integrated sequence of full-time, daytime coursework and field experiences spanning four quarters. Field experiences are in partner schools in the Seattle/Puget Sound area chosen to provide experience working with children from racially and culturally diverse communities.

Admission Requirements

1. Bachelor's degree from an accredited institution with a minimum 3.00 GPA for the last 90 quarter (60 semester) credits
2. Goal statement
3. 40 or more hours in a classroom that most closely matches the subject and grade level the applicant wishes to teach
4. Two letters of recommendation from faculty or professional references
5. Passing scores from all three subtests of the WEST-B examination. Passing scores on the ACT and/or the SAT may be submitted in lieu of the WEST-B.
6. Official transcripts from all community colleges and universities attended
7. Secondary applicants: complete required content courses in the endorsement subject they wish to teach.
8. Elementary applicants: complete prerequisite courses in child development and mathematics for elementary teachers.
9. Secondary and Elementary applicants: complete one prerequisite course in education of an ethnic group.

Degree Requirements

60-101 credits

1. **Elementary Education Focus**
 - a. Courses: EDC&I 324; EDC&I 494; EDC&I 586; EDLPS 496; EDSPE 526; EDTEP 501, EDTEP 502, EDTEP 503; EDTEP 505; EDTEP 511; EDTEP 521, EDTEP 522; EDTEP 523; EDTEP 531, EDTEP 532, EDTEP 533; EDTEP 541; EDTEP 542; EDTEP 543; EDTEP 551; EDTEP 552; EDTEP 601; UCONJ 510.
 - b. The current Washington state endorsement for elementary teachers is "elementary education." Graduates may be hired to teach specific or multiple subjects in middle or junior high school through grade 8. Those interested in teaching in the middle schools are encouraged to discuss this option with advisers in the Office of Student Services.
2. **Elementary Special Education Focus:** EDC&I 324; EDC&I 494; EDC&I 586; EDLPS 496; EDSPE 404; EDSPE 414; EDSPE 496; EDSPE 496; EDSPE 500; EDSPE 513; EDSPE 514; EDSPE 526; EDSPE 545; EDSPE 601; EDTEP 501, EDTEP 502, EDTEP 503; EDTEP 505; EDTEP 511; EDTEP 521, EDTEP 522; EDTEP 523; EDTEP 531, EDTEP 532, EDTEP 533; EDTEP 541; EDTEP 542; EDTEP 543; EDTEP 551; EDTEP 552; EDTEP 601; UCONJ 510.
3. **Secondary Education Focus:** EDC&I 494; EDC&I 586; EDTEP 551; EDTEP 561; EDTEP 562, EDTEP 563; EDTEP 564; EDTEP 565; EDTEP 571; EDTEP 573; either EDTEP 580, EDTEP 582, EDTEP 584, EDTEP 586, or EDTEP 588; either EDTEP 581, EDTEP 583, EDTEP 585, EDTEP 587, EDTEP 589; EDTEP 591; EDTEP 592; EDTEP 593; EDTEP 595; EDTEP 601; elective outside education

Master of Education

Minimum 45 credits, including minimum 15 credits in a specialized area in education; 9 credits related to, but outside the area of specialization, some coursework outside education; 9 thesis credits or, for the non-thesis option, 9 credits in a field study or other approved project; final examination.

Admission Requirements

1. Baccalaureate degree from an accredited institution
2. Minimum 3.00 GPA for the last 90 graded quarter credits (or 60 semester credits)
3. Transcripts from each college or university attended
4. GRE scores
5. Personal goal statement
6. At least two letters of recommendation
7. Prerequisites stipulated by the area of specialization within the College

Degree Requirements, Curriculum and Instruction Programs

Credits vary, depending on option

1. **Common Area Requirements (18 credits)**
 - a. *Foundations of education (9 credits)*: Courses such as history of education, education as a moral endeavor, human learning, curriculum design, special topics in curriculum and instruction.
 - b. *Thesis, non-thesis, or project option (9 credits)*: May be satisfied by a 9-credit culminating project or 9 credits at the 500 level or above related to the student's teaching and research interests.
 - c. *Colloquium presentation*: Visual representation of the student's work (usually a poster). Students attend one other colloquium prior to presenting.
2. **Language, Literacy, and Culture Study Option (27 credits)**
 - a. *Core studies (9 credits)*: Selected from the following: EDC&I 453, EDC&I 455, EDC&I 460, EDC&I 462
 - b. *Assessment and inquiry (3 credits)*
 - c. *Concentrations (15 credits)*: Minimum three courses in the literacy strand and minimum one course in each of the other strands. ESL specialists select minimum three courses in ESL and minimum one course in each of the other strands.
3. **Mathematics Education Study Option (27 credits)**
 - a. Minimum 27 credits in mathematics and mathematics education. Courses must be appropriate for future career goals. Of the 27 credits, 9 are chosen from mathematics education courses (below).
 - b. *Mathematics education courses*: EDC&I 478, EDC&I 479; EDC&I 575, EDC&I 576, EDC&I 577
4. **Multicultural Education Study Option (30 credits)**
 - a. *Ethnic diversity outside the College of Education (15 credits)*: Courses may be taken from various departments in the College of Arts and Sciences.
 - b. *Multicultural education (15 credits)*: EDC&I 424, EDC&I 569; remainder to be chosen from the following: EDC&I 464; EDC&I 469; EDC&I 474; EDPSY 536; EDLPS 566; EDC&I 573; EDC&I 574
5. **Science Education Study Option (Minimum 21 credits)**: Includes courses in fields such as biology, chemistry, physics, earth science, oceanography, or other science-related fields.

6. **Social Studies Education Study Option (27-36 credits):** 12-15 credits of core social studies courses. 15-21 credits of history/social science courses related to teaching interests, or additional educational courses.
7. **Teaching and Curriculum Study Option (27 credits):** Includes 9-18 credits of required study in teaching and curriculum.

Degree Requirements, Educational Psychology Programs

Minimum 45 or 50 credits, to include:

1. **Measurement, Statistics, and Research Design Study Option (Minimum 50 credits)**
 - a. *Required courses:* One or more from each of the following content fields with options to consist of courses listed below or alternative courses (including courses outside education) approved by the faculty adviser.
 - i. *Measurement and evaluation:* EDPSY 495, EDPSY 512, EDPSY 584, EDPSY 592, EDPSY 595, EDPSY 596, EDPSY 597
 - ii. *Human development:* EDPSY 502, EDPSY 531, EDPSY 532, EDPSY 582
 - iii. *Cognition and learning:* EDPSY 510, EDPSY 524, EDPSY 525, EDPSY 583, PSYCH 414
 - iv. *Language processes:* EDPSY 520, EDPSY 521
 - b. *Research (9 credits):*
 - i. *Thesis option:* Report of a research investigation that requires the student to design and execute an empirical study.
 - ii. *Non-thesis option:* Preparation of a scholarly review of the research literature; should be of publishable quality.
2. **Learning Sciences and Human Development Option (Minimum 45 credits)**
 - a. *Required courses (17 credits):* One or more from each of the following areas
 - i. *Foundations (11 credits):* EDPSY 501; EDPSY 581; EDPSY 502 or EDPSY 503; EDLPS 540, EDLPS 530, or EDLPS 521
 - ii. *Research Methods (6 credits):* EDPSY 490; EDPSY 591; other recommended courses include EDPSY 491, EDPSY 495, EDLPS 588, and EDC&I 581.
 - b. *Strands or Specializations (17 credits):* minimum one course in at least two different strands. Courses for each strand shown on College website.
 - i. *Learning Within and Across Disciplines - Literacy*
 - ii. *Learning Within and Across Disciplines - STEM*
 - iii. *Human Development, Families, and Communities*
 - iv. *Contexts, Culture, and Equity*
 - c. *Research (9 credits)*
 - i. **Thesis option:** Report of a research investigation that requires student to design and execute an empirical study.
 - ii. **Non-thesis option:** Preparation of a scholarly paper of publishable quality.

Degree Requirements, Education Leadership and Policy Studies Programs

48 credits, as follows:

1. **Common Area and Distribution Requirements (Minimum 18 credits)**
 - a. Social and cultural foundations (6 credits minimum)
 - b. Organizations and policy (6 credits)
 - c. Additional EDLPS courses (6 credits)
2. **Specialization Requirement (Minimum 9 credits)**
3. **Breadth Requirement (Minimum 6 credits)**
 - a. Minimum 3 credits in one or more other areas in the College of Education (EDC&I, EDPSY and/or EDSPE)
 - b. Minimum 3 credits outside the College of Education
4. **Research/Inquiry Requirement (Minimum 6 credits)**
 - a. Minimum 3 credits in basic statistics (EDPSY 490 or the equivalent)
 - b. Minimum 3 credits in research/inquiry methods (e.g., EDPSY 588, EDPSY 591, EDLPS 524, EDLPS 535, EDLPS 543, EDLPS 568, or the equivalent)
5. **Completion of Thesis or Non-Thesis Option (Minimum 9 credits)**
6. **Specific courses determined in consultation with adviser**

Degree Requirements, Special Education

48 credits, as follows:

1. **Foundations of Education (6 credits):** Minimum 6 credits of courses in or out of the College of Education, or equivalent
2. **Special Education Major Field (21 credits):** Specific sequence of courses, depending on student's background, educational goals, and type of disabled individual the student wishes to teach
3. **Assessment and Research Methodology (9 credits):** Courses to develop competency in assessment of learners with disabilities and familiarity with research tools
4. **Special Assignments in Special Education (Minimum 12 credits):** From at least two of the following options: EDSPE 500 (1-6, max. 6), EDSPE 600, EDSPE 601 (3-9, max. 9), EDSPE 700 (max. 9). Students entering an EdD or PhD program should select a thesis option.

Education Specialist

Minimum 118 credits

The Educational Specialist (EdS) degree is more advanced than a master's degree but does not constitute doctoral-level study. Generally taken by those who intend to pursue advanced practice in a specialized field such as school administration or curriculum design. In the UW College of Education, only students studying school psychology can pursue the Educational Specialist degree. The school psychology program prepares students to work with the social emotional needs of children and adolescents. School psychologists frequently work in school settings providing assessment, intervention, and consultation services to students, teachers, or parents. The three-year full-time program is comprised

of two years of coursework and practicum and a third year 1200-hour internship. The program, approved by National Association of School Psychologists (NASP), also meets the requirements for initial certification (Educational Staff Associate) as a school psychologist in the state of Washington.

Admission Requirements

1. Personal goal statement
2. Three recent letters of recommendation from professors or first-line supervisors
3. Bachelor's degree from an accredited institution
4. Transcripts from each college or university attended
5. Graduate Record Examination (GRE) scores
6. Minimum 3.50 GPA for the most recent 90 graded quarter credits (or 60 semester credits)
7. Employment or volunteer experience in pre-K through 12 schools
8. Interview

Degree Requirements

1. Statistics and Research (6 credits): EDPSY 490, EDPSY 591
2. Cognition and Learning (3 credits minimum): EDPSY 501; EDPSY 502
3. Social and Developmental Bases of Behavior (6 credits minimum): EDPSY 531, EDPSY 581
4. Exceptionality (6 credits minimum): EDSPE 525; one additional EDSPE course in exceptionality, e.g. EDSPE 504 or EDSPE 526
5. Biologic Bases of Behavior (5 credits): EDPSY 577
6. Specialization Seminars (2 credits minimum): EDPSY 570
7. Individual Differences (8 credits minimum): EDPSY 548, EDPSY 552, EDPSY 553
8. Ethics and School Law (3 credits): EDPSY 568
9. Assessment (23 credits minimum): EDPSY 507, EDPSY 564, EDPSY 540, EDPSY 572, EDPSY 573
10. Intervention (13 credits minimum): EDPSY 544, EDPSY 546, PSYCH 543
11. Courses with Practicum Requirements (2 credits minimum): EDPSY 500
12. Consultation (5 credits minimum): EDPSY 551
13. Internship (30 credits minimum): EDPSY 601
14. Case Study Seminar (6 credits minimum): EDUC 750

The EdS degree is awarded upon successful completion of the above course requirements, a 1200-hour internship, and a portfolio examination of applied and clinical work.

Certification: The Washington State approved internship program at the University of Washington is open only to third-year students in the EdS program. Washington State Certification is awarded by passing the Praxis Examination and by completing a 9-month internship of 1200 hours or more (half of which must be in a school setting); 6 credit hours of university case study supervision; 30 hours of internship credit. Students who successfully complete the internship may apply for National Certification as a school psychologist.

Doctor of Education

Prepares professionals whose primary interest is dealing directly with problems of educational practice. The EdD, as a professional degree, focuses on utilization of research and practitioners' knowledge, rather than on production of research knowledge.

This degree requires specialized study with credit in education and related fields, sufficient preparation in research methodology to interpret research findings for use in practice, an internship and leadership training, a general examination, a dissertation on a problem of educational practice, and a final examination. In addition to the traditional professional degree, the College also offers another option for the Doctor of Education that requires a capstone experience (12 credits) rather than a dissertation. See details in NOTE, below.

Admission Requirements

1. Graduate Record Exam (GRE) scores
2. Master's degree or equivalent from an accredited institution
3. Minimum 3.00 GPA for the most recent 90 (60 semester) credits
4. Transcripts (sealed) from each college or university attended
5. Goal statement
6. Three letters of recommendation
7. Resume/curriculum vita
8. Writing sample(s)
9. Interviews
10. Specific programs may have additional admission requirements. Visit the website or contact the program for further information.

Degree Requirements

102 credits, as follows:

1. **Educational Specialization (24 credits):**
 - a. Area of specialization, designed to provide knowledge of the field (9 credits)
 - b. General area or special interests within the area of specialization other than those selected to fulfill the 9 credits above (15 credits)
2. **Related Field(s) (24 credits):** Minimum 12 credits from within education. Credits outside education to complement educational specialization and to include multidisciplinary learning experiences
3. **Research/Evaluation Preparation (9 credits):** To enhance a student's ability to conduct field-based research/evaluation studies
4. **Leadership Training (9 credits):** EDLPS 520, EDLPS 550, EDLPS 560
5. **Supervised Internships and Field Experiences (9 credits):** Internships and field experiences designed to work in education and related field(s), and to conduct field-based research and evaluation studies.
6. **Dissertation (27 credits)**

NOTE: The Doctor of Education degree, offered through the leadership for learning program, focuses primarily on practical application rather than pure research and is a practice doctorate. A dissertation is not required; 12 credit hours of capstone experience are required instead. A corresponding increase in other areas (educational specialization, research preparation, etc.) is required in order to meet the 102-credit-hour requirement for the Doctor of Education.

Doctor of Philosophy

A degree offering preparation for a research career on issues fundamental to education - issues that range from fairly narrow questions about human learning to macro-questions regarding the form of societies' educational institutions. The scope is broad. The degree may be organized around traditional study areas such as educational psychology, curriculum and instruction, special education, or educational leadership and policy. A student may develop a course of study that integrates various elements of more than one study area (e.g., multiethnic education and literacy). One study option is school psychology, which prepares students for the professional practice of psychology with school-age children, as well as for research.

Admission Requirements

1. Graduate Record Exam (GRE) scores
2. Master's degree or equivalent from an accredited institution
3. Minimum GPA of 3.00 for the most recent 90 (60 semester) credits
4. Transcripts (sealed) from each college or university attended
5. Goal statement
6. Three letters of recommendation
7. Resume/curriculum vita
8. Writing sample(s)
9. Interviews

Degree Requirements

Minimum 90 credits

Six academic areas and the dissertation. Although the department prescribes a limited number of required courses, it does require students to demonstrate in-depth knowledge of education and selected related fields. For most students, this means study in a broad area, a specialization within that area, two cognates, and a specialization outside the department.

Degree requirements include a program of specialized study with credits both in education and in other academic units, preparation in research methodology adequate to design and assess research in the field of specialization, sufficient study in cognate fields inside and outside education to ensure that the candidate can place the specialized research in a broader context, a general examination, a research dissertation, and a final examination.

Accreditation

Within the College of Education, a number of degree programs have formal accreditation. The school psychology EdS program is accredited by the American Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). The school psychology EdS program is also

accredited by NASP and the Washington State Board of Education for initial residency and continuing/professional teaching certificates and initial/residency certification. Graduates qualify for certification in all states party to the Interstate Certification Compact.

Financial Aid

The College of Education offers a limited number of awards with varying stipends for graduate students in education. Primary consideration is given to doctoral students with a background of successful teaching or administrative experience. Specific information on various types of remunerative appointments for graduate students, amounts of stipends, and application procedures is available at education.uw.edu/admissions/funding-and-financial-aid.

Professional Programs

Professional Certification

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Program-design specialists are available to help with pre-program counseling, long-range planning, applications, registration, referrals to other campus resources, general program advising, and continuing/professional certificate requirements.

Administrator Certificates

Administrator certificate preparation programs for superintendents, principals, and program administrators are offered. The following websites contain specific information about admissions, curriculum, faculty, and general advising:

For principals and program administrators, the Danforth Educational Leadership program, education.uw.edu/programs/leadership/danforth.

For superintendents, the Leadership for Learning program, education.uw.edu/141/.

Educational Staff Associate Certificates

Offered for the school psychologist. Information concerning requirements and admission may be obtained from the Office of Student Services, 206 Miller Hall, edinfo@uw.edu.

The College of Education, authorized by the State Board of Education to prepare and recommend individuals for Residency Teaching Certificates, publishes an annual Higher Education Opportunity Act report based on Title II data and available on the College's website: education.uw.edu/my-coe/oir/heoa. The full Title II report may be requested from coeir@uw.edu.

Residency Teaching Certification Program

For individuals desiring careers as elementary or middle/secondary school teachers, or as special education teachers working with students with moderate and severe disabilities or emotional and behavioral disorders, and with infants, toddlers, and preschool children with disabilities. All programs are

offered at the master's level. For additional information, e-mail edinfo@uw.edu, or at education.uw.edu/programs/teacher.

An undergraduate or postbaccalaureate program leading to certification in music education, grades K-12, is offered through the School of Music. For additional information contact the School of Music Advising Office, 116 Music, Box 353450, University of Washington, Seattle, WA 98195-3450.

Professional Teaching Certificates

For information on the Professional Certificate Assessment (ProTeach), visit the Office of the Superintendent of Public Instruction (OSPI): www.k12.wa.us/certification/Teacher/Residency3.aspx#Professional.

Endorsements on Teaching Certificates

Teachers holding an initial/residency or continuing/professional teaching certificate may add endorsements to their certificates which qualify them to teach additional subjects. Information is available at education.uw.edu/programs/teacher/endorsements, or the Office of Student Services, 206 Miller Hall, or e-mail at edinfo@uw.edu.

Special Research and Service Facilities

Opportunities exist for students to gain research and service experience through research centers affiliated with the College. Below is a partial list of those centers; visit education.uw.edu/faculty-and-research/centers for a current and complete list.

The Center for Multicultural Education focuses on research projects and activities designed to improve practices related to equity issues, intergroup relations, and the achievement of students of color. Visit education.uw.edu/cme/.

The Clinical Training Laboratory, operating under the aegis of Educational Psychology, offers observation rooms equipped with video recorders where counseling and psychology trainees and clients can be observed and taped through one-way mirrors.

The **Experimental Education Unit (EEU)** offers an interdisciplinary approach to research, training, and service, providing integrated classes for 150-200 young children, toddlers, and infants with disabilities and their typically developing peers, and services for their families. Learn more by visiting education.uw.edu/faculty-and-research/centers/haring.

The National Center for the Study of Teaching and Policy, a consortium of five universities headed by the University of Washington, conducts studies aimed at local, state, and national policy strategies to promote teacher excellence. Visit depts.washington.edu/ctpmail, or e-mail ctpmail@uw.edu.

The Learning Informal and Formal Environments (LIFE) Center is a collaborative effort among three primary partners — the University of Washington, Stanford University, and Stanford Research Institute — as well as other institutions. Purpose of the LIFE Center is to understand and advance human learning through simultaneous focus on implicit, informal, and formal learning, thus cultivating interdisciplinary theories that guide design of effective new technologies and learning environments. Visit education.uw.edu/research/center/life.

College of Engineering

College Overview

Dean

Michael B. Bragg
371 Loew

Associate Deans

Eve Riskin, Academic Affairs
Dawn Lehman, Infrastructure
Santosh Devasia, Research and Graduate Studies

Engineering is the science and art of applying scientific and mathematical principles, experience, judgment, and common sense to design devices and systems that benefit society. Engineers are fascinated by questions of how and why things work. They use their training in mathematics, physics, and chemistry to understand the physical world and develop creative solutions to society's complex needs. Engineers may be designers, planners, managers, analysts, researchers, consultants, sales specialists, and more. Engineering graduates have many career possibilities open to them.

The primary goal of College of Engineering educational programs is to prepare students for a professional career in engineering by providing the technical foundation required for success in industry, government, or academia. Other goals of the College are to instill within its students the highest ethical standards, the capability for lifelong learning, and a curiosity about the world. Excellence in undergraduate and graduate academic programs remains the College's highest priority.

For undergraduates, the College of Engineering offers a flexible curriculum that not only accommodates varied student needs, both in established departmental programs and interdisciplinary studies, but also culminates in a major and meaningful design experience. (See [Interdisciplinary Engineering Studies Program](#) for interdisciplinary undergraduate programs.)

For graduate students, the College of Engineering offers master's and doctoral programs in aeronautics and astronautics, bioengineering, chemical, civil and environmental, computer, electrical, human centered design and engineering, industrial and systems engineering, materials science, and mechanical engineering.

The College offers active educational and research programs, both departmental and interdisciplinary, at the graduate levels. (See [Interengineering Graduate Program](#) for interdisciplinary graduate programs.)

The College of Engineering has been a major unit of the University since 1899. The first engineering degrees were authorized in mining engineering and metallurgical engineering in 1898. Degrees were added for civil engineering (1901), electrical engineering (1902), mechanical engineering (1906), chemical engineering (1907), ceramic engineering (1919), aeronautical engineering (1929), bioengineering (1983), industrial engineering (1986), and computer engineering (1987). A degree program in technical communication was implemented in 1989. The new human centered design and engineering degree title replaced technical communication in 2009. In 2011, 2,229 upper-division undergraduate majors and 1,787 graduate students were enrolled in engineering programs taught by a faculty of 228 tenure track and 184 other engineering faculty members.

College Facilities

Teaching and research activities of the College are conducted in fourteen major campus buildings (and portions of others), which contain the College's offices, classrooms, and research and teaching laboratories. The Engineering Library, a branch of the University Libraries, provides outstanding collections of books, periodicals, technical reports, and patents of interest to engineers. Computers and terminals are available in all departments and through the Student Access and Computing Group (SACG).

Student Organizations and Activities

All major professional engineering societies have student chapters on campus, and all engineering students are encouraged to join the chapter that represents their field of interest. The UW Chapter of Engineers Without Borders (EWB) students.washington.edu/ewbuw is a registered student-run organization of the University of Washington with members from many engineering as well as non-engineering backgrounds.

The College also has student chapters of the Society of Women Engineers, American Indian Science and Engineering Society, National Society of Black Engineers, the Society of Hispanic Professional Engineers, and the Phi Sigma Rho engineering sorority. Students are encouraged to join the University-wide Science and Engineering Business Association (SEBA).

The honor society open to engineering students is Tau Beta Pi.

Students serve with faculty members on engineering policy committees which make recommendations concerning instructor evaluation, curriculum revisions, advising, grading systems, and other matters of interest to students and faculty.

Special Programs and Resources

Engineering Co-op and Internship Program

014 Loew, Box 352180

enrcoop@uw.edu

The Engineering Co-op and Internship Program provides an opportunity for pre-engineering and engineering students to combine practical, full-time, on-the-job engineering experience with academic study before graduation. Students typically work full-time for three months or more and then return to full-time academic status upon completion of the co-op assignment. Some students work part-time while continuing coursework. In addition, students receive academic credit for the co-op experience. In several engineering departments, the credit earned can be applied toward degree requirements in the major. Advantages of participation include: assistance in deciding which field of engineering to follow, early experience in the industrial sector and industrial exposure that can help guide a student's remaining studies; additional income to help defray college expenses, relevance and motivation for study based on real engineering work, and work experience and employment contacts that may result in regular employment after graduation.

Information may be obtained from the Engineering Co-op and Internship Program office, College of Engineering, Box 352180 (014 Loew), or by visiting the [Engineering Co-op and Internship program](#) website.

Engineering Undergraduate Research Program

014 Loew, Box 352180

Educational Outreach

Fulfilling a commitment to lifelong learning, the College of Engineering is partnered with UW Professional and Continuing Education (UWPCE) to offer master's degree programs, certificate programs, courses, workshops, and conferences to respond to the professional development needs of practicing engineers and related technical professionals worldwide. Thousands of practicing engineers update their technical knowledge or pursue advanced degrees each year through UWPCE. The College of Engineering works with UW Educational Outreach's Education at a Distance for Growth and Excellence (EDGE) to provide multimedia and class capture services either in an EDGE classroom or at a remote location. Go to [UWPCE website](#) or go to [EDGE website](#) for more information.

Office of Research and Graduate Studies

376 Loew, Box 352180

The Office of Research and Graduate Studies promotes, stimulates, and coordinates faculty and graduate research in all fields of engineering. Its primary role is to encourage and develop interdisciplinary research programs and national research initiatives. The Office of Research and Graduate Studies also reviews grant and contract proposals, tracks awards, and provides information on funding opportunities. This office allocates limited matching funds to College units to increase the quality of research in the College of Engineering. The College currently has the following research programs or centers:

- **Bio-Sciences**
 - **Center for Sensorimotor Neural Engineering (CSNE)** - An NSF-funded Engineering Research Center launched in July 2011 to advance the integration of technologies with human neural systems. The center brings together leaders in robotics, neuroscience, computer science, and other disciplines.
 - **Genetically Engineered Materials Science and Engineering Center (GEMSEC)** - Adapts techniques in molecular biology and genomics for developing new materials and systems.
 - **Molecular Engineering & Sciences Institute (MoIES)** - Catalyzes translational research in the clean tech and biotech areas. The institute serves both as an intellectual accelerator to bring fresh approaches and ideas to societal grand challenges in sustainable energy and materials, and in medical therapeutics and diagnostics, and as a physical incubator where new interdisciplinary teams can come together in a shared space. Creates and coordinates new interdisciplinary education programs for undergraduate and graduate students in the College of Arts and Sciences and the College of Engineering. The institute is located in the new Molecular Engineering and Sciences Building, a facility specially designed to promote collaborative molecular-scale research.
 - **National ESCA Surface Analysis Center for Biomedical Problems (NESAC/BIO)** - Develops and applies new surface analysis technologies for biomedical research.

- **Education and Learning**
 - **Center for Engineering Learning and Teaching (CELT)** - Combines two missions: to conduct internationally recognized research in engineering learning and to promote teaching effectiveness in UW engineering classrooms.
- **Electronics and Computing**
 - **Center for Collaborative Technologies (CCT)** - An effort funded by Microsoft Research to develop the ConferenceXP platform and apply the technologies to a wide range of educational and collaborative scenarios.
 - **Center for Design of Analog-Digital Integrated Circuits (CDADIC)** - One of the few research consortiums in the country that addresses problems associated with analog and mixed-signal research.
 - **Intel Research Seattle** - A collaboration among Intel and university researchers to explore new technologies (such as personal robotics and "Trustworthy Wireless") to support the ubiquitous computing environments of the future.
 - **Turing Center** - Investigates problems at the crossroads of natural language processing, data mining, web search, and the Semantic Web.
- **Energy**
 - **Bioenergy Program** - Researches how to balance the technological, environmental, and social dimensions of a sustainable energy economy. (The full program name is Bioresource-Based Energy for Sustainable Societies.)
 - **Northwest National Marine Renewable Energy Center (NNMREC)** - A DOE-funded partnership between OSU and UW. UW is responsible for tidal energy issues. The role of the center is to close key gaps in understanding of marine energy and to inform the public, regulators, research institutions, and device and site developers.
 - **Plasma Science and Innovation Center (PSI)** - Develops predictive capability for emerging concept experiments, allowing new experiments in fusion science and in other areas of plasma science without actual construction.
- **Materials and Structures**
 - **Center for Intelligent Materials and Systems (CIMS)** - A collaboration of botanists and engineers to advance the bio-inspired design of intelligent materials and systems.
 - **Center of Excellence for Advanced Materials in Transport Aircraft Structures (AMTAS)** - Seeks solutions to problems associated with existing, near- and long-term applications of composites and advanced materials for large transport commercial aircraft.
 - **Institute of Advanced Materials and Technology (i-AMT)** - Facilitates interdisciplinary research in photonics, electronics, and magnetic materials; materials for energy generation and storage; biomaterials for the bio-nano interface; and multifunctional composites.
- **Transportation**
 - **Pacific Northwest Transportation Consortium (PacTrans)** - A multi-university, regional transportation center led by the University of Washington and funded by the US Department of Transportation. PacTrans focuses on safe and sustainable transportation in environments ranging from busy urban centers to remote mountainous terrain.
 - **Washington State Transportation Center (TRAC)** - A collaboration among Washington State University, the University of Washington, and the Washington State Department of Transportation to coordinate both state and commercial transportation research efforts and to develop research opportunities nationally and locally.

- **Other Centers Involving Engineering Faculty**
 - **Center for Materials and Devices for Information Technology Research (CMDITR)** - Established by the National Science Foundation in 1987 to fund interdisciplinary research and education activities and encourage technology transfer.
 - **Center for Process Analytical Chemistry (CPAC)** - A consortium established at the UW in 1984 to develop and foster collaboration on new measurement approaches, including the miniaturization of traditional instrumentation and the development of new sensors and non-traditional instruments.
 - **Microfabrication Laboratory (MFF)** - Provides a wide range of fabrication and characterization capabilities in a user facility that is open to academic as well as industrial researchers and engineers, including advanced electron beam lithography, thin film processing, and wet and dry etching in a 15,000 square foot cleanroom.

For more information, see the Office of Research and Graduate Studies web page, www.engr.washington.edu/facresearch/researchcenters.html.

Interdisciplinary Engineering Studies Program

The College of Engineering directly administers non-departmental undergraduate and graduate degree programs.

The Interdisciplinary Engineering Studies (IES) Program is intended for students whose desired course of study does not fall within one of the traditional engineering departments. An interdisciplinary program combines coursework from at least one engineering department as well as other department(s) on campus (engineering or other) to allow students to create a program of study not available through the existing undergraduate degree programs. Although coursework may involve departments outside the College of Engineering, the major thrust must be in engineering.

Undergraduate Programs

Bachelor of Science in Engineering and Bachelor of Science

The IES Program offers a nonprofessional degree program leading to the Bachelor of Science (BS) and a professional degree program for the Bachelor of Science in Engineering (BSE).

Due to the uniqueness of each interdisciplinary student's program of studies, the BS and BSE degrees are not accredited by the Engineering Accreditation Commission of ABET. The experience requirement to obtain a professional engineering license is two years longer for a BSE graduate, except in surveying, than for a graduate of an accredited program. A BS graduate is not eligible for a professional engineering license.

Interdisciplinary students develop personal programs of study approved by a faculty adviser with similar interests. Contact Student Academic Services, email: engradv@uw.edu or phone: (206) 543-1770, for information on established procedures and applications for entry into the BSE and BS programs. Entrance requirements and the continuation policy for participation in these programs are consistent with those of other departments in the College.

Bachelor of Science in Engineering

Admission to this program (usually after completion of 90 credits) is competitive with a minimum 2.80 GPA in technical courses required for entry. A minimum of 75 credits must be completed after entering

the program before a BSE degree is awarded. Detailed information regarding the BSE degree can be obtained from an adviser in Student Academic Services (301 Loew).

Bachelor of Science

The nonprofessional Bachelor of Science degree provides greater flexibility than does the Bachelor of Science in Engineering degree. It can be an excellent base for subsequent professional studies in law, medicine, or business. It may also be the primary educational objective in such fields as technical writing, engineering sales, or environmental studies. Detailed requirements are available from the adviser in Student Academic Services (301 Loew).

Undergraduate Program

Engineering Adviser
301 Loew, Box 352180
(206) 543-1770
engradv@uw.edu

The College of Engineering provides curricula that offer a variety of educational experiences to its students. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

Student Academic Services

301 Loew

Students are encouraged to contact Student Academic Services for program, course, or career information and discussion. The Student Academic Services advising office assists any student interested in planning the initial portion of an engineering degree program, and distributes information about prerequisites for application to all departments in the College.

For more information, visit the [Student Academic Services](#) website.

Financial Aid

The College offers financial assistance to undergraduates through industrial scholarships and loan funds. Scholarship information is available at the College of Engineering Student Academic Services office (301 Loew), and at the Office of Student Financial Aid (105 Schmitz). Most scholarships are given after a year or more in residence by the student.

Honors Program

The University Honors Program provides a special learning context for high-achieving students looking for a rigorous and enhanced educational experience. All departments in the College of Engineering participate in the UW Honors Program.

There are two types of Honors degrees available within the College of Engineering: College Honors and Departmental Honors. Students in either program are part of the University Honors Program.

College Honors

To be eligible for College Honors, students must be accepted to the University Honors Program in their freshman year. Additionally, students must be accepted into the departmental honors program (see information below on Departmental Honors) for their major, which usually occurs during the junior year. Students who complete both the Honors Core Curriculum (see the University Honors Program for more information) and the departmental honors requirements graduate "With College Honors in Name of Major".

Departmental Honors

Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete departmental honors requirements receive a degree "With Honors in Name of Major".

Admission Requirements: All engineering departments require students to have at least a 3.30 cumulative UW GPA to be eligible for departmental honors. Also, most departments require students to complete a specified number of departmental courses with a minimum departmental GPA.

Departmental honors requirements vary by major and are established by the individual departments. Most departments in the College of Engineering require 9 to 10 credits of Honors courses in the major and an Honors senior project or thesis.

International Study

Given the increased likelihood that engineering students will have overseas work experiences or do business with international clients and competitors, the College encourages students to study foreign languages in addition to their engineering coursework and to take advantage of opportunities for study at foreign universities either at the undergraduate or graduate level. The College has exchange agreements with approximately thirty universities in seventeen countries. Foreign-language courses at the third-quarter level or above (e.g., GERMAN 103) may be applied toward the VLPA general education requirement. For more information about international study, visit the College of Engineering International Studies website at www.engr.washington.edu/curr_students/international.html. Engineering students can also participate in the Global Engineering Education Exchange program (through the Center for Workforce Development, located in 101 Wilson Annex) for opportunities to study abroad. Through the UW Chapter of Engineers Without Borders (EWB) students.washington.edu/ewbuw, students work with disadvantaged communities worldwide in order to improve their quality of life through the implementation of environmentally sustainable, equitable, and economical engineering projects.

Admission

Students follow one of three pathways to gain admission:

1. **Direct-to-College:** Freshman applicants indicate an engineering major as their first-choice on the University application. Students admitted through this pathway enter the UW with Engineering Undeclared status and usually place into an engineering major after completing freshman-level requirements. A majority of engineering students enter majors through this pathway. Students who select Computer Engineering as their first choice major on their UW application will instead be considered for Direct Placement into the Paul G. Allen School of Computer Science and Engineering Program. Computer Engineering is not part of Direct-to-College.
2. **Transfer Students:** Apply to the UW by the published deadline. Submit an application to an engineering major. Quarters of admission vary by department. Admission is capacity constrained. See department websites for course requirements.

3. **Other Enrolled UW Students:** Those not admitted through the Direct-to-College pathway may also apply for admission to engineering majors. Admission through this pathway is limited and its capacity is constrained. See department websites for course requirements.

Direct-to College Admission

Freshmen admitted to the UW who indicate an engineering major as their preferred choice enter the UW with Engineering Undeclared status and must complete requirements prior to requesting placement into a specific engineering major. This is the standard admission pathway for engineering students entering the UW as freshmen. The deadline to submit a request for placement in an engineering major occurs annually on July 1. Students who select Computer Engineering as their first choice major on their UW application will instead be considered for Direct Placement into the Paul G. Allen School of Computer Science and Engineering Program. Computer Engineering is not part of Direct-to-College.

Students submit a ranked list of majors along with supporting materials. Since some majors are not able to take all students who request admission, students must identify alternative majors to ensure placement.

Capacity-constrained departments review students' academic records and supporting materials to determine priority for admission. Department priority and student department ranking are both used to determine final placement.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students to support completion of placement requirements and degree course planning or advising on alternate major options outside of engineering.

Engineering Undeclared Placement Requirements

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering. Students requesting placement to Chemical Engineering must take CHEM 152 (or CHEM 153 or CHEM 155) from this list and they are also strongly encouraged to take CHEM 162 (or CHEM 165). Students requesting placement to Industrial Engineering must take AMATH 301, CSE 142, or CSE 160 from this list.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Continuation Policy for Engineering Undeclared Students

While the University has general regulations governing scholastic eligibility for continuation, the College of Engineering and the engineering departments have additional requirements in order to make the best use of limited facilities and resources. Criteria and procedures applied to Engineering Undeclared students for continuation in the College include:

1. Complete at least one required mathematics, science, computer programming, or engineering course each quarter.
2. Maintain minimum 2.50 GPA in mathematics, science, English composition, computer programming, and engineering courses completed after matriculation at the UW.
3. Request placement into a major after completion of three quarters at the UW. Students in good standing who do not complete the placement requirements by July 1 after three quarters at the UW may request placement into a major on a conditional basis pending the completion of all placement requirements. Students who do not request placement after three quarters at the UW will be dropped from Engineering Undeclared status and transitioned to pre-major status. Students with conditional placement to a major who have not met all of the placement requirements after 6 quarters at UW (not including summer) will be dropped from Engineering Undeclared status and transitioned to pre-major status.

Review and Notification of Progress

Student progress is reviewed each quarter. Students whose performance fails to meet the standards outlined above receive a warning message recommending they meet with an engineering adviser. Students on warning status who fail to meet satisfactory progress requirements after one quarter are placed on probation; a hold is placed on their registration, and they must meet with a College of Engineering adviser. Students on probation who fail to meet satisfactory progress requirements after one quarter are dropped from Engineering Undeclared status. Such students may appeal for continuation as Engineering Undeclared students by writing the Associate Dean for Academic Affairs, the letter to describe any extenuating circumstances and to include any additional relevant information.

Types of Programs

The College offers three basic programs leading to Bachelor of Science degrees:

Departmental Major: This program leads to a Bachelor of Science degree in a designated field of engineering (e.g., Bachelor of Science in Civil Engineering). It is designed for students who intend to practice as professional engineers in a standard branch of engineering or who plan to undertake graduate study in that field. Application to a department or program at the upper-division level is made at the time lower-division requirements are satisfied. Currently enrollment limits imposed by faculty size and available laboratory/classroom space are such that entry into a specific department or program is usually competitive. In general, a student applicant must demonstrate scholastic aptitude, as evidenced by the attainment of grades averaging a minimum 2.50 or above (depending upon the program) in mathematics, the natural sciences, English composition, and other courses. A 2.50 GPA is a minimum only. In reality, the GPA of those offered admission is higher. The student is urged to plan ahead by learning the intended department or program requirements and particularly noting which requirements must be fulfilled by the time application is made.

Non-departmental Professional Program: This program leads to a Bachelor of Science in Engineering degree and is designed for students who have well defined, special educational objectives that departmental programs do not satisfy. Graduates can practice as professional engineers in newly

developing fields, or they may embark on graduate study in these or allied fields (see [Interdisciplinary Engineering Studies Program](#)).

Nonprofessional Program: Leading to a Bachelor of Science degree, this program is intended for students who wish to have significant exposure to science and engineering courses, but do not plan to engage in professional engineering practice (see [Interdisciplinary Engineering Studies Program](#)).

Graduation Requirements

To graduate, students must meet or exceed the requirements of the University and their particular program or department. All program or departmental requirements are given in the specific section that describes that program or department.

All departments of the College have continuation policies that specify a minimum rate of progress as well as minimum academic-performance levels. These policies may be more restrictive than those generally applied by the University and may change with time. Information on current policy is available at the departmental offices.

Selecting courses that fulfill graduation requirements is the responsibility of each student. Students are urged to check carefully the course and credit requirements of the program in which they are enrolled.

Inter-engineering Graduate Programs

Master of Science in Engineering and Master of Science

The College offers graduate programs leading to the Master of Science in Engineering and Master of Science degrees, without designation of a specific major. For graduate degrees within specific majors, see the individual departmental listings.

The civil, mechanical, and chemical departments, and inter-engineering offer approved programs that lead to the Master of Science in Engineering degree. The civil department, inter-engineering, and the materials science and engineering department offer approved programs that lead to the Master of Science degree.

The Inter-engineering Master of Science in Engineering (MSE) and Master of Science (MS) program is intended for students whose desired course of study does not fall within one of the traditional engineering graduate programs. An inter-engineering program combines coursework from at least one graduate engineering department as well as other graduate department(s) on campus (engineering or other) to allow students to create a program of study not available through existing graduate degree programs. Applications and files of students entering the MS or MSE option are handled by the designated engineering department. Admission requires a statement describing the applicant's objectives. This statement should state why the student wants to enter the MS/MSE program rather than one of the traditional engineering graduate programs. Applicants to the MS/MSE program must have well-defined educational objectives which cannot be satisfied by established engineering programs.

Admission Requirements

MSE/MS applicants must have a bachelor's degree in engineering, mathematics, or science with a minimum 3.00 GPA in courses taken in the junior and senior years. Students entering without an accredited engineering undergraduate degree and seeking an MSE degree satisfy the minimum general

requirements of the College of Engineering baccalaureate degree. Students complete the degree within two years; situations requiring longer must be approved by the student's faculty adviser.

Development of the Plan of Study: Before applying, the student consults a faculty member from each department in which the student intends to work, and identifies one to serve as the faculty adviser. Each student develops a plan of study and research that meets the general degree requirements (below) and satisfies the student's own program objectives. The program must include in-depth coursework from two or more departments and be approved by the faculty adviser(s). The proposed program becomes part of the student's application to the inter-engineering MSE/MS program.

Development of the Statement of Objectives: Students submit a one-page statement of study and career objectives for seeking this degree, explaining why the student wants to enter the MSE/MS program rather than a traditional engineering graduate program. Also, students should include any additional information, such as work experience, outside interests, and unusual circumstances, that may contribute to a better understanding of the student's record.

Degree Requirements

48 credits

Minimum 39 credits of coursework, with no more than 9 credits of engineering courses at the 400 level and at least 21 credits of engineering courses at the 500 level; also, at least 9 credits of thesis study/preparation.

Aeronautics and Astronautics

Department Overview

211 Guggenheim Hall

Aeronautics and astronautics deals with the design, analysis, and performance of air and space vehicles and a broad spectrum of related engineering science, such as aerodynamics, structural mechanics, automatic controls, flight mechanics, space dynamics, propulsion, plasma dynamics, and related topics.

Undergraduate Program

Adviser

211C Guggenheim Hall, Box 352400

(206) 616-1115

ugadvising@aa.washington.edu

The department offers the following program of study:

- The Bachelor of Science in Aeronautical and Astronautical Engineering degree
- A minor in aeronautics and astronautics

Bachelor of Science in Aeronautical and Astronautical Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121

6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW Students and Transfer Students

Current UW students who do not have Engineering Undeclared status and transfer students may apply. Admission is competitive. Applications from current UW students with Engineering Undeclared status will not be considered by the BSAE admissions committee during the competitive admission process.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126, CHEM 142, PHYS 121, PHYS 122, A A 210, 5 credits English composition completed prior to application deadline. MATH 307, MATH 308, MATH 324, PHYS 123, A A 260, CEE 220, ME 230, and AMATH 301 completed with a minimum 2.0 grade prior to autumn quarter
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application.

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

180 credits, as follows:

1. **General Education Requirements (78 credits)**
 - a. *Areas of Knowledge (49 credits):*
 - i. *Visual, Literary, and Performing Arts (VLPA) and Individuals & Societies (I&S):* 24 credits, to include a minimum 10 credits in VLPA and a minimum 10 credits of I&S, plus 4 additional credits in either area.
 - ii. *Natural World (NW):* 25 credits to include CHEM 142 (or CHEM 143 or CHEM 145), PHYS 121, PHYS 122, PHYS 123, and an additional 5 credits of Natural World courses (consult department for list of approved courses.)
 - iii. *Diversity (DIV):* 3 credits, can overlap with other areas of knowledge requirements
 - b. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 324.

- c. *Written and Oral Communication*: One 5-credit English composition course from the University list. Additional writing credits are built into the major core courses.
2. **Major Requirements (89 credits)**
 - a. *Engineering Fundamentals (16 credits)*: A A 210, A A 260, CEE 220, and M E 230.
 - b. *Departmental Core (73 credits)*: A A 301, A A 302, A A 310, A A 311, A A 312, A A 320, A A 321, A A 322, A A 331, A A 332, A A 360; either A A 410 and A A 411 or A A 420 and A A 421; A A 447, A A 496, AMATH 301; 15 credits of senior technical electives. With approval, 3 credits of the latter may be chosen from another area of engineering.
 - c. Minimum 1.7 grade in each 300- and 400-level A A course applied to major requirements
 - d. Minimum 2.00 cumulative GPA for courses applied to major requirements
 3. **Free Electives (13 credits)**

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, please contact the departmental adviser or see [departmental web page](#) for more details.

Minor

Minor Requirements

Minimum 32 credits to include:

1. *Core (24 credits)*: A A 210; A A 260; A A 310; A A 311; CEE 220; M E 230
2. *Electives (minimum 8 credits)*: Selected from an approved list of upper-division electives. Minimum one course taken at the 400 level. See adviser for approved list.
3. Minimum 16 credits taken in residence through the UW
4. Minimum 16 credits taken within the Aeronautics and Astronautics Department
5. Minimum 2.00 cumulative GPA in courses applied to the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The goals and objectives of the undergraduate program are to provide a challenging and comprehensive education, to develop necessary functional skills and an understanding of the societal context in which engineering is practiced, to provide a solid foundation in the engineering sciences related to aerospace engineering, to provide a systems perspective, to develop engineering creativity through design experience, and to prepare graduates to succeed in engineering careers and lifelong learning.

Graduates of aeronautics and astronautics are skilled in engineering fundamentals, engineering design, laboratory skills, synthesis of various engineering disciplines, and working in a team environment. Graduates are highly regarded by employers in aeronautics, astronautics, energy systems, and related fields. They develop interpersonal skills and a desire for life-long learning that helps them succeed in their chosen careers. Graduates have been successful and valued at local, national, and international industries, as well as at government organizations and institutions of higher learning.

- *Instructional and Research Facilities*: Visit the department web page to view current research activities. Undergraduates are encouraged to participate in research activities.

- *Honors Options Available:* With College Honors (completion of Honors core curriculum and Departmental Honors requirements). With Honors (completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are arranged individually. See adviser for details.
- *Department Scholarships:* Scholarships are limited and are usually reserved for students who have junior and senior standing in the department. Deadline for scholarship applications is April 1.
- *Student Organizations/Associations:* American Institute of Aeronautics and Astronautics (AIAA) student chapter. Sigma Gamma Tau

Graduate Program

Graduate Program Coordinator
211B Guggenheim Hall Box 352400
(206) 616-1113
gradadvising@aa.washington.edu

The department offers programs that provide a foundation in the aerospace engineering sciences and expertise in various specialized application areas. Three graduate degree options are offered: Master of Science in Aeronautics and Astronautics, Master of Aerospace Engineering, and Doctor of Philosophy.

Master of Science in Aeronautics and Astronautics (MSAA)

Admission Requirements

1. *Grade Point Average:* Minimum 3.30 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants with less than a 3.30 GPA may still be considered if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* The department recognizes that some academic institutions are capacity constrained and high grades are more difficult to obtain.
3. *GRE General Test:* Although no minimum GRE score is required, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, scores should be received before February 15.
4. *Two Letters of Recommendation:* Confidential letters submitted electronically by recommenders, or placed in sealed envelopes and included with application materials, or sent directly to the department by recommenders. Writers should rank the applicant's performance as a student and/or researcher. Recommendations are sent in letter format; no special form is used.
5. *Statement of Objectives:* Information not found in transcripts and other official documents. May include personal histories, professional and academic goals, and specific research interests if applicable.
6. *English Requirements for International Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for international students whose native language is not English.
7. *Prior Degrees:* Undergraduate degree in aerospace or mechanical engineering. Applicants with grades (3.50 and above) in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

39-45 credits, as follows:

1. Program of study plan approved by the department's graduate committee and submitted before 12 credits are completed.
2. Minimum MSAA program: either 10 courses plus 9 thesis credits, or 13 courses. No more than three courses at the 400 level (none in a student's depth area). All courses must be graded. Students enroll in the graduate seminar (A A 520) every quarter of full-time study.

Each program includes depth in a field of specialization, breadth to include at least one course in each of two different subject areas outside the field of specialization, and analytical strength to include three mathematical courses. Senior sequences in engineering, science, or other appropriate professional fields may make up part of the individualized graduate program. Only three undergraduate courses may be counted toward minimum requirements (and none in the student's depth area).

Normally one-and-a-half to two years of full-time study are needed to complete an MSAA degree.

Master of Aerospace Engineering (MAE)

Intended for recent graduates or engineers who wish to expand their knowledge in multidisciplinary areas while also learning other aspects of aerospace engineering, such as business, management, manufacturing, or technical communication.

Admission Requirements

1. *Grade Point Average:* Minimum 3.30 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* The department recognizes that some academic institutions are capacity constrained and high grades are more difficult to obtain.
3. *GRE General Test:* Although the department does not specify minimum GRE scores, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15.
4. *Two Letters of Recommendation:* Confidential letters submitted electronically by recommenders, or placed in sealed envelopes and included with application materials, or sent directly to the department by recommenders. Writers should rank an applicant's performance as a student and/or researcher. Recommendations are sent in letter format; no special forms are used.
5. *Statement of Objectives:* Information not found in transcripts and other official documents. May include personal histories, professional and academic goals, and specific research interests if applicable.
6. *English Requirements for International Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for international students whose native language is not English.
7. *Prior Degrees:* Undergraduate degree in aerospace or mechanical engineering. Applicants with grades (3.50 and above) in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

45-54 credits

Students create their own programs of study based on departmental distribution requirements and subject to departmental approval, to include courses in a specialty area, technical and non-technical electives, analytical courses, and a group or independent project. The MAE program includes twelve courses plus 8 credits for the project, or ten courses and one of three business certificate programs.

Doctor of Philosophy (PhD)

Admission Requirements

1. *Grade Point Average:* Minimum 3.40 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants with less than a 3.40 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* The department recognizes that some academic institutions are capacity constrained and high grades are more difficult to obtain.
3. *GRE General Test:* Although the department does not specify minimum GRE scores, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, scores should be received before February 15.
4. *Two Letters of Recommendation:* Confidential letters submitted electronically by recommenders, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should rank the applicant's performance as a student and/or researcher. Recommendations are sent in letter format; no special forms are used.
5. *Statement of Objectives:* Information about the applicant not found in transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests.
6. *English Requirements for International Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for international students whose native language is not English.
7. *Prior Degrees:* Undergraduate and graduate degrees in aerospace or mechanical engineering with a 3.40 minimum GPA. Applicants with strong grades in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

Minimum 90 credits

1. *Departmental Qualifying Examination:* Minimum 3.40 GPA in technical coursework at the graduate level and an MSAA degree or its equivalent.
2. *General Examination:* Taken within a year after the qualifying examination, but no sooner than two years after the beginning of graduate study.
3. *Completion of Coursework:* At least 18 credits of coursework in addition to that for the MSAA degree.
4. *Preparation of the Dissertation:* Normally requires the equivalent of at least one year of full-time study.

5. *Final Examination*

Research Activities

Current areas of research in the Department of Aeronautics and Astronautics include guidance and control systems, aerodynamics and fluid mechanics, propulsion and energy systems, advanced composite materials and structures, and plasma dynamics and fusion reactors. Research in controls includes autonomous systems involving spacecraft, aircraft, and underwater vehicles, flight systems integration, and development of unmanned aerial vehicles. Among fluid dynamics research topics are turbulent mixing, vortex dynamics and flow control, compressible flow, fluids in microgravity, and advanced fluid flow diagnostics development. Research programs in the areas of propulsion and energy include hypervelocity mass launchers, advanced technologies for generating space and terrestrial energy, combustion, and studies of planetary resources utilization. Structural mechanics research involves damage-tolerant composite structures, structural dynamics, fatigue, and fracture, and multidisciplinary design optimization. Experimental and computational research in plasma science has an emphasis on advanced, alternative concepts for achieving controlled fusion, as well as plasma propulsion for space applications.

Facilities

Facilities that support research activities in controls include unmanned aerial vehicle (UAV) and autonomous flight systems laboratories, and laboratories for underwater vehicle and distributed space systems research. Fluids, propulsion, and energy facilities include the Kirsten 8 x 12 foot low-speed wind tunnel, two water tunnels, a Mach 5, enthalpy blow-down wind tunnel, the Ram Accelerator hypervelocity launcher, a combustion laboratory, and a Mars environment simulation facility. Research in structures is conducted in a composite-material laboratory with material and structural test machines. Various plasma and fusion-research and engineering physics laboratories, including the Redmond Plasma Physics Laboratory (RPPL), exist to support research in plasmas. A variety of computer facilities is available, including a single 20-processor and two 8-processor servers, and a 16-computer heterogeneous cluster, as well as several stereographic visualization systems.

Financial Support

Most students are financially supported by the department as teaching or research assistants, or by their employers. For further information, contact the Graduate Program Coordinator, 211B Guggenheim Hall, Box 352400, or visit the department's [website](#).

Chemical Engineering

Department Overview

105 Benson

The chemical engineering profession is a close-knit group with a common background in chemical processes, systems analysis, and systems economics. Chemical engineering training occurs through course and laboratory work addressing mathematical, scientific, and engineering fundamentals. With a strong background in mathematics, chemistry, and physics, chemical engineering students study transport phenomena (the description of momentum, heat, and mass transfer in chemical processes); chemical kinetics and reaction engineering; process control and design; and optimization of chemical processes. These subjects are common throughout the traditional chemical industry, applying as well to other industries such as electronics manufacture and biological and biochemical engineering. Chemical engineers find industrial employment in areas of electronics, petroleum, consulting, chemical, automotive, forest products, biotechnology, and energy. Chemical engineers also find careers in academia and government and military service.

Undergraduate Program

Adviser

105 Benson, Box 351750
(206) 543-2252

advising@cheme.washington.edu

The Department of Chemical Engineering offers the following programs of study:

- Bachelor of Science in Chemical Engineering (BSCHE) degree
- Bachelor of Science in Chemical Engineering (BSCHE) degree, with an option in nanoscience and molecular engineering

Bachelor of Science in Chemical Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Core courses within the department form a seven-quarter curriculum designed to start spring quarter of the sophomore year. Because the curriculum is cohort-based and all students start and proceed at the same pace, Engineering Undeclared students admitted to Chemical Engineering after their first year are expected to start the curriculum in spring quarter of their second year.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering. Students requesting placement in Chemical Engineering must take CHEM 152 (or CHEM 153 or CHEM 155) from this list and they are also strongly recommended to complete CHEM 162 (or CHEM 165) prior to requesting placement.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Chemical Engineering is the only engineering major that requires students to complete CHEM 152 (or CHEM 153 or CHEM 155) to request placement because that course is required in order to complete the major in four years.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements and readiness to begin the chemical engineering core course sequence in the following spring quarter. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Current UW Students and Transfer Students

The department follows a cohort model beginning in spring quarter. Transfer students, current UW students without Engineering Undeclared status, and current UW students with Engineering Undeclared status who are eligible to begin the chemical engineering core sequence of courses in their first spring quarter may apply. Admission is competitive.

1. Admission is for spring quarter only. Application deadline: January 15
2. Minimum course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), MATH 307; CHEM 142, CHEM 152, CHEM 162 (or CHEM 143 and CHEM 153, or CHEM 145, CHEM 155, and CHEM 165); PHYS 121, PHYS 122; 5 credits of English composition. Two required courses may be in progress during winter quarter. CHEM 237 (or CHEM 223 or CHEM 335) strongly recommended.
3. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

General Expectations of Academic Progress: Completion of all admission requirements listed for "Current UW Students and Transfer Students" as well as the following courses by the start of autumn quarter of the junior year: organic chemistry I and II (CHEM 237 and CHEM 238; or CHEM 223, CHEM 224; or CHEM 335 and CHEM 336), PHYS 123, AMATH 301 (or CSE 142), MATH 308, CHEM 310.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option is competitive, and normally occurs upon completion of NME 220. Admission is based on grades, including NME 220 and any CHEM E courses already taken. A small number of students may be admitted. Admission is based on the student's academic record and prior experience/work in the field of nanoscience and/or molecular engineering. Students applying for the NME option should so indicate on their chemical engineering application and discuss their interests and background in the essay.

Graduation Requirements

180 credits, as follows:

General Education Requirements (97 credits)

1. *Written and Oral Communications (8 credits)*: one 5-credit English composition course from the University list; ENGR 231, HCDE 231. University required 4 additional writing credits are met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (24 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 24 credits
3. *Natural World (65 credits)*
 - a. *Physics (15 credits)*: PHYS 121, PHYS 122, PHYS 123
 - b. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), MATH 307, MATH 308, and MATH 309 (or STAT 390 or IND E 315)
 - c. *Chemistry (26 credits)*: CHEM 142, CHEM 152, CHEM 162 (or CHEM 143 and CHEM 153, or CHEM 145, CHEM 155, and CHEM 165), CHEM 237 (or CHEM 223 or CHEM 335), CHEM 238, CHEM 455

Major Requirements (74 credits)

1. *Engineering Fundamentals (4 credits)*: AMATH 301 or CSE 142
2. *Chemical Engineering Core Courses (51 credits)*: CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Molecular and Nanoscience Engineering (3 credits)*: CHEM E 455 or CHEM E 460
4. *Engineering Elective Courses (16 credits)*: Only one, 1-credit seminar allowed toward engineering electives. Maximum 9 credits undergraduate research (CHEM E 299, CHEM E 499, of which no more than 3 credits may be CHEM 299) may count toward engineering electives.

Unspecified Electives (9 credits): to reach 180 credits

Nanoscience and Molecular Engineering Option Major Requirements (77 credits)

1. *Engineering Fundamentals (4 credits)*: AMATH 301 or CSE 142

2. *Chemical Engineering Core Courses (51 credits)*: CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Nanoscience and Molecular Engineering Courses (22 credits)*: CHEM E 299, CHEM E 455, CHEM E 499 (3-6 credits, maximum 3 credits from CHEM E 299), NME 220, NME 221, NME 321, NME 421; minimum two additional approved nanoscience and molecular engineering electives. See adviser for list of approved electives.

Unspecified Electives (6 credits): to reach 180 credits.

A minimum 2.00 GPA in core chemical engineering courses, based on the first time each course is taken, is required for graduation.

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and CHEM E 486 or CHEM E 497) which involve the design of an integrated chemical system. An optional 9-credit specialty area allows each student to develop special competence in a selected subject by taking a minimum of three courses in that area. Engineering and free electives may be used for this purpose. The areas are biotechnology; fuel cells and energy; polymers, composites, colloids, and interfaces; computers applied to chemical engineering; environmental engineering; and nuclear engineering.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design. They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- *Instructional and Research Facilities*: The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Laboratory holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support

experiments on process automation). All have fast connections to the Internet and to larger UW computers.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students are encouraged to participate in internships, which are generally facilitated through the [Engineering Co-op Office](#).
- *Department Scholarships:* The department awards 20-25 full-tuition scholarships per year. See departmental website for application procedures.
- *Student Organizations/Associations:* The undergraduates in the department run a dynamic chapter of the American Institute of Chemical Engineers.

Of Special Note:

Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering and bioresource science and engineering. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and CHEM E 486, which are open to majors only).

Graduate Program

Graduate Program Coordinator

grad.admissions@cheme.washington.edu

The department offers studies leading to the degrees of doctor of philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree, centered on the dissertation with a foundation in coursework, is generally completed in four to five years beyond the baccalaureate degree. The master's program primary emphasis is placed on coursework, and the degree generally requires 21 months of study. Thesis and non-thesis options are available.

The program includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more-specialized courses in chemical engineering or in other departments. Students usually take three courses the first quarter. In subsequent quarters, less time is spent on coursework, and more on research and independent study.

The department has about seventy full-time graduate students, most of whom are working toward a doctorate.

Master of Science in Chemical Engineering

Admission Requirements

Most students have a Bachelor of Science in Chemical Engineering. A student with an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

Competitive applicants

1. Highly ranked (top 10 percent) in a respected chemical engineering program
2. Minimum 750 score on the quantitative portion of the GRE
3. Minimum 600 score (paper-based), 250 (computer-based), or 70 (Internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

Thesis Option

39 credits

1. Minimum 18 credits in courses numbered 500-599 (or approved 400-level courses; see item 2 for acceptable 400-level course options) of which at most 3 may be seminar credits, such as CHEM E 523. Five courses from at least four of the following five categories. (Courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
 - a. *Math/Computer/Statistics*: CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, STAT 421
 - b. *Thermodynamics*: CHEM E 525, CHEM 552
 - c. *Transport Phenomena*: CHEM E 530, CHEM E 531, M E 534
 - d. *Reaction Phenomena*: CHEM E 461, CHEM E 560, CHEM E 565
 - e. *Materials and Biotech*: CHEM E 467, CHEM E 554, CHEM E 590
2. Numerical grades for at least 18 credits of coursework. Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the BS degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator. Some approved 400-level courses are listed above.
3. Minimum 3.00 cumulative GPA
4. Minimum 30 credits taken through the UW
5. Minimum 9 credits of independent research under CHEM E 600 during the first year of study
6. A thesis describing original research. At least 12 credits of thesis (CHEM E 700).
7. Final examination

Non-Thesis Option

Degree requirements may be completed in four quarters (completion in three is possible).

39 credits, and other requirements

1. Minimum 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Five courses from at least four of the following five categories. (Courses listed are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
 - a. *Math/Computer/Statistics*: CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
 - b. *Thermodynamics*: CHEM E 455, CHEM E 525, CHEM E 526, CHEM 552
 - c. *Transport Phenomena*: CHEM E 530, CHEM E 531, M E 533, M E 534

- d. *Reaction Phenomena*: CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
 - e. *Materials and Biotech*: CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590
2. Numerical grades for at least 18 credits (500-599 or approved 400-level courses). Approved 400-level courses include 400-level CHEM E courses not required for the BS degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.
 3. Minimum 6 CHEM E 600 credits (minimum 2.7 numerical grade or S grade). Written report required.
 4. Thesis research (i.e., CHEM E 700 or CHEM E 800) does not count toward the 39 credits.
 5. Minimum 3.00 cumulative GPA
 6. Minimum 30 credits taken through the UW
 7. Final examination: oral presentation of the CHEM E 600 project

Master of Science in Engineering

Admission Requirements

Most students applying for graduate admission have a Bachelor of Science in Chemical Engineering. A student with an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

Competitive applicants

1. Highly ranked (top 10 percent) in a respected chemical engineering program
2. Minimum 750 score on the quantitative portion of the GRE
3. Minimum 600 score (paper-based), 250 (computer-based), or 70 (Internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

39 credits

Requirements are the same as for the MSChE thesis option, except that the research adviser tailors course requirements to the student's background and research objectives (subject to Graduate Program Coordinator approval). Relative to the MSChE options, usually less emphasis is on chemical engineering, more on engineering science and related subjects.

Doctor of Philosophy

Admission Requirements

Most applicants have a Bachelor of Science in Chemical Engineering. A student with an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

Competitive applicants

1. Highly ranked (top 10 percent) in a respected chemical engineering program

2. Minimum 750 score on the quantitative portion of the GRE
3. Minimum 600 score (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

90-108 credits

1. *Minimum Graduate School Requirements:*
 - a. Minimum 18 credits of courses numbered 500-600, taken through the UW.
 - b. Minimum 18 numerically graded credits of UW 400- and 500-level courses. Any 400-level courses require departmental approval.
 - c. Minimum 90 credits, including at least 60 through the UW
 - d. Minimum 27 dissertation credits (CHEM E 800) over a period of at least three quarters
 - e. Minimum cumulative 3.00 GPA
 - f. General examination
 - g. Final examination
2. *Students with a Chemical Engineering Undergraduate Degree:* In addition to requirements listed above
 - a. Complete non-thesis MSChE degree prior to the general examination. (Students with an MS in chemical engineering from another university may petition the Graduate Program Coordinator for an exemption.)
 - b. TA for at least three quarters.
 - c. Minimum six graded courses numbered 500-599 or approved 400-level courses.
 - d. Five courses from at least four of the following five categories. (Courses listed are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
 1. *Math/Computer/Statistics:* CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
 2. *Thermodynamics:* CHEM E 455, CHEM E 525, CHEM E 526, CHEM 552
 3. *Transport Phenomena:* CHEM E 530, CHEM E 531, M E 533, M E 534
 4. *Reaction Phenomena:* CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
 5. *Materials and Biotech:* CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590
 - e. One CHEM E course in a topic outside the student's main research area.
3. *Non-Chemical Engineering Undergraduates:* Students whose undergraduate degree is in engineering or science (e.g., BS in chemistry or materials science but not chemical engineering) must pass or serve as a TA in the following courses: CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 465, CHEM E 485
4. Students lacking a strong background in thermodynamics are advised (but not required) to take CHEM E 326 prior to attempting CHEM E 525.

Research Facilities

Benson Hall contains classrooms, offices, stockrooms, a machine shop, laboratories, and a variety of specialized research equipment. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computer Center, instrument-making shops, research centers (e.g., biomaterials, nanotechnology, chemical analysis), and the Chemistry and Engineering Libraries.

Financial Aid

Students interested in applying for admission and support should visit the department's website: www.cheme.washington.edu, which provides details on application procedures. Offers of admission with financial support are usually made from January through March.

Civil and Environmental Engineering

Department Overview

201 More

Civil and environmental engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities focus on: transportation infrastructure and construction; heavy construction; hydrology and hydrodynamics; structures, mechanics, and geotechnical engineering; drinking water and wastewater treatment, and water quality management ; solid- and hazardous-waste disposal; and air quality management.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and system analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints. Civil and environmental engineers create and maintain infrastructure in a heavily human-influenced ecosystem.

To accommodate these wide interests, the department is organized into six academic areas: construction engineering; transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

Undergraduate Program

Adviser

201 More, Box 352700

(206) 543-5092

ceadvice@uw.edu

The Department of Civil and Environmental Engineering offers the following program of study:

- [The Bachelor of Science in Civil Engineering \(BSCE\) degree](#)
- [The Bachelor of Science in Environmental Engineering \(BSENV\) degree](#)

The BSCE degree is appropriate for students interested in gaining a broad perspective of civil and environmental engineering. Students take introductory courses in six areas (construction, transportation, geotechnical, structural, water and environmental engineering), gain expertise in at least four areas, and may focus their senior-year studies on a single area. The BSCE program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The BSENV degree offers a specialized focus in environmental engineering. Students gain expertise in the fundamentals of environmental engineering, with specialization in areas including water and wastewater engineering, water resources management, hydrology, environmental fluid mechanics, climate science, sustainable design, resource recovery, environmental chemistry, and environmental microbiology. The BSENV program successfully completed the ABET accreditation review process during the 2019-2020 academic year.

Bachelor of Science in Civil Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity constrained.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126; CHEM 142; PHYS 121, PHYS 122; A A 210; 5 credits English composition. All courses completed prior to application deadline. In addition, AMATH 301 or CSE 142; MATH 308; CEE 220; and ME 230 completed with minimum 2.0 grades prior to autumn quarter.
3. Minimum 60 credits completed by application deadline

4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application.

Students are encouraged to complete the following courses prior to autumn quarter - MATH 307; CHEM 152; PHYS 123

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

Minimum 180 credits

General Education Requirements (89-91 credits)

1. *Written and Oral Communication (12 credits)*: English composition; ENGR 231; additional W-credit courses to bring total to 12 credits
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (24 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 24 credits
3. *Economics (4-5 credits)*: ECON 200 or IND E 250. ECON 200 may also be applied toward the I&S requirement. IND E 250 may also be applied toward the requirement for an additional Engineering Fundamentals course.
4. *Natural World (49-50 credits)*
 - a. *Mathematics (21 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352)
 - b. *Statistics (3-4 credits)*: IND E 315 (preferred) or STAT 390
 - c. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (94-97 credits)

1. *Engineering Fundamentals (20 credits)*: AMATH 301 or CSE 142, A A 210, CEE 220, and ME 230. Students who complete STAT 390 must complete an additional engineering fundamentals course from A A 260, IND E 250, IND E 280, M E 123, E E 215, or MSE 170. Students who complete IND E 315 must complete either an additional Engineering Fundamentals course from the above list, or an additional 300-level mathematics course other than statistics.
2. *Civil Engineering Core (40 credits)*: CEE 307, CEE 317, CEE 327, CEE 337, CEE 347, CEE 357, CEE 367, and CEE 377.
3. *Professional Practice and Capstone Design (7 credits)*: CEE 440 and one course from CEE 441, CEE 442, CEE 444, or CEE 445. Minimum 2.0 grade required for both courses in this two-course sequence.
4. *Civil Engineering Technical Electives (15 credits)*: CEE 400-level coursework selected from an approved list (see adviser or department website for list), with at least one core course from three separate areas of concentration within the department. Minimum 2.0 grade required for each of the three courses used to fulfill the core-courses requirement.

5. *Upper-Division Engineering and Science (12 credits)*: Choice of additional CEE 400-level courses or courses from an approved list from outside the department. Must also include one science course from the approved list. Maximum 6 credits of CEE 498 and 3 credits of CEE 499 allowed toward upper-division engineering and science.
6. *Grade Requirements*: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the department adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving civil and environmental engineering problems; demonstrate sufficient mastery of core civil and environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in civil and environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.
- *Instructional and Research Facilities*: The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental engineering and water program research laboratory facilities include more than 20,000 square feet of laboratory space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. A dedicated environmental engineering teaching laboratory comprising roughly 1200 square feet of space is equipped with a variety of standard lab equipment and analytical tools, in addition to modern PCs and a teaching bench with whiteboard and overhead projector for demonstrations and general instructional purposes. In addition, the department has a 4000 square foot fluid mechanics teaching laboratory (in the Harris Hydraulics Laboratory), which houses seven dedicated teaching facilities including three large flumes, a wind tunnel, desk space and state-of-the-art laser imaging and measurement capabilities. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million pound capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a computer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.
- *Department Scholarships*: The department offers numerous annual scholarships. For more information, see department website. Scholarships are also available through the College of Engineering, the UW Scholarship Office, and external sources, including professional associations and industry.

- *Student Organizations/Associations:* The department has over 20 active student organizations/associations, including American Society of Civil Engineers, Chi Epsilon, Engineers Without Borders, and many more.

Bachelor of Science in Environmental Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity constrained.

1. Application deadline: April 5. Admission is for autumn quarter only.
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122; AA 210; 5 credits English composition. All courses completed prior to April 5 application deadline. Following courses completed with minimum 2.0 grade prior to

autumn quarter: AMATH 301, AMATH 351 (or MATH 307); BIOL 180; CHEM 162; PHYS 123; AA 260; CEE 220

3. Minimum 60 credits completed by April 5 application deadline.
4. Grade requirements: Minimum 2.0 grade for each required course; minimum 2.50 cumulative GPA in required courses.

Students are also encouraged to complete AMATH 352 (or MATH 308) prior to autumn quarter.

Factors considered for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

Minimum 180 credits

General Education Requirements (99-101 credits)

1. *Written and Oral Communication (12 credits)*: English composition; ENGR 231; additional W-credit courses to bring total to 12 credits
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (24 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 24 credits
3. *Economics (4-5 credits)*: IND E 250 (preferred) or ECON 200 (also counts as a major requirement)
4. *Natural World (59-60 credits)*
 - a. *Mathematics (21 credits)*: MATH 124, MATH 125, MATH 126, AMATH 351 (or MATH 307) AMATH 352 (or MATH 308)
 - b. *Statistics (3-4 credits)*: IND E 315 (recommended) or STAT 390
 - c. *Science (35 credits)*: CHEM 142, CHEM 152, CHEM 162, BIOL 180, PHYS 121, PHYS 122, PHYS 123

Major Requirements (81-82 credits)

1. *Engineering Fundamentals (16-17 credits)*: Students take all courses on this list - AMATH 301 (preferred, or CSE 142 or CSE 160), A A 210, CEE 220, A A 260 (preferred, or ME 323).
2. *Economics (4-5 credits)*: one course from IND E 250 (preferred) or ECON 200 (also counts as a General Education requirement).
3. *Environmental Engineering Core (30 credits)*: Students take all courses on this list - CEE 347, CEE 348, CEE 349, CEE 350, CEE 352, CEE 354, CEE 356.
4. *Professional Practice (7 credits)*: CEE 440, and either CEE 444 or CEE 445. Minimum 2.0 grade for each professional practice course.
5. *Technical Electives (15 credits)*: CEE 400-level coursework selected from an approved list (see department website for list).

6. *Upper-Division Electives (13 credits)*: CEE 400-level courses or courses from an approved list from outside the department. Must also include one science course from the approved list. Maximum 6 credits CEE 498 and 3 credits CEE 499 allowed toward upper-division engineering and science.
7. *Grade Requirements*: Minimum 2.00 GPA in courses applied to the major with no grade below 1.0 in these courses.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the department adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving environmental engineering problems; demonstrate sufficient mastery of core environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.
- *Instructional and Research Facilities*: The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental engineering and water program research laboratory facilities include more than 20,000 square feet of laboratory space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. A dedicated environmental engineering teaching laboratory comprising roughly 1200 square feet of space is equipped with a variety of standard lab equipment and analytical tools, in addition to modern PCs and a teaching bench with whiteboard and overhead projector for demonstrations and general instructional purposes. In addition, the department has a 4000 square foot fluid mechanics teaching laboratory (in the Harris Hydraulics Laboratory), which houses seven dedicated teaching facilities including three large flumes, a wind tunnel, desk space and state-of-the-art laser imaging and measurement capabilities.

See adviser for details.

Graduate Program

Graduate Program Coordinator
201 More, Box 352700
(206) 543-2574
ceginfo@uw.edu

The department offers programs of study leading to the degrees of Master of Science in Civil Engineering (MSCE), Master of Sustainable Transportation (MST), Master of Supply Chain Transportation and Logistics (MSCTL), and doctor of philosophy.

Graduate work is offered in most fields of civil and environmental engineering, including transportation and construction engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

Graduate Online Programs:

Construction Engineering Master's Program: In collaboration with the Department of Construction Management in the College of Built Environments, the department offers an online Master of Science in Civil Engineering degree in construction engineering. Designed for working professionals, this program is completed at the student's own pace. Areas covered include heavy construction project management, infrastructure construction, and qualitative construction management. For more information, see the Construction Engineering [website](#).

Master in Sustainable Transportation Program: In partnership with UW Professional and Continuing Education, the department offers an online Master of Sustainable Transportation degree (MST). The program provides transportation engineers and planners the latest knowledge, skills, and tools needed to become leaders in developing and maintaining sustainable transportation practices. Students develop an awareness of green transportation strategies and gain a solid background with practical applications. In a part-time online format, the MST program covers three areas of concentration: planning and livable communities; environmental issues and impacts; and policy development, health, and economics. For more information, see the Master of Sustainable Transportation [website](#).

Supply Chain Transportation and Logistics Master's Program: In partnership with UW Professional and Continuing Education, the department offers an online Master of Supply Chain Transportation and Logistics degree. Combining engineering and business principles with industry best practices, this program provides students the knowledge needed to successfully design, implement, and manage complex supply chain transportation and logistics strategies. Students study cross-functional areas, such as operations, inventory management, and IT systems, to develop skills in the end-to-end management of transportation in a global supply chain. For more information, see the Master of Supply Chain Transportation and Logistics [website](#).

Master of Science in Civil Engineering

Admission Requirements

Priority for admission is based on an applicant's scholastic record; usually at least a B or 3.00 GPA in the junior and senior years. Consideration is also given to Graduate Record Examination scores and other information

Degree Requirements

42 credits, as follows:

Two options are available -- thesis and non-thesis.

- *Thesis option:*
 - 30 credits of coursework with at least 18 credits at the 500 level
 - 3 credits (maximum) of CEE 500
 - 9 credits of master's thesis, CEE 700
- *Non-thesis option:*
 - 39 credits of coursework with at least 18 credits at the 500 level
 - 3 credits (maximum) of CEE 500

Doctor of Philosophy

Admission Requirements

Priority for admission is based on an applicant's scholastic record; usually, at least a B or 3.00 GPA in the junior and senior years. Consideration is also given to Graduate Record Examination scores and other information.

Degree Requirements

90 credits, as follows:

- 60 coursework credits
- 27+ dissertation credits
- 3 seminar credits (for those without a master's degree from CEE at UW)

An appropriate master's degree from an accredited institution may be applied towards 30 of the 60 coursework credits.

Course requirements are individualized depending on student's background and PhD topic area.

Financial Aid

Research and teaching assistantships are available on a competitive basis. The number of positions depends on the current level of funding. Additionally there are a limited number of fellowships, scholarships, and traineeships.

Research Facilities

More Hall has structural, concrete, bituminous materials, soil mechanics, computer, water-quality, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydrology and hydrodynamics are located in the Harris Hydraulics Laboratory.

Computer Science and Engineering

Department Overview

AC101 Paul G. Allen Center for Computer Science and Engineering

The Paul G. Allen School of Computer Science and Engineering educates students to become leaders in the design and implementation of the computing systems that touch every aspect of modern society. The Allen School is widely recognized as one of the top programs in the world, with passionate faculty bringing the latest advances into the classroom and the lab.

The Allen School offers two undergraduate degrees: Computer Science (through the College of Arts & Sciences) and Computer Engineering (through the College of Engineering). While the degree requirements differ in some details, undergraduate majors working toward either degree have the same broad opportunities to take the wide array of courses that the Allen School offers. Many of our graduates go on to careers at the world's great technology companies, from the largest industry titans to the smallest start-ups. Others join innovative companies and non-profit organizations outside the traditional computing industry to use software, hardware, and data to solve the world's greatest challenges. Still others go on to challenging graduate programs in a variety of fields.

At the graduate level, the Allen School offers (1) an integrated Master's program for some of our undergraduate majors seeking a deeper education before leaving campus, (2) an evening Master's program for currently employed software professionals, and (3) a PhD program for students seeking a research career.

The field of computing is broad and growing, and the Allen School's course catalog reflects this breadth. Beyond the popular introductory programming courses taken by thousands of students from every major on campus, our courses cover everything from the mathematical foundations of what computers can and cannot do; to hands-on experiences building software and hardware artifacts with a range of programming languages and tools; to advanced courses in software engineering, human-computer interaction, computer graphics and animation, artificial intelligence, machine learning, large-scale data management, natural language processing, computer networking, computational biology, robotics, computer security and privacy, and much more.

Computers are the most flexible and powerful machines ever created. While the applications of computing continue to grow and change, the core magic of the Allen School is timeless: computer scientists and engineers combine creative problem-solving, rigorous design, and the creation of algorithms, software, and hardware systems to build solutions that change the world.

Undergraduate Program

Adviser

Bill and Melinda Gates Center, Room 170, Box 352355
(206) 543-2656

ugrad-advisor@cs.washington.edu

The Paul G. Allen School of Computer Science and Engineering offers the following programs of study:

- The Bachelor of Science in Computer Engineering degree

- The Bachelor of Science degree with a major in computer science (see [Computer Science](#) in the Arts and Sciences section of this catalog)
- Minor in Neural Computation and Engineering

The core requirements of the two undergraduate majors are similar. The computer engineering major includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole. It may be more appropriate for students who are interested in building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints.

The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the design of software systems and applications.

Bachelor of Science in Computer Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CSE 142, CSE 143; English composition.

Department Admission Requirements (For currently enrolled UW students applying for admission for Autumn 2020 and Spring 2021. All other students should follow the admission requirements effective Autumn 2021 below.)

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students.

1. Deadlines for requesting placement: July 1 and January 15
2. Course requirements to request placement: MATH 124, MATH 125, MATH 126; PHYS 121; CSE 142, CSE 143; 5 credits English composition
3. 30 credits graded college coursework
4. Grade requirements: Minimum 2.0 grade in each course required for placement; minimum 2.50 cumulative GPA in courses required for placement

If the number of Engineering Undeclared students requesting placement into the major exceeds the department capacity for Engineering Undeclared students, a matching process is implemented. Factors considered include performance in courses required for placement, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Other Current UW Students

Current UW students without Engineering Undeclared status may apply. Admission is competitive.

1. Department application deadlines: July 1 and January 15
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; PHYS 121; CSE 142, CSE 143; 5 credits English composition. All courses completed prior to application deadline

3. Minimum 30 graded college credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Transfer Students

Transfer student admission is for autumn quarter only and is competitive.

Transfer applicants are considered based on their University application. No additional departmental application required. Applicants must identify Computer Engineering as their first-choice intended major, and indicate they will begin the major immediately upon transferring. Applicants must meet the following requirements:

1. Minimum 30 graded college credits completed by the University transfer application deadline.
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; PHYS 121; CSE 142, CSE 143; 5 credits of English composition all completed with minimum 2.0 grade prior to autumn quarter

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Department Admission Requirements (Effective Autumn 2021)

Applicants are considered in three groups - Entering Freshmen, Currently Enrolled UW Students, and Entering Transfers. Admission is capacity constrained. Completion of minimum requirements does not guarantee admission.

1. *Entering Freshmen:* The largest pathway for admission to Computer Engineering is directly out of high school, prior to completion of university-level prerequisites. Freshman applicants listing Computer Engineering as their intended major are automatically considered. Competitive applicants have usually taken the equivalent of four years of high school mathematics and at least one year of high school laboratory science upon entering the University. Admission is for autumn quarter only.
2. *Currently Enrolled UW Students:* A portion of each year's class is admitted after matriculating to UW. Admission is for autumn or spring quarter. Application deadlines: July 1 for autumn and January 15 for spring. To be considered, applicants must meet the following course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121; CSE 142, CSE 143; at least five credits of English composition.
3. *Entering Transfers:* A portion of each year's class is admitted from students transferring from another college or university. Admission is for autumn or spring quarter. Transfer applicants are considered based on their University transfer application and supplemental material provided to the Allen School. Applicants must identify Computer Engineering as their intended major, and indicate they will begin the major immediately upon transferring. Entering transfer applicants must meet the following requirements:
 - a. Minimum 30 graded college credits completed by the University transfer application deadline.
 - b. Completion of the following courses prior to matriculation to UW: MATH 124, MATH 125, MATH 126; PHYS 121; CSE 142, CSE 143; and at least five credits of English composition.

Graduation Requirements

180 credits as follows:

General Education Requirements (83 credits)

1. *Written and Oral Communication (12 credits)*: 5-credit course in English composition from the University-approved list; ENGR 231; 4 credits of UW approved writing (W) or additional UW approved composition (C) courses.
2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (30 credits)*: Minimum 10 credits required in each area.
3. *Natural World (41 credits)*:
 - a. *Mathematics (15-18 credits)*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken)
 - b. *Science (20 credits)*: PHYS 121, PHYS 122, and 10 additional credits from the list of approved natural science courses in the CS&E handbook
 - c. *Mathematics or Science (3-6 credits)*: 3 to 6 additional credits of math/science (to bring total to 41) chosen from approved natural science courses in the CS&E handbook: STAT 390, STAT 391, STAT 394, MATH 307, MATH 309, MATH 334, MATH 335, AMATH 351, or AMATH 353 (STAT 391 recommended)

Major Requirements (72 credits)

1. *Required Courses (36 credits)*: CSE 142, CSE 143, CSE 311, CSE 312, CSE 332, CSE 351, CSE 369, CSE 371/E E 371, E E 215 or E E 205
2. *CSE Electives (36 credits)*:
 - a. One course chosen from: CSE 403, CSE 474/E E 474, or CSE 484
 - b. Three additional courses chosen from the computer engineering systems electives list in the online CSE handbook
 - c. Two additional courses chosen from the CSE core course list in the online CSE handbook
 - d. A design capstone course from the approved list in the CSE handbook.
 - e. 4 credits of College of Engineering courses from the CSE elective list
 - f. Additional (0-5 credits) CSE electives to bring total CSE electives to 36 credits
3. Minimum 2.0 grade for any course applied to the major, Natural World, or Written and Oral Communications requirements. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.
4. Free Electives (20-25 credits, to bring total for the degree to 180)

Minor

Neural Computation and Engineering

Minor Requirements (30 credits)

1. Either NBIO 405/BIOEN 466, or both NBIO 301 and NBIO 302
2. BIOEN 460

3. Either AMATH 342 or NBIO 303
4. One course from PHIL 442 (preferred), PHIL 242, or PHIL 409
5. Capstone: BIOEN 461
6. Electives At least 12 additional graded credits from the Neural Computation and Engineering elective list, available on the program website
7. Minimum cumulative 2.00 GPA for courses counted toward the minor
8. Minimum 18 credits outside the student's major
9. Students make a presentation during the Mary Gates Undergraduate Research Symposium or Computational Neuroscience Connection Program. With approval, other presentations may satisfy this requirement.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*

Engineering Quality: Graduates engage in the productive practice of computer engineering to identify and solve significant problems across a broad range of application areas.

Leadership: Graduates engage in successful careers in industry, academia, and public service, providing technical leadership for their business, profession, and community.

Economic Impact: Graduates enhance the economic well-being of Washington State through a combination of technical expertise, leadership, and entrepreneurship.

Lifelong Learning: Graduates adapt to new technologies, tools, and methodologies to remain at the leading edge of computer engineering practice with the ability to respond to the challenges of a changing environment.

The computer engineering undergraduate degree is housed in the College of Engineering and is thereby accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, phone: (410) 347-7700. The Allen School has adopted the following student outcomes. Upon graduation from the computer engineering program, students will have:

- a. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- b. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- c. An ability to communicate effectively with a range of audiences
- d. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- e. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- f. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions

- g. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
- *Instructional and Research Facilities:* The Allen School is housed in the state-of-the-art [Paul G. Allen Center for Computer Science and Engineering](#). The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

The Allen School general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. The special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center and Gates Center are two of the finest computer science and computer engineering facilities in the nation. All Allen School students have access to these resources.

- *Honors Options Available:* With College Honors (Completion of Honors Core and Departmental Honors requirements). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. See www.engr.washington.edu/coop and careers.washington.edu for information.
- *Departmental Scholarships:* The Allen School has a limited number of scholarships available to current Allen School majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html.
- *Student Organizations/Associations:* A student chapter of the Association for Computing Machinery (ACM) operates within the Allen School. The ACM helps to coordinate new student orientations, research nights, technical talks, and various tutorials.

Graduate Program

Graduate Program Coordinator
AC101 Paul G. Allen Center for Computer Science and Engineering, Box 352350
(206) 543-1695
grad-admissions@cs.washington.edu

The Allen School offers master of science and doctor of philosophy degrees. Students can pursue full-time graduate study leading to a PhD with an integrated MS. Students can also pursue part-time graduate study in the evening, leading to an MS. Current undergraduate computer science and computer engineering majors can apply to a full-time MS program integrated with the bachelor's degree. Programs provide breadth of knowledge as well as depth in an area of specialization.

The Allen School has a large faculty, with expertise across the range of modern computing topics and with considerable focus on several interdisciplinary topics. Topics in graduate-level courses and opportunities for independent research reflect this breadth.

Combined Bachelor of Science/Master of Science - 5th year Program

Admission Requirements

Open only to students currently enrolled as computer science or computer engineering majors at the UW. Applicants must complete all required 300-level CSE courses for their computer science or computer engineering degree. Applications accepted once a year in spring.

Degree Requirements

40 credits

Approved coursework from the PhD-track master's courses, the Professional Master's Program courses, and 400-level courses

1. Minimum 36 credits of approved graded 400-level and 500-level courses except as substituted by research credit:
 - a. Minimum 32 credits in CSE courses. Students may petition to substitute courses in other fields
 - b. Minimum 20 credits from 500-level CSE 4-credit graded courses or other approved CSE graded coursework at the 500-level.
2. 4 credits of research colloquia (CSE 519 or CSE 520) or single-credit research seminars (CSE 590).
3. Students may substitute up to 12 credits of CSE 600 in place of graded CSE courses in 1.a., above. Of these, 4 credits of research may be substituted for graded credits in 1.b., above.
4. Either an approved internship/co-op or at least 3 credits of CSE research.
5. Minimum one approved course from the CSE integrated project (capstone) course list. Includes 500-level capstone-style courses as well as CSE 428, CSE 441, CSE 454, CSE 460, CSE 468, CSE 477, and CSE 481.
6. Courses taken prior to completion of the bachelor's degree may apply to master's requirements if all the following points are met:
 - a. Numbered 500-level or higher
 - b. Fulfill master's requirements as outlined above.
 - c. Taken after a student is admitted to the BS/MS program
 - d. Credits do not satisfy any undergraduate requirements, such as departmental requirements or general elective credits.
 - e. Maximum 12 graduate credits taken as an undergraduate may apply to the master's degree.

Integrated Master of Science

Admission Requirements

See PhD admission requirements, below.

Degree Requirements

40 credits

Non-Thesis Option

1. 20 credits in courses numbered 500 or above; 30 credits in CSE courses. 10 credits may be in one or more supporting fields
2. MS qualifying evaluation.
3. Breadth requirement: One course in four of five CSE areas below plus two additional courses in any area (18 credits total) for graded credit. A waiver is possible for graduate courses taken elsewhere.
 - a. Theory: CSE 521, CSE 525, or CSE 531
 - b. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
 - c. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
 - d. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
 - e. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
 - f. Non-CSE: GENOME 540; HCDE 544 or INSC 570. Non-CSE courses do not belong in any of the five areas above.
4. Independent project completed under supervision of a primary and secondary faculty adviser.

Thesis Option

1. CSE 700, master's thesis (9 credits)
2. 31 additional credits
 - a. 24 credits in CSE courses
 - b. At least 16 credits numbered 500 or above
 - c. 7 credits may be in one or more supporting fields such as engineering, mathematics, natural sciences, business administration, linguistics, philosophy, psychology, or medicine.

Professional Master's Program

Admission Requirements

1. Bachelor's degree in computer science, computer engineering, or related field
2. 3.50 is the average GPA for accepted students.
3. GRE (general examination) except applicants with a PhD from a U.S. institution
4. Two years of post-degree professional experience
5. Significant computing background, to include the following undergraduate courses: data structures, algorithms, computer systems, and programming languages; or professional experience in these areas. Substantial hands-on professional programming experience
6. International students: work visas (or H4 visas)

Degree Requirements

40 credits

Eight 4-credit PMP (Professional Master's Program) courses (determined in consultation with an adviser) and other courses for 8 additional credits. The additional credits may be earned through participation in the Allen School's colloquium series. Students who take one course per quarter, plus 1 credit of colloquium, complete the program in two-and-a-half years.

Doctor of Philosophy

Admission Requirements

1. Solid background in computer science, including programming, machine organization, data structures, discrete mathematics, automata theory, and programming systems (i.e., the equivalent of CSE 311, CSE 312, CSE 332, and CSE 351, and either CSE 401 or CSE 451). Some exceptions are made for otherwise promising students.
2. GRE scores, earned within the preceding five years.
3. Application deadline: December 15 for both U.S. and international students for autumn quarter admission.

Degree Requirements

90 credits

1. PhD qualifying evaluation, to include:
 - a. Breadth requirement, satisfied through coursework.
 - b. One course in four of five areas below plus two additional courses in any area (18 credits total) for graded credit. A waiver is possible for graduate courses taken elsewhere.
 - i. Theory: CSE 521, CSE 525, or CSE 531
 - ii. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
 - iii. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
 - iv. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
 - v. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
 - vi. Non-CSE: GENOME 540; HCDE 544 or INSC 570. Non-CSE courses do not belong in any of the five areas above.
 - c. Independent project completed under supervision of a primary and a secondary faculty adviser â€” written summary and oral presentation
2. General examination
3. Minimum 40 credits of coursework numbered 500 or above. 45 credits in courses chosen from the computer science course list. At least two CSE courses numbered 500 or above (or approved courses in related disciplines) taken for graded credit in addition to courses taken to satisfy the breadth component of the qualifying evaluation. Coursework taken toward the MS degree is applicable toward the PhD degree.
4. Two quarters of teaching assistantship within the Allen School
5. Dissertation: at least 27 credits of CSE 800. Oral examination

Assistantships

Research and teaching assistantships are based on scholastic excellence and potential. All students accepted are awarded three years of funding. Students applying for assistantships starting in autumn quarter should complete applications to the Graduate School and the Allen School by December 15.

Electrical and Computer Engineering

Department Overview

AE100R Paul Allen Center

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Dramatic advances in personal communication services, digital imaging, and network hardware and software are changing the texture of everyday life for an increasing portion of the world's population.

Undergraduate Program

Adviser
AE 100R Paul Allen Center
(206) 221-5270
undergrad@ece.uw.edu

The Department of Electrical and Computer Engineering offers the following programs of study:

- The Bachelor of Science in Electrical Engineering degree
- The Bachelor of Science in Electrical Engineering degree with an option in nanoscience and molecular engineering

Bachelor of Science in Electrical Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; CHEM 142; PHYS 121, PHYS 122; 5 credits English composition. All courses completed prior to application deadline. In addition, MATH 307 and PHYS 123 completed with minimum grades of 2.0 prior to autumn quarter
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Nanoscience and Molecular Engineering Option (NME): Admission is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all electrical engineering prerequisites and formal admission to the BS electrical engineering major. Students who complete NME 220 with a minimum 2.0 grade are eligible. Such students indicate an interest in the NME option on their electrical engineering major application and discuss their interests/background in the application personal statement. To declare, they see an EE undergraduate adviser.

Graduation Requirements

General Education Requirements (81 credits)

1. *Written and Oral Communication*: 12 credits, to include one 5-credit English composition course from the University list; ENGR 231; E E 393 (or department-approved alternative)
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV)* (25 credits): Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 25 credits
3. *Natural World (44 credits)*:
 - a. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), and MATH 324.
 - b. *Science (20 credits)*: CHEM 142; PHYS 121, PHYS 122, PHYS 123

Major Requirements (80-81 credits)

1. *Computer Programming (9 credits)*: CSE 142, CSE 143
2. *Electrical Engineering Core (14 credits)*: E E 215, E E 233, E E 235
3. *Electrical Engineering Major Concentration Area (24 credits minimum)*
4. *Electrical Engineering Electives (up to 20 credits)*: See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
5. *Professional Issues*: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
6. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.
7. *Statistics (3-4 credits)*: Either STAT 390/MATH 390, STAT 391, MATH 394/STAT 394, or IND E 315
8. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Nanoscience and Molecular Engineering Option Requirements (80-81 credits)

1. *Computer Programming (9 credits)*: CSE 142, CSE 143
2. *Electrical Engineering Core (14 credits)*: E E 215, E E 233, E E 235
3. *Nanoscience and Molecular Engineering Courses (6 credits)*: NME 220, NME 221, NME 421
4. *Electrical Engineering Major Concentration Area (24 credits minimum)* See adviser for list of acceptable courses.
5. *Electrical Engineering Electives (up to 20 credits)*: See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
6. *Professional Issues*: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
7. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.

8. *Statistics (3-4 credits)*: Either STAT 390/MATH 390, STAT 391, MATH 394/STAT 394, or IND E 315
9. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Electives (18-19 credits)

1. *Approved Non-Electrical Engineering Electives (10 credits)*: Selected from courses listed in the departmental handbook.
2. *Free Electives (8-9 credits)*

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*
 - *Professional Opportunities*: Graduates with a degree in electrical engineering find employment in industries such as aerospace, communications, computer manufacturing, power distribution, consumer electronics, and biomedical engineering. Positions can be found focusing on the research, design, and testing of new products; technical sales and marketing; business consulting; and even growing areas such as intellectual property.

The BSEE program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

- *Program Educational Objectives*: The program educational objectives (PEOs) of the BSEE degree program are to serve the needs of our students, faculty, and regional industry by producing graduates who have acquired foundational knowledge and skills through a comprehensive curriculum and immersive educational and developmental experience. After a few years following graduation, we expect our graduates to:
 - a. **Contribute**: To have successfully and smoothly transitioned into a contributing member of the professional workforce
 - b. **Master**: To have developed the skills, habits, and professional expertise which will carry them through their life and career
 - c. **Evolve**: To rapidly grow and adapt to their fast changing world
 - d. **Innovate**: To embrace change, challenge, growth, inquiry, creativity, and diversity
 - e. **Lead**: To rise to levels of leadership and impact in their chosen specialties
 - f. **Steward**: To responsibly apply their problem solving, critical thinking, communication, and management skills to the benefit of themselves, their communities, their region, and the world at large
- *Student Outcomes*: By graduation, we expect our graduates to have demonstrated abilities in:
 1. **Problems**: An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
 2. **Design**: An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
 3. **Communication**: An ability to communicate effectively with a range of audiences

4. **Responsibility:** An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
 5. **Teams:** An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
 6. **Experiment:** An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
 7. **Learning:** An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
- *Instructional and Research Facilities:* The department maintains a number of instructional and research laboratories to support courses and independent study activities. There are three general-purpose computing laboratories. Instructional laboratories include a large instrumentation laboratory supporting numerous electronics courses; individual laboratories for digital design courses; a power laboratory to support the power/energy systems classes; an RF laboratory to support electromagnetics and communication systems; and laboratories that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research laboratories of their supervising faculty member.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Many electrical engineering students participate every year in internship and co-op (cooperative education) programs. [The Engineering Career Center](#) is one source for companies recruiting for internship and co-op students. [The UW Career & Internship Centers](#) also lists a variety of internship opportunities.
 - *Department Scholarships:* Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may obtain information from the Department of Electrical Engineering Scholarship Award Committee Chair.
 - *Student Organizations/Associations:* [The Institute of Electrical and Electronics Engineers \(IEEE\)](#), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. [Eta Kappa Nu \(HKN\)](#) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

Graduate Program

Graduate Program Coordinator
 AE100R Paul Allen Center, Box 352500
 (206) 543-2142
grad@ee.washington.edu

The department offers Master of Science in Electrical Engineering (MSEE) and Doctor of Philosophy (PhD). Graduate courses and research programs are offered in biosystems, circuits and network theory, computational intelligence, computer networks and distributed systems, computer architecture, digital systems, software engineering, operating systems, microprocessors, VLSI design, control systems, electromagnetics (including optics and radio science), electronic materials (including devices and micro-electronics), energy systems (including power electronics and electric drives), signal and image

processing, telecommunications, and virtual reality. Numerous interdisciplinary research opportunities exist, including projects relating to bioengineering, computer engineering, and marine acoustics. The department does extensive research in coordination with the UW's Applied Physics laboratory and Washington Technology Center.

The MSEE degree may be earned in three ways, each requiring 45 credits. (1) perform research and write a thesis; (2) pursue a one-quarter project as part of the program; (3) accumulate a suitable distribution of 45 credits of coursework.

For the PhD degree, students pass the departmental qualifying examination, pass an advanced general examination, pursue an original research problem, and report the results of that research in a dissertation that must be a contribution to knowledge. At least one year of coursework beyond the MSEE degree is usually desirable.

Master of Science in Electrical Engineering

Admission Requirements

1. GRE
2. Formal application, statement of purpose, and minimum two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often pursue graduate study in electrical engineering following some additional preparation.

For more information, visit the department's website at www.ee.washington.edu/admissions/graduate/index.html.

Degree Requirements

Two pathways

1. *Thesis option*: Best for students who wish to pursue an in-depth research experience with intended preparation for pursuing a PhD
2. *Coursework option*: For students whose main goal is to work in industry immediately upon graduation.

Requirements for both options

1. Plan of study by completed second quarter of study
2. Minimum 45 credits
3. Full time registration (10 credits) each quarter (less in summer)
4. Maximum 3 credits E E 500. (1 credit required)
5. Maximum 5 credits E E 599
6. 1 credit of E E 592 (offered autumn quarter)

Thesis Option

1. E E 700 (9-12 credits)

2. E E courses numbered 500 and above (minimum 20 credits)
3. E E 400-level courses (maximum 12 credits)
4. Non E E courses (maximum 9 credits)

Students pursue an individual problem in depth. Typical problems involve basic research or application of classroom principles to a professional problem beyond the routine practice of electrical engineering.

Coursework Option

1. E E courses numbered 500 and above (minimum 25 credits)
2. E E 400-level courses (maximum 12 credits)
3. Non E E courses (maximum 9 credits)

Students take a prearranged course load specific to each of the seven curriculum areas. A generic coursework option is also available.

Doctor of Philosophy

Admission Requirements

1. GRE
2. Formal application, statement of purpose, and minimum two reference letters.

Most applicants have baccalaureate degrees in electrical engineering, although applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics may often pursue graduate study in electrical engineering following additional preparation.

For more information, visit the department's Website at www.ee.washington.edu/admissions/graduate/index.html.

Degree Requirements

Minimum 90 credits

1. Department qualifying examination
2. Individualized course of study approved by the student's PhD Supervisory Committee
3. General examination
4. Dissertation based on original research. EE 800 (30 credits)
5. Minimum 90 credits of coursework, independent study, and dissertation (60 of which must be completed through the UW), 18 of which must be graded credits
6. Minimum 3.00 cumulative GPA

Research Groups

Facilities include research laboratories for advanced digital systems, advanced power technology, applied electromagnetics, optics, remote sensing, applied signal and image processing, mechatronics and intelligent control, modern sensors, and semiconductor technology

Financial Aid

Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.

Human Centered Design and Engineering

Department Overview

423 Sieg

In the Department of Human Centered Design and Engineering (HCDE), students are designing the future by building innovative technologies and systems. Putting people first, HCDE students and faculty research, design, and engineer interactions between humans and technology. HCDE students and faculty focus on understanding human needs and interests as they design and build engineering solutions to the world's problems.

HCDE faculty are award-winning and interdisciplinary, with graduate degrees in fields such as computer science, information studies, industrial engineering, design, education, English, linguistics, public policy, and technology and society studies.

HCDE prepares students for leadership roles in user interface design, user experience research and design, human-computer interaction, information and communication systems, computer-supported cooperative work, and related specializations, all from a human-centered perspective, internationally and globally. Whatever their professional direction, classes, directed research groups, and capstone projects, students develop portfolio quality products. HCDE graduates obtain jobs, primarily in the high-tech industry (e.g., Microsoft, Intel, Amazon, Facebook, T-Mobile, Google, Boeing), researching and designing user interfaces, websites, and other form factors to improve the user experience.

HCDE emphasizes student-centered, hands-on learning. Beyond taking traditional classroom courses, students join research groups and work side-by-side with top-ranked professors and graduate students to enhance the knowledge base of this dynamic field. The educational mission is supported by up-to-date facilities.

HCDE prepares students to assume positions of intellectual leadership in industry, government, non-profit organizations, and academia, HCDE students learn the research skills appropriate to their interests, the most effective design strategies, and the most current technologies and practices. They also learn enduring theory and principles so they can dynamically respond to the evolving field of human centered design and engineering.

Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. Human centered design and engineering prepares students to design, create, edit, and evaluate technical and scientific discourse. The department provides coursework in the development of online help systems and in the design of general-audience content for delivery by means of advanced communication technologies such as the web.

The complexities of modern life have greatly increased the number of people who need to communicate about technical and other specialized topics. Scientific journal articles, manuals, proposals, and other genres are important for a vast array of readers. With the Information Age, gaining and sharing technological understanding and capability has become a crucial human activity. People communicate in more genres, address broader (often global) audiences, and face more complex rhetorical problems than ever before.

To achieve success in their communication activities, progressive organizations are employing sophisticated planning and development methods, including user-centered design and evaluation, content management, and systems-based analyses. In addition, they undertake research projects and apply existing research to their own needs. Contemporary research in technical communication ranges from controlled empirical research on the processing of text, graphics, and multimedia content to observational research on how meaning is created and negotiated in business environments and virtual communities.

Other major interests include the human-computer interface, hypermedia, communications technology, rhetoric of technical discourse, international communication, visual communication, publications and communications management, policy analysis of technological systems, and research and testing.

www.hcde.washington.edu

The Department of Human Centered Design and Engineering (HCDE) offers the following programs of study:

- Bachelor of Science in Human Centered Design and Engineering degree
- A minor in technical Japanese

Bachelor of Science in Human Centered Design and Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.

7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn and spring quarters. Application deadlines: April 5 for autumn quarter and January 15 for spring quarter.
2. Minimum course requirements for application: 10 credits from MATH 120, MATH 124, MATH 125, MATH 126; CSE 142 or CSE 160; one from STAT 220, STAT 221, STAT 311, IND E 315; three from CHEM 142, CHEM 152, CHEM 162, PHYS 114, PHYS 115, PHYS 116, PHYS 121, PHYS 122, PHYS 123, BIOL 118, BIOL 180, BIOL 200, PSYCH 202; 5 credits English composition; all courses completed prior to application deadline.
3. Grade requirements: minimum 2.50 cumulative GPA in courses required for application

Factors evaluated include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

180 credits

General Education Requirements (88 credits)

1. *Written and Oral Communication (8 credits)*: 5 credits English composition from the University list; HCDE 231. University-required additional 5 writing credits are built into the major core requirements
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (30 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 30 credits
3. *Natural World (50 credits)*:
 - a. *Mathematics* (minimum 15 credits; see list of qualifying courses on HCDE [website](#))
 - b. *Science* (minimum 15 credits; see list of qualifying courses on HCDE [website](#))

Major Requirements (82 credits)

1. *HCDE Core (41 credits)*: HCDE 300, HCDE 301, HCDE 308, HCDE 310, HCDE 313, HCDE 318, HCDE 321, HCDE 322, HCDE 492, HCDE 493
2. *Engineering Fundamentals(minimum 12 credits)*: either CSE 142 or CSE 160; see department website for approved list of additional courses
3. *Experiential Learning (4 credits)*: See department website for list of approved courses
4. *HCDE Electives (25 credits)*
 - a. Standard Option: See department for list of approved HCDE electives
 - b. *HCI (Human-Computer Interaction) Option*: HCDE 419, and one course from at least three of the four HCI course areas – user interface, software, and technology; design; usability, and user research; and social and ethical dimensions. See department website for approved area courses. Students take additional approved HCDE elective courses to reach the overall electives requirements.
 - c. *Data Science Option*: CSE 143, HCDE 411, CSE 491, and at least one in each of the three course areas: machine learning; data management; and statistics. See department website for approved area courses. Students take additional approved HCDE elective courses to reach the overall electives requirements. CSE 143 satisfies the Engineering Fundamentals requirement and is not included in the minimum credit requirement.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements: Technical Japanese: Minimum 25 credits to include HCDE 461, HCDE 462, HCDE 463, plus 10 credits from the approved list of elective courses. For more information, contact the departmental adviser.

Student Outcomes and Opportunities

- *Expected Outcomes*: HCDE BS graduates contribute to society by applying design and engineering processes to solve problems through a deep understanding of people and their contexts. In particular, they are leaders in:
 - Investigating people and systems, using quantitative and qualitative methods, to identify opportunities for new systems and strengths and weaknesses of existing systems.
 - Designing, building, and evaluating systems according to a variety of perspectives, with an emphasis on understanding the relationships between social and technical elements of systems.
 - Bringing ideas to actualization through expertise in design strategy and processes, effective communication and collaboration skills, and ethical perspectives.
 - Identifying and learning new skills, perspectives, and tools that help them and others accomplish their goals.

The Department of Human Centered Design and Engineering prepares students to assume positions in industry, government, and non-profit organizations and to apply to graduate programs.

- *Instructional and Research Facilities:* Department facilities include the HCDE Design Laboratory and Laboratory for Usability Testing and Evaluation (LUTE).
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* HCDE undergraduates are required to complete at least one 3-credit internship. The supervised internship must be approved by the faculty internship adviser. As an internship substitution, students may elect to take part in a six-month co-op, sponsored by the Engineering Co-op program. Additionally, undergraduates work in research groups with HCDE faculty and graduate students.
- *Department Scholarships:* HCDE selects one recipient of a College of Engineering Scholarship annually. The criteria for this scholarship are the applicant's academic history and likelihood for success in the technical communication field.
- *Student Organizations/Associations:* Students in the HCDE degree program participate in student activities such as the HCDE Student Association, the Minority Science and Engineering Program (MSEP), and Women in Science and Engineering (WISE).

Of Special Note: The HCDE department is an inclusive, interdisciplinary academic community. Students generally call their professors by their first name and have the opportunity to work individually on projects and research supervised by HCDE faculty. Undergraduate students are encouraged to work in research groups and to attend conferences and professional meetings.

Graduate Programs

Graduate Program Coordinator
1428 Sieg Hall, Box 352315
(206) 543-1798
hcde@uw.edu

Master of Science in Human Centered Design and Engineering

The department offers a Master of Science in Human Centered Design and Engineering (MS HCDE) - an engineering degree. An evening program is offered through UW Educational Outreach, serving full time and part time students.

Upon completion of the HCDE MS degree, students assume leadership roles in human-centered design and engineering in academia, industry, government, and non-profits. HCDE MS graduates are able to:

- Evaluate and understand human needs as a basis for designing and engineering new technologies.
- Master conceptual frameworks that motivate interdisciplinary research and design in HCDE.
- Select and critically evaluate user research methods for a variety of stakeholders and product contexts.
- Create visual, interactive, experience, and systems designs and prototypes.
- Translate organizational requirements into interface and product solutions, while accounting for all stakeholder perspectives and working ethically and collaboratively.
- Communicate effectively in oral, written, and visual forms, while scaling communications to audience needs and sociotechnical contexts.

Admission Requirements

Faculty consider the following:

1. Undergraduate GPA
2. Undergraduate degree program and work experience
3. TOEFL score (if applicable)
4. Letters of recommendation
5. Statement of goals and career objectives. A limited number of prerequisite undergraduate courses may be required.

Degree Requirements

48 credits

1. Core courses (22 credits): HCDE 501, HCDE 503, HCDE 517, HCDE 518, HCDE 521 (1 credit required, max. 2), HCDE 592, HCDE 593
2. Specialized content areas (minimum 12 credits): minimum 4 credits in each of the three areas: research, design, and engineering. Research courses: HCDE 502, HCDE 516, HCDE 519; design courses: HCDE 508, HCDE 511, HCDE 520, HCDE 536; engineering courses: HCDE 530, HCDE 532, HCDE 537, HCDE 539. Students are encouraged to gain depth in any or all of the three areas by taking additional courses beyond the minimum.
3. Additional coursework to complete at least 48 HCDE credits. May include credits from electives, directed research groups, and optional internships. Students select electives based on specific academic, research, and professional goals.

Students must complete the MS HCDE program within three years of admission; most finish in less than two years.

Certificate in User-Centered Design (UCD)

An evening, graduate-level, one-year, four-course program for students who wish to explore a wide range of UCD issues. Involves sophisticated methods for planning and developing intuitive, user-friendly product designs. Students study the latest user research and design theories and practices for placing user needs at the forefront of each stage of the design process.

Focuses on usability studies, user-centered design theory and practice, visual communication and information visualization, and web design.

12 of the 13 credits earned for the UCD certificate may later count toward the MS in Human Centered Design and Engineering if students apply for Graduate Non-Matriculated Status prior to taking coursework.

Certificate Requirements

1. HCDE 517 (autumn)
2. HCDE 518 (winter)
3. HCDE 521 (winter only)

4. One of the following electives: HCDE 508, HCDE 511, HCDE 536, HCDE 537 (optional prerequisite for HCDE 537 is HCDE 532)

Doctor of Philosophy

An engineering degree. The program provides experience for students interested in studying the conception, design, implementation, use, evaluation, and effects of technologies.

HCDE's interdisciplinary faculty hold graduate degrees from fields such as computer science, industrial engineering, information studies, design, education, English, linguistics, public policy, and technology and society studies. The faculty's research and teaching focus on six areas of study: influencing awareness, thinking, and behavior; design for emergent collaborations and organizations; low resource and underserved populations; material and embodied technologies, and ubiquitous computing; data visualization and big data; and learning in professional and technical environments.

Early in the program, students may explore different topics and research areas through directed research groups and other independent projects.

Goals

- Prepare graduates for a career as researchers, teachers, and intellectual leaders in the discipline of HCDE
- Enable graduates to develop theoretical frameworks, apply investigative methods, and translate theory and research findings into technical or strategic innovations in the field of HCDE
- Foster development and dissemination of new knowledge in HCDE
- Foster development of an international, multi-cultural perspective and a diverse, inclusive student body and workforce in HCDE

Admission Requirements

Completion of either an undergraduate degree or a master's degree in HCDE or a relevant field (up to 30 credits of master's work may apply toward the 105-credit requirement). Applicants often come from a wide range of backgrounds.

Applicants must submit the following:

1. UW HCDE PhD admission forms
2. Official transcripts of all academic study
3. Evidence of a minimum 3.00 GPA
4. Three letters of recommendation
5. Curriculum vitae
6. Personal statement of objectives and research area of interest.

International students also submit a TOEFL iBT test score of at least 106 (including a speaking sub-score of 26), obtained within the last two years.

Degree Requirements

105 credits

1. 34 core credits (HCDE 541, HCDE 542, HCDE 543, HCDE 544, HCDE 545, HCDE 546, HCDE 547, HCDE 548); 2 credits (one each for HCDE 521 and HCDE 523); 12 credits of directed research (HCDE 596); HCDE 521, HCDE 523; 30 credits of approved electives to include HCDE 518 and one additional graded, graduate-level course in each of four thematic areas; minimum 27 dissertation credits
2. Preliminary examination
3. Committee chair selected within two quarters of passing preliminary examination
4. Course distribution and credit-hour requirements
5. Directed research
6. General examination
7. Dissertation proposal
8. Dissertation

Students are encouraged but not required to teach.

Students often explore different topics and research areas through directed research groups and other independent projects. By the end of the quarter following passing the preliminary examination (usually the end of the fourth quarter), students choose a dissertation adviser and focus on a research area for the dissertation. Students are often supported by a research assistantship.

Students who enter the PhD program with a previous graduate degree relevant to HCDE can petition to have up to 30 credits transferred toward this program.

Research Facilities

The department has well-equipped laboratories that effectively support its courses and research projects. Also, HCDE graduate students can utilize significant College of Engineering and University-level research facilities.

Financial Aid

A limited number of teaching and research assistantships and scholarships are available.

Industrial and Systems Engineering

Department Overview

G-7 Mechanical Engineering Building

Industrial and systems engineering (ISE) prepares students for careers in an increasingly diverse, dynamic, and technological world. Industrial engineers focus on the integration of humans, machines, materials, and information to achieve optimum performance of operating systems. This focus on the "big picture" makes industrial and systems engineering one of the most people-oriented and customer-focused of the engineering disciplines.

Industrial and systems engineering involves the study of engineering design, system integration, optimization, quality and reliability, supply chain management, virtual reality, and manufacturing.

Being an industrial engineer is about choices. Industrial engineers have the opportunity to work in many different kinds of businesses and nonprofit organizations. The most distinctive aspect of industrial engineering is the flexibility it offers. Many industrial engineers eventually move into supervisory or management positions where they continue to draw on their technical background. Demand for industrial engineers has grown dramatically over the past two decades.

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering. Students requesting placement to Industrial Engineering must take AMATH 301, CSE 142, or CSE 160 from this list.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126; CHEM 142; PHYS 121, PHYS 122; A A 210; 5 credits English composition. All courses completed prior to application deadline. In addition, CHEM 152; PHYS 123; and CEE 220 or ME 230 completed with minimum 2.0 grades prior to autumn quarter
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade in each course required for application; minimum 2.50 cumulative GPA in courses required for application

Students are encouraged to complete MATH 307, MATH 308, and CSE 142 prior to autumn quarter.

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Graduation Requirements

180 credits as follows:

General Education Requirements (91 credits)

1. *Written and Oral Communications (12 credits)*: 5-credits English composition from the University-approved list; ENGR 231; University-required 4 additional writing credits met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (30 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 30 credits
3. *Natural World (49 credits)*
 - a. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; IND E 315
 - b. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (89 credits)

1. *Engineering Fundamentals (28 credits)*: CSE 142, MSE 170, A A 210, E E 215, CEE 220, M E 230, IND E 250
2. *Industrial Engineering Core (24 credits)*: IND E 316, IND E 337, IND E 410, IND E 411, IND E 494, IND E 495
3. *Technical Electives (37 credits)*: At least one class from approved courses in each of the following areas: operations research, statistics, production/operations, design, and general engineering. See adviser for list of approved technical electives.
4. *Grade Requirements*: Minimum 2.00 cumulative GPA in all engineering courses with no grade below 1.0 in these courses.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Industrial and systems engineering graduates are proficient in mathematics, sciences, engineering fundamentals, and the use of computers; use a broad knowledge of industrial engineering methods and tools associated with operations research, quality engineering, and human factors; apply engineering design methods and tools to represent, integrate, and solve problems, including the ability to recognize problem context and integrate knowledge and skills from allied disciplines; communicate effectively; and possess the professional characteristics of leadership, ethics, and the ability to motivate and work with others.

IE prepares students to serve as the efficiency experts of organizational change. Students are encouraged to take a systems view when solving problems, recognize the organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative. Industrial engineers draw upon specialized knowledge and skills in math, the physical sciences, and social sciences together with the principles and methods of engineering analysis and design.

- *Instructional and Research Facilities*: Industrial and systems engineering provides designated computing facilities for undergraduate students. Research facilities include the Human Interface Technology Laboratory, the Production Systems Laboratory, the Manufacturing Laboratory, and the Center for Engineering Learning and Teaching.

- Honors Options Available: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major).. See adviser for requirements.
- *Research, Internships, and Service Learning*: Students have the opportunity to pursue cooperative and internship programs at the College level through the College's Engineering Co-op Program (www.engr.washington.edu/coop/).
- *Department Scholarships*: ISE offers scholarships to outstanding undergraduate students. All applicants to the BSIE program are considered for these scholarships. Awards are made based on both merit and financial need.
- *Student Organizations/Associations*: Students are actively involved in the UW student chapter of the Institute of Industrial Engineers (IIE); the ISE National Honor Society, Alpha Pi Mu; and the IE Student Advisory Board.

Graduate Program

Graduate Program Coordinator
G7 Mechanical Engineering, Box 352650
(206) 543-5041
ieadvise@uw.edu

The department offers graduate programs leading to the Master of Science in Industrial Engineering (M.S.I.E.) and doctor of philosophy (Ph.D.). Graduate courses and research programs are offered in manufacturing, operations research, large-scale assembly, experimental statistics, production planning, quality control, reliability engineering, computer-integrated manufacturing, simulation, supply chain, human factors, virtual reality, and human interface technology.

Master of Science in Industrial Engineering

Admission Requirements

For consideration, applicants are expected to have a bachelor's degree in engineering, mathematics, or science, with a minimum 3.00 GPA.

Degree Requirements

41 credits

1. *Coursework Only Program*:
 - a. 21 graded credits in industrial engineering (500 level or above) courses
 - b. 17 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
 - c. 3 credits of industrial engineering seminar: IND E 591, IND E 592, IND E 593
2. *Thesis Program*:
 - a. 18 graded credits in industrial engineering (500 level or above) courses
 - b. 11 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
 - c. 9 credits of master's thesis (IND E 700)

- d. 3 credits of industrial engineering seminar: IND E 591, IND E 592, IND E 593

Doctor of Philosophy

Admission Requirements

Applicants should have, or be close to completing, a master's degree in any discipline of engineering with a minimum 3.00 GPA.

Degree Requirements

90 credits

1. 3 credits of industrial engineering graduate seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)
2. 60 credits of coursework, with at least 18 credit hours of 500-level courses. A master's degree from the UW or another institution may substitute for 30 of these 60 credits.
3. General examination
4. Dissertation: 27 credits of dissertation (IND E 800) over a period of at least three quarters.
5. Final examination

Materials Science and Engineering

Department Overview

302 Roberts

Materials science and engineering is an interdisciplinary field that addresses the structure, processing, and property relationships in materials for engineering applications. Basic principles of chemistry and physics are applied to provide an understanding of the structure of materials and the manner in which the structure determines the properties. Scientific processing methods are then applied to yield the necessary properties, which then can be integrated with, and designed to accommodate the needs of, modern technology.

Advances in materials enable technological progress in many fields. Historically, this connection between materials and technology has been so intimate that major periods in civilization have been named after the dominant material used in that era (e.g., Bronze Age, Iron Age). In the past few decades, at the core of the progress in such diverse fields as transportation, communication, electronics, energy and environment are significant advances in materials. Materials science and engineering is a broad and growing discipline.

Materials Science and Engineering at the University of Washington has recently experienced rapid expansion into new research areas, including polymers, hybrids, biomaterials, biomimetics, nanomaterials, photonic and magnetic materials. These areas have applications in current and emerging industries, and complement existing strength in ceramics, metals, electronic materials, and composites.

Undergraduate Program

Adviser

302A Roberts, Box 352120

mse@uw.edu

The Department of Materials Science and Engineering offers the following programs of study:

- The Bachelor of Science in Materials Science and Engineering degree
- The Bachelor of Science in Materials Science and Engineering degree with an option in nanoscience and molecular engineering
- A minor in materials science and engineering

Bachelor of Science in Materials Science and Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122; 5 credits English composition. All courses completed prior to application deadline. In addition, AMATH 301 or CSE 142; MATH 307; and MSE 170 completed with minimum 2.0 grades prior to autumn quarter
3. Grade requirements: Minimum 2.0 grade in each course required for application; minimum 2.50 cumulative GPA in courses required for application

Students are encouraged to complete A A 210, CEE 220, HCDE 231, MATH 308, and PHYS 123 prior to autumn quarter.

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Admission to the Nanoscience and Molecular Engineering Option (NME): Admission is by self-selection and normally occurs after completion of NME 220 and NME 221, completion of the major prerequisite courses, and formal admission to the MSE major. Transfer students should indicate an interest on their major application and discuss their interests/background in the application personal statement.

Graduation Requirements

Minimum 180 credits to include:

General Education Requirements (87-92 credits)

1. *Written and Oral Communications:* 8 credits, to include one 5-credit English composition course from the University list; ENGR 231. University-required 4 additional writing credits are met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (24 credits):* Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 24 credits
3. *Natural World (55-60 credits):*
 - a. *Mathematics (24-25 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; one from MATH 309, MATH 324, IND E 315, or MATH 390/STAT 390
 - b. *Science (31-35 credits):* CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; two additional natural science courses from the department's approved list

Major Requirements (93credits)

1. *Engineering Fundamentals (24 credits):* CSE 142 or AMATH 301, MSE 170, A A 210, CEE 220; 8 credits of additional engineering elective courses from the department's list of approved courses.
2. *Materials Science and Engineering Core (54 credits):* MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499 (4)
3. *Technical Electives (15 credits):* See department advising office for list of acceptable courses.
4. *Grade Requirement:* Minimum 2.00 departmental cumulative GPA

Major Requirements for Nanoscience and Molecular Engineering Option (97 credits)

1. *Engineering Fundamentals (24 credits):* CSE 142 or AMATH 301, MSE 170, A A 210, CEE 220; 8 credits of engineering elective courses from the department's list of approved courses.
2. *Materials Sciences and Engineering Core (54 credits):* MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499 (4). The senior project (MSE 499) must be in an NME area.
3. *Nanoscience and Molecular Engineering Courses (19 credits):* NME 220, NME 221, NME 321, NME 421; additional approved nanoscience and molecular engineering electives to reach 19 credits. See adviser for list of approved electives.
4. *Grade Requirements:* Minimum 2.00 departmental cumulative GPA

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy contact the department adviser or refer to the department website (<http://www.mse.washington.edu/current/undergrad/continuation>)

Minor

Minor Requirements: 30 credits as follows: MSE 170, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362. Minimum 2.0 grade of 2.0 required for each course.

The following courses serve as prerequisites for the departmental courses in the minor: MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 or MATH 318; CHEM 142 or CHEM 145, CHEM 152 or CHEM 155; PHYS 121, PHYS 122, PHYS 123; MSE 170; English composition. Students should take these courses before beginning the minor program.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*

Undergraduate students are offered both broad core and in-depth courses. The broad core provides the needed background and understanding of all types of engineering materials, including metals, ceramics, polymers, electronic materials, and composites. The curriculum provides an opportunity to use basic knowledge in science and engineering fundamentals to synthesize and design materials for engineering applications. The undergraduate curriculum emphasizes hands-on experience, oral and written communication, and teamwork, and encourages participation in research. Graduates with a degree in materials science and engineering find employment in a broad range of industries including aerospace, biomedical, electronic manufacturing, materials processing, and transportation.

The Bachelor of Science in Materials Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

- a. An ability to apply knowledge of mathematics, science and engineering
- b. An ability to design and conduct experiments, as well as to analyze and interpret data
- c. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
- d. An ability to function on multi-disciplinary teams
- e. An ability to identify, formulate and solve engineering problems
- f. An understanding of professional and ethical responsibilities
- g. An ability to communicate effectively
- h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- i. A recognition of the need for, and an ability to engage in life-long learning
- j. Knowledge of contemporary issues

- k. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice
 - l. An ability to apply advanced science (such as chemistry and physics) and engineering principles to ceramics, metals, polymers and composite materials systems
 - m. An integrated understanding of the scientific and engineering principles underlying the four major elements of the field: structure, properties, processing and performance related to material systems
 - n. An ability to apply and integrate knowledge from each of the four major elements of the field to solve materials selection and design problems
 - o. An ability to utilize experimental, statistical and computational methods consistent with the goals of the program
 - p. Experience in laboratory work and in research and/or design problem solving
 - q. Preparation, as appropriate to the student and the area of interest, to enter graduate degree programs.
- *Instructional and Research Facilities:* Facilities include equipment for electron and optical microscopy, x-ray diffraction, high-temperature heat treatment and mechanical testing, specialized processing equipment, including hot and cold isostatic presses, nitrogen reaction furnaces, and automated TGA, DTA analysis systems. Equipment for analyses of particle size, surface areas, and pore size is also available. Students have liberal access to University computing facilities.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Materials Science and Engineering students interested in paid internship experiences should contact the Engineering Co-op and Internship Program, 301 Loew Hall, Box 352180, (206) 543-8711, coop@enr.washington.edu.
 - *Department Scholarships:* In addition to need-based aid provided through the University's Office of Student Financial Aid, companies and individuals with interest in developing materials science and engineering students have provided scholarships for students admitted to the program. Specific information and application forms are available from the academic counselor in 302 Roberts.
 - *Student Organizations/Associations:* Keramos (materials honor society); American Ceramic Society (ACerS); ASM/TMS (the joint student chapter of ASM International and TMS); Society for the Advancement of Materials and Process Engineering (SAMPE).

Of Special Note:

Combined BS/MS Degree Program

Students earn both the BS and MS degrees in five years. This program, available to students after they are admitted to the department, is described below.

Graduate Program

Graduate Program Adviser
302 Roberts, Box 352120
(206) 543-2600

The department offers programs of study leading to the Master of Science in Materials Science and Engineering (MS) and the doctor of philosophy (PhD) in both materials science and engineering or materials science and engineering/nanotechnology.

The primary goals of the master's and doctoral programs are to prepare students for industrial employment and research/development careers and to generate new knowledge. Specific objectives are as follows:

- Deepen knowledge and capabilities broadly and in a chosen specialty area.
- Master and develop state-of-the-art research techniques appropriate to specialty.
- Contribute new knowledge of lasting value to the field by creative and independent research.
- Broaden candidate's knowledge of field and societal issues.
- Learn to work effectively with colleagues and contribute to professional community.

Combined Bachelor of Science/Master of Science

Admission Requirements

Students may apply to enter the combined BS/MS program any time after being accepted into the MSE department as an undergraduate major. Requirements include:

1. Overall minimum 3.00 GPA in the last 90 credits before application
2. Minimum 15 credits of MSE courses completed with a minimum 3.40 GPA
3. Statement of interest in and goals for the MS degree
4. Approval by faculty adviser

Students accepted into the combined BS/MS program must also submit a Graduate School application for formal admission.

Degree Requirements

36 credits as follows:

Students combine their BS senior project requirement with the MS thesis and begin research starting summer or autumn quarter of their senior year. Thesis and non-thesis options are available to earn the MS degree.

1. Core courses (9 credits): MSE 510, MSE 525, MSE 541
2. Elective courses (9 credits): MSE 500 level, or approved related courses
3. Seminar (3 credits): MSE 520
4. Research (9 credits): thesis (MSE 700); or non-thesis (MSE 600)

5. Additional coursework or research (6 credits)

Master of Science (Applied Program)

Admission Requirements

1. Minimum 3.00 undergraduate GPA in the last 90 graded quarter hours or the last 60 graded semester hours.
2. GRE general test
3. Background in engineering and the physical sciences.
4. Program prerequisites which may be satisfied after entry:
 - a. Fundamentals of materials science and engineering equivalent to MSE 170
 - b. Crystallography equivalent to MSE 331
 - c. Materials properties equivalent to MSE 351 and MSE 362
 - d. Kinetics equivalent to MSE 322
 - e. Thermodynamics equivalent to the level of MSE 421

Degree Requirements

36 credits, as follows:

1. Required core courses (9 credits): MSE 570, MSE 525, MSE 541
2. Elective courses (9 credits): MSE 500 level, or approved related courses
3. Seminar (3 credits): MSE 520
4. Non thesis (MSE 600) or thesis (MSE 700) (9 credits)
5. Additional coursework or research (6 credits)

Doctor of Philosophy

Admission Requirements

1. Minimum 3.00 GPA in the most recent 90 graded quarter hours (60 graded semester hours).
2. GRE general test

Prerequisite Knowledge:

1. Fundamentals of materials science and engineering equivalent to MSE 170
2. Crystallography equivalent to MSE 331
3. Materials properties equivalent to MSE 362 and MSE 351
4. Kinetics equivalent to MSE 322
5. Thermodynamics equivalent to MSE 421 (for students who do not have two undergraduate thermodynamics courses).

Degree Requirements

Minimum 90 credits

1. Core courses (9 credits): MSE 510, MSE 525, MSE 541
2. Elective credits (9 credits): MSE 500 level, or approved related courses
3. MSE 520 (6 credits)
4. General examination
5. MSE 800 (36 credits)
6. Dissertation (30 credits)
7. Final examination

Financial Support

Doctoral students are eligible for a variety of competitive financial awards while they pursue their MSE degrees. Awards include teaching and research assistantships and a broad spectrum of internal and external fellowships. Almost all doctoral students receive some financial support. Further details are on the departmental website and in the Graduate Student Handbook.

Mechanical Engineering

Department Overview

143 Mechanical Engineering Building

Mechanical engineering is one of the broadest and oldest of the engineering disciplines and therefore provides some of the strongest interdisciplinary opportunities in the engineering profession. Power utilization (and power generation) is often used to describe the focus of mechanical engineering. Within this focus are such diverse topics as thermodynamics, heat transfer, fluid mechanics, machine design, mechanics of materials, manufacturing, stress analysis, system dynamics, numerical modeling, vibrations, turbomachinery, combustion, heating, ventilating, and air conditioning. Degrees in mechanical engineering open doors to careers not only in the engineering profession but also in business, law, medicine, finance, and other non-technical professions.

Undergraduate Program

Adviser

143 Mechanical Engineering Bldg., Box 352600

(206) 543-5090

meadvise@uw.edu

The Department of Mechanical Engineering offers the following program of study:

- The Bachelor of Science in Mechanical Engineering (BSME) degree
- The Bachelor of Science in Mechanical Engineering (BSME) degree with an option in mechatronics
- The Bachelor of Science in Mechanical Engineering (BSME) degree with an option in nanoscience and molecular engineering

Bachelor of Science in Mechanical Engineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity constrained.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements: MATH 124, MATH 125, MATH 126; CHEM 142; PHYS 121, PHYS 122; A A 210; 5 credits English composition. All courses completed prior to application deadline. In addition, CHEM 152, CEE 220, and ME 230 completed with minimum 2.0 grades prior to autumn quarter
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade in each course required for application; minimum 2.50 cumulative GPA in courses required for application

Students are encouraged to complete MATH 307, MATH 308, PHYS 123, and ME 123 prior to autumn quarter.

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Nanoscience and Molecular Engineering Option (NME)

Admission is by self-selection and normally occurs upon completion of NME 220, all mechanical engineering prerequisites, and formal admission to the mechanical engineering major. A small number of advanced students (either UW or transfer) may be admitted. Admission is based on academic record including grades in NME 220, mechanical engineering courses taken, and prior experience/work in the field of nanoscience or molecular engineering. Students indicate an interest on their application and discuss their interests and background in the essay.

Graduation Requirements

180 credits

General Education Requirements (85 credits)

1. *Written and Oral Communication*: 12 credits, to include one 5-credit English composition course from the University list; HCDE 333 (or department-approved alternative).
2. *Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Diversity (DIV) (24 credits)*: Minimum 10 credits in VLPA, minimum 10 credits in I&S, minimum 3 credits in DIV (can overlap with VLPA and I&S courses), plus additional credits in either VLPA or I&S to bring total to 24 credits
3. *Natural World (49 credits)*:
 - a. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), MATH 309 (or AMATH 353 or MATH 324)
 - b. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (95-102 credits)

1. *Engineering Fundamentals (31 credits)*: A A 210; AMATH 301; CEE 220; E E 215; IND E 315 (or MATH 390/STAT 390); M E 123; M E 230; MSE 170
2. *Mechanical Engineering Core Courses (45 credits)*: M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 395, M E 495
3. *Mechanical Engineering Option Courses (19-26 credits)*
 - a. Standard Option (19 credits): See department for approved list of engineering electives.
 - b. Mechatronics Option (19-21 credits): ME 471, M E 473, M E 477, M E 494; two of M E 469, M E 470, M E 478, M E 480, PHYS 334, PHYS 335
 - c. Nanoscience and Molecular Engineering Option (26 credits): NME 221, NME 321, and NME 421; M E 410, M E 411; 13 credits of approved nanoscience and molecular engineering electives. See department for approved list.
 - d. Biomechanics Option (19 credits): ME 411 and ME 419; 6+ credits of biomechanics electives and remaining credits of supporting electives. See department for approved lists.
4. Minimum 2.00 cumulative GPA

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 1. *Success in the Profession*. The department's goal is success for its graduates in industry, research, and academic careers by virtue of skills and attributes learned in the program. Graduates succeed in their professional and academic positions by:
 - a. using fundamental science and analysis to solve engineering problems,
 - b. successfully executing engineering designs, and
 - c. performing effectively in design teams, in the use of management tools, and through effective oral, written, and graphical communication.
 2. *Contribution to Society*. Graduates should be critical thinkers in the tradition of the broad liberal arts education. They succeed in this goal by being able to:

- a. think critically, in the sense of broadly educated individuals (i.e., be informed evaluators/consumers of information),
- b. perform independent, informed analysis on issues inside and outside of technology, and
- c. continue lifelong learning.

The BSME program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

- a. An ability to apply knowledge of mathematics, science, and engineering
- b. An ability to design and conduct experiments, as well as to analyze and interpret data
- c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- d. An ability to function on multi-disciplinary teams
- e. An ability to identify, formulate, and solve engineering problems
- f. An understanding of professional and ethical responsibilities
- g. An ability to communicate effectively
- h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- i. A recognition of the need for, and an ability to engage in, life-long learning
- j. Knowledge of contemporary issues
- k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Each student's success is measured by demonstration of the following learning outcomes:

- 12. Ability to apply this knowledge to the formulation and solution of mechanical engineering problems
- 13. Ability to design thermal and mechanical components to achieve a desired goal. Ability to develop, conduct, and analyze experiments or tests that may aid in this design process.
- 14. An understanding of the necessary professional abilities of a practicing engineer including ethical conduct, teamwork in the pursuit of a goal, and effective communication
- 15. Ability to conduct computer-based design and analysis in engineering applications
- 16. Exposure to a general education program that aids in the understanding of and increases the appreciation for the "non-technical" world
- 17. Realization of the business environment in which engineering is practiced.
- 18. Awareness and necessity of continuing education, graduate study, and other lifelong learning experiences
- 19. Interest groups within the faculty provide instruction in four areas: design; energy and fluids; mechanics, materials and manufacturing; and systems and dynamics. Departmental thrust areas for graduate and undergraduate research include: environment; healthcare; information technology; and manufacturing. Several on-going senior capstone design projects provide both undergraduate and graduate students with

hands-on, interdisciplinary, team-driven opportunities that encompass such diverse topics as Formula SAE car; human-powered submarine, mechatronics, and fuel cell technology.

- *Instructional and Research Facilities:* The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department participates in [the College of Engineering Co-op Program](#). [The Center for Career Services](#) also lists internship opportunities.
- *Department Scholarships:* The department offers approximately forty scholarships each year. Scholarship applications are available on the College of Engineering website. The deadline for scholarship applications is April 1. Sophomores may apply for scholarship consideration before being admitted to the department.
- *Student Organizations/Associations:*
 - American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE)
 - American Society of Mechanical Engineers (ASME)
 - Pi Tau Sigma - Mechanical Engineering Honor Society (PTS)
 - Society of Automotive Engineers (SAE)
 - Society of Manufacturing Engineers (SME)

Graduate Program

Graduate Program Coordinator
143 Mechanical Engineering Bldg, Box 352600
(206) 543-5090
megrad@uw.edu

The department offers graduate programs leading to the degrees of Master of Science in Mechanical Engineering (MSME) and doctor of philosophy (PhD). The department also provides authorized options leading to the College-wide Master of Science in Engineering (MSE) degree. These degrees provide balanced combinations of formal instruction and independent research or design experience. Although there are thesis and non-thesis options for the MSME, completion of a thesis is highly recommended.

Individual projects may be drawn from a wide spectrum of topics, which include mechanical and energy conservation systems, heat transfer, combustion, fluid mechanics, applied mechanics, computational mechanics, computer-aided design and manufacturing, production systems, materials behavior, robotics, controls, vibrations, and applications of mechanical engineering science to a variety of such

interdisciplinary fields as bioengineering, ocean engineering, environmental engineering, nanotechnology, micro electro-mechanical systems, and acoustics. Flexible requirements for coursework provide opportunities both for a broad scientific and professional background and for specialty training.

Master of Science in Mechanical Engineering

Admission Requirements

1. Minimum 3.00 GPA for the most recent 90 quarter hours or 60 semester hours of graded undergraduate coursework guarantees consideration, but the department prefers a minimum overall 3.20 undergraduate GPA.
2. Quality and difficulty of courses taken and universities and colleges attended.
3. *GRE General Test*: Minimum GRE scores of 450 Verbal (350 if English is not a native language), 650 Quantitative, and 4.0 Analytical Writing
4. Three letters of recommendation
5. Statement of purpose
6. Official transcripts from all colleges/universities attended
7. Professional experience, if applicable
8. *English requirements for foreign nationals*: TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper examination and 237 for the computer-based examination

Degree Requirements

42 credits

1. Thesis-option students register for 12 credits of thesis research and 30 credits of related numerically graded coursework. Non-thesis option students take all 42 credits in numerically graded courses.
2. Course grades 2.7 or above.
3. Minimum 12 credits for the thesis option and 18 credits for the non-thesis option taken in 500-level mechanical engineering courses, including 6 credits of mathematical and engineering analysis requirements: M E 564 and M E 565.
4. Minimum 3 credits of computational or numerical analysis taken from the following list (or from an approved plan of individual study): M E 535, A A 543, A A 540, CEE 504, E E 578, AMATH 581, and AMATH 584.
5. Remaining credits (18 for thesis-option and 24 for non-thesis option) may be from other departments, and may include a maximum of 9 credits (12 credits for non-thesis) at the 400-course level (excluding M E 498 and M E 499).
6. Non-thesis option students may substitute up to 6 credits of M E 599 Special Projects (not to be confused with the class M E 599) for 6 credits of classroom courses. Must be taken for a numerical grade.

For thesis-option students, special projects courses such as M E 599 and M E 600 do not count toward the 42-credit total unless the project is recommended by the student's faculty supervisor. Seminar requirement: Full-time students register for a seminar course every quarter while in the master's program, but seminars do not count toward the 42 credits of numerically graded coursework and thesis research.

Doctor of Philosophy

Admission Requirements

1. Minimum 3.00 GPA for the most recent 90 quarter hours or 60 semester hours of graded undergraduate coursework guarantees consideration, but the department prefers an overall 3.20 minimum undergraduate GPA and a minimum 3.50 MS GPA.
2. Quality and difficulty of courses taken and universities and colleges attended
3. *GRE General Test*: Minimum GRE scores: 450 Verbal (350 if English is not a native language), 650 Quantitative, and 4.0 Analytical Writing.
4. Three letters of recommendation
5. Statement of purpose
6. Official transcripts from all colleges/universities attended
7. Professional experience, if applicable
8. *English requirements for foreign nationals*: TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper exam and 237 for the computer-based exam

Degree Requirements

90 credits

1. *Advisory Committee*: During the first year of post-master's study, the student selects a two- to three-person advisory committee from the Mechanical Engineering Department.
2. *Coursework*: Post-master students complete two to three graduate courses per quarter their first year. Normally includes a sequence in advanced applied mathematics.
3. *Seminar Requirement*: Mechanical engineering (M E 520) autumn quarter of matriculation year. Otherwise, students may register for engineering seminar courses such as M E 518, M E 523, M E 591, AMATH 501, IND E 591, IND E 592, IND E 593, MSE 520. Seminar is taken quarterly throughout the entire PhD program.
4. *Research*: Post-master students conduct initial research their first year of study, even if the student holds a teaching assistantship.
5. *Qualifying Examination*: Taken within one calendar year after entry into the program.
6. *Supervisory Committee*: At least three members must be Mechanical Engineering faculty, two of whom must be core Mechanical Engineering faculty. Replaces the first-year advisory committee.
7. *Dissertation Proposal*: Approved by the committee chair before the general examination.
8. *Dissertation Research*: Minimum 27 credits of dissertation research over a period of at least three quarters – at least two quarters after the general examination.
9. *Reading Committee*: Three members from the Supervisory Committee; must include at least two core Mechanical Engineering faculty.
10. *Final Examination*
11. *Dissertation Defense*

Research Facilities

The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental

stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. See department website to view faculty research areas.

Financial Aid

Offered to full-time graduate students as funds permit. Funds, however, are limited and the assignment of assistantships and fellowships is highly competitive. Aid may be in the form of a research assistantship for sponsored programs, a fellowship provided by the University or industry, or a teaching assistantship.

College of the Environment

College Overview

Dean

Lisa Graumlich
209 Ocean Sciences

Associate Deans

Bruce Nelson, Research
Julia Parrish, Academic Affairs and Diversity

Rapidly changing interactions between the Earth's environment and human activities drive the research and teaching at the College of the Environment. By connecting some of the world's leading educators and researchers with students, practitioners, and citizens, the College cultivates communities that work with and learn from each other as they tackle the environmental challenges of the twenty-first century.

For decades the UW has been recognized as home to one of the strongest constellations of environmental and intellectual talent in the world. In fulfillment of a vision for a bold, resourced, enduring, and effective environmental hub, the UW launched the College of the Environment in July 2009. The College fosters existing and new collaborations between faculty, staff, and students who are engaged in the study of the Earth's dynamic land, water, and atmosphere systems; the development and application of engineering and technological advances; and the impact of policy and human dimensions on the environment and the management of natural resources.

Offering more than 20 degree programs, ranging from bachelor to doctoral, and granting more than 450 degrees annually, the College is comprised of the following core units:

- School of Aquatic and Fishery Sciences
- Department of Atmospheric Sciences
- Department of Earth and Space Sciences
- Program on the Environment
- School of Environmental and Forest Sciences
- School of Marine and Environmental Affairs
- School of Oceanography
- Friday Harbor Laboratories
- Joint Institute for the Study of the Atmosphere and Ocean
- Washington NASA Space Grant Consortium
- Washington Sea Grant Program

College Facilities

The College of the Environment main office is in the Ocean Sciences Building, Suite 200, located at 1492 NE Boat Street. For locations of all College of the Environment buildings, see the [Academics-at-a-Glance](#) page for links to campus maps showing the College's school and departmental buildings.

The College's facilities and field stations include the following, among others: Center for Sustainable Forestry at Pack Forest, Friday Harbor Laboratories, Pacific Northwest Seismic Network, Research Vessel Thomas G. Thompson, and Wind River Crane Canopy Research Center.

Undergraduate Program

The College of the Environment offers the following undergraduate degree options:

Bachelor Degree Programs

Bachelor of Science:

- Aquatic and Fishery Sciences
- Atmospheric Sciences
- Bioresource Science and Engineering
- Earth and Space Sciences (degree options areas: biology, environmental, geology, and physics)
- Environmental Science and Resource Management (degree option areas: landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation)
- Marine Biology
- Oceanography

Bachelor of Arts:

- Environmental Studies

Minors

- Aquatic and Fishery Sciences
- Arctic Studies
- Atmospheric Sciences
- Climate Science
- Earth and Space Sciences
- Environmental Science and Resource Management
- Environmental Studies
- Oceanography
- Restoration Ecology

Admission

The College does not have admission requirements beyond those required for admission to the University of Washington. Most of the majors within the College are open admission and can be declared at any time by students in good academic standing, except for the major in Bioresource Science and Engineering within the School of Environmental and Forest Sciences, which has a competitive admission process.

General Education Requirements

Minimum 85 credits as follows:

- *Written & Oral Communication*: One 5-credit English composition (C) course from the approved University list with a minimum 2.0 grade; 10 additional writing credits.
- *Quantitative & Symbolic Reasoning (QSR)*: 10 credits. See departmental lists for specific quantitative and symbolic reasoning requirements.
- *Areas of Knowledge*
 - *Visual, Literary, & Performing Arts*: 10 credits. Includes courses such as literature, art, music, and drama which stress the essential qualities of individual forms of expression. First- and second-quarter language courses may not be counted toward the VLPA requirement. (May substitute first-year language courses for VLPA requirements by completing a third quarter of a three-course sequence. Language courses at the second-year level and beyond may be counted toward the VLPA requirement.)
 - *Individuals & Societies (I&S)*: 20 credits, with at least 10 credits out of major*. Includes courses in subjects such as history, economics, psychology, and sociology which stress the social nature of mankind, and the development and analysis of societies and social institutions.
 - *Natural World (NW)*: 20 credits, with at least 10 credits out of major*. See departmental list for specific Natural World requirements.
 - *Additional Areas of Knowledge*: 10 credits

* Definition of "out of major": Course must have an out-of-major prefix and may not overlap with courses required for the major. This includes cross-listed courses.

Graduate Program

The College of the Environment offers the following graduate degree options:

- **Master's Degree Programs**
 - Master of Science:
 - Aquatic and Fishery Sciences
 - Atmospheric Sciences
 - Earth and Space Sciences
 - Forest Resources
 - Oceanography
 - Science for Teachers
 - Other Master's Degrees:
 - Master of Environmental Horticulture
 - Master of Forest Resources
 - Master of Marine Affairs
 - **Doctoral Degree Programs**
 - Doctor of Philosophy:
 - Aquatic and Fishery Sciences

- Atmospheric Sciences
 - Earth and Space Sciences
 - Forest Resources
 - Geologic Sciences
 - Geophysics
 - Oceanography
- **Graduate Certificate Programs**
 - Astrobiology
 - Climate Sciences
 - Environmental Management

Science for Teachers Program Overview

The Master of Science in Science for Teachers (MSST) is a graduate degree in science developed specifically for teachers and administered by the College of the Environment. Because science is moving at ever-increasing speeds, with new breakthroughs, innovations and technologies, keeping pace requires science educators to engage in hands-on, high-level, real-life science. The MSST program has three core components: practicing science through an independently-designed research project, deepened disciplinary content knowledge, and the development of an interdisciplinary skill set. These components work together to give teachers the opportunity to experience directly how the three dimensions of the Next Generation Science Standards (cross-cutting concepts, science and engineering practices, core disciplinary ideas) are integrated and realized in cutting-edge contemporary science.

(206) 221-4879, (206) 543-4558

uwsst@uw.edu

<http://coenv.washington.edu/students/graduate-students/prospective-students/degree-programs-advisers/master-of-science-for-teachers/>

Master of Science (Science for Teachers)

The College of the Environment offers the Master of Science in Science for Teachers (MSST), a graduate degree in science developed specifically for teachers. The MSST program provides a unique opportunity to conduct scientific research with world-renowned UW faculty and research professionals as a mechanism to strengthen and broaden content knowledge and scientific skill sets. This degree is designed to:

- Move science teachers through the skills that are fundamental to today's scientific practice – experimental design, data manipulation, data visualization, and science communication
- Create a flexible and personally-tailored elective set within the student's discipline of choice
- Culminate in the design and implementation of an individualized and independent scientific research project

The flexible course structure is especially designed to fit the needs of K-12 teachers. Course work can be taken throughout the UW, and faculty research mentors range across Colleges of the Environment, Arts and Sciences, Public Health, and Medicine. MSST is intended to be completed in two years and may be compatible with part-time work or teaching. Students may take additional time to complete their degree if needed.

The Master of Science in Science for Teachers does not lead to teacher certification.

Admission Requirements

Admission to the Master of Science (Science for Teachers) degree program is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general test scores, three letters of recommendation, official academic transcripts, minimum GPA of 3.0 required for last two years of study, a bachelor's degree in a science field (or demonstrated equivalency), and experience working in an educational setting. Applicants must apply directly to, and be accepted by, the University's Graduate School. Applications are accepted for Autumn Quarter only.

Degree Requirements

36 total credits as follows:

1. 18 credits at the 500-level or higher
2. Minimum 2.7 grade in 18 credits at the 400-level or higher
3. Minimum 3.00 GPA
4. Core courses based on shared skills sets, with a secondary focus on developing student cohorts:
 - SCI T 501; SCI T 502; SCI T 503; SCI T 600 (9-10 credits)
5. Statistics course (5 credits) at the 300-500 level
6. An elective pathway that the student and Graduate Program Coordinator develop based on the disciplinary needs of the student.

Financial Aid

The Master of Science (Science for Teachers) program does not provide funding to students. Applicants in need of support are encouraged to contact the UW Office of Student Financial Aid to explore options for grants, loans, scholarships, and work-study; to apply for College of the Environment Scholarships; and to investigate outside sources of funding.

Aquatic and Fishery Sciences

School Overview

116 Fishery Sciences

The School of Aquatic and Fishery Sciences (SAFS) encompasses multi-disciplinary programs at the interface between the traditional fields of natural history, environmental biology, and natural resource management. Primary foci are the management of sustainable fisheries of commercially important species; biocomplexity and ecosystem-based management; and sustainable aquaculture. In addition, human-induced effects on natural ecosystems (including habitat change and restoration, impacts of climate change, emerging diseases, the effects of invasive species, and processes affecting endangered species and declining populations) are major areas of research. In pursuit of these objectives, a variety of basic sciences are used, including ecology and evolution, population biology, behavior, physiology, microbiology, and genetics. The scope of aquatic systems ranges from watersheds, rivers and lakes, to estuarine and near-shore shelf, open ocean systems and culture facilities. Graduates of the School of Aquatic and Fishery Sciences are uniquely qualified for careers in universities as well as other educational settings, natural resources management agencies at the local to international levels, environmental consulting, and non-profit organizations with an environmental focus.

Undergraduate Program

Adviser

116 Fishery Sciences, Box 355020
(206) 543-7457

safsadv@uw.edu

The School of Aquatic and Fishery Sciences (SAFS) offers the following programs of study:

- The Bachelor of Science, with a major in aquatic and fishery sciences
- A minor in aquatic and fishery sciences
- An interdisciplinary minor in marine biology
- An interdisciplinary minor in quantitative science

The school's undergraduate program has been substantially modified in recent years to reflect student and faculty interests in ecology and conservation biology, as well as more traditional fields such as stock assessment and fishery management. Faculty dedication to teaching, substantial benefit gained in close faculty contact within a relatively small program, and significant experiential training and research have made SAFS an appealing major that has doubled in recent years. The bachelor of science degree provides an underpinning in sciences such as biology, chemistry, and mathematics/statistics, then adds a core curriculum within aquatic sciences. Students study within areas of individual interest, grouped in three primary areas: aquatic ecology, conservation and management of aquatic resources, and biology and culture of aquatic animals.

Bachelor of Science

Suggested First- and Second-Year College Courses: Recommended courses for first year students: English composition; calculus; CHEM 120 or CHEM 142, and CHEM 220; BIOL 180; and FISH 250

and/or FISH 101. Recommended courses for second year students: BIOL 200 and BIOL 220; Q SCI 381; FISH 310 and/or FISH 311; and any additional courses that meet the College general education requirements. Students should start FISH core courses as soon as they meet the appropriate prerequisites.

Department Admission Requirements

Students in good academic standing may declare this major at any time, including on their application for admission to the UW. After notification of admission and before registration, new students should visit or email the Student Services Office for help in planning their programs.

Graduation Requirements

180 credits

General Education Requirements

All majors must satisfy the College of the Environment general education requirements.

Major Requirements

1. *Foundation Courses (50-55 credits)*
 - a. *Mathematics (15 credits)*: either MATH 124 and MATH 125, or Q SCI 291 and Q SCI 292; Q SCI 381
 - b. *Chemistry (9-10 credits)*: either CHEM 120 or CHEM 142; either CHEM 152, CHEM 220, CHEM 223, or OCEAN 295
 - c. *Biology (15 credits)*: BIOL 180, BIOL 200; either BIOL 220 or FISH 270/OCEAN 270/MARBIO 270
 - d. *Physics (4-5 credits)*: either PHYS 114 or PHYS 121
 - e. *Two of the following (7-10 credits)*: either PHYS 115 or PHYS 122; either PHYS 116 or PHYS 123; OCEAN 210; GEOG 205; ATM S 211; OCEAN 230/ESS 230; OCEAN 285; FISH 330/ENVIR 330; ENVIR 313/ESS 315. See adviser for other acceptable courses in this category.
2. *Core (minimum 29 credits)*
 - a. FISH 290; FISH 300/OCEAN 300/MARBIO 300; FISH 310; FISH 311/BIOL 311
 - b. Minimum 15 credits from three of the following: FISH 312, FISH 323, FISH 324, and FISH 340/BIOL 340
3. *Electives (minimum 16 credits, four courses)*: 400-level courses from within the School of Aquatic and Fishery Sciences for the major, excluding FISH 453/OCEAN 453, and FISH 477/BIOL 477/OCEAN 477
 - a. Maximum 3 credits total from FISH 479/BIOL 479/OCEAN 479, FISH 492/FHL 492/MARBIO 492, FISH 498, FISH 499
 - b. Maximum 5 credits from each of FISH 489 and FISH 491
4. *Capstone (7-13 credits)*: FISH 493, FISH 494, FISH 495
5. Minimum 2.00 cumulative GPA in all core, elective, and capstone courses applied to the major.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minor

Aquatic and Fishery Sciences

Minor Requirements: Minimum 28 credits to include three courses (two of which must be at least at the 300 level) from FISH 101, FISH 250, FISH 310, FISH 311, FISH 312, FISH 323, and FISH 324; Q SCI 381 or Q SCI 482; minimum two upper-division FISH courses totaling at least 8 credits. Maximum 11 credits may overlap with a student's major.

Marine Biology

The minor in marine biology is sponsored jointly by the School of Aquatic and Fishery Sciences, the School of Oceanography, and the College of Arts and Sciences, and is designed to immerse students in the study of marine organisms and ecosystems, starting in the freshman year. Because the experience of marine sciences cannot be taught entirely within the classroom, the minor is structured to provide ample opportunity for fieldwork and research within the coursework. A description of the minor can be found [under the Interdisciplinary Undergraduate Program](#) section of the catalog.

Quantitative Science

Students interested in quantitative skills applied to biological and ecological fields should consider minoring in quantitative science, an interdisciplinary minor supported by the School of Aquatic and Fishery Sciences and the School of Environmental and Forest Sciences. More information may be found on the [Center for Quantitative Science website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Aquatic and fishery sciences is a life science major designed to provide students a broad framework of knowledge and sets of skills for employment in a variety of areas (e.g., natural resource management, environmental consulting, fish or aquatic wildlife biology, aquaculture). In addition, students receive excellent preparation for graduate study in a number of life science fields. Expected student outcomes include:
 1. Skills in written and oral communication, data analysis, field and laboratory skills. Skill sets have been integrated into all core and flagship courses.
 2. Exposure to career paths in the field and interaction with professionals. Skills gained allow students to obtain an entry-level aquatic scientist position or admission to graduate school.
 3. Emphasis in one of three focus areas (aquatic ecology, conservation and management, aquatic biology and culture); students get a broad overview, then may specialize in one of the three areas.
 4. Strong encouragement to pursue multiple internship and research experiences, including opportunities like FHL research apprenticeships and Alaska Ecological Research Program.
 5. Understanding not only of the science, but also the socio-political-economic environment and its impact on the field of aquatic and fishery sciences.

6. All students participate in a capstone experience that requires them to demonstrate acquired skill sets (including public presentation in an undergraduate research symposium).

SAFS graduates pursue careers in the private sector (environmental consulting firms, private companies), the public sector (state and federal agencies, non-profit organizations, non-governmental agencies, education), and many continue into graduate programs in either research or policy. The undergraduate degree prepares students for either direct employment in a number of fields within public and private sectors, or for competitive entry into applicable graduate programs worldwide.

- *Instructional and Research Facilities:* The School of Aquatic and Fishery Sciences is housed in several buildings on the University of Washington campus. In addition, the school maintains various facilities off campus, including field research stations in Washington State and Alaska.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major).
- *Research, Internships, and Service Learning:* SAFS scientists work closely with employers in both the public and private sectors, leading to opportunities for undergraduates to receive both internship and research experience. Scientists from area agencies (NOAA, National Marine Fisheries, Alaska Fisheries Sciences Center, National Marine Mammal Lab, the U.S. Forest Service, the Student Conservation Association, and the Seattle Aquarium) come to the school to attend weekly SAFS departmental seminars; undergraduates are encouraged to attend. The School of Aquatic and Fishery Sciences is second only to the UW Medical School in federal research dollars brought to the UW campus, providing many paid hourly student positions within the department.
- *Department Scholarships:* Scholarships are awarded on the basis of academic merit, financial need, and other factors. The annual application process for continuing students begins in spring; check with the Office of Student Services for applications and deadlines. All undergraduates, both freshmen and transfers, are considered for recruitment scholarships if they have declared AFS as their major on their application to the University of Washington.
- *Student Organizations/Associations:* SURF (Society for Undergraduate Resources in Fisheries) organizes social, career, and educational activities for undergraduates in aquatic and fishery sciences. SURF also prints t-shirts, welcomes new students to the program, represents the program at events, and collaborates with student groups in other related departments on events.

Of Special Note:

- The School of Aquatic and Fishery Sciences has sent a small group of students and three faculty members to two Alaska Salmon Field Stations for a six-week course in aquatic ecology. These students receive education in ecology, limnology, population modeling, field techniques, scientific writing, and presentation skills.

Graduate Program

Graduate Program Coordinator
116 Fishery Sciences, Box 355020
(206) 616-5893
safs@uw.edu

The School of Aquatic and Fishery Sciences, established in 1919, offers courses and conducts research on the conservation, management, and effective use of natural resources. Education and research in the school include studies of aquatic ecology; ichthyology; population dynamics; management of free-ranging stocks; restoration ecology; and effects of human activities on freshwater and marine ecosystems. SAFS is recognized internationally for its graduate programs, especially in the area of quantitative fisheries management, all research programs are well respected.

Students may apply for admission into programs leading to the master of science or doctor of philosophy. Students who apply for the PhD program must hold a master's degree prior to beginning their doctoral studies. All students who receive a master's degree from the school and wish to pursue a PhD are reviewed by the Recruitment, Admissions, and Scholarship Committee before being accepted into the PhD program.

Master of Science

Admission Requirements

1. A bachelor's degree from an institution of recognized standing with a minimum 3.00 GPA in the last two years (90 quarter credits or 60 semester credits) of college work
2. Typically at least a 500 on both the verbal and quantitative portions of the GRE and a 5 on the analytic portion (a 500 if taken before October 2002)
3. If an international student, a minimum TOEFL score of 580 on written examination or 237 on computerized examination, or 70 on Internet-based examination

Degree Requirements

45 credits as follows:

1. *School of Aquatic and Fishery Sciences Core Courses:*
 - a. Q SCI 482
 - b. At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
 - c. FISH 521
 - d. FISH 522
 - e. 18 credits of thesis research: FISH 700
2. *Additional Course Requirements:* At least 12 credits of coursework at the 400 or 500 level, in addition to the SAFS core courses listed above. 4 of the 12 credits must be in 500-level courses. At least 9 of the additional 12 credits must be numerically graded.

Doctor of Philosophy

Admission Requirements

1. Minimum 3.00 GPA for last two years (90 quarter credits or 60 semester credits) of graded college work
2. GRE scores of 500 on the verbal and quantitative sections and 5 on the analytical section (500 if before October 2002)
3. If an international student, a minimum TOEFL score of 580 on written examination or 237 on computerized examination, or 70 on Internet-based examination

Admission to the PhD Program after Receiving an MS Degree from the School of Aquatic and Fishery Sciences

Students who wish to continue study toward the doctoral degree after receiving a master's from the School must apply to the Graduate Program Coordinator by way of the Student Services Office; the application is considered by the Recruitment, Admissions, and Scholarship Committee and a recommendation is then sent to the director for concurrence or denial. Applications must be submitted by the sixth week of the quarter in which the master's degree is conferred. For more information, refer to the SAFS website.

Bypassing the Master's Degree

Students admitted to the school at the pre-master's level may, under exceptional circumstances, proceed directly to post-master's study. Application should be made to the Graduate Program Coordinator via the Student Services Office for consideration by the Recruitment, Admissions and Scholarship Committee. More information is available on the SAFS website.

Students who bypass the master's degree must complete all PhD requirements within ten years of beginning graduate study, including MS coursework if used to fulfill any PhD requirements.

Degree Requirements

Minimum 90 credits, as follows:

1. *SAFS Core Courses*: Same as those required of MS students. Must be taken as part of the doctoral program if they or their equivalents have not been taken during an MS program.
 - a. Q SCI 482
 - b. At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
 - c. FISH 521
 - d. FISH 522
 - e. 27 credits of doctoral dissertation: FISH 800 (a maximum of 10 dissertation credits may be taken in any one academic quarter)
2. *Additional Course Requirements*: At least 48 credits of coursework at the 400 level or above, including dissertation credits, are required in addition to the required core courses listed above. Of those, at least 9 credits must be numerically graded.

Financial Aid

General information on graduate student support is available from the Office of Student Financial Aid, 105 Schmitz. The majority of first-year graduate students are offered research assistantships by appropriate faculty members, depending on the availability of research funding. The School of Aquatic and Fishery Sciences also has a limited number of fellowship opportunities for outstanding entering students. Other students may have their studies supported by the agency for which they work or they may be international students with scholarships from their home countries.

Graduate applicants are urged to discuss their financial needs with professors in their potential major fields during the early stages of the graduate application process. The graduate applicant is automatically considered for any fellowships, research assistantships, or teaching assistantships available from the School of Aquatic and Fishery Sciences when the admission application is submitted.

Atmospheric Sciences

Department Overview

416 Atmospheric Sciences-Geophysics Building

Atmospheric sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Niño, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society. These problems are addressed with theory, measurements, and computer simulations.

Undergraduate Program

Adviser

416 Atmospheric Sciences-Geophysics Building, Box 351640
(206) 543-4576

advise@atmos.washington.edu

The Department of Atmospheric Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in atmospheric sciences with options in meteorology, climate, chemistry, and data science
- A minor in atmospheric sciences
- The minor in Climate Science is offered jointly with the Department of [Atmospheric Sciences](#), the Department of [Earth and Space Sciences](#), and the School of [Oceanography](#).

Bachelor of Science

Suggested First- and Second-Year Courses: English composition; ATM S 220; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CSE 142 or CSE 160. The first upper-division core course is ATM S 301, which is offered autumn quarter only. Any lower-division atmospheric sciences courses except ATM S 220 count as electives and not as part of the major.

Department Admission Requirements

1. Minimum course requirements: English composition; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123
2. Grade requirements: Minimum 2.0 grade for each course required for admission; minimum 2.50 cumulative GPA in courses required for admission

Major Requirements

Minimum 97-108 credits as follows:

1. *Foundaiton requirements* (30 credits): MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123

2. *Core requirements* (28-29 credits): STAT 390 (or Q SCI 381 for options in meteorology, climate, chemistry); ATM S 220 (2), ATM S 301, ATM S 321, ATM S 340, ATM S 341, ATM S 370, ATM S 431.
3. *Options* (39 to 49 credits):
 - a. *Meteorology (42-45 credits)*
 - i. *Requirements (33 credits)*: AMATH 301; ATM S 358, ATM S 441, ATM S 442, ATM S 444, ATM S 451, ATM S 452; CSE 142 or CSE 160
 - ii. *Advanced Mathematics (9-12 credits)*: MATH 324; either AMATH 351 and AMATH 353, or MATH 307, MATH 308, and MATH 309
 - b. *Climate (39-49 credits)*
 - i. *Requirements (27-29 credits)*: AMATH 301; ATM S 350; ATM S 358, ATM S 380, ATM S 487; CSE 142 or CSE 160; either ESS 431 or ESS 433; either OCEAN 423 or OCEAN 450
 - ii. *Electives (12-20 credits)*: minimum four courses from an approved list. See adviser for approved list of electives.
 - c. *Chemistry (44-48 credits)*
 - i. *Requirements (35 credits)*: ATM S 458, ATM S 480; CHEM 142, CHEM 152, CHEM 162, CHEM 223, CHEM 224, CHEM 321
 - ii. *Electives (9-13 credits)*: minimum three courses from an approved list. See adviser for approved list of electives.
 - d. *Data Science (39-49 credits)*
 - i. *Requirements (31-35 credits)*: CSE 143 or CSE 163; one of CSE 416/STAT 416, STAT 435, or INFO 371; SOC 225 (3); ATM S 358; either MATH 307, MATH 308, MATH 309, or AMATH 351, AMATH 353, MATH 324; either CSE 414 or INFO 430; either CSE 412, HCDE 411, or INFO 474
 - ii. *Prerequisites for requirements (8-14 credits)*: See adviser for list of prerequisites
4. Minimum 2.0 grade in courses applied to the major

Pre-graduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Minor

Minor Requirements: 25 credits to include ATM S 301 plus other approved courses. The minor may include a maximum of 6 independent study credits. Prerequisites include MATH 126 or MATH 136, and PHYS 123. Some courses may require further math or chemistry experience.

Minor in Climate Science: See description in the [Climate Science](#) listing in the Undergraduate Interdisciplinary Programs section of the General Catalog.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The degree program qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other

areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences.

- *Instructional and Research Facilities:* Extensive computer resources are available in the departmental computer laboratory. The department also maintains an extensive collection of weather data in graphical and numerical electronic format. A study area is provided for undergraduates. An instrument laboratory is maintained with a wide range of observing and data collection systems. Students also have access to a machine shop and an electronics laboratory.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are available either within the department or with outside organizations, providing a valuable opportunity to test a student's interests in various meteorological career paths and to extend the student's knowledge. A limited number of departmental scholarships are available each year, based on academic excellence or financial need. Employment opportunities are often available in one of the many departmental research groups, and some internships are paid.

Students majoring in atmospheric sciences may take advantage of a variety of opportunities to enhance their education. Undergraduate students are welcome at the department's many seminars and colloquia and are encouraged to join in the annual forecast contest. They may work on independent research projects under the guidance of a faculty member, or be an active participant in a field program.

- *Department Scholarships:* The Mindlin-Reed-Caldwell Memorial is awarded annually, based on both academic excellence and financial need.
- *Student Organizations/Associations:* Student Chapter of American Meteorological Society, Puget Sound American Meteorological Society Chapter, Weekly Weather Discussion for all majors.

Graduate Program

Graduate Program Coordinator
416 Atmospheric Sciences-Geophysics, Box 351640
(206) 543-4576
atmosadv@uw.edu

Rapid growth of research in atmospheric sciences began in the late 1940s in response to needs and opportunities in weather forecasting. While fundamental research to advance weather forecasting abilities continues as a core element, atmospheric sciences now address a broad range of problems of fundamental interest and importance. Examples include changes in climate that could result from increases in atmospheric CO₂ and other greenhouse gases, causes and impacts of air pollution, interactions between the atmosphere and ecosystems, and the application of remote-sensing techniques for monitoring and understanding weather, climate, and atmospheric composition.

Graduate students in the atmospheric sciences come from a variety of disciplines: physics, chemistry, engineering, atmospheric or geophysical sciences, and applied mathematics. Each of these backgrounds is valuable for specific subfields within the atmospheric sciences. However, students should have in common a sound background in the fundamentals of physics and applied mathematics and an interest in complex natural phenomena. The well-prepared graduate student may expect to begin research work rather quickly.

Master of Science

Admission Requirements

1. Graduate School application
2. Official copy of transcripts
3. Statement of interest(s) - one page essay, addressing reasons why the student wishes to pursue a graduate program in atmospheric sciences
4. Three letters of recommendation submitted online
5. For international applicants: TOEFL scores, sent by the testing service
6. Deadline: December 31, for admission the following autumn. Admission is for autumn quarter only.

Degree Requirements

36 credits

1. *Core classes (25-28 credits):* ATM S 501, ATM S 502, ATM S 532, ATM S 535, ATM S 558. One of the following sequences: ATM S 505, ATM S 509, ATM S 542; or ATM S 503, ATM S 504
2. Two-course dynamics sequence (ATM S 503, ATM S 504), intended for those whose research specialty is outside dynamic meteorology. Most students take the three-course sequence in dynamics (ATM S 505, ATM S 509, ATM S 542).
3. Minimum 27 credits from graded courses numbered 500 or above; including at least 3 credits in approved applied mathematics courses and 24 in core atmospheric sciences courses. 9 credits for the master's thesis. Students intending to pursue a PhD should take all required courses shown above.

Doctor of Philosophy

Admission Requirements

1. Admission to the MS track
2. Application to the PhD program through one of the three following options:
 - a. MS thesis in atmospheric sciences or a closely related discipline, completed before entering the department, submitted the first week of autumn quarter of the student's second academic year.
 - b. MS thesis approved by the MS Supervisory Committee.
 - c. Manuscript of a peer-reviewed journal article on which the student is lead author.

Degree Requirements

Minimum 90 credits

1. *Coursework*
 - a. ATM S 501, ATM S 502
 - b. ATM S 505, ATM S 509, ATM S 542 (Students whose anticipated research has minimal connection with atmospheric dynamics, such as laboratory or fieldwork in atmospheric chemistry or cloud microphysics, may take ATM S 503 and ATM S 504 in place of ATM S

505, ATM S 509, and ATM S 542. See Graduate Program Coordinator before enrolling in ATM S 503.)

- c. ATM S 532, ATM S 558
 - d. ATM S 535
 - e. Each of the following, every quarter coursework is taken: ATM S 520, either ATM S 521 or ATM S 523, and either ATM S 700 or ATM S 800 (up to 10 credits each quarter)
 - f. *Electives*: 8-11 credits in ATM S courses in student's areas of interest; and at least 3 credits in non-ATM S coursework
 - g. *Applied math*: Either AMATH 501, AMATH 503, AMATH 581, AMATH 583, or AMATH 584
2. General examination
 3. Dissertation
 4. Final examination

Data Science Option

Minimum 90 credits

1. *Coursework*
 - a. ATM S 501, ATM S 502
 - b. ATM S 505, ATM S 509, ATM S 542 (Students whose anticipated research has minimal connection with atmospheric dynamics, such as laboratory or fieldwork in atmospheric chemistry or cloud microphysics, may take ATM S 503 and ATM S 504 in place of ATM S 505, ATM S 509, and ATM S 542. See Graduate Program Coordinator before enrolling in ATM S 503.)
 - c. ATM S 532, ATM S 558
 - d. ATM S 535
 - e. Each of the following, every quarter coursework is taken: ATM S 520, either ATM S 521 or ATM S 523, and either ATM S 700 or ATM S 800 (up to 10 credits each quarter)
 - f. *Electives*: 5-8 elective credits in area of interest
 - g. 9-15 credits from UW eScience Institute Graduate Data Science Option list, these courses may count towards 5-8 elective credits required.
 - h. *Applied math*: Either AMATH 501, AMATH 503, AMATH 581, AMATH 583, or AMATH 584
 - i. CHEM E 599F (2 credits)
2. General examination
3. Dissertation
4. Final examination

Advanced Data Science Option

Minimum 90 credits

1. *Coursework*

- a. ATM S 501, ATM S 502
 - b. ATM S 505, ATM S 509, ATM S 542 (Students whose anticipated research has minimal connection with atmospheric dynamics, such as laboratory or fieldwork in atmospheric chemistry or cloud microphysics, may take ATM S 503 and ATM S 504 in place of ATM S 505, ATM S 509, and ATM S 542. See Graduate Program Coordinator before enrolling in ATM S 503.)
 - c. ATM S 532, ATM S 558
 - d. ATM S 535
 - e. Each of the following, every quarter coursework is taken: ATM S 520, either ATM S 521 or ATM S 523, and either ATM S 700 or ATM S 800 (up to 10 credits each quarter)
 - f. *Electives*: 2-5 elective credits in area of interest
 - g. 11-13 credits from UW eScience Institute Graduate Data Science Option list.
 - h. *Applied math*: Either AMATH 501, AMATH 503, AMATH 581, AMATH 583, or AMATH 584
 - i. CHEM E 599F (4 credits)
2. General examination
 3. Dissertation
 4. Final examination

Assistantships

Nearly all graduate students are supported by either research assistantships or fellowships. Students are usually a teaching assistant during at least one quarter, in the second year of study. Students are supported full-time during the summer.

Earth and Space Sciences

Department Overview

070 Johnson Hall

Earth and space sciences seeks to further the understanding of the Earth, the solar system, and their histories. The scope extends from the center of Earth to the rim of the solar system, and activities cut across traditional disciplines of physics, chemistry, biology, geology, and mathematics. The discipline examines Earth's interior structure, chemistry, motion, and dynamics; geologic hazards; processes affecting the surface environment and climate; the surrounding space environment; planetary processes; and geobiology.

Undergraduate Program

Adviser

070 Johnson Hall, Box 351310

(206) 616-8511

advising@ess.washington.edu

The Department of Earth and Space Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in earth and space sciences, with options in biology, geology, physics, and environmental earth sciences
- The Bachelor of Arts degree with a major in earth and space sciences
- A minor in earth and space sciences
- A minor in climate science (offered jointly with the Department of [Atmospheric Sciences](#) and the School of [Oceanography](#))

The Bachelor of Science degree is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field and technology experiences and problem-solving skills are an important asset. The biology option enables B.S. students interested in paleontology and paleobiology to emphasize biology courses. The physics option allows for an emphasis in physics and geophysics. The environmental earth sciences option is designed for students interested in environmentally focused courses and careers. The Bachelor of Arts degree is designed for students who wish to obtain a broad understanding of earth sciences as a background for careers such as science journalism, environmental law, K-12 teaching, or environmental policy.

Bachelor of Science

Suggested First- and Second-Year Courses: MATH 124, MATH 125, and MATH 126 or ESS 310; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

93-106 credits

1. *Science Core (35 credits):*
 - a. *Basic Supporting Science (20 credits):* MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students pursuing the ESS physics option must take PHYS 121.)
 - b. *ESS Required 200-Level Core Courses (15 credits):* ESS 211, ESS 212, ESS 213. (Students in the ESS physics option may substitute ESS 205 for one of these.)
2. *One of the four ESS Options below (minimum 58-71 credits, depending on option):*
 - a. *Biology Option (58-68 credits)*
 - i. *Supporting Science (24-25 credits):* CHEM 152, CHEM 162; either both BIOL 180 and BIOL 200 or BIOL 240; and one of BIOL 220 or BIOL 240, PHYS 115/PHYS 118, PHYS 122, MATH 126 or ESS 310, STAT 290, STAT 311 or STAT 390.
 - ii. *ESS Required 300-Level Core Courses (15 credits):* three of ESS 311, ESS 312, ESS 313, ESS 314, ESS 316
 - iii. *ESS Upper-Division Courses (19-28 credits):* ESS 400, ESS 401, or ESS 449/BIOL 475; ESS 418; 12 credits from ESS 400-level courses, 400-level BIOL or BIOC courses from approved list (see website for current list), or any ESS 300-level core course (ESS 311, ESS 312, ESS 313, ESS 314, ESS 316) not taken as a required course, above. May not include independent study or seminar courses numbered ESS 489 through ESS 499. At least 3 credits from ESS-prefix courses.
 - b. *Geoscience Option (59-64 credits)*
 - i. *Quantitative Skills (4-5 credits):* MATH 126, ESS 310, STAT 290, STAT 311, STAT 390, or Q SCI 381
 - ii. *Supporting Science (8-10 credits):* PHYS 115/PHYS 118 or PHYS 122; and one of CHEM 152, AMATH 351, MATH 307, MATH 308, PHYS 116/PHYS 119, or PHYS 123
 - iii. *ESS Geoscience 200-level Core (3-5 credits):* One of ESS 201, ESS 202, ESS 203, ESS 204, ESS 205, or ESS 230
 - iv. *ESS Required 300-Level Core Courses (10 credits):* two of ESS 311, ESS 312, ESS 313, ESS 314, ESS 316
 - v. *ESS Upper-Division Courses (34 credits):* ESS 400 or ESS 401; ESS 418; 18 credits from ESS 400-level courses, from an approved list of courses outside ESS, or any ESS 300-level core course (ESS 311, ESS 312, ESS 313, ESS 314, ESS 316) not taken as a required course, above. May not include independent study or seminar courses numbered ESS 489 through ESS 499
 - c. *Geology Option (64-71 credits)*
 - i. *Supporting Science (16-20 credits):* MATH 126 or ESS 310; PHYS 115/PHYS 118 or PHYS 122; and two from the following: PHYS 116/PHYS 119 or PHYS 123, CHEM 152, either AMATH 351 or MATH 307, MATH 308, and either STAT 290, STAT 311, or STAT 390
 - ii. *ESS Required 300-Level Core Courses (15 credits):* ESS 311, ESS 312, ESS 316

- iii. *ESS Geology Core (7-10 credits)*: one course from ESS 439, ESS 441, ESS 455, ESS 456, or ESS 463; and one course from ESS 425, ESS 426, ESS 427, ESS 447, ESS 454, ESS 457, or ESS 482
 - iv. *ESS Upper-Division Courses (26 credits)*: ESS 400 or ESS 401; ESS 418; 10 credits from ESS 400-level courses, ESS 313, or ESS 314. May not include independent study or seminar courses numbered ESS 489 through ESS 499.
- d. *Physics Option (63-66 credits)*
- i. *Supporting science (34-37 credits)*: MATH 126, MATH 308, MATH 324 or MATH 136, MATH 324; PHYS 122, PHYS 123, PHYS 227, PHYS 228, PHYS 321, PHYS 322.
 - ii. *ESS required 300-Level Core Courses (10 credits)*: two of ESS 311, ESS 312, ESS 313, ESS 314, ESS 316
 - iii. *ESS Upper-Division Courses (19 credits)*: ESS 418; 15 credits from ESS 400-level courses or any ESS 300-level core course (ESS 311, ESS 312, ESS 313, ESS 314, ESS 316) not taken as a required course, above. May not include independent study or seminar courses numbered ESS 489 through ESS 499
3. Minimum 2.00 cumulative GPA for all ESS-prefix courses

Bachelor of Arts

Suggested First- and Second-Year College Courses: Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

88-90 credits

1. *Supporting Science (30 credits)*:
 - a. *Basic Supporting Science (20 credits)*: CHEM 142; Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121.
 - b. *Additional courses*: 10 credits from department's approved list of courses in science and mathematics. See adviser for current list.
2. *ESS Courses (43-45 credits)*:
 - a. *Required courses (18-20 credits)*: Two of ESS 211, ESS 212, ESS 213. One additional course from ESS 201, ESS 205, ESS 210, ESS 211, ESS 212, or ESS 213. One of ESS 311, ESS 312, ESS 313, ESS 314, or ESS 316.
 - b. *Elective Courses*: 25 upper-division credits (300 and 400 level) with at least 10 credits at the 400 level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.)
3. *Concentration (15 credits)*: 15 credits from one concentration area: business, education, interdisciplinary science, law and policy, or science communication (see department for approved list). Courses counted toward this requirement cannot be used for any other major requirements. Courses not on the approved list may count toward this requirement if approved in advance by ESS Advising.

4. Minimum 2.00 cumulative GPA for all ESS-prefix courses.

Minor

Minor Requirements: 30 ESS credits with at least 15 at the upper-division level (300- or 400-level) of which at least 3 credits must be at the 400-level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.) All courses must be completed with a minimum grade of 2.0.

Minor in Climate Science: See description in the [Climate Science](#) listing in the Undergraduate Interdisciplinary Programs section of the General Catalog.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students who graduate with an undergraduate degree in Earth and Space Sciences (ESS) have achieved these learning goals:
 1. Have a general knowledge of the basic areas of solid earth geology and geophysics, geobiology, surface processes, space physics, and analogues of processes within the solar system.
 2. Be proficient in one of the core disciplines through the completion of requirements in one of four options: standard (geology), (geo)biology, (geo)physics, or environmental.
 3. Think critically and obtain quantitative predictions using skill sets that involve multiple disciplines and all core sciences.
 4. Have obtained hands-on experience from extensive fieldwork and/or laboratory experience.
 5. Have the ability to communicate scientific information clearly and precisely, both orally and in writing.
 6. Have the ability to read, understand, and use scientific literature.
- *Instructional and Research Facilities:* See below, at end of graduate program requirements.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors in the major). See adviser or department website for requirements.
- *State Licensing Endorsement Available:* Students interested in pursuing State Licensing for Geologists can receive guidance in course selection that meets state requirements for the geologist licensing examination (see adviser for requirements or visit department website).
- *Research, Internships, and Service Learning:* Job and internship possibilities are posted in the department and forwarded by email to all undergraduate students.
- *Department Scholarships:* A limited number of departmental scholarships are available. Scholarship applications are invited from all undergraduate students in the major during spring quarter. The awards are applicable to the following academic year.
- *Student Organizations/Associations:* Geo Club organizes field trips and social gatherings. Information about meetings and events is forwarded to undergraduate majors by email.

Graduate Program

Graduate Program Coordinator
070 Johnson Hall , Box 351310
206-616-8511
advising@ess.washington.edu

The department offers graduate programs leading to the Master of Science (M.S.) degree and the Doctor of Philosophy (PhD) degree in both geological sciences and geophysics. The programs emphasize a rigorous quantitative approach in conjunction with detailed in-situ and/or laboratory observations to address significant problems that lead to a better understanding of the Earth and its environment.

Major areas of interest are the internal and surface structures and materials of the Earth and planets; dynamic processes within the earth, oceans, atmosphere, and space environments; and their history and the interaction of life with these environments. The required curriculum is flexible to facilitate interdisciplinary research approaches. Earth and Space Sciences is also one of the core departments (with the Department of Atmospheric Sciences and the School of Oceanography) in the interdisciplinary graduate program on climate change and a participant in the astrobiology program.

Master of Science

Admission Requirements

1. GRE
2. TOEFL scores for international applicants. TSE scores not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes. International transcripts in the original language, accompanied by a certified English translation.
4. Three letters of recommendation
5. Departmental application form
6. Personal resume and personal statement

Degree Requirements

36-45 credits

The department encourages interdisciplinary courses of study tailored to each student.

1. Courses determined in consultation with the student's advisory committee
2. ESS 594, each quarter offered in the first year
3. ESS 599, every quarter (except summer)
4. Two ESS introductory breadth courses (any 50X course)
5. Experiential learning
6. Data analysis course or research project with a significant data analysis component
7. Preliminary examination (see below)
8. Draft thesis or research paper
9. Final examination

With Thesis: 36 credits, of which 18 must be in courses at the 400 level or above and up to 9 may be for thesis (ESS 700). Final examination

Without Thesis: 45 credits, of which 18 must be in courses at the 400 level or above, to include a 5-credit research paper (ESS 600). Final examination

Preliminary Examination: Required for every graduate student. Provides one component the department uses to evaluate admission to the PhD program. Encourages students to develop and present a research project, and get an early, structured start on graduate research. Students must show knowledge of disciplines that underlie their general area of interest (e.g., geology, geophysics, mathematics, chemistry, biology).

Doctor of Philosophy

Admission Requirements

1. GRE
2. TOEFL scores for international applicants. TSE scores not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes. International transcripts in the original language and accompanied by a certified English translation.
4. Three letters of recommendation
5. Departmental application form
6. Personal resume and personal statement

Degree Requirements

90 credits

The department encourages interdisciplinary courses of study tailored to each student.

Departmental requirements for graduate students in both geological sciences and geophysics.

1. Courses determined in consultation with the student's advisory committee
2. ESS 594, each quarter offered in the first year
3. ESS 599, every quarter (except summer)
4. Two ESS introductory breadth courses (any 50X course)
5. Experiential learning
6. Data analysis course or research project with a significant data analysis component
7. Preliminary examination (see below)
8. General examination
9. Draft dissertation
10. Dissertation defense

Preliminary Examination: An ESS requirement for every graduate student. Provides one component the department uses to evaluate admission to the PhD program. Encourages students to develop and present a research project, and get an early, structured start on graduate research. Students must show

knowledge of the disciplines that underlie their area of interest (e.g., geology, geophysics, physics, mathematics, chemistry, biology).

Research Facilities

Extensive laboratory facilities are available for a wide range of experimental/field work. These include a wet chemistry laboratory, a JEOL 733 Superprobe with EDS/WDS and a high resolution laser Raman spectrometer for mineral analysis, a thermal-ionization mass spectrometer, a multi-collector inductively-coupled-plasma mass spectrometer and associated clean laboratories for analysis of stable and radiogenic isotopes, a computer laboratory, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and high temperature controlled atmosphere furnaces. Also, field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including a laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent, regional seismic network; a portable telemetered seismic network for studying volcanoes and active faults in western North America; geodetic-quality global-positioning-system receivers; a cold laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical-fluids laboratory; two cloud microphysics laboratories; a space physics and aeronomy laboratory for preparing ground-based, balloon, rocket, and satellite experiments; and a laboratory for the study of advanced plasma propulsion concepts. Additional facilities are provided by the Quaternary Research Center (which houses state-of-the art cosmogenic isotope and stable-isotope research laboratories, palynology, snow and ice research, and a periglacial laboratory) and the Burke Memorial Washington State Museum (which houses paleontological laboratories and extensive reference collections of invertebrate, vertebrate, and plant fossils, and minerals).

Financial Aid

Most graduate students receive support in the form of teaching or research assistantships, and endowed fellowships and scholarships.

Program on the Environment

Program Overview

Wallace Hall, Suite 12
3737 Brooklyn Ave NE
Seattle, WA 98195-5679
poe.washington.edu
poe@uw.edu

The Program on the Environment (PoE) is the home for Environmental Studies education at the University of Washington. Environmental Studies focuses on the interactions between humans and environments, drawing on an interdisciplinary approach to understand and address complex environmental issues.

The Environmental Studies program offers a BA major in Environmental Studies, a minor in Environmental Studies, and a Graduate Certificate in Environmental Management.

Building on a foundation of natural science, social science, and humanities courses, the curriculum offers students flexibility in choosing an individual course of study. Internship, research, and study abroad opportunities develop skills and leadership for careers in environmental policy, sustainability, conservation, education, or consulting.

Undergraduate Program

Adviser
12 Wallace Hall, Box 355679

poeadv@uw.edu

The Program on the Environment offers the following programs of study:

- The Bachelor of Arts degree with a major in environmental studies
- A minor in environmental studies

Bachelor of Arts

Suggested First and Second-Year College Courses: ENVIR 100, ENVIR 200, ENVIR 250, and all foundational courses listed below.

Program Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

All majors must satisfy the College of the Environment general education requirements.

Major Requirements

82-88 credits, as follows:

1. *Core Courses (20 credits)*: ENVIR 100, ENVIR 200, ENVIR 250, ENVIR 300
2. *Foundation Courses (31-35 credits)*
 - a. *Biology (5 credits)*: BIOL 180 and one course (or sequence) from among BIOL 200, BIOL 118/BIOL 119, BIOL 250/FISH 250/OCEAN 250, ENVIR 280
 - b. *Biological Systems (3-5 credits)*: on course from BIOL 200, BIOL 250/FISH 250/OCEAN 250, ENVIR 240, ENVIR 280
 - c. *Chemistry (5 credits)*: CHEM 120 or CHEM 142
 - d. *Earth Systems Literacy (3-5 credits)*: one course from ATM S 211, ATM S 212, or ESS 201, ESS 210, ESS 230/OCEAN 230, OCEAN 200, GEOG 205
 - e. *Statistics (5 credits)*: one course from Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311
 - f. *Economics (5 credits)*: one course from ENVIR 235/ESRM 235/ECON 235 or FISH 230/ECON 230
 - g. *Values and Cultures (5 credits)*: one course from ANTH 210, ANTH 211/ENVIR 211, ENVIR 239, GEOG 272, HSTAA 221/ENVIR 221, or ENVIR 243/PHIL 243
3. *Analytical Methods (3-5 credits)*: one course from ESRM 304, ESRM 430, ESS 421, OCEAN 452/FISH 452, GEOG 360, GEOG 471, Q SCI 482
4. *Environmental Perspectives and Experiences (18 credits)*: Minimum 18 credits from the list of approved courses (see department website or advising office for list). Minimum 3 credits in each of the six following categories: *perspectives*: human and social dimensions; natural sciences, and policy and decision making; *experiences*: bioregional; international; and fieldwork. Courses listed under both *perspectives* and *experiences* may count toward either, but not both. Environmentally related independent study courses, study abroad programs, and other courses not on the approved list may count toward this requirement if approved in advance by the Environmental Studies adviser.
5. *Capstone Experience (10 credits)*: ENVIR 490, ENVIR 491, ENVIR 492
6. *GPA Requirements*: Minimum 2.00 cumulative GPA for courses within the major.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirement: 30 credits, including ENVIR 100; either ENVIR 200 or ENVIR 250. Five (5) credits from among ECON 235/ENVIR/235/ESRM235, HSTAA 221/ENVIR 221, and PHIL 243/ENVIR 243.

Remaining 15 credits drawn from the environmental perspectives course list (see program website adviser for list). At least one course (minimum 3 credits) in each environmental perspectives course category, i.e. natural sciences, human and social dimensions, and policy and decision making. Ten (10) of these 15 credits must be at the 300 or 400 level. Minimum 2.0 for each course presented for the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The environmental studies major offers a rigorous, interdisciplinary, experiential curriculum designed to prepare future environmental leaders to respond to bioregional and global environmental opportunities and challenges. It takes advantage of the extraordinary environmental research at the UW, and makes that social, scientific, humanistic, and professional expertise accessible to students in innovative ways.
- Students completing the BA in environmental studies have developed skills in the following:
 1. **Earth Systems Knowledge:** Understand the structure, function, and integration of the Earth, its inhabitants, and its four major spheres: land, water, living things, and air.
 2. **Interdisciplinary Approach:** Apply an interdisciplinary approach to the study of the environment, integrating multiple kinds of information, tools, methods, and scholarship from a variety of disciplines, in order to analyze and construct arguments about complex environmental issues.
 3. **Experiential Learning:** Understand the connections between classroom and experiential learning and successfully practice multiple forms of hands-on, real world applications.
 4. **Communication:** Demonstrate proficiency in multiple modes of communication (writing for different audiences and purposes, using a range of disciplinary norms; oral presentations and public speaking; online publishing; and visual display of environmental information).
 5. **Public Policy and Decision Making:** Understand how uncertainty, risk, law, politics, ethics, economics, and culture interact with environmental public policy and decision making.
 6. **Teamwork:** Collaborate as members of teams, effectively working with multiple stakeholders from various backgrounds to address environmental issues.
 7. **History of Environmental Inquiry:** Understand and reflect critically on the intellectual and cultural history of environmental studies including the history of environmental preservation and conservation.
 8. **Temporal Scales:** Understand various temporal scales inherent in environmental studies and situate themselves on the continuum of geologic time, evolutionary history, human environment history, and decision making for future generations.
 9. **Spatial Scales:** Understand various spatial scales inherent in environmental studies spanning the continuum from the local/bioregional to the international/global.
 10. **Diversity:** Understand how environmental perspectives, policies, and decisions are related to issues of diversity, privilege, and power.
 11. **Technical Knowledge:** Be familiar with some of the technological tools commonly used to address environmental challenges.
 12. **Professional Development:** Understand how their education will serve them as environmental professionals.
- *Instructional and Research Facilities:* The Program on the Environment office in Wallace Hall Suite 12 includes a commons area for student and faculty events and presentations, four study areas, and a computer lab. Because PoE is an interdisciplinary program, students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* All environmental studies majors complete a senior capstone experience, which includes an internship with a community-based organization or

government agency, an undergraduate research project, and/or international fieldwork or study abroad.

- *Student Organizations/Associations:* SAGE (Student Association for Green Environments) is a club to spread awareness for environmental issues on and off campus and to promote events for a greener, sustainable environment. SAGE is committed to community engagement and education and creating professional development opportunities for environmental studies students.

School of Environmental and Forest Sciences

School Overview

107 Anderson

The School of Environmental and Forest Sciences, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.

Founded in 1907, the school holds a position of national and international leadership in instruction and research. Its location in one of the world's largest forested regions provides students access to a unique urban-to-wildland world-class laboratory in which to study. Approximately 400 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.

The school's programs focus on the sustainability and functionality of complex natural resource and environmental systems, using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFOR), the Water Center, the UW Botanic Gardens, which include the Center for Urban Horticulture and the Washington Park Arboretum, the Olympic National Resources Center (ONRC), the Stand Management Cooperative (SMC), and the Precision Forestry Cooperative. For current information on these centers and cooperatives, visit www.sefs.washington.edu/centersPrograms/.

Office of Student and Academic Services

Director, Student and Academic Services
130 Anderson
sefsadv@uw.edu

The Office of Student and Academic Services in the School of Environmental and Forest Sciences assists prospective students with admission to the school and advises current students, including interpretation of school and University requirements and assistance in course planning. At the graduate level, faculty advisers assist students in choosing a course plan to help build an appropriate academic background for their research areas.

The office also helps to sponsor a career fair winter quarter. Students are strongly urged to seek summer employment and internship positions relevant to their career goals.

Research Programs

Areas of research are closely tied to the school's graduate program research areas. These include bioresource science and engineering; forest ecology; forest soils; forest systems and bioenergy;

restoration ecology and environmental horticulture; social sciences; sustainable resource management; and wildlife science.

Outreach Programs

The school, through its interdisciplinary centers and through collaboration with UW and external partners, undertakes and promotes continuing public and professional education for citizens of the state.

Facilities

The school occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winklerwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture, a part of the UW Botanic Gardens, is located near the Union Bay natural area on the east side of the Seattle Campus. The center maintains a library that serves students, faculty, landscape professionals, and the public. The center's herbarium supports fieldwork in environmental horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Burke Museum and Department of Biology, is available for use by the school's students.

The school's laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.

The school computing facilities include computer systems and staff dedicated to specific research areas, a computer student laboratory, and a local area network with several servers offering access to the Internet and local printers.

Field Facilities

School field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the school concerned with the research and teaching of natural resources science and management.

The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washington, and is home to the Center for Sustainable Forestry at Pack Forest. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages the facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The Center for Sustainable Forestry is charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the school's strategic themes of sustainable forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mission of the center is to conduct research and

education on natural-resources management practices that integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. Both a forest management program and a marine program are in place to study the relationship between the terrestrial and marine environment.

The Lee Memorial Forest, approximately 160 acres, is located about 22 miles northeast of the University, near Maltby. This forested property provides valuable academic and research opportunities near the campus. Characterized by forest types and soils common to Western Washington lowlands, Lee Forest is used extensively for short field trips and for long-term research and demonstration projects especially related to changing land uses.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are used by the school in cooperation with Seattle Public Utilities for studies in forest ecology and soil science in representative low and high elevation forest ecosystems.

The UW Botanic Gardens include the Center for Urban Horticulture, which has offices, laboratories, public-education resources, and field sites for teaching and research along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former landfill, now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Herbarium is dedicated to plants of urban and environmental horticultural significance. The Miller Seed Vault stores seeds of Washington's rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Library is the Northwest's foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center for Urban Horticulture also conducts courses, lectures, and special events for the public and professionals as part of the school's outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the center.

The UW Botanic Gardens' largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants' diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and other research projects, including many independent student projects. The arboretum, established in 1934, offers numerous formal and informal classes for the general public and, in addition, serves the community as a public park and open space.

Undergraduate Program

Adviser
116 Anderson
(206) 543-3077
sefsadv@uw.edu

The School of Environmental and Forest Sciences offers the following programs of study:

- Bachelor of Science degree with a major in environmental science and terrestrial resource management. Within this major, options in landscape ecology and conservation, restoration

ecology and environmental horticulture, sustainable forest management, and wildlife conservation are offered.

- Bachelor of Science degree with a major in bioresource science and engineering.
- Minors in ecological restoration (available through Bothell, Seattle, and Tacoma campuses), and environmental science and terrestrial resource management.

Bachelor of Science

Suggested First- and Second-Year School Courses:

- *Environmental Science and Terrestrial Resource Management:* ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 180, BIOL 200, BIOL 220; CHEM 120, CHEM 220; any 5-credit VLPA course; MATH 120 or Q SCI 291; ESRM 210.
- *Bioresource Science and Engineering:* CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English composition course); HCDE 231; CHEM E 260; MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; BSE 150; BSE 201, BSE 202, BSE 248, and BSE 450.

Department Admission Requirements

- *Environmental Science and Terrestrial Resource Management:* Students in good academic standing may declare this major at any time.
- *Bioresource Science and Engineering:* Students may apply for freshman admission or upper-division admission. Applications are available by visiting the school website. Prospective upper-division BSE applicants should have most pre-engineering coursework completed before applying (see suggested sequencing at: www.sefs.washington.edu/academicPrograms/undergrad/bse/BSEflier.pdf), especially MATH 126 and CHEM 238. See adviser for further information. Admission is competitive; completion of requirements does not guarantee admission. Students may also apply to the chemical engineering degree program through the College of Engineering advanced admission program (see College of Engineering section for advanced admission entrance and continuation requirements).

Graduation Requirements

Environmental Science and Terrestrial Resource Management

180 credits, to include:

1. *General Education Requirements (70 credits)*
 - a. *Written Communication (12 credits):* 5 credits English composition (ENGL 131 preferred); and seven additional credits.
 - b. *Quantitative and Symbolic Reasoning (20 credits):* Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
 - c. *Natural World (30 credits):* BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
 - d. *Visual, Literary, & Performing Arts (VLPA) (10 credits):* Any 200-level COM course; five additional credits from the University VLPA list.

- e. *Individuals & Societies (I&S) (10 credits)*: ENVIR 235/ECON 235 or ECON 200 or ECON 201; and five additional credits, which are satisfied by core courses shown below.
2. *Major Requirements (62 credits)*:
 - a. *Core Courses (17 credits)*: ESRM 200, ESRM 201, ESRM 300, ESRM 304.
 - b. *Restricted Electives (minimum 45 credits)*: 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists); minimum 25 credits must be at the 400-level.
 - c. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.
3. *Free electives*: As needed to bring minimum total to 180 credits.

Environmental Science and Terrestrial Resource Management voluntary program options:

All requirements for any of the four voluntary options are the same as for the major shown directly above.

1. *Natural Resource and Environmental Management Option (minimum 45 credits)*: ESRM 323; ESRM 331, ESRM 350; ESRM 381; ESRM 400; ESRM 426; ESRM 470. Minimum one course each from three approved lists. See adviser for approved lists.
2. *Restoration Ecology and Environmental Horticulture Option (minimum 45 credits)*: Courses selected from an approved list. See adviser for approved list.
3. *Sustainable Forest Management Option (minimum 45 credits)*: ESRM 323; ESRM 331; ESRM 368; ESRM 400; ESRM 426 or ESRM 447; ESRM 428; ESRM 430; ESRM 461; ESRM 470. Minimum one course each from three approved lists. See adviser for approved lists.
4. *Wildlife Conservation Option (minimum 46 credits)*: ESRM 350; ESRM 351; ESRM 441; ESRM 450; ESRM451/Q SCI 451; ESRM 458; Q SCI 482; and one from ESRM 452, ESRM 453, ESRM 459. Capstone (10 credits): ESRM 462, ESRM 463, and ESRM 464; or ESRM 494 and ESRM 496; or ESRM 494 and ESRM 495.

Bioresource Science and Engineering

1. *General Education Requirements (105 credits)*
 - a. *Written Communication (12 credits total, 4 of which are satisfied by major requirements, shown below)*: 5 credits English composition (ENGL 131 preferred); HCDE 231 (3 credits).
 - b. *Natural World (NW) (68 credits)*: MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352); Q SCI 381 or IND E 315 or STAT 390. CHEM 152, CHEM 162; CHEM 237, CHEM 238; PHYS 121, PHYS 122, PHYS 123; A A 260; 10 credits from the University NW list (outside the major).
 - c. *Visual, Literary, & Performing Arts (VLPA) (10 credits)*, chosen from the University VLPA list.
 - d. *Individuals & Societies (I&S) (20 credits, totally, 5 of which are satisfied by BSE requirements, shown below)*: ECON 200; 10 credits chosen from the University I&S list (outside the major).
2. *Major Requirements (74 credits)*
 - a. *Bioresource Science (59 credits)*: BSE 150, BSE 201, BSE 202, BSE 248, BSE 391, BSE 392, BSE 406, BSE 420, BSE 421, BSE 422, BSE 426, BSE 430, BSE 436, BSE 480,

BSE 481, BSE 497. All required BSE courses must be completed with a minimum 2.0 grade.

- b. *Engineering Electives (15 credits minimum)*: Taken from a list of approved engineering electives.
 - c. *Business Option (additional 12 credits minimum)*: ESRM 320, ESRM 321, and one course from approved list.
3. *Free Electives*: To bring minimum total to 180 credits.

Minors

Ecological Restoration

Minor Requirements: 25 credits as follows:

1. *Introduction to Restoration Ecology (5 credits)*: Either ESRM 362/ENVIR 362, BES 362, or TESC 362.
2. *Capstone (10 credits)*: One of the following sequences: ESRM 462/ENVIR 462, ESRM 463/ENVIR 463, ESRM 464/ENVIR 464; or BES 462, BES 463, BES 464; or TESC 462, TESC 463, TESC 464.
3. *Electives*: 10 credits from approved list of electives maintained by each campus.
4. Minimum 2.00 cumulative GPA for courses presented for the minor.
5. Minimum 15 credits from outside the student's major.
6. Minimum 15 credits completed through the UW.

Environmental Science and Terrestrial Resource Management

Minor Requirements: Minimum 25 ESRM credits, 20 of which must be upper division. Maximum 5 credits from BSE courses allowed.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the bioresource science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the paper and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.

The goal of the environmental science and terrestrial resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields through the formal program options, which include: landscape ecology and conservation; restoration ecology and environmental horticulture; sustainable forest management; and wildlife conservation; or to construct individual coursework to fit their educational goals.

Career opportunities abound in the area of environmental science and terrestrial resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

- *Instructional and Research Facilities:* See the main school page for details.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements or visit www.sefs.washington.edu/academicPrograms/undergrad/honors.shtml.
- *Research, Internships, and Service Learning:* The Office of Student and Academic Services regularly receives internship announcements, which are forwarded to all SEFS students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.

Undergraduate research opportunities are available. Students should contact faculty members in their areas of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

- *Department Scholarships:* For majors, the School of Environmental and Forest Sciences has a strong scholarship program that provides in-state tuition to students, based on merit or need. Application information can be found at www.sefs.washington.edu/academicPrograms/scholarship/index.shtml.

The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the bioresource science and engineering curriculum. For information, contact Professor Rick Gustafson in Bloedel 364 or visit the foundation website at: depts.washington.edu/wppf/.

- *Student Organizations/Associations:* The School has student organizations which organize student symposia, field trips, parties, slide shows and talks, public service projects, and other social activities. Current SEFS student organizations can be found at www.sefs.washington.edu/people/organizations.shtml.

Of Special Note: Some classes include field trips or require laboratory supplies or material duplication at student expense.

Graduate Program

Graduate Program Adviser
130 Anderson, Box 352100
(206) 543-7081
sefsadv@uw.edu

Graduate programs in forest resources accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science.

Programs lead to the degrees of Master of Environmental Horticulture, Master of Forest Resources in forest management, master of science, and doctor of philosophy. Graduate students may center their study in one of the special fields within the school's divisions.

Master of Environmental Horticulture

Admission Requirements

1. Academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted without sufficient course background in the intended program of study)
 - c. Adequate GRE scores (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
 - d. *International applicants only*: minimum 580 TOEFL score (237 computer-based test, 92 internet-based, and 7 IELTS tests)
2. Knowledge of intended area of study
 - a. Statement of objectives in pursuing further education
 - b. Ideally work or field experience in planned area of study
3. References: three recommendations total
 - a. Recommendations from references familiar with applicant's academic ability and potential
 - b. Recommendations from employers in field related to applicant's educational goals
4. Application deadline: December 1 for admission the following autumn quarter.

Degree Requirements

45 credits

1. SEFS 500, SEFS 503, SEFS 549, SEFS 561, and ESRM 590 (14 credits); and 18 credits of restricted electives.
2. *Internship/independent research*: SEFS 601. Public presentation and written professional paper. (9 credits minimum)
3. *Electives* (4 credits)

Master of Forest Resources - Forest Management

Admission Requirements

1. Academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted without sufficient course background in the intended program of study).
 - c. Adequate GRE scores (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
 - d. *International applicants only*: Minimum 580 TOEFL score (237 computer-based test, 92 internet-based, and 7 IELTS tests)
2. Knowledge of intended area of study
 - a. Statement of objectives in pursuing further education.

- b. Ideally work or field experience in planned area of study
- 3. References: three recommendations total
 - a. Recommendations from references familiar with applicant's academic ability and potential
 - b. Recommendations from employers in field related to applicant's educational goals
- 4. Application deadline: December 1 for admission the following autumn quarter.

Degree Requirements

48 credits

- 1. SEFS 500, SEFS 509, SEFS 526 (7 credits)
- 2. *Directed electives*: 36 credits distributed among the following four areas, with at least two courses in each area: forest biology/ecology, forest management, forest measurements, forest policy and administration. See adviser for list of approved courses.
- 3. *Capstone project*: SEFS 600 or SEFS 601 (5 credits)

Master of Science

Admission Requirements

- 1. Academic readiness for the program
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted without sufficient course background in the intended program of study)
 - c. Adequate GRE Scores (153 Verbal; 144 Quantitative; 4.0 Writing recommended)
 - d. *International applicants only*: minimum TOEFL score of 580 (237 computer-based test, 92 internet-based test)
- 2. Knowledge of intended area of study
 - a. Statement of objectives in pursuing further education
 - b. Ideally work or field experience in planned area of study
- 3. References: three recommendations total
 - a. Recommendation from references familiar with applicant's academic ability and potential
 - b. Recommendations from employers in field related to applicant's educational goals

Degree Requirements

Minimum 45 credits

- 1. *Orientation*: SEFS 500 (1 credit)
- 2. *Analysis of Research Problems*: SEFS 509 (3 credits)
- 3. *Disciplinary Knowledge*: minimum 10 credits from list of approved courses
- 4. *Research Design and Quantitative Analysis*: minimum 8 credits from list of approved courses
- 5. *Current Topics*: 2 credits (500 level), topics vary from year to year
- 6. *Thesis Research*: SEFS 700 (9 credits minimum)

7. *Electives*: (12 credits)

Doctor of Philosophy

Admission Requirements

1. Academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted without sufficient course background in the intended program of study)
 - c. Adequate GRE Scores(153 Verbal: 144 Quantitative; 4.0 Writing recommended)
 - d. *International applicants only*: Minimum 580 TOEFL score (237 computer-based test, 92 internet-based test)
2. Knowledge of intended area of study
 - a. Statement of objectives in pursuing further education. PhD applicants should have earned a master's degree; most apply for the master's and then continue on to the PhD.
 - b. Ideally work or field experience in planned area of study
 - c. Publications written by the student related to planned area of study
3. References: three recommendations total
 - a. Recommendations from references familiar with applicant's academic ability and potential
 - b. Recommendations from employers in field related to applicant's educational goals
4. Application deadline: December 1 for admission the following autumn quarter.

Degree Requirements

90 credits

1. Same as for master of science degree (above) with one additional course in each category
 - a. Disciplinary knowledge
 - b. Research design and quantitative analysis
 - c. Current topics
2. Qualifying examination
3. General examination
4. Dissertation research: SEFS 800 (27 credits minimum)
5. Final examination

Financial Assistance

A limited number of appointments for teaching and research assistantships provide a stipend, tuition waiver, and benefits. Teaching and research assistant responsibilities are half-time, allowing for a full academic load. Students may contact faculty directly about available research assistantships.

Fellowships without teaching or research obligations are also available. All applicants who meet the priority deadline are considered for fellowship funding.

Marine and Environmental Affairs

School Overview

3707 Brooklyn Avenue Northeast

The School offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses in marine affairs, economics, law, marine sciences, and public affairs, with emphasis on human dimensions of the environment.

Graduate Program

Graduate Program Coordinator
3707 Brooklyn NE, Box 355685
(206) 543-4326, (206) 543-7004
uwsmea@uw.edu

Master of Marine Affairs

Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

The program prepares students for professional careers in policy making, management, teaching, and research. Students gain familiarity with relevant aspects of the social, technological, and environmental sciences.

Completion of the MMA program normally requires two academic years. In the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. In the second year, students develop competence in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and prepare a thesis, complete a capstone project, or complete additional coursework for the courses-only option. . Studies may be adjusted to accommodate prior experience and academic background.

Admission Requirements

1. Graduate Record Examination general-test scores
2. Departmental supplementary information form
3. Three letters of recommendation
4. Official academic transcripts
5. Statement of career objectives
6. Students are normally admitted for autumn quarter only.

Degree Requirements

59 credits as follows:

- **Core Curriculum (29 credits minimum)**
 1. Introduction to Marine Affairs: SMEA 500 , SMEA 501, SMEA 502
 2. Economics: SMEA 536. If SMEA 536 is waived, students must still take at least one economics course at the 400 or 500 level.
 3. Marine Law: SMEA 515
 4. Policy Analysis: SMEA 519
 5. Policy Processes: one of SMEA 507 or SMEA 521
 6. Marine Science: SMEA 591. If SMEA 591 is waived, students must still take at least one 400- or 500-level science course
 7. Research (Quantitative) Skills: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals, and regression equations. Students not at this level take one appropriate course. Recommended courses include SMEA 584, Q SCI 381, or STAT 311. One additional course in research skills (minimum 3 credits) for students in the thesis track.
 8. Marine and Environmental Affairs Advising: SMEA 600 (1 credit in winter and spring required the first year.
- **Electives (Minimum number of elective credits to meet 59-credit total):** To include at least 6 credits from a minimum two SMEA courses.
- **Thesis and Thesis Presentation (15 credits minimum):** SMEA 700
- **Capstone Credits and Presentation (9 credits):** SMEA 650

Financial Aid

The School offers a limited number of positions for graduate student appointments as research assistants. Applicants are urged to investigate outside sources of funding.

Oceanography

School Overview

108 Oceanography Teaching Building

Oceanography - study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere - is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. As an interdisciplinary science, oceanography integrates the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

Biological Oceanography examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.

Chemical Oceanography investigates the complex chemistry, distribution, and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them, and their origins and fates.

Marine Geology and Geophysics studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

Physical Oceanography endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

Undergraduate Program

Adviser

108 Oceanography Teaching Building, Box 357940
(206) 543-5039

student@ocean.washington.edu

The School of Oceanography offers the following programs of study:

- Bachelor of Arts degree with a major in oceanography
- Bachelor of Science degree with a major in oceanography
- Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
- A minor in oceanography
- A minor in marine biology (offered jointly with the Departments of [Biology](#) and [Aquatic and Fishery Sciences](#))

- A minor in climate science (offered jointly with the Departments of [Atmospheric Sciences](#) and [Earth and Space Sciences](#))
- A minor in arctic studies (offered jointly between the [Jackson School of International Studies](#) and the [School of Oceanography](#))

Bachelor of Arts

Suggested Pre-College Courses: Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, physics, and earth sciences recommended.

Suggested First- and Second-Year College Courses: MATH 124; CHEM 120 or CHEM 142 and CHEM 152; BIOL 180, BIOL 200; ESS 210 or ESS 211; PHYS 121; either OCEAN 215 or CSE 160; OCEAN 200, OCEAN 201, OCEAN 210, OCEAN 220, OCEAN 285, OCEAN 286, and OCEAN 295; and English composition.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

All majors must satisfy the College of the Environment general education requirements. University-required additional writing credits may include OCEAN 220, OCEAN 443, and OCEAN 445.

Major Requirements

Minimum 104 credits

1. Core requirements (79 credits): PHYS 121; MATH 124, MATH 125; CHEM 120 or CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 286, OCEAN 295, OCEAN 310, OCEAN 320, OCEAN 330, OCEAN 351
2. Elective foundational science (5 credits): one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270
3. 300- or 400-level oceanography coursework that may include the senior thesis sequence, selected in the student's area of specialization, in consultation with a faculty adviser (minimum 10 credits)
4. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (10 credits)

Bachelor of Science

Suggested Pre-College and First- and Second-Year College Courses: Same as for Bachelor of Arts degree (shown above)

Department Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

Same as for the Bachelor of Arts degree (shown above).

Major Requirements

Minimum 116 credits

1. *Core requirements(79 credits):* PHYS 121 ; MATH 124, MATH 125; CHEM 120 or CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 286, OCEAN 295, OCEAN 310, OCEAN 320, OCEAN 330, OCEAN 351.
2. *Senior thesis sequence (8 credits):* OCEAN 443, OCEAN 444, OCEAN 445
3. *Elective foundational science (5 credits):* one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270
4. 300- or 400-level oceanography coursework selected in the student's area of specialization, in consultation with a faculty adviser (9 credits)
5. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (15 credits)

Students with introductory science and mathematics courses equivalent to those listed are encouraged to contact the Oceanography adviser.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements: 26 credits

1. OCEAN 200, OCEAN 210
2. One of the following sequences: OCEAN 285, OCEAN 286, and OCEAN 320; or OCEAN 295 and OCEAN 330; or one of ESS 210 or ESS 211 and OCEAN 310
3. 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

Minor in Arctic Studies: See entry for [Arctic Studies](#) in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Minor in Marine Biology: See entry for [Marine Biology](#) in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Minor in Climate Science: See entry for [Climate Science](#) in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally students acquire familiarity with the specialized instruments of oceanographic research.

The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.

- *Instructional and Research Facilities:* The school has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The school operates two research vessels: the 274 foot R/V *Thomas G. Thompson*, used chiefly for open ocean research throughout the world, and the 65 foot R/V *Clifford A. Barnes*, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.
- *Department Scholarships:* See adviser for availability.
- *Student Organizations/Associations:* The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

Graduate Program

Graduate Student Services
108 Ocean Teaching, Box 357940
(206) 543-5039
student@ocean.washington.edu

The school provides instruction and research opportunities at the graduate level: biological, chemical, and physical oceanography, and marine geology and geophysics. The program emphasizes independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students work across scientific boundaries. Coursework during the first two years is required in each option; specialized coursework is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

Master of Science

Includes coursework in the student's area of interest and the other oceanography options, as well as completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives, which may include any or all of the following: how or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms. Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants out of school for some time may include recommendations from employer(s), should include at least one letter from academic faculty.

Degree Requirements

36 credits

1. *Thesis program*: Minimum 36 quarter credits (27 course credits and 9 credits of thesis). *Non-thesis program*: Minimum 36 quarter credits of coursework.
2. Minimum 18 credits numbered 500 and above. (In a thesis program, 9 credits may be OCEAN 700.)
3. Numerical grades in at least 18 quarter credits taken through the UW. Minimum cumulative 3.00 GPA
4. Minimum three full-time quarters of residence credit. Part-time quarters may be accumulated to meet this requirement.
5. Final master's examination

Biological Oceanography Option: OCEAN 530 , OCEAN 531 , OCEAN 532 , OCEAN 533. Minimum 3 credits of advanced biological oceanography courses.

Chemical Oceanography Option: OCEAN 520. Minimum three advanced chemical oceanography courses.

Marine Geology and Geophysics Option: OCEAN 540 , OCEAN 541 , OCEAN 545

Physical Oceanography Option: OCEAN 500 , OCEAN 510 , OCEAN 511 , OCEAN 512 , OCEAN 513 , OCEAN 514 , OCEAN 515 , OCEAN 517. Three courses in applied mathematics.

Out-of-Option Requirement: Minimum one 3-credit, numerically graded, 500-level course from each option outside the student's own (9 credits). See department website for list of suitable courses.

Doctor of Philosophy

Strong emphasis on research following completion of course requirements and the general examination. Upon successful completion of the general examination, the student undertakes an original research investigation, described in the dissertation and defended during the final examination.

Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives (to be defined in online application), which may include any or all of the following: how or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms (available in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants out of school for some time may include recommendations from employer(s), but should be made to include at least one letter from academic faculty.

Degree Requirements

Minimum 90 credits

1. Half the total program, including dissertation credits, in courses numbered 500 and above. Minimum 18 credits of coursework at the 500 level and above completed prior to the general examination.
2. Minimum three years (nine full-time quarters) of resident study, two through the UW. At least three full-time quarters (not necessarily continuous) taken through the UW and completed prior to the general examination. Residence requirement cannot be met solely by part-time study. Minimum two academic years of resident study completed before the general examination.
3. An appropriate master's degree from an accredited institution may be applied toward one year of resident study through the UW.
4. Numerical grades in at least 18 quarter credits of coursework taken through the UW. Minimum 3.00 cumulative GPA.
5. General examination
6. Dissertation, credit for which should be at least one-third of total credits.
7. Final examination, usually devoted to the defense of the dissertation and the field with which it is concerned

Biological Oceanography Option: OCEAN 530, OCEAN 531, OCEAN 532, OCEAN 533. Minimum 9 credits of advanced biological oceanography courses.

Chemical Oceanography Option: OCEAN 520. Minimum six advanced chemical oceanography courses.

Marine Geology and Geophysics Option: OCEAN 540 , OCEAN 541 , OCEAN 545

Physical Oceanography Option: OCEAN 500 , OCEAN 510 , OCEAN 511 , OCEAN 512 , OCEAN 513 , OCEAN 514 , OCEAN 515 , OCEAN 517. Three courses in applied mathematics.

Out-of-Option Requirement: Minimum one 3-credit, numerically graded, 500-level course from each option outside the student's own (9 credits). See department website or adviser for list of suitable courses. Students complete this breadth requirement prior to receiving an MS degree.

Financial Aid

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

Quantitative Science

Program Overview

The Center for Quantitative Science is an interdisciplinary program administered by the College of Environment with cooperation from the School of Aquatic and Fishery Sciences and the School of Environmental and Forest Sciences. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the [School of Environmental and Forest Sciences](#) and the [School of Aquatic and Fishery Sciences](#).

Adviser
006 Anderson Hall, Box 352100
(206) 543-1191
cqs@uw.edu

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

Undergraduate Program

The Center for Quantitative Science offers the following program of study:

- A minor in quantitative science

Minor

Minor Requirements: A minimum of 27 credits, as follows:

1. *Core courses (24-25 credits):* Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482; Q SCI 483 (or Q SCI 403/STAT 403)
2. *Electives (3-5 credits):* Selected from an approved list of electives, a partial list of which includes Q SCI 210/ENVIR 210, Q SCI 403/STAT 403 (if not taken as part of core courses, above), Q SCI 454/FISH 454, Q SCI 480/STAT 480, Q SCI 483 (if not taken as part of core courses, above), Q SCI 486/STAT486. See adviser for possible additional qualifying courses.
3. A minimum 2.0 grade is required in each course taken as part of the minor.

Quaternary Research Center

Program Overview

19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:

1. To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
2. To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
3. To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.
4. To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
5. To seek applications of quaternary studies to modern environmental problems that help predict consequences of policy decisions.

Graduate Program

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

Research Facilities

QRC Resource Center

A specialized collection includes books, monographs, theses, journals, and maps; and a large, diverse reprint collection. Searches for library material can be conducted via the QRC [web page](#).

Cosmogenic Nuclide Laboratory

John Stone, Director

Analyzes rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on Quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory's [website](#).

Geochemistry Library

Ronald S. Sletten, director

Analyzes of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. Primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physicochemical soil processes in Antarctica and Alaska.

Periglacial Laboratory

Bernard Hallet, Director

Research focuses on diverse processes at the interface between glaciology and geomorphology fundamental to understanding landscapes and soils in alpine and polar regions. The laboratory does experimental research on periglacial processes with special attention to complex phenomena associated with freezing soils and rocks. The laboratory also serves as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

Stable Isotope Laboratory

Eric J. Steig, Director

The main center for stable isotope studies for the QRC. Current emphasis is development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities include off-line and online preparation systems for D/H and $^{18}\text{O}/^{16}\text{O}$ on water $^{13}\text{C}/^{12}\text{C}$ on carbonates and organic materials, and $^{15}\text{N}/^{14}\text{N}$ on nitrate and organics. Additional information is available on the laboratory's [website](#).

The Information School

School Overview

370 Mary Gates Hall
Box 352840

Dean

Anind Dey

Associate Deans

Carole Palmer, Research

Matthew Saxton, Academics

Joseph Tennis, Faculty Affairs

Never in our society's history has there been such a great need to manage so much information quickly and efficiently. The Information School is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate, and share information.

The School offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and PhD in Information Science. The School also offers a certificate program, continuing education opportunities for professionals, and service courses for undergraduates in information fluency, research strategies, and technology. Graduates of the School assume a variety of professional roles in the public, private, and non-profit sectors, with positions that span from information architects to children's librarians, from web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information field.

The community is highly interdisciplinary, bringing together a variety of social science traditions, including: library and information science, computer science, sociology, communication, philosophy, and engineering. Most research addresses topics in the following broad categories:

- Data Science
- Digital Youth
- Health and Well-Being
- Human-Computer Interaction
- Indigenous Knowledge
- Information and Society
- Learning Sciences
- Library and Information Science
- Sociotechnical Information Systems

The School's work remains focused on the human impact of information. The research and curriculum of the school examines information systems and technology from a **user-centered perspective**. By retaining a focus on the human impact of information systems and technology, the School builds on its community values of trust, transparency, and mutual respect.

History

Originally established in 1911, the Information School has the oldest library and information science program west of the Mississippi, and continues to offer the most highly-regarded American Library Association-accredited library and information science degree in the Western United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, faculty, and state of the art facilities, the Information School became the University's sixteenth independently organized school/college in 2001.

The School explores the cutting edges of the information field, in theory and practice. It nurtures the best of both worlds: traditional library values and preparedness for ever-changing information frontiers.

Vision

The School envisions a world where more effective use of information helps everyone discover, learn, innovate, solve problems, have fun, and make a better world. Information changes lives.

Mission

The School prepares information leaders through researching the problems and opportunities of information, designing solutions to information challenges, and making information work.

Informatics students design, build, implement, and secure information systems that meet human, organizational, and societal needs.

Students have a strong people focus and they excel as user experience designers, business analysts, data managers, information architects, web developers, and information assurance professionals.

Undergraduate Program

Adviser
420 Mary Gates Hall
Box 352840
(206) 543-1794
informatics@uw.edu

The Information School offers both a major and minor in Informatics. The Informatics major, a Bachelor of Science degree, offers students the opportunity to earn transcriptable options in human-computer interaction, information architecture, information assurance and cybersecurity, biomedical and health informatics, and data science.

Bachelor of Science

Suggested First- and Second-Year College Courses: INFO 101, INFO 200, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 221, STAT 311, STAT 390, STAT 293, or Q METH 201; courses that develop strong analytical, qualitative, and quantitative reasoning skills; courses that develop strong written and oral communication skills; courses that provide exposure to a variety of social science fields such as psychology, sociology, anthropology, or philosophy.

Program Admission Requirements

Regular Admission

1. INFO 200*; either CSE 142, CSE 143, CSE 154, CSE 160, CSE 163, INFO 180/STAT 180/CSE 180, or INFO 201; either STAT 221, STAT 311, STAT 390, or QMETH 201; one English composition course from the list on the iSchool website, with a minimum 2.0 grade in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses.
2. Minimum 2.00 cumulative college GPA.
3. Admission is capacity constrained, based on the following criteria:
 - a. Overall academic performance
 - b. Grades in courses required for admission to the major
 - c. Personal statement reflecting an interest in and commitment to becoming a major in this field
 - d. Other evidence of interest in and commitment to the field (e.g., work experience, internships).

Meeting the above criteria does not guarantee admission.

4. Admission for current upper-division UW students and transfer students occurs twice a year for autumn and winter quarters. The application process begins prior to the admitted quarter. Application deadlines:
 - a. First Friday of spring quarter for admission the following autumn quarter.
 - b. First Friday of autumn quarter for admission winter quarter.

Students apply online at www.ischool.uw.edu.

*Since equivalents to INFO 200 are not common, students who have transferred or will transfer to the UW can apply to the program and be admitted with the provision that they complete INFO 200 with a minimum 2.0 grade before the end of their first year in the program.

Freshman Direct Admission Program (FDAP)

1. Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.
2. The number of early admission (FDAP) students does not exceed 10 percent of the number of majors admitted each year.

Major Requirements

86-92 credits

1. Courses required for admission (18-19 credits, as shown above)
2. Core courses (52-53 credits): INFO 201, INFO 290, INFO 300, INFO 330, INFO 340, INFO 350, INFO 360, INFO 380, INFO 490 (4), INFO 491 (4), CSE 143; one of CSE 373, INFO 442, INFO 443.
3. Areas of study (16-20 credits): Students may choose a transcriptable option in human-computer interaction (HCI), information architecture (IA), information assurance and cybersecurity (IAC), biomedical and health informatics, or data science. (See below.) Alternatively students may work with their adviser to select a minimum of four classes (16-20 credits) to create a customized program aligned with their personal interests or career goals.

General Education and Areas of Knowledge

1. English composition (5 credits)
2. Quantitative/Symbolic Reasoning (5 credits)
3. Writing courses (10 credits)
4. Natural World (20 credits)
5. Individuals & Societies (20 credits)
6. Visual, Literary, & Performing Arts (20 credits)
7. Diversity (3 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirement (Natural World; Individuals & Societies; Visual, Literary, & Performing Arts).

Options

Human-Computer Interaction (HCI) Option (16-20 credits): Minimum four courses from the areas listed below, with the following distribution:

1. At least one course in two of the following areas: user interface software and technology; design; usability and user research; social and ethical dimensions. See department website for approved area courses.
2. At least one course from the approved area list from a participating department outside the Information School (Art, Computer Science, or Human Centered Design & Engineering). See department website for approved area courses.
3. Special topics courses such as INFO 498, CSE 190, HCDE 490, and HCDE 496 may be approved within any of the course areas below on an individual, per-course basis, depending on subject matter.

Course areas

1. Foundations: ART 383, CSE 440, HCDE 319
2. User Interface Software and Technology: CSE 441, INFO 344, HCDE 438

3. Design: ART 483, ART 484, INFO 424, HCDE 455
4. Usability and User Research: INFO 310, HCDE 317, HCDE 318
5. Social and Ethical Dimensions: INFO 444, INFO 447

Information Architecture (IA) Option (16-20 credits). Minimum four courses from an approved list. See department [website](#) for list.

Information Assurance and Cybersecurity Option (16-20 credits). See department [website](#) for list.

1. *Foundation Course:* INFO 310 or equivalent
2. Minimum three additional courses from an approved list (11-15 credits). Includes courses at participating departments on all three UW campuses. See program website for list: ischool.uw.edu/academics/informatics/degree-options. No more than one of these three may be a networking course (INFO 341, T INFO 250, or CSS 432).

Biomedical and Health Informatics Option (20 credits): BIME 300, BIME 435, INFO 468, INFO 478

Data Science Option (20 credits): INFO 370, INFO 371, INFO 445, INFO 474

Minor

Minor Requirements: Minimum 25 credits

1. INFO 200, INFO 201 (10 credits)
2. INFO 300-/INFO 400-level courses, providing depth in data, design, or development. Minimum 3 credits covering ethics, policy, and/or equity dimensions of information technology. See department for list of approved courses. (15 credits)
3. Minimum 2.00 cumulative GPA for courses applied to the minor.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes

- *Learning Objectives and Expected Outcomes:* The informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

Graduates of the informatics program are qualified for jobs in the information and technology industry and in business, public service, and other professions. Possible job titles include user experience designer, business analyst, consultant, usability engineer, data manager, information architect, web developer, network manager, project manager, and information assurance professional.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information

and management science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student-learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively; ability to manage projects; ability to build working systems; ability to organize and manage information; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- *Instructional and Research Facilities:* Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) laboratory, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia production, web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- *Honors Options Available:* With College Honors; With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Distinction (Departmental Honors). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. A significant percentage of informatics students participates in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- *School Scholarships:* The Henry Scholarships, in the amount of approximately \$1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
- *Student Organizations/Associations:* Undergraduates participate in a number of the School's many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

Of Special Note:

Capstone Projects: Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. Through capstone projects, students demonstrate the skills, understanding, and competencies they can successfully use to prepare for employment and graduate studies.

Information Sessions: Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the School website at ischool.uw.edu/events.

Graduate Programs

The School offers graduate programs leading to the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy (PhD) in Information Science.

Master of Library and Information Science

MLIS Adviser
420 Mary Gates Hall, Box 352840
(206) 543-1794
mlis@uw.edu

Admission Requirements

Offered in two delivery modes: residential (on-campus, full-time two-year program) and online (part-time three-year program). Applicants must indicate for which program they are applying. Applications should also include:

1. Personal statement of educational and professional goals
2. Answers to supplemental questions
3. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
4. Three letters of recommendation
5. Transcripts from each relevant institution attended
6. TOEFL score (for international students)

Degree Requirements

63 credits

1. *Core Curriculum (31 credits):* LIS 500, LIS 510, LIS 520, LIS 530, LIS 550, LIS 560, LIS 570, LIS 580, and one information technology core course.
2. *Electives (27 credits):* Options vary and allow students to design a problem of study specific to their interests and career goals.
3. *Capstone (5 credits):*
4. *Optional Internship: Directed Fieldwork: LIS 590*

Master of Library and Information Science, Law Librarianship

Designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

Admission Requirements

1. Personal statement of educational and professional goals
2. Answers to supplemental questions
3. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
4. Three letters of recommendation
5. Transcripts from each relevant institution attended
6. Earned JD prior to enrollment in the MLIS program
7. TOEFL score (for international students)

Degree Requirements

43 credits

1. *Core Curriculum (23 credits)*: LIS 500, LIS 510, LIS 520, LIS 526, LIS 530, LIS 550, LIS 587
2. *Law Librarianship Courses (16 credits)*: LIS 592, LIS 593, LIS 594, LIS 595. The final degree project is completed as part of LIS 595.
3. *Internship (4 credits)*: directed fieldwork (LIS 590)

Master of Science in Information Management

MSIM Adviser
420 Mary Gates Hall, Box 352840
(206) 543-1794
msim@uw.edu

Admission Requirements

1. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE or GMAT scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE or GMAT scores.
6. Non-native English speakers must fulfil the English language proficiency requirement. See <http://www.grad.washington.edu/policies/memoranda/memo08.shtml>
7. Mid-career applicants must show five years of relevant work experience in management or technology.

Degree Requirements, Full-Time Option

65 credits minimum

1. *Core Curriculum*: IMT 500, IMT 535, IMT 55, IMT 570
2. *Capstone (5 credits)*: INFX 595, INFX 596
3. *Electives (24 credits)*: Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. Specializations include data science, information architecture, information security, user experience design, and information management and consulting.
4. *Internship*: Structured around IMT 590. While not required, internships are strongly encouraged. Internship credits fall under electives.

Degree Requirements, Mid-Career Option

47 credits minimum

1. *Core Curriculum (16 credits)*: IMT 500, IMT 535, IMT 550, IMT 570
2. *Capstone (optional 5 credits)*: INFX 595, INFX 596
3. *Electives (26 credits)*: Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. Specializations include data science, information architecture, information security, user experience design, and information management and consulting.

All students in the MSIM program may elect to complete one or more of the following specializations:

- a. *Date Science and Analytics (19-20 credit)*: Methods, tools, and frameworks for analyzing and deriving insight from large-scale, heterogeneous data.
- b. *Information Architecture and Organization (17-20 credits)* Assessing existing information structures and creating new systems to effectively structure information.
- c. *Information Management and Consulting (18-20 credits)*: Developing and managing information policies, strategies, innovations, projects, and initiatives in public, private, and non-profit institutions.
- d. *Information Policy and Society (13-17 credits)*: Strategies and processes for critical analysis, development, and management of information policies and social, cultural, and policy issues.
- e. *Information Security (9 credits)*: Quality, security, and appropriate use of information assets.
- f. *User Experience (20-21 credits)*: Designing, prototyping, and formally evaluating interactive information interfaces, systems, and experiences from a user-centered perspective.

For more information visit <https://ischool.uw.edu/academics/msim/curriculum/specializations>

Doctor of Philosophy in Information Science

Adviser

420 Mary Gates Hall, Box 352840

(206) 543-1794

ischoolphd@uw.edu

Admission Requirements

1. Current curriculum vitae highlighting any academic and/or work experience, honors, publications, presentations, and research experience
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE Scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE scores.
6. TOEFL score (for international students)

Degree Requirements

90 credits minimum

1. *Required courses:* INSC 500, INSC 501, INSC 570, INFC 571, INSC 572; two research practica; two teaching practica
2. Additional elective coursework selected in consultation with faculty advisers
3. 18 graded credits in courses at the 500 level and above (taken prior to general examination)
4. 60 credits taken prior to general examination
5. 27 dissertation credits (INSC 800)
6. Preliminary review determined by a School-based advisory committee at the end of the required first year of full-time study
7. General examination
8. Final examination

Financial Aid

For information on submitting the FAFSA, contact the UW Financial Aid Office, 105 Schmitz Hall. Information also available [online](#).

Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. Prospective MLIS and MSIM students may apply during the admission process and throughout the year as other positions become available. Visit the Student Employment Opportunities page at ischool.uw.edu/jobs/students. All students admitted to the PhD program are guaranteed a minimum four years of funding.

MLIS and MSIM admission committees award a limited number of merit-based scholarships to incoming students. Continuing students also may apply for scholarships. All eligible applicants and students are encouraged to complete the FAFSA each year.

Additional scholarship and financial aid information:

MLIS, <https://ischool.uw.edu/future/mlis/financial-aid>

MSIM, <https://ischool.uw.edu/future/msim/financial-aid>

PhD, <https://ischool.uw.edu/future/phd/funding>

Special Research Facilities

An extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) lab, a DataLab for Data Science and Analytics, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, web development, Internet exploration and collaboration, and office productivity; also, access to bibliographic databases and commercial information services.

A dedicated information science research facility at the Roosevelt Commons Building.

A dedicated information science research facility in Bloedel Hall.

Continuing and Professional Education

The Information School, working with UW Professional and Continuing Education, offers classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include web technology solutions; information assurance and cybersecurity; and school library professional. Contact UW Professional and Continuing Education, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: (206) 543-2320 or see www.pce.uw.edu/.

Interdisciplinary Graduate Programs

Astrobiology

Program Overview

C319 Physics-Astronomy Building

Astrobiology - the study of life in the universe - investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond. Such investigation demands intense interdisciplinarity, for which the astrobiology program at the UW is creating a community of scholars, investigators, and educators.

Astrobiology at the UW builds on the strengths of traditional academic structure to transcend the limits of specialization.

The graduate certificate program offers an interdisciplinary curriculum in cooperation with the PhD programs of participating departments. Participating graduate students gain personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

Graduate Program

Graduate Program Coordinator
C304 Physics-Astronomy, Box 351580
(206) 685-2392
office@astro.washington.edu

Graduate Certificate Program

Participating UW academic departments: Aeronautics and Astronautics; Astronomy; Atmospheric Sciences; Biochemistry; Biology; Genome Sciences; Earth and Space Sciences, History (of Science), Microbiology; Oceanography

Admission Requirements

Students must be accepted for admission by the PhD program of one of the departments listed above.

Certificate Requirements

15 credits minimum

1. ASTBIO 501, ASTBIO 502
2. Three astrobiology-only seminar series (1 credit)
3. One approved cognate course (see program website for current list of cognate courses)
4. Research rotation in an area outside the student's home discipline (one quarter, 3 to 10 credits)

5. Minimum three workshops comprising the capstone experience (non-credit)
6. Astrobiology ethics seminar (variable credits)

Additional credits may be earned through:

- Other approved cognate courses
- Astrobiology public lecture series (1 credit)

Minimum cumulative 3.00 GPA for all required courses and minimum 2.7 grade for each elective course.

Biomolecular Structure and Design

N107 Foege, Box 355061

The department's graduate program educates doctoral students for careers involving teaching or research in the biomedical sciences. Graduates have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Students select research and teaching options. Research options provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical sub-disciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

Graduate Program

Graduate Program Coordinator
G514 Health Sciences, Box 357420
206-543-5474

Master of Science

Admission Requirements

1. Minimum 3.00 GPA
2. Bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
3. GRE
4. Minimal course requirements for successful applicants:
 - a. Chemistry: general, organic, and physical
 - b. Physics: one year
 - c. Mathematics: one year of calculus; multivariable calculus and/or linear algebra strongly recommended
 - d. Biology and/or biochemistry: one year general biology plus one advanced course in biology or biochemistry
5. Undergraduate research experience strongly recommended
6. International students must have a minimum score on one test as follows: 7.0 IELTS; 92 TOEFL iBT; 237 TOEFLC; 580 TOEFL; 90 MLT.
7. International students planning to study with BMSD faculty in the Chemistry Department must have a minimum score on one test as follows: 26 on the speaking portion of the TOEFL iBT; 7.0 on the speaking portion of the IELTS; 70 on the Versant English Test; 55 on the TSE; 230 on the SPEAK test administered at the UW.

Degree Requirements

36 credits

1. *Required courses:* BIOC 530; BMSD 540, BMSD 541, BMSD 542; BMSD 520 taken every quarter
2. 12 graded elective credits covering at least three of the following four BMSD topics: biomolecular structure, techniques in biomolecular structure, molecular and cellular biology, and chemistry
3. At least one sequence of Biomedical Research Integrity workshops in the first or second year, offered summer quarter each year.
4. *Teaching:* serve as teaching assistant two quarters
5. *Research:* rotate through a minimum of two and a maximum of three participating laboratories during the first year Students may also do an early rotation during summer quarter.

Biology Teaching

Program Overview

The Biology Teaching Group offers an interdisciplinary master of science degree for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. Each student performs an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science.

Graduate Program

Graduate Program Coordinator
222 Hitchcock, Box 355320
(206) 543-1689

Master of Science

Admission Requirements

1. Secondary teaching certificate or evidence of professional involvement in K-12 or public education
2. Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
3. Minimum 3.00 GPA in the most recent 90 graded quarter credits (60 semester credits)
4. GRE test scores
5. Two or three letters of recommendation
6. Statement of professional experience and objectives

Degree Requirements

36 credits

1. Minimum 18 graduate-level credits; 18 graded credits (categories are not mutually exclusive)
2. All coursework at the 400 level or above
3. Minimum one course from each of the following areas: botany, genetics, microbiology, zoology; and from the College of Education. One course in biochemistry, unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, and related fields may be appropriate.

Environmental Management

Program Overview

274 Mary Gates Hall

The graduate certificate in Environmental Management (EM) is an interdisciplinary program that prepares students to contribute to sustainable utilization and enhancement of the natural and human environment. Students acquire tools to solve real-world environmental problems via science, policy, and business. Keystone projects provide an opportunity for graduate students to gain practical experience working in an interdisciplinary team with students from a variety of disciplines, a faculty mentor, and in collaboration with a community partner. The EM program provides education and training opportunities for graduate students preparing for management careers in the non-profit, for-profit, and public sectors, as well as for those who contribute legal, scientific, and technical expertise to environmental decision making locally, nationally, and internationally. Key benefits include:

- Broadening knowledge, perspectives, and skills through core courses, keystone projects, and participation in a community of faculty and students from various departments that share the common goal of environmental stewardship and sustainability.
- Gaining practical experience crafting interdisciplinary solutions to real-world environmental issues and making connections with community partners outside the University.
- A record on the transcript from the Graduate School documenting completion of the interdisciplinary program.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few. There is no other comparable interdisciplinary experience currently available to graduate students at the UW.

Graduate Program

Graduate Program Coordinator
274 Mary Gates Hall
Box 352802
(206) 221-6129
envirmgt@uw.edu

Graduate Certificate

Admission Requirements

1. Enrollment in a graduate and professional degree program in any school of the UW
2. Completion of a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); or social or natural science
3. Facility with written argument and communication, demonstrated in the letter of application

Courses and projects prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students

broaden their knowledge and skills base beyond their home discipline; read material from other fields with critical facility; understand and appreciate the goals and analysis methods common to other fields; and appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

Certificate Requirements

Minimum 20 credits

1. Three core courses (9+ credits): courses vary by year
2. Team-based keystone project (8 credits): ENVIR 511, ENVIR 512
3. Electives (3+ credits): selected in consultation with the Graduate Program Coordinator and approved by the EM director

Health Services Administration

Graduate Program

Graduate Program Coordinator - In-Residence and Executive Programs
H660 Health Sciences, Box 357660
(206) 543-8778
mhap@uw.edu

Health Services Administration offers two tracks for earning a Master of Health Administration (MHA) degree: a traditional day program (MHA) and an executive program (EMHA).

The MHA provides the educational foundation for careers in management, planning, consulting, and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the healthcare field.

The program develops leaders prepared to transform healthcare organizations and systems at the local, regional, and national level. Interdisciplinary priority is evidenced by faculty assembled from the graduate schools of Public Health, Foster School of Business, Public Affairs, Nursing, Medicine, and Law, as well as from healthcare administration leaders in the Seattle metropolitan area.

Concurrent degree programs combining health administration with business, medicine, law, public health, or public administration are also an option for in-residence students. Many can be completed in three years of intensive academic study.

For in-residence MHA students, the two-year academic experience is augmented by a career development program with opportunities for mentorships with regional healthcare leaders, an internship experience in a health facility or agency – typically under the preceptorship of the administrator or director of that organization.

The Executive Master of Health Administration (EMHA) is primarily for mid-career physicians and other clinical practitioners, as well as experienced health services managers, who have demonstrated interest or competency in administration or management. The team-based learning model positions students for leadership roles within such an environment. Executive students build critical competencies while benefiting from the expertise already held among the working professionals in the classroom. EMHA classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 24 months. Additionally, once each week faculty lead students in a web-based session, ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

Both the MHA and EMHA programs are fee-based and administered in collaboration with UW Professional & Continuing Education. Complete application details are at www.mha.uw.edu and www.executivemha.edu.

Financial Aid

Students enrolled in both the MHA and EMHA programs are eligible for federal financial aid, as well as most other types of financial support not funded by state tuition revenues. When exploring financial aid options, students should emphasize they are applying for a fee-based program. Financial aid questions should be directed to the UW Office of Student Financial Aid (206) 543-6101, osfa@uw.edu.

Individual PhD Program

Graduate Program Coordinator
311 Loew Hall, Box 352192
(206) 543-6398

The Graduate School maintains a PhD degree granting unit, the Individual PhD (IPhD) program, for exceptionally able students in high academic standing whose objectives for study are so truly interdisciplinary that they cannot be met within one of the University units authorized to grant the PhD degree. The program is intended for dissertation topics which require supervision from two or more programs through which the University offers the PhD. Each individual program is designed by a student with input and continued guidance from the student's Supervisory Committee.

The IPhD program is not intended to be:

- a. a mechanism for offering the PhD degree within units which do not have their own authorized PhD programs
- b. used as an alternative for students unable to gain admission to an established program
- c. sufficient justification alone for admission into the program on the basis of placing faculty from more than one department on a Supervisory Committee

Because the University's primary commitment is to established disciplinary and interdisciplinary programs, the IPhD program is quite small. Unusual student ability and motivation, as well as an increased level of attention from the entire Supervisory Committee, are required for successful completion of an IPhD degree. Admission standards are intended to exceed those of established PhD programs, and applications are reviewed at several levels.

Applications are considered once a year; admission is competitive. All decisions are final with no appeal procedures available. A rejected application can be submitted in revised form another year though a second rejection is possible. Applicants are therefore encouraged to pursue their objectives within the University's established PhD programs whenever feasible.

Doctor of Philosophy

Admission Requirements

1. MA or equivalent in a discipline or field directly related to the proposed PhD work
2. Application deadline for autumn quarter admission is February 1. See application procedures at www.grad.washington.edu/students/interdisciplinary/iphd/index.shtml.

Degree Requirements

Specific coursework and areas of concentration are determined by the student's interests within the framework of the approved proposal. The Supervisory Committee functions as for any doctoral program, signs the forms ordinarily transmitted by the sponsoring academic unit, and takes responsibility for conducting an annual review of the student's progress and submitting a report to the Standing Review Committee. IPhD students must meet all program requirements as stipulated in the IPhD Program Manual as well as Graduate School doctoral requirements as stipulated in the current UW General Catalog.

A student's PhD Supervisory Committee, which consists of at least three members of the UW's Graduate School faculty as well as a representative of the Graduate School (GSR), must include Graduate Faculty

members from at least two University units which offer the PhD degree. For additional information regarding Supervisory Committees, refer to Graduate School Memo 13 or the UW General Catalog.

Molecular and Cellular Biology

Program Overview

The Molecular and Cellular Biology program (MCB) applies the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The doctoral program broadly trains students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. The program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Twelve departments across three schools have faculty members actively pursuing research in molecular and cellular biology. They include [Biochemistry](#), [Bioengineering](#), [Biological Structure](#), [Biology](#), [Environmental Health](#), [Genome Sciences](#), [Immunology](#), [Microbiology](#), [Pathobiology](#), [Pathology](#), [Pharmacology](#), and [Physiology and Biophysics](#).

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of basic sciences and molecular medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support.

MCB has relationships with the Institute for Systems Biology (ISB) as well as Seattle Biomed, thus allowing MCB students access to laboratories conducting research using a systems approach to biology or a global focus on infectious disease.

Faculty Interests

Over 250 faculty members from the UW, the FHCRC, the ISB, and Seattle Biomed research molecular and cellular biology and are skilled in training graduate students. Faculty research interests include cancer biology; genetics: genomics and evolution; microbiology, infection, and immunity; molecular structure and computational biology; and neuroscience.

Graduate Program

Graduate Program Coordinator
T466 Health Sciences, Box 357275
(206) 543-0253
mcb@uw.edu

Doctor of Philosophy

Admission Requirements

1. Baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics preferred.

2. GRE scores. General Test. A Subject Test (e.g., biology, biochemistry, chemistry) is not required but recommended.
3. Letters of recommendation
4. Statement of purpose
5. Personal resume

Degree Requirements

90 credits

1. *Credit Requirements:* 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. MSTP students receiving a PhD through the MCB program must have 18 graded credits, and should petition MCB directors to accept medical school courses in lieu of the remaining 3 credits.
2. *First Year:* Complete most course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review and one or more graded elective classes. Following the third rotation, students generally pursue research.
3. *Second Year:* Form doctoral Supervisory Committee by the end of December, define doctoral projects, take additional elective courses, participate as teaching assistant for a minimum of one quarter, complete either a second academic teaching assistantship or an alternative education experience, and hold first committee meeting.
4. *Third Year and Beyond:* Complete the general examination. Focus on dissertation research. Final examination and dissertation.

Financial Aid

The MCB Program provides a stipend plus tuition and health benefits for the first year of study. Then students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

Museology

Graduate Program

The two-year, full-time MA program attracts students from a wide range of backgrounds including, but not limited to, art history, technology, zoology, anthropology, international studies, education, and business administration. Coursework provides the foundational knowledge for museum work, regardless of a student's area of expertise, while also creating an opportunity for students to become subject-matter experts. Many classes are project-based and connect students with working museum professionals.

uwmuse@uw.edu

washington.edu/museology/

Master of Arts

Admission Requirements

1. Admission is for autumn quarter only. Application deadline: January 15
2. Baccalaureate degree from an accredited college or university in the U.S. or its equivalent from a foreign institution
3. Minimum 3.00 (or B) GPA in most recent two years of study
4. Applicants whose native language is not English must demonstrate English language proficiency.

Degree Requirements

Minimum 60 credits

The museology graduate program takes two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and 15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll part time with permission from the program director

1. *Core*: MUS 500, MUS 599, MUS 601, MUS 700 (minimum 24 credits)
2. *Research and Evaluation*: MUS 570 (required), MUS 574, MUS 575, MUS 576 (minimum 4 credits)
3. *Organizational Development*: MUS 560, MUS 562, MUS 566, MUS 568, and approved leadership courses in other academic units (minimum 8 credits)
4. *Public Engagement*: MUS 520, MUS 524, MUS 528, MUS 588, MUS 594 (minimum 8 credits)
5. *Collections Stewardship*: MUS 540, MUS 541, MUS 542 (minimum 3 credits)
6. *Electives*: outside museology (minimum 10 credits)
7. Additional credits from items 1 through 6, above, to reach minimum 60 credits

Specialization in Museum Evaluation

Optional specialization that integrates strengths of mentoring, fieldwork, academic, and client-centered experiences. See program website for additional information.

Museology also offers a graduate certificate in museum studies for graduate students in other UW degree programs. To qualify, students take a specified minimum set of key courses in areas that emphasize either collection research and management, or museum administration and interpretation, to include hands-on work experience. The certificate program is not currently accepting applications.

Near and Middle Eastern Studies

Program Overview

The interdisciplinary PhD program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: (Judaism, Christianity, and Islam); and interdisciplinary investigations of modern topics using the social sciences. The program, administered by an interdisciplinary Graduate School faculty group, includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students must take courses in both the humanities and social sciences.

Graduate Program

Graduate Program Coordinator
311 Loew Hall, Box 352192
(206) 543-6398

Doctor of Philosophy

Admission Requirements

1. MA or equivalent in a discipline or field directly related to the proposed PhD work
2. Third-year competence in a regional language, and reading knowledge of a second language pertinent to PhD research
3. Application deadline for autumn quarter admission is February 1. Application procedures are at www.grad.washington.edu/students/interdisciplinary/nme/application.shtml.

Degree Requirements

Minimum 90 credits

Specific coursework and areas of concentration determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination.
2. Within three years of admission, completion of two advanced courses in the humanities, one in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one in the Department of History. These courses are in addition to work the student may have done at the BA and MA level.
3. Within three years of admission, completion of a graduate seminar. Two graduate seminars if none was taken at the MA level.

4. Study in three languages, two regional and one "Western" European other than English, such as French, German, Italian, Russian, or Spanish. The Supervisory Committee decides whether a fourth language is required and whether it is European or regional. Before the general examination (see below), the student completes the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.
5. Disciplinary method and theory requirements: ANTH 550 and POL S 491, or their equivalents in appropriate disciplines, strongly encouraged for all students conducting fieldwork or working with documents, whether social science or humanities focused, and for all social science-oriented students.

For students doing humanities-oriented research but not conducting fieldwork, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy).

6. Disciplinary core courses: Two disciplinary core courses in appropriate fields.

PhD Examinations and Dissertation

1. Preliminary examinations, three written and an oral.
2. General examination
3. Final examination, the PhD thesis defense

Annual Review: A subcommittee of the Near and Middle Eastern Studies program faculty meets each spring to review the progress of all students in the PhD program.

Neuroscience

Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, applied mathematics, biochemistry, engineering, molecular biology, physiology, pharmacology, and the behavioral sciences, among others.

Neuroscientists must use these different approaches in their research and training to make inroads toward solving major questions in neuroscience.

The UW's interdisciplinary graduate program in neuroscience encompasses laboratories of more than 140 faculty members in over 20 departments within the School of Medicine, College of Arts and Sciences, and College of Engineering, as well as at affiliate institutions across Seattle.

The program allows students to obtain broad training in the neurosciences through mentored research and a curriculum comprising required core courses as well as electives. Students also gain supervised teaching experience. Graduates of the program are prepared for a variety of careers involving academic, research, industrial, and public policy positions.

Graduate Program

Graduate Program Coordinator
T471Health Sciences, Box 357270
(206) 685-1647
neurogrd@uw.edu

Doctor of Philosophy

Admission Requirements

1. Baccalaureate or advanced degree; degrees emphasizing biology, physical or natural sciences, and mathematics preferred.
2. GRE scores: general test required; subject test not required
3. Minimum three (3) letters of recommendation
4. Statement of purpose and curriculum vitae detailing research experience and commitment to graduate study in neuroscience
5. Online application submitted by December 1 deadline. Applications received after December 1 may be considered at the discretion of the directors.

Applications received after the deadline are considered at the discretion of the directors.

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

Degree Program Requirements

90 credits

1. *Credit Requirements:* 18 graded credits of coursework with NEURO core curriculum and 10 credits of graded/ungraded approved elective courses
2. *First Year:* NEURO 501, NEURO 502, NEURO 503, NEURO 504, NEURO 527, NEURO 545, NEURO 559, three 10-week laboratory rotations, and three quarters of the seminar series
3. *Second Year:* Form doctoral Supervisory Committee, define doctoral projects, take additional elective courses, participate in a teaching internship for a minimum of two quarters (or equivalent), and hold first committee meeting. Complete general examination and three quarters of the seminar series.
4. *Third Year and Beyond:* Focus on dissertation research. Schedule final examination.

Financial Aid

The NEURO program provides funding for students in good academic standing for the duration of their graduate training.

Nutritional Sciences

Department Overview

305 Raitt

The Nutritional Sciences Program embraces a holistic view of the study of foods and nutrition, inclusive of social, behavioral, and environmental sciences. The interdisciplinary perspective applied to studying foods and nutrients, dietary behaviors, food and policy environments, and food systems reveals complex problems spanning personal, public, and planetary health, and leads to novel and innovative solutions. The program offers an undergraduate major (BA) and minor; graduate degrees including the MS, MPH, and PhD; and graduate-level training leading to the Registered Dietitian (RD) or Registered Dietitian Nutritionist (RDN) professional credential.

Undergraduate Program

Adviser

305 Raitt, Box 353410

(206) 221-8526

ugnutr@uw.edu

Nutritional Sciences offers the following undergraduate programs

- A bachelor of arts in food systems, nutrition, and health
- A minor in nutrition

Bachelor of Arts

Suggested First-and Second-Year Courses: anthropology, economics, environmental science, geography, nutrition, political science, public policy, sociology, sciences, statistics, composition or writing, distribution of general education courses as well as coursework that develops analytical, critical thinking, and communication skills.

Department Admission Requirements

1. NUTR 200
2. English composition (5 credits) with minimum 2.0 grade
3. Minimum 45 credits
4. Minimum 2.00 cumulative GPA
5. Upon completion of the above, students may declare the major at any time.

Major Requirements

84-85 credits

1. Science Literacy (10 credits)
 - a. BIOL 118 (preferred), or BIOL 180, or BIOL 161/BIOL 162 (through AP credits) (5 credits)

- b. CHEM 120, or CHEM 142, or CHEM 145 (5 credits)
2. Interdisciplinary Breadth (15 credits)
 - a. ECON 200, or FISH 230/ECON 230, or ESRM 235/ECON 235/ENVIR 235 (5 credits)
 - b. Approved courses representing areas that influence food systems. See adviser or website for current approved list. (10 credits)
3. Research Methods and Technologies (9-10 credits)
 - a. *Statistics*: BIOST 310, or QMETH 201, or Q SCI 381, or STAT 220, or STAT 221, or STAT 311 (4 or 5 credits)
 - b. *Methods*: ANTH 403, or BIO A 420, or ENVIR 250, or GEOG 425, or SOC 300 (5 credits)
4. Food Systems Core (30 credits with a minimum cumulative 2.00 GPA): NUTR 200, NUTR 302, NUTR 303, NUTR 402, NUTR 412, NUTR 493
5. Upper-Division Electives (20 credits): Organized around concentration areas. See adviser or website for current approved list.

Satisfactory Progress and Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor in Nutrition

Provides a foundation of knowledge in nutrition, food systems, and population health, Presents a multidisciplinary perspective on the broad field of nutritional sciences, including the interplay of food and nutrition, human behavior, business, culture, and the environment.

Minor Requirements: 25 credits

1. Core (5 credits): NUTR 200, NUTR 400
2. Electives (20 credits): selected from an approved list. See [website](#) for approved list.
3. Minimum 13 credits from School of Public Health
4. Minimum 15 credits upper-division courses
5. Minimum 15 credits outside student's major requirements
6. Minimum 15 credits in residence through the UW
7. Minimum 2.00 cumulative GPA for courses applied toward the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Food Studies, Nutrition, and Health, an interdisciplinary liberal arts major, exposes students to a complex and comprehensive model of the intersections and relationships among food, policy, labor, social justice, economics, the environment, culture, and health to prepare them to address issues such as domestic and global food and nutrition security.
- *Instructional and Research Facilities*: The School of Public Health includes over 30 research centers.
- *Honors Options Available*: See adviser for details.

- *Research, Internships, and Service Learning:* Experiential learning is available through service-learning, hands-on laboratories, and real world problem-solving activities throughout the core courses. See adviser for details.
- *Department Scholarships:* See adviser for details.
- *Student Organizations/Associations:* See adviser for details.

Graduate Program

Graduate Program Coordinator
305 Raitt, Box 353410
(206) 543-1730
nutr@uw.edu

Nutritional Sciences, an interdisciplinary program in the School of Public Health, offers Master of Science (MS), Master of Public Health (MPH), and Doctor of Philosophy (PhD) degrees. The program is designed for students who wish to pursue (1) advanced training in nutritional science or clinical research, (2) nutritional epidemiology and diet-disease interactions, or (3) public health nutrition practice.

The Graduate Coordinated Program in Dietetics (GCPD) combines the MS, MPH, and PhD programs with a supervised practice experience (internship equivalent), which gives students eligibility to take the national registration examination to become a Registered Dietitian (RD). The GCPD includes additional coursework and a nine-month practice experience at regional community, clinical, and food service facilities.

Admission Requirements for All Graduate Programs

1. Bachelor's degree in any field. Most applicants to the PhD program hold a master's degree in nutrition or a related discipline.
2. Completion of the following courses before entering: nutrition (completed at time of application), general chemistry, organic chemistry, biochemistry (two quarters or 1 semester), physiology
3. Additional requirements for international applicants whose native language is not English: TOEFL scores: 580 paper or 92 iBT
4. The following prerequisite courses, if taken more than 10 years before entering, must be retaken: nutrition, biochemistry, human physiology.
5. Minimum 3.00 GPA for final 90 quarter credits (60 semester). Applicants with a GPA below 3.00 may be considered if their overall application has exceptional strengths.
6. GRE (general examination) scores
7. Additional requirements for the GCPD program: courses - psychology, microbiology, food science (with laboratory), management of nutrition services; courses that must be retaken if completed more than 10 years before entering – microbiology, management of nutrition services, food science with laboratory; other requirements – National Background Check, ServSafe Manager Certificate. For GCPD prerequisites, appropriate professional use of each course may suffice as meeting the requirement.

Master of Public Health

Prepares students for careers in governmental agencies, academic institutions, healthcare systems, non-profit organizations, and other community settings by providing interdisciplinary coursework and training in public health and nutritional sciences.

Degree Requirements

64 credits

1. *Public Health Core:* BIOST 508, ENV H 511, EPI 511, HSERV 511, HSERV 579
2. *Nutritional Sciences Core:* NUTR 500, NUTR 513, NUTR 520, NUTR 521, NUTR 522, NUTR 529, NUTR 531, NUTR 562
3. *Additional Requirements:* NUTR 526, NUTR 532, NUTR 595
4. *Electives:* courses numbered 500 and above with School of Public Health prefixes – BIOST, ENV H, EPI, G H, HIHIM, HSERV, HSMGMT, NUTR, PABIO, PHG, SPH (2 credits)
5. *Capstone or Thesis:* NUTR 596 or NUTR 700 (9 credits)

Master of Science

Prepares students to use evidence-based approaches in contributing to the field of nutritional sciences and its application in healthcare delivery and community settings.

Degree Requirements

45 credits

1. *Public Health Core:* BIOST 508, EPI 511, HSERV 579
2. *Nutritional Sciences Core:* NUTR 500, NUTR 513, NUTR 520, NUTR 521, NUTR 522, NUTR 529, NUTR 531, NUTR 562
3. *Electives:* courses numbered 500 and above with School of Public Health prefixes – BIOST, ENV H, EPI, G H, HIHIM, HSERV, HSMGMT, NUTR, PABIO, PHG, SPH (4 credits)
4. *Capstone or Thesis:* NUTR 596 or NUTR 700 (9 credits)

Doctor of Philosophy

Prepares students to expand the base of knowledge in nutritional sciences and to apply this knowledge in public health and clinical healthcare settings through interdisciplinary training. Designed to assist students in (1) gaining an advanced understanding of nutrition and metabolism, and related biological, biochemical, molecular, and behavioral sciences; (2) acquiring skills in research methods; (3) developing timely and original hypotheses in nutritional sciences. Also, seeks to meet the substantial state, regional, and national need for doctorally prepared faculty in schools or departments of nutrition and health sciences and for leadership positions in agencies.

Degree Requirements

105 credits

1. *Nutritional Sciences Core:* NUTR 500, NUTR 513, NUTR 520, NUTR 521, NUTR 522, NUTR 529, NUTR 531, NUTR 562, and 12 additional credits from NUTR courses numbered 500 and above
2. *Other Sciences:* courses numbered 400, 500, and above from BIOC, BIOL, BIOST, GENOME, EPI, G H, HSERV, HUBIO, IMMUN, MICROM, NUTR, and PATH; or other courses approved by the faculty adviser. (22 credits)
3. *Epidemiology:* EPI 511 or EPI 512, and EPI 513

4. *Biostatistics*: BOST-prefix courses numbered 500 and above (8 credits)
5. *Research Methods*: 8 credits from among EPI 517, EPI 519, EPI 548, EPI 549; or other courses approved by the faculty adviser
6. *Public Health Core*: HSERV 579
7. *Dissertation*: NUTR 800 (27 credits)

Pathobiology

Graduate Program

Graduate Program Manager
310c Harris Hydraulics, Box 357965
(206) 543-4338
pabio@uw.edu

Offers graduate training in the application of basic biomedical research to diseases of public health interest. The program involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

Master of Science

Develops an understanding of applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. Develops basic research skills and understanding scientific method. Students fulfill course requirements the first year, then propose and complete a thesis that includes an original research project.

Admission Requirements

Not currently accepting students into the master's program; however, this remains an option under specific circumstances, such as failure to pass the general examination or changes to academic goals.

Degree Requirements

Minimum 60 credits

1. *Required Courses:* PABIO 500, PABIO 551, PABIO 552, PABIO 553, EPI 511, PABIO 580, PABIO 581, PABIO 582, PABIO 590, PABIO 700
2. *Electives:* Additional courses in pathobiology or the biomedical sciences to fulfill the graded course requirement, to encompass the interests of the student, or to fulfill any additional requirements set forth by the student's committee.

MS Thesis Research Proposal: Completed by the end of the fourth quarter of the first year; should contain the following, in this order:

1. Brief synopsis of background relevant to the project.
2. Summary of preliminary experiments.
3. Description of experiments planned for the next year.

MS Thesis: Provided to the MS advisory committee two weeks prior to the oral presentation.

MS Oral Presentation and Defense: Formal seminar

Doctor of Philosophy

Develops skills concerning pathogenesis and infection. Also develops familiarity with the paradigms for control, prevention, and treatment; develops an understanding of epidemiology and disease processes; teaches basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develops familiarity with the major classes of pathogens.

Admission Requirements

1. *Personal statement*: Representation of the student's background and readiness for graduate study in pathobiology.
2. Unofficial transcripts from all collegiate institutions attended
3. Three letters of recommendation.
4. Curriculum vitae
5. Official GRE scores
6. Applicants whose native language is not English must demonstrate English language proficiency, to include a minimum 600 TOEFL score on the paper test or 250 on the computerized test, with scores not more than two years old.

Degree Requirements

90 credits minimum

1. *Required Courses*: PABIO 500, PABIO 551, PABIO 552, PABIO 553, , PABIO 580, PABIO 581, PABIO 582, PABIO 590, PABIO 598, PABIO 600, PABIO 800; EPI 511; either IMMUN 441 or IMMUN 532
2. PABIO 580 every winter quarter (excused while writing dissertation); PABIO 581 every autumn quarter the first three years; PABIO 582 every spring quarter till the general examination is completed; and PABIO 590 every spring quarter the first four years. Students present research at the Graduate Research Symposium annually after the first year.
3. *Electives*: PABIO 536 and UCONJ 510 strongly recommended
4. *Recommended tracks for elective credits*:
 - a. *Eukaryotic Pathogens*: IMMUN 532, EPI 520, EPI 532, MICROM 444, CONJ 531-CONJ 548
 - b. *Bacterial Pathogens*: IMMUN 532, MICROM 553, MICROM 555, EPI 520, EPI 529, GENOME 576, select modules from the molecular conjoint series (e.g., CONJ 548, CONJ 549, CONJ 557)
 - c. *Viral Pathogens*: IMMUN 532, MICROM 540, CONJ 531-CONJ 544, MCB 532, EPI 520, EPI 524, EPI 530

Research Facilities

Research facilities are geographically dispersed - faculty offices and laboratories at a number of locations around the Seattle area and the UW campus, to include: Health Sciences Building, Center for Infectious Disease Research, Seattle Children's Research Institute, Fred Hutchinson Cancer Research Center, Harborview Medical Center Research and Training Building, the Brotman Building (South Lake Union), Infectious Disease Research Institute, Institute for Systems, Biology, and Western Fisheries Research Center.

Financial Aid

The department provides a research assistantship that offers a competitive salary, tuition waiver, and health insurance. Students with satisfactory academic progress can anticipate funding for the duration of their studies.

Public Health Genetics

F363 Health Sciences Building

Program Overview

Health Sciences Building, H wing, room 655, office D
Box 357232

Public health genetics is an emerging field that applies advances in human genetics, genomics, and molecular biotechnology to improve public health and prevent disease.

The UW's Institute for Public Health Genetics (IPHG), alone among U.S. universities, offers graduate degrees at both the master's and PhD levels.

IPHG provides broad, interdisciplinary training for future public health professionals, facilitates research in public health genetics, and serves as a resource for continuing professional education.

Graduate Program

Graduate Program Coordinator
HSB 655, Box 357232
206-616-9286
phginfo@uw.edu

Master of Science, Genetic Epidemiology

Draws on training in epidemiology, genetics, and biostatistics and examines how genes and environmental factors interact to influence health and disease in human populations. Training focuses on methods to identify genetic influences on human diseases and interactions with environmental exposures in populations, emphasizing applied research skills.

Admission Requirements

1. Statement of purpose
2. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school
3. GRE scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the student's work reasonably well. At least two letters should be academic references.
6. Recent copy of resume or curriculum vitae

Degree Requirements

68 credits minimum

1. *Required Courses:* PHG 511/EPI 517, PHG 519 or BOST 551, STAT 550/BOST 550, EPI 573/ENV H 571, EPI 512, EPI 513, BOST 517, BOST 518, PHG 536 or GENOME 559, GENOME 552, PHG 512, PHG 527/B H 527, PHG 580 (44.5 credits)
2. *Elective Courses:* Excludes independent study and thesis credits; must be in epidemiology, biostatistics, genetics, public health genetics, or be related to the biological, physical, or social/behavioral factors which affect health, in particular ethical, legal and social issues related to genetic epidemiology.
3. *Thesis:* PHG 700 (9 credits minimum)

Master of Public Health, Public Health Genetics

Focuses on genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implications of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

Admission Requirements

Same as for Master of Science, Genetic Epidemiology, shown above

Degree Requirements

63 credits

1. *Required Courses:* (38 credits): EPI 511, BOST 508 or BOST 511, HSERV 511, ENV H 511, HSERV 510 or GH 531/EPI 539, PHG 511, PHG 512, PHG 513, PHG 521 or PHG 527, PHG 523, PHG 580
2. *Electives* (13 credits): may combine approved elective courses
3. *Master's Practicum* (3 credits minimum): PHG 595
4. *Thesis* (9 credits minimum): PHG 700

Doctor of Philosophy

Focuses on genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implications of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

Admission Requirements

Same as for Master of Science, Genetic Epidemiology, shown above

Degree Requirements

90 credits minimum

1. *Required Courses:* EPI 511 or EPI 512 and EPI 513; BOST 508 or BOST 511 or BOST 517; ENV H 511 or ENV H 570; HSERV 510 or GH 531/EPI 539 or HSERV 511; PHG 511, PHG 513; PHG 551 or GENOME 565; PHG 512, PHG 521 or PHG 527; PHG 523, PHG 580 (36-40 credits)
2. *Recommended Courses:* GENOME 552, PHG 536, BOST 512/BOST 513, BOST 518 (16.5 credits)
3. *Electives:*(minimum 21 credits)
4. PHG 580: Required each quarter until preliminary examination is passed (minimum 6 quarters; minimum 6 credits)

5. *Preliminary Examination*: usually taken at end of second year
6. *Selective Courses for Core Knowledge Areas and Development of Dissertation Topic*: minimum 9 additional credits related to dissertation. Additional writing courses may be required. See list of example courses available on program website.
7. *General Examination*
8. *Dissertation*: PHG 800 (minimum 27 credits)
9. *Final examination/dissertation defense*

Certificate in Public Health Genetics

Available to students already enrolled in any other UW graduate degree program, the certificate provides training in three primary areas of public health genetics: Genetic Epidemiology; Pharmacogenomics; Ethical, Legal, and Social Issues in Genetics.

Admission Requirements

1. Completed application form
2. Typed statement of purpose (maximum one page)
3. Current UW graduate school transcripts

Certificate Requirements

12 credits

1. PHG 511, PHG 512, PHG 513, PHG 580 (12 credits)
2. PHG 580 taken a minimum three quarters
3. *Electives*: Students are encouraged to take other PHG courses

JD/MPH in Public Health Genetics

Admission Requirements

Acceptance into the JD program before requesting admission to the MPH degree program

Degree Requirements

Same courses as described above for the MPH in Public Health Genetics

Quantitative Ecology and Resource Management

Program Overview

The Quantitative Ecology and Resource Management (QERM) interdisciplinary graduate program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to develop or enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

Graduate Program

Graduate Program Coordinator
304 Loew Hall, Box 352182
(206) 616-9571
qerm@uw.edu
depts.washington.edu/qerm

The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to further enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, sociology, anthropology, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

Both a Master of Science and Doctor of Philosophy degree are offered; graduates are capable of continuing with the development and extension of biometrical and biomathematical modeling as they enter the educational, research, or private-sector work force.

Admission Requirements

1. Background in probability and mathematical statistics, linear algebra, and differential equations. Applicants with little or no statistical background are advised to take additional coursework prior to applying. Although not mandatory, this background makes a student's application more competitive.
2. Successful completion of the following coursework (or equivalent) prior to applying: MATH 126 (or equivalent); MATH 308 (or equivalent).
3. Strongly recommended: MATH 394-MATH 395; STAT 341-STAT 342, or STAT 481.
4. Also taken into consideration:

- a. Minimum 3.00 GPA in last 60 semester or last 90 quarter credits required.
 - b. Normally, completion of college-level courses in probability and mathematical statistics, linear algebra, and differential equations.
 - c. Scores on Graduate Record Examination (GRE). Competitive applicants generally score above the 75th percentile on the verbal and analytic sections, and above the 85th percentile on the quantitative section.
 - d. Minimum TOEFL score of 580 (237 for computer-based tests) - for international students only.
 - e. Knowledge of the intended area of study, including clearly written statement of objectives.
 - f. Recommendations from persons familiar with the applicant's academic ability and potential.
 - g. Admission is also dependent on program resources and fit between student interests and faculty research. Students should explore faculty research interests by reviewing the QERM website, depts.washington.edu/qerm, to determine if their area of research interest is conducted at the UW. Students are not required to enter the QERM program with a faculty adviser selected in advance. Typically students identify their research and faculty adviser during their first year of study.
5. Application deadline for autumn quarter is January 1.

Degree Requirements (for Master of Science and Doctor of Philosophy)

Required coursework reflects the expectation that the student already has a fundamental understanding of the principles of statistical inference and ecological modeling. Required coursework taken during the first year includes:

1. STAT 516 and STAT 517
2. IND E 513 or IND E 599 (offered alternating years)
3. AMATH 523 or AMATH 535 (offered alternating years)
4. QERM 514 and QERM 597
5. SEFS 540
6. BIOL 567/SEFS 567/FISH 567
7. Ecology elective

Following the first year of core coursework, students select elective coursework in an area of emphasis ranging from biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology gives students greater insight into the environmental systems in which they expect to apply their quantitative training.

Master of Science

Minimum 36 credits

Requirements for successful completion of the master of science degree include:

1. Successful completion of a minimum 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of coursework numbered 500 or above, including a thesis
2. Receipt of numerical grades in at least 18 quarter credits of coursework taken at the UW

3. Completion of a seminar on results of the research and oral defense of the thesis
4. Completion of all University requirements for graduation

Doctor of Philosophy

Minimum 90 credits

Requirements for successful completion of the doctoral degree, minimum of 90 credits, include:

1. Successful completion of the QERM qualifying examinations at the PhD level, following the first year of study
2. Successful completion of a minimum of 90-quarter credits, including 27 dissertation credits. Completion of an MS degree may be applied toward one year of the PhD program. The core QERM courses must be taken if the student has obtained an MS from a different program
3. A seminar on results of the research and an oral defense of the dissertation
4. Completion of all University requirements for graduation

Financial Aid

The QERM program offers incoming students a nine month fellowship funded by the Graduate School. Students secure their own funding starting at year two, typically in the form of a teaching or research assistantship. Tuition and health insurance are typically included as part of the financial package. Funding decisions are made annually; attempts are made to continue support for students making satisfactory progress.

Urban Design and Planning

Program Overview

The PhD in Urban Design and Planning at the University of Washington is one of 39 PhD programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from architecture to sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.

The program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and nature in metropolitan regions throughout the world. It provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy, and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners, and educators who focus on improving the quality of life and environment in metropolitan regions.

Graduate Program

Graduate Program Coordinator
311 Loew, Box 352192
(206) 543-6398

Doctor of Philosophy

Admission Requirements

Admission to the PhD program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admission evaluation.

Applicants typically have a master's degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the [master's program in urban design and planning](#).

Application Deadline: All application materials are due by February 1. International applicants are encouraged to submit the Graduate School on-line application form by November 1.

For more information, see the program's [website](#).

Degree Requirements

90 credits, divided into three phases.

Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within urban and environmental planning and policy, it provides a common foundation for all students to build upon. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student, the core requirements can be met within one to two years.

Required Courses: Five courses, normally completed during the first year unless schedule conflicts make this infeasible. Courses from Phase II requirements may also be taken in the first year.

1. *Core Sequence:* URBDP 591, URBDP 592, URBDP 593
2. *Restricted Electives (before completion of Phase I):*
 - a. Qualitative Research Methods - one of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POL S 493.
 - b. Quantitative Research Methods - one of the following: CS&SS 594, CS&SS 504, CEE 584

Phase II: Area of Study

Students develop with their Supervisory Committee a description of their proposed areas of study. These areas of scholarship must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the Supervisory Committee that addresses the following advanced study requirements:

Curriculum Requirements: Seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some courses may be taken in the first year.

1. Urban Processes and Patterns: Three courses – For course options, see program website at depts.washington.edu/urbdpphd/Phase_II.shtml
2. Research Design and Methods: Two courses – For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml
3. Urban and Environmental Design and Planning: Two courses – For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml
4. Teaching Methods: One teaching seminar and experience as a TA for at least one quarter, before completion of Phase III.

General Examination: A critical review of the literature in the area of study, developed by the student, which integrates interdisciplinary research on that area of study and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

Phase III: Dissertation

Once the student passes the general examination, he or she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

Financial Aid

The interdisciplinary PhD program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

Interschool of Intercollege Programs

Bioengineering

Department Overview

N107 William H. Foege Building

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the healthcare system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering program in the world. Major areas of research and education include biomaterials and regenerative medicine, molecular and cellular engineering, technology for expanding access to healthcare, instrumentation, imaging and image-guided therapy, and systems, synthetic, and quantitative biology.

Undergraduate Program

Adviser

N107 William H. Foege Building, Box 355061
(206) 685-2000

bioeng@uw.edu

depts.washington.edu/bioe/programs/bachelors/bs.html

The Bioengineering program offers the following programs of study:

- Bachelor of Science in Bioengineering degree
- Bachelor of Science in Bioengineering degree with an option in nanoscience and molecular engineering
- Bachelor of Science in Bioengineering degree with an option in data science
- A five-year BS/MS option (consult website or adviser for details)

Bachelor of Science in Bioengineering

Department Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Core courses within the department form a seven-quarter curriculum designed to start spring quarter of the sophomore year. Because the curriculum is cohort-based and all students start and proceed at the same pace, Engineering Undeclared students admitted to Bioengineering after their first year are expected to start the curriculum in spring quarter of their second year.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101 (1)
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements and readiness to begin the bioengineering core sequence of courses in the following spring quarter. Additional advising resources will be available to these students. See section on [College of Engineering Continuation Policy for Engineering Undeclared Students](#) for additional details.

Current UW Students and Transfer Students

The department follows a cohort model beginning in spring quarter. Transfer students, current UW students without Engineering Undeclared status, and current UW students with Engineering Undeclared status who are eligible to begin the bioengineering core sequence of courses in their first spring quarter may apply. Admission is competitive.

Core courses within the department form a seven-quarter curriculum designed to start in the spring quarter. Because the curriculum is cohort-based and all students start and proceed at the same pace, students admitted to Bioengineering are expected to start the bioengineering curriculum in spring quarter immediately following admission.

1. Admission is for spring quarter only. Application deadline: January 15
2. Course requirements: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155; or CHEM 143, CHEM 153); PHYS 121; 5 credits English composition. All courses completed prior to application deadline
3. Additional course requirements: AMATH 301 or CSE 142 and BIOEN 217; BIOL 180; CHEM 223 or CHEM 237; PHYS 122 - all completed or in progress at time of application; all completed prior to spring quarter
4. Grade requirements: Minimum 2.5 grade in CHEM 162; minimum 2.50 cumulative GPA in courses required for application

5. Strongly recommended: BIOEN 215 or ENGR 115 completed; and MATH 307 completed or in progress at time of application

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to take at least 12 credits per quarter, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Admission to Nanoscience and Molecular Engineering Option (NME): By self-selection. Normally occurs winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to the bioengineering major. Students declare the NME option with a department adviser.

Admission to Data Science Option (DS): By self-selection. Normally occurs winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to bioengineering major. Students declare the Data Science option with a department adviser.

Graduation Requirements

180 credits

Students follow requirements in effect at time of entry into the department.

General Education Requirements (105 credits):

1. *Areas of Knowledge:* 24 total credits in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S), with at least 10 credits in each area. 3 credits in Diversity (DIV), which can overlap with other areas of knowledge requirements.
2. *Written and Oral Communication (5 credits):* 5 credits English composition from approved University list. Additional writing credits are built into the major core courses.
3. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126; either MATH 307 or AMATH 351; either MATH 308 or AMATH 352; minimum 3 credits statistics from the following: STAT 390, IND E 315, STAT 311, or Q SCI 381
4. *Natural Science (44 credits):* CHEM 142, CHEM 152, CHEM 162 and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122; BIOL 180, BIOL 200, BIOL 220
5. *General Electives (8 credits); (6 credits for the NME option)*

Major Requirements (75 credits):

1. *Engineering Fundamentals (4 credits):* AMATH 301
2. *Bioengineering Core (37 credits):* BIOEN 215 or ENGR 115; BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 400
3. *Bioengineering Capstone (7-10 credits):* One of the following options: (1) BIOEN 401 plus 9 credits of BIOEN 402; (2) BIOEN 404 and BIOEN 405; students taking BIOEN 404 and BIOEN 405 take three additional engineering elective credits from a departmentally approved list (see 5, below).
4. *Bioengineering Senior Electives (15 credits):* from designated 400-level and above BIOEN-prefixed courses. Refer to departmental list.

5. *Approved Engineering Electives (9-12 credits)*: Chosen from a departmentally approved list or from additional bioengineering senior elective credit. Students who take BIOEN 402 need 9 approved engineering elective credits; students who instead take BIOEN 404 and BIOEN 405 need 12.
6. *Grade Requirements*: Minimum 2.0 grade in each BIOEN-prefixed course applied to the major

Nanoscience and Molecular Engineering Option Requirements (77 credits):

1. *Engineering Fundamentals (4 credits)*: AMATH 301
2. *Bioengineering Core (37 credits)*: BIOEN 215 or ENGR 115; BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 400
3. *Bioengineering Capstone (10 credits)*: BIOEN 401, plus 9 credits of BIOEN 402.
4. *Nanoscience and Molecular Engineering Courses (21 credits)*: NME 220, NME 321, NME 421; minimum 15 credits of designated 400-level and above BIOEN-prefixed nano-molecular engineering courses; refer to departmental list. The senior capstone (10 credits from BIOEN 401 and BIOEN 402) must be in an NME area.
5. *Approved Engineering Electives (5 credits)*
6. Minimum 2.0 grade in each bioengineering course applied to the major

Data Science Option Requirements (82-85 credits):

1. *Engineering Fundamentals (4 credits)*: AMATH 301
2. *Bioengineering Core (37 credits)*: BIOEN 215 or ENGR 115; BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 400
3. *Bioengineering Capstone (7 to 10 credits)*: One of the following options: (1) BIOEN 401 plus 9 credits of BIOEN 402; (2) BIOEN 404 and BIOEN 405
4. *Data Science Courses (minimum 23 credits)*:
 - a. *Introduction to Data Science*: STAT 180/CSE 180/INFO 180, INFO 201, or INFO 370
 - b. *Programming*: CSE 143 or CSE 163
 - c. *Machine Learning*: CSE 416/STAT 416, STAT 435, or INFO 371
 - d. *Societal Implications of Data Science*: SOC 225, B H 201, B H 311, or B H 444
 - e. At least one course each in two of the following data science areas (refer to eScience Institute list):
 - i. *Data Management*
 - ii. *Data Visualization and Communication*
 - iii. *Data Science in Bioengineering*: BIOEN 420, BIOEN 423, BIOEN 424, BIOEN 436, BIOEN 447, BIOEN 449, BIOEN 451, BIOEN 466, BIOEN 485, BIOEN 488, or BIOEN 492
5. *Electives*: Data Science courses on approved list of engineering electives may be used to satisfy requirements 5.a. and 5.b., below. See department for approved list and for appropriate course combinations to satisfy minimum major requirements.
 - a. *Bioengineering Senior Electives*: Designated 400-level and above BIOEN-prefixed courses (15 credits)

- b. *Approved Engineering Electives:* Chosen from departmentally-approved list of additional bioengineering senior elective credits. Students who take BIOEN 402 need 9 approved engineering elective credits, and students who take BIOEN 404 and BIOEN 405 need 12 credits.
6. Minimum 2.0 grade in each bioengineering course applied to the major

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and healthcare. Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.
- *Instructional and Research Facilities:* The department is housed in the Foege North building. Amenities include instructional laboratories, an advanced computing laboratory for class instruction and student use, a general computer laboratory for student use, a student work room, a seminar room, and meeting space. Departmental offices are also located in this building. Other laboratories are located in the College of Engineering and the School of Medicine. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in computational bioengineering, distributed diagnosis and home healthcare, engineered biomaterials, medical imaging and image-guided therapy, and molecular bioengineering and nanotechnology.
- *Honors Options Available:* College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors (see adviser for requirements). For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship website for majors.
- *Department Scholarships:* Several scholarships are available for majors.
- *Student Organizations/Associations:* The Biomedical Engineering Society (BMES), the campus chapter of the national professional organization, organizes social events as well as events that support student interest in medical school, graduate school, and industry.

Of Special Note: Courses on technology commercialization are available to seniors.

Graduate Program

Graduate Program Coordinator
N107 William H. Foege Building, Box 355061
(206) 685-2000
bioeng@uw.edu

The department offers the Master of Science (MS), the Master of Pharmaceutical Bioengineering (PHARBE), and Doctor of Philosophy (PhD) degrees.

Master of Science

The master of science provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

Admission Requirements

International applications, deadline December 1; domestic applications, deadline December 15. Late and/or incomplete applications are not reviewed.

Required application items

1. Online application: www.grad.washington.edu/applForAdmiss.
2. Department of Bioengineering admission form
3. Statement of purpose
4. Resume/curriculum vitae
5. Three letters of recommendation
6. Unofficial transcripts only (official transcripts are requested once an offer has been made)
7. Official GRE scores (sent to code 4854, and must be sent before the deadline)
8. Official TOEFL scores (from international applicants only, and must be received before the deadline)

More information about the application is online at depts.washington.edu/bioe/education/prospective/educ_prospective.html. Materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Required courses: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the MS program.

Degree Requirements

36 credits

1. BIOEN 501, BIOEN 502, BIOEN 503 (12 credits); biostatistics; bioengineering seminar

2. BIOEN electives: (10 credits)
3. BIOEN 700
4. All core and elective courses taken for a numerical grade.
5. A single course may not count for two separate requirements.
6. One quarter teaching assistant

Master of Pharmaceutical Bioengineering

The Master of Pharmaceutical Bioengineering (PHARBE) is an evening degree program designed to enable working local engineers, scientists, researchers, and professionals in the biotechnology, pharmaceutical, and related industries to explore advanced education in the areas of molecular and cellular biology, drug discovery and design, pharmaceuticals, and translational pharmaceuticals. Professionals may also complete three certificate programs without applying for degree status.

Admission Requirements

1. BS degree or equivalent in a relevant science (field/research), public health (biomedical related) or engineering (field/research) related, or a BS degree or equivalent in unrelated field and two years' experience working within a scientific or engineering group for a biotechnology or pharmaceutical company or related industry. Clinical degrees are considered. Applicants who have a bachelor's degree other than a BS, professional experience, and who have completed recommended prerequisite coursework are also considered.
2. Minimum 3.00 GPA in the last 90 quarter credit hours (60 semester credit hours). Students who have a BA/BS degree with under a 3.00 GPA and have two years' work experience may be approved for graduate non-matriculated (GNM) status for basic biosciences. Students who receive a 3.0 or above in their basic biosciences courses under GNM status are considered for degree admissions.
3. Official GRE scores
4. One set of official (unopened) transcripts from each non-UW institution attended
5. *Prerequisite Course Requirements:* The following courses must be completed with a minimum 2.0 in each course before applying to the degree program. Students whose undergraduate degree majors are in engineering, biology, chemistry or pharmacy are exempt from the prerequisite course requirements.
 - a. *Calculus:* Minimum one quarter (or one semester) of college calculus
 - b. *Chemistry:* Minimum two quarters (one semester) of college general chemistry Additional course in organic chemistry recommended.
 - c. *Biology:* Minimum one quarter (semester) of general biology
 - d. *Physics:* one quarter (PHYS 114).
6. Applicants are evaluated on professional experience, previous degrees earned, or most recent/undergraduate GPA, basic biosciences courses GPA (if applicable), letters of recommendation, statement of intent, and GRE test scores. Admission is not guaranteed.
7. Applicants who do not qualify for admission to the PHARBE degree program may be admitted to courses and/or to Pharmaceutical Bioengineering Certificate programs.
8. *English Proficiency:* Non-native English speakers are expected to have adequate English language proficiency. The Graduate School requires a TOEFL score of at least 580, unless applicants are citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or hold a bachelor's or advanced degree from an accredited institution in any of these countries.

Degree Requirements

Minimum 40 credits

1. *Basic Biosciences Curriculum (20 credits)*: Molecular and Cellular Biology I, Molecular and Cellular Biology II, Pharmaceutics I , Pharmaceutics II , Statistics and Experimental Design
2. *Advanced Tracks*: 16 credits from one of two advanced tracks in translational pharmaceutics or drug discovery and design. (Students must complete all 20 credits of the basic biosciences core courses before enrolling in advanced track courses.)
 - a. *Translational Pharmaceutics (16 credits)*: Preclinical Development , Process Development , Formulation and Delivery , Clinical Development
 - b. *Drug Discovery and Design (16 credits)*: Molecular Biotechnology , Drug Discovery & Design , Molecular Targets & Drug Classes , Systems Biology and Bioinformatics
3. Departmental Seminar (4 credits)
4. *Optional Capstone Project*: Professional capstone project in either the drug discovery and design orpProcess development courses.
5. Minimum 3.00 cumulative GPA

Doctor of Philosophy

Trains individuals for careers in bioengineering research and teaching. The program includes three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the PhD program may be made directly after the BS An optional dual PhD degree in bioengineering and nanotechnology is available; see www.nano.washington.edu.

Admission Requirements

See application process detailed in the MS section.

While a completed MS degree is not required before beginning the PhD, every graduate student must have the following courses as part of her or his undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the PhD program.

Degree Requirements

90 credits

1. Required Courses
 - a. Molecular Bioengineering: BIOEN 501
 - b. Cellular Bioengineering: BIOEN 502
 - c. Systems Bioengineering: BIOEN 503
 - d. Biostatistics

- e. Bioengineering Seminar: BIOEN 510
- f. 16 credits of bioengineering elective courses, chosen in consultation with faculty adviser
- g. 27 credits of dissertation writing (BIOEN 800)

All core and elective courses must be taken for a numerical grade. A single course may not count for two separate requirements.

2. One quarter teaching assistantship

A student progressing well follows this schedule:

1. First Year: Complete one to three lab rotations and select a thesis adviser
2. Second Year: Pass the qualifying examination and form a Supervisory Committee
3. Third Year: Pass the general examination.
4. Fourth Year (and subsequent years): Make an annual progress report to, and receive feedback from, the Supervisory Committee.
5. Fifth Year: Defend the dissertation.

Medical Scientist Program

A Medical Scientist Training Program (MSTP) exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the MD and PhD degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at (206) 685-0762.

Research Facilities

As the department is established within the College of Engineering and the School of Medicine, bioengineering students have access to all engineering and health science departments and facilities. A wide range of technologies and virtually all aspects of biomedical research tools are available.

Financial Support

Financial support is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the adviser.

Global Health

The Department of Global Health, established in 2007, bridges the schools of Medicine and Public Health, with a mandate to harness the expertise and interdisciplinary power of all 16 UW schools and colleges. The department is the second largest at the UW in terms of funding for research and training programs. Departmental efforts include 31 centers, programs, initiatives, and the Institute for Health Metrics and Evaluation.

The mission is to close the gap between the world's one billion people who experience relatively good health and the five billion who experience much lower levels of health, through teaching (education, training, and mentoring), research, and service programs.

The department offers an undergraduate minor, a Master of Public Health, and two PhD options: global health, and pathobiology. Four graduate certificate offerings are available for graduate students, as well as a global health pathway for UW medical students. Current and emerging focus areas include health metrics and evaluation, infectious diseases, workforce development, health system strengthening and implementation science, climate change, global trauma and violence, global medicines safety, and a strong cross-cutting focus on social justice and equity.

Undergraduate Program

The department offers the following program:

- A minor in global health

Minor

Minor Requirements (30 credits):

1. *Required courses (9 credits):* G H 101/GEOG 180/JSIS B 180; G H 201; and G H 210 or G H 410
2. *Perspectives in global health series (2 credits):* G H 401 and G H 402
3. *Electives (to bring total to 30 credits):* Minimum of one elective course from each of the four content areas selected from a list of approved courses available from the Department of Global Health website, globalhealth.washington.edu/academics/undergraduate-minor/requirements
4. Minimum 15 credits outside the student's major
5. Minimum 15 credits completed through the UW
6. Minimum 15 upper-division credits
7. Minimum 2.0 grade in courses applied to the minor

Graduate Program

(206) 897-1804
ghprog@uw.edu

Master of Public Health

The MPH program emphasizes a social justice approach to global health with a focus on the social, economic, and political determinants of health, and the history and context of global responses to health problems. The core curriculum develops competencies in the basic tools of public health, including epidemiology, biostatistics, global health systems, environmental health, and social behavioral sciences. Courses in research methods and management are also required. A practicum provides hand-on experience with local or international agencies engaged in global health activities, and academic coursework culminates with independent scholarship leading to a research or practice thesis. The curriculum is interdisciplinary, with faculty and courses from across campus including natural and social sciences and the humanities. Case studies and applied learning are common approaches.

Admission Requirements

Baccalaureate degree by the time of matriculation; some tracks require at least two years of relevant post-college work or volunteer experience prior to matriculation. Each MPH track has its own admission requirements.

1. Graduate School online application. Deadline midnight, December 1
2. Official GRE scores for applicants who have not already earned a doctoral-level degree (e.g., MD, PhD, JD) from a U.S. institution of higher learning
3. Proof of English proficiency, if applicable
4. Unofficial transcripts from each college or university attended
5. Three recent letters of recommendation, preferably from former supervisors and professors
6. Personal statement, including background, goals, and research interests
7. Resume - maximum three pages

Degree Requirements

63 credits, for all MPH tracks

Minimum 30 credits from graduate-level, in-classroom courses; at least 18 from global health in-classroom courses.

All tracks require a foundation course, epidemiology, biostatistics, environmental health, social and behavioral sciences, research methods, a practicum, and a thesis. Beyond shared requirements, each track also has its own set of requirements. See program website.

Doctor of Philosophy

Program Manager
Institute for Health Metrics and Evaluation
2301 5th Avenue, Suite 600, Box 358210
Seattle, WA
(206) 897-2870
ghpdh@u.washington.edu

In collaboration with the Institute for Health Metrics and Evaluation and Health Alliance International, the department offers a PhD program. Building on faculty expertise in metrics and implementation science, the program provides students innovative tools to advance global health solutions, and includes two emphasis areas:

Metrics: Students translate evidence into useful knowledge by learning and applying advanced quantitative methods, impact evaluation techniques, and analytic tools. Students design and develop innovative ways to tackle critical global health measurement challenges.

Implementation Science: Students identify and address barriers to effective implementation and scale-up of evidence-based interventions by developing and applying cutting-edge methodologies and analytical approaches.

For comprehensive information, see the PhD program website.

Admission Requirements

The department considers all indicators of future success, including past work, service, and research experience; level of enthusiasm and detail in letters of recommendation; previous academic records and performance on standardized tests; applicant's written statement of purpose.

Minimum Qualifications

1. Bachelor's degree from an accredited college or university in the United States, or its equivalent from a foreign institution. Strong candidates have prior master-level training or significant experience working in the global health field, ideally in a low-resource setting.
2. Demonstrated commitment to the field of global health
3. Minimum 3.30 cumulative GPA in previous undergraduate- and graduate-degree work, though competitive applicants normally present a minimum 3.70 GPA
4. GRE scores greater than or equal to 120 (700) on the quantitative section
5. English proficiency: TOEFL for students who have not completed a degree in an institution where English is the primary language of instruction.

Degree Requirements

Minimum 96 credits

1. *Coursework:* Minimum 27 dissertation credits, 37 credits in core requirements, 16 credits in area of emphasis, and remaining credits in electives. See details about curriculum and course paths on program website.
2. Preliminary written examination

3. General examination
4. Research and dissertation
5. Final examination

School of Law

School Overview

Dean

Kellye Y. Testy

Associate Deans

Steve Calandrillo
Penny A. Hazelton
Mary Hotchkiss
Peter Nicolas

Assistant Dean

Naomi Sanchez

Interim Assistant Dean

Stephanie Cox

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current *School of Law* catalog.

Facilities and Services

The School of Law, housed in William Gates Hall since 2003, is equipped with classroom, clinical, library, lounge, and office facilities. Eleven classrooms are equipped for multi-media presentations, wireless internet connection, and assistive-listening systems.

The Marian Gould Gallagher Law Library is among the largest university law collections on the West Coast. The collection currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

Juris Doctor Program

The Juris Doctor (JD) degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private

processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. JD candidates are required to perform 60 hours of public-service legal work during the second or third year.

Admission

New students may enter the School of Law only in autumn quarter. For first-year students, instruction begins earlier than for upper-class students. Students must have earned a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, Newtown, PA 18940-0998. www.lsac.org

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in *The Official Guide to U.S. Law Schools (2000 Edition)*. Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, \$50) also is required.

Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply for admission with advanced standing, with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 10.

Applications are considered only if vacancies exist. Selection is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.

Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

Financial Aid

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, (206) 543-6101, offa@uw.edu. Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship or other factors may be considered for certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; uwlawaid@uw.edu.

Inquiries

A more detailed statement on admission policy and application procedure is available from the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; admissions@law.washington.edu; (206) 543-4078.

Graduate Program

Graduate Program Coordinator
William Gates Hall, Box 353020
(206) 543-4937
gradlaw@uw.edu

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LLM) in Asian and Comparative Law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (PhD) degree in Asian and Comparative Law only.

Master of Laws

Admission Requirements

1. Minimum B or 3.00 GPA in the most recent two years of study.
2. U.S. applicants must have completed their first degree in law (JD or equivalent) at a school accredited by the American Bar Association.
3. International students must have a first degree in law (LLB, BLaw) or equivalent and a minimum TOEFL score of 580 or 237 (TOEFLC).

Degree Requirements, Asian and Comparative Law

36 credits, as follows:

1. *Required courses:* LAW B 551, LAW 600, LAW B 550; two courses in Asian and comparative law
2. *Elective courses:* Additional courses, chosen in consultation with adviser, to bring total credits to 36.

Degree Requirements, Intellectual Property Law and Policy

40 credits, to include:

1. *Required core courses:* LAW P 501, LAW P 510
2. *Additional requirement for students not trained in the common law system:* LAW P 503
3. At least 16 additional credits drawn from a list of approved elective courses.

4. Research project and thesis

Degree Requirements, Law of Sustainable International Development

40 credits, as follows:

1. 15 credits in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable international development students are required to take courses in at least three departments other than the Law School.
2. *Writing and Research Requirement*: Completion of a research paper is required and is generally satisfied by LAW B 578.
3. LAW A 545

Degree Requirements, Taxation

36 credits, as follows:

1. *Required courses*: LAW T 501, LAW T 502, LAW T 503, LAW T 504, LAW T 510, LAW T 511
2. *Core electives*: Two of the following courses: LAW T 515, LAW T 516, LAW T 521, LAW T 530
3. *Electives*: Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

Doctor of Philosophy

Admission Requirements

Admission to the PhD program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective PhD students must normally complete the LLM program before being accepted as PhD students. The School does, however, welcome applications from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

Degree Requirements

90 credits, to include:

1. An LLM degree is counted toward the credit necessary for the PhD program.
2. Doctoral thesis seminar (4 credits)
3. Other coursework (26-29 credits): Coursework varies according to student's research interest areas and is determined in consultation with Supervising Committee
4. Doctoral dissertation (27-30 credits)

Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu; (206) 543-4937.

Inquiries

Requests for applications and program brochures for all School of Law LLM programs except the LLM in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195.; gradlaw@uw.edu.

Requests for applications and program brochures for the LLM in taxation should be addressed to Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu.

School of Medicine

School Overview

Dean

Paul G. Ramsey
C314 Health Sciences

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Seattle Children's hospital, Northwest Hospital & Medical Center, Valley Medical Center, and the Veterans Affairs Puget Sound Healthcare System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits approximately 240 medical students to its first-year class and has a total enrollment of over 1000 students pursuing the Doctor of Medicine degree. The full-time faculty numbers more than 2,100 members and there are more than 4,500 clinical faculty located throughout the WWAMI region. The affiliated University residency-training network enrolls more than 1,200 house officers. Enrollment in the graduate programs in the basic sciences exceeds 600 students, and approximately 1,000 postdoctoral fellows are enrolled in advanced training programs. The School has baccalaureate and/or graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

WWAMI Program

The WWAMI program was initiated in 1971 as an effort to address the maldistribution and shortage of physicians in the Northwest region, provide a broader range of educational opportunities for students, and address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

Foundations of Science Phase Training

The UW School of Medicine is nationally recognized for its regional training program (WWAMI). In addition to providing unique clinical learning opportunities, the WWAMI program allows a small-group learning experience at the regional training sites, which many students prefer. Students from Washington (Spokane), Alaska, Montana, and Idaho complete their 18-month foundational curriculum in small learning groups in their respective home states. Wyoming students complete their first 12-month foundational curriculum in Wyoming. The state of Washington provides two sites for medical students to complete their 18-month foundations curriculum:

Seattle: uwmedicine.washington.edu/Education/Md-Program

Spokane: www.medicalsciences.wsu.edu/prospectivestudents/wwamiprograminfo.html

Small group learning experiences are available in Spokane. All Washington residents are required to rank one or more of these two sites in order of preference in their secondary application. Every effort is made to match accepted Washington students with one of their preferred sites.

More information and video testimonials from first-year Spokane medical students are available at: <http://uwmedicine.washington.edu/Education/MD-Program/Admissions/>

Offers of acceptance are conditional upon agreement to participate in the WWAMI program.

Patient Care Phase Training

At the conclusion of the foundations-of- science phase, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described below. As part of clinical training, students complete clerkships at the UW, at its affiliated hospitals, or at community clinical units located in the five-state region. During third- and fourth-year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships throughout the WWAMI region.

Academic Programs

Bachelor of Science

A program leading to a baccalaureate degree with a major in [microbiology](#) is offered through the College of Arts and Sciences.

Bachelor of Clinical Health Sciences

A program leading to a baccalaureate degree with a major in clinical health services is offered through the [MEDEX](#) program.

Bachelor of Science in Medical Technology

A curriculum in medical laboratory science is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists for a variety of employment opportunities. Information concerning admission to the medical laboratory science program appears under [Laboratory Medicine](#) in this catalog.

Bachelor of Science in Prosthetics and Orthotics

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under [Rehabilitation Medicine](#) in this catalog.

MEDEX Northwest Physician Assistant Training

MEDEX Northwest, UW School of Medicine, is a program designed to train physician assistants. The program has been in existence since 1978 and is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX currently trains approximately 80 students annually in three didactic training sites (Seattle, Yakima, and Spokane). Discussions are currently underway to have a fourth training site in Anchorage, AK. Students return to their home communities in the WWAMI region (Washington, Wyoming, Alaska, Montana, Idaho) plus a variety of sites in Oregon and Nevada for their clinical year of training.

MEDEX Northwest is currently an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of the didactic training sites. The final four quarters are spent in clinical experiences throughout the Northwest region. At the completion of the program, students are eligible to sit for the National Certifying Examination for Physician Assistants.

Master of Occupational Therapy

The Department of Rehabilitation Medicine offers a graduate degree in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under [Rehabilitation Medicine](#) in this catalog.

Doctor of Physical Therapy

The Department of Rehabilitation Medicine offers a graduate degree in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under [Rehabilitation Medicine](#) in this catalog.

Master of Science and Doctor of Philosophy

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of [Biochemistry](#), [Bioengineering](#), [Biological Structure](#), [Immunology](#), [Microbiology](#), [Pathology](#), [Pharmacology](#), and [Physiology and Biophysics](#). Master's degree programs are offered by the departments of [Laboratory Medicine](#), [Medical History and Ethics](#), and [Rehabilitation Medicine](#). Students may work toward these degrees concurrently with the MD degree, taking additional years beyond the typical four-year medical curriculum.

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

Doctor of Medicine

Upon completion of the curriculum of the School of Medicine curriculum, the MD degree is awarded to those candidates who (1) have shown evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

Admission

Procedures and policies described are subject to change. The most current information regarding the admission process is available from the School of Medicine [Admissions Office](#).

Selection Factors

Candidates are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of healthcare delivery issues are desired. Extenuating circumstances in an applicant's background are evaluated.

Applicants submit scores from the Medical College Admission Test (MCAT), taken no later than autumn of the year before matriculation. Scores cannot be more than three years old at the time of matriculation.

Under exceptional circumstances, certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in required science courses. They should be proficient in the use of the English language, basic mathematics, personal computing, and information technologies.

All entrants in recent years have, at a minimum, fulfilled requirements for a bachelor's degree. No specific major is advised. A broad background in the humanities and liberal arts is encouraged.

Pre-Medical Requirements

Completed prior to matriculation but preferably by the time of application; undergraduate or postbaccalaureate courses completed at a college or university accredited by the appropriate regional accrediting body.

Courses must include a minimum of:

1. 4 semesters or 6 quarters of social science or humanities
2. 6 semesters or 9 quarters of chemistry and biology. Subject matter in these courses must include general chemistry, general biology, biochemistry, molecular genetics, and cell biology/cell physiology, although applicants are not required to take courses with these specific titles.
3. 2 semesters or 3 quarters of physics; or 1 semester or 2 quarters of physics plus 1 semester or 2 quarters of calculus or linear algebra

Courses recommended, but not required:

- Ethics
- Anatomy or comparative anatomy

- Human or mammalian physiology
- Embryology

For further information, consult:

- [UW School of Medicine Admissions website](#)
- [Facebook](#)
- [Email](#)

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise.

Application Procedure

The UW participates in the American Medical College Application Service (AMCAS). Deadline for submitting an application to AMCAS is October 15; no waivers are granted. After receiving the application, the School of Medicine asks qualified individuals to submit a \$35 application fee and supplemental application materials. Every attempt is made to notify applicants of final action by the end of March of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Candidates from Wyoming, Alaska, Montana, and Idaho submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine. More information about residency certification is available at: www.uwmedicine.org/education/md-program/admissions/applicants/residence-certification

Applicants with DACA status who reside in a WWAMI (Washington, Wyoming, Alaska, Montana, Idaho) state and who are legally authorized and recognized by their respective state's residency office as a state resident for WWAMI educational purposes are considered.

Applicants from outside this five-state region from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations are considered. Foreign applicants must also have a permanent-resident visa.

Individuals with a demonstrated interest in research may apply for the MD/PhD program (Medical Scientist Training Program, or MSTP) regardless of residency.

Applicants who have failed to meet minimum standards at this or another medical (MD or DO) or dental school are not considered.

Applicants must meet essential requirements and technical standards and complete premedical course requirements.

The deadline for submitting additional application materials is December 1. Secondary materials include:

1. Autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician, with specific emphasis on steps taken to explore a career in medicine and eventual professional goals. Other issues of importance to the candidate should

also be included. The applicant may request that the personal comments section of the AMCAS application be used to fulfill this requirement.

2. Three additional short essays (250 word limit each)
 - a. How have your experiences prepared you to be a physician?
 - b. How do you imagine your personal and professional lives intersecting 10 years from now?
 - c. What obstacles to your goals have you experienced and how have you dealt with them?
 - d. For re-applicants: From your most recent application until now, how have you strengthened your application?
3. A letter of recommendation from a premedical committee or a minimum three letters from writers who can speak to one or more of the following: academic ability, commitment to service, leadership potential, clinical or research experiences, interpersonal skills, ability to function on a team, and/or potential as a physician. The collection of letters should provide a balanced and well-rounded view of the applicant's candidacy. The School of Medicine accepts up to three additional letters of recommendation. Letters from current employers may be advantageous. All letters are submitted via the AMCAS Letters of Evaluation/Recommendation service. Letters must be received by December 1.
4. \$35 non-refundable application fee (automatically waived for those qualified for AMCAS fee waivers). Others seeking a fee waiver should submit requests directly to the School of Medicine Admissions Office.
5. Online acknowledgment of having read, understood, and being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the UW School of Medicine: Admission, Retention, and Graduation Standards; and online acknowledgment of the clinical clerkship rotation policy and the UW SOM Honor Code. These are sent with the secondary application form.
6. All acceptances are contingent on a criminal background check. Falsifying information may lead to withdrawal of an acceptance.
7. More information about the application procedure is available at: www.uwmedicine.org/admissions

Medical School Curriculum (For students entering 2015 or 2016; in effect for these two cohorts from 2015 to 2020)

The four-year medical school curriculum consists of three phases, totaling 267 credits

- Foundations Phase – 107 credits
- Patient Care Phase – 84 credits
- Explore and Focus Phase – 76 credits

Specific requirements are as follows:

1. Foundations Phase

The first 18 months of the medical-student curriculum, starting with a two-week clinical immersion that introduces the medical profession and includes instruction and supervision related to basic clinical skills, is followed by eight integrated basic science blocks. Pathology, Human Form and Function (anatomy and radiology), and Pharmacology are threaded throughout all blocks of the Foundations Phase. In the longitudinal Foundations of Clinical Medicine (FCM) course, which spans all 18 months of the Foundations Phase, students learn under supervision to perform a

detailed medical history and physical examination, develop clinical reasoning skills, and communicate and establish rapport with patients from all backgrounds. They also spend one full day every other week working with patients and other health professionals in outpatient primary care clinics.

Foundations Phase Curriculum (107 credits)

Most students are also able to take elective courses.

a. Blocked Courses

- i. Molecular and Cellular Basis of Disease (11 credits)
- ii. Invaders and Defenders (10 credits)
- iii. Circulatory Systems (16 credits)
- iv. Blood and Cancer (5 credits)
- v. Energetics and Homeostasis (10 credits)
- vi. Mind, Brain, and Behavior (14 credits)
- vii. Lifecycle (8 credits)

b. Longitudinal Courses

- i. Primary Care Practicum (8 credits)
- ii. Foundations of Clinical Medicine (8 credits)

c. Scholarship Courses

- i. Independent Investigative Inquiry (III) (6 credits) – Conducted in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. Helps the student gain an understanding of the philosophy and methods of scientific investigation. Fosters skills of life-long learning.

- d. **Consolidation and Transition (11 credits)** – A transition period between the Foundation Phase and the Parent Care Phase. Preparation for U.S. Medical Licensing Examination (USMLE step 1), including a Foundations Capstone to review key concepts. Students complete the Independent Investigative Inquiry and the transition to clerkships.

2. Patient Care Phase

Students work as junior members of medical-care teams in medical-school-affiliated hospitals, clinics, or practices located in the five-state WWAMI region. Students learn and practice clinical skills, gain clinical experience, and increase clinical problem-solving abilities.

Patient Care Curriculum (84 credits)

- i. Family Medicine (12 credits)
- ii. Internal Medicine (24 credits)
- iii. Obstetrics/Gynecology (12 credits)
- iv. Pediatrics (12 credits)
- v. Psychiatry and Behavioral Sciences (12 credits)
- vi. Surgery (12 credits)

3. **Explore and Focus Phase**

Students continue to hone clinical skills and prepare for residency. Includes four required clerkships and 20 weeks of clinical electives.

Explore and Focus Curriculum (76 credits)

- i. Neurology/Neurosurgery (8 credits)
- ii. Emergency Medicine (8 credits)
- iii. Advanced Patient Care (16 credits)
- iv. Clinical electives (40 credits)*
- v. Transition to Residency (4 credits)

*Students in the Medical Scientist Training Program and the UW Pathology fellowship who enter the UWSOM prior to 2015 and who do not engage in the clinical curriculum immediately after completing pre-clinical coursework meet the clinical requirements as they exist at the time they enter, with the exception of 8 credits of clinical electives which are waived. These students enter the clinical curriculum in summer of their third year of MD coursework after completion of the PhD or UW Pathology fellowship.

Medical School Curriculum (For students entering 2017 or after)

The four-year medical school curriculum consists of three phases, totaling 287 credits.

- Foundations Phase – 120 credits
- Patient Care Phase – 86 credits
- Explore and Focus Phase – 81 credits

An Ecology of Health and Medicine course spans all three phases of the curriculum. Students gain familiarity and understanding of our healthcare system, including specifics about health policy, patient safety, social determinants of health, health equity, value-based care, population health, teamwork, medical informatics, and ethics/professionalism.

1. **Foundations Phase**

The first 18 months of the medical-student curriculum, starting with a two-week clinical immersion that introduces the medical profession and includes instruction and supervision related to basic clinical skills, is followed by eight integrated basic science blocks. Pathology, Human Form and Function (anatomy and radiology), and Pharmacology are threaded throughout all blocks of the Foundations Phase. In the longitudinal Foundations of Clinical Medicine (FCM) course, which spans all 18 months of the Foundations Phase, students learn under supervision to perform a detailed medical history and physical examination, develop clinical reasoning skills, and communicate and establish rapport with patients from all backgrounds. They also spend one full day every other week working with patients and other health professionals in outpatient primary care clinics.

Foundations Phase Curriculum (120 credits)

Most students are also able to take elective courses.

a. **Blocked Courses**

- i. Molecular and Cellular Basis of Disease (11 credits)
- ii. Invaders and Defenders (10 credits)
- iii. Circulatory Systems (16 credits)
- iv. Blood and Cancer and Musculoskeletal (8 credits)
- v. Energetics and Homeostasis (10 credits)
- vi. Mind, Brain, and Behavior (14 credits)
- vii. Lifecycle (8 credits)

b. **Longitudinal Courses**

- i. Foundations of Clinical medicine (15-16 credits)
- ii. Ecology of Health and Medicine (4 credits)

c. **Scholarship Courses**

- i. Independent Investigative Inquiry (6-7 credits) – Conducted in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. Helps the student gain an understanding of the philosophy and methods of scientific investigation. Fosters skills of life-long learning.
- ii. Research Methods, including Epidemiology and Biostatistics (6 credits)

- d. **Consolidation and Transition** (11 credits) – A transition period between the Foundation Phase and the Patient Care Phase. Preparation for U.S. Medical Licensing Examination (USMLE step 1), including a Foundations Capstone to review key concepts. Students complete the Independent Investigative Inquiry and the transition to clerkships.

2. **Patient Care Phase**

Students work as junior members of medical-care teams in medical-school-affiliated hospitals, clinics, or practices located in the five-state WWAMI region. Students learn and practice clinical skills, gain clinical experience, and increase clinical problem-solving abilities.

Patient Care Curriculum (86 credits)

- i. Family Medicine (12 credits)
- ii. Internal Medicine (24 credits)
- iii. Obstetrics/Gynecology (12 credits)
- iv. Pediatrics (12 credits)
- v. Psychiatry and Behavioral Sciences (12 credits)
- vi. Surgery (12 credits)
- vii. Ecology of Health and Medicine (2 credits)

3. **Explore and Focus Phase**

Students continue to hone clinical skills and prepare for residency. Includes four required clerkships and 20 weeks of clinical electives.

Explore and Focus Curriculum (81 credits)

- i. Neurology/Neurosurgery (8 credits)
- ii. Emergency Medicine (8 credits)
- iii. Advanced Patient Care (16 credits)
- iv. Clinical electives (40 credits)*
- v. Ecology of Health and Medicine (1 credit)
- vi. Transition to Residency (8 credits)

*Students in the Medical Scientist Training Program and the UW Pathology fellowship who enter the UWSOM prior to 2015 and who do not engage in the clinical curriculum immediately after completing pre-clinical coursework meet the clinical requirements as they exist at the time they enter, with the exception of 8 credits of clinical electives which are waived. These students enter the clinical curriculum in summer of their third year of MD courses after completion of the PhD or UW Pathology fellowship.

Student Evaluation and Promotion

Students must complete all curricular, academic, and professional conduct requirements, which include meeting the Essential Requirements and Technical Standards and demonstrating attitudes and behavior appropriate to a career in medicine. Student evaluation is based on observation of the student's behavior and conduct by the faculty and others involved in teaching as well as on papers and examinations. Every student must pass all academic requirements, all School of Medicine examinations, Steps 1 and 2 of the United States Medical Licensing Examinations, and an approved scholarly Independent Investigative Inquiry project, as well as demonstrating specific clinical skills developmental benchmarks c before receiving the Doctor of Medicine degree. No exceptions are permitted. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of deficiencies and remedial requirements, if any, for these deficiencies.

A student may be dismissed from the School of Medicine if s/he does not meet the standards for graduation set by the School, to include failure to maintain an acceptable academic record, failure to follow academic directives provided by the School's committees, and/or failure to develop attitudes and behavioral patterns appropriate to a career in medicine. A pattern of documented concerns about a student's performance and professionalism may result in the student's being dismissed.

The Faculty Council on Academic Affairs (FCAA) reviews the School of Medicine's and Student Progress Committee's actions, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available. Once dismissal or withdrawal from the School has occurred, the student may not petition for reinstatement, and must instead apply for readmission through the standard admission process and procedures.

Honor Societies

Alpha Omega Alpha (AOA), a national honor medical society, elects members on the basis of high scholarship and good moral character. AOA recognizes and perpetuates excellence in the medical profession, with goals to promote scholarship and research in medical school, encourage high standards and conduct, and recognize high attainment in medical science, practice, and related fields.

Gold Humanism Honor Society (GHHS), a national honor medical society, elects members on the basis of high scholarship and good moral character. GHHS recognizes individuals who are exemplars of humanistic patient care and who can serve as role models, mentors, and leaders in medicine. Goals involve promoting humanism and patient-centered care throughout the medical profession.

Grading System

The Curriculum Office implements and manages guidelines governing the grading system. The Associate Dean for Curriculum collaborates with course and clerkship directors and Foundations and Clinical Regional Assistant Deans who oversee compliance. The Student Progress Committee reviews all fail grades and the performance of students whose evaluations include a pattern of evaluator or professional development concerns.

Final Course Grades

1. Pass/Fail: Required Foundations Phase blocks
2. Pass/Fail: Independent Investigative Inquiry (III)
3. Honors/High Pass/Pass/Fail: Required Patient Care Phase and Career Explore and Focus Phase clerkships and clinical electives (All clerkships 8 credits or longer have the option of H/HP/P/F and clerkships less than 8 credits are Pass/Fail only.)
4. Evaluator Concern: internal designation
5. Professional Development Assessment: internal designation
6. Withdrawal

If completion of an additional paper or project is required for achievement of an Honors grade in a required or elective clinical course, all requirements for the Honors grade must be completed no later than the last day of the course. Fail grades are reviewed by the Student Progress Committee.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Graduation with Honors

A degree of Doctor of Medicine with honors may be awarded to students with high achievement who have demonstrated initiative and success in clinical and scholarly pursuits related to medicine, outstanding leadership, or exceptional service commitment. Graduation with honors may be awarded for up to 15% of the graduating class. High honors may be awarded to recognize outstanding and truly exceptional performances of a few selected students, and may not be given each year. Nominations are submitted by department and College faculty, honorees are selected by the Student Progress Committee, and final recipients are approved by the Medical School Executive Committee.

The Center for Health Equity Diversity and Inclusion (CEDI)

The Center for Health Equity, Diversity, and Inclusion (CEDI) operates throughout the School of Medicine, including the WWAMI region's teaching, patient care, and research programs. CEDI offers educational opportunities to develop expertise in patient care of vulnerable populations through its pathway programs and classes. CEDI collaborates with departments and divisions, general medical education, academic affairs, and teaching programs in the WWAMI region. Pipeline programs include outreach to underrepresented middle and high school students through the Doctor for a Day Program, the national Summer Health Professions Education Program (SHPEP), the UW Health Professions Academy (HPA), and support of five URM medical student affinity groups. Residents, fellows, and faculty are also supported through UW Network of Underrepresented Residents and Fellows (UWNURF) and the Committee on Minority Faculty Advancement (CMFA). The Center also collaborates across campuses and with other two- and four-year colleges and universities to engage in recruiting disadvantaged and underrepresented students in the WWAMI region.

Pathways and Classes: CEDI manages three pathway programs that prepare medical students to provide culturally responsive care to specific populations – done through coursework and elective clerkships tied specifically to those populations. Pathway programs include: Hispanic Health Pathway, Indian Health Pathway, and LGBTQ Health Pathway. Medical students may also expand their skills working with vulnerable populations through two other programs – the Global Health Pathway and the Underserved Pathway. Some students elect more than one program concurrently. Beyond courses required for a pathway program, students may elect classes on African American Health and Healthcare Disparities and Clinical Management of the Transgender Patient (one of few such classes offered nationally).

Summer Health Professions Education Program: In collaboration with the UW School of Dentistry and the School of Public Health, CEDI offers a six-week summer program for freshman and sophomore college students from underrepresented and disadvantaged backgrounds with an interest in health careers. The 80 admitted students engage in clinical shadowing experiences; take enrichment classes that include biology, chemistry, physics, biostatistics, and public health; and complete a class that helps them prepare for applying to health professions schools. UW housing, stipends, and travel assistance are available.

Health Professions Academy: For underrepresented minority and disadvantaged UW undergraduate students interested in careers in medicine and dentistry. Offers longitudinal advising; assistance with MCAT (Medical College Admission Test) and DAT (Dental Admissions Test) preparation; and clinical shadowing, research, and networking opportunities.

Student Groups: CEDI manages five groups for underrepresented minorities: Asian Pacific American Medical Students Association (APAMSA), Latino Medical Students Association (LMSA), Medicine Wheel Society (MWS), Queer Medical Student Association (QMed), and Student National Medical Association (SNMA). These organizations involve students in activities including Doctor for a Day – a pipeline program that introduces health careers to underrepresented minority middle and high school students. UWSOM also manages other student organizations including Muslim Health Professionals of Greater Puget Sound (MHP), Alliance for Equal Representation in Medicine (AFERM), Health Equity Circle (HEC), and Students for an Anti-Racist UWSOM (SARU).

Residents/Fellows and Faculty: CEDI provides programming for underrepresented minority (URM) residents, and fellows and faculty. The UW Network for Underrepresented Residents and Fellows (UWNURF) collaborates with the Student National Medical Association (SNMA) to host Doctor for a Day events. They also plan town halls and didactic lectures, attend conferences to recruit URM students to UW sub-internships and residency programs, and host monthly networking events. The Committee on Minority Faculty Advancement (CMFA) often sponsors underrepresented speakers from other universities to speak about health disparities; works to support junior faculty; and provides other networking opportunities. CEDI also created the African American Roundtable to discuss ways to recruit and support African American students in medicine.

Diversity in Hiring: A search committee toolkit based on best/effective practices in searches, selection, promotion, and retention of diverse faculty offers trainings for departments and divisions on implicit bias and hiring processes.

Inquiries and requests for additional information may be obtained from the Center for Health Equity, Diversity, and Inclusion, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; (206) 685-2489, or at www.mycedi.org

Medical Scientist Training (MD/PhD) Program

Highly qualified candidates have a wide choice of research specializations. Participating graduate departments and interdepartmental disciplines include biochemistry, bioengineering, chemistry,

environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, and physiology and biophysics. Participating programs include neuroscience, molecular and cellular biology, and molecular medicine and mechanisms of disease. Students may also conduct research at the Fred Hutchinson Cancer Research Center.

Candidates submit an application and any supplemental material requested by January 1. Consideration is given to applicants with significant research experience and/or a minimum 3.50 cumulative GPA, or minimum MCAT scores of 10 in each category.

Applicants correspond directly with the administrator of the Medical Scientist Training

Program: MSTP

University of Washington

Health Sciences Building, Room I264

Box 357470

Seattle WA 98195-7470

Financial Information

Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars, due at the time specified and subject to change without notice. See Financial Aid Budget Information for current tuition and fees

at: www.uwmedicine.org/education/md-program/current-students/student-affairs/financial-aid/budget-information

Financial Assistance

Financial aid awards are based on need. All aid applicants must submit the Free Application for Federal Student Aid (FAFSA). The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited grant funds are available to Washington State residents who meet specific funding criteria.

Scholarships are available through the School of Medicine. A separate application for a School of Medicine scholarship is due May 31.

February 28 is the financial aid application deadline for all available aid sources. Late applicants are awarded only Stafford and unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical school.

Enrichment Opportunities

Students may explore working in rural or urban clinics in medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Two of the more formally structured programs include:

1. Rural/Underserved Opportunities Program (RUOP) exposes students to rural medicine and utilizes clinical training sites in all five states. During a summer month between the first and

second academic years, students work with physicians in small communities and urban underserved clinics.

2. Medical Student Research Training Program offers research opportunities to UW medical students the summer between the first and second years. Student trainees receive a stipend. The project is 10 weeks, full-time, 40 hours per week. The student may not be enrolled in courses for credit during this time

Graduate Medical Education and Postdoctoral Training

The UW School of Medicine offers residency and fellowship programs. Training occurs at the UW Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Seattle Children's hospital, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

Continuing Medical Education

Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information is available at www.uwcme.org.

All physicians are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The UW School of Medicine is accredited to sponsor continuing medical education for physicians. All programs sponsored by Continuing Medical Education are applicable to physician re-licensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Anesthesiology

Department Overview

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at (206) 231-2847 or bramhall@uw.edu. Other training questions may be directed to the Residency Coordinator at (206) 543-2773 or lfg@uw.edu.

Bioethics and Humanities

A204 Health Sciences Building

Undergraduate Program

Adviser

A204 Health Sciences Building

Box 357120

(206) 543-5145

bhadvise@uw.edu

The Department of Bioethics and Humanities offers the following program of study:

- A minor in bioethics

Minor

Minor Requirements: 25 credits

1. Minimum 18 credits of bioethics and humanities courses
2. Electives from an approved list to reach 25 credits. If a B H course is cross-listed with another department's course, the course may be counted toward the B H-course minimum even if taken under the other department's prefix. See program website for more information on electives.
3. Minimum 2.0 grade in courses presented for the minor

Graduate Program

Graduate Program Coordinator

(206) 221-6548

gradprog@uw.edu

The department offers a two-year master of arts in bioethics. The program offers training in research and clinical aspects of bioethics as well as empirical and normative methods of analysis.

Students study with diverse and well-respected faculty from the University of Washington, the Treuman Katz Pediatric Bioethics Center, and the Seattle Veterans' Health Administration. The program helps prepare students to teach, publish, and conduct research that incorporates bioethics analysis.

Master of Arts

Application and Admission

Qualified candidates include:

1. Practicing clinicians, biomedical scientists, health lawyers, post-doctoral fellows, and physicians accepted into a UW clinical fellowship program or the Treuman Katz Pediatric Bioethics Fellowship program.
2. Students currently enrolled in a professional degree program at the University of Washington (i.e. Law, Nursing, or Medicine).

Candidates should possess strong writing, critical thinking, and verbal communication skills. GRE scores are not required. Application due date is March 1.

Degree Requirements

40 credits, as follows:

1. Ethical theory (10 credits)
2. Empirical research methods (6 credits)
3. Clinical ethics (6 credits)
4. Research ethics (3 credits)
5. Approved electives (6 credits)
6. Practicum (3 credits)
7. Master's project (6 credits)

Students are encouraged to take additional electives based on interest and area of specialty, with guidance from their faculty mentor(s).

Opportunities for in-depth study on a topic of interest are available through elective courses, mentored research, and practicum experiences.

Biological Structure

Department Overview

G520 Health Sciences

The department promotes an understanding of biological processes through the study and analysis of structure-function relationships. Research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures.

The department recruits students through interdisciplinary PhD programs at the UW. Faculty are affiliated with one or more of the programs that provide training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genetics, Immunology, Microbiology, Molecular Biotechnology, Oceanography, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics, as well as research groups in the Fred Hutchinson Cancer Research Center.

The department does not offer a specific course of study leading to a master of science degree. An MS degree may be awarded, however, for students who meet the following requirements: One year of coursework (30 credits), concentrating in one or more areas that include neurobiology, cell and molecular biology, or developmental biology. Minimum 30 credits of research. Basic knowledge of statistics. One quarter of teaching as an assistant. A thesis committee approves the course of study, administers a general examination, and reviews the research proposal prior to the thesis defense.

Biomedical Informatics and Medical Education

Department Overview

The department consists of two units: (1) the Division of Medical Education and Evaluation and (2) the Division of Biomedical and Health Informatics. Medical Education and Evaluation provides training, research, and service in educational areas central to medical education including faculty and course evaluation, construction and scoring of examinations, curriculum development, implementation of innovative educational methodologies such as standardized patients and web-based simulated patients, faculty development, and research consultation (<http://bime.uw.edu>). Biomedical and Health Informatics (BHI) consists of a research and training program that emphasizes both basic and applied aspects of informatics (<http://bime.uw.edu>). BHI houses a National Library of Medicine Training Grant supporting pre- and postdoctoral fellows.

The department offers courses in the theory and application of medical education and biomedical and health informatics “designed for faculty, graduate and undergraduate students, postgraduates, and fellows in the health sciences who desire further training in methods, issues, research, and technology of medical education and biomedical informatics. BIME offers research master's and doctoral degrees, as well as fellowship training, in biomedical and health informatics.

Graduate Program

Graduate Program Adviser
UW Medicine, South Lake Union, Box 358047
(206) 616-0369
informat@uw.edu

Master of Science

Admission Requirements

1. Baccalaureate degree from an institution within the United States or equivalent degree from a recognized college or university from outside the United States
2. Minimum 3.00 undergraduate GPA, for the last 90 graded quarter credits or 60 graded semester credits
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts
4. GRE scores unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. GRE scores must be from testing within the past five years.
5. GRE scores for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).
6. A test of English language proficiency (usually the TOEFL) for most international applicants, unless they have an earned an undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based), 100 Internet-based), or 250

(computer-based); scores must be from a test taken within the past two years. IELTS scores are not accepted.

Degree Requirements

60 credits, as follows:

1. *Core courses*: BIME 530, BIME 533, BIME 534, BIME 535, BIME 537, BIME 539, BIME 543, BIME 550, BIOST 517 (or BIOST 537 or other approved equivalent biostatistics graduate course). BIME 543 effective for autumn 2015 cohort, or later; BIOST 537 effective for autumn 2014 cohort, or later.
2. *Elective courses*: Approved courses related to one's plan of study and research interests.
3. *Research seminars*: BIME 590 or BIME 591 (6 credits)
4. *Thesis and final examination*:
5. Cumulative 3.25 minimum GPA and quarterly 3.0 minimum GPA. Minimum 9 700-level thesis credits over at least two quarters. Minimum 30 credits from numerically graded courses. Only courses grades 2.7 and above count toward the degree.

Doctor of Philosophy

Admission Requirements

1. Baccalaureate degree from an institution within the United States or equivalent degree from a recognized college or university from outside the United States
2. Minimum 3.00 undergraduate GPA for the last 90 graded quarter credits or 60 graded semester credits
3. Prior college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology)
4. GRE scores, unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
5. GRE scores for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD)
6. A test of English language proficiency (usually the TOEFL) for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based), 100 Internet-based), or 250 (computer-based). Scores must be from a test taken within the past two years. IELTS scores are not accepted.

Degree Requirements

90 credits

1. *Core courses*: BIME 530, BIME 533, BIME 534, BIME 535, BIME 537, BIME 539, BIME 543, BIME 550; BIOST 517 (or BIOST 537, or other approved equivalent biostatistics graduate course). BIME 543 effective for 2015 cohort, or later; BIOST 517 effective for autumn 2014, or later.
2. *Depth of knowledge courses*: Five additional approved courses in the area of specialization.
3. *Research seminars*: BIME 590 or BIME 591 (12 credits)

4. *Qualifying, general, and final examinations*: 60 credits completed prior to general examination; 27 800-level dissertation credits over at least three quarters
5. Minimum 3.0 quarterly GPA; minimum 3.25 cumulative GPA; only courses graded 2.7 and above count toward the degree; minimum 60 UW credits

Comparative Medicine

Department Overview

T142 Health Sciences

The department provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a master of science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

Graduate Programs

Graduate Program Coordinator
T136 Health Sciences, Box 351790
(206) 685-3261

Postdoctoral Program

Postdoctoral training in laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of coursework, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided. A detailed description of the postdoctoral program is available at depts.washington.edu/compmed/.

Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission requires acceptance into the department's postdoctoral training program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

Predocutorial Program

Designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

Family Medicine

Department Overview

C408 Health Sciences

The department improves the health and well-being of individuals, families, and communities through leadership in education, scholarship, and clinical care. Over 800 clinical faculty members are located throughout the Washington, Wyoming, Alaska, Montana and Idaho (WWAMI) region, and approximately 40 regular faculty at the University site in Seattle.

Direct patient care is offered primarily through the clinical operations at the UW Neighborhood Clinic in Northgate and the Family Medicine Clinic at Harborview. The Medical Student Education Section develops and delivers innovative training to students who serve the evolving needs of the diverse individuals, families, and communities of the WWAMI region, with emphasis on rural and urban underserved and other vulnerable populations. The residency program offers full spectrum training of residents that allows graduates to enter a variety of practice settings, including careers with an academic or health policy focus. The UW Family Medicine Residency Network, a group of 18 family medicine residency programs located within the WWAMI region, exists to promote excellence in family medicine residency education, provide academic leadership, and respond to societal needs for family physicians. The research section's efforts are focused primarily in four areas -- rural health, the health workforce, chronic disease, and medical education. MEDEX Northwest trains physician assistants who primarily practice in medically underserved and rural areas of WWAMI.

Genome Sciences

Department Overview

S-250 Foege Building

The department was created in 2001 with the merger of the Department of Genetics and the Department of Molecular Biotechnology.

Graduate Program

Graduate Program Coordinator
S-340 Foege Building, Box 355065
(206) 616-7297
gensci@uw.edu

The department offers a graduate program leading to the doctor of philosophy degree. Students are admitted only to the doctoral program.

Faculty and students study a broad range of topics, including the genetics of *E. coli*, yeast, *C. elegans*, *Drosophila*, and mouse; human and medical genetics; mathematical, statistical, and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions.

The department addresses leading edge questions in biology and medicine by developing and applying genetic, genomic, and computational approaches that take advantage of genomic information now available for humans, model organisms, and a host of other species.

Doctor of Philosophy

Admission Requirements

1. Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. Competitive applicants have excellent GRE scores as well as extensive laboratory research experience.
2. Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying
3. Curriculum vitae
4. Unofficial copies of transcripts.
5. Unofficial copies of GRE scores (and TOEFL scores, for international applicants). Applicants who have provided official scores to the UW Graduate School need not send additional copies.
6. Three letters of reference from professors or others able to provide insight on the applicant's qualifications. Reference letters may be submitted online or by hard copy.
7. Applicants still in school will have earned additional courses not yet listed on the transcript should send a list of such courses to be taken before graduation.

Degree Requirements

90 credits

1. *First year:* Core courses, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as literature review. Students rotate through a minimum of three laboratories before selecting a thesis laboratory at the end of the first year. Actual courses are determined in consultation with adviser.

Electives focused on specific areas of interest. Students have the option of selecting mentors from core faculty members in the department as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center.

2. *Second year:* Thesis research and additional electives. General examination for PhD candidacy.
3. *Third year:* Teaching assistant for two undergraduate courses.
4. *Final years:* Complete research and defend dissertation during fifth year.
5. During all years, students participate in the departmental Journal Club and research reports functions, and attend presentations of well-known researchers via the departmental seminar series.

Financial Aid

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

Research Facilities

The department is located in the William H. Foege Building. Students are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available.

Immunology

Department Overview

H564 Health Sciences

The department includes more than 30 faculty and 200 scientists, students, post-docs and staff engaged in elucidating fundamental immunological mechanisms and how these mechanisms impact human health; infectious, autoimmune, and allergic diseases; and cancer. Current focus areas include lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Graduate Program

Graduate Program Coordinator
H564 Health Sciences, Box 357650
immgrad@uw.edu
(206) 685-3955, fax (206) 543-1013

Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the PhD.

Doctor of Philosophy

Admission Requirements

Students are admitted for autumn quarter; application deadline is January 1 for U.S. citizens and November 1 for international applicants. Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.

International students must take the TOEFL; 250 is the minimum acceptable score on the computer test.

Degree Requirements

90 credits

1. 18 graded credits in the first two years. First-year coursework consists of consecutive five-week-long courses taken autumn through spring quarters – two per quarter (for 1.5 to 2 graded credits each); winter quarter, first year students also take IMMUN 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices. In the second year, students earn 4.5 or 5 additional graded credits by taking electives winter and/or spring quarters. As part of

first- and second-year coursework, students take two five-week courses that specifically focus on cancer immunology.

2. Autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students attend the departmental seminar series, Journal Club, and research-in-progress talks beginning the first quarter and continuing throughout enrollment.
3. All elective courses must be relevant to biomedical research, and include either a final examination or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.
4. Each student takes the qualifying examination during July immediately following the second year of classes. (MSTP students take qualifying examinations following the first year of graduate classes.)
5. Students who pass the qualifying examination then prepare for the General Examination, which must be taken within 15 months of the qualifying examination.
6. The dissertation must meet all format requirements.

Laboratory Medicine

Department Overview

NW 120, UW Medical Center

Medical laboratory science, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of healthcare, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

Please Note: In summer 2020, the Department of Laboratory Medicine and the Department of Pathology merged into the Department of Laboratory Medicine and Pathology. The General Catalog entry for the new department was not available at time of publication.

Undergraduate Program

Adviser

NW 120, UW Medical Center
(206) 598-6131

medtech@uw.edu

The Department of Laboratory Medicine offers the following program of study:

- Bachelor of Science in Medical Laboratory Science degree

Bachelor of Science

1. *Pre-professional Phase.* During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
2. *Professional Phase.* The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENOME 351, GENOME 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

Department Admission Requirements

1. BIOL 118, BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223 or CHEM 237; one of STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or Q SCI 381.

2. Complete all general education requirements including 10 credits of Individuals & Societies, and 10 credits of Visual, Literary, & Performing Arts, as well as all required English and writing courses.
3. Students admitted to the medical laboratory science program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission is cancelled.

Application Procedure: See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

Major requirements

149 credits

1. *Courses Required for Admission (44 credits):* See list above.
2. *Didactic Courses (60 credits):* BIOC 405; IMMUN 441; MICROM 442, MICROM 443, MICROM 445, MICROM 460, MICROM 461; LAB M 301, LAB M 302, LAB M 418, LAB M 419, LAB M 420, LAB M 421 (6 credits), LAB M 426 (6 credits), LAB M 430, LAB M 435
3. *Clinical Rotations (45 credits):* LAB M 423 (9 credits), LAB M 424 (9 credits), LAB M 425 (9 credits), LAB M 431, LAB M 433, LAB M 436
4. Minimum 2.0 grade in all didactic and clinical rotation courses
5. Minimum 2.00 GPA, both cumulative and in required courses

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduates of the medical laboratory science program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical laboratory scientists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical laboratory scientist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical laboratory scientists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- *Instructional and Research Facilities:* The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Seattle Children's hospital, Labcorp Dynacare, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, Virginia Mason Medical Center, Evergreen Hospital Medical Center, and Highline Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition,

students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.

- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Internship Opportunities:* One or two internships per year in Japan available to graduates of the medical technology program.
- *Department Scholarships:* Several offered.
- *Student Organizations/Associations:* None currently active.

Of Special Note: The medical laboratory science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, (847) 939-3597, (773) 714-8880, (773) 714-8886 (fax), info@naacls.org, www.naacls.org. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

Graduate Program

Graduate Program Coordinator
NW 120, Box 357110
(206) 598-2148
hschil@uw.edu

The department offers a Master of Science in Laboratory Medicine and prepares the graduate for advanced technical and supervisory positions in clinical and research laboratories as well as in pharmaceutical and diagnostic industries.

The curriculum usually two years for full-time students, may be up to six years for part-time students. Students select one of five pathways and work with a mentor on a thesis project. In addition to 25 credits of required courses, they take courses related to their area of study. The target population is medical technology (MT/MLS) graduates with ASCP certification.

The department also offers a combined undergraduate/graduate program (CUG). Students may enter either as undergraduates or college graduate/postbaccalaureate students. The student must first be accepted into the undergraduate program shown above. Undergraduates or college graduate/postbaccalaureate students may apply simultaneously to the CUG program, or delay application until graduation. Once accepted the student completes the undergraduate program, then immediately enrolls in the Graduate School. Students receive a BS in Medical Laboratory Science at the completion of their undergraduate studies and an MS in Laboratory Medicine at the completion of their graduate studies.

Admission Requirements

The program accepts mostly ASCP certified medical laboratory scientists (MLS/MT). For medical laboratory scientists (MLS/MT), medical laboratory technicians (MLT), students from a four-year program, or laboratorians with significant experience in a clinical laboratory, admission requirements include:

1. Minimum 3.00 GPA in the most recent 90 graded quarter credits (60 graded semester credits)

2. Certification as a medical laboratory scientist (MLS/MT) or equivalent, or as a medical laboratory technician (MLT) or equivalent, or as a specialist in a clinical laboratory field
3. GRE Aptitude Test within the last five years
4. Foreign students submit results of the TOEFL, MLT, or IELTS to the Graduate School. Scores are good for only two years.
5. A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
6. Three letters of recommendation
7. A personal interview

For students with an undergraduate degree in a scientific field such as chemistry, microbiology, or biology, without ASCP certification, the program is highly competitive. Admission requirements include:

1. Outstanding academic achievements, including a minimum 3.20 GPA in the last 90 graded quarter credits (60 graded semester credits)
2. GRE Aptitude Test within the last five years, with excellent scores.
3. Foreign students submit results of the TOEFL or IELTS. Scores are good for only two years.
4. A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
5. Three letters of recommendation
6. Personal interviews with department faculty

Application deadline is February 15 to begin the following autumn quarter. Application forms and procedures for admission to the Graduate School are available at www.grad.washington.edu/.

Degree Requirements

Minimum 36 credits, of which nine are thesis credits. Full-time medical laboratory scientists typically complete the program in two years. Students select one of five pathways, as follows:

1. Chemistry/Immunology
 - a. Required: BIOC 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
 - b. Recommended: MICROM 441
 - c. Electives relevant to thesis, chosen with advice from mentor: BIOC 426, BIOC 440, BIOC 441, BIOC 442, BIOC 540, BIOC 541, BIOC 542, BIOC 512, BIOC 513, CHEM 428, CHEM 429, CHEM 436, CONJ 546, IMMUN 532, IMMUN 533, IMMUN 534, IMMUN 535, PATH 500, PATH 502, PATH 513, PATH 515, PATH 516, PATH 517, P BIO 505, P BIO 506, P BIO 507, PHCOL 401, PHCOL 402
2. Hematology/Coagulation
 - a. Required: BIOC 440, BIOC 441, BIOC 442, BIOC 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
 - b. Recommended: PATH 516
 - c. Electives relevant to thesis chosen with advice from mentor: BIOC 512, BIOC 513, CHEM 428, CHEM 429, CONJ 546, GENOME 465, IMMUN 441, IMMUN 532, P BIO

506, PATH 500, PATH 512, PATH 514, PATH 515, PATH 516, PATH 522, PATH 560 (*, max. 10).

3. Microbiology/Virology

- a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Recommended: IMMUN 441, MICROM 442, MICROM 445, MICROM 555 (2.5)
- c. Electives relevant to thesis chosen with advice from mentor: BIOC 440, BIOC 441, BIOC 442, BIOC 541, BIOST 512, BIOST 513, CHEM 428, CHEM 429, CONJ 547, CONJ 550, EPI 503, EPI 507, EPI 510, EPI 511 (3-4), EPI 512, IMMUN 533, MICROM 411, MICROM 431, MICROM 450, MICROM 529, MICROM 530, MICROM 531, MICROM 553, P BIO 505, P BIO 506, PATH 512, PATH 513, PATH 515, PATH 516

4. Molecular Diagnostics/Genetics

- a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Recommended: BIOC 440 or equivalent, BIOC 441 or equivalent, BIOC 442 or equivalent, GENOME 465
- c. Electives relevant to thesis chosen with advice from mentor: BIOST 512, BIOST 513, BIOST 516, CHEM 428, CHEM 429, CONJ 546, EPI 516, EPI 517, GENOME 411, GENOME 466, GENOME 531, IMMUN 441, IMMUN 532, IMMUN 536, MICROM 450, MICROM 530, P BIO 505, P BIO 506

5. Management/Medical Informatics

- a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Electives relevant to thesis chosen with advice from mentor
 1. Business Administration: B A 470, B A 472
 2. Business Communications: B CMU 510

6. Human Resource Management and Organizational Behavior (HRMOB): HRMOB 410, HRMOB 450, HRMOB 470 MGMT 403, MGMT 404

MEDEX

Department Overview

Suite 200, Roosevelt Commons

MEDEX Northwest, established in 1969, has the long-standing mission to train health care providers who will practice primary care in medically underserved and rural areas of the UW School of Medicine's service region (Washington, Wyoming, Alaska, Montana, Idaho -- or WWAMI). MEDEX also has a formal agreement to train students from Nevada.

Undergraduate Program

Bachelor of Clinical Health Sciences

Admission Requirements

1. Clinical Experience: two years minimum (4,000 hours minimum)
2. Human Anatomy and Physiology: Minimum 10 quarter or 6 semester credits. Preferably these courses should be completed within the past five years. Minimum 2.7 grade in each class.
3. Other Medically Related Sciences (e.g., biology, microbiology, chemistry). Minimum 5 quarter or 3 semester credits. Minimum 2.7 grade in each class.
4. English. Two college English courses at the 100 or higher level. At least one must be a composition course. Minimum 2.7 grade in each class.

Major Requirement

129 credits as follows:

MEDEX 450, MEDEX 451, MEDEX 452, MEDEX 453, MEDEX 454, MEDEX 455, MEDEX 456, MEDEX 457, MEDEX 458, MEDEX 459, MEDEX 460, MEDEX 461, MEDEX 462, MEDEX 463, MEDEX 465, MEDEX 466, MEDEX 467, MEDEX 468, MEDEX 469, MEDEX 470, MEDEX 471, MEDEX 472, MEDEX 473, MEDEX 474, MEDEX 475. These courses are taken over eight quarters, not all in numerical order. (Although MEDEX 450 and MEDEX 451 must be taken the first summer quarter of the program, they do not count toward the 180 credits required for the Bachelor of Clinical Health Services degree. The remaining 129 credits shown in this paragraph constitute the major for this degree.)

Graduate Program

Master in Clinical Health Services

Offered through MEDEX Northwest and the UW School of Medicine in Seattle and Spokane, the Master of Clinical Health Services (MCHS) for physician assistants is designed for professionals who have worked as PAs for at least two years and hold a bachelor's degree. The EMCHS helps students assume leadership roles through the development of skills and techniques needed to manage the rapidly changing world of health care.

Admission Requirements

1. Baccalaureate degree from a regionally accredited U.S. institution or equivalent foreign institution. No preference of college major
2. Minimum 2.7 grade for each class
3. Minimum two years (4,000 hours) clinical experience
4. Human anatomy and physiology (completion preferred within the last five years): 10 quarter credits, or 6 semester credits.
5. Physician Assistant-Certified (PA-C) by the National Commission on Certification of Physician Assistants (NCCPA)
6. Medically related sciences (e.g., biology, microbiology, chemistry). (15 quarter credits, or 9 semester credits).
7. Meet UW Graduate School requirements

Degree Requirements

162 credits, as follows:

1. First summer through first spring (four quarters): MEDEX 550, MEDEX 551, MEDEX 552, MEDEX 553, MEDEX 554, MEDEX 555, MEDEX 556, MEDEX 558, MEDEX 559, MEDEX 560, MEDEX 561, MEDEX 562, MEDEX 568, MEDEX 569, MEDEX 570, MEDEX 571, MEDEX 572, MEDEX 573, MEDEX 574, MEDEX 575, MEDEX 577
2. Second summer through third summer (five quarters): MEDEX 540, MEDEX 541, MEDEX 542, MEDEX 543, MEDEX 562, MEDEX 565, MEDEX 566, MEDEX 581, MEDEX 582, MEDEX 583, MEDEX 584, MEDEX 588
3. Minimum 2.7 grade in all required courses
4. Minimum 3.00 GPA

Medicine

Department Overview

RR512 University of Washington Medical Center

domchair@uw.edu

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veterans' Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

Microbiology

Department Overview

K357A Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

Undergraduate Program

Adviser

K-357A Health Sciences, Box 357735

(206) 543-5824

micro@uw.edu

The Department of Microbiology offers the following programs of study:

- The Bachelor of Science degree with a major in microbiology
- A minor in microbiology

Bachelor of Science

Suggested First- and Second-Year Courses: PHYS 114, PHYS 115, or PHYS 121, PHYS 122; one of the following: MATH 112, MATH 124, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

Department Admission Requirements

1. Minimum 75 credits applicable to graduation, with a minimum 2.00 overall cumulative GPA.
2. Completion of the following prerequisite courses with a minimum 2.50 cumulative GPA: BIOL 180; BIOL 200 (minimum 2.3 grade); BIOL 220; either CHEM 142, CHEM 152, CHEM 162; or CHEM 143 and CHEM 153; either CHEM 223, CHEM 237, or CHEM 335

Major Requirements

Minimum 90 credits (including microbiology courses) in the biological, physical, and mathematical sciences, as follows:

1. Minimum 2.50 cumulative GPA in courses required for admission: BIOL 180; BIOL 200 (minimum 2.3 grade), BIOL 220; either CHEM 142, CHEM 152, and CHEM 162, or CHEM 143 and CHEM 153; either CHEM 223, CHEM 237, or CHEM 335
2. *Core Courses (8 credits)*: MICROM 402; MICROM 410; MICROM 496
3. *Distribution Groups and Electives (28 credits)*: Minimum one course from each of the following four distribution groups; minimum two laboratory courses. Remaining credits from additional courses from the distribution groups or from an approved list of electives. See adviser for approved list
 - a. *Medical Microbiology*: IMMUN 441, MICROM 442 MICROM 443, MICROM 460, or both MICROM 460 and MICROM 461
 - b. *Virology*: MICROM 445 or MICROM 450
 - c. *Diversity and Ecology*: MICROM 412 or MICROM 435
 - d. *Genetics and Molecular Biology*: MICROM 411; or MICROM 431; and either GENOME 361 or GENOME 371
4. Either PHYS 114 and PHYS 115; or PHYS 121 and PHYS 122 (PHYS 116 or PHYS 123 recommended)
5. Either MATH 112, MATH 124, MATH 144, Q SCI 381, STAT 220, or STAT 311
6. Either BIOC 405 and BIOC 406, or BIOC 440, BIOC 441, and BIOC 442
7. All required courses taken for a numerical grade unless course is offered credit/no-credit only. Minimum 2.25 cumulative GPA; minimum 1.8 grade in all MICROM and IMMUN core and elective courses applied to the major
8. Transfer students must complete at least 20 required and elective microbiology credits through the UW.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minor

Minor Requirements: 29 credits as follows:

1. 14 credits to include BIOL 200; one of CHEM 152, CHEM 155, CHEM 162, or CHEM 165; one of CHEM 223, CHEM 237, or CHEM 355.
2. 15 credits from the following: MICROM 410; one from MICROM 302, MICROM 402, MICROM 431, or MICROM 443; and approved 400-level, graded microbiology courses to reach 29 credits. See adviser for approved list.
3. Minimum cumulative 2.00 GPA for all courses counted toward the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal BS degree or qualify to pursue advanced degrees in graduate or professional schools.

Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves.

Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.

- *Instructional and Research Facilities:* Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.
- *Department Scholarships:* The department offers four awards each year. More information is available at the department's website.
- *Student Organizations/Associations:* The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topics such as research and career opportunities, graduate school, and peer teaching.

Graduate Program

Graduate Program Coordinator
K357A Health Sciences, Box 357735
(206) 543-2572
microadv@uw.edu

The department offers a graduate program leading to the doctor of philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

Doctor of Philosophy

Admission Requirements

Background in any biological science discipline. Selection based on evaluation of a student's undergraduate record for indications of ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. Prospective students are strongly advised to seek opportunities to carry out undergraduate research.

Required background courses (generally satisfied prior to entry into the graduate program):

1. Biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
2. Classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
3. General microbiology (equivalent to MICROM 410)
4. Medical microbiology and basic immunology recommended for those considering research in the area of medical microbiology or virology.

Degree Requirements

90 credits minimum, as follows:

1. **Conjoint (6 credits):** See department website for specific courses.
2. **Virology and Bacteriology (6-7 credits):** See department website for specific courses.
3. **Faculty Research Presentations for first-year students:** MICROM 599
4. **Laboratory Rotation:** MICROM 500, minimum three quarters
5. **Journal Club:** MICROM 522, continuous enrollment
6. **Seminar:** MICROM 520 seminar series or attendance at Fred Hutchinson seminars, where students are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.
7. **Additional requirements:**
 - a. Teaching assistant in at least two laboratory courses for undergraduates (usually satisfied in the first and/or second year).
 - b. Minimum two formal lectures given in an undergraduate course (third or fourth year).
 - c. First author on multiple papers related to thesis research published or accepted for publication in refereed journals. Under some circumstances, one first-author publication satisfies this requirement.
8. General examination, dissertation, final examination

Neurological Surgery

Department Overview

325 9th Avenue, Harborview Medical Center

askuwns@uw.edu

The department is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction is provided for medical students and postgraduate physicians.

Medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, UW Medical Center, Veterans Affairs Puget Sound Health Care Center, and Seattle Children's hospital. The department also has several course offerings correlating research and clinical problems of the nervous system, including research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the department. Department research facilities are housed in the Medical Research Tower of the UW Medical Center, at Harborview Research and Training Building, and at Veterans' Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

Neurology

Department Overview

RR650 University of Washington Medical Center

neurolog@uw.edu

Neurology's four-year residency program (including an internship) offers training in all facets of neuroscience research. In addition, the department offers training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The department is active in teaching, research, and patient care at the UW Medical Center, Seattle Veterans' Affairs Medical Center, Harborview Medical Center, Seattle Children's hospital, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

Obstetrics and Gynecology

Department Overview

BB667 Health Sciences Building

The department is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction: growth and development of the fetus, normal and complicated obstetrics, and surgical and medical diseases of the female reproductive system, including endocrinology, oncology, infectious disease, urogynecology, psychosocial problems, primary and preventive health care, and ethics.

Ophthalmology

Department Overview

RR801 University of Washington Medical Center

The department is responsible for education and instruction in both clinical and research programs in diseases of the eye and visual system.

Medical student education is provided through multiple electives in Seattle and the WWAMI region during the clinical years (usually third and fourth years of medical school). Successful graduates of medical school interested in ophthalmology apply to residency, which includes three years of training beginning in their PGY-2/R-2 year at affiliated hospitals. A PGY-1R-1year is required prior to ophthalmology residency, (applied for at the same time as ophthalmology residency). After residency, optional programs for further specialized training are available for application at the UW Ophthalmology Department, to include a two-year ophthalmic/plastics and orbit fellowship, a two-year surgical retina fellowship, a one-year uveitis fellowship, a one-year pediatrics fellowship, and a one-year cornea fellowship. Patient care is provided under supervision of faculty physicians at the UW Medical Center, Harborview Medical Center, Veterans' Affairs Medical Center, and Seattle Children's hospital.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact the department.

Orthopaedics

Department Overview

BB1043 University of Washington Medical Center

The department is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the master of science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

Otolaryngology -- Head and Neck Surgery

Department Overview

BB1165 University of Washington Medical Center

The department provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

Pathology

Department Overview

C516 Health Sciences

Pathology, the study of disease: its causes, mechanisms, and effects on the body, is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by MDs, it includes the laboratory evaluation of organs, tissues, and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by PhDs, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

The department offers graduate training in experimental pathology, with emphasis on the cellular and molecular biological basis of disease. The program trains individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. Emphasis is on developing skills in hypothesis generation and testing, including the design, accomplishment, and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to elucidate the mechanisms underlying human disease. Graduates usually continue research careers at biotechnology companies or universities/research institutes.

Please Note: In summer 2020, the Department of Laboratory Medicine and the Department of Pathology merged into the Department of Laboratory Medicine and Pathology. The General Catalog entry for the new department was not available at time of publication.

Graduate Program

Graduate Program Adviser
C516 Health Sciences, Box 357470
(206) 616-7551

Doctor of Philosophy

Admission Requirements

1. Copy of the Graduate School Application
2. Official transcripts
3. Official GRE scores. Subject test in biology or related area recommended.
4. Statement of purpose and research interests
5. Three or more letters of recommendation
6. Personal statement that addresses the relationship between personal background and aspirations

Special Requirements

Undergraduate courses in the sciences. Acceptable scores on the GRE, including advanced biology or chemistry. Some experience in a research laboratory strongly recommended. Those wishing to

matriculate toward both the MD and PhD degrees must gain admission to both the Graduate School and the School of Medicine.

Degree Requirements

90 credits

1. *Required coursework:* PATH 500, PATH 501, PATH 507, PATH 512), PATH 513, PATH 515, PATH 516, PATH 551; BIOST 511; CONJ 538, CONJ 539
2. *Research before the general examination:* PATH 600
3. *Research after the general examination:* PATH 800
4. *Recommended courses:* CONJ 531, CONJ 532
5. *General examination*
6. *Dissertation*
7. *Final examination*

Financial Aid

Funding is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

Research Facilities

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

Residency Training Program

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100, or visit the residency program [website](#).

Pediatrics

Department Overview

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Seattle Children's hospital, University of Washington Medical Center, and Harborview Medical Center.

Pharmacology

Department Overview

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program

Graduate Program Coordinator
E-417 Health Sciences, Box 357280
(206) 685-9252
phcoladm@uw.edu

The Department of Pharmacology offers the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirement

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

Graduation Requirements

Minimum 90 credits, to include:

1. PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 with a minimum 2.7 grade for each class. Enrollment in PHCOL 507 throughout graduate school; PHCOL 514 in the first, second, and third years of graduate study.
2. PHCOL 519 (laboratory rotations) for autumn, winter, and spring quarters of the first year acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL 519. Students entering the PhD program with an MS degree or equivalent may petition to enroll in only one quarter of PHCOL 519 before selecting a laboratory. Rotations may occur outside the department by special permission only.
3. Four advanced 2-3 credit graded elective courses in pharmacology in addition to the PHCOL 510 through PHCOL 513 series. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas. The courses should strengthen the foundation of the student's thesis proposal.

4. Creditable passage of the general examination consisting of a comprehensive take-home written examination on general pharmacology, taken during summer quarter of the second year, followed by preparation of a grant proposal on the thesis project, and an oral examination, given by the Supervisory Committee during the first quarter of the third year of study. The student is evaluated on the proposed dissertation research and on his or her knowledge of the major disciplines important to the research. Based on the student's performance, the committee recommends approval and candidacy for the PhD degree, further work and subsequent reexamination, or termination.
5. After successful completion of the general examination, the student devotes most of his or her time to thesis research in the third and subsequent years of study. Students are expected to finish all degree requirements and complete their thesis research within a six-year time period from matriculation.
6. The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. Research must represent a worthy and fundamental contribution showing originality in concept and implementation.

When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor obtains approval of the Graduate School and sets a date for the final examination. The final examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

Physiology and Biophysics

Department Overview

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences anatomy, molecular biology, immunology, biochemistry, pharmacology, pathology, and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program

Graduate Program Coordinator
G424 Health Sciences, Box 357290
(206) 685-0519
pbio@uw.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a PhD degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. The department participates in interdisciplinary PhD degree programs in neurobiology and behavior and in molecular and cellular biology. The department also participates in the medical scientist training program, and the biological physics structure and design program.

Master of Science

The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of the graduate program, there are no specific prerequisites for admission. However, most students have backgrounds in the physical and/or biological sciences. These include

majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

Degree Requirements

90 credits minimum, as follows:

Due to the broad nature of research interests in the department and the diversity of graduate-student backgrounds, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. Courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least six mini courses.

Required Courses:

1. CONJ 531, CONJ 532, P BIO 532, NEUBEH 501, NEUBEH 502, P BIO 508, must be taken three times); P BIO 513, P BIO 519
2. Six departmental mini-courses, to be completed prior to the general examination, from the following: P BIO 509, P BIO 545, P BIO 550, P BIO 551, P BIO 552, P BIO 553, P BIO 554, P BIO 555, P BIO 556, P BIO 557, P BIO 559.
3. P BIO 600 (before general examination)
4. P BIO 800 (after general examination)
5. Note: P BIO 503 is highly recommended, but not required

General Examination

The general examination must be taken by the last day of autumn quarter of the third year. After passing the general examination the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continues working on thesis research.

Final Examination

The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

Research Facilities

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

Psychiatry and Behavioral Sciences

Department Overview

BB1644 Health Sciences

pbsci@uw.edu

The department offers coursework, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

Graduate Program

The Medical School curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

Residency Training in Psychiatry

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liaison services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liaison psychiatry, and psychiatric neuroscience are available.

Clinical Psychology Internship Program

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research skills training is also available as part of an INH-funded training grant for selected internship participants.

Postdoctoral Fellowship Training

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

Radiation Oncology

Department Overview

NN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the department are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work, particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

Radiology

Department Overview

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The department consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both are supported by technologists and faculty in radiation physics. Instruction is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each hospital affiliated with the University.

Rehabilitation Medicine

Department Overview

BB928 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, Master of Prosthetics and Orthotics, and a PhD in rehabilitation science.

Occupational Therapy

Head

Janet M. Powell

The profession of occupational therapy appeals to people who enjoy thinking creatively and flexibly to solve problems, and who want to help people with disabilities perform activities important in their daily lives. Occupational therapists provide services related to occupational performance (activities) in everyday life in the areas of self-care, work, education, or play and leisure. They work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies to enhance health and well-being; and with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations live as productive and as high quality of life as possible. Services focus on increasing independence, enhancing development, providing compensatory strategies, and minimizing or preventing disability. Therapists adapt activities and environments, select therapy activities meaningful to clients, and provide client, family, and caregiver education. For example, an occupational therapist may teach adaptive dressing techniques to a client who has lost use of a hand following a stroke, help a child with autism interact with peers, or modify a computer for a young adult with a spinal cord injury returning to work.

Today's occupational therapists practice in rehabilitation centers, outpatient rehabilitation clinics, schools, hospitals, mental health facilities, private practice, skilled nursing facilities, home healthcare, and community health programs. The most common work settings for occupational therapists are school systems, hospitals, and long-term care facilities. The current and future job outlook for occupational therapists is excellent. The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) located at 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449. ACOTE's telephone number, c/o AOTA, is (301) 652-2682 and its web address is www.acoteonline.org. Standards comply with the U.S. Department of Education criteria for recognition of accrediting agencies. Graduates of the program are eligible to sit for the national certification examination for occupational therapists. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for development and implementation of this examination. All states currently require state licensure in order to practice.

Master of Occupational Therapy

Admission Requirements

1. Bachelor's degree in any major and Graduate Record Examination (GRE) taken within the past five years. Seven prerequisite courses as shown below. Volunteer or work experience in at least two practice areas of occupational therapy. Admission is once a year for entry autumn quarter; applications are due November 1.
2. Specific prerequisite courses at the UW. (Students who have attended schools other than the UW must take comparable courses.)
 - a. *Natural Sciences*: BIOL 118; B STR 301; CHEM 120; EDPSY 490
 - b. *Social Sciences*: PSYCH 305; PSYCH 306; SOC 110 or ANTH 202
3. *Requirements to Apply*: Completion of five prerequisite courses, including three courses in the natural sciences; 3.00 minimum GPA in prerequisite courses with no single course graded less than 2.7. Applicants must have a cumulative college-level grade point average of at least a 3.00 (B) to be considered for admission. This includes all baccalaureate and post-baccalaureate courses. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information are available by consulting the program's website at rehab.washington.edu/education/degree/ot/, by emailing ot@uw.edu, or by calling (206) 598-5764.

Degree Requirements

Courses: To be completed in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 510, REHAB 520, REHAB 522, REHAB 533, REHAB 541, REHAB 542, REHAB 543, REHAB 544, REHAB 545, REHAB 548, REHAB 551, REHAB 564, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 591, and REHAB 594.

GPA Requirement: cumulative 3.00 GPA in all required professional coursework to retain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's website at rehab.washington.edu/education/degree/ot/.

Continuation Policy: If at any point the OT curriculum cumulative GPA falls below 3.00, the student is placed on academic probation and must raise the GPA to 3.00 by the end of two subsequent quarters. Students unable to remove their probation status are subject to dismissal from the program. If a student receives a grade below 2.7 in a required course, continuation in the program is reviewed and determined by the Occupational Therapy Advisory and Evaluation Committee.

Fieldwork Placement: The student must satisfactorily complete all academic coursework before taking the two required Level II Fieldwork placements (REHAB 594). Both fieldwork placements must be satisfactorily completed within 24 months following completion of the academic portion of the program in order to graduate.

For more information on the Master of Occupational Therapy program, visit the department's website at rehab.washington.edu/education/degree/ot/.

Physical Therapy

Interim Head

Sarah Westcot McCoy

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular conditions.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is rebuilding self-confidence and creating a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality healthcare is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Intervention procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and assisted ambulation training.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formal mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education. For complete program details visit rehab.washington.edu/education/degree/pt.

Doctor of Physical Therapy

Admission Requirements

1. Enrollment is limited to 44 students each year and admission is competitive.
2. Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.
3. Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).

4. Prior to the application deadline of November 1, the student must have met the following academic requirements:
 - a. Minimum 3.00 GPA on all college-level courses
 - b. Minimum 3.00 GPA on PT prerequisite courses
 - c. Minimum 2.0 (C) grade on each PT prerequisite course
 - d. Half (50%) of PT prerequisite courses completed.
For a list of PT prerequisite course descriptions, see the program Website at depts.washington.edu/rehab/pt/eligibility.asp#prereq
5. Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.
6. Most clinical internship placement sites require potential trainees to undergo a criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore are able to finish the clinical portion of the curriculum, the completion of a criminal background check process is required of applicants accepting admission.

Degree Requirements

157 credits, as follows:

1. *Year One*
 - a. *Autumn Quarter:* REHAB 504, REHAB 509, REHAB 517, REHAB 521, REHAB 522, REHAB 541, REHAB 544
 - b. *Winter Quarter:* REHAB 506, REHAB 517, REHAB 533, REHAB 542, REHAB 545, REHAB 551
 - c. *Spring Quarter:* REHAB 507, REHAB 517, REHAB 525, REHAB 533, REHAB 536, REHAB 543, REHAB 548
 - d. *Summer Quarter:* REHAB 500, REHAB 508, REHAB 517, REHAB 537, REHAB 538, REHAB 540
2. *Year Two*
 - a. *Autumn Quarter:* REHAB 510, REHAB 511, REHAB 523, REHAB 547, REHAB 566
 - b. *Winter Quarter:* REHAB 502, REHAB 512, REHAB 527, REHAB 529
 - c. *Spring Quarter:* REHAB 502, REHAB 503, REHAB 531, REHAB 566, REHAB 569
 - d. *Summer Quarter:* REHAB 505, REHAB 514, REHAB 535, REHAB 515, REHAB 567, REHAB 801
3. *Year Three*
 - a. *Autumn Quarter:* REHAB 595, REHAB 801
 - b. *Winter Quarter:* REHAB 595, REHAB 801
 - c. *Spring Quarter:* REHAB 595, REHAB 801

Prosthetics and Orthotics

Division Director

Ann Yamane

The prosthetist-orthotist is a member of the rehabilitation healthcare team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. The interdisciplinary rehab team works with physically challenged individuals to increase their functional abilities, enhance their daily life, and help them to participate in activities they enjoy.

Certified Prosthetists Orthotists (CPOs) provide direct patient care and management. CPOs work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. Prostheses replace or substitute for a missing limb or part of a limb, and orthoses help with the control of motion and the support of a weakened body segment. Before designing a specific device, the prosthetist-orthotist examines a patient to find any conditions that might affect the future success of that device. Following the evaluation, the prosthetist-orthotist obtains an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist assesses the fit and function of the device and follows up with the patient, as necessary. To evaluate the fit and function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength, human locomotion, material science, and the human-device interaction.

Graduate Program Coordinator
BB808 Health Sciences Center
(206) 543-6763
pando96@uw.edu

The prosthetics and orthotics division offers the following program of study:

- The Master of Prosthetics and Orthotics degree

Master of Prosthetics and Orthotics

Admission Requirements

1. Bachelor's degree in any major from a regionally accredited U.S. college or university
2. Minimum 3.00 cumulative GPA
3. Prior to the start of the program, all prerequisites must be completed, including one course each in the areas of biology* (or other life science), statistics, and chemistry*; a two-course series in the areas of (1) anatomy and physiology and (2) physics*, and two courses in psychology (to include a general psychology course as well as either a developmental or abnormal psychology course). Laboratories must be taken with courses marked with an asterisk*.
4. Minimum 3.00 cumulative prerequisite GPA. No single course graded less than 2.0. Grades lower than 2.0 are not accepted.
5. GRE general test scores. Test must be taken within the past five years.
6. Volunteer or work experience in a prosthetics-orthotics clinic is strongly encouraged
7. Admission is competitive based on scholastic achievement, written skills, references, and involvement in activities or experiences related to the health professions.
8. Admission occurs once a year for entry autumn quarter; applications are evaluated starting November 1.

9. International applicants must meet several requirements in addition to those required of U.S. applicants to be admitted to the UW Graduate School. Consult the FAQs on the UW Graduate School website for more information.

See program [website](#) for complete details on admissions requirements.

Degree Requirements

112 credits as follows:

1. *Courses:* To be satisfactorily completed in a specific sequence beginning autumn quarter of entry year, and only at the UW: REHAB 522, REHAB 544, REHAB 541, REHAB 504, REHAB 509, RHB PO 511, RHB PO 501, REHAB 533, REHAB 545, REHAB 542, REHAB 551, REHAB 506, RHB PO 515, REHAB 548, REHAB 543, RHB PO 512, RHB PO 581, RHB PO 541, RHB PO 502, RHB PO 521, RHB PO 522, RHB PO 523, REHAB 580, RHB PO 561, REHAB 510, RHB PO 524, RHB PO 525, RHB PO 526, RHB PO 527, RHB PO 581, RHB PO 582, RHB PO 562, RHB PO 528, RHB PO 529, RHB PO 583, RHB PO 563, RHB PO 530, RHB PO 531, RHB PO 534, RHB PO 558, RHB PO 584, RHB PO 564.
2. *Grade Requirements:* A student must maintain a minimum 3.00 cumulative program GPA, and receive "credit" grades in all courses graded credit/no credit only, to maintain good standing in the program and be eligible for graduation.
3. *Continuation Policy:* If at any point the cumulative GPA in the curriculum courses falls below 2.70, the student is placed on academic probation. In order to be removed from probation, the student must achieve a cumulative GPA of 3.00 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program.

Post-Professional Programs

Doctor of Philosophy in Rehabilitation Science

Director
Deborah Kartin

Rehabilitation science is an interdisciplinary field that focuses on human function and disability. Basic and applied research from health sciences, social sciences, engineering, and related fields is directed toward (1) enhancing physical and psychosocial functioning, participation in life situations, and quality of life for people with disabilities; and (2) informing relevant social and healthcare policy.

The program targets students from diverse backgrounds in rehabilitation-related fields including occupational therapy, physical therapy, speech and language pathology, rehabilitation counseling, medicine, nursing, prosthetics and orthotics, and engineering.

The goal of the PhD program in rehabilitation science is to prepare future researchers, educators, and leaders in the area of rehabilitation science. Graduates contribute to the field of rehabilitation science, working in settings such as academic and research institutions, service delivery systems (e.g., hospitals, public schools), government agencies, and the private sector. These individuals are prepared to address research, education, service delivery, and policy issues from an interdisciplinary perspective.

1. Demonstrate advanced knowledge and productivity in rehabilitation science specific to research, education, service delivery, and/or policy.

2. Demonstrate leadership in interdisciplinary collaboration for the purpose of optimizing research, education, service delivery, and/or policy.
3. Generate and extend knowledge that is innovative and rigorously tested within a focused area of rehabilitation science.

Admission Requirements

1. Baccalaureate degree from a college or university of recognized rank
2. Copy of current professional certification/licensure to practice (as appropriate)
3. Letters of recommendation from three persons knowledgeable about the individual's potential for doctoral-level work in rehabilitation science
4. Letter of application
5. Resume/CV
6. Official university transcripts
7. Official Graduate Record Examination (GRE) General Test Scores

Degree Requirements

100 credits minimum, as follows:

Core course series (21 credits): coursework and practicum experiences in teaching (minimum 5 credits), and coursework in statistics and research methods (minimum 18 credits). In addition, each student must complete three cognates (minimum 6 credits each) specific to the student's goals. The student's committee and the core faculty in the rehabilitation science doctoral program must approve the entire course of study.

General requirements: In addition to meeting all requirements of the UW Graduate School, all students are expected to meet the following general requirements.

1. Minimum 3.00 cumulative and quarterly GPA.
2. 100 credits minimum, of which 27 are dissertation credits.
3. Completion of at least one teaching practicum (3-credit minimum).
4. Satisfactory completion of a research and scientific inquiry day manuscript and presentation.
5. Satisfactory completion of general examinations.
6. Dissertation.
7. Final examination.

For more information on the PhD program in rehabilitation science, visit the program's website at rehab.washington.edu/education/degree/rehabsci/.

Surgery

Department Overview

BB487 University of Washington Medical Center

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

Urology

Department Overview

BB1115 Health Sciences

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses, and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at (206) 731-3205 for further information.

School of Nursing

School Overview

T301 Health Sciences

Dean

Azita Emami

Associate Deans

Frank Barber, Assistant Dean of Technology, Learning, and Innovation

Butch de Castro, Associate Dean for Diversity, Equity, and Inclusion

Kevin Fralicks, Associate Dean for Advancement

Anne Hirsch, Associate Dean for Student and Academic Affairs

Brendon Lee, Assistant Dean for Finance and Administration

Joie Whitney, Associate Dean for Research

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical healthcare needs in both urban and rural settings, often for portions of the population who have not received adequate healthcare. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

Undergraduate Program

Adviser

T301 Health Sciences, Box 357260

(206) 543-8736

asknursing@uw.edu

The School of Nursing offers the following programs of study:

- Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- An accelerated Bachelor of Science in Nursing option for candidates with an existing bachelor's degree. This option provides eligibility to take the licensure examination to become a registered nurse.
- A four-quarter modification of the basic curriculum is available for the registered nurse. This BSN completion (RN to BSN) program is available at UW Bothell and UW Tacoma, and prepares graduates to go on for advanced degrees in nursing.

Bachelor of Science in Nursing

Suggested First- and Second-Year College Courses: See below, under Admission Requirements.

Admission Requirements

Admission occurs once a year, for autumn quarter. Application deadline: January 15. Selection is capacity constrained.

Application Requirements

1. Minimum cumulative 2.00 GPA
2. One of the following at time of application.
 - a. Three of the total prerequisite science courses completed with a minimum 3.00 GPA
 - b. Four of the total prerequisite science courses completed with a minimum 2.80 GPA

Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students, two quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology laboratory if laboratory is not included in the general microbiology course); NUTR 200.

3. College transcript(s)
4. Resume: outlining volunteer/paid healthcare experience, community service, and leadership
5. Personal statement: reflection of personal healthcare experience and fit in nursing role and cultural awareness
6. Letter of recommendation from a healthcare provider (employer or volunteer coordinator)
7. 100 hours of health care experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application.
8. After initial review of all applications, some are asked to attend a proctored essay session. Dates are published in the admissions publication. Eligible applicants are invited via email. Those not invited to attend the proctored essay are no longer in consideration for admission.

Entrance Requirements: Before beginning the nursing program in autumn, students must meet the following requirements:

1. Minimum 90 credits to include the following:
 - a. *Written communication (10 credits):* English composition and W-courses
 - b. *Problem-solving (8 credits):* one QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490
 - c. *Visual, Literary, & Performing Arts (VLPA) (15 credits)*
 - d. *Individuals & Societies (I&S) (15 credits):* to include NURS 201 or equivalent
 - e. *Natural World (NW) (26-33 credits):* to include CHEM 120, CHEM 220, CHEM 221 (three quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology laboratory if laboratory not included in general microbiology course); NUTR 200
 - f. *Electives to complete 90 credits*

2. Minimum 2.00 cumulative GPA, and minimum 2.0 grade for each prerequisite course. Because admission is capacity constrained, the GPA for admission is usually significantly higher.
3. All applicants must be exempt from all English language proficiency requirements at UW to start the program. If offered admission the applicant is required to pay for a background check run by a company specified by the School of Nursing.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Student and Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or email asknursing@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/prospective/visit/bsn/.

Major Requirements

91 credits

1. *Nursing Foundations (47 credits)*: NURS 303, NURS 304, NURS 401, NURS 405, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420, NURS 425, NURS 431, NURS 445, NURS 452
2. *Clinical Nursing (37 credits)*: NCLIN 302, NCLIN 306, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418, NCLIN 422, NCLIN 475
3. *Nursing Research and Methods (7 credits)*: NMETH 403, NMETH 450

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Accelerated Bachelor of Science in Nursing option (prior bachelor's degree in another field)

Admission Requirements

Admission occurs once a year, for autumn quarter, with application deadline the preceding autumn quarter. Selection is capacity constrained.

Application Requirements

1. Minimum 2.80 cumulative college-level GPA
2. Minimum four of the prerequisite science courses completed with a minimum 3.0 grade in each course, and a minimum 3.30 cumulative GPA in these courses. Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two quarter sequence -- one general chemistry and one organic -- for non-UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non-UW applicants must take a separate microbiology laboratory if laboratory is not included in the general microbiology course); NUTR 200.
3. College transcript(s)
4. Resume: Outlining volunteer/paid healthcare experience, community service, and leadership
5. Personal statement: reflection of personal healthcare experience and fit in nursing role and cultural awareness
6. Letter of recommendation from a healthcare provider (employer or volunteer coordinator)

7. Applicants are expected to have 100 hours of healthcare experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application.
8. All applicants are asked to attend a proctored essay session.

Entrance Requirements:

1. Bachelor's degree in a non-nursing field.
2. Lifespan growth and development course -- NURS 201 or equivalent.
3. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
4. Natural World courses: CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non UW applicants take a separate microbiology laboratory if laboratory not included in general microbiology course.); NUTR 200. Minimum 3.30 cumulative GPA in these courses.
5. Minimum 3.00 cumulative GPA, and minimum 3.0 grade for each prerequisite course.
6. Applicants must be exempt from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant must pay for a background check run by a company specified by the School of Nursing,

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Student and Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or email asknursing@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/prospective/visit/absn/.

Major Requirements

79 credits (Courses from the prior earned degree may be used to satisfy general education, nursing prerequisites, and electives.)

1. *Nursing Foundations (40 credits)*: NURS 303, NURS 304, NURS 401, NURS 405, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420, NURS 431
2. *Clinical Nursing (32 credits)*: NCLIN 301, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418, NCLIN 475
3. *Nursing Research and Methods (7 credits)*: NMETH 403, NMETH 450

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The BSN/ABSN undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. For the ten goals of the BSN degree program, visit nursing.uw.edu/admissions/bsn/curriculum/.
- *Instructional and Research Facilities*: Learning Laboratory

- *Honors Options Available:* With College Honors (Completion of Honors core curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research Internships and Service Learning:* Students complete eight clinical courses during the BSN program, beginning with the first quarter. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.
- *Department Scholarships:* Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- *Student Organizations/Associations:* Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

Graduate Program

Graduate Program Coordinator
T301 Health Sciences, Box 357260
(206) 543-8736
sonas@uw.edu

The School of Nursing offers degrees of Master of Nursing (MN), Master of Science (MS), Doctor of Nursing Practice (DNP) and Doctor of Philosophy in nursing science (PhD). The DNP program admits RNs interested in advanced clinical practice. The PhD program prepares students for roles as scientists, scholars, and educators. Neither the MS nor the PhD program requires RN licensure for admission.

The School offers an MN degree with a focus in community health systems nursing. A thesis or scholarly project is required. A concurrent MN/MPH degree is also available.

The MS degree is in [Clinical Informatics and Patient-Centered Technologies \(CIPCT\)](#). A thesis or scholarly project is required.

The Doctor of Nursing Practice (DNP) program admits postbaccalaureate or post-graduate students for either advanced practice registered nursing or advanced systems and population systems health. The following tracks are available (subject to change; visit School of Nursing website): adult gerontology primary care nurse practitioner; community health-systems nursing; family nurse practitioner; pediatric nurse practitioner; pediatric clinical nurse specialist; neonatal clinical nurse specialist; neonatal nurse practitioner; nurse midwifery; perinatal nurse specialist; and psychiatric mental health nurse practitioner. Applicants who already have a MN degree may apply to earn a DNP degree in their same specialty.

The PhD in nursing science is a research-based degree that trains students to create knowledge that influences and alters the health of individuals, groups, and populations, using current theories of nursing science. The program also offers an optional concentration in statistics in partnership with the Center for Statistics and the Social Sciences. All PhD students must successfully defend a dissertation at the end of their program.

The School of Nursing also offers a Graduate Certificate Program in Advanced Practice Nursing (GCPAPN), with sub-tracks as follows: adult nurse practitioner; psychiatric mental health nurse practitioner; advanced practice environmental health; infant mental health; pediatric nurse practitioner; nurse midwifery; neonatal clinical nurse specialist; and neonatal nurse practitioner. (See School's website for updated information.) Admission criteria vary slightly based on focus of the graduate certificate. Some

graduate certificate options require an RN license and a graduate degree in nursing. All options require completion of or concurrent enrollment in a graduate degree and a minimum 3.00 GPA in the last 90 quarter (60 semester) graded credits. Admission and program requirements for these certificates are the same as requirements for the umbrella degree in which the student is enrolled.

Part-time study is available for some graduate degree programs. Coursework may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM), which allows students to take non-clinical courses and earn up to 12 graduate-level credits that may apply to a graduate program if the student is later admitted.

Master of Nursing

Admission Requirements

1. Baccalaureate degree from a nationally accredited nursing program with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits,
- OR -
Associate of Arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, acceptable to the UW. RNs with non-nursing baccalaureate degrees must demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
2. A 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade
3. An active, unrestricted United States RN license at the time of application. Applicants without a Washington State license must obtain one prior to beginning the UW Master of Nursing program.
4. Proof of English Language Proficiency. Applicants whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
5. Applications to both the School of Nursing and to the UW Graduate School
6. Three letters of recommendation: one academic, one clinical, and one additional recommendation of either type.
7. Admission essays relevant to the MN program objectives
8. One official transcript from each collegiate institution attended.
9. If admitted, the applicant is required to obtain criminal history/background check clearances via a service designated by the School of Nursing.

Degree Requirements

38-41 credits, as follows:

1. Nursing science and professional foundations (15 credits)
2. Clinical practice (6 credits)
3. Scholarly inquiry (11 credits with scholarly project or 14 credits with thesis)
4. Related coursework (6 credits)

Master of Nursing/Master of Public Health Concurrent Degree Program (MN/MPH)

Admission Requirements

See admission requirements for MN and MPH individual degrees. Students must apply separately to, and be accepted by, each School. Students already enrolled in one School may apply for admission to the other and to the concurrent degree track. Students are encouraged to complete up to one year of study in one School before entering the other.

Degree Requirements

See MN and MPH individual degree requirements; common requirements are as follows:

1. Minimum 18 quarter credits for the master's degree in each program courses numbered 500 and above.
2. Numerical grades in at least 18 quarter credits of coursework for each degree and all required courses taken graded.
3. Up to 12 credits taken in one School can be counted toward the other School's total credit requirements, if approved by both programs.
4. Electives for each School's program can be fulfilled by taking required courses of the other School's program.

One thesis is required. The 9 required thesis credits can be taken in either School, which then becomes the "home" School.

Master of Science

Admission Requirements

A baccalaureate degree in any discipline from a regionally accredited institution of higher learning with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits by date of enrollment.

Applicants need not have a previous degree in nursing.

1. A 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade. Visit the School of Nursing website for a list of approved statistics courses.
2. Proof of English Language Proficiency. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
3. Three letters of recommendation, two from persons qualified to comment on the applicant's academic abilities and one from a person who can provide work-related (practice) information.
4. Applications to both the School of Nursing and to the UW Graduate School.
5. Resume describing relevant work, professional, and volunteer experiences.
6. Admission essays relevant to the MS degree program objectives.
7. An applicant, if admitted, is required to obtain criminal history/background check clearances via a service designated by the School of Nursing.
8. Students planning to take clinical nursing courses need an active, unrestricted Washington RN license. Other applicants to the Master of Science program are not required to have an active RN license or a previous degree in nursing.

Degree Requirements

46-49 credits, as follows:

1. Nursing science (15 credits)
2. Professional foundations (3 credits)
3. Theory development (5 credits)
4. Modes of inquiry (11 credits)
5. Scholarly project (6 credits) or thesis (9 credits)
6. Related coursework (6 credits)

Doctor of Nursing Practice

Admission Requirements

- Baccalaureate degree from a nationally accredited nursing program with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits. Applicants with a master's degree from a nationally accredited nursing program must have a minimum 3.00 GPA on a 4.00 scale for the last 90 graded credits of the master's degree.
- OR -
Associate of Arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing. RNs with non-nursing baccalaureate degrees must demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
- If an applicant has not completed a master's degree, a 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade, taken within five years of matriculation.
- Proof of English Language Proficiency. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
- Applications to both the School of Nursing and to the UW Graduate School.
- Three letters of recommendation, one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.
- Response to three admission questions
- Resume describing relevant work, professional, and volunteer experiences.
- BSN equivalency, if applicable
- One official transcript from each collegiate institution attended.
- All applicants to the Doctor of Nursing Practice program must have an active, unrestricted United States RN license at the time of application. Applicants who do not have a Washington State RN license must obtain one prior to beginning the program.
- If admitted, the applicant is required to obtain criminal history/background check clearances via a service designated by the School of Nursing.

Degree Requirements

93 credits minimum, including:

1. Advanced practice (minimum 45 credits)

2. Leadership (minimum 15 credits)
3. Practice inquiry (minimum 30 credits)

Doctor of Philosophy

Admission Requirements

- Baccalaureate degree from a college or university of recognized rank. Neither a nursing background nor RN licensure is required for admission.
- Applications to both the School of Nursing and to the UW Graduate School.
- Proof of English Language Proficiency. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
- A scholarly writing sample (25 pages or less) which should analyze a current clinical problem or professional issue using appropriate references to making an argument and supporting that position
- Letters of recommendation from three persons knowledgeable about the individual's potential for a research career in nursing.
- Statement of goals and research interests in response to specific questions listed on the application
- If admitted, the applicant is required to obtain criminal history/background check clearances via a service designated by the School of Nursing.

Degree Requirements

93 credits minimum, as follows:

1. *Theory and Domain of Knowledge (minimum 41 credits):* Grounding in science and nursing science fundamental to examination of more specific issues in the relationship of human health and nursing.
2. *Scholarly Inquiry (minimum 52 credits):* Means of developing knowledge. Exposure to variety of approaches with encouragement to develop advanced skills in at least one methodology. Includes 27 dissertation credits.

Financial Aid

A limited number of nurse traineeships are available for pre-master's study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to pre-doctoral students.

Additional Information

For additional information on current graduate program content, admission criteria, deadlines, as well as application forms, visit the School of Nursing website at <http://nursing.uw.edu>. To contact the Office of Academic Services, School of Nursing, call (206) 543-8736 or 1- (800) 759-NURS or email sonas@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T310, and an information session podcast is available.

School of Pharmacy

School Overview

Dean

Sean D. Sullivan

Associate Deans

Nanci L. Murphy
Stanley S. Weber

Established in 1894, the UW School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty, students, and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments - Medicinal Chemistry, Pharmaceutics, and Pharmacy - are located in the H-Wing of the Health Sciences Building and the South Campus Center. The School is a member of the American Association of Colleges of Pharmacy and its programs are accredited by the Accreditation Council on Pharmacy Education.

Doctor of Pharmacy Program

The School of Pharmacy offers a four-year program leading to the Doctor of Pharmacy (PharmD) degree. The curriculum of the PharmD program is designed to provide students the scientific background and clinical skills necessary to take the North American Pharmacist Licensure Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE) to enter professional practice.

Limited class enrollment allows for individualized attention from instructors while students still enjoy the benefits of attending a large university. Instructional methods emphasize the critical thinking, problem-solving, and clinical skills necessary to provide rational drug therapy, reduce medication-related problems, promote healthy lifestyles and disease prevention, optimize health outcomes, enhance patient adherence, and render care in a changing health-care system. The School fosters a commitment to life-long learning and provides an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

Admission

Admission is for autumn quarter only. Applicants who are current UW students or who are considered admissible to UW are not assured admission. Admission is competitive, based on a number of factors including cumulative and prerequisite GPAs, PCAT scores, written communication skills as demonstrated in application essays, interview results, and review of all application materials. Competitiveness varies from year to year, depending on size and strength of the applicant pool.

Because of limits on enrollment, the School cannot admit all qualified applicants. On average, over 600 students apply each year for 100 generally available positions. Admission is contingent upon satisfactory completion of all prerequisites, eligibility to obtain a Washington State Pharmacy Intern Certificate, and satisfactory results on the Criminal Background Check and Conviction/Criminal History Information Form. Accepted students are required to meet the University and health sciences immunization requirements.

After a preliminary assessment of the applicant pool, based on completeness of the application, review of all application materials, prerequisite and cumulative GPA thresholds and PCAT score thresholds, the most qualified applicants are invited for an interview in Seattle with members of the PharmD Admissions

Committee. Residents from states participating in the Western Interstate Commission for Higher Education (WICHE) Pharmacy Student Exchange Program (Alaska and Nevada) are encouraged to apply. Applicants who meet or exceed GPA and PCAT minimum thresholds are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool during each annual admission cycle.

Further information on admission requirements, application procedures, and program content is available from the School of Pharmacy Office of Academic and Student Programs or at sop.washington.edu/school-of-pharmacy/pharmd-admissions/applications-to-pharmd-program.html.

Graduate Programs

Graduate Program Coordinator
H375 Health Sciences, Box 357630
(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.

Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.

The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.

Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of acceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-of-science program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.

Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:

sop.washington.edu/porpp/graduate-program/phd-program27.html.

sop.washington.edu/porpp/graduate-program/concurrent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.

www.biomedreg.uw.edu.

Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Additional information is available on the department's website: sop.washington.edu/pharmacy/about/fellowship-a-residency-opportunities.html.

Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

Medicinal Chemistry

Department Overview

The department offers the doctor of philosophy degree, which includes didactic and research-based learning.

Students acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include elucidation of biochemical transformations and interactions using techniques such as protein engineering, and a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.

One major area of research is the role of biotransformation processes in toxification and detoxification of drugs and environmental contaminants. A second area is the determination of protein and small ligand structure and function using NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, proteomics, and mechanisms of viral assembly.

Graduate Program

Graduate Program Coordinator
H164 Health Sciences, Box 357610
(206) 543-2224
medchem@uw.edu

Doctor of Philosophy

Admission Requirements

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted.

Degree Requirements

Minimum 90 credits

Proficiency in organic, medicinal and physical chemistry; pharmacology, biochemistry, and molecular biology. Most coursework is completed in the first two years. Two quarters of teaching experience required. The program is flexible and easily adaptable to meet individual interests and needs.

In the first year, students rotate through the laboratories of at least two faculty members. At the end of the first year, the student chooses a faculty sponsor and a dissertation research project.

1. *First year:* CHEM 530, CHEM 531, CHEM 532; MEDCH 501, MEDCH 502, MEDCH 503; MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
2. *Second year:* BIOC 530; MEDCH 527 MEDCH 541; PHCOL 510, PHCOL 511; MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
3. *Third year:* MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600 (7 credits each quarter)

4. *Fourth year:* MEDCH 800

Financial Aid

Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the Graduate Program Coordinator for additional information.

Pharmaceutics

Department Overview

The Department of Pharmaceutics offers a program of study leading to the Doctor of Philosophy degree.

Program Description

The doctoral degree program in pharmaceutics trains research scholars in the fundamental aspects of drug delivery, drug disposition, and drug action in animals and man. Drug disposition includes the facets of drug absorption, distribution, and elimination. Pharmacokinetics is the study of the time course of these processes and the time course of pharmacological effects. Drug delivery includes targeting of drugs and modulation of xenobiotic and drug transporters to tissues or specific cell types to improve their therapeutic effect. For further information, visit: sop.washington.edu/pharmaceutics/about/what-is-pharmaceutics.html.

Typically graduates interact with clinicians, medicinal chemists, biochemists, pharmacologists, analytical chemists, and physiologists. This is possible because their training is highly interdisciplinary at the didactic and research levels.

A wide range of career paths is available to graduates. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

Graduate Program

Graduate Program Coordinator
H272 Health Sciences, Box 357610
(206) 543-9434
pceut@uw.edu

Doctor of Philosophy

Admission Requirements

1. One copy of official transcripts in a sealed envelope from each college attended
2. Official GRE score report
3. All foreign students must take the TOEFL and TSE test and send in the official score report
4. Statement of personal goals describing applicant's background, academic interests, and career objectives
5. A resume; or curriculum vitae listing educational and employment history
6. Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate school.

Degree Requirements

Minimum 90 credits of coursework, to include:

1. *Credits and Scholarship*: Minimum 41 credits of coursework, exclusive of thesis and non thesis research. 3.00 GPA in all numerically graded courses numbered 400 and 500. Minimum passing grade in any given course is 2.7, except required pharmaceuticals courses (PCEUT 501, PCEUT 502, PCEUT 503, PCEUT 506) in which a passing grade is 3.0. Credits earned for a master's degree may apply towards the doctoral degree.
2. *Teaching Experience*: Minimum two quarters of teaching assistant experience. Students are not asked to assist more than one class an academic quarter (less than 12 contact hours/week). Most students complete this requirement during the first three years in the program.
3. *Examinations and Progress Evaluation*: A series of preliminary, cumulative (written) examinations; a general examination (oral) for advancement to PhD candidacy; a final examination (defense of the thesis). See Appendix A, "Progression Steps in Relation to the Doctoral Degree," for an overview. Appendix B describes the cumulative examination, which precedes the general exam. Appendix C provides details about formation of a doctoral Supervisory Committee and its role in the general exam and thesis defense. Appendix D provides details about the structure and conduct of the general exam.
4. *Master's Degree Bypass*: Students who qualify for continuation to the PhD degree may be allowed to bypass the M.S. degree. See Appendix A for petition procedure.
5. *Seminars*: All students must present a minimum of two and a maximum of four seminars while in the doctoral program (PCEUT 520). In addition, a presentation of papers from current literature is required twice a year, starting at the beginning of the second year until defense of the thesis (PCEUT 583). See Appendix E, "Training in Oral Communication through Seminars and Journal Club" for additional details.
6. *Didactic*: Coursework for the doctoral program is divided into four components: (a) prerequisites which define the level of entry into the program; (b) a required core program which is analogous to the major; (c) elective courses, which are not required but are encouraged; (d) seminars and literature review.
 - a. Prerequisites:
 - MATH 124
 - MEDCH 400

Applicants with a PharmD degree should have fulfilled the medicinal chemistry requirement. MEDCH 400 can be taken in autumn quarter of the first year. Candidates are accepted on condition that any deficiencies in course requirements are rectified by the end of the first academic year.

- b. Core Program:
 - PCEUT 506
 - PCEUT 501
 - PCEUT 502
 - PCEUT 503
 - PCEUT 510, PHCOL 511, PHCOL 512, PHCOL 513
 - BIOST 511
 - BIOST 512
 - HCDE 509
 - PCEUT 600, PCEUT 800

Students entering with previous graduate-level coursework in the required areas may have some of the above courses waived. In addition, all students must attend the following training sessions, preferably during the first academic year: chemical safety, biological safety, and bioethics training. Radiation safety and animal care may also be required, if relevant to the student's thesis research.

c. Directed Electives:

Electives are not required. However, students are encouraged to take elective courses that might benefit their thesis project and career goals. Courses that might be of interest can be found in the disciplines of biotransformation/biochemistry, biologics/drug delivery, pharmacology/cell biology, and physiological modeling/biostatistics.

d. Seminars and Literature Review:

- PCEUT 520 (1 credit/quarter; 3 quarters/year until graduation)

Beginning the second year, students make one presentation each year, with a maximum of four presentations. A general topic seminar is presented in the second year; research presentations in subsequent years.

- PCEUT 583 (1 credit/quarter; 3 quarters/year until graduation)

Beginning the second year, students make two presentations each year until graduation. Journal club presentation is waived in the quarter during which the student is scheduled to make a PCEUT 520 seminar presentation.

7. *Research:*

- PCEUT 600, PCEUT 800

Students complete three research laboratory rotations (PCEUT 600), one per quarter, starting autumn quarter of their first year. A student may opt to complete a rotation in summer quarter, before the initiation of classes. This involves an early appointment in the department and, thus, decisions must be made at the time they accept the offer to enroll. Matching of available labs with each incoming student is facilitated by the first year graduate adviser. Student preferences are given due consideration.

Students must choose a thesis adviser by the end of spring quarter in their first academic year (See Appendix A for additional details).

Students must begin research in the lab of their adviser by summer quarter at the end of their first academic year (PCEUT 600). Most students may find that after-class and off-hours are the best and most productive time for laboratory research (See Appendix A1b for additional details).

After successful completion of the master's bypass requirements (see Appendix A for details), students sign up for PCEUT 800, until the defense of their thesis.

8. *Cumulative Examination*

Students begin taking cumulative exams in autumn quarter of their second academic year, and continue taking them at every offering until completion of pass requirements or until they take the maximum of eight exams. A total of eight exams are offered, two each in autumn, winter, spring, and summer quarters. For each exam, there two questions. Students must pass four of eight

exams to complete the cumulative requirement. Students who do not achieve this goal are given the option of completing requirements for a terminal master's degree or withdrawal from the program.

Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships, and other fellowships such as the William E. Bradley Graduate Fellowship or those from the American Foundation for Pharmaceutical Education or from several pharmaceutical companies.

Pharmacy

Graduate Program

Graduate Program Coordinator
H375 Health Sciences, Box 357630
(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.

Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.

The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.

Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of acceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-of-science program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.

Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:

sop.washington.edu/porpp/graduate-program/phd-program27.html.

sop.washington.edu/porpp/graduate-program/concurrent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.

www.biomedreg.uw.edu.

Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Additional information is available on the department's website: sop.washington.edu/pharmacy/about/fellowship-a-residency-opportunities.html.

Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

Professional Program

Doctor of Pharmacy

A four-year professional program leading to the Doctor of Pharmacy (PharmD) degree, the curriculum is designed to provide students the scientific background and clinical skills necessary to render pharmaceutical care in various healthcare settings. Individuals who wish to practice pharmacy in the United States must earn a Doctor of Pharmacy (PharmD) degree from an accredited college or school of pharmacy, complete required internship hours, pass licensing examinations, and meet other state-specific licensing requirements.

Admission Requirements

Consideration for admission to the professional program requires a minimum three years of pre-pharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive, based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate's aptitude for the program. Following a preliminary assessment of the applicant pool, the most qualified applicants are selected for an interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content are available from the School's Office of Academic and Student Programs or its website.

1. Applicants to the UW School of Pharmacy PharmD program must **both** complete an on-line PharmCAS Application and submit a supplemental application to the UW School of Pharmacy, Office of Academic and Student Programs. Potential applicants should consult the School of Pharmacy website, sop.washington.edu/school-of-pharmacy/pharmd-admissions/applications-to-pharmd-program.html for additional admission requirements and the most current information regarding the PharmD program.
2. Please refer to the School's website for current entry-level Doctor of Pharmacy program information at sop.washington.edu/students/.
3. Pharmacy College Admission Test (PCAT) must be taken within two years of application. The UW School of Pharmacy accepts no other admission test (e.g., MCAT, GRE) in place of the PCAT.
4. Applicants who have completed all prerequisite (pre-pharmacy) coursework prior to application and those who have earned a prior bachelor's degree or higher are given preference in the process of screening for offer of interview. The admissions committee has established minimum cumulative and prerequisite (pre-pharmacy) GPA thresholds and PCAT scores for screening for offer of interview. Applicants who meet or exceed these minimums are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool.

5. Interview is required as part of the UW School's PharmD admission process. After a preliminary assessment of the applicant pool, the most-qualified applicants are invited for an interview in Seattle with members of the PharmD admissions committee. Admission preference is given to residents of Washington State and residents from states participating in the Western Interstate Commission for Higher Education (WICHE).
6. It is important for applicants to research carefully the pharmacy profession and the attributes, skills, and abilities essential for pharmacists in the provision of care. Although relevant experience is not required, applicants are strongly encouraged to gain pharmacy experience, either as a volunteer or employee.
7. Non-U.S. Citizens: Applicants who hold "Permanent Resident" or "Refugee/Asylee" visa status and international students with F-1 Visa status are eligible to apply. F-1 Visa students must take the TOEFL within two years of application. Please refer to the School's website for more information at sop.washington.edu/school-of-pharmacy/pharmd-admissions/international-applicants-eligibility-to-apply.html.
8. International Transcripts: All transcripts for coursework completed at foreign colleges or universities must be translated and evaluated course-by-course by one of the following certified agencies: the Education Credential Evaluators, World Education Services, Inc, or Educational-Perspectives.

Degree Requirements

Current degree requirements for entering classes are reflected in the graduating class of 2015 and later. (Graduating classes of 2014 and earlier have different course sequences as a result of this revision.) Below are the current degree requirements:

1. *Year 1 (47 core, 5 elective credits)*: CONJ 401, CONJ 402, CONJ 403; MEDCH 561, MEDCH 570; PCEUT 531, PCEUT 532, PCEUT 533; PHARM 500; PHARM 558; PHARM 584, PHARM 585, PHARM 586; PHARMP 511, PHARMP 512; 5 elective credits; MEDCH 400 is required for students who do not pass the MEDCH qualifying exam, which if taken, can be credited as a professional elective.
2. *Year 2 (46 core, 5 elective credits)*: MEDCH 562, MEDCH 563, MEDCH 564; PHCOL 401, PHCOL 402; PHARM 509; PHARM 537; PHARM 539; PHARM 543, PHARM 543; PHARM 559; PHARM 563; PHARM 592, PHARM 593, PHARM 594; PHARMP 513, PHARMP 514; PHARMP 531; 5 elective credits
3. *Year 3 (33 core, 18 elective credits)*: PCEUT 510 (3); PHARM 541; PHARM 560; PHARM 561, PHARM 562); PHARM 564, PHARM 565); PHARMP 532, PHARMP 533, PHARM 541; 18 elective credits
4. *Year 4*: Nine required clinical rotations (6 credits each) for a total of 54 credits

PharmD/PhD Concurrent Program

PharmD/PhD Program Coordinator
H272 Health Sciences, Box 357610
(206) 543-0819

The accelerated dual-degree program is intended for outstanding students committed to earning the PharmD degree and a PhD degree in either Pharmaceutics or Medicinal Chemistry. Students are equipped to enter academic careers that require competence in clinical practice, teaching, and research. They will possess the breadth and depth of knowledge necessary to work with colleagues across multiple disciplines essential to performing integrated and translational medical and pharmaceutical research.

Many of our trainees have worked in research and developed an interest in public health and pharmaceutical sciences through that experience.

Students admitted to the concurrent degree program are able to complete the requirements for both degrees in about eight academic years, rather than the nine years normally required to receive both degrees.

Admission to the PharmD/PhD program is based on the recommendation of the admission committees of the professional degree program, the graduate program, and the PharmD/PhD program. For additional admission criteria, see respective programs.

Admission Requirements

Applicants must complete admission requirements of both the PharmD and PhD programs. Consideration for the PharmD/PhD program is contingent upon completion of a PharmD application, Graduate School application, and PharmD/PhD application (available online at: sop.washington.edu/school-of-pharmacy/degree-programs/concurrent-degree-opportunities.html).

1. PharmD program application is composed of (a) verified completion of all application materials by the deadline as stated on the school website, (b) PCAT scores, (c) prerequisite and cumulative GPA, (d) ability to complete prerequisite courses by the end of spring term prior to School of Pharmacy matriculation. For details, see PharmD admission requirements.
2. Graduate School application for medicinal chemistry or pharmaceuticals includes (a) undergraduate degree in chemistry, biochemistry, pharmacy, biology, or a closely related field, (b) statement of purpose, (c) GRE scores, (d) prior research experience, (e) three letters of recommendation. Graduate School application deadline as stated on the school website.
3. In addition, applicants are required to submit information requested in the PharmD/PhD concurrent program application checklist, available on the above stated website.

Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the Graduate Program Coordinator for more information on financial support.

Daniel J. Evans School of Public Policy and Governance

School Overview

Dean

Sandra O. Archibald
208E Parrington Hall

Associate Deans

Leigh Anderson

Joaquin Herranz

Robert Plotnick

The Daniel J. Evans School of Public Policy and Governance is a graduate professional school providing education and research for current and future leaders in pursuing challenging public-service careers in government, nonprofit, or private-sector organizations. To address the educational needs and professional interests of individuals at different stages of their careers, the school offers the Master of Public Administration (MPA), the Executive Master of Public Administration (Executive MPA), Peace Corps Master's International (PCMI), and the PhD in Public Policy and Management.

Master's-level programs enable students to acquire the policy analysis techniques, management knowledge, problem-solving skills, and political acumen required for effective leadership across sector boundaries and in regional, national, and international policy. MPA graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and managers of nonprofit organizations; and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

The PhD program focuses on research that prepares students with a strong interdisciplinary perspective and a solid foundation of theory and methodology in policy analysis and management. The PhD program prepares students for successful careers as faculty in university programs in public policy and management, and in research positions in the public and nonprofit sectors.

Undergraduate Program

Adviser
Parrington Hall
Box 353055

Master of Public Administration

Evans School MPA Program

Evans School MPA is designed for present and future leaders of the public, private, and nonprofit sectors, emphasizing broad-based public policy analysis and management knowledge. Degree requirements for the program are flexible and can be tailored for students who are early in their careers, as well as those who have additional years of progressively responsible work experience. While most students enroll full-time and generally take two years to complete their degree, flexible evening and part-time options are also available.

Degree Requirements

72 credits, with a minimum 60 credits from within the Evans School, as follows:

1. *Core Curriculum (36 credits):*
 - a. Managing Politics and the Policy Process (PB AF 511)
 - b. Managing Organizational Performance (PB AF 512)
 - c. Public Policy Analysis (PB AF 513)
 - d. Microeconomics (PB AF 516, PB AF 517)
 - e. Public Budgeting and Financial Management (PB AF 522)
 - f. Program Evaluation (PB AF 526)
 - g. Quantitative Analysis (PB AF 527, PB AF 528)
2. Concentrated study in a field of specialization, three courses minimum (12 credits)
3. Public affairs electives, two-course minimum (8 credits)
4. An internship (minimum 400 non-credit work hours)
5. 8-credit degree project (PB AF 608) or Public Service Clinics (PB AF 606, PB AF 607)

For full program details, visit evans.washington.edu/courses-degrees/mpa/

Executive MPA Program

The Executive MPA program is a cohort-based, modular program designed to meet the needs of senior-level managers and executives with 10 or more years of progressively responsible, professional experience (typically directors, senior managers in or near leadership positions, and high-level technical staff). Students must successfully complete 45 credits of coursework within a specially designed curriculum combining one intensive week, several weekend modules and numerous online assignments. Intensive learning emphasizes a variety of critical concepts in executive leadership, including: performance management and accountability; change management; communication skills; ethics and leadership; executive decision making; human resource management; strategic financial management; and strategic leadership. Emphasis is on decision making, practical application, and integration of learning with experience. The program relies on a cohort model, so entering students must begin their studies with a seven-day residential retreat. Students complete the program in approximately 18 months.

Degree Requirements

45 credits, as follows:

1. One "Foundation Week" in Strategic Leadership and Performance Challenges: PA EX 501
2. Twelve three-day weekend core modules in Executive Decision Making (PA EX 502), Strategic Financial Management (PA EX 503, PA EX 505), Executive Economics (PA EX 504), Mission Integrity (PA EX 506), Values and Personal Integrity (PA EX 507), Leading for Human Development (PA EX 508), Leading Across Boundaries (PA EX 509), Negotiation and Mediation (PA EX 510), and Strategic Communication (PA EX 511), Strategic Policy Making (PA EX 512), and Leading for a Legacy (PA EX 513)
3. Online assignments
4. Degree project not required

For full program details, visit evans.washington.edu/executive-education/mpa.

Peace Corps Master's International

Peace Corps Master's International (PCMI) students must successfully complete 51 credits of coursework along with two years of Peace Corps service in international nongovernmental organization development and a degree project. PCMI students generally complete all core courses in three quarters prior to leaving for Peace Corps service; upon returning to UW, students complete their coursework and a final degree project in one or two quarters. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI students generally create a plan of study focused on international nongovernmental management or other international management and policy issues, such as environmental or health policy. Students complete the program in approximately three to three-and-a-half years.

Degree Requirements

51 credits, as follows:

1. *Core curriculum:*
 - a. Managing Politics and the Policy Process (PB AF 511)

- b. Managing Organizational Performance (PB AF 512)
 - c. Public Policy Analysis (PB AF 513)
 - d. Microeconomics (PB AF 516, PB AF 517)
 - e. Public Budgeting and Financial Management (PB AF 522)
 - f. Program Evaluation (PB AF 526 or PB AF 536)
 - g. Quantitative Analysis (PB AF 527, PB AF 528)
2. Electives (including 9 credits of restricted electives: 3 credits each in economics, analysis, and values) (17 credits)
 3. Two years of Peace Corps service
 4. 6-credit degree project related to Peace Corps fieldwork

For full program details, visit evans.washington.edu/courses-degrees/mpa/peace-corps.

Doctor of Philosophy

The PhD in public policy and management is a research program that prepares its graduates for careers as faculty in university programs in public policy and management, and for research positions in the public and non-profit sectors. The interdisciplinary curriculum draws broadly on theoretical and methodological foundations in policy analysis and management. Substantive policy areas reflect such diverse faculty research agendas as education and social policy, environmental policy, international development, nonprofit management, and urban policy.

This highly competitive and selective program admits three to five excellent applicants each year, and provides funding and mentoring to help them succeed. The program aims to be one of the top programs in the field of public policy and management, serving not only the Pacific Northwest, but the national and the global market for scholars in this field.

Degree Requirements

90 credits, as follows:

Two years, or six full-time academic quarters, of coursework and examinations, research, and the writing of a dissertation beyond the two years.

The first-year core curriculum prepares doctoral students to undertake independent scholarship in public policy and management: Research Design (PPM 502), Institutional Perspectives on Management and Leadership (PPM 504), Microeconomics (PPM 506), Public Policy Processes (PPM 508), Policy Analysis and Evaluation (PPM 510), Quantitative Methods Sequence (SOC 505 and SOC 506 or ECON 580 and ECON 581), and a qualifying examination.

Second year doctoral students increase their analytic and methodological skills. Requirements include Data Analysis Practicum (PPM 512) at least one qualitative methods and one additional quantitative methods course, proposed by the student and approved by the PhD Program Coordinator. Students are encouraged to consider obtaining a statistics certificate from CSSS. At least three courses in a substantive policy field or in management studies are required.

Beyond the second year, requirements include: a general examination/dissertation proposal (advancing to candidacy), preparation of a dissertation of original research, and a final examination (dissertation defense).

Students are expected to complete the degree in four to five years, depending on the individual student. Prior coursework in calculus is expected before matriculation.

For full program details, visit: evans.washington.edu/courses-degrees/phd

Concurrent Degree Programs

The Evans School offers the MPA degree concurrently with the following five programs: Master of Urban Planning (MUP), Master of Arts in International Studies (MAIS), Master of Public Health (MPH), Master of Science in Forest Resources (MS), Juris Doctor (JD). Concurrent degree applicants must apply through, and be accepted into, both programs. Admission criteria are those of each individual program.

Admission Requirements

Admission to the Evans School is highly competitive and selective, and is based primarily on the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. The School's Admissions Committee reviews previous undergraduate or graduate (if applicable) coursework, grades and GRE test scores, and gives considerable weight to professional experience, previous academic awards or scholarships, volunteer work, letters of recommendation, and the applicant's writing skills as demonstrated in a personal essay. The School admits students annually for autumn quarter.

General Requirements

Applicants must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution, and have achieved a minimum 3.0 GPA in the last 90-quarter (or 60 semester) credits of undergraduate work.

Graduate Record Examination (GRE) general test scores are required for admission to all programs except the Executive Master of Public Administration. TOEFL scores are required for international students only.

Visit evans.washington.edu/courses-degrees/mpa/concurrent for specific requirements of each program.

Application Deadlines

Because of class-size limitations in the competitive programs, applicants are encouraged to submit applications as early as possible.

Application materials to the MPA program and to the Peace Corps Master's International program must be received online and postmarked by January 15 for priority consideration. Applications received after this date are accepted for review on a space available basis until March 1.

Application materials for the Executive MPA degree program must be received online and postmarked by May 1. Applications received after this date are accepted for review on a space-available basis until July 1.

Application materials for the PhD program in public policy and management must be submitted and postmarked by February 1. Applications postmarked after February 1st are not reviewed.

Applicants to all programs must also apply to the UW Graduate School by the specific program deadlines above.

Financial Aid

For further information, visit: evans.washington.edu/prospective-students/financial-aid.

Evans School Fellowships

The Evans School offers several fellowships to entering students each year from the School's endowed fellowship funds. These typically consist of \$4000-\$5000 stipends awarded primarily on the basis of academic achievement and/or excellence in public service. Applicants interested in school fellowships must submit the Evans School Financial Aid Form with their Evans School application.

- *Daniel J. Evans Endowment for Excellence in Public Service:* Fellowships support students aspiring to excellence in public service.
- *Nancy Bell Evans Endowment for Excellence in Nonprofit Service:* Fellowships support students who aspire to excellence in nonprofit service and philanthropy.
- *Jon Brock Endowed Fellowship:* Supports outstanding master's students studying conflict resolution and management in public and nonprofit sectors.
- *Elaine Chang Endowed Fellowship:* Provides support to outstanding students pursuing studies in international peace and development.
- *Brewster C. Denny Endowed Fellowship:* Supports students committed to excellence in public service.
- *Robert J. and Micki E. Flowers Endowed Fellowship:* Provides support to outstanding students from diverse backgrounds pursuing careers in public and nonprofit service.
- *Margaret T. Gordon Endowed Fellowship:* Supports outstanding Evans School students.
- *Henry M. Jackson Endowed Fellowship:* Supports students pursuing careers in environmental policy and natural resources management.
- *Morton Kroll Endowed Fellowship:* Provides support to top students pursuing arts management internships.
- *Robert J. Lavoie Fellowship:* Provides funds to outstanding students preparing to work in public service.
- *Governor Gary Locke Endowed Fellowship:* Supports Asian/Pacific Islander students pursuing studies in public service and politics.
- *Hubert G. Locke Endowed Fellowship:* Provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.
- *George A. Shipman Endowed Fellowship:* Supports outstanding students pursuing careers in public service.
- *Evans School Alumni Endowed Fellowship:* Supports recruiting of outstanding students.
- *Home Street Bank Fellowship:* Supports an outstanding graduate student pursuing a career in public affairs.
- *Scottish Rite Scholarship Foundation of Washington PCMI Fellowship:* Provides a stipend to an entering student accepted to the Peace Corps Master's International degree program.

- *William Shelton Fellowships*: Funded by the Scottish Rite Scholarship Foundation of Washington to promote better government through education.

Assistantships

The Evans School offers many research, teaching, and staff assistantship positions each year. Typically 10 to 20 hours per week, these positions include a monthly stipend, benefits, paid tuition, and health insurance. Hiring is competitive. Most announcements are posted in the spring, or as positions become available, on the Evans School Intranet.

Research assistantships are open to first- and second-year MPA students and to PhD students. First-year MPA students are eligible to apply upon acceptance. Students typically work on grant-funded studies, special conferences, and public policy colloquia series sponsored by the school's research centers. Research assistants are exposed to a wide range of policy issues, including regional growth management, international trade, state and federal entitlement programs, health-and-human-services delivery, and education reform. In addition, some research fellowships are offered each year to highly qualified applicants during the admission process. These fellowships guarantee a paid research assistantship for the first year of study and tuition support.

Teaching and staff assistantships are reserved for second year students and PhD students. Teaching assistants are hired for most core courses. Staff assistantships include such positions as coordinators for international programs, peer advisers, public service clinic/career services coordinators, and computer lab managers.

Work-Study Status

When hiring for hourly positions, the school often gives preference to students possessing work-study status. Work-study positions have included research assistance for faculty and grants, and staff support for the school's centers. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office.

Facilities

Research Facilities

The school promotes the application of research to real-world policy contexts and its integration with the teaching enterprise. In addition to supporting the independent research of faculty members, the school houses several research and policy centers focusing on regional development, family and child welfare, poverty alleviation, nonprofit management and leadership, international development, consensus building and conflict resolution, and education reform.

These centers shape students' educational experiences by offering research assistantships, special events, career networking, degree-project advising, teaching, and guest lecturing in classes taught by center faculty. The availability of research assistantships is based on current projects.

Human Services Policy Center (HSPC)

The center pairs applied analytic research, preventive approaches, and promotion of comprehensive policies to improve the lives of children, families, and communities, especially those who are disadvantaged. Public communications and strategic partnerships ensure that the HSPC's research affects policy. Core programs include educating and caring for young children; communicating about policies for children and families; and profiling child well being (Washington Kids Count).

Marc Lindenberg Center for Humanitarian Action, International Development, and Global Citizenship

The Lindenberg Center prepares students and faculty for life and work in a global society through partnerships that expand teaching, research, and service opportunities in humanitarian action, international development, and global citizenship. The center's programs enable students to understand connections between poverty, hunger, health, and human security, and equip them with the skills and knowledge to create a better, more humane world. In partnership with international organizations, the center conducts research and multi-disciplinary academic training programs that prepare students for work in emergency and humanitarian relief and international development. The center also promotes responsible global citizenship through exchanges with developing countries, internationalization of curriculum, and collaboration with K-12 schools to change the way students see the world and think about global issues.

Nancy Bell Evans Center on Nonprofit Leadership and Philanthropy

The center enhances the understanding and vitality of the nonprofit sector through research, education, and community engagement. The center conducts research of importance to scholars, policy-makers, and practitioners. It also strives to connect scholars doing research with practitioners in the field. A special research focus is the changing service and policy roles of nonprofit organizations, particularly in the context of devolution, privatization, and globalization. The center serves as the hub of nonprofit studies across the UW campus and, in conjunction with the Cascade Center for Public Service, provides growth and learning opportunities for senior-level nonprofit professionals in the Pacific Northwest.

The William D. Ruckelshaus Center

The William D. Ruckelshaus Center, formerly known as the Policy Consensus Center, is a joint venture between the UW and WSU. The center draws together representatives from a wide network of agencies, advocacy groups, businesses, agribusiness, tribal governments, university researchers, and others to find long-term solutions to policy conflicts in Washington State, enhancing the region's capacity for effective, sustainable policy making and problem solving. Policy areas range from natural resources and economic development to labor issues in the business community and elsewhere. The center's activities focus on four major areas: providing an objective forum for conflict resolution or policy enhancement; building capacities through assessment, training, and consulting to broaden stakeholders' perspectives and improve collaboration; researching and disseminating best practices in conflict resolution and policy problem solving; and closing the gap between science and policy.

West Coast Poverty Center

This center serves as a regional hub for research, education, and policy analysis on the causes and consequences of poverty in the west coast states. At the UW, the center is a collaborative venture of the Evans School, the School of Social Work, and the College of Arts and Sciences, and is the newest of three regional poverty centers funded by the U.S. Department of Health and Human Services. The center fosters opportunities for cross-disciplinary exchanges and collaboration among poverty researchers and practitioners. It supports research on a broad range of poverty-related topics, such as labor market changes and consequences for economic security and social well-being; new patterns of work and family life, including transformations in family formation, employment, and care-giving arrangements for parents and children; and demographic trends and implications for poverty and public policy. Key activities include awarding grants to established and emerging poverty scholars and doctoral students; hosting seminars and research conferences on poverty and public policy; conducting outreach, dissemination, and dialogue with policymakers and practitioners; and mentoring the next generation of poverty scholars and practitioners.

Executive Training, Civic Engagement, and Outreach

Cascade Center for Public Service and Leadership

The Cascade Center, a public and nonprofit leadership training unit, provides executive and mid-level public and nonprofit sector leaders professional development opportunities to strengthen their management skills. A diverse complement of two-day, three-day, and five-day management courses, as well as a two-week executive program, helps meet a wide range of management training needs in the Northwest and the United States.

Cascade Center courses are offered at the UW campus in Seattle. With prior permission, traditional and mid-career MPA students may apply for a maximum of 12 elective credits to be waived from their degree requirements upon completion of Cascade courses, with approval from their adviser. Executive MPA students may apply for up to nine elective credits to be waived from their degree program, with approval from their adviser. Cascade courses are not graded and participants do not earn academic credits. Rather, the Evans School may accept completed Cascade coursework in lieu of required elective credit hours.

Civic Engagement

An important convener of public policy deliberations in the Puget Sound region, the Evans School provides a neutral forum in which leading scholars and practitioners can talk about practical solutions to emerging policy issues. Groups wanting a university partner in public events often turn to the Evans School. Through strategic alliances, the school attracts many people to engage in dialogue with faculty, students, and the greater policy community. Public lectures, conference, symposia, and panel discussions help students enrich their policy studies beyond the classroom. These include the Daniel J. Evans Lessons in Leadership Seminars, the Dael L. Wolfle Memorial Lecture in Science and Public Policy, the Betty Jane Narver Lecture on Women in Public Policy, the Civic Engagement for the Twenty-First Century Seminar Series, the Forum at the Evans School, and the quarterly Dean's Forum.

In addition, through service on commissions, organizational boards, and other means, Evans School professors and students actively assist governments, NGOs, nonprofits, community organizations, and companies to improve society in the United States and abroad. Whether through public service clinics or internships, trainings, or volunteer service projects, students can actively engage their knowledge in serving the public good.

Electronic Hallway

The Electronic Hallway, hallway.evans.washington.edu, is an internationally recognized, online resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management.

School of Public Health

School Overview

Interim Dean
Joel Kaufman

F350 Health Sciences

The UW School of Public Health prepares innovative and diverse public health leaders and scientists; provides research to advance public health science and policies; and offers service to promote health and well-being.

The School has five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- plus interdisciplinary programs that include health services administration, maternal and child health, nutritional sciences, pathobiology, and public health genetics.

The School offers the following degrees: Master of Public Health (MPH); Master of Science (MS); Master of Health Administration (MHA); Doctor of Philosophy (PhD); and bachelor's degrees in public health, environmental health (also a minor), and health informatics and health information management (HIHM).

Concurrent degree programs with Anthropology, Dentistry, Foster School of Business, International Studies, Law, Medicine, Molecular and Cellular Biology, Nursing, Public Administration, and Social Work are also available.

Graduate certificate programs are offered in basic or advanced clinical research methods (Epidemiology), emergency preparedness and response (Health Services), global health (Global Health), health management (Health Services), health policy (Health Services), HIV and STIs (Global Health), maternal and child health (Health Services), public health practice (Health Services Executive MPH program), public health genetics (Public Health Genetics), and statistical genetics (Biostatistics).

For more information, see the school's academic catalog at sph.washington.edu/publications/catalog.asp or visit the homepage at sph.washington.edu.

Undergraduate Program

Public Health-Global Health Adviser
F-332 Health Sciences, Box 357230
(206) 221-4561
phmajor@uw.edu

The School of Public Health offers a Bachelor of Science in public health-global health; or a Bachelor of Arts with a major in public health-global health (or options in education and promotion; or in global health).

The Department of Environmental and Occupational Health Sciences offers a minor and a Bachelor of Science with a major in environmental health. The Department of Health Services offers a Bachelor of Science in Health Informatics and Health Information Management degree, as well as a baccalaureate

certificate, through the UW Evening Degree Program. A minor in global health is offered by the Department of Global Health. A minor in nutrition is offered by the Nutritional Sciences Program.

General Education

The following School of Public Health general education requirements apply to all degree programs mentioned above.

Basic Skills

1. English Composition (C) – 5 credits
2. Additional Writing (W) – 10 credits
3. Quantitative and Symbolic Reasoning (QSR) – One course (minimum 4 credits)

Areas of Knowledge

1. Visual, Literary, & Performing Arts (VLPA) – 10 credits*
2. Individuals & Societies (I&S) – 10 credits
3. Natural World (NW) – 20 credits
4. Additional Areas of Knowledge – 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the VLPA requirement. Completion through the third quarter is required for VLPA credit.

Bachelor of Arts and Bachelor of Science Degree in Public Health-Global Health

Suggested First- and Second-Year Courses: anthropology, political science, psychology, sociology; distribution of general education and Areas of Knowledge courses as well as coursework that develops critical and analytical thinking, communication skills, and an understanding of public health.

Admission Requirements

1. Admission is capacity-constrained. Completing the prerequisites and submitting an application guarantees consideration but not admission.
2. Admission is twice a year, for autumn and winter quarters. Applications, due the first Friday of spring for autumn admission and the third Friday of autumn for winter admission, are available from the public health major website at sph.washington.edu/uph. Transfer students must also apply for admission to the UW. For the admission process, see admit.washington.edu.
3. Evaluation of applications is based on overall academic record, grades in major relevant coursework, selection of and preparation for appropriate BA or BS path, ability to make satisfactory progress toward the degree, and understanding of and potential fit with the major as demonstrated in the personal statement.
4. Applicants are strongly encouraged to attend an information session before submitting an application.
5. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult the UW Equivalency Guide or a UW adviser to verify transferability of coursework.

Early Admission

Students apply to the early admission option during spring of their first year for entry in autumn of their second year or during autumn of their second year for entry in winter of their second year.

Applicants must complete the following by the application deadline:

1. Minimum 30 college credits
2. Minimum 3.00 cumulative GPA
3. Minimum 2.0 in English composition (5 credits)
4. Minimum 3.0 grade in one introductory public health course from the following: ENV H 111, ENV H 205, EPI 201, EPI 220, G H 101, HSERV 100, NUTR 200, PHG 200 (HSERV 100 required for BA Education and Promotion Option; NUTR 200 required for BS Nutritional Sciences Option)
5. Minimum 3.0 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or MICROM 301/MICROM 302

Upper Division Admission

Upper division admission is typical for most students either at the UW or transferring from other institutions.

Applicants must complete the following by the application deadline:

1. Minimum 60 college credits
2. Minimum 2.50 cumulative GPA
3. Minimum 2.0 in English composition (5 credits)
4. Minimum 2.5 grade in one introductory public health course from the following: ENV H 111, ENV H 205, EPI 201, EPI 220, G H 101, HSERV 100, NUTR 200, PHG 200, or one 5-credit course from Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), or Sociology (SOC)
5. For BA path students, minimum 2.5 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or MICROM 301/MICROM 302
6. For BS path students, minimum 2.5 grades in at least two courses of a year-long sequence in introductory science, with laboratories, or mathematics, chosen from biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); organic chemistry (CHEM 237, CHEM 238, CHEM 239; CHEM 241, CHEM 242); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)

Bachelor of Arts

Major Requirements

109-110 credits

1. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BHOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320

3. *Diversity Seminar (1 credit)*: SPH 489
4. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
5. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Arts (BA) Selectives (20 credits)*: Courses identified to address competency areas in advocacy, community dynamics, communication, economics, education, ethics, health promotion, law, policy, social justice, and writing. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits)*: minimum 2.0 grade in each of SPH 491 and SPH 492 (minimum 2.0 grade)
9. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the School of Public Health.

Bachelor of Arts (Education and Promotion Option)

Major Requirements

109-110 credits

1. HSERV 100 – Required for admission. (Counts toward the 20-credit selectives requirement shown in 7, below.)
2. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
3. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BHOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
4. *Diversity Seminar (1 credit)*: SPH 489
5. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
6. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
7. *Bachelor of Arts (BA) Selectives (20 credits)*: Courses identified to address competency areas in advocacy, community dynamics, communication, economics, education, ethics, health promotion, law, policy, social justice, and writing, including HSERV 100, HSERV 204. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health, including HSERV 343, HSERV 344, HSERV 345, and SPH 495 PH internship. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
9. *Public Health Capstone (5 credits)*: minimum 2.0 grade in each of SPH 491 and SPH 492

10. Minimum 2.00 cumulative GPA for courses applied to the major.

In addition to the major requirements shown above, students must complete the general education requirements for the School of Public Health.

Bachelor of Arts (Global Health Option)

Major Requirements

109-110 credits

1. GH 101 (admission requirement)
2. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
3. *Public Health and Global Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
4. *Diversity Seminar (1 credit)*: SPH 489
5. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG) Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or higher
6. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302, and 5 credits from CHEM 120, CHEM 142, CHEM 145
7. *Bachelor of Arts (BA) Selectives (20 credits)*: Courses identified to address competency areas in key domains. See website or adviser for approved list. Courses not on the list must be approved by the adviser.
8. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in global health. Minimum 15 credits G H-prefix courses; all students required to take G H 305 (3 credits) and G H 401, G H 402 (3 credits each). See website or adviser for approved list. Any course not on the list must be approved by the adviser.
9. *Public Health Capstone (5 credits)*: minimum 2.0 grade in SPH 491 and SPH 492
10. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the School of Public Health.

Bachelor of Science

Major Requirements

119-130 credits

1. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
3. *Diversity Seminar (1 credit)*: SPH 489

4. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
5. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Science (BS) Selectives (40 credits)*: Students taking BIOL 180 and CHEM 142 may count these two courses toward both the Natural Science and the BS Selectives: Two year-long sequences of introductory science, with laboratories: biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); remaining credits chosen from biochemistry (BIOC 405, BIOC 406), organic chemistry (CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 223, CHEM 224); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)
7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits)*: Minimum 2.0 grade in SPH 491 and SPH 492
9. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the school of Public Health.

Bachelor of Science (Nutritional Sciences Option)

Major Requirements

119-130 credits

1. NUTR 200: Required for admission, but not counted toward the minimum 119-130 major credits required
2. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
3. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
4. *Diversity Seminar (1 credit)*: SPH 489
5. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
6. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
7. *Bachelor of Science (BS) Selectives (40 credits)*: Students taking BIOL 180 and CHEM 142 may count these two courses toward both the Natural Science and the BS Selectives: Two year-long sequences of introductory science with laboratories: biology (BIOL 180, BIOL 200, BIOL 220 and chemistry (CHEM 142, CHEM 152, CHEM 162). Remaining credits chosen from biochemistry (BIOC 405, BIOC 406); organic chemistry (CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 223, CHEM 224
8. *Public Health Electives (20 credits)*: At least 9 credits from NUTR 310, NUTR 405, NUTR 406, NUTR 411, NUTR 420 or NUTR 446; balance of 15 credits from NUTR 302, NUTR 303, NUTR

400 (max. 2), NUTR 412 or NUTR 465; and remaining 5 credits, if necessary, of 300- and 400-level courses from approved list

9. *Public Health Capstone (5 credits)*: Minimum 2.0 grade in SPH 491 and SPH 492
10. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the School of Public Health.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Public Health is a school-wide liberal arts major, leading to a Bachelor of Arts or Bachelor of Science, which uses public health questions, concepts, and tools to teach critical thinking skills. Students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. By integrating the diverse areas of public health, students are introduced to the determinants of health, emerging diseases, access to health care and modes of health-care delivery, the geography of health, and the effects of environment on health and disease. The major provides undergraduates with [competencies](#) in health, ethics and social justice, social science, natural science, policy and politics, and environment with particular emphasis on collaboration, communication, and critical thinking across these domains. An undergraduate degree in public health provides a grounding in science, values, passion, and commitment which is valuable for a range of career and educational options across multiple disciplines.
- *Instructional and Research Facilities*: The School of Public Health has five departments -- Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- as well as interdisciplinary programs such as the Public Health major, Maternal and Child Health, Nutritional Sciences, Pathobiology, and Public Health Genetics. The School has over 30 research centers, including Institute for Public Health Genetics, Northwest Center for Public Health Practice, Center for Public Health Nutrition, Institute for Health Metrics and Evaluation, and the Health Promotion Research Center. Administration and teaching are primarily in the Magnuson Health Sciences Center.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: Majors are encouraged to engage in experiential learning. See adviser for details.
- *Department Scholarships*: See adviser for details.
- *Student Organizations/Associations*: Undergraduate Student Public Health Association (USPHA). Public Health Dawgs (PhDs).

Graduate Program

The School of Public Health (SPH) offers graduate programs leading to the degrees of Master of Public Health (MPH), Master of Health Administration (MHA), Master of Science (MS), and Doctor of Philosophy (PhD). Admission requirements are described in the sections for each department.

Master of Public Health Degree: The MPH provides broad training in public health and is offered in all SPH departments. Students choose from areas including biostatistics; community-oriented public health practice; environmental and occupational health; epidemiology; Executive MPH program; health metrics and evaluation; health services; health systems and policy; global health (in Epidemiology or Global Health); leadership, policy, and management; maternal and child health (in Epidemiology or Health Services); nutritional sciences (with optional dietetics training); occupational and environmental medicine; public health genetics; or Peace Corps Master's International. The Executive MPH, a three-year, part-time program, allows mid-career public health professionals to pursue the degree in community practice, environmental health, global health, health education, or maternal and child health while continuing their employment.

Master of Health Administration Degree: The MHA is offered either as a full-time, in-residence program or a part-time executive program that prepares students for careers in management, planning, and policy analysis. The curriculum integrates the knowledge, skills, and experience that encompass health services management, planning, and policy analysis. Students develop skills that enable them to better understand and manage change; analyze information and make decisions; and manage organizations and the people in them. The Executive MHA program, is a part-time program for mid-career health services professionals (including physicians and other experienced clinicians), who wish to continue their employment while pursuing the degree.

Master of Science and Doctor of Philosophy Degrees: The MS and PhD programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services prepare students for academic or research careers. The MS and PhD in the Nutritional Sciences and the Pathobiology programs, and the PhD program in the Institute for Public Health Genetics are administered in the School of Public Health.

The MS programs in biostatistics, environmental health (general, occupational and environmental exposure sciences, and toxicology tracks), epidemiology (general, global, or clinical research tracks), health services (healthcare and population health), nutrition (with optional dietetics training), pathobiology, and genetic epidemiology offer focused research training in specific disciplines. Graduates often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. In the PhD program more courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The PhD programs in biostatistics (general or statistical genetics tracks), environmental and occupational health sciences (environmental and occupational hygiene and toxicology tracks), epidemiology, health services, nutritional sciences (with optional dietetics training), pathobiology, and public health genetics, train future academicians as highly qualified independent investigators and teachers, and as well-trained practitioners.

Concurrent Degree Programs: Enrollment in a concurrent degree program permits a student to proceed towards sequential completion of both degrees in a shortened period of time. Some options available are not formal concurrent programs, but the degrees listed can be pursued in parallel with the Global Health MPH. Most concurrent degrees begin with successful application to the other school, followed by an application to the MPH during the first year.

The SPH has concurrent degree programs with the Foster School of Business (MHA/MBA) and the Daniel J. Evans School of Public Affairs (MHA/MPA, MPH/MPA, MS/MPA). The School also offers concurrent degree programs with the Henry M. Jackson School of International Studies (MPH/MAIS), the Law School (MHA/JD, MPH/JD), Molecular and Cellular Biology (PhD/MS), and Anthropology (MPH/PhD). Concurrent degrees with other health sciences schools include Dentistry (MPH/MSD), Medicine (MHA/MD, MPH/MD, PhD/MD), Nursing (MPH/MN), and Social Work (MPH/MSW).

Residency Programs: SPH offers a residency in occupational and environmental medicine (MPH). Physicians may apply to any of the school's other graduate programs.

Certificate and Graduate Certificate Programs: Programs include basic or advanced clinical research methods (Epidemiology); emergency preparedness and response (Health Services); global health (Global Health); global health of women, adolescents, and children (Global Health); global injury and violence prevention (Global Health); health economics and outcomes research (with the School of Pharmacy); health management (Health Services); health policy (Health Services); HIV and STIs (Global Health); maternal and child health (Health Services); public health practice (Health Services Executive MPH program); public health genetics (Public Health Genetics) and statistical genetics (Biostatistics).

Biostatistics

Department Overview

The department is a center for development and application of statistical methodology across the health sciences, and has collaborative partnerships with Fred Hutchinson Cancer Research Center, Seattle Children's hospital Research Institute, Group Health Cooperative, and the Veterans' Administration. To complement research, the department recently established the Center for Biomedical Statistics to provide consulting and collaborative services.

Graduate Program

Graduate Program Coordinator
H655 Health Sciences, Box 357232
(206) 543-1044
bioadmit@uw.edu

The department offers master of science, master of public health, and doctor of philosophy degrees in quantitative methods applied to the medical and biological sciences. As technological advances generate huge quantities of information, biostatistical tools and concepts are critical for the analysis of these data. Techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven into the life sciences, thereby providing new opportunities in research and teaching.

The biostatistics graduate program equips students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and other health-science disciplines.

The department produces graduates at all levels. Students are recruited from programs in mathematics, statistics, and biology and are selected on the basis of quantitative ability.

Master of Public Health

Combines broad training in public health with specific training in biostatistics. Includes core courses in biostatistics, environmental health, epidemiology, health services, and social and behavioral sciences. Successful candidates complete a public health practicum and write a research-based master's thesis. For individuals who anticipate careers as data analysts in public health research or practice and for individuals who plan doctoral work in public health or biomedical field, but who want more methodological training than those PhD programs offer.

Admission Requirements

Doctoral-level degree in another field (e.g., MD, PhD, JD) or currently working on such a doctoral degree. Candidates are not awarded the biostatistics-pathway MPH until they are awarded their doctoral degree. All other prerequisites and required materials are the same for MS, MPH, and PhD applicants.

Degree Requirements

63 credits

1. *Biostatistics Core Courses*: BIOST 514, BIOST 515; BIOST 524; BIOST 536, BIOST 537; BIOST 580; BIOST 590. BIOST 514, BIOST 515, BIOST 524, BIOST 536, and BIOST 537 – all taken for a numerical grade, with a minimum 3.0 grade in each course.
2. *Non-biostatistics Core Courses*: EPI 512, EPI 513; HSERV 510, HSERV 511; ENV H 511; G H 515. All non-biostatistics core courses taken for a numerical grade, with a minimum 2.7 grade in each non-biostatistics core course and a minimum 3.00 cumulative GPA.
3. *Biostatistics Elective Courses*: 6 credits of any approved biostatistics MS elective, or STAT 512 or STAT 513
4. *Biostatistics MPH Practicum*: BIOST 595 (3). Three credits in an organization or agency that provides planning or services relevant to public health.
5. *Master's Thesis*: 9 credits of BIOST 700.

See [department website](#) for further information on degree requirements.

Master of Science

Offers advanced training in biostatistics. Includes coursework in biostatistics, statistics, and one or more biomedical fields. Successful candidates pass a master's theory examination and write a research-based master's thesis. For individuals who anticipate a career as a data analyst in public health or biomedical research or practice and for individuals who plan doctoral work in a public health or biomedical field, but want more methodological training than those PhD programs offer.

Admission Requirements

1. 30 or more quarter credits in mathematics and statistics, to include two years of calculus (including multivariate calculus), one course in linear algebra, and one course in probability theory.
2. Students may apply from an undergraduate major in mathematics, statistics, or a biological field, or are occasionally admitted with backgrounds in other fields.

Potential MS students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (including multivariate calculus), one course in linear algebra, and one course in probability theory.

Degree Requirements

63 credits

1. *Required Courses*: BIOST 514, BIOST 515, BIOST 536, BIOST 537, BIOST 580, BIOST 590, STAT 512, STAT 513. Minimum 3.0 grade in each required course (except BIOST 580 and BIOST 590). Required courses may be waived based on prior coursework; the minimum 3.0 grade requirement may be waived when subsequent performance on a relevant qualifying examination is excellent.
2. *Elective Credits*: 12 elective credits, including minimum 6 credits with a methodology emphasis, and 6 credits with a biology or public health emphasis (See department for elective-credit lists.)
3. *Examinations*: Students who enroll in STAT 512 and STAT 513 must take the MS theory examination the following summer, and if failed, must pass it the following year.

4. *Master's Thesis*: BIOST 700 (18 credits). Waived for students who have passed all PhD qualifying examinations at a level appropriate for PhD students. If BIOST 700, BIOST 536, and BIOST 537 are waived, the student must take and pass all required coursework for the PhD degree, including BIOST 533, BIOST 570, STAT 581, STAT 582, STAT 583 and, depending on the pathway, BIOST 571 and BIOST 572, or BIOST 550, BIOST 551, and BIOST 552.

See [department website](#) for further information on degree requirements.

Doctor of Philosophy

Includes coursework in biostatistics, statistics, and one or more public health or biomedical fields. Successful candidates must pass PhD applied and theory examinations, complete a biology project, and write a dissertation that reports the results of new biostatistical research undertaken by the candidate.

Admission Requirements

1. 30 or more quarter credits in mathematics and statistics, to include two years of calculus (including multivariate calculus), one course in linear algebra, and one course in probability theory.
2. Students apply from programs in mathematics, statistics, or a biological field, or are occasionally admitted with backgrounds in other fields.

Degree Requirements

Minimum 103 credits

Standard Pathway

1. *Required Courses*: BIOST 514; BIOST 515; BIOST 533; BIOST 570; BIOST 571; BIOST 572; BIOST 580, BIOST 590, BIOST 800; MATH 576, or equivalent; STAT 512, STAT 513; STAT 581, STAT 582, STAT 583
2. Minimum 3.0 grade in each required course (except BIOST 580, BIOST 590, or BIOST 800). A placement examination may be taken to waive STAT 512 and STAT 513. Required courses may be waived based on prior coursework; minimum 3.0 grade may be waived when subsequent performance on a relevant qualifying examination is excellent.
3. *Electives (15 credits)*: Minimum 6 credits with a methodology emphasis and 9 credits with a biology or public health emphasis. Minimum 2.7 grade for elective courses. See department for elective-credit lists.
4. *Examinations*: A PhD student who enrolls in STAT 512 and STAT 513 takes the MS theory examination the following summer; the PhD statistical theory examination within two years following first-time completion of STAT 581, STAT 582, STAT 583; the PhD applied examination within two years of first-time completion of BIOST 570; and general and final examinations.
5. *Teaching Assistant*: Serve as a TA for at least one quarter.

Statistical Genetics Pathway

1. *Prerequisites*: GENOME 371 (or equivalent); GENOME 372, GENOME 453, or GENOME 465 (or equivalent)

2. *Required Courses:* BIOST 514, BIOST 515, BIOST 533, BIOST 550, BIOST 551, BIOST 552, BIOST 570, BIOST 581, BIOST 590, BIOST 800; STAT 512, STAT 513, STAT 581, STAT 582, STAT 583; MATH 576 (or equivalent); GENOME 540 or GENOME 541; GENOME 562
3. Minimum 3.0 grade in each required course (except BIOST 581, BIOST 590, or BIOST 800). A placement examination may be taken to waive STAT 512 and STAT 513. Required courses may be waived based on prior coursework; minimum 3.0 grade in selected courses may be waived when subsequent performance on a relevant qualifying examination is excellent.
4. *Elective Credits:* at least 4 credits of elective courses with a methodology emphasis. Minimum 2.7 grade. See department for elective course list
5. *Examinations:* A PhD student who enrolls in STAT 512 and STAT 513 takes the MS theory examination the following summer; the PhD statistical theory examination within two years following first-time completion of STAT 581, STAT 582, STAT 583; the PhD applied examination within two years of first-time completion of BIOST 570; and general and final examinations.
6. *Teaching Assistant:* Serve as a TA for at least one quarter.

See the [department website](#) for further information on degree requirements.

Environmental and Occupational Health Sciences

Department Overview

F461 Health Sciences

Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

Undergraduate Program

Adviser
F461D Health Sciences, Box 357234
(206) 543-4207
ehug@uw.edu

The department offers the following programs of study:

- The Bachelor of Science degree with a major in environmental health
- A minor in environmental health

Bachelor of Science

Suggested First- and Second-Year College Courses: chemistry, organic chemistry, biology, calculus, statistics, English composition

Department Admission Requirements

1. Minimum requirements major. First- and second-year students complete early admission prerequisites (shown below). Third-year students complete upper-division admission prerequisites (shown below). Prospective students apply the quarter they plan to complete prerequisites for entry the following quarter.
2. Students are admitted all quarters. Applications, due the second Friday of each quarter, may be downloaded from the Environmental Health website at: deohs.washington.edu/undergraduate. Applicants who meet stated requirements are admitted in time to register the following quarter as majors.
3. Students should meet with an adviser before applying.
4. Transfer students may use transferable equivalent course(s) for prerequisite coursework.

Early Admission Prerequisites

1. Minimum cumulative 3.00 GPA, with a minimum 2.0 grade in each individual course below
2. 5 credits English composition
3. CHEM 142, CHEM 152
4. MATH 124 or Q SCI 291

Upper-Division Admission Prerequisites

1. Minimum cumulative 2.50 GPA, with a minimum 2.0 grade in each individual course below
2. 5 credits English composition
3. MATH 124 or Q SCI 291
4. BIOL 180, BIOL 200, BIOL 220
5. One of the following general and organic chemistry sequences
 - a. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 241
 - b. CHEM 142, CHEM 152, CHEM 223, CHEM 224, CHEM 241
 - c. CHEM 142, CHEM 152, CHEM 220

Degree Requirements

180 credits

General Education Requirements

See School of Public Health requirements

Major Requirements

119-132 credits

1. *Environmental Health Supporting Science (49-61 credits):*
 - a. Either MATH 124 or Q SCI 291 (5 credits)
 - b. Either BIOST 310 (recommended), STAT 220, STAT 311, or Q SCI 381 (4-5 credits)
 - c. BIOL 180, BIOL 200, BIOL 220 (15 credits)
 - d. One of the following general and organic chemistry sequences
 - i. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 241 (26 credits)
 - ii. CHEM 142, CHEM 152, CHEM 223, CHEM 224, CHEM 241 (21 credits)
 - iii. CHEM 142, CHEM 152, CHEM 220 (15 credits)
 - e. PHYS 114/PHYS 117, PHYS 115/PHYS 118 (10 credits)
2. *Environmental Health Core (minimum 37 credits):* ENV H 311, ENV H 320, ENV H 405, ENV H 432, ENV H 433, ENV H 472, ENV H 473, ENV H 480, ENV H 482 (2 credits minimum), EPI 320, MICROM 301, MICROM 302

3. *Environmental Health Selectives (12-13 credits)*: Minimum four courses chosen from ENV H 310, ENV H 406, ENV H 417, ENV H 418, ENV H 439, ENV 440, ENV H 441, ENV H 442, ENV H 443, ENV H 444, ENV H 445, ENV H 446, ENV H 447, ENV H 448, ENV H 451, ENV H 452, ENV H 453, ENV H 460, and ENV H 462
4. 21 additional credits of approved electives. See adviser for approved list.
5. Minimum 2.0 grade in each course required for the major

Minor

Minor Requirements:

1. *Core (3 credits)*: either ENV H 111 or ENV H 311.
2. *Approved Selectives (9 credits)*: three courses chosen from ENV H 431, ENV H 440, ENV H 445, ENV H 448, ENV H 451, ENV H 453, ENV H 472
3. Minimum 15 credits of approved ENV H electives
4. Minimum 14 credits in upper-division courses

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: In the Bachelor of Science program in environmental health, students learn to utilize tools of scientific inquiry to identify, prevent, and control environmental factors that can damage human health. As part of their training, students are introduced to basic principles of risk assessment, microbiology, epidemiology, sampling, and toxicology, and can choose to focus in one of three interest areas: biomedical sciences, health and environmental science, and environmental public health practice.
- *Instructional and Research Facilities*: The department houses thirteen centers and institutes and twenty labs.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- *Department Scholarships*: None offered.
- *Student Organizations/Associations*: UW Student Environmental Health Association

Graduate Program

Graduate Program Coordinator
F461 Health Sciences, Box 357234
(206) 543-3199

The department offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. Areas of emphasis are environmental and occupational hygiene (PhD), occupational and environmental exposure sciences (MS), environmental toxicology (PhD/MS), environmental health (MS), and occupational and environmental medicine or environmental and occupational health (MPH).

The PhD in environmental and occupational hygiene option focuses on assessment of exposures, health effects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents.

Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.

The MPH in environmental and occupational health provides recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department's research facilities or in a field setting.

The MPH in occupational and environmental medicine, for individuals with an earned doctorate, provides training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.

The concurrent MPH/MPA or MS/MPA degree programs with the Daniel J. Evans School of Public Affairs educate students who bring substantive public health knowledge and a strong policy and management orientation to their professional careers. Several courses satisfy degree requirements in both programs, students are able to earn the two degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

Master of Public Health, Environmental and Occupational Health

Focuses on recognition, assessment, and control of environmental and occupational hazards; impact of these hazards on public health and society; and approaches to regulations, enforcement, and policy development. Nurses with a BN can opt for a special emphasis MPH track to train in delivery of health and safety services to worker populations and communities.

Admission Requirements

1. Bachelor's degree in science or engineering, with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if prerequisite courses have been completed.
2. Strong grades and GRE scores
3. Statement of personal goals
4. Letters of reference
5. International applicants submit TOEFL scores - minimum 580 (237 computer)

Degree Requirements

63 credits

1. *Core Requirements:* EPI 511 (or EPI 512, EPI 513), BIOST 511 (or BIOST 517). MPH/MPA students are also required to take BIOST 512 (or BIOST 518), HSERV 510, and HSERV 511.
2. *Required Courses:* ENV H 505 (or ENV H 514, ENV H 515, and ENV H 516), ENV H 453 (or ENV H 553 or ENV H 551), ENV H 570, ENV H 577 (or ENV H 572 or ENV H 543), ENV H 446 (or ENV H 490, or ENV H 541, or ENV H 545, or ENV H 552, or ENV H 548). Courses in

environmental health not chosen can be taken as electives to satisfy course requirements. Students have a choice of either completing a thesis (ENV H 700) or a project (ENV H 598B).

3. *Electives (varies by track)*
 - a. *Thesis Track:* At least two additional 400- or 500-level departmental courses (minimum 6 credits) required to fulfill elective requirements.
 - b. *Project Track:* Students who take 6-8 credits of ENV H 598A must take 3 additional 400- or 500-level classes. Students who take 9 or more ENV H 598A credits must take two additional 400- or 500-level elective credits.
4. *Practicum:* ENV H 599 (at least 120 hours)

Master of Public Health, Occupational and Environmental Medicine

Admission Requirements

1. Doctoral degree (MD, DO, or equivalent) with prior coursework in physics, chemistry, calculus, and biology.
2. Concurrent UW residency applicants must offer graduation from a Class A medical school (U.S., Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty also encouraged.

Gives physicians a better understanding of the clinical and scientific principles in environmental and occupational health. Training focuses on epidemiology, occupational and environmental hygiene, biostatistics, health services, and environmental toxicology. A concurrent residency/fellowship program is available.

Degree Requirements

64 credits

Master of Science, Environmental Health

Students identify sources of contamination in air, water, food, and soil, and on surfaces; how contamination is spread; strategies to prevent or control effects on human health or environmental quality; and the means of communicating risk information to the public and health professionals.

Admission Requirements

1. Bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if prerequisite courses have been completed.
2. Strong grades and GRE scores
3. Statement of personal goals
4. Letters of reference
5. International applicants submit TOEFL scores - minimum 580 (237 computer)

Degree Requirements

64 credits

1. *Core Courses:* ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517 or higher), EPI 511
2. *Required Courses:* ENV H 505, ENV H 453, ENV H 541, ENV H 543 (or ENV H 577), ENV H 552, ENV H 594, ENV H 445 (or ENV H 446), ENV H 548, ENV H 545
3. *Representative Electives:* 9 graded elective credits, approved by the student's academic adviser.

Master of Science, Occupational and Environmental Exposure Sciences

Students learn to quantify and manage human exposures to chemicals, air pollutants, aerosols, and physical agents found in a wide variety of community and occupational settings. Program emphasizes rigorous academic training, internships, career guidance, and practical skills needed for graduates to establish long-term careers as environmental health and safety professionals. A flexible curriculum offers options for either a thesis or professional portfolio alternative.

Admission Requirements

1. Bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if prerequisite courses have been completed.
2. Strong grades and GRE scores
3. Statement of personal goals
4. Letters of reference
5. International applicants submit TOEFL scores - minimum 580 (237 computer)

Degree Requirements

63 credits

1. *Core Courses:* ENV H 580, ENV H 581, ENV H 583, ENV H 700 (or appropriate section of ENV H 598, and ENV H 559, and appropriate section of ENV H 599) BIOST 512 (or BIOST 518, or higher), EPI 511. Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511. Students completing a project are required to take only BIOST 511 and are not required to take ENV H 583, but are required to complete an internship (ENV H 599).
2. *Required Courses:* ENV H 551, ENV H 553, ENV H 557
3. *Learning Emphasis Required Courses:*
 - *Occupational Hygiene:* ENV H 505, ENV H 555, ENV H 557, ENV H 560, ENV H 570
 - *Ergonomics and Human Factors:* ENV H 537, ENV H 549, ENV H 560, ENV H 566, ENV H 596
 - *Health and Safety Management and Policy:* ENV H 560, ENV H 577, ENV H 584, ENV H 599
 - *Exposure Biomarkers:* ENV H 505, ENV H 506, ENV H 554, ENV H 570, P BIO 506
4. *Electives:* Electives to complete 63-credit degree requirement

Master of Science, Environmental Toxicology

Focuses on understanding the mechanisms of action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems

(neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) and also developmental toxicology, environmental carcinogenesis, and dietary chemoprotection. Also offers a strong focus on human risk assessment as well as in toxicological issues that cross ecological and human health disciplines.

Admission Requirements

1. Bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if prerequisite courses have been completed.
2. Strong grades and GRE scores
3. Statement of personal goals
4. Letters of reference
5. International students submit TOEFL scores – minimum 580 (237 computer)

Degree Requirements

63 credits

1. *Core Courses:* ENV H 580, ENV H 581, EHV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511.
2. *Required Courses:* ENV H 514, ENV H 515, ENV H 516, ENV H 552, ENV H 577; BIOC 405, BIOC 406 (or BIOC 440, BIOC 441, BIOC 442); ENV H course in industrial hygiene or occupational medicine.
3. *Representative Electives:* Toxicology students who take the two-quarter biochemistry series (BIOC 405, BIOC 406) must have an additional 9 graded elective credits. Students who choose the three-quarter biochemistry series (BIOC 440, BIOC 441, BIOC 442) must have an additional 3 graded elective credits. Electives must be approved by the student's academic adviser. Electives may include ENV H 511, ENV H 512, ENV H 531, ENV H 532, ENV H 533, ENV H 550, ENV H 553, ENV H 555, ENV H 567, ENV H 570, ENV H 584, ENV H 591, BIOL 411, BIOST 521, C MED 407, C MED 590, MICROM 441, MICROM 442, MICROM 518, PATH 444, PATH 544, PATH 555, P BIO 500-level courses, P BIO 505, P BIO 506, P BIO 507, PHCOL 401, PHCOL 402.

Doctor of Philosophy, Environmental and Occupational Hygiene

Students learn to identify, evaluate, and manage health risks found in a wide variety of community and occupational settings, obtaining advanced research training in exposure assessment and control methods.

Admission Requirements

1. Bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics.
2. Master's degree in related field recommended
3. Honors-level GPA
4. Statement of personal goals
5. Letters of reference
6. High GRE scores

7. International applicants submit TOEFL scores – minimum 580 (237 computer)

Degree Requirements

Minimum 92 credits

1. *Core Sciences (11-12 credits)*: Sequence of three courses in one area, as approved by adviser. Typical core choices are biochemistry, chemistry, engineering, applied mathematics, epidemiology, microbiology, or physiology.
2. *Biostatistics (3 credits)*: BOST 512 (or BOST 518 or higher)
3. *Epidemiology (4 credits)*: EPI 511 (or higher)
4. *Environmental and Occupational Health Seminar (6 credits)*: ENV H 580
5. *Dissertation (27 credits)*: ENV H 800
6. *Laboratory Rotations (6-9 credits)*: ENV H 595
7. *Required courses*:
 - a. *Industrial Hygiene (6 credits)*: ENV H 553 and ENV H 555
 - b. *Toxicology (3 credits)*: ENV H 405 (or more advanced)
 - c. *Environmental Chemistry (3 credits)*: ENV H 552
 - d. *Occupational and Environmental Epidemiology (3 credits)*: ENV H 570
 - e. *Electives (20 credits)*: 10 elective credits are unspecified and 10 must be in courses taught by occupational and exposure sciences or environmental health program faculty.

Doctor of Philosophy, Environmental Toxicology

Focuses on understanding the mechanisms of the action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems (neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) as well as developmental toxicology, environmental carcinogenesis, and dietary chemoprotection. The program also offers a strong focus on human risk assessment and toxicological issues that cross ecological and human health disciplines.

Admission Requirements

1. Bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics.
2. Master's degree in related field recommended
3. Honors-level GPA
4. Statement of personal goals
5. Letters of reference
6. High GRE scores
7. International applicants submit TOEFL scores – minimum 580 (237 computer)

Degree Requirements

104 credits

1. *Core Sciences (11-12 credits)*: Sequence of three courses in biochemistry.
2. *Biostatistics (3 credits)*: BIOST 512 (or BIOST518 or higher)
3. *Epidemiology (4 credits)*: EPI 511 (or higher)
4. *Environmental and Occupational Health Seminar (6 credits)*: ENV H 580
5. *Dissertation (27 credits)*: ENV H 800
6. *Laboratory Rotations (6-9 credits)*: ENV H 595
7. *Required courses*:
 - a. *Toxicology (9 credits)*: ENV H 514, ENV H 515, ENV H 516
 - b. *Toxicology Seminar (9 credits)*: Of the 9 credits (minimum) of current topics courses, at least six credits must be in ENV H 591. The other credits can be chosen among other current topics courses offered by the Department of Environmental Health or other departments, with approval of student's advisory committee.
 - c. *Advanced Toxicology*: 6 credits from approved list
 - d. *Physiology*: 3 credits from approved list
8. *Electives (20 credits)*: Of the minimum four required electives, two must be departmental courses and two may be taken outside the department. The two departmental courses must be from two different non-toxicology programs. All elective credits must be approved by the student's advisory committee.

Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition.

Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultation-service program conducted by the department for labor and industry in Washington State.

Epidemiology

Graduate Program

Epidemiology Program Office
F262 Health Sciences, Box 357236
(206) 543-6302 or (206) 543-8226
epiapply@uw.edu
depts.washington.edu/epidem

The Department of Epidemiology offers the following three graduate degrees: Doctor of Philosophy, Master of Science, and Master of Public Health, for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners, respectively. The department also offers a number of degree tracks within the master's degree programs, as well as several graduate certificates.

Admission Requirements for All Degrees

Admission to all graduate programs is highly competitive and is based on the following:

1. Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, mathematics, quantitative social sciences), including prior areas of study and work experience, especially quantitative public health research
2. Undergraduate and graduate grades (if applicable)
3. GRE scores (exceptions are often made for master's degree applicants with a prior PhD, MD, DO, DDS, DVM, or equivalent health-related degree from a U.S. university; MD/MPH applicants at UW; and MD/PhD applicants funded by the Medical Scientist Training Program at UW. No exceptions to GRE requirement are made for PhD program applicants.)
4. TOEFL or IELTS score from international applicants, unless bachelor's degree taught entirely in English
5. Applicant interests that are aligned with those of Department of Epidemiology faculty. (It is not expected that applicants locate a faculty mentor in advance.)
6. Compelling motivation for pursuing training in epidemiology as demonstrated through a well-written goal statement
7. Letters of reference

The Master of Public Health (MPH) degree in epidemiology requires coursework in health services and environmental health, in addition to epidemiology and biostatistics, as well as a thesis and a practicum as preparation for a career in public health practice or as a prelude to the PhD program. Three tracks are available: the general track, which is selected by most students and allows specialization via the choice of electives and thesis topic; the global health track (GH); and the maternal and child health track (MCH). The global health track requires approximately two years of prior health science work experience in a developing country, although some of the two years may be health-related work with immigrant or underserved groups in the United States. (The epidemiology global health track is not the same as the MPH general track through the Global Health Department in that it focuses on epidemiology and biostatistics rather than on health services-oriented training, but it does incorporate some of the same classes.) Applicants without the requisite experience may apply to both the Epidemiology general track and the global health graduate certificate (listed below) which combined offer equivalent training. The

MCH track expects prior U.S. MCH experience for admission. Applicants without this experience may apply to both the general track and the MCH graduate certificate (listed below) which combined offer the similar training.

Formal concurrent degree programs involving the epidemiology MPH include the following: Doctor of Medicine (MD), Doctor of Philosophy (PhD) in Anthropology, Master of Arts in International Studies (MAIS), and Master of Public Affairs (MPA). A master's or doctorate from another department at the UW may be combined with the MPH with the approval of both programs.

The Master of Science (MS) degree in epidemiology requires concentration on courses and research in epidemiology and biostatistics as preparation for a research specialization or as a prelude to the PhD program. It also requires electives from the School of Public Health. Two tracks are available, the general track, which allows specialization via the choice of electives and thesis topic and the clinical research track (CR). The MS CR is intended chiefly for professionals who have already completed clinical training, and who plan to conduct research with patients in healthcare settings as a significant part of their future careers.

A formal concurrent degree program combines the epidemiology general track MS with the PhD in molecular and cellular biology. A master's or doctorate from another department at the UW may be combined with the MS with the approval of both programs.

Applicants interested in an MS in genetic epidemiology, administered by the Institute for Public Health Genetics (a School of Public Health program that is not part of the Department of Epidemiology), should visit <http://depts.washington.edu/phgen/programs/msge.html>.

The Doctor of Philosophy is designed to produce academics who are highly qualified as independent investigators, teachers, and practitioners. The requirements for the PhD degree in epidemiology differ from the MS program requirements primarily in the scope and complexity of research for the dissertation. Coursework includes a core series in epidemiology and biostatistics, as well as epidemiology electives and other electives from the School of Public Health.

Admission Requirements Specific to the PhD

1. Master's degree in epidemiology or other health-related field, including mathematics and quantitative social sciences.
 - a. A prior doctorate without a health-related master's degree is not acceptable.
 - b. An applicant with a doctorate only and no master's degree should apply to the MS or MPH first.
 - c. All courses and credits from the MS or MPH in epidemiology at the UW count directly toward the PhD in epidemiology.
2. GRE from all applicants, including those who hold a U.S. doctorate, except MSTP MD students at UW.

The Epidemiology Department and other School of Public Health departments offer several graduate certificate programs open to any qualified graduate student at the University (sph.washington.edu/prospective/edprograms.asp#cert). Some certificate programs are open to Graduate Non-Matriculated students, if indicated on the certificate websites. Following is a partial listing of certificate programs:

- *Advanced Clinical Research*
Methods: depts.washington.edu/epidem/Certificates/acrc.shtml (May not be combined with an epidemiology PhD degree at UW)

- *Basic Clinical Research Methods*: depts.washington.edu/epidem/Certificates/bcrc.shtml (May not be combined with an epidemiology PhD degree at UW)
- *Global Health Graduate Certificates*: globalhealth.washington.edu/academics/certificates-and-fellowships
 - *General Global Health*
 - *Global Health of Women, Adolescents, and Children*
 - *Global Injury and Violence*
 - *HIV and Sexually Transmitted Infections*
- *Maternal and Child Health*: depts.washington.edu/mchprog/certificate/
- *Public Health Genetics*: depts.washington.edu/phgen/certificateprogram/Certificate.shtml
- *Statistical Genetics*: www.stat.washington.edu/statgen/index.php?page=certificate (Offered by the Biostatistics department)

Master of Public Health

Degree Requirements

Minimum 63 credits, as follows:

1. 45 to 49 class credits
2. *Core Courses*: 33 graded credits, including EPI 512, EPI 513, EPI 514, BIOST 511, BIOST 512, BIOST 513, either ENV H 510 or ENV H 511, HSERV 510, HSERV 511. BIOST 517-BIOST 518 may be substituted for BIOST 511, BIOST 512, BIOST 513
3. EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS and Stata programming experience
4. *Electives*: 6 credits of EPI course electives of 2 or more credits each (See acceptable electives in the on the courses webpage at depts.washington.edu/epidem/courses/)
5. 3 to 6 credits (120 to 240 hours) in a field-based practicum (EPI 595)
6. 9 to 18 thesis (EPI 700) credits
7. Students may enroll in additional elective courses in epidemiology and other courses with substantial public health content with departmental approval, and for independent study (EPI 600) to bring the total to 63 credits. Public health-related 400-level courses taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework without substantial public health content, and at the 300-level or below, does not count toward the degree.

MPH Specialized Program Options: The MPH degree offers specialized tracks as listed below. They have additional course, practicum and thesis requirements detailed on the program websites.

- *Global Health Track*: Requires additional coursework specific to international health. More information about this track is at depts.washington.edu/epidem/program/globalhealth.shtml.
- *Maternal and Child Health Track*: Requires additional coursework related to maternal and child health in the U.S. More information about this track is at depts.washington.edu/mchprog/academic/.

Master of Science

Degree Requirements

60 credits, to include:

- 36 to 40 class credits
- *Core Courses*: 24 graded credits, including EPI 512, EPI 513, EPI 514, BIOST 511, BIOST 512, BIOST 513. BIOST 517-BIOST 518 may be substituted for BIOST 511, BIOST 512, BIOST 513.
- EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS and Stata programming experience.
- *Electives*: 6 credits of EPI course electives of 2 or more credits each. (See acceptable electives on the courses webpage at depts.washington.edu/epidem/courses)
- *School of Public Health Electives*: Two additional 500-level courses (2 or more credits each) in any department of the School of Public Health (including Epidemiology) or other UW courses with significant public-health content. (See acceptable electives in the appropriate degree requirements checklist at depts.washington.edu/epidem/CurrentStudents.)
- 9 to 18 thesis credits (EPI 700)

Students may enroll in additional elective courses in epidemiology and other relevant departments, and for independent study (EPI 600) to bring the total to 60 credits. Public health-related 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health and at the 300-level or below does not count toward the degree.

MS Specialized Program Options:

- *MS Clinical Research Track*: Requires specific coursework in place of most of the electives for the MS General Track. For specific requirements, visit the program website at depts.washington.edu/epidem/program/cr.shtml.

Doctor of Philosophy

The curriculum includes courses on epidemiologic methods, and biostatistics. Electives in substantive disease and exposure areas, as well as research methods, are required. Requisite general electives from the School of Public Health are also part of the curriculum.

Degree Requirements

Minimum 90 total credits:

1. Minimum reduced to 60 credits for students with a prior relevant master's degree (All course requirements must be satisfied even if more than 60 credits are needed to do so.)
2. 54 to 66 class credits
3. *Core Courses*: 32 graded credits including EPI 512, EPI 513, EPI 514, EPI 515, EPI 536 EPI 537, BIOST 517, BIOST 518. BIOST 511, BIOST 512, BIOST 513 may be substituted for BIOST 517-BIOST 518.
4. EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS or Stata programming experience.

5. *Required Non-graded Courses:* EPI 528 (3), two quarters of EPI 584, EPI 588
6. Minimum three required epidemiology electives (minimum 2 credits each). (See acceptable electives in the appropriate degree checklist at depts.washington.edu/epidem/CurrentStudents/.)
7. Three additional electives (minimum 2 credits each) from any department of the School of Public Health, including Epidemiology, or other UW courses with significant public health content
8. Students are encouraged to take EPI 583 (1) each quarter of the first year and EPI 591 (1) each quarter after the first year.
9. *Dissertation:* 27 credits of EPI 800
10. The student's supervisory committee may require additional courses, including English language courses, to ensure that the student has adequate training in the area of epidemiology he or she is pursuing.
11. Additional epidemiology courses and EPI 800 credits, independent study (EPI 600), and courses with substantial public health content offered by other departments or schools (with permission), may be applied to the total PhD credits. Public health-related, 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health, and at the 300-level or below does not count toward the degree.

Financial Aid

Research assistantships (RA) for work on various projects provide salary and tuition waivers for students working 20 hours a week. Although funding is not guaranteed with admission, many new PhD and a few master's students find a research assistantship by the start of their first autumn quarter. Most doctoral students have found an RA by their second or third quarter in the program, and many master's students do so by their second year, when they have more of the skills that faculty supervisors need. Research training stipends with partial tuition support are available on a limited basis, especially for more advanced doctoral students. Teaching assistantships are available competitively for second-year and higher-level students. More information is at <http://depts.washington.edu/epidem/funding/index.shtml>.

Research Facilities

University facilities include an excellent library system and access to computers. Many varied opportunities for field research and practica are provided in Seattle and elsewhere in the state and nation, at institutions such as Seattle Children's hospital, Fred Hutchinson Cancer Research Center, Group Health Research Institute, Harborview Medical Center, the Center for AIDS and STD, Public Health: Seattle-King County, Washington State Department of Health, VA Puget Sound Healthcare Systems, and many other local health institutions. Cooperating organizations focusing on global health also are available in Seattle and internationally. Additional, but not exhaustive, lists of cooperating agencies are at depts.washington.edu/epidem/research/Other_Institutions.shtml. A partial list of agencies and funding related to international health are listed at <http://globalhealth.washington.edu/ghrc/funding-and-fieldwork>.

Health Services

Department Overview

H664 Magnuson Health Sciences Center
Box 357600

The mission of the department is to work with partners in public health and healthcare to prepare leaders, design solutions, and conduct innovative research that translates into practice and policy. The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.

The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.

Bachelor's and master's degrees are available in public health, health services administration, health information management, and health services research. Additionally, doctorate and post-doctoral opportunities are available in health services research.

Undergraduate Program

Adviser
UW Tower, Box 359455
(206) 543-8810
hihim@uw.edu
healthinformationmanagement.uw.edu

Health Informatics and Health Information Management (HIHIM) offers both a Bachelor of Science degree and a postbaccalaureate certificate. Both the degree and certificate program require 78 credits, which may be completed in either two or three academic years.

Bachelor of Science

Suggested First- and Second-Year College Courses: Human anatomy and physiology (laboratory course); statistics; medical terminology; English composition; technical writing; interpersonal communication; public speaking; and distribution of general education and Areas of Knowledge courses

Admission Requirements

Admission is competitive. Admission is for autumn quarter.

Early Admission

1. Application for early admission submitted between November and February 15
2. All courses required for admission must be completed at the time of application:
 - a. Introductory statistics: see department website for list of approved courses
 - b. Human anatomy and physiology (laboratory preferred): see department website for list of approved courses
3. Minimum 90 transfer or UW credits completed at time of application
4. Transfer applicants apply to UW Admissions for autumn quarter and also submit the HIHIM application to the department.
5. Current UW students submit the HIHIM application to the department.
6. Returning UW students (one or more quarters of non-enrollment) submit the returning student application to the UW Registrar's Office and the HIHIM application to the department.
7. Acceptance to the two-year schedule is competitive.
8. Minimum 90 earned UW or transferable credits
9. Grades
 - a. Minimum cumulative 2.50 overall GPA
 - b. Minimum cumulative 2.50 GPA in courses required for admission
 - c. Minimum 2.0 grade in each course required for admission

Regular Admission

1. Application for regular admission submitted mid-January to May 1
2. Priority given to applicants with all courses completed at time of application:
 - a. Introductory statistics: see department website for list of approved courses
 - b. Human anatomy and physiology (laboratory preferred): see department website for list of approved courses
3. Minimum 90 transfer or UW credits completed at time of application
4. Transfer applicants apply to UW Admissions for autumn quarter and also submit the HIHIM application to the department.
5. Current UW students submit the HIHIM application to the department.
6. Returning UW students (one or more quarters of non-enrollment) submit the returning student application to the UW Registrar's Office and the HIHIM application to the department.
7. Acceptance to the two-year or three-year schedule is competitive.
8. Minimum 90 earned UW or transferable credits

9. Grades

- a. Minimum cumulative 2.50 overall GPA
- b. Minimum cumulative 2.50 GPA in courses required for admission
- c. Minimum 2.0 grade in each course required for admission

Major Requirements

78 credits

1. HIHIM 400, HIHIM 405, HIHIM 408, HIHIM 409, HIHIM 410, HIHIM 411, HIHIM 414, HIHIM 415, HIHIM 420, HIHIM 421, HIHIM 425, HIHIM 450, HIHIM 454, HIHIM 455, HIHIM 456, HIHIM 460, HIHIM 461, HIHIM 462, HIHIM 470, HIHIM 480
2. Minimum 2.0 cumulative GPA and minimum 2.0 grade in all courses applied to the major

In addition to major requirements shown above, students complete the general education requirements for the School of Public Health.

For additional information on application and program completion requirements, visit the [Health Informatics and Health Information Management program website](#).

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Postbaccalaureate Certificate

Admission Requirements

Admission is competitive. Admission is for autumn quarter.

Early Admission

1. Baccalaureate degree from an accredited college or university with a minimum 2.50 cumulative GPA.
2. Application submitted between November and February 15
3. Courses, as indicated below, completed at the time of application
 - a. Introductory statistics: see department website for list of approved courses
 - b. Human anatomy and physiology (laboratory preferred): see department website for list of approved courses

Requisite professional knowledge and skills pertaining to human anatomy and physiology; basic computer applications such as spreadsheets, data bases, word processing, or introductory programming; principles of management; statistics (any discipline) may be considered on a case-by-case basis.

4. Grades
 - a. Minimum overall 2.50 cumulative GPA
 - b. Minimum 2.0 grade in each course required for admission
 - c. Minimum 2.50 cumulative GPA in courses required for admission

Regular Admission

1. Baccalaureate degree from an accredited college or university with a minimum 2.50 cumulative GPA.
2. Application submitted mid-January to May 1
3. Courses required for admission. (Priority given to applicants with all courses completed at time of application.)
 - a. Introductory statistics: see department website for list of approved courses
 - b. Human anatomy and physiology (laboratory preferred): see department website for list of approved courses

Requisite professional knowledge and skills pertaining to human anatomy and physiology; basic computer applications such as spreadsheets, data bases, word processing, or introductory programming; principles of management; statistics (any discipline) may be considered on a case-by-case basis.

4. Grades
 - a. Minimum overall 2.50 cumulative GPA
 - b. Minimum 2.0 grade in each course required for admission
 - c. Minimum 2.50 cumulative GPA in courses required for admission

Certificate Requirements

78 credits

1. HIHIM 400, HIHIM 405, HIHIM 408, HIHIM 409, HIHIM 410, HIHIM 411, HIHIM 414, HIHIM 415, HIHIM 420, HIHIM 421, HIHIM 425, HIHIM 450, HIHIM 454, HIHIM 455, HIHIM 456, HIHIM 460, HIHIM 461, HIHIM 462, HIHIM 470, HIHIM 480
2. Minimum 2.0 cumulative GPA and minimum 2.0 grade in all courses applied to the certificate

For additional information, visit the [Health Informatics and Health Information Management website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The bachelor's degree program is designed to prepare individuals for careers in the management and use of healthcare information, and prepares students for the Registered Health Information Administrator (RHIA) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of healthcare positions upon graduation, including health information management, health informatics with emphasis on electronic health records, healthcare quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.
- *Instructional and Research Facilities:* None
- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* Students complete two internships, one of which is the capstone project.
- *Department Scholarships:* None
- *Student Organizations/Associations:* Students are invited to join the health information management professional association at reduced rates.

Graduate Program

Graduate Program Coordinator
(206) 616-2926
hservmph@uw.edu

The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health or Master of Science degree. The MPH degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well being of communities in the United States and throughout the world. Graduates take jobs in health system management, health program design and evaluation, health promotion, public health practice, and policy analysis. Among other options, the department offers an MPH in community-oriented public health practice (COPHP). This program uses problem-based learning methods, and integrates classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the MPH specialty options. The department also offers a three-year extended degree program in community health management, leading to the MPH degree for employed professionals working fulltime.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition,

an executive version of the traditional MHA degree, designed for mid-career healthcare professionals, is offered. The MHA degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans, and other types of healthcare organizations.

The department, in conjunction with UW Professional and Continuing Education, offers a fee-based master's degree in Health Informatics and Health Information Management.

The department offers a PhD in health services and participates in the training of doctoral fellows.

Master of Public Health

For current listings of MPH options and their requirements, see the [MPH program website](#).

Admission Requirements

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable.
4. Written statement, including a description of the applicant's professional background, career goals, and educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers.
6. An in-person or telephone interview with a Health Services faculty person is highly recommended. Complete application details can be viewed at depts.washington.edu/hservmph/admission.

Degree Requirements

63 credits for each program (specialty option) listed below. For detailed requirements, see depts.washington.edu/hservmph.

Community-Oriented Public Health Practice Program

63 credits, to include:

1. Problem-based learning (PBL) core curriculum - 36 credits
2. Integrated fieldwork - 6 credits (first year)
3. Seminars - 6 credits
4. Capstone project - 9 credits (second year)

5. Electives - 6 credits from School of Public Health and Community Medicine and other schools/colleges at the UW, as appropriate

Health Systems and Policy

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. 3 credits - practicum
3. Thesis or capstone project: 9 credits

Maternal and Child Health

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. Practicum: 3 credits
3. Thesis: 9 credits

Social and Behavioral Sciences

63 credits, to include:

1. At least 30 credits from graduate-level-in-classroom courses of which at least 18 credits are from Health Services courses.
2. Practicum: 3 credits
3. Thesis: 9 credits

Master of Health Administration

See UW General Catalog listing

at www.washington.edu/students/genecat/academic/health_services_administration.html.

Master of Science

Admission Requirements

For current information, see the [MS program website](#).

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)

3. Test of English as a Foreign Language (TOEFL) scores, if applicable
4. Written statement, including a description of the applicant's professional background, career goals, and educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers
6. An in-person or telephone interview with a Health Services faculty person is highly recommended

Degree Requirements

Minimum 63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 are from Health Services courses
2. Participation in a program research seminar Either HSERV 587, HSMGMT 513, or HSMGMT 514
3. Thesis: 9 credits

Master in Health Informatics and Health Information Management

The Master of Health Informatics and Health Information Management (MHIHIM) program prepares individuals for leadership in health informatics and technology, enterprise information management, and health administration. The curriculum pairs advanced health informatics and health information management courses with master of health administration courses.

The program trains professionals from the fields of health information management, health administration, business, information technology, and healthcare, to strategically lead, develop, and direct health information initiatives and systems. Graduates are prepared to take on senior management roles in this rapidly growing segment of the industry. The program prepares graduates for work in diverse healthcare delivery systems, such as hospitals, clinics, consulting and vendor organizations, and government agencies.

The MHIHIM program develops professionals who understand and assess the delivery system landscape and the growing role of enterprise information governance, technology drivers, and changing requirements for sharing health and patient information through exchange practices.

The curriculum enables students to build and enhance current strengths and acquire new skills. Students study comprehensive management strategies and apply practical methods in planning, analyzing, and manipulating health data to meet institutional needs and resource management. Students address data and technology management policies and tools. They learn to market, design, sponsor, and apply problem solving techniques to complex situations. In addition, students expand their collaboration and communication skills to participate in, and lead, high level leadership teams. Team-based learning, capstone projects, and involvement from healthcare community leaders, are all program hallmarks.

MHIHIM classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 21 months. Additionally once each week faculty lead students in a web-based session, ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

The program operates under a fee-based structure and is administered in collaboration with UW Professional & Continuing Education. Complete application details can be viewed at <http://www.health-informatics.uw.edu/admissions/application-details/>.

Financial Aid

Students are eligible for federal financial aid, as well as most other types of financial support that are not funded by state tuition revenues. When exploring financial aid options, students should emphasize they are applying for a fee-based program. Financial aid questions should be directed to the UW Office of Student Financial Aid (206) 543-6101, osfa@uw.edu.

Doctor of Philosophy

For the most current information, visit the [PhD program website](#).

Admission Requirements

Admission priority is given to applicants who have graduated from a master's program with high academic standing. Applicants who have a bachelor's, master's, or professional degree in a field related to health services are given preferential review. Students with only a bachelor's degree are occasionally admitted. Applicants with relevant research experience and publications are the most competitive.

Students admitted to the program generally have GRE scores in or above the 75th percentile.

International applicants must submit the results of the Test of English as a Foreign Language (TOEFL), unless they meet UW criteria for waiving the requirement. Scores must show high English language proficiency. A minimum score of 580 (paper based) or 237 (computer based) on the TOEFL is required to be considered for admission to the UW.

Degree Requirements

100 credits minimum, as follows:

1. *Required core competencies (35 credits):* HSERV 512, HSERV 513, HSERV 514, HSERV 523, HSERV 524, HSERV 525; one of the following: HSMGMT 514, HSERV 587, or ECON 500; HSERV 522; BIOST 517, BIOST 518, or BIOST 511, BIOST 512, BIOST 513, or BIOST 514, BIOST 515; EPI 512, EPI 513
2. *Area of emphasis:* Five courses or 15 credits in an area of emphasis. Suggested areas of emphasis: economics or finance; health behavior and health promotion; occupational health; cancer prevention and control; evaluation sciences; population health - the social

determinants; global health; maternal and child health; sociology/demography; bioinformatics. For a customized area of emphasis, specific courses taken are selected by the student and the adviser, based on the student's past coursework, experience, proposed dissertation topic, and future career goals.

3. Doctoral courses in advanced theory and methods in health services: 50 credits, including a minimum of 30 dissertation credits
4. Written preliminary examination
5. Written and oral general examinations
6. Dissertation
7. Dissertation defense (final examination)

Financial Aid

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies because of inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year.

Research Facilities

In addition to using University facilities, the program has extensive links with community healthcare delivery systems and agencies for research and training.

Executive MPH

Graduate Program Coordinator
H674 Health Sciences, Box 357660
(206) 685-7580

For current information, see the [Extended MPH program website](#).

The Executive MPH degree program is a part-time, partial distance learning program delivered through a combination of intensive four-week summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed coursework includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.

The Executive MPH degree program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

Admission Requirements

1. Current employment in a public health-related agency preferred
2. Minimum three years experience in community, public, or environmental health-related field
3. Baccalaureate degree from an accredited college or university
4. Minimum 3.00 GPA in the last graded 90 quarter/60 semester hours
5. Graduate Record Examination (GRE) scores, taken within 6 years. (Applicants with MD, DO, or PhD degrees from an accredited U.S. college or university may waive the GRE requirement.)

Degree Requirements

63 credits minimum, as follows:

1. *Year 1 Required Courses:* BIOST 502, EPI 511, HSERV 501, HSERV 516, HSERV 520, HSMGMT 560
2. *Year 2 Required Courses:* BIOST 503, ENV H 511, HSERV 504, HSERV 522, HSMGMT 514, HSMGMT 563
3. *Year 3 Required Courses:* HSMGMT 566 (3), HSMGMT 572 (3)
4. *Thesis or Project Option:* HSERV 700 (master's thesis) or HSERV 598 (project); EPI 600/ENV H 600
5. *Practicum (required):* focus based on pathway choice
6. *Elective or Pathway Credits (required):* pathway courses may be spread out over two years. Electives may be taken at any time.

Reserve Officer Training Corps Programs

Aerospace Studies

Department Overview

104 Clark Hall

The Air Force Reserve Officer Training Corps program (AFROTC) at the UW produces leaders ready to lead in any environment. AFROTC molds students by exposing them to a rigorous training program that grooms each student from a role of followership into a future leader.

Undergraduate Program

Detachment 910
114 Clark Hall
Box 353830
(206) 543-2360
afrotc@uw.edu

General Program Requirements

All aerospace studies courses are available to cadets exclusively. Additionally any students may join the AFROTC program as cadets and enroll in the 100- and 200-level general military courses so long as they meet the minimum entrance requirements. Aerospace Studies 100- and 200-level courses count as credit toward graduation. The general military courses are prerequisites to entry into the professional officer courses (300- and 400-level courses) and seeking a commission in the Air Force is on a controlled, selective basis. Contact the Recruiting Flight Commander in the Department of Aerospace studies (AFROTC) for more information.

Commissioning Requirements

Students must successfully complete the AFROTC program and receive an academic degree from the University. Upon program and degree completion, cadets are offered commissions as second lieutenants in the Air Force.

General Military Courses

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, two hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarter. Sophomore students may enter at the start of autumn or winter quarter and take the freshman- and sophomore-level courses concurrently. A four-week field-training course, normally taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses and may drop the courses at any time within the limits of University course-drop policies.

Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive a tax-free monthly subsistence stipend. They are furnished texts and uniforms. Junior- and senior-level classes consist of three hours of academic classes, two hours of leadership-laboratory and two hours of physical fitness per week.

Financial Assistance

The Air Force offers many types of scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. Cadets are eligible for one of these scholarships and should contact the Recruiting Flight Commander in the Department of Aerospace Studies (AFROTC), (206) 543-2360 or at afrotc@uw.edu.

Minor

Minor Requirements:

29 credits, to include the following:

1. 24 credits of air and space studies coursework
2. 5 credits in a foreign language beyond the first-year level
3. Minimum 18 upper-division credits in air and space studies coursework
4. Minimum 24 credits in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor.

Military Science

Department Overview

104 Clark Hall

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing there is a great difference between cognition and volition, the program is structured to give the student practical experience in leading and managing resources.

The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. Courses enable such knowledge to be acquired on campus without serving in the military forces.

Army ROTC electives enrich the student's course of study. Such courses also open up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a close-knit fraternal organization.

ROTC programs on college campuses ensure that the influences of higher education are transferred into the military services - a mandatory requirement in a democracy.

A minor in military science and leadership is available to any student at the UW. Requirements are shown below.

For information on the programs described below, contact the following:

Enrollment and Scholarship Officer
105 Clark, Box 353820
(206) 543-9010

Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no obligation of any kind during the first two years of the four-year AROTC program.

Placement credit toward completion of AROTC courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of \$350 per month as an academic junior and \$400 per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course,

students agree to complete the program, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go into the Reserves or National Guard, then he or she serves a minimum of eight years.

Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, are provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

Three-Year Scholarship Program

Open to qualified students already on campus. The scholarship provides financial assistance during the remaining years of the student's enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of \$350 for academic juniors and \$400 for academic seniors. All other advantages and obligations are the same as those of the four-year scholarship program.

Two-Year or Lateral Entry Program

Open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed at least 81 credits. Students may qualify for entrance into the advanced course under this program in two ways.

1. They may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.
2. Requires attendance at the Leader's Trainers course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

Undergraduate Program

Enrollment and Scholarship Officer
105 Clark, Box 353820
(206) 543-9010

The Army ROTC program offers a minor in military science and leadership.

Minor

Minor requirements

27 credits, to include the following:

1. M SCI 401, M SCI 402, M SCI 403 (9 credits)
2. Additional military science coursework (18 credits)
3. Minimum 18 credits of military science completed at the upper-division level
4. Minimum 18 credits of military science completed in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor

Naval Science

Department Overview

202 Clark

Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) unit functions in conjunction with Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program).

In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training.

Two NROTC programs are offered, as outlined below. In addition, any University student may take a naval science course without enrolling in the NROTC program, or may complete a minor in naval science, requirements for which are shown below.

Navy-Marine Scholarship Program

Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as a midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook stipend each quarter and a monthly subsistence pay which ranges between \$250 and \$400.

For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

Navy-Marine College Program

Each year, men and women are accepted for four- and two-year non-scholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).

Those students selected for the two-year program attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly

subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

Undergraduate Program

Adviser
202 Clark, Box 353840
(206) 543-0170
nrotc@uw.edu

Minor

Minor requirements

25 credits, to include the following:

1. N SCI 201; N SCI 402 (6 credits)
2. Additional naval science coursework (19 credits)
3. Minimum 12 naval science credits completed at the upper-division level
4. Minimum 12 naval science credits completed in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor

School of Social Work

School Overview

Dean

Edwina Uehara

210 Social Work/Speech and Hearing Sciences

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a PhD program. The Bachelor of Arts in Social Welfare (BASW) program prepares students for entry-level generalist practice. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both the BASW and MSW programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. Consistent with University policy, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299.

In addition, the School offers two concurrent degree programs – one with the School of Public Health leading to the MSW and MPH degrees, and a second with the Evans School of Public Affairs, leading to MSW and MPA degrees.

Undergraduate Program

Adviser

23D Social Work, Box 354900

(206) 543-8617

sswadm@uw.edu

The School of Social Work offers the following program of study

- The Bachelor of Arts degree with a major in social welfare

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Social welfare courses include content on social welfare history, policy and services, human behavior and the social environment, social welfare research, and cultural diversity. These academic courses prepare students for the senior year three-quarter practicum experience, which involves a total of 480 hours of direct social services under the supervision of a practicum instructor approved by the School.

Bachelor of Arts Program

Suggested First- and Second-Year College Courses: SOC WF 200; prerequisites in psychology and sociology; statistics; also, courses in American ethnic studies, disability studies; public health; communication; economics; political science; human biology; human development; American government; diversity studies; law, society, and justice; and gender, women, and sexuality studies.

Department Admission Requirements

Approximately 40 juniors are admitted each year. Admission, for autumn quarter only, is competitive and completion of requirements listed below does not guarantee acceptance. The application deadline is April 15. Applicants must meet the following criteria by the time they begin classes in the program:

1. Minimum 65 credits completed
2. One course in sociology and one course in psychology - both completed before beginning the program. Minimum 2.0 grade in each. See website for approved courses.
3. Recommended: introductory statistics course
4. Minimum 2.00 cumulative GPA
5. Paid or volunteer social service experience
6. Completed application

Application forms and a detailed description of the social welfare major are available at the School's website, socialwork.uw.edu/. A student may discuss the program in person by contacting the Social Work Office of Admissions, (206) 543-5676, sswinfo@uw.edu. Students accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

Major Requirements

67 credits as follows:

1. Core Courses (2.0 minimum grade required in each course): SOC WF 200; SOC WF 310; SOC WF 311; SOC WF 312; SOC WF 315; SOC WF 320; SOC WF 390; SOC WF 402; SOC WF 404; SOC WF 405; SOC WF 410, SOC WF 415; SOC WF 460 or SOC WF 442 or SOC WF 443; SOC WF 465; and SOC WF 435
2. 2.00 cumulative UW GPA
3. 2.50 cumulative GPA in SOC WF required courses

Continuation Policy

All students must make satisfactory academic progress in the major and meet outlined standards of professional behavior. Failure to do so may result in probation or referral to the student review committee, either of which could lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The BASW program produces beginning-level social work practitioners and is accredited by the Council on Social Works Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining

intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience).

The following outcomes define the BASW program:

1. Preparation of entry-level baccalaureate social workers for generalist practice in a multicultural context.
 2. Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
 3. Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
 4. Preparation for graduate education.
- In addition, the School of Social Work houses a number of centers and projects. For more information on these research activities, visit socialwork.uw.edu/research/research-centers.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Contact the adviser for information.
 - *Department Scholarships:* A limited number of financial-aid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the chair of the scholarship committee, School of Social Work.
 - *Student Organizations/Associations:* Organization of Student Social Workers (OSSW)

Graduate Program

Graduate Program Coordinator
Box 354900
(206) 543-8617
sswadmis@uw.edu

Master of Social Work

The School of Social Work offers a Master of Social Work degree with three options: a two-year full-time program; a one-year advanced-standing program for qualified students with a degree in social work/social welfare from a Council on Social Work Education accredited undergraduate program; and a three-year part-time extended degree program.

All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods.

The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history.

The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. The advanced curriculum is being revised. Check the School's website, socialwork.uw.edu for current information.

Admission Requirements

Formal admission to the Graduate School as well as to the School of Social Work. Bachelor's degree, strong academic background, and social-service experience. Official transcripts from all colleges and universities attended, references, application forms, résumé, and an admission essay to be considered for autumn-quarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials. Current application materials can be obtained from the School's Admissions Office website at socialwork.uw.edu/admissions/.

Degree Requirements

Minimum 46 credits (advanced standing program); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.
2. *Human Biology Requirements:* BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW program. Students must complete the requirement prior to beginning the advanced curriculum (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
3. *Basic Statistics Requirement:* An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.
4. *Professional Foundation Courses Required for the Day and Extended Degree Program:* SOC W 500, SOC W 501, SOC W 504), SOC W 505, SOC W 506, SOC W 510, SOC W 511, SOC W 512, SOC W 513, SOC W 523, 3 credits of electives, SOC W 524. All foundation courses must be completed before beginning the advanced curriculum.
5. *Advanced Curriculum for the MSW Day Program:* Specialization in an advanced methods area or field of practice. Current areas of concentration include policy and administrative practice; health and mental health practice; community-centered integrative practice; practice with children, youth, and families; and multigenerational practice. Students enter the second year with an individualized learning plan (developed by winter quarter of their foundation year) that sets out a coherent program of advanced study. Identified in the learning plan is a policy/services course, an advanced methods area, an advanced field practicum, and proposed choices for methods and elective courses that support the student's overall area of concentration.

Programs of study vary slightly by concentration, but a typical program of study includes:

- a. One policy/services course (3 credits), consistent with the student's second year specialization
- b. Two advanced methods (6 credits) in the student's primary method area or across methods with the approval of the faculty adviser and practicum coordinator
- c. Elective course offerings (9 credits) to include courses related to the policy/services areas, and advanced HBSE and theory courses, with the primary focus on development

of knowledge and skills in intervention. One elective course from outside the School. Elective courses range from 1 to 3 credits.

- d. Advanced practicum (SOC W 525, 18 credits) aligns with the student's policy/services course and with the student's primary intervention method area.
6. *Advanced Curriculum for the MSW Extended Degree Program*: Students select one of two specializations within the Interpersonal/Direct Social Work Practice concentration: Integrative Health-Mental Health Advanced Practice, or Multigenerational Practice with Children, Families, and Elders. Advanced curriculum consists of policy/services course, a two-quarter advanced practice methods sequence, SOC W 571, 6 credits of electives, and a 720-hour advanced practicum.
7. *MSW Electives*: Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

Financial Aid

A limited number of financial-aid opportunities are available. Applicants to the MSW program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited and typically requires a department-specific application be submitted by April 1. Inquiries may be directed to the Admissions Office, School of Social Work. Information on available tuition awards may also be reviewed on the Social Work admissions website, socialwork.uw.edu/admissions.

Master of Social Work/Master of Public Health Concurrent Degrees

Concurrent degrees prepare professionals who function at the interface of both fields in practice, research, planning, administration, and policy development. Students develop (1) competence in social work practice in community health; (2) understanding of the organization and functioning of the health and social service delivery systems; and (3) basic analytical skills necessary to conduct research and to perform competently in a variety of public health social work roles. Students also have an opportunity for in-depth study of particular issues related to their special interests and career goals.

Application

Students who matriculate into the full time program in either Social Work or Public Health are eligible. Students admitted to Social Work with advanced standing should apply for both programs simultaneously. Students in the part-time evening degree program in either Social Work or Public Health are not eligible for the program.

1. Students must apply to and be accepted by both schools.
2. Students are strongly encouraged to complete up to one year of studies in Social Work before entering the Public Health program. Applications for entry are due in both schools by January 15. Typically students apply to Social Work in January and enter the MSW program in September. They then apply to Public Health the following January and begin the MPH program the next September. Staggered entry permits students to complete all requirements of both degrees within three years.

Degree Requirements

115-125 credits (depending on number of electives taken)

1. Two separate sets of at least 36 credits each
2. At least 18 numerically graded credits for each degree in courses numbered 500 through 599. All required courses in the MPH program must be taken for a grade.
3. Up to 12 credits taken in one school may be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.
4. The MPH requires a thesis.

Doctor of Philosophy

The PhD program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. Students acquire both the substantive and methodological competence to contribute theoretical formulations and empirical research that inform effective social work practice and advance scholarship in social welfare.

After the first year of required courses, each student's program of study is individually designed and focuses on well-defined substantive and interventive areas of research relevant to the field of social welfare. In the basic core of required courses, which includes teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students define and develop the specialized areas that are the focus of their general examination and, typically, their subsequent dissertation research. Selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare.

The general examination for advancement to candidacy generally occurs at the end of the second year or during the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before the degree is the final examination, defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The PhD program takes approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

Admission Requirements

Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants must have a master's degree in social work or a closely related field.

The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is December 15. For more information, call (206) 685-1680, or email phdmhpr@uw.edu.

Degree Requirements

90 credits minimum, to include:

- *Required Courses:* Must include content on diverse populations, including the disadvantaged and oppressed. Includes content on people of color, women, gay men and lesbians, and persons with disabilities. Specific type or nature of the content (e.g., readings, exemplars, exercises) and how it is introduced and integrated likely differs across courses. In all cases, content on diversity must be in accord with course objectives and be visibly present in the course syllabus.

All required coursework (with the exception of 800-level tutorials) must be completed before or during the quarter in which the oral section of the general examination takes place.

Courses required must be taken on a graded basis unless offered credit/no-credit only (i.e., they cannot be taken on a satisfactory/not-satisfactory basis).

1. Introduction to Advanced Research Methods and Design. Two quarters during first year.
 2. Fundamentals of Statistics. Two quarters during first year through other departments (primarily Sociology or Biostatistics).
 3. Research Issues and Priorities in Social Welfare. Two quarters during first year.
 4. Social Welfare Policy. Two quarters during first year (contemporary policy and international and global policy).
 5. Research Practicum. Two quarters; to be completed by the end of second year (credit/no-credit only).
 6. Teaching Practicum. One quarter; to be taken after successful completion of first year (credit/no-credit only).
 7. Career Planning Seminar. One-credit seminar offered quarterly (credit/no-credit only). Focus is on professional development issues and skills with emphasis on academic and research careers.
 8. Teaching Preparation. One quarter in the second year.
 9. Minimum two (3+ credit) courses in advanced graduate research methods (typically 500-level courses offered in other departments) relevant to the student's anticipated research in a substantive or interventive area. Coursework beyond the minimum is encouraged.
 10. Minimum two (3+ credit) graduate social science theory courses (500 level or above), designed to provide strong theoretical foundations. Students often use these courses to develop a "minor" in one of the social sciences. Offered in the College of Arts and Sciences or one of the professional schools, they are related to the substantive or interventive content of the student's program. Coursework beyond the minimum is encouraged for greater depth of interdisciplinary theoretical training.
 11. Dissertation Tutorials (SOC WL 800). Taken after the student has successfully completed the oral general examination and has been advanced to candidacy for the PhD. Students must complete a total of 27 credits over at least three quarters to satisfy the Graduate School requirement
- *Elective Courses in the School of Social Work*
 1. Qualitative Methods in Social Work Research. One or two quarters, offered alternate years.
 2. Analytical Perspectives on Social Welfare Policy. One quarter, offered annually.

3. Advanced Topics in Data Analysis. One quarter, offered annually, covering advanced quantitative methods.
 4. Social Movements and Participatory Action Research Methods. One quarter, offered alternate years.
 5. Psychosocial Scale Construction and Measurement. One quarter, offered alternate years.
 6. Interdisciplinary Prevention Science: Children and Adolescents. Overview of developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21), 3-credit course (credit/no-credit only).
 7. Promoting Well-Being among At-Risk Groups. Guidance for Health Promotion/Prevention Research.
- *Additional Course Expectations:* Students may take tutorials (SOC WL 600) with faculty members while completing advanced coursework and writing the integrative paper (prior to the oral general examination). These tutorials should include one or more written products.

Students are also encouraged to take additional courses that bear on their substantive areas of interest. Courses may be taken in any department or school of the University but should ordinarily be at the 500 level or above.

- *Prevention Research Training Program Courses:* (Trainee requirements in addition to all PhD program courses)
 1. Seminar in Prevention Science. One-credit seminars taken autumn, winter, and spring quarters each year of the traineeship. Credit/no-credit only.
 2. Promoting Well-Being among At-Risk Groups: Interdisciplinary Guidance for Health Promotion/Prevention Research. One quarter, 3 credits, introduction to prevention research.
 3. Two additional graduate level (500+) courses, one social science theory and one research methods, related to the prevention research area of study.

Financial Aid

The School of Social Work ensures that all students have some means of financial support during the nine-month school year for the first three years in the program and is frequently able to continue support beyond this point. In each of the first three years, the PhD program director assists students in obtaining funding from the School, other UW sources, or external federal and private granting agencies. Each year, awards of stipends, fellowships, and research and teaching assistantships are made on the basis of resources available and match with areas of student interest. An award of a particular stipend or assistantship in one academic year does not carry a commitment for that same award in another year because both the grant situation and the applicant pool change. Advanced teaching and research positions are available on a competitive basis. Students are encouraged to begin their efforts to secure dissertation research support early and to stay in communication with the PhD program directors and associate deans, who oversee assistantship assignments in consultation with the School administration.

Undergraduate Interdisciplinary Programs

Arctic Studies

Program Overview

The minor in arctic studies is sponsored jointly by the [Jackson School of International Studies](#) within the College of Arts and Sciences and the [School of Oceanography](#) in the College of the Environment. This interdisciplinary academic program links the natural, social sciences, and humanities in an integrated program of study. The purpose of the Arctic Studies minor is for undergraduates to have an opportunity to gain skills relevant to addressing major science and policy issues in the Arctic.

Undergraduate Program

Minor

503 Thomson, Box 353650
(206) 221-6374
nfabbi@uw.edu

Minor Requirements:

Minimum 28 credits

1. Foundation Coursework (9 credits): ARCTIC 200; OCEAN 235; ARCTIC 401
2. Integrative Experience (3 credits): ARCTIC 400
3. Electives (minimum 16 credits): see adviser for approved list
4. Minimum two courses from the approved social sciences list
5. Minimum two courses from the approved sciences list
6. Minimum one course with North-Star designation; may be combined with social science or science elective offering
7. Minimum 2.00 cumulative GPA for courses applied to the minor
8. Minimum 15 credits taken from outside student's major requirements
9. Minimum 15 credits 300- and 400-level coursework
10. Minimum 15 credits completed in residence through the UW

Climate Science

Program Overview

The minor in Climate Science is offered jointly with the Department of [Atmospheric Sciences](#), the Department of [Earth and Space Sciences](#), and the School of [Oceanography](#).

Undergraduate Program

Adviser
339A Ocean Sciences Building,
Box 355351
206-543-6521
uwpcc@uw.edu

Minor

Minor Requirements: 25 credits, to include:

1. One of ESS 201, ATM S 211, or ATM S 321 (3-5 credits)
2. One of OCEAN 452/FISH 452, AMATH 301, Q SCI 381, or CSE 160 (3-5 credits)
3. *Integrated Capstone Experience:* ATM S 475/ESS 475/OCEAN 475 (3 credits)
4. *Science Electives:* At least one course each from ATM S, ESS, and OCEAN (minimum 12 credits). See adviser for list of approved courses.
5. *Application Elective:* One approved social science, policy, or energy course to reach 25 credits. See adviser for list of approved courses.
6. Minimum 2.00 cumulative GPA in courses applied to the minor
7. Minimum 15 credits taken through the UW
8. Minimum 18 credits outside student's major
9. Minimum 15 upper division credits
10. Students are encouraged to take MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, and PHYS 123, or see adviser to complete requirements for the minor.

Education, Learning, and Society

Undergraduate Program

Adviser

B507 Padelford

(206) 616-2352

elsminor@uw.edu

Minor

The minor in education, learning, and society, jointly sponsored by the College of Education and the College of Arts and Sciences, provides a strong background in how human beings learn, and how society, environment, and culture shape learning.

Minor Requirements:

31 credits, to include:

1. Learning and Development: one from PSYCH 206 (prerequisite, PSYCH 101), PSYCH 306, NURS 201, EDPSY 302, EDPSY 406 (5 credits)
2. Schooling and Society: one from AES 340, CHID 210, EDUC 305, EDUC 310, SOC 292 (5 credits).
3. Field Experience: any combination of EDUC 260, EDUC 360, EDUC 361, EDUC 369, GEN ST 346, and GEN ST 470 (with ELS adviser approval, student may substitute one of the following: GEN ST 350, ECFS 303, ECFS 304, ECFS 305, ECFS 454, ECFS 455, ECFS 456, EDC&I 499, EDPSY 499, EDSPE 499, CHID 497, or other related courses) (5 credits).
4. EDUC 299 (1 credit).
5. Electives: 15 credits from an approved list. For list, see adviser or College website.
6. Up to 15 credits of the minor may overlap with a student's major and up to 5 credits may overlap with another minor.

Undergraduate students from outside the College of Education may take courses offered to help them explore the field of education and prepare for graduate study. Fieldwork courses in local schools or social service agencies give students opportunities to make informed career and academic choices. Students may also complete prerequisites for graduate programs. Further, requirements to meet endorsement (subject) guidelines for secondary teaching may be completed by undergraduates.

Ethics

Overview

The Ethics program is an interdisciplinary [minor](#) sponsored by the Philosophy department.

Undergraduate Program

Adviser
361 Savery, Box 353350
(206) 543-5855
philadv@uw.edu

Minor

Minor Requirements: 27 credits, to include:

1. Three courses from an approved list in which normative thinking and conceptual analysis of values and frameworks are central; at least one at the 300 level or above. See list at www.phil.washington.edu/POV/List_A_Courses.html
2. Two courses from an approved list in which values-laden issues are central; at least one at the 300 level or above. See list at www.phil.washington.edu/POV/List_B_Courses.html
3. VALUES 495 (2-credit capstone).
4. Minimum 15 credits outside the student's major.
5. Minimum 15 credits completed through the UW.
6. Minimum 2.00 GPA in courses used for the minor.

Honors

Program Overview

211 Mary Gates Hall

uwhonors@uw.edu

The four-year University Honors Program features an interdisciplinary Honors core curriculum with a focus on experiential learning and reflection, Honors academic advising, foreign study programs and exchanges, and opportunities for independent study. It provides an academic community and educational opportunities to those students who are willing to take academic risks, think across disciplinary boundaries, and engage in experiential learning (e.g., research, leadership, community and/or international engagement).

To be considered for admission to the University Honors Program at entrance, students must apply to the Honors Program when they submit their Application for Undergraduate Admission to the University. "Selection is based on a student's demonstrated engagement with interdisciplinary learning, high school record, essay responses, a letter of recommendation, and fit for the program." Students also may seek admission based on academic performance during spring quarter of their freshman year at the University via the late admission process.

Students who are accepted into the University Honors Program in their freshman year and complete the Honors Core Curriculum alone graduate "With Interdisciplinary Honors." When students complete both the Core Curriculum and the Departmental Honors requirements in their chosen major, they graduate "With College Honors in *Name of Major*." Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete the Honors Program in their chosen major will receive a degree "With Honors in *Name of Major*." By special arrangement it may be possible for students to complete a degree "With College Honors" in departments, schools, or programs that do not offer a formal Departmental Honors option as well as Departmental Honors by itself.

Core Curriculum

47 credits as follows:

1. HONORS 100 (1 credit)
2. One Honors-prefix social science course (HONORS 23x) (I&S; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
3. One Honors-prefix arts/humanities course (HONORS 21x/HONORS 24x) (VLPA; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
4. One Honors-prefix science course (HONORS 22x) (NW; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
5. One Honors-prefix interdisciplinary course (HONORS 205, HONORS 345, HONORS 38x, or HONORS 391, HONORS 392, HONORS 393, HONORS 394) (NW; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
6. Combination of any five additional 4- or 5- credit HONORS courses. May be HONORS-prefix or non-HONORS-prefix courses. (VLPA, I&S, NW)
7. HONORS 496 (1 credit)

8. Courses applying towards Departmental Honors may not be applied toward the HONORS core curriculum.
9. Students may fulfill no more than 15 credits of HONORS core requirements by completing HONORS 499 (independent study), graduate-level courses, or ad hoc projects in non-HONORS courses or by way of a non-HONORS study abroad program. These credits may fulfill only a student's additional five HONORS courses requirement; they may not count towards HONORS-prefix social science, arts/humanities, science, or interdisciplinary requirements.
10. Minimum cumulative 3.30 GPA in all courses completed through the UW.

Departmental Honors

Students may apply to Departmental Honors in their major(s) after they have been admitted to the major, typically in their junior year. Each department at the UW has a unique set of Departmental Honors requirements. For links to specific information about each department, see the Honors Program website.

Marine Biology

Department Overview

Marine biology involves the study of life processes of organisms inhabiting the ocean's environments, drawing on courses offered by Aquatic and Fishery Sciences, Oceanography, and Friday Harbor Laboratories. The degree program integrates core material on marine aspects of biodiversity, organismal processes, and ecology and ecosystems, examining their relationship with physical processes and ocean changes. Graduates are prepared for careers in management agencies at the local to international levels, environmental consulting, non-profit organizations, and a range of educational settings.

Undergraduate Program

Adviser

116 Fishery Sciences Building, Box 355020

206-543-7426

marbiol@uw.edu

Marine Biology offers the following programs of study:

- Bachelor of Science, with a major in marine biology
- Minor in marine biology

Bachelor of Science

Suggested First- and Second-Year College Courses: Recommended courses for first-year students: FISH 250/OCEAN 250/ BIOL 250; English composition; calculus; CHEM 120 and OCEAN 295; BIOL 180. Recommended courses for second-year students: OCEAN 210, BIOL 200, and FISH 270/OCEAN 270/MARBIO 270; Q SCI 381, MARBIO 305.

Department Admission Requirements

Students in good academic standing may declare this major at any time, including on the application for admission to the UW. After notification of admission and before registration, new students should contact the Student Services Office for help in program planning.

Major Requirements

105-113 credits

1. *Core STEM (43-50 credits)*
 - a. Biology: BIOL 180, BIOL 200 (10 credits)
 - b. Chemistry: CHEM 120, OCEAN 295; or CHEM 120, CHEM 220; or CHEM 142, CHEM 152, OCEAN 295; or CHEM 142, CHEM 152, CHEM 162 (10-15 credits)
 - c. Physics: Either PHYS 114 or PHYS 121 plus OCEAN 285 and OCEAN 286; or PHYS 114 and PHYS 115; or PHYS 121 and PHYS 122 (8-10 credits)
 - d. Calculus: Q SCI 291 or MATH 124; Q SCI 292 or MATH 125 (10 credits)

- e. Statistics: Q SCI 381 or STAT 311 (5 credits)
2. *Introduction to Marine Environment*: FISH 250/OCEAN 250/BIOL 250 or OCEAN 200 and OCEAN 201; OCEAN 210; FISH 270/OCEAN 270/MARBIO 270 (14 credits)
3. *Marine Biology Core*: FISH 370/OCEAN 370/MARBIO 370; OCEAN 330 or OCEAN 430; FISH 323 (14-15 credits)
4. *Communications*: MARBIO 305 or FHL 333 (3 credits)
5. *Electives*: Minimum 25 credits from approved courses (see department website for list), meeting the following requirements
 - a. Minimum one course each in biodiversity, ecology and ecosystems, organismal processes
 - b. Minimum two courses from approved laboratory electives
 - c. Minimum three courses at the 400 level
 - d. Maximum 6 credits total from OCEAN 492, FHL 450, FHL 460, FHL 470, or FHL 492.
6. *Integrative Field Experience*: One from MARBIO 479, MARBIO 488, FHL 450, FHL 460, FHL 470, or OCEAN 492. Students who take OCEAN 492 toward elective requirements in 5.d. above may apply an additional 6 credits in OCEAN 492 to the integrative field experience requirement. (6 credits)
7. Minimum 2.00 cumulative GPA in courses presented for the major.
8. Majors must satisfy the College of the Environment general education requirements.

Minor

Minor Requirements: 35 credits

1. *Introductory Courses (19 credits)*: FISH 250/OCEAN 250/BIOL 250; OCEAN 210; BIOL 180; Q SCI 381.
2. *Integrative Experience (3 credits)*: See adviser for approved list of courses.
3. *Electives (13 credits)*: Selected from an approved list available from a program adviser. Additional courses may be approved by program adviser. (A minimum of one elective course must be taken from each of the following units: Aquatic and Fishery Sciences; Oceanography; and Biology or Friday Harbor Laboratories.)
4. Up to 17 credits may overlap with credits applied to a student's major and up to 5 credits may overlap with credits applied to another minor.
5. Minimum 15 credits in upper-division courses.
6. Minimum 2.00 cumulative GPA in courses presented for the minor.

Paleobiology

Program Overview

The minor in paleobiology, sponsored by the Department of Biology, provides students a solid foundation in the evolution and ecology of life in deep geologic time. In addition to classwork in paleontology, geobiology, astrobiology, and paleoanthropology, the minor provides opportunities for fieldwork and independent research.

Undergraduate Program

Adviser

318 Hitchcock Hall, Box 355320

206-543-9120

bioladv@uw.edu

Minor

Paleobiology

Minor Requirements: Minimum 30 credits

1. BIOL 354
2. *Electives:* Two from the paleobiology core content area and one from each of the three other content areas, selected from approved courses available on the paleobiology website.
3. BIOL 483
4. *Integrative experience in paleobiology:* Minimum 3 credits from one of BIOL 475 or BIOL 499, ESS 499 or BIO A 499, at the discretion of the instructor
5. Remaining credits from any of the above or BIO A 389, BIO A 491, or an approved elective
6. Minimum 2.00 cumulative GPA for courses presented for the minor
7. Minimum 18 credits from outside the student's major.
8. Minimum 15 credits completed through the UW.

COLLEGE OF ARTS AND SCIENCES

AMERICAN ETHNIC STUDIES

AMERICAN ETHNIC STUDIES

AES 150 In-Justice for All: Intersection of Race, Ethnicity, Class, and Gender in the United States (5) I&S, DIV *Gamboa, Salas* Focusing on pre-Columbus era to 1970, students develop an understanding of how race, ethnicity, nationality, class, and gender impact all Americans - especially those viewed as racial ethnic minorities.

AES 151 Identities, Cultures, and Power Across American Ethnic Groups (5) I&S, DIV Provides an introduction to the major theories, debates, and issues concerning the study of identities and cultures of American ethnic groups as they are constituted through relationships of power.

AES 211 Environmental Justice (5) I&S, DIV Examines introductory studies of environmental racism and ecological injustice in the United States and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for "eco-justice." Offered: jointly with ANTH 211/ENVIR 211.

AES 212 Comparative American Ethnic Literature (5) VLPA/I&S, DIV *Butler* Reviews selected texts by African American, American Indian, Asian American, Chicano/Latino, and Euro American writers. Includes a comparison of how texts envision and interpret a diverse American culture and social, political relations among peoples of the United States. Explores the power of cultural agency in the creation of America's literature.

AES 250 Race in the American University (5) I&S Racial integration in American institutions of higher education. Entry to, and impact on, American universities by people of color. History of ethnic studies and its relation to other disciplines.

AES 322 Gender, Race, and Class in Social Stratification (5) I&S, DIV The intersection of race, class, and gender in the lives of women of color in

the United States from historical and contemporary perspectives. Topics include racism, classism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Prerequisite: GWSS 200. Offered: jointly with GWSS 300.

AES 333 Race and Ethnicity in the U.S. Military (5) I&S *Salas* The experiences of racial minorities in the military. Topics include segregation of units, desegregation of military, career limitations and opportunities, minority women, military families, racism, and role of veterans in civil rights struggles after service.

AES 335 History of African Americans and Sports (5) I&S, DIV *J. WALTER* Development of sport in the US and its importance for US culture and society. Covers increased centrality of athletic competition as part of the new leisure time in the late - 19th century, revival of the Olympic movement, racial segregation/integration, today's American notions of celebrity and social style.

AES 340 Race, Ethnicity, and Education (5) I&S, DIV Focuses on critical social and political dimensions of race and ethnicity as they relate to issues and practices of pedagogy and power in American education. Considers schooling as sites at which contemporary politics of diversity play out amidst increasingly diverse demographics of students, teachers, and parents.

AES 345 Ethnographies of School Inequalities (5) I&S, DIV *Bonus* Explores various issues and practices of school inequalities through the methods of critical ethnography.

AES 361 Ethnicity, Business, Unions, and Society (5) I&S Interrelationships of ethnicity, business, unions, and the larger society. Examines financial and sociological structure of business and manufacturing sector, how this sector performs, and consequences of performance for selected ethnic groups in United States. Offered: jointly with SOC 363.

AES 380 Race, Ethnicity, and United States Public Policy (5) I&S Explores the causes of disproportionate representation for people of color

among the country's impoverished population; drawing on analysis of race/ethnicity, poverty, public policy, (including competing theories), public policy approaches, and ethnographic work addressing the causes and perpetuation of poverty in America.

AES 389 Race, Gender, and Sexuality in the Media (5) I&S, DIV Introduction to media representations of gender, race, and sexuality. Offered: jointly with COM 389/GWSS 389.

AES 404 Advanced American Ethnic Studies in Humanities (5, max. 15) VLPA, DIV *Linh Thuy Nguyen, Sonnet H. Retman, LAURO H. FLORES, Alina R. Mendez, Vincent J Schleitwiler, Jang Wook Huh* Comparative interdisciplinary study of race and ethnicity. Examines experiences and cultural expressions of racialized communities in the U.S. and its diasporas from a cultural studies' perspective. Explores how expressive cultures engage and transform racial formations and their intersections, animating social relations of everyday life and reshaping structures of power. Prerequisite: either AES 150, AES 151, AAS 101, AFRAM 101, or CHSTU 101. Offered: AWSpS.

AES 440 History and Memory: Race, Archives, and Afterlives (5) I&S/VLPA, DIV *L. Nguyen* What is memorialized and archived and what is forgotten? Who produces knowledge and what counts as knowledge? Through historical and cultural studies approaches, this course examines how official and unofficial discourses deal with memory, violence, silence, haunting, history, and subjectivity. Topics may include U.S. empire and war, slavery, and colonialism. Prerequisite: AES 150 or AES 151 Offered: WSp.

AES 442 Undocumented Immigrant Communities (5) I&S, DIV *Carolyn Pinedo-Turnovsky* Sociological examination of the concepts of undocumented, citizen, and the structuring of (il) legality as they are situated in axes of power, specifically in racialized and gendered contexts. Topics include identity formation and experiences across communities, i.e., UndocuLatino, UndocuBlack, UndocuAsian and Pacific Islander, and UndocuQueer. Institutional outcomes in migration, law, labor, education, carceral spaces, and health. Recommended: AES 150; AES 151; AES 322; AES 461; and AES 462. Fluency with discourses in race, ethnicity, and gender as well as a basic familiarity in studies of

transnational migrations, inequality and globalization. Offered: AWSp.

AES 446 Music in American Cultures (3) VLPA/I&S Compares musical history and experience of selected American cultures that have fed into the American musical mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latino/a Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with MUSIC 446.

AES 450 American Ethnic Health: Race, Gender, and Status Groups (5) I&S, DIV *Kashima* Introduces newer social science and health science related work on race, ethnicity, culture, socio-cultural, and environmental issues affecting American racial minorities. Considers differential rates of physical and medical problems such as cardiovascular disease rates, diabetes statistics, low birth weight children, etc. Offered: AWSp.

AES 461 Comparative Ethnic Race Relations in the Americas (5) I&S Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with SOC 461.

AES 462 Comparative Race and Ethnic Relations (5) I&S, DIV Race and ethnicity as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with SOC 462.

AES 487 Cultures and Politics of Environmental Justice (5) I&S, DIV *D. PENA* Comparative survey of environmental justice movements in the world with focus on critical studies of environmental racism, risk, and sustainable development. Provides theoretical knowledge and research methods incorporating the study of equity and autonomy in environmental impact and risk assessment and other aspects of environmental policy politics. Offered: jointly with ANTH 487.

AES 489 Black Cultural Studies (5) I&S Examines how images of blackness have been (re) constructed through identity formation and entrenched

inequality. Topics include black women's bodies, black men's bodies, blackface minstrelsy, black queer studies, black power, and black hybridities. Offered: jointly with COM 489/GWSS 489.

AES 490 Representing Beyond the Binaries: Mixing Race, Gender, and Sexuality in the Media (5) I&S, DIV Joeseeph Cultural studies approach to examining the mixed formations that race, sexuality, and gender take in the contemporary United States media. Draws upon multi-disciplinary scholarship in examination of the media. Offered: jointly with COM 490/GWSS 486.

AES 494 Community Practicum and Internship (3-5, max. 10) Faculty supervised practicum and internship experience in variety of settings and agencies, e.g., ethnic specific agencies, government and civic community-based offices. Students contribute skills and knowledge to respective communities and gain experience by working with professionals and community organizers. Credit/no-credit only.

AES 496 Honors Senior Thesis (5-10, max. 10) Supervised individual and independent/tutorial study for AES Departmental Honors students involving research, writing, project completion, and completion of a major 30-page paper or commensurate project. Offered: AWSpS.

AES 498 Special Topics in American Ethnic Studies (1-5, max. 15) I&S Designed to provide the student an opportunity to concentrate on one specific aspect of American Ethnic Studies through a comparative, interdisciplinary approach.

AES 499 Independent Study or Research (1-5, max. 10) Independent readings and/or research under the supervision of a faculty member.

AFRICAN-AMERICAN STUDIES

AFRAM 101 Introduction to African American Studies (5) I&S, DIV History, culture, religion, institutions, politics, economics, arts, and psychology of peoples of African descent as developed from experience in both the old and new worlds. Multidisciplinary analysis of social life from a black perspective as illustrated in selected historical and contemporary writings.

AFRAM 150 Introduction to African American History (5) I&S Introductory survey of topics and problems in African American history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in African American history. Offered: jointly with HSTAA 150.

AFRAM 214 Introduction African American Literature (5) VLPA, DIV Introduction to various genres of African American literature from its beginnings to the present. Emphasizes the cultural and historical context of African American literary expression and its aesthetics criteria. Explores key issues and debates, such as race and racism, inequality, literary form, and canonical acceptance. Offered: jointly with ENGL 258.

AFRAM 220 African American Film Studies (5) VLPA/I&S, DIV Examines the history and theory of African American filmmaking, introducing central political and aesthetic debates by way of different cinematic eras, genres, and filmmakers. Focuses primarily on black directors and producers independent and commercial contexts as they confront popular representations of U.S. blackness in their own cinematic practice.

AFRAM 246 African American Politics (5) I&S, DIV C. PARKER Survey of African Americans within the U.S. socio-political processes. Situates African Americans within a post-civil rights context where there is debate about race's centrality to an African American politics. Offered: jointly with POL S 246.

AFRAM 260 African American Family (5) I&S, DIV Explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with SOC 260.

AFRAM 261 The African American Experience through Literature (5) VLPA/I&S Instructs students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with SOC 261.

AFRAM 270 The Jazz Age (5) I&S, DIV *Walter* Interdisciplinary study of period after World War I to Great Crash. African American and Anglo American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normalcy, economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz. Offered: jointly with HSTAA 270.

AFRAM 272 History of the South Since the Civil War (5) I&S, DIV *Walter* Reconstruction and its aftermath, the Agrarian (Populist) revolt, disfranchisement and segregation, the effects of urbanization and subsequent depression, desegregation, and the struggle for civil rights. Examines the New South, the conflict of ideology with structural and material change, and the place of the South in contemporary America.

AFRAM 315 Black Identities and Political Power (5) I&S Relates the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Instructors: Rivers Offered: jointly with POL S 315.

AFRAM 318 Black Literary Genres (5) VLPA, DIV Considers how generic forms and conventions have been discussed and distributed in the larger context of African American, or other African diasporic literary studies. Links the relationship between generic forms to questions of power within social, cultural, and historical contexts. Offered: jointly with ENGL 318; AWSp.

AFRAM 320 Black Women in Drama (5) VLPA, DIV Character types of black women as represented in plays by black women. Some black male playwrights are juxtaposed with black female writers for comparative analysis. Playwrights include Georgia Douglas Johnson, Angelina Grimke, Alice Childress, Lorraine Hansberry, Ira Aldridge, LeRoi Jones.

AFRAM 321 History of African American Women and the Feminist Movement (5) I&S, DIV "Feminist Movement" from early nineteenth century to present. Treats relationship between black and white women in their struggle for independence, at times together and at times apart. Discusses the

reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: jointly with GWSS 321.

AFRAM 330 Music, Folklore, and Performance in Black Society (5) VLPA *Steptoe* Focuses on cultural expressions created by people of African descent in the United States in the twentieth century, with an emphasis on music, folklore, dance, and humor. Offered: WSp.

AFRAM 334 Civil Rights and Black Power in the United States (5) VLPA/I&S, DIV *Steptoe* Examines the politics and culture of the modern African American freedom struggle, which began after WWII and continued into the 1970s. Interrogates political strategies associated with nonviolent direct action, armed self-reliance, and black nationalism, as well as the cultural expression that reflect these political currents. Offered: jointly with HSTAA 334.

AFRAM 337 Popular Music, Race, Identity, and Social Change (5) I&S/VLPA, DIV Focuses on popular music, shifting formations of race and identity and social change in various cultural, historical, and political contexts. Explores popular music as a tool for social change, a vehicle for community-building and a form of political and aesthetic expression.

AFRAM 340 The Harlem Renaissance: A Literary Study (5) VLPA, DIV Highlights Harlem Renaissance - 1912 through mid-1930s - as establishing a role for twentieth-century African American writer, encompassing literature, politics, and decolonization of the image of Africa, and solidifying integrationist and nationalist schools of thought. Examines images, themes, and characterizations in creating a literary aesthetic simultaneously American and African American.

AFRAM 350 Black Aesthetics (5) VLPA/I&S Draws on both multi-media and print sources, including fiction, poetry, prose, films, polemics, historiography and speeches to explore the idea of a black aesthetic in various cultural, historical, and political contexts within the twentieth century.

AFRAM 358 African American Literature (5) VLPA, DIV Selected writings, novels, short stories, plays, and poems by African American and African-descended writers in or from the United States.

Study of the historical, cultural, and intellectual context for the development of literary work by such writers, including attention to identity, power, and inequality. Offered: jointly with ENGL 358.

AFRAM 360 Black Digital Studies (5) I&S, DIV *LaShawnDa L. Pittman* Bridges and intersects two interdisciplinary fields - black studies and digital humanities. Attention to knowledge production. Role of archives, collections, research centers, the black press, and digital technology. Ideas related to power, memory, resistance, perspective and respectability politics in storytelling and control of the vehicles used to do so. Recommended: introduction to sociology; and introductory courses in African American studies and communications. Offered: AWSpS.

AFRAM 370 African American Political Thought (5) I&S Political ideologies and philosophies of pivotal African American historical figures and the conditions under which these ideologies are developed, rejected, and transformed. How ideologies relate to solution of African American political problems.

AFRAM 404 Advanced African American Studies in Humanities (5, max. 15) VLPA, DIV *Sonnet H. Retman* Advanced and interdisciplinary engagement with racial formation, Black cultural production, and resistance among people of African descent throughout the Diaspora. Draws upon cultural studies perspectives with an emphasis on literature, film, music, performance, visual and material culture. Topics include art, labor, migration, politics; racial capitalism and political economy; social movements and cultural history; black intellectual traditions. Prerequisite: either AES 150, AES 151, AAS 101, AFRAM 101, or CHSTU 101. Offered: AWSpS.

AFRAM 405 Advanced African American Studies in Social Science (5, max. 15) I&S, DIV *LaTasha Levy* Advanced study of racial formation, Black cultural production, and resistance among people of African descent throughout the Diaspora. Social science theories and methods used to examine various topics, including social scientific analysis of political history; social movements; intellectual traditions; theory; and intersections with urban, digital and legal studies; race, science, and biopolitics; public health and environmental studies. Prerequisite:

either AES 150, AES 151, AAS 101, AFRAM 101, or CHSTU 101. Offered: AWSpS.

AFRAM 437 Blacks in American Law (5) I&S *Walter* Historical continuity for changing relationship between American jurisprudence and black Americans, 1640-1986. Statutory and case law which determined role of blacks in American society, and use of law by blacks to gain civil and personal rights.

AFRAM 498 Special Topics in African American Studies (3-5, max. 15) I&S Topics in which students and faculty have developed an interest as a result of work done in other classes or as a result of the need to investigate in greater depth Afro-American Studies issues. Topics vary.

AFRAM 499 Independent Study and Research (1-5, max. 10) Identification and investigation of the problems and needs of the black community. Methods and alternatives of approaching these problems and needs. Students designate their areas of interest and subsequently pursue research and problem solving.

ASIAN-AMERICAN STUDIES

AAS 101 Introduction to Asian American Studies (5) I&S, DIV Provides an introduction to the interdisciplinary study of Asian Americans and Pacific Islanders in the United States. Examines issues of race, class, gender, and sexuality, immigration/migration, citizenship, labor, racialization, exclusion, social and political activism and social movements, family, community-building, war, imperialism, sovereignty, (post) colonialisms, transnationalism, culture, and creative expressions.

AAS 206 Contemporary Issues of Asian and Pacific Islander Americans (5) I&S, DIV Critically examines contemporary Asian and Pacific Islander American issues, ranging from the Cold War era to the present-day America. Topics include ethnic enclaves, community-building, civil rights, identity problems, family conflict, social organizations, political movements, and immigration.

AAS 210 Asian American and Pacific Islander American Identity: Race, Ethnicity, and Culture (5) I&S, DIV Examines the interdisciplinary nature of Asian American and Pacific Islander American

identity. Explores influences and manifestations of Asian and Pacific Islander ethnic identity, using literature, history, and social sciences. Topics include gender issues, socio-economic class, and mixed heritage in the United States.

AAS 220 Asian American Stereotypes in the Media (5) I&S Asian stereotypes popularized by American literature, film, radio, and television and their effects on Asian American history, psychology, and community.

AAS 250 Asian American Oral Histories (5) I&S, DIV *Nomura* Explores the intersection of race, class, gender, and sexuality in the lives of diverse Asian Americans through readings of oral histories narrating powerful stories including immigration, war, refugee flight, exclusion and discrimination, activism, community building, labor, race relations, family, generation gap, gender role changes, domestic violence, adoption, mixed race, religion, and culture.

AAS 300 U.S. Pacific Islander Contemporary Culture (5) I&S, DIV Examines United States Pacific Islander culture as informed by Pacific history, social and cultural organization. Emphasis on understanding contemporary experience in the United States and other diaspora communities. Major themes include post-colonialism, migration, family, religion, politics, gender, education, and transnational identity. Offered: jointly with ANTH 307; Sp.

AAS 310 Asian Americans and Pacific Islanders in the Pacific Northwest (5) I&S, DIV Examines the history and lives of Asian Americans and Pacific Islander communities in the Pacific Northwest from the eighteenth century. Topics include immigration, labor, gender, community building, challenges to racial discrimination and inequities, and activism to achieve social justice. Emphasizes Washington/Seattle with discussion of Oregon, Idaho, and British Columbia.

AAS 314 Ethnography, Transnationalism, and Community in Island Southeast Asia/Asian America (5) I&S, DIV Ethnographic exploration of the transformative processes of transnationalism in relation to identity and community formation in Southeast Asia and among Southeast Asian Americans. Experiential learning format concentrates on mini-ethnographic projects, field

trips, and group presentations. Prerequisite: either one 200-level ANTH course or one AAS/AES course. Offered: jointly with ANTH 314.

AAS 320 Hawaii's Literatures (5) VLPA, DIV *Sumida* Covers views by Native Hawaiian and multicultural writers and composers, studied within historical contexts ranging from the eighteenth century to the present. Examines how the colonization of a sovereign people redefines culture in ethnocentric, racist, Orientalist ways. Analyzes strategies of decolonization as presented and interpreted in works studied.

AAS 330 Asian American Theater (5) VLPA, DIV Covers drama from the 1970's to now, in historical contexts. They study of drama is dialogical, through dialogue. Themes are contested among the characters. Our studies participate, with the plays, in questioning race, ethnicity, gender, sexuality, and class. Includes students' performances of dramatic readings. No prior experience in theater is required.

AAS 350 Critical Overseas Chinese/Chinese American Histories (5) I&S, DIV Explores the differences and similarities of race, class, gender, sexuality, and generation influence on the life experiences of the Chinese (among the most diasporic people in the world) in America

AAS 360 Critical Filipino American Histories (5) I&S, DIV *Revilla* Examines the diverse historical and contemporary experiences of Filipinas and Filipinos in the United States in order to critically understand their immigration patterns, colonial histories, practices of identity constructions, and interactions with other groups.

AAS 370 Japanese Americans: Race, Culture, Discrimination, Gender, and Endurance (5) I&S, DIV Explores the changing nature of Japanese Americans from the first, Issei, to the latest generation. Topics include arrival, inequality and discrimination, Picture Brides, WW II, and minority-majority race relations. Lectures, readings, discussion, and videos offer varied approaches to view culture, values, community, concentration camps, gender, socio-economic, and psychological issue.

AAS 372 American Internment and Incarceration: Race, Discrimination, and Power (5) I&S, DIV Explores the racial animus, failure of political

leadership, and war hysteria in WW II that resulted in Japanese Americans incarcerated into American concentration camps. Conceptually different internment camps held thousands of Japanese, German, and Italian alien nationals. Topics include why, how, past and present concerns.

AAS 380 Asian American Community: Discrimination, Power, and Affirmation (5) I&S, DIV Covers three "sea-change" eras for Asian American communities: 1850 to 1941 (racial prejudice, discrimination, and perseverance) ; World War II to 1965 (inclusion of Asian communities except Japanese Americans) ; and 1965 to present (new Asian immigrant communities) . Topics include theory, comparative history, gender issues, cultural norms and values, and socio-economic endeavors.

AAS 385 Asian Americans and Pacific Islander Americans: Race, Law, and Justice (5) I&S, DIV Explores relationship of race, law, and justice in history of Asian Americans and Pacific Islander Americans. Examines how challenges and resistance to racial discrimination, inequality, and colonialism transformed our political and legal justice system. Issues include citizenship, immigration, sovereignty, gender, civil liberties, national security, work, property, language, education, and marriage.

AAS 392 Asian American and Pacific Islander Women (5) I&S, DIV Explores the intersection of race, ethnicity, gender, class, and sexuality in the lives of Asian American and Pacific Islander women. Examines how forces such as immigration, colonialism, sovereignty, labor, family, gender roles and relations, community, war, homeland politics, transnationalism, and social movements shaped and were shaped by these women. Offered: jointly with GWSS 392.

AAS 395 Critical Studies of Post-Vietnam War Southeast Asian Americans: Not Just Refugees (5) I&S, DIV Focuses on the experiences of Vietnamese, Cambodians/Khmer, Lao, and Indo-Chinese, addressing the various waves of these Southeast Asians to the USA after 1975. Beyond refugee status and the Vietnam War, students explore how ethnicity, age, class, gender and generation influences Southeast Asian groups in America.

AAS 401 Asian American Literature to the 1940s (5) VLP, DIV Asian American literature from

nineteenth-century immigrants to the 1940s. Emphasis on Chinese, Japanese, and Filipino writings detailing the experience and sensibility of first generation immigrants. Early twentieth-century writing focus on the development not only of Asian American community, but also of second generation American-born Asian American writers.

AAS 402 Contemporary Asian American Literature (5) VLP, DIV Examines Asian American literature from the 1950s to the present that require analyses of structures of power and possibilities for empowerment of an American "minority" group. Multi-ethnic focus, including Filipino American, Japanese American, Chinese American, Korean American, Vietnamese American, and South Asian American subjects.

AAS 403 Survey of Asian American Poetry (5) VLP, DIV Asian American poetry, nineteenth century to present. Readings include poetry of the early immigrant to America, cultural imperatives transferred from old world to new world, and establishment of an Asian American identity in poetry from 1870s through 1890s.

AAS 404 Advanced Asian American Studies in Humanities (5, max. 15) VLP, DIV *Linh Thuy Nguyen, Jang Wook Huh, Vince Schleitwiler* Asian American and Pacific Islander identity and cultures from a humanities perspective. Emphasis on literature, film, music, performance, visual, and material culture. Topics include globalization, war, empire, militarism, capitalism, racism. Interdisciplinary research methods utilize primary documents, historical analysis, cultural studies, and theory. Prerequisite: either AES 150, AES 151, AAS 101, AFRAM 101, or CHSTU 101. Offered: AWSpS.

AAS 406 Asian American Activism (5) I&S, DIV Explores the multiple political traditions forged by Asian Americans, from the earliest challenges to racist laws and unequal wages to the latest debates over affirmative action and racial profiling. Examines Asian American communities organized to oppose and to perpetuate social inequalities. Offered: jointly with HSTAA 406.

AAS 498 Special Topics (5, max. 10) I&S

AAS 499 Undergraduate Independent Study (1-5, max. 10)

CHICANO STUDIES

CHSTU 101 The Chicano/Mexican Ethnic Experience in the United States (5) I&S, DIV Examines the Chicano/Mexican American experience, with a focus on past and contemporary issues of race, ethnicity, and socio-economic status.

CHSTU 200 Latinos in the United States: Patterns of Racial, Ethnic, and Socio-Economic and Political Inequality (5) I&S, DIV Studies broad patterns of inequality formed by historical forces, race, ethnicity, nationality, gender, immigration, and social capital. Analyzes rapid growth and adjustment of old and newly established Latino communities, resulting from transnational migration from Latin America.

CHSTU 224 Life and Labor in the US-Mexico Borderlands (5) I&S, DIV *Alina R. Mendez* Focuses on inhabitants of the U.S.-Mexico borderlands since the nineteenth century. Emphasizes the fungible U.S.-Mexico border, industrialization of the Southwest and northern Mexico, cultures of migration, and the creation of "Greater Mexico." Influence of labor and migration in gender constructions.

CHSTU 254 Northwest Latino Ethnic Communities: Culture, Race, Class, Immigration, and Socio-Economic and Political Marginalization (5) I&S, DIV *Alina R. Mendez* Traces the history and development of the Latino community in the Pacific Northwest. The study engages racial and ethnic identities, rural to urban, inter-regional, and trans-border migration, and labor and economy to approach issues of marginalization. The Latino community is also contrasted across rural and urban spaces.

CHSTU 255 Mexican Women: Past and Present (5) I&S, DIV *Salas* Survey of women in Mexican society from Meso-American times to the 1940s.

CHSTU 256 Chicanas: Gender and Race Issues (5) I&S *Salas* Contemporary issues in the Chicana movement since the 1940s. Issues range from feminism and Chicana political, educational, and social organizations, to work, family, health, and the arts.

CHSTU 260 Introduction to Chicano Politics (5) I&S, DIV Surveys the political position and activities of Mexican American peoples in the United States from two perspectives: (1) Chicanos as objects of the political process of U.S. life, (2) contributions of the Chicano people to U.S. politics.

CHSTU 320 Food Sovereignty Movements in Mexico and the United States (5) I&S *Pena* Interdisciplinary study of agrifood systems and food sovereignty movements in Mexico and Mexican-origin communities in the United States. Uses the methods and materials of ethnography, agroecology, and political ecology in concert with environmental history, rural sociology, deconstructive discourse analysis, eco-criticism, and predictive ecology. Offered: A.

CHSTU 322 Indigenous Knowledge and Public Health in Mexican and Latinx Origin Communities (5) I&S, DIV *Devon G Pena* Critical medical anthropologies of public health through environmental justice/decolonial methods and groundings in ethnoscientific knowledge. Forces impinging on 'racialized' health regimes in Mexican/Latinx communities through study of structural violence, historical trauma and related disparities and inequities. Emphasis on healthcare and caring labor via decolonial critiques of settler colonialism, commodification, and indigenous survivance. Recommended: CHSTU 101 or ANTH 215. Offered: jointly with ANTH 325; W.

CHSTU 330 Chicano/Chicana Autobiography (5) I&S *LAURO H. FLORES* Explores the issue of Chicano, or Mexican American, identity. Examines statements of selfhood by Chicanos, studied in order to understand the relationship between individual and society in creating identity.

CHSTU 332 Chicano Film and Narrative (5) VLPA/I&S, DIV *Flores* Provides a historical overview of the evolution of Chicano culture through film. Critically examines the portrayal and self-portrayal of Chicanos in film and selected works of narrative. Taught in English.

CHSTU 340 Latina/Latino Theater (5) VLPA *Habell-Pallan* Explores the contextual, theoretical, thematic, and formal dimensions of U. S. Latina and Latino theater and performance art in the contemporary period. Examines performances and play scripts as a

way of analyzing innovations in form, language, and content produced by Chicano/Latino teatro and performance art.

CHSTU 342 Working Latinas and Latinos: Changing Sites of Identity in Daily Life (5) I&S, DIV Carolyn Pinedo-Turnovsky Sociological examination of Latina/o working lives. Focuses on inequalities and power relations that shape diverse socio-economic working experiences and social change across distinct Latino communities. Covers race and gender consciousness, informal/formal work, labor recruitment, changing contexts of home and family, youth and children's work, entrepreneurship, organizing, and immigration and labor legislation.

CHSTU 352 Latina/o Migrations: A Comparative Analysis (5) I&S, DIV Carolyn Pinedo-Turnovsky Comparative studies of migrations to the U.S. from Mexico, the Caribbean, Central and South America. Key theories and conceptual frameworks for understanding Latina/o migration and other key migrations to the U.S. Analyses of structural powers, the state, and identify formation in areas such as work, family, political participation, and community.

CHSTU 354 Unions, Labor, and Civil Rights in California and Pacific Northwest Agriculture (5) I&S Alina R. Mendez Comparative study of Southwest and Pacific Northwest farm workers against the social movement of the 1960s, its significance in the socio-political development of the Chicano civil rights movement, and its legacy. Uses historical and social science research methods along with analytical criticism to examine the period of social history.

CHSTU 356 The Chicano Family (5) I&S Salas The historical, psycho-social, and sociocultural role of the Chicano family from Meso-American times to the present.

CHSTU 359 U.S. Latino Politics (5) I&S, DIV Sophia J Wallace Examines historical and current political incorporation of Latinos in the United States. Topics include Latino voting and voter mobilization, office seeking and representation, Latino public opinion, and public policy formation on "Latino issues." Offered: jointly with POL S 359.

CHSTU 404 Advanced Chicano Studies in Humanities (5, max. 15) VLPA, DIV Alina R. Mendez,

LAURO H. FLORES Comparative interdisciplinary study of changing cultures and social movements of Chicano and Latino communities in the U.S. across the Americas, and the diaspora. Literature, film, music, performance, visual, and material culture. Topics include ethnicity, gender, labor, family, migration, diasporic and transborder communities, indigeneity, social movements, law, politics, and the environment. Prerequisite: either AES 150, AES 151, AAS 101, AFRAM 101, or CHSTU 101. Offered: AWSpS.

CHSTU 405 Advanced Chicano Studies in Social Science (5, max. 15) I&S, DIV Carolyn Pinedo-Turnovsky Advanced study of historical, cultural, social, political, and economic experiences of Chicanas/os and Latinas/os in the US across the Americas and diaspora through social science theories and methods. Topics include ethnicity, gender, labor, the military, family, migration, diasporic and transborder communities, indigeneity, social movements, global health, the law, politics, and the environment. Prerequisite: either AES 150, AES 151, AAS 101, AFRAM 101, or CHSTU 101. Offered: AWSpS.

CHSTU 416 Comparative Social Movements: Mexico and the United States (5) I&S, DIV D. PENA Historical, ethnographic, and theoretical perspectives in the study of Mexican-origin communities in social movements in Mexico and the United States with a focus on workers, immigrants, peasants, women, indigenous peoples, and students as forces of collective mobilization and social, cultural, and political change. Offered: jointly with ANTH 416.

CHSTU 435 Latinas and Labor in the Neoliberal Age (5) I&S, DIV Alina R. Mendez Social, political, and economic forces shaping the lives of Latina workers under neoliberalism. Recommended: CHSTU 101 or AES 150.

CHSTU 465 Contemporary Chicano Literature (5) VLPA Flores Examines one or more problems, themes, and/or figures in the developing body of Chicano literature. Taught in English.

CHSTU 466 Chicano Literature: Fiction (5) VLPA Flores Examines nineteenth- and early twentieth-century fiction, as well as contemporary works in attempts to trace the development of

Chicano fiction in the proper historical trajectory. Taught in English.

CHSTU 498 Special Topics in Chicano Studies (3-5, max. 10) I&S Interdisciplinary course concentrating on one or more aspects of the Chicano experience.

CHSTU 499 Independent Study and Research (1-6, max. 10) Students work individually or in teams.

SWAHILI

SWA 101 Basic Swahili (5) *Maulana* Introduces the Swahili language and the diverse cultures and customs of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. First in a sequence of three.

SWA 102 Basic Swahili (5) Introduces the Swahili language and the diverse cultures and customs of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. Second in a sequence of three. Prerequisite: SWA 101. Instructors: Maulana

SWA 103 Basic Swahili (5) Introduces the Swahili language and the diverse cultures and customs of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. Third in a sequence of three. Prerequisite: SWA 102. Instructors: Maulana

SWA 134 Intensive Basic Swahili (15) *Maulana* Introduces the Swahili language and the diverse cultures and customs of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. Offered: S.

SWA 201 Intermediate Swahili (5) VLPA Builds proficiency in the language by speaking, reading, and writing. Includes children's stories, newspaper articles, poetry, and folklore. First in a sequence of three. Prerequisite: either SWA 103 or SWA 134.

SWA 202 Intermediate Swahili (5) VLPA Builds proficiency in the language by speaking, reading, and writing. Includes children's stories, newspaper articles, poetry, and folklore. Second in a sequence of three. Prerequisite: SWA 201.

SWA 203 Intermediate Swahili (5) VLPA Builds proficiency in the language by speaking, reading, and writing. Includes children's stories, newspaper articles, poetry, and folklore. Third in a sequence of three. Prerequisite: SWA 202.

TAGALOG

TAGLG 101 Basic Tagalog (5) Introduces the Filipino language and culture. Students use the language through speaking, listening, reading, and writing at the novice level. Examines basic language structures, appropriate forms of address, and vocabulary for communication. First in a sequence of three Offered: A.

TAGLG 102 Basic Tagalog (5) Introduces the Filipino language and culture. Students use the language through speaking, listening, reading, and writing at the novice level. Examines basic language structures, appropriate forms of address, and vocabulary for communication. Second in a sequence of three. Prerequisite: TAGLG 101. Offered: W.

TAGLG 103 Basic Tagalog (5) Introduces the Filipino language and culture. Students use the language through speaking, listening, reading, and writing at the novice level. Examines basic language structures, appropriate forms of address, and vocabulary for communication. Third in a sequence of three. Prerequisite: TAGLG 102. Offered: Sp.

TAGLG 134 Intensive Basic Tagalog (15) Intensive introduction to the Filipino language and culture. Uses language through speaking, listening, reading, and writing at the novice level. Explores language structures, appropriate forms of address, and vocabulary for communication.

TAGLG 201 Intermediate Tagalog (5) VLPA Provides further reinforcement and practice of the lessons learned in basic Tagalog. Improves the communicative competence of the student by teaching the social rules along with the linguistic rules. First in a sequence of three. Prerequisite: either TAGLG 103 or TAGLG 134. Offered: A.

TAGLG 202 Intermediate Tagalog (5) VLPA Provides further reinforcement and practice of the lessons learned in basic Tagalog. Improves the communicative competence of the student by

teaching the social rules along with the linguistic rules. Second in a sequence of three. Prerequisite: TAGLG 201. Offered: W.

TAGLG 203 Intermediate Tagalog (5) VLPA Provides further reinforcement and practice of the lessons learned in basic Tagalog. Improves the communicative competence of the student by teaching the social rules along with the linguistic rules. Third in a sequence of three Prerequisite: TAGLG 202. Offered: Sp.

TAGLG 301 Advanced Tagalog (5) VLPA Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. First in a sequence of three. Prerequisite: TAGLG 203. Offered: A.

TAGLG 302 Advanced Tagalog (5) VLPA Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Second in a sequence of three. Prerequisite: TAGLG 301. Offered: A.

TAGLG 303 Advanced Tagalog (5) VLPA Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Third in a sequence of three. Prerequisite: TAGLG 302. Offered: A.

AMERICAN INDIAN STUDIES

AIS 102 Introduction to American Indian Studies (5) I&S, DIV Introduction to American Indian and Indigenous Studies, a field of research grounded in the study of American Indian and indigenous peoples with the goal of fostering individual and community wellness, political self-determination, cultural revitalization, and cross-cultural understanding. Presents foundational terms, concepts, and ideas for study in AIS major and minor.

AIS 103 The Indigenous Pacific Northwest (5) I&S, DIV *Dian Million, Charlotte Cote* Introduction to the cultures and governing structures of indigenous peoples of American Indian and First Nations tribal communities in the North, coastal British Columbia, and Pacific Northwest region as self-determining political actors in a contemporary multicultural and global region. Offered: jointly with JSIS 100; W.

AIS 110 Musical Traditions of Native North America (5) VLPA Utilizes historical and contemporary sources to survey the music and music-related traditions of Native North America. Examines traditional music and context from the Northwest Coast, Arctic, Southwest, Great Basin, Plains, Plateau, California, and Eastern Woodlands music-style areas, as well as contemporary neo-traditional and popular genres of American Indian music.

AIS 170 American Indian Art and Aesthetics (5) VLPA Introduces the aesthetic universe of Indigenous peoples of North America, peoples who are currently known as American Indian, Alaskan Native and Canadian First Nations. Explores multiple examples of North American Indigenous thought, expression, stories, dance, art, film, and music.

AIS 201 Introduction to American Indian Histories (5) I&S, DIV Survey of histories of Indians in the United States from Native perspectives. Presents traditional creation accounts and oral histories, archaeological, and historical evidence. Focus is cultural dynamics, considering change and continuity through prehistoric, protohistoric, colonial, and American periods.

AIS 202 Introduction to American Indian Contemporary and Social Issues (5) I&S, DIV Introduction to American Indian/Alaska Natives contemporary and social issues. Topics will include identification, demographics, government relations, treaty and water rights, Indian gaming, and treaty law.

AIS 203 Introduction to Indigenous Knowledges (5) I&S, DIV Introduction to Indigenous peoples' diverse and complementary ways of knowing in tribally and culturally specific contexts. Topics may include ecological knowledges, artistic knowledges, linguistic knowledges, medicinal knowledges, and Indigenous value systems as expressed in individual and communal contexts. Discussions of Indigenous epistemologies and ontologies. Instruction in contemporary Indigenous research practices.

AIS 209 The Unsettling of the Red Continent: American Indian History to 1815 (5) I&S, DIV *J. REID* Course examines the histories of indigenous peoples of North America through the War of 1812. Topics include the peopling of the Americas; early encounters and exchanges; and strategies American

Indians used to confront expanding European, American, and indigenous powers. Offered: jointly with HSTAA 209.

AIS 210 Inconvenient Indians and the "American Problem": American Indian History since 1815 (5) I&S, DIV As part of a two-quarter survey of American Indian history, this course examines the histories of indigenous peoples of North America from the nineteenth century to today. Students will explore a range of topics, including settler colonialism, indigenous power, American Indian - US relations, and Native governance and activism. Offered: jointly with HSTAA 210.

AIS 212 Indigenous Leaders and Activists (5) I&S, DIV J. REID By focusing on historic indigenous leaders and activists globally, students will examine issues of power, sovereignty, identity, and the role of the individual in shaping history. Additionally, students will examine contemporary, global issues that indigenous communities face and collaboratively contribute to a wiki of indigenous leaders and activist movements. Offered: jointly with HSTCMP 212.

AIS 230 Contemporary Indian Gaming and Casinos (5) I&S Overview of the contemporary \$18.5 billion Indian tribal gaming industry (with a focus on the Pacific Northwest), which is heavily regulated, is an economic engine for non-Indian communities, and funds economic, social, and cultural revitalization of Indian reservations, yet often generates intense political discussions.

AIS 240 Native North American Women (5) I&S, DIV Indian women in the social structure; historical and contemporary roles; changes in male-female relationships; problems and opportunities of contemporary women; the feminist movement and Indian rights.

AIS 253 Wood Design (5, max. 15) VLPA M. OLIVER Studio course in wood sculpture utilizing Pacific Northwest Indian hand tools. Properties of woods and their uses.

AIS 270 Native Peoples of the Northwest Coast (5) I&S, DIV *Dian Million, Charlotte Cote* Examines indigenous societies on the Pacific Northwest's western slope, from southeast Alaska to California, including social structures and relations, subsistence

strategies, belief systems, and changes over time, both before and after non-Natives' arrival. Offered: jointly with JSIS A 270.

AIS 271 Native Peoples of the Intermountain West (5) I&S Examines societies of the Columbia and Fraser River Plateau and Great Basin, including social structures and relations, subsistence strategies, belief systems, and changes over time, both before and after non-Natives' arrival.

AIS 272 Native Peoples of the Southeast (5) I&S Examines indigenous societies of North America's southeastern sector, including social structures and relations, subsistence strategies, belief systems, and changes over time, both before and after non-Natives' arrival.

AIS 275 Introductory Topics in American Indian and Indigenous Studies (1-5, max. 15) I&S Covers introductory topics on current research and readings in American Indian and indigenous studies.

AIS 308 American Indians and the Environment (5) I&S, DIV J. Reid Examines the historical relationships American Indians have possessed with local environments, with special attention to the ways these peoples have adapted to altered environments and new conditions, including migrations, involvement with markets of exchange, overhunting, dispossession, conservation, and mainstream environmentalism. Offered: jointly with ENVIR 308/HSTAA 308.

AIS 309 Methods in Amerindian Linguistics (5) VLPA/I&S Survey of native North American languages; introduction to systems of transcription; focus on reading of texts and analysis of grammatical structure in two languages; introduction to the use of microcomputers in the description and analysis of Native American texts.

AIS 310 A Linguistic Approach to Culture (3) VLPA/I&S Analytical study of a language, with special focus on Native Indian languages of North America. Emphasizes analysis of sound systems of languages, as well as a universal system of classifying and writing speech sounds. Emphasis on practical application, with time devoted to sound transcription practice.

AIS 311 The Indigenous History and Environment of the Salish Sea (5) I&S, DIV *Joshua L Reid* Uncovers the indigenous history and environment of the Salish Sea. Examines the "Salish Sea" concept and uncovers the history of the Salish Sea, from an indigenous perspective. Topics include pre-encounter indigenous settlement; early encounters; and contestations over resources, waters, and lands; contemporary issues. Taught at the Friday Harbor Labs. Offered: jointly with HSTAA 311; Sp.

AIS 313 American Indian Language-Salish (5)

AIS 314 American Indian Language-Salish (5)

AIS 315 American Indian Language-Salish (5)

AIS 317 North American Indians: The Southwest (5) I&S Overview of history and ethnography of the Southwest with emphasis on Apacheans, Pueblos, and Pimans/Yumans. Social organization, religion, worldview, and expressive culture of such specific groups as Navajo, Hopi, Zuni, Tewa, and Tohono O'odham.

AIS 330 United States-Indian Relations (5) I&S, DIV History of relations between American Indians and non-Indians in the United States with emphasis on national laws and policies. Examines origins and impacts of Indians' and non-Indians' strategies for dealing with each other, historical reasons for Indians' contemporary conditions and status.

AIS 331 American Indian History I to 1840 (5) I&S, DIV A. *HARMON* History of indigenous peoples and their descendants in the area that now constitutes the United States, from the eve of European discovery of the Americas to 1840. Emphasis on relations between indigenous peoples and immigrants. Offered: jointly with HSTAA 331.

AIS 332 American Indian History II Since 1840 (5) I&S, DIV A. *HARMON* History of American Indians in the United States from 1840 to the present. Emphasis on relations between Indians and non-Indians, government policies, and Indian strategies of survival. Offered: jointly with HSTAA 332.

AIS 335 American Indians and the Law (5) I&S, DIV *Charlotte Cote* History of laws governing American Indians: aboriginal law systems, U. S. laws,

and contemporary tribal laws. Effects of laws and legal institutions on contemporary Indian identity and tribal status, self-government, land ownership and use, natural resources, religion, family life, cultural and spiritual practices, crimes and punishment, and federal responsibilities for Indians.

AIS 340 Indian Children and Families (5) I&S, DIV D. *MILLION* Cross-cultural survey of Indian child rearing, family structure, and related social issues. Includes historical changes in family structure, value orientation and adaptation to a bicultural environment, education, child welfare, health problems, and aging.

AIS 341 Native Women in the Americas (5) I&S Historiography, sociology, biography, autobiography, and fiction about native women in the United States and Canada. Offered: jointly with GWSS 341.

AIS 350 Two-Dimensional Art of the Northwest Coast Indians (5, max. 15) VLPA *Oliver* Studio course emphasizes principles of structure and style of two-dimensional art which can be found on many old, traditional Northwest Coast pieces, such as painted storage boxes and chests, house panels, and ceremonial screens. Students apply these principles in creating a variety of graphic projects.

AIS 360 American Indians in Cinema (5) VLPA/I&S, DIV Studies representations of American Indians in American films from 1900 to present. Examines the foundations of American Indian stereotypes and how Hollywood helped create and perpetuate those stereotypes. Activities include reading critical materials, and viewing, discussing, and writing critically about films by non-Native directors.

AIS 365 Native Nation Governance (5) I&S, DIV *Jean M Dennison* Current issues important to Native nations today, using films and interactive case studies. Students research topics including: stereotypes, sovereignty, economy, citizenship, art, and politics. Provides an understanding of settler colonialism, seeks to understand challenges facing Native nations and look for creative solutions to those challenges.

AIS 370 Researching Indians' History (5) I&S A. *HARMON* Finding and interpreting sources of information about American Indians' history. Offered: jointly with HSTAA 315.

AIS 375 Special Topics in American Indian and Indigenous Studies (1-5, max. 15) I&S Covers special topics in American Indian and indigenous studies.

AIS 376 First Nations Literature (5) VLPA Literature written by First Nations Canadian authors as a form of cultural resistance and a re-seizing of identity.

AIS 377 Contemporary American Indian Literature (5) VLPA, DIV Creative writings (novels, short stories, poems) of contemporary Indian authors; the traditions out of which these works evolved. Differences between Indian writers and writers of the dominant European/American mainstream. Offered: jointly with ENGL 359.

AIS 378 Contemporary American Indian Literature: A Northwest Focus (5) VLPA, DIV *Dian Million* Literature and poetry of the Pacific Northwest (Coast and Plateau) Native peoples. Contemporary literature and discussion of social and cultural issues raised by American Indian writers and writing.

AIS 379 Powwow: Tradition and Innovation (5) VLPA/I&S, DIV Explores the historical and cultural roots of powwow. Discusses the ways this indigenous Native art form has adapted since prehistoric times.

AIS 380 Indigenous Food Sovereignty (5) I&S, DIV *Charlotte Cote* Food sovereignty within an Indigenous framework of decolonization and cultural revitalization. Demonstrates its potential to strengthen tribal autonomy, health, and wellness in Indigenous communities. How colonialism undermined Indigenous relationships to homelands, plants, and animals that sustained and nourished communities, leading to health disparities and inability to access traditional, nutritious foods. Offered: Sp.

AIS 385 Indigenous Ecologies and Climate Change (5) I&S, DIV Diverse ways in which Indigenous peoples around the world understand, experience, and are responding to contemporary global climate change. Topics include: the politics of traditional ecological knowledge, Indigenous environmental justice movements, community-scale climate "adaptation" practice, as each is related to Indigenous health and wellbeing, cultural continuance, and political sovereignty.

AIS 425 Indians in Western Washington History (5) I&S, DIV A. *HARMON* Relations of Indians and non-Indians in the Puget Sound region, from the 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with HSTAA 417.

AIS 431 History of American Indian Education (5) I&S, DIV Traditional and European-introduced methods of schooling, the federal role in Indian education, and contemporary Indian education issues. Special attention to Indian concepts of learning; boarding school education; the role of the Bureau of Indian Affairs; current trends in bilingual and bicultural education for Indians.

AIS 435 Spiritual Encounters: Native Spirituality in the Contact Era (5) I&S Explores North American indigenous interaction with, resistance to, and syncretization with Christianity, the European colonizers' religious system. Focuses on Native revitalization movements and new forms of religious expression such as the Indian Shaker Church and the Peyote Road, as well as the legal, social, and cultural issues of Native freedom of religion.

AIS 440 Reading Native American Women's Lives (5, max. 10) I&S, DIV Seminar based on social science writings, autobiographies, biographies, and fiction written by, with, or about indigenous women of the United States and Canada. Offered: jointly with GWSS 440.

AIS 441 Gender in Native American Societies (5) I&S, DIV D. *MILLION* Examines gender roles, identity, and relations in Native American pre- and post-contact societies. Analyzes how contact with European gender customs influenced and altered traditional gender practices, especially in regard to women's social position and the roles of the third/fourth genders in Native American communities.

AIS 442 Images of Natives in the Cinema and Popular Cultures (5) VLPA/I&S, DIV D. *HART, L. ROSS* Cultural examination of images of Native people in cinema and popular culture based on social science writings and films by or about Natives in the United States and Canada. Offered: jointly with GWSS 442.

AIS 443 Indigenous Films, Sovereign Visions (5) VLPA/I&S, DIV D. *HART, L. ROSS* Explores fiction, documentary, experimental film, and digital media

by indigenous artists from around the world. Focuses on personal, political, and cultural expression. Issues include media and sovereignty movements, political economy, language revitalization, the politics of decolonization, and indigenous aesthetics. Offered: jointly with COM 443.

AIS 444 Criminality and "Deviance" in Native Communities (5) *L. ROSS* Seminar based on social science writings and biographies written by and about incarcerated Natives and "deviance" in Native communities in the United States and Canada. Offered: jointly with GWSS 444.

AIS 446 American Indian Economic History (5) **I&S** *Harmon* Surveys and analyzes the history of American Indians' economic challenges and strategies. Topics include the economic cultures of indigenous North American societies, the impacts of European colonization and U.S. government policies, and tribal strategies aimed at improving Indians' economic circumstances. Offered: jointly with HSTAA 446.

AIS 451 Critical Conversations in American Indian Studies (5, max. 10) *D. MILLION* Critical issues in American Indian studies. Topics vary.

AIS 461 First Nations Government and Politics in Canada (5) **I&S, DIV** *Cote* Focuses on First Nations government and politics in Canada. Examines development of First Nations political governing structures with an introduction to the values, perspectives, concepts, and principles in Native political cultures. Explores federal Indian policy in context of First Nations strategies to become self-governing. Offered: jointly with JSIS A 426.

AIS 465 First Nations Filmmaking in Canada (5) **VLPA** *Cote* Examines First Nations video production in Canada; how film is utilized as a medium for addressing issues significant to First Nations. First Nations filmmakers "decolonize" the screen by providing real and positive images of First Nations people that correspond to their cultural and social experiences. Offered: jointly with JSIS A 422.

AIS 466 Producing the Documentary Short (5) **VLPA** *D. HART, L. ROSS* Explores documentary theory, methods, and aesthetics. From humanities, social science, and indigenous studies perspectives, students critique a self-produced documentary,

looking at methodology, perspective, and ethics. Students also explore pre-production, production, and post-production documentary techniques.

AIS 475 Research Topics in American Indian and Indigenous Studies (1-5, max. 15) **I&S** Covers current research in American Indian and indigenous studies content areas.

AIS 480 Indigenous Resistance and Resurgence Movements in the United States, Canada, and Mexico (5) **I&S, DIV** Examines Indigenous resistance and resurgence movements in the United States, Canada, and Mexico. Explores political and social contexts, political mobilization, cultural resurgence, and decolonizing struggles.

AIS 492 Indigenous Sovereignties (5) **I&S, DIV** *Jean M Dennison* Indigenous challenges of ongoing European settlement across the globe, focusing on both the global legacies of colonialism and the continued socio-political movements of Indigenous populations. What colonialism looks like today and how Indigenous peoples are challenging its authority. Recommended: either coursework or research in Indigenous Studies. Offered: Sp.

AIS 497 Internship (1-5, max. 10) Internship and academic project. Faculty sponsor and internship supervisor are required. Offered: AWSpS.

AIS 499 Independent Study (1-5, max. 15) **VLPA/I&S** Readings and/or research under faculty supervision.

AIS 501 Documentary Film/Video Research Methods in Native Communities (5) *D. HART, L. ROSS* Seminar exploring theoretical, methodological, and aesthetic issues when researching documentary film and video projects in Native American communities. Utilizes readings, screening, discussions, and a major research project to explore issues of documentary representation, ethics, and historiography. First part of a two-quarter documentary production sequence. Offered: jointly with GWSS 510.

AIS 503 Documentary Theory, Form, and Practice (5) *D. HART, L. ROSS* Explores documentary theory and practice, utilizing readings and documentary filmmaking exercises. Students create short documentary sequences while investigating traditional and more experimental ideas about the

non-fiction form; theories of representation, subject ethics, documentary authenticity, the intersection of fiction and non-fiction forms, documentary and performance, documentary and historiography.

AIS 576 Indigenous Methodology (5) *Jean M Dennison* Creating a collaborative and collective space for students to explore the potential of various Indigenous approaches to research. Oriented around critical feedback from the instructor and fellow classmates. Students are expected to actively engage in class readings, discussions, and commitments.

AIS 590 Special Topics (1-5, max. 15) Offered by visitors or resident faculty as a one-time, in-depth study of special interest.

AIS 592 Indigenous Sovereignties (5) *Jean M Dennison* Indigenous challenges of ongoing European settlement across the globe, focusing on both the global legacies of colonialism and the continued socio-political movements of Indigenous populations. What colonialism looks like today and how Indigenous peoples are challenging its authority. Recommended: either coursework or research in Indigenous Studies. Offered: Sp.

ANTHROPOLOGY

ANTHROPOLOGY

ANTH 100 Introduction to Anthropology (5) I&S Introduction to the subfields of archaeology, biocultural anthropology, and sociocultural anthropology through the examination of selected problems in human physical, cultural, and social evolution. Not recommended for students who have had other courses in anthropology, archaeology, or biocultural anthropology.

ANTH 101 Exploring Sociocultural Anthropology (5) I&S, DIV Introduces perspectives from sociocultural anthropology on the diversity and the dynamics of collective human life. Examines how individual lives are shaped by broader social and cultural contexts, how people make meaning, and how power relations work. Introduces ethnography as a method for documenting and understanding social and cultural life.

ANTH 150 Culture and Rights: Exploring the Meaning and Practice of Human Rights (5) I&S, DIV

Examines social justice issues with the aim of obtaining deeper understanding of human rights. Analyzes historical and theoretical foundations and introduces international and regional institutions designed to implement and enforce human rights. Case studies in sovereignty, war crimes, ethnic cleansing, genocide, torture, truth commissions, and forgiveness.

ANTH 202 Principles of Sociocultural Anthropology (5) I&S Comparison of life ways of various non-Western and Western peoples. Introduction to basic theories and methods used in the field.

ANTH 203 Introduction to Anthropological Linguistics (5) I&S/VLPA Linguistic methods and theories used within anthropology. Basic structural features of language; human language and animal communication compared; evidence for the innate nature of language. Language and culture: linguistic relativism, ethnography of communication, sociolinguistics. Language and nationalism, language politics in the United States and elsewhere. Offered: jointly with LING 203.

ANTH 204 Reading Ethnography (5) I&S Introduction to the descriptive and analytic literature of cultural anthropology. Extended examination of representative accounts of the lifeway of peoples from selected areas of the world with an emphasis on methods of observation and analysis.

ANTH 206 The Cultural Animal (5) I&S/NW Examination of the interaction between biology and culture in shaping human social behavior. Basic principles of natural selection, gene-environment interaction, cultural transmission, learning, and cultural evolution; application of these to various topics, including gender, violence, politics, kinship, and religion.

ANTH 207 Class and Culture in America (5) I&S, DIV Anthropological view of the contemporary United States with emphasis on social class. Through ethnographic readings examines education, work, political economy, working class experience and the ideology of the middle class, and relations between class and race, gender, ethnicity, language, place, sexuality, and culture.

ANTH 208 The Culture Concept (5) I&S History of the culture concept and its use in the field of cultural

anthropology. History of its emergence in European colonial expansion and contemporary debates about its place as the central concept defining the field of anthropology.

ANTH 209 Anthropology through Visual Media (5) VLPA/I&S Theories of culture and cultural variation, as seen and understood through visual media such as films, video, and photography.

ANTH 210 Introduction to Environmental Anthropology (5) NW/I&S Introduction to human/environment interactions from various anthropological perspectives. Intellectual history of anthropological approaches to environment, emphasizing the mutual interconnectedness of people and nature. Survey of evolutionary models; cultural ecology; systems approaches; indigenous knowledge; ethnoecology; nature and the state; political ecology; ecofeminism; and environmentalism.

ANTH 211 Environmental Justice (5) I&S, DIV Examines introductory studies of environmental racism and ecological injustice in the United States and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for "eco-justice." Offered: jointly with AES 211/ENVIR 211.

ANTH 213 Anthropology and Sport (5) I&S, DIV Introduces theories, methods, and findings of sociocultural anthropology through a focus on sport. Considers sport as linked to identities, nationalism, gender, race, class, religion, and other issues. Explores cultural rituals of sport, potentials and obstacles to sport transcending social differences, and sport's role in education, youth development, and community building.

ANTH 215 Introduction to Medical Anthropology and Global Health (5) I&S, DIV Explores influences of global processes on health of U.S. and other societies from a social-justice perspective. Emphasizes inter-relationships between cultural, environmental, social-economic, political, and medical systems that contribute to health status, outcomes, policies, and healthcare delivery. Focuses on health disparities within and between societies and communities around the world.

ANTH 228 Identities: Race, Class, Gender, and Sexuality in Anthropology (5) I&S, DIV An introduction to the study of race, class, gender, and sexuality in anthropology. Through ethnographic and theoretical readings, students are introduced to the concept of identity as intersectional construction and social performance.

ANTH 233 Introduction to Language and Society (5) VLPA, DIV *Evans, Wassink* Introduces the study of sociolects, the varieties of language that arise from differences in cultural and societal groups, often reflective of power inequalities. Raises awareness of the role that society and the individual play in shaping sociolects via the systematic observation and critical discussion of linguistic phenomena. Offered: jointly with COM 233/LING 233; A.

ANTH 235 Global Feminist Art (5) VLPA/I&S Introduces feminism as a way of thinking about visual art practice in terms of social hierarchy, aesthetic form, and ideology. Explores how feminist artists working in diverse locations and cultural traditions challenge, at the local and global level, artistic conventions and representations of gender, sexuality, race, class, and nationality. Offered: jointly with GWSS 235.

ANTH 236 The Mystery behind the Material World (5) I&S Things are everywhere. We make them and they also make us. Things are evocative, aesthetic, and unnerving. They define us. We need them to communicate, to remember, to govern. But things need us too. This course is an introduction to the study of things, architecture, and so on from an interdisciplinary perspective. Topics such as identity, memory, commodities/gifts, cognition, and agency are explored through the analysis of the material world. Offered: jointly with ARCHY 236.

ANTH 269 Special Topics in Anthropology (3-5, max. 10) I&S Delineation and analysis of a specific problem or related problems in anthropology.

ANTH 280 Cultures of Global Capital (5) I&S Designed to introduce students to the study of cross-border phenomenon including global capital, migration, international philanthropy, and terrorism from an anthropological perspective. Introduces theories of globalization and the approaches anthropologists have taken in studying patterns of movement and circulation.

ANTH 289 Identities: Service Learning (3) I&S**ANTH 301 Human Nature and Culture (3) I&S**

Comparison of various anthropological perspectives on the sources of variation in customs, values, and beliefs of human groups, including non-Western peoples and contemporary Americans.

ANTH 302 Body and Soul: Introduction to Medical Anthropology and Global Health as Social Justice Praxis (5) I&S, DIV

Examines health/sickness patterns as intersecting cultural norms, ideology, social structure, life course, political economy, and environmental conditions unfolding on terrains of inequality mediated by power and representations. Critical analysis of med-anthropology ethnography as practice and theory. Surveys the field across ranging global contexts. Students build frameworks for solving urgent human problems.

ANTH 303 Technologies of Health (5) I&S/VLPA

Ethnographic, historical, and philosophical approaches to the study of technologies in biomedical sciences and care. Topics include infrastructures, colonialism development, reproduction, race, gender, disability, subjectivities, visualization, and diagnosis. Prerequisite: ANTH 208, ANTH 215, or ANTH 302. Offered: AWSp.

ANTH 304 Anthropology of Beauty (5) I&S, DIV

What is beautiful? Who creates the standard(s)? How have the standards changed? How does race/ethnicity, gender, class, age, sexuality and (dis)ability intersect with this notion of beauty? Explores the augmentation/modification/transformation of the 'abnormal' body. Includes a critical look at structures and institutions that create and perpetuate beauty ideals.

ANTH 305 Anthropology of the Body (5) I&S

Surveys classic anthropological literature examining the relationship between culture and the body. Examines Euroamerican body culture historically. Explores how the body is represented in mass media and the effects this has on everyday body ideologies.

ANTH 306 The Power of Representation: Pacific Islander Voices (5) VLPA/I&S, DIV Focuses on how Pacific Islands and Islanders are being represented by Pacific Islander artists, writers, performers, poets, filmmakers, and scholars. By creatively challenging older dominant misrepresentations in ways these

individuals are fashioning new identities that transform images and identities, as well as extend the boundaries of "the Pacific."

ANTH 307 U.S. Pacific Islander Contemporary Culture (5) I&S, DIV Examines United States Pacific Islander culture as informed by Pacific history, social and cultural organization. Emphasis on understanding contemporary experience in the United States and other diaspora communities. Major themes include post-colonialism, migration, family, religion, politics, gender, education, and transnational identify. Offered: jointly with AAS 300; Sp.

ANTH 308 The Anthropology of Gender, Women's Health, and Reproduction (5) I&S, DIV Examines anthropological approaches to improving women's health by surveying women's health history, status, and participation in healthcare. Analyzes a range of health issues, including reproductive healthcare problems, women's body images and sexuality, current health policies, as related to daily structures and relationships of gender, race/ethnicity, class.

ANTH 309 Indigenous Epistemologies and Oceanic Canoes (5) VLPA/I&S, DIV Like a western textbook, outrigger canoes carry scientific knowledge and ingenuity holistic in scope, and intertwined with community and environmental relationships. Centers on Oceanic writers, artists, weavers, and canoe builders. Students engage in group research to help celebrate and build awareness for the intellectual contributions of Pacific Islanders.

ANTH 310 Native North American Societies (5) I&S, DIV *Smith* Traditional cultures of America north of Mexico, emphasizing diversity of North American Indian and Eskimo societies. Origins of Native-American culture areas and language groupings; subsistence systems; levels of social organization; European conquest and colonialism; and description of representative cultures from the ten culture areas.

ANTH 311 The Cultural Politics of Diet and Nutrition (5) I&S Examines current debates within the United States about what dietary guidelines are optimal for human health; how changing conceptions of individual responsibility and political life are framing these debates; how social movements for food sovereignty are changing food practices: and how

eaters define their ethics through food. Offered: AWSpS.

ANTH 312 Pacific Islands Literature and Film (5) VLPA/I&S, DIV Examines the Pacific through a detailed consideration of creative works by contemporary Pacific writers and filmmakers. Topics include cultural identity; colonialism and its effects on Indigenous peoples, land, wellness, family, and community; and the importance of knowing where you come from.

ANTH 313 Peoples of Africa (5) I&S Survey of the many cultures of pre- and post-colonial sub-Saharan Africa. Appreciation of the adaptability, strength, and creativity of African peoples.

ANTH 314 Ethnography, Transnationalism, and Community in Island Southeast Asia/Asian America (5) I&S, DIV Ethnographic exploration of the transformative processes of transnationalism in relation to identity and community formation in Southeast Asia and among Southeast Asian Americans. Experiential learning format concentrates on mini-ethnographic projects, field trips, and group presentations. Prerequisite: either one 200-level ANTH course or one AAS/AES course. Offered: jointly with AAS 314.

ANTH 315 Southeast Asian Civilization: Buddhist and Vietnamese (5) I&S, DIV Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos and in Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Offered: jointly with JSIS A 315.

ANTH 316 Modern South Asia (5) I&S Twentieth-century history and society of Indian subcontinent. Topics include nationalism, rural and urban life, popular culture, gender, and environmental politics. Offered: jointly with JSIS A 316.

ANTH 317 Anthropology of Tibetan Civilization (5) I&S Introduces the basic features of Tibetan society and culture, exploring how the global debate over Tibet's past, present, and future relates to contemporary concerns in anthropology, through the examination of Tibetan history, social and political organization, religion, and other cultural

themes in both traditional and contemporary contexts.

ANTH 318 Anthropology of Islam and Muslim Societies (3/5) I&S Examines diverse expression and experiences of Islam from anthropological perspective. Considers Islam as a lived experience by emphasizing everyday lives of Muslims in context through ethnographic accounts. Covers range of issues including identity, rituals, gender, and political Islam. Prerequisite: one 200-level anthropology course.

ANTH 321 Comparative Religion (3/5) I&S Anthropological approaches to religious experience and belief with emphasis on conceptual issues such as ritual, symbolism, identity, ecstatic experience, and revitalization movements in the context of globalization. Also addresses the diversity of religious expression in American culture and how that compares with other societies. Offered: jointly with RELIG 321.

ANTH 322 Comparative Study of Death (5) I&S Death analyzed from a cross-cultural perspective. Topics include funerary practices, concepts of the soul and afterlife, cultural variations in grief, cemeteries as folk art, and medical and ethical issues in comparative context. American death practices compared to those of other cultures. Offered: jointly with RELIG 320.

ANTH 323 Human Rights Law in Culture and Practice (5) I&S, DIV *Arzoo Osanloo* Introduces the complexities of issues surrounding human rights. Examines human rights concerns through critical analyses, taking into account legal, social, economic, and historical variables. Offered: jointly with LSJ 321.

ANTH 324 Current Issues in Medical Anthropology and Global Health (2) I&S Guest speakers showcase local expertise in the field. Speakers share information about the path that led them to research in MAGH, and raise current research questions in their field of expertise. Credit/no-credit only.

ANTH 325 Indigenous Knowledge and Public Health in Mexican and Latinx Origin Communities (5) I&S, DIV *Devon G Pena* Critical medical anthropologies of public health through environmental justice/decolonial methods and groundings in

ethnoscience knowledge. Forces impinging on 'racialized' health regimes in Mexican/Latinx communities through study of structural violence, historical trauma and related disparities and inequities. Emphasis on healthcare and caring labor via decolonial critiques of settler colonialism, commodification, and indigenous survivance. Recommended: CHSTU 101 or ANTH 215. Offered: jointly with CHSTU 322; W.

ANTH 328 Gender and Sexuality in China (5) I&S, DIV Explores gender and sexuality in China's process of modernization, from the late Qing dynasty through the building of the Republic, Communist revolution, and post-Mao economic reform. Examines, through historical, anthropological, and cultural studies scholarship, the centrality of these social constructs in terms of family, state, labor, body, and ethnicity. Offered: jointly with GWSS 328/JSIS A 328.

ANTH 330 Religion, Identity, and Cultural Pluralism (5) I&S, DIV The role of religion in shaping personal and communal identity in a pluralistic society. Themes include current dimensions of American pluralism, effects of ethnicity, immigration, and electronic communication on building religious communities, and issues of conflict, violence, and reconciliation. Offered: jointly with RELIG 329.

ANTH 331 Topics in Critical Sport Studies and Research (5) I&S Sport-related research. Students apply theory to critique the practices and global impacts of sport with emphasis on making sport more democratic, inclusive, accessible, and humane. Prerequisite: ANTH 213.

ANTH 339 Social Movements in Contemporary India (5) I&S, DIV P. RAMAMURTHY Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women's movements.
